About the Author

About the Author

William A. Sabin was publisher of business books in the Professional Book Group, a division of McGraw-Hill. The author of many articles about style, usage, and grammar, he was also a frequent and popular speaker at professional and academic conferences in the United States and Canada. He supported the plain language movement. A master of the rules, Bill Sabin was also a strong proponent of flexibility, known for urging good writers to trust their instincts. In 1997 he became a year-round resident of Bristol, Maine, and by any standard a confirmed Maniac. For more on Bill Sabin and the history of *The Gregg Reference Manual*, see “About the Book and the Author,” on page viii.

About the Name *Gregg*

John Robert Gregg was the inventor of Gregg shorthand, which was considered a major improvement over other speedwriting systems then in use. He was born in Ireland in 1867, and his ideas on this subject first appeared in 1888 in a short pamphlet published in Liverpool when he was 21. In 1893 he came to Chicago and founded the Gregg Publishing Company. The first edition of *Gregg Shorthand* was released that same year. Because Gregg shorthand was relatively easy to learn, it soon was taught in schools around the world, and in an age when there were no electronic recording devices, it became an essential skill for reporters, scholars, authors, and even political figures. Mr. Gregg died in 1948 at the age of 81.

When McGraw-Hill acquired the Gregg Publishing Company in 1948, the Gregg name had come to stand for the highest-quality materials designed for academic programs in business education. It is for that reason that *The Gregg Reference Manual* continues to bear the Gregg name, even though the manual is no longer aimed exclusively at an academic audience. Indeed, *The Gregg Reference Manual* now serves as the primary reference for professionals in all fields who are looking for authoritative guidance on matters of style, grammar, usage, and formatting.

About the Artist and the Art

Nancy Freeman is a painter and printmaker who lives in Damariscotta, Maine. The collage that appears on the cover of GRM—and is used in part throughout the manual—is one in her memorial series called the Jody series; it is reproduced here with the artist’s permission. Evocative of a musical instrument, the collage seemed to be a particularly fitting choice for an edition designed to pay tribute to an author known for his acute sensitivity to the sound of words, to the art and music of well-crafted language. Then, too, the visual interplay between the flowing colors and the strong black lines that run vertically down the page bring to mind the heart of Bill Sabin’s philosophy, that good writing emerges from achieving a delicate balance between rules and instincts, structure and creativity.

About the Book and the Author

In 1964 Bill Sabin became the revising coauthor, together with Ruth E. Gavin, of the fourth edition of McGraw-Hill's *Reference Manual for Stenographers and Typists*. At the time Bill was a young editor working in the Gregg Publishing Division, and the book was a modest paperback of 188 pages, including 13 pages of exercises. By the time the fourth edition was published in 1970, it had evolved into a hardcover book of 277 pages. Ruth Gavin died shortly before the publication of that edition, so Bill became the sole author, and with each succeeding edition, the book grew in heft and substance. The fifth edition, in 1977, was published in three formats; in addition to the regular hardcover copy, there were pocket-size and spiral editions. The book also sported for the first time Bill's inimitable essays on usage: "Mastering Number Style: One (or 1?) Approach"; "A Fresh Look at Capitalization"; "The Comma Trauma"; "The Plight of the Compound Adjective—Or, Where Have All the Hyphens Gone?"; "The Semicolon; and Other Myths"; and "Re: Abbrevs." With the fifth edition, the book was also given its present title and GRM was born.

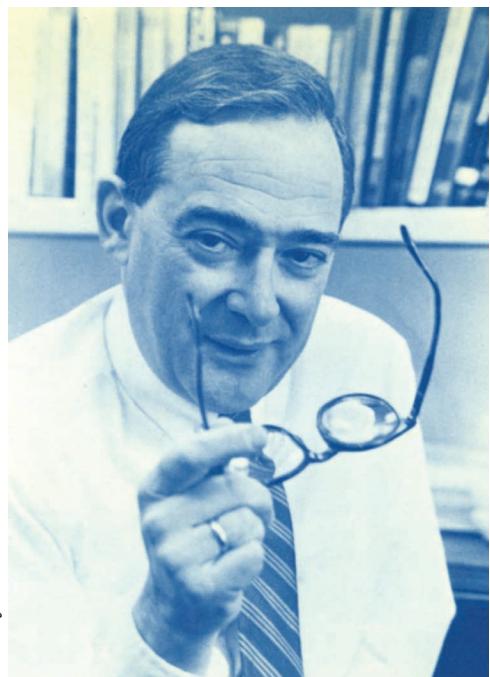

Photo: Joe Ruskin

By the time of the sixth edition in 1985, the book had added "new guidelines dealing with all aspects of business and academic reports," an enlarged section on tables, a section on preparing manuscripts for publication, and a word processing glossary. When the seventh edition appeared in 1994, its new material included the formatting of executive and financial documents, three ways of presenting a résumé, an expanded glossary of computer

terms, and new guidelines on the effect of electronic equipment on format, style, and technique. Two years later the book jacket of the eighth edition states simply, "The manual spans the stylistic demands of business and academic writing." The ninth edition, published in 2001, was supplemented by worksheets on grammar, usage, and style, an instructor's manual, and other materials for classroom instruction. In 2005, the tenth edition added a Web site, including an expanded, electronic version of the print index and the special "Ask the Author" feature, which allowed readers to e-mail the author their most pressing questions on grammar and style—both routine and "once-in-a-lifetime" questions.

Bill's career blossomed with GRM. After receiving an M.A. from Yale in 1956, he had gone to work as an editor for Pitman Publishing in New York. The company was known at the time for developing the stenographic system of Pitman shorthand, and so when Bill transferred to McGraw-Hill in 1961, he was naturally associated with Gregg shorthand and with business books. (He probably did not tell McGraw-Hill that, in fact, at Pitman he had been working on textbooks in Russian—a language he learned in the process of editing the textbooks.) In the 1970 *Reference Manual for Stenographers and Typists*, he is described as Editor in Chief of the

Gregg Division at McGraw-Hill and coauthor, with Mary Butera and Ruthetta Krause, of *College English: Grammar and Style*. By 1977 he is listed as Publisher of Business and Office Education and, by 1985, as Editor in Chief of Business Books in the Professional and Reference Division.

In 1990 he formally “retired,” but as he says in a short sketch he wrote in 2006, “I never really did retire, because once I left the publishing company, I was able to devote full time to revising the reference manual every four or five years and keeping it up to date. Even now, I spend a good deal of time on the phone and on the computer, answering questions from callers and writers from all parts of the country. Since McGraw-Hill established a Web site for GRM with an ‘Ask the Author’ service, the number and range of questions have increased dramatically.”

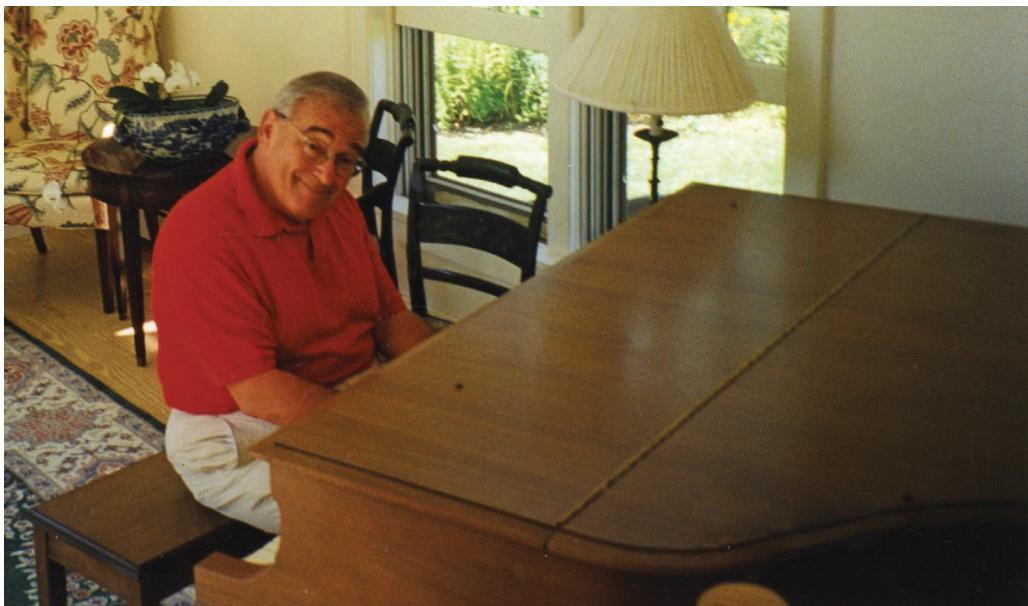

Bill wrote these comments shortly after receiving the diagnosis for the cancer that ended his life on January 1, 2009. In the two and a half years that intervened, he was zealous about keeping up with “Ask the Author.” And he set to work at once on making the revisions he deemed necessary for the eleventh edition, even though no one at McGraw-Hill had yet asked him to do so. In the last four months of his life, when he was confined to a wheelchair, he had a computer set up in his room, and when he woke as usual at 4 a.m., he would ask a nurse to place him in front of it. When his daughter Margaret arrived a few days before Christmas, he asked her to help him review his revisions; he finished at noon on December 29. His wife discovered among his effects one of the passwords he had used in recent years: “I love GRM.”

The current edition is the fruit of a lifetime of dedication, love, and loving struggle with the English language.

A Personal Tribute

Remarks given at Bill's Memorial by his sister-in-law, Mary Lee Noonan

When I first met Bill in the summer of 1965, he was already at work on *The Gregg Reference Manual*, often yoked to his typewriter while the rest of us flittered off to the beach. We were slyly warned that we might find our names used in illustrative sentences. We admired his discipline. But we had no idea that he would continue to write successive editions until the end of his life, that in his hands it would become a classic, firmly in place on a sea of desks across the country.

Similarly, I wonder if those who use it have any idea of what GRM can tell them about the man who marshals their words. Certainly those of us who knew and loved Bill recognize his voice with delight. For example, his family knows of Bill's passion for music and particularly his gifts at the piano, so any musical references leap out. But what could Bill's music possibly have to do with rules for the use of words in business prose? Well, here is Bill on the subject of the semicolon and "other myths": "Mastery over the rules of punctuation depends to a considerable extent on cultivating a sensitivity to the way a sentence moves and the way it sounds." He urges his readers, "Develop in yourself a disciplined sense of the relationship between the sound and the structure and the mechanics of language"—in other words, the music. For Bill there was no separation between the words and the music. This fusion is at the heart of *The Gregg Reference Manual*.

We can also find Bill the gourmet popping out from the pages. By inversion, his standards of culinary excellence gave Bill his definition of an abbreviation. "To put matters in perspective, it may help to think of abbreviations as belonging to the same class of objects as instant coffee and frozen dinners. They don't take up much space and they're great when you're in a hurry, but they never have the taste of the real thing." For Bill, real life was a moveable feast without abbreviations.

A domestic scene enlivens Bill's analysis of how to use a period. "I once posted the following note in my home: 'Will you please close the door.' My children knew that this was not really a polite request but a firm parental command. When they chose to ignore it, I amended the sign to read,

'Will you please close the door!' (I was relying on the exclamation point to carry the full force of my exasperation.) That approach failed too, so I tried a new tack in diplomacy, amending the sign once again: 'Will you please close the door?' My children now knew they had broken my spirit. They now sensed in the sign a pleading note, a petitioning tone, the begging of a favor. They also knew that now I was asking them a real yes-or-no question (or at least I was creating the illusion of asking). Then, in the paradoxical way that children have, once they knew they had the chance to say no, they began to answer my question with tacit affirmation, tugging the door after them on the way out or kicking it shut behind them on the way in." With such a sensitive ear for nuanced words and a wry eye for behavior, Bill could have been a novelist.

And in Bill's discussion of the "comma trauma," I hear a paean, perhaps conscious, perhaps unconscious, to his beloved wife Marie. He is describing "the single inflectional arc that embraces each group of words in one closely knit unit"—with no need for commas. Bill continues, "You can also hear the same continuous arc in the phrase *my wife Marie*. By all that is logical, the name *Marie* should be set off by commas because it is not needed to establish which of my wives I'm talking about; unlike an Arabian sheik, I have only one wife. . . . Although not essential to the meaning, the name *Marie* is treated as if it were essential because of what style manuals call 'a very close relationship with the preceding words.' Although it is difficult, if not impossible, to state in concrete terms what constitutes 'a very close relationship,' you can tell by the sound when it exists." Bill had perfect pitch.

In closing, I turn to Bill's comments on how consequential or inconsequential the use of a hyphen can be. "What does matter," he says, "is that we express ourselves with precision, verve, and grace." In *The Gregg Reference Manual*, Bill wrote vividly about style in the use of words. In his life, he created a style of his own that was never without "precision, verve, and grace." It mattered.

Professional Tributes

A selection of tributes from Bill's colleagues in the world of business writing. For more tributes from Bill's colleagues, visit the GRM Web site at <www.gregg.com>.

With Bill's passing, a light has gone out on the path to clear written communication. The GRM and Bill Sabin were so connected it is hard to speak of one and not the other. The GRM has been—and will always be—the “ultimate authority” on the rules of fine writing. Yet Bill had a way of presenting these rules so they applied to everyday use—becoming usable tools rather than rules merely committed to memory. —*Belinda and Bill Belisle, training consultants, Belisle & Associates, West Garden Grove, California*

William Sabin was my teacher. I never sat in a classroom with him, never met him, but year after year he taught me the heart of grammar and style through his *Gregg Reference Manual*. I carried his book with me everywhere, his instructions guiding me, his humor charming me. One day a seminar company asked me to start teaching business grammar and writing in cities across the U.S., all from what I learned from Mr. Sabin and his book. When he learned of what I was doing, Mr. Sabin wrote me, offered help with any questions from me and my audiences. I love what I do, but I couldn't do it (or do it as well), if not for the gift of William Sabin.

—*Christy Woods, business trainer, editor, writer, Langley Park, Maryland*

Opening the GRM was like walking through the front door of my warm, cozy, but small shelter into the vast, splendid, and full landscape of the written word. My journey continues to show me the landscape's many details, nuances, hazards, and pitfalls. The GRM is my map to the terrain—actually, it's more like a GPS in its detail. Bill Sabin was the guru sitting placidly atop the highest peak, surveying the landscape with wisdom and penetrating scrutiny. And when I found him, he, like a true guru, shared his wisdom freely. —*David W. Lloyd, instructor, Wordsmith Associates, and plain language consultant, Edmonton, Alberta*

Bill with his family in 2005

Preface

The Gregg Reference Manual is intended for anyone who writes, edits, or prepares material for distribution or publication. For over fifty years this manual has been recognized as the best style manual for business professionals and for students who want to master the on-the-job standards of business professionals.

GRM will provide you with answers that can't be found in comparable manuals. That probably explains why GRM has been so warmly received over the years. The unsolicited five-star reviews on the Amazon Web site are only one indication of the reputation that *The Gregg Reference Manual* enjoys among people in professional organizations and educational institutions.

GRM serves as a *survival manual* for those professionals who no longer enjoy the help of trained assistants to ensure the quality of the documents they must produce. And it serves as an indispensable *training manual* for those who want to improve their language skills so that they can achieve that level of confidence they have always craved.

Features of the New Edition

The eleventh edition of *The Gregg Reference Manual* has been revised and enhanced to satisfy the continually evolving demands of business and academic writers. In addition, this special four-color edition of GRM pays tribute to the author Bill Sabin with personal photographs and a new biographical essay, “About the Book and the Author” (pages viii–ix); “A Personal Tribute,” remarks given by Bill’s sister-in-law, Mary Lee Noonan, at his Memorial (pages x–xi); and a selection of tributes from Bill’s colleagues in the world of business writing, “Professional Tributes” (page xii). Here are some of the other key features of this new edition of *The Gregg Reference Manual*.

Essays on the Nature of Style. This edition highlights Bill Sabin’s six classic essays on style: “Mastering Number Style: One (or 1?) Approach”; “A Fresh Look at Capitalization”; “The Comma Trauma”; “The Plight of the Compound Adjective—Or, Where Have All the Hyphens Gone?”; “The Semicolon; and Other Myths”; and “Re.: Abbrevs.” In these essays, which may be found on pages xxiv–xli, Bill Sabin spelled out the basic principles that governed his thinking on matters of style. As he observed once in a comment addressed to the reader, “Once you understand those principles, you can manipulate the rules [on style] with intelligence and taste.”

New Material on Style, Grammar, Usage, and Formatting. The treatment of style, grammar, usage, and formatting has been expanded (1) to address the many questions and suggestions submitted by readers since the publication of the tenth edition, (2) to reflect new business practices that have emerged together with new computer technology, (3) to incorporate new terms and phrases in the examples so that GRM reflects the way that people speak and write today, and (4) to address various questions that some of the new vocabulary creates.

The eleventh edition flags the most *basic rules* of style, grammar, and usage—those rules that apply to the kinds of problems that typical readers encounter most often. The number for a basic rule appears in a rectangular, orange-colored panel, like this:

408

A rule number that does not appear in a rectangular panel but simply looks like this—**409**—concerns one of the *fine points*: those problems of style or grammar or usage that occur less often but tend to cause special trouble when they do. Extensive coverage of the fine points is one

of the many things that distinguishes GRM from similar types of reference books. Readers will find in GRM the answers to questions on style and grammar and usage that they cannot find anywhere else.

Like previous editions, the eleventh edition of GRM offers updated advice on dealing with style and usage problems related to computer technology: Should you italicize or underline the titles of computer software? (See ¶290h.) Should you hyphenate some or all of the new terms that use *e-* or *i-* or *Web-* as a prefix? (See ¶847.) What are the latest guidelines on netiquette? (See the extensive discussion of e-mail that appears on pages 494–510.) See ¶1390 for a brand-new discussion of text messages.

Easy-to-Follow Models. The rules on grammar, style, and usage are accompanied by numerous examples, so you can quickly find models on which to pattern a solution to the various problems you run into as you’re writing or editing.

GRM offers an abundance of illustrations of documents—for example, e-mail messages, letters, reports, tables, plus scannable résumés and other employment documents. Using these illustrations as models, you can easily create and format all kinds of written communications. In discussing the special features of word processing software that make it easy to format various elements in business documents, GRM notes ways to overcome the problems that these time-saving features can create.

Index. Readers have raved about the index to *The Gregg Reference Manual* because it makes the manual so easy to navigate. Now, as in the past, the index lists not only major topics, like *capitalization* or *forms of address*; it also contains many entries for individual words and expressions. So, for example, you will find entries for terms and phrases like *digerati*, *Latinos-Latinas*, and *thank you in advance*. You will also find entries for many abbreviations, including *MP3*, *PDF*, and *GPS*, to name just a few. The index for the eleventh edition has, of course, been expanded to reflect the new additions on style, grammar, usage, and formatting.

But the index is not the only way to look things up in GRM. In the eleventh edition, as in the tenth, you will find (1) a topical index on the inside front cover, (2) detailed outlines at the opening of each section of the manual, and (3) marginal tabs that identify all the pages in a specific section. In addition you will also find an extensive number of cross-references throughout the manual. Not sure how to spell a term that you are looking for? Consult ¶719, which provides a 13-page guide to words that are frequently confused because they sound alike or look alike; for example, *cite–sight–site* or *stationary–stationery*. You may also want to scan the table of contents for Section 11, which provides guidelines for the proper use of terms like *already–all ready* or *Capital–capitol–Capitol*. Given all the options for looking things up, you will quickly and easily find out what you want to know. See “How to Look Things Up,” on pages xxi–xxiii.

GRM Web Site. The Web site for the eleventh edition provides a number of additional features, including the “Ask the Publisher” service, “Rules for Alphabetic Filing,” and a “Glossary of Computer Terms.” See the Web site, too, for an overview of all of the components of the GRM program and unsolicited comments from GRM readers.

Ask the Publisher. There will always be unusual situations and once-in-a-lifetime questions that no reference manual could possibly anticipate. The GRM Web site, at <www.gregg.com>, provides a unique feature—“Ask the Publisher”—that will enable you to quickly get some guidance on how to deal with situations like these. Through “Ask the Publisher” you may also make suggestions for future editions of *The Gregg Reference Manual*.

Rules for Alphabetic Filing. This section, Appendix C, has appeared in the printed version of GRM in the past. The basic guidelines offered here are consistent with the standards established by the leading professional organization for records managers, ARMA International.

Glossary of Computer Terms. This glossary, Appendix D, has been updated for the eleventh edition and now includes a whole host of new terms, like *bacn*, *blook*, *gamma testing*, and so on.

Overview of the Components. The GRM Web site makes it possible for you to get a perspective on all the components of the GRM program, order them if you wish, and easily contact editors and marketing personnel when you have questions. As previously noted, you can always make use of the “Ask the Publisher” service.

Readers’ Comments. This online feature presents the unsolicited opinions of more than thirty people who describe the role that GRM has played in their success. Their comments will give you a real sense of how GRM can help you achieve your goals.

E-Book. For the first time, *The Gregg Reference Manual* is also available as an e-book. This version of the eleventh edition includes the two online appendixes—the “Rules for Alphabetic Filing” and the “Glossary of Computer Terms.”

An Overview of the Organization of the Eleventh Edition

This edition of *The Gregg Reference Manual* consists of 18 sections and 4 appendixes, organized in three parts:

Part 1 (Sections 1–11) deals with grammar, usage, and the chief aspects of style—punctuation, capitalization, numbers, abbreviations, plurals and possessives, spelling, compound words, and word division.

Part 2 (Sections 12–18) deals with editing and proofreading techniques and the procedures for creating and formatting all kinds of written communications—letters, memos, e-mail messages, text messages, reports, manuscripts, notes and bibliographies, tables, agendas, minutes, itineraries, fax cover sheets, news releases, outlines, and résumés and other employment communications. Readers will find here examples of documents produced using templates from Microsoft Word 2007, as well as examples of documents that conform with the standard formats most commonly used in business. Part 2 also provides detailed guidelines on forms of address.

Part 3 (Appendices A–D) provides a glossary of grammatical terms, a discussion of troublesome pronunciation problems, the rules for alphabetic filing, and a glossary of computer terms. The essays on the nature of style that formed Appendix A in the tenth edition have been moved up to the front of the book.

Other Components of the Eleventh Edition

A number of supplementary components are available in print and online for trainers and instructors to use in their courses. The online edition of the supplements is designed for McGraw-Hill's new Web-based platform Connect™, which allows trainers and instructors to easily post additional assignments and assessments online, where students will find them together with the *Basic Worksheets* or *Comprehensive Worksheets*. Connect also offers the trainer or instructor the option of having the *Worksheets* graded electronically online, an option that many instructors have long sought. Thanks to Connect, trainers and instructors will find the GRM *Worksheets* even easier to work with than ever. For more information on Connect and the various formats in which the supplements are now available, please consult the GRM Web site at <www.gregg.com>. Please look for the Instructor's and Trainer's Online Learning Center, which offers additional teaching materials, at <www.mhhe.com/grm11>.

Basic Worksheets. This set of worksheets focuses on the basic rules highlighted in Sections 1–11. These worksheets have been designed to build students' skills in three critical ways. First, they will familiarize students with the common problems they are likely to encounter in any written material they have to deal with. Second, these worksheets will direct students to the appropriate rules in Sections 1–11 so that later on, when they encounter similar problems in their own work, they will know where to look. Third, these worksheets will sharpen students' ability to apply the rules correctly under many different circumstances.

This set of worksheets begins with a diagnostic survey of each student's editing skills at the outset. Then after students have completed a series of 21 worksheets, they will encounter a parallel survey at the end that will show how much their editing skills have improved. In most of the intervening worksheets, rule numbers are provided alongside the answer blanks so that students can quickly locate the answers they need to complete each set of exercises. At the end of each of these worksheets is an editing exercise that requires students to identify and correct the implanted errors on their own, without the help of rule numbers alongside. Interspersed within this sequence of worksheets are three editing surveys that will periodically help students integrate all the things they have been learning in the preceding worksheets.

Comprehensive Worksheets. This set of worksheets, like the *Basic Worksheets*, has been designed to build skills in the same three ways described above. However, this comprehensive set draws on material from the entire manual and not simply from Sections 1–11. Moreover, these worksheets deal with problems of formatting letters, memos, and other business documents.

This program begins with a diagnostic survey and then, after a series of 31 worksheets, concludes with a parallel survey that allows students to demonstrate how much their editing skills have increased. Interspersed within this sequence of worksheets are four editing surveys that will periodically help students integrate all the things they have been learning up to that point.

Instructor's and Trainer's Resources

Two resource manuals offer teaching suggestions and keys to the two sets of worksheets. One manual is designed for academic instructors; the second, for independent training consultants and corporate training personnel. Like the *Basic Worksheets* and the *Comprehensive Worksheets*, these manuals are available on the GRM Web site and in print.

The Instructor's Resource Manual. This manual provides helpful guidance on how GRM and a set of the worksheets can be used to create effective courses of varying duration. Instructors will find specific recommendations on which topics to cover in light of the number of hours allocated to a particular course.

The Trainer's Resource Manual. This manual advises corporate training personnel on the best way to set up and run an in-house English skill-building program. It shows independent training consultants how they can custom-tailor a comparable program that meets the particular needs of each of their clients. Here again, trainers will find specific recommendations on what material to cover in GRM and the worksheets in light of the number of hours specified by the client.

Both resource manuals contain graphic instructional materials that were previously published as a separate item titled *Classroom Presentations*. PowerPoint slides available on the GRM Web site provide a helpful overview of the basic rules in Sections 1–11 (on style, grammar, and usage). Transparency masters display many of the model documents discussed in Sections 12–18. All of these graphic materials can be effectively used to introduce and reinforce the key topics presented throughout GRM.

Acknowledgments

When he died on January 1, 2009, Bill Sabin left his family, friends, colleagues, and readers the great gift of his just completed manuscript. Many people went to work at once to shepherd that manuscript into print; the Sabin family is enormously grateful. We need to acknowledge here first and foremost the critical role played by Elizabeth Haefele, editor in chief of Career Education, who conceived of this edition as a tribute to Bill. For her real kindness and sensitivity to our family, no less than for her deep commitment to preserving the integrity of Bill's work and meeting his rather exacting standards, the Sabins would like to say a special thank-you. We owe thanks, too, to Natalie Ruffatto and everyone on the team at McGraw-Hill who labored to make this edition possible. We are especially indebted to Michelle Flomenhoff for all her thoughtful care and attention.

Several of Bill's good friends and colleagues made essential contributions to the editorial process. What they brought to the process was not only their expertise as editors but a long association with GRM and with Bill: they were acutely sensitive to Bill's approach to grammar and style, to the history of the book, and to what it took to make GRM what so many call it: the business writer's "bible." Olive Collen offered words of wisdom early on. Nina Wells reviewed the entire manuscript with exquisite attention to detail. As she had in the past, Barbara Oakley worked closely with Bill on the revision of Sections 13–17. This book could not have been published in the end without her continued involvement: we are grateful.

We are grateful, too, to Jane Palmieri, another dear friend and colleague of Bill's, for advice and moral support and, not least of all, for her efforts to help us track down the photograph of Bill that appears here on page viii.

We would like to thank all those experts in business writing who reviewed Bill's manuscript and made valuable suggestions. There is not enough space to acknowledge every reviewer. We do need to single out the following people, who provided particularly detailed reviews or offered insight into specialized topics:

Sven E. Aas, Web and software developer, South Hadley, Massachusetts

Belinda and Bill Belisle, training consultants, Belisle & Associates, West Garden Grove, California

Melinda Bilecki, editorial consultant, Chicago, Illinois

Sarah Carr, associate, Plain Language Commission, United Kingdom

Linda Comerford, communications consultant, Comerford Consulting, Indianapolis, Indiana

Reva Daniel, president, Dynamic Business Writing, Clinton, Mississippi

Regina Efimchik, senior consultant, WD Communications, Red Bank, New Jersey

Nancy Teton Gordon, owner, The Gordon Group, LLC, Boise, Idaho

Margaret Krzeminski-Pacuku, principal, OnWord Training, Coaching, Consulting, Cherry Hill, New Jersey

David W. Lloyd, instructor, Wordsmith Associates, and plain language consultant, Edmonton, Alberta

Barbara McGovern, partner, WD Communications, Red Bank, New Jersey

Jeff McLean, writer and editorial consultant, New York, New York

Ann Miller, consultant, WD Communications, Newark, Delaware

Margaret Sabin, editorial consultant, Montclair, New Jersey

William E. Slifka, U.S. Postal Service, Portland, Maine

Cecil V. Tarrant III, assistant professor, College of Business & Technology, Western Illinois University, Macomb, Illinois

Christy Woods, business trainer, editor, writer, Silver Spring, Maryland

In addition, we would like to thank Sue Gottfried for her meticulous copyediting and her moral support. Special thanks to Arthur Bicknell at Merriam-Webster, who made it possible for us to bring the manuscript into line with the 2009 update of the most recent edition of *Merriam-Webster's Collegiate Dictionary*.

The manuscript of this edition of GRM was, of course, produced with the help and support of many people. Bill's world of friends and colleagues was enormous. Inevitably we will fail to name here many people who deserve our thanks. We hope they will forgive us and know how grateful we are—and Bill was—for their contributions. We include here the innumerable instructors and professional training consultants whom Bill routinely engaged in discussion of matters of grammar and usage and style. We include all his friends and colleagues in the plain language movement, a movement to which he was deeply devoted. We include those people who made use of the "Ask the Author" service: Bill loved to talk with those who used GRM; he found their questions and suggestions invaluable. Among the many friends and colleagues who, in one way or another, contributed to the development of the eleventh edition, the following people must be acknowledged:

Kathleen Abromeit, editorial consultant, Oberlin, Ohio

Nancy Adams, computer consultant, Newcastle, Maine

Ryan Ebens, president, Danray Products LLC, Rockford, Illinois

Christine Mowat, president, Wordsmith Associates, Edmonton, Alberta

Mollie Saferstein Newman, editor, proofreader, writer, Aurora, Colorado

Margo Schneider, assistant to the president, The Stanley Foundation, Muscatine, Iowa

Price Voiles, editorial consultant, Tampa, Florida

Barbara Walraff, author of *Your Own Words* and *Word Court* and former editor of *Copy Editor* newsletter, Brookline, Massachusetts

Carol Ann Wilson, founder and past president, Legal Secretaries International Inc., Houston, Texas

Marian Younger, instructor, Sage College, Moreno Valley, California

We must also acknowledge Bill's late friend, the poet and professor of English Charles Darling. A fellow grammarian, Charles shared with Bill a deep love and wide-ranging knowledge of literature. Recognizing in GRM the full depth and breadth of Bill's concerns with good writing, Charles was an invaluable source of inspiration and moral support.

We would like to acknowledge how grateful we are to the doctors and nurses at the Dana-Farber Cancer Institute, Maine Medical Center, Miles Memorial Hospital and its nursing facility, Cove's Edge, and all who cared for Bill in the last two years of his life. Bill made it clear that his goal was to live long enough to finish the eleventh edition of GRM; these doctors and nurses made it possible. We owe special thanks to Dr. Oliver Sartor for his extraordinary efforts on Bill's behalf and ours. From the beginning Oliver offered Bill hope, and even in the final weeks, Oliver continued to be a source of healing comfort and wisdom and support to Bill and all of us; he has our abiding gratitude.

We are very grateful to Nancy Freeman, the artist from Damariscotta, Maine, whose stunning collage appears on the cover of this book. (Elements of the collage appear throughout GRM, as well.) Evocative as it is of a musical instrument, the collage seemed to us the perfect way to express Bill's love of the music of well-crafted language. It was Mary Lee Noonan, Bill's sister-in-law, who drew our attention to this theme. We owe her very special thanks for allowing us to include here her remarks at Bill's Memorial: Mary Lee was so very right to note the real "fusion" between words and music that is, as she observes, "at the heart" of GRM.

Seeing Bill's final manuscript into print has been, in many ways, a family project. Suffice it to say we are grateful to one another—and for one another, too. For Bill Sabin and his role in each of our lives, it goes without saying we are deeply thankful. This book would never have been written without Bill's wife Marie. Quite simply, she sustained him, at every phase. Completing the eleventh edition of GRM, despite an increasingly challenging illness, was for Bill first and foremost an expression of his profound and joyful love for her.

The Sabin Family

How to Look Things Up

Suppose you were writing to someone in another department:

I understand you are doing a confidential study of the Bronson matter. May I please get an advance copy of your report [At this point you hesitate. Should this sentence end with a period or a question mark?]

This is the kind of problem that continually comes up. How do you find a fast answer to such questions? In this manual there are several ways to proceed.

Use the Index. A sure way to find the answer you want is to check the detailed index at the back of the manual. In the new index (which contains over 5,000 entries), any one of the following entries will lead you to the right punctuation for the problem sentence above:

Periods, **101–109**

Question marks, **110–118**

Requests, **103, 113, 124a,**

...

...

...

at end of requests, **103**

at end of requests, **103, 113**

In each entry a **boldface number** refers to the proper rule, ¶103. If you look up ¶103, you will find that a question mark is the right punctuation for the sentence in question.

In almost all the index entries, references are made to specific rule numbers so that you can find what you are looking for fast. In a few cases, where a page reference will provide a more precise location (for example, when a rule runs on for several pages), a page number is given in lightface type. Suppose you were confronted with this problem:

If you compare the performance records of Catano, Harris, and Williams, you won't find much difference (*between/among*) them.

The index will show the following entries:

among (see *between–among*, 367) **OR** *between–among*, 367

The entry on page 367 indicates that *between* is correct in this situation.

Use a Fast-Skim Approach. Many users of reference manuals have little patience with detailed indexes. They would rather open the book and skim through the pages until they find what they are looking for. If you prefer this approach, you will find several features of this manual especially helpful.

- The brief topical index on the inside front cover indicates the key paragraphs for each major topic.
- At the start of each section except the appendixes, you will find a detailed list of all the topics covered in that section. This list will help you quickly focus on the rule or rules that pertain to your problem. Suppose the following problem came up:

The only point still at issue is whether or not new *Federal* [or is it *federal*?] legislation is required.

The index on the inside front cover indicates that ¶¶301–366 deal with the topic of capitalization. A fast skim of the outline preceding ¶301 (on page 105) will turn up the entry *Names of Government Bodies* (¶¶325–330). If you turn to that set of rules, you will find in ¶328 that *federal* is the proper form.

- Extensive cross-references have also been provided throughout the manual so that you can quickly locate related rules that could prove helpful. Some cross-references take this form: *See ¶324*; others may read *See also ¶324*. The form *See ¶324* indicates that ¶324 contains significant information that adds to or qualifies the rule you are currently reading; the word *See* suggests that you really ought to pursue the cross-reference before making a decision. The form *See also ¶324* carries a good deal less urgency. It indicates that you will find some additional examples in ¶324 and perhaps a restatement of the rule you are currently reading but nothing altogether new. In effect, *See also* suggests that you don't have to pursue the cross-reference if you don't want to—but it couldn't hurt.

Play the Numbers. There is still a third way to find the answer to a specific problem—and this is an approach that will grow in appeal as you become familiar with the organization and the content of the manual. From a fast inspection of the rule numbers, you will observe that they all carry a section number as a prefix. Thus Section 3 (on capitalization) has a “300” series of rules—from 301 to 366; Section 4 (on number style) has a “400” series—from 401 to 470; and so on. Once you become familiar with the section numbers and the section titles, you can find your way around fairly quickly, without reference to either index, by using the section number tabs on the outer edges of all pages. For example, you are about to write the following sentence:

43 percent of the questionnaires have now been returned. [Or should it be “*Forty-three* percent of the questionnaires . . .”?]

If you know that matters of number style are treated in Section 4, you can quickly turn to the pages tabbed for Section 4, where a fast skim of the outline of topics at the start of the section will lead you to the answer in ¶421. *Forty-three percent* is the right answer in this instance. A familiarity with the section numbers and section titles can also save you time when you are using the index. If your index entry lists several different paragraph numbers, you can often anticipate what the paragraphs will deal with. For example, if you want to know whether to write *5 lb* or *5 lbs* on a purchase order, you might encounter the following entry in the index:

Weights, **429–431, 535–538, 620**

If you know that Section 6 deals with plurals, you will try ¶620 first.

Look Up Specific Words or Phrases. Many of the problems that arise deal with specific words or phrases. For this reason, the index provides as many entries for such terms as space will permit. You are now more likely than ever to find listed a particular word or phrase that concerns you. Consider, for example, the following sentence and decide whether *therefore* should be set off with commas or not.

It is(,) *therefore*(,) essential that operations be curtailed.

A check of the index will show the following entry:

therefore, **122, 124b, 138–142, 178, 290f**, 383, 402

A reading of the rules in ¶141 will indicate that no commas should be used in this sentence.

If you cannot find an entry for a word or phrase in the index, you may want to consult ¶719, which provides a 13-page guide to words that are frequently confused because they sound alike or look alike; for example, *cite–sight–site* or *stationary–stationery*. Try scanning the table of contents for Section 11, which provides guidelines on the proper use of terms like *already–all ready, between–among*, and *Capital–capitol–Capitol*, for example.

You can always go directly to the appropriate section in the manual and skim the list of topics, looking for the sequence of paragraphs most likely to be of help. For example, if you are unsure whether a particular term should be capitalized, check the outline at the start of Section 3 to see which particular set of rules is likely to shed light on your problem. You can also scan the rules and examples in Section 3 until you find something that closely resembles the situation you are grappling with. If you still can't find the answer you need, take advantage of the "Ask the Publisher" service that is available on the GRM Web site.

Essays on the Nature of Style

The following six essays deal with certain points of style that are likely to create problems for anyone who works with words. Whether dealing with such topics as numbers, capitalization, or compound adjectives, these essays attempt to achieve four goals: (1) to provide some unifying perspective on the specific rules that apply in each case, (2) to offer some broader observations about the nature of style in general, (3) to discourage the rigid attitude that views the rules of style as dealing with absolute rights and wrongs, and (4) to encourage a flexible application of these rules in order to fit the needs of each particular situation.

Mastering Number Style: One (or 1?) Approach

A number of years ago, while making a presentation on the subject of style, I asked the audience to select the preferable form in each of the following pairs of examples:

\$87,525	OR: eighty-seven thousand five hundred and twenty-five dollars
\$7.1 trillion	OR: \$7,100,000,000,000
4:30 p.m., January 19	OR: half after four o'clock, on the nineteenth of January

No one could see any use for the forms in the second column. Those in the first column were far easier to read and simpler to write and were clearly to be preferred in business writing. However, after some discussion, we tended to agree that Tiffany's had had the right idea in an ad that displayed a picture of an elegant diamond necklace along with the legend "Eighty-seven thousand five hundred and twenty-five dollars." Somehow, we felt, if they were going to charge that elegant a price, the least they could do was spell it out. Moreover, we tended to agree that those who wanted to de-emphasize the size of the federal debt might have dismissed it as "only \$7.1 trillion," whereas those who wanted to emphasize the enormity of the amount might well have written "The federal debt now stands at \$7,100,000,000,000" and thereby have forced upon us a sense of the magnitude of the amount by making us calculate it for ourselves. Finally, we tended to agree that we would much rather be married at "half after four o'clock, on the nineteenth of January" than at "4:30 p.m., January 19."*

These, admittedly, are extreme examples of occasions on which an unusual number style could be justified, but they tend to throw light on the more customary style for expressing numbers and on the notion of style in general. At the very least, these examples suggest that style should not be thought of as a rigid set of rules but rather as a set of principles for adjusting one's means of expression to fit a particular set of circumstances. We express our style in clothes through a varied wardrobe that suits the needs not only of everyday situations but of formal and informal occasions as well. It is the impoverished person who meets every situation with the same set of clothes. By the same token, it is an impoverished writer

*One dissenter indicated that she simply wanted to get married and didn't much care how the invitations read.

who meets all situations with a rigid set of rules. The writer of the Tiffany ad, who chose words instead of figures to express an amount of money, in this instance had some true sense of how to vary style for best effect.

Manipulating principles of style for specific effect ought not to be a random, hit-or-miss exercise but should proceed from some coherent notion about style itself. In the case of numbers, an intelligent control of number style proceeds from an awareness of the difference in effect that results from using figures or using words to express numbers.

Figures are big (like capital letters); when used in a sentence, they stand out clearly from the surrounding tissue of words. As a result, they are easier to grasp on first reading, and they are easier to locate for subsequent reference. Thus whenever quick comprehension and fast reference are important (and this is true of most business writing), figures are to be preferred to words.

But the very characteristics of figures that make them preferable to words can be disadvantageous in certain circumstances. Figures stand out so sharply against a background of words that they achieve a special prominence and obtain a special emphasis. Not all numbers warrant that kind of emphasis, however, and in such cases words are preferable to figures. Keep in mind, too, that figures have the conciseness and the informality of an abbreviation. Thus the more formal the occasion, the more likely one is to spell numbers out (as in the wedding announcement cited on page xxiv).

Given these basic differences between using figures and using words, it is quite clear why figures are preferred in ordinary business letters. These are typically straightforward communications that pass between business firms and their suppliers or their customers, containing frequent references to price quotations, quantities, shipping dates, credit terms, and the like. Frequently, these numbers represent data that has to be extracted from the letter and processed in some way; they may have to be checked against other numbers or included in some computation or simply transferred to another document. The advantage of figures over words in these ordinary cases is so clear that the point does not need to be argued.

But there is another kind of business writing in which the writer is not dealing with the workaday transactions of the business. It may be a special promotion campaign with an air of elegance and formality; it may be a carefully constructed letter with special stylistic objectives in mind; or it may be a special report that involves community relations and will have a wider distribution than the normal technical business report. This kind of writing tends to occur more often at the executive level, and it tends to occur in the more creative departments of a business (such as sales promotion, advertising, public relations, and customer relations). In this kind of writing, numbers don't occur very frequently; when they do, they are often expressed in words.

As a response to the different needs posed by these two kinds of writing, there are two basic number styles in use today. Both use figures and words but in different proportions. The *figure style* uses figures for all numbers above 10, whether exact or approximate; the *word style* spells out all numbers up through 100 and all numbers above 100 that can be expressed in one or two words (such as *twenty-five hundred*). (Some authorities now state these rules using 9 and 99 in place of 10 and 100.)

As a practical matter, your immediate job may require you to use only the figure style. However, your next job may call for the use of the word style. And if you are working and going to school at the same time (as more and more people are these days), you may find yourself following one style for office work and another for your academic work. Under these circumstances, if you grasp the basic difference between using words and figures to express numbers, you will be better able to decide how to proceed in specific situations without having to consult a style manual each time. In any case, keep the following ideas in mind:

1. There are no absolute rights and wrongs in number style—only varying sets of stylistic conventions that people follow in one set of circumstances or another. There are, however, effective differences in using words or figures, and you should take these differences into account.
2. Before deciding on which number style to follow for a given piece of writing, first determine the basic objective of the material. If the material is intended to communicate information as simply and as briefly as possible, use the *figure style*. If the material is of a formal nature or aspires to a certain level of literary elegance, use the *word style*.
3. Having decided on a basic style, *be consistent in context*. When related numbers occur together in the same context and according to the rules some should go in figures and some should go in words, treat these related numbers all the same way.
4. Treat an approximate number exactly the same way you would treat an exact number. If you would write *50 orders*, then you should also write *about 50 orders*. (If the figure 50 looks too emphatic to you when used in an approximation, the chances are that you should be using the word style—and not just for approximate numbers but throughout.)
5. In areas where the style could go either way (for example, *the 4th of June* vs. *the fourth of June* or *9 o'clock* vs. *nine o'clock*), decide in accordance with your basic style. Thus if you are following the figure style, you will automatically choose the *4th of June* and *9 o'clock*.
6. In expressions involving ages, periods of time, and measurements, use figures whenever these numbers have technical significance or serve as measurements or deserve special emphasis; otherwise, use words. (For example, *you receive these benefits at 65*, *the note will be due in 3 months*, *the parcel weighs over 2 pounds*; but *my father will be sixty-five next week*, *that happened three months ago*, *I hope to lose another two pounds this week*.)
7. Use figures in dates (*June 6*) and in expressions of money (\$6) except for reasons of formality or special effect (as in the wedding announcement or the Tiffany ad). Also use figures with abbreviations and symbols and in percentages, proportions, ratios, and scores.
8. Use words for numbers at the beginning of a sentence, for most ordinals (*the third time*, *the twentieth anniversary*), and for fractions standing alone (*one-third of our sales*).

All manuals of style (including this one) include many more than eight rules. They give exceptions and fine points beyond those just summarized. Yet for all practical purposes these eight rules—and the philosophy that underlies them—will cover almost every common situation. Just remember that the conventions of number style were meant to be applied, not as an absolute set of dogmas, but as a flexible set of principles that help to fit the form to the occasion. When manipulated with intelligence and taste, these principles of style can enhance and support your broader purposes in writing.

► For a further discussion of number style, see Section 4, pages 137–166.

A Fresh Look at Capitalization

The rules on capitalization give most people fits. First of all, there are a seemingly endless number of rules to master; second, the authorities themselves don't agree on the rules; and third, the actual practices of writers often don't agree with any of the contradictory recommendations of the authorities.

A frequent solution is to pretend that disagreements on capitalization style don't exist; instead, people are given one fixed set of rules to be applied under all circumstances. Yet all too many people never do remember the full complement of rules, and those they do remember they apply mechanically without comprehension. As a result, they never get to see that capitalization can be a powerful instrument of style if it is shrewdly and knowingly used.

To understand the basic function of capitalization, you should know that capitalization gives importance, emphasis, and distinction to everything it touches. That's why we capitalize the first word of every sentence—to signify emphatically that a new sentence has begun.* That's why we capitalize proper nouns like *Marianne* and *California* and *April*—to indicate distinctively that these are the official names of particular people, places, or things. Moreover, when we take a word that normally occurs as a common noun and capitalize it, we are loading into that word the special significance that a proper noun possesses. The *fourth of July*, for example, is just another day in the year; when it signifies a national holiday, it becomes the *Fourth of July*. In exactly the same way, the *white house* that stands at 1600 Pennsylvania Avenue becomes the *White House* when we think of it, not as one of many white houses, but as the residence of the *President*, who is himself something special compared to the *president* of a business organization.

This process of giving special significance to a common noun and transforming it into a proper noun explains why we capitalize names coined from common nouns—for example, the *Windy City*, the *First Lady*, the *Sunflower State*, the *Stars and Stripes*, *Mother's Day*, and the *Industrial Revolution*. And it also explains why manufacturers who coin trade names try to register them whenever possible. As long as they can get legal protection for these names, they are entitled to capitalize them. The owners of such trade names as *Coke*, *Kleenex*, *Frisbee*, *Dacron*, *Levi's*, and *Xerox* are likely to take legal action against anyone who uses such words generically. They are determined to protect their rights zealously because they don't want to lose the distinctive forcefulness that a capitalized noun possesses. In this respect they demonstrate an understanding of the function of capitalization that few of us can compete with.

Once it becomes clear that capitalization is a process of loading special significance into words, it's easier to understand why capitalization practices vary so widely. Individual writers will assign importance to words from their own vantage points. The closer they are to the term in question, the more inclined they will be to capitalize it. Thus it is quite possible that what is important to me (and therefore worthy of capitalization) may not be important to you and thus will not be capitalized in whatever you write.

*A number of years ago a group of students at Williams College objected to capitalizing the first letter of the first word of a sentence on the grounds that it "unfairly prioritizes that letter at the expense of the other underprivileged letters that follow."

One could cite any number of examples to prove the point. A retail merchant will take out full-page ads in order to exclaim in print about a *Year-End Clearance Sale*. The rest of us can respect the merchant's right to capitalize the phrase, but we are under no obligation to share the merchant's enthusiasm for what is, after all, just another *year-end clearance sale*. In legal agreements, as another example, it's customary to load such terms as *buyer* and *seller* with the significance of proper nouns and thus write, "The *Buyer* agrees to pay the *Seller* . . ."; in all other contexts, however, this kind of emphasis would not be warranted.

Once you understand that it is appropriate to capitalize a given term in some contexts but not necessarily in all contexts, a lot of the agony about capitalization disappears. Instead of trying to decide whether *Federal Government* or *federal government* is correct, you should recognize that both forms are valid and, depending on the context and the importance you want to attach to the term, one form will be more appropriate to your purpose than another. If you are a federal employee, you are very likely to write *Federal Government* under all circumstances, out of respect for the organization that employs you. If you are not a government employee, you are more likely to write *federal government* under ordinary circumstances. If, however, you are writing to someone connected with the federal government or you are writing a report or document in which the federal government is strongly personified, you will probably choose the capitalized form.

By the same token, you need not agonize over the proper way to treat terms like *advertising department*, *finance committee*, and *board of directors*. These are well-established generic terms as well as the official names of actual units within an organization. Thus you are likely to capitalize these terms if they refer to units within your own organization, because as an insider you would be expected to assign a good deal of importance to such things. But you wouldn't have to capitalize these terms when referring to someone else's organization unless for reasons of courtesy or flattery you wanted to indicate that you considered that organization important. (For example, "I would like to apply for a job as copywriter in your Advertising Department.") Moreover, when writing to outsiders, you should keep in mind whether or not they would assign the same importance you do to units within your organization. In an interoffice memo you would no doubt write, "Celeste Jackson has been appointed to the Board of Directors"; in a news release intended for a general audience, you would more likely write, "Celeste Jackson has been appointed to the board of directors of the Wilmington Corporation."

This switch in form from one context to another will appear surprising only to those who assume that one form is intrinsically right and the other intrinsically wrong. Actually, there are many more familiar instances of this kind of flexibility. We normally write the names of seasons in lowercase (for example, *spring*), but when the season is meant to be personified, we switch to uppercase (*Spring*). The words *earth*, *sun*, and *moon* are normally expressed in lowercase, but when these terms are used in the same context with proper names like *Mars* and *Venus*, they are also capitalized. Or we write that we are taking courses in *history* and *art*, but once these terms become part of the official names of college courses, we write *History 101* and *Art 5C*.

Once you come to view capitalization as a flexible instrument of style, you should be able to cope more easily with ambiguous or conflicting rules. For example, one of the most troublesome rules concerns whether or not to capitalize titles when they follow a person's name or

are used in place of the name. According to a number of authorities, only the titles of “high-ranking” officials and dignitaries should be capitalized when they follow or replace a person’s name. But how high is high? Where does one draw the line? You can easily become confused at this point because the authorities as well as individual writers have drawn the line at various places.* So it helps to understand that the answer to how high is high will depend on where you stand in relation to the person named. At the international level, a lot of us would be willing to bestow initial caps on the *Queen of England*, the *Pope*, the *Secretary-General of the United Nations*, and people of similar eminence. At the national level in this country, many of us would agree on honoring with caps the *President*, the *Vice President*, Cabinet members (such as the *Attorney General* and the *Secretary of Defense*), and the heads of federal agencies and bureaus (such as the *Director* or the *Commissioner*) but probably not lower-ranking officials in the national government. (However, if you worked in Washington and were closer to those lower-ranking people, you might very well draw the line so as to include at least some of them.) At the state level, we would probably all agree to honor the *Governor* and even the *Lieutenant Governor*, but most of us would probably refer to the *attorney general* of the state in lowercase (unless, of course, we worked for the state government or had dealings with the official in question, in which case we would write the *Attorney General*). Because most people who write style manuals are removed from the local levels of government, they rarely sanction the use of caps for the titles of local officials; but anyone who works for the local government or on the local newspaper or has direct dealings with these officials will assign to the titles of these officials a good deal more importance than the writers of style manuals typically do. Indeed, if I were writing to the mayor of my town or to someone in the mayor’s office, I would refer to the *Mayor*. But if I discuss this official with you in writing, I would refer to the *mayor*; in this context it would be bestowing excessive importance on this person to capitalize the title.

What about titles of high-ranking officials in your own organization? They certainly are important to you, even if not to the outside world. Such titles are usually capped in formal minutes of a meeting or in formal documents (such as a company charter or a set of bylaws). In ordinary written communications, however, these titles are not—as a matter of taste—usually capitalized, for capitalization would confer an excessive importance on a person who is neither a public official nor a prominent dignitary. But those who insist on paying this gesture of respect and honor to their top executives have the right to do so if they want to. (And in some companies this gesture is demanded.)

In the final analysis, the important thing is for you to establish an appropriate capitalization style for a given context—and having established that style, to follow it consistently within that context, even though you might well adopt a different style in another context. Though others may disagree with your specific applications of the rules, no one can fault you if you have brought both sense and sensitivity to your use of capitalization.

► *For a further discussion of capitalization style, see Section 3, pages 105–136.*

*Some authorities now take the position that *no* titles should be capped when they follow or replace a person’s name—not even such titles as the *President*, the *Queen of England*, the *Pope*, or the *Secretary-General of the United Nations*. For a further discussion of this matter, see ¶313b.

The Comma Trauma

Consider the poor comma, a plodding workhorse in the fields of prose—exceedingly useful but like most workhorses overworked. Because it can do so many things, a number of writers dispense the comma to cure their ailing prose the way doctors dispense aspirin: according to this prescription, you take two at frequent intervals and hope the problem will go away. Other writers, having written, stand back to admire their handiwork as if it were a well-risen cake—and for the final touch they sprinkle commas down upon it like so much confectioners’ sugar. And one writer I know, when pushed to desperation, will type several rows of commas at the bottom of her letter and urge you to insert them in the text above wherever you think it appropriate.

It’s too bad that commas induce a trauma in so many writers. Despite the seemingly endless set of rules that describe their varied powers, commas have only two basic functions: they either separate or set off. Separating requires only one comma; setting off requires two.

The separating functions of the comma, for the most part, are easy to spot and not hard to master. A separating comma is used:

1. To separate the two main clauses in a compound sentence when they are joined by *and*, *but*, *or*, or *nor*.
2. To separate three or more items in a series (*Tom, Dick, and Harry*)—unless all the items are joined by *and* or *or* (*Bob and Carol and Ted and Alice*).
3. To signify the omission of *and* between adjectives of equal rank (as in *a quiet, unassuming personality*).
4. To separate the digits of numbers into groups of thousands (*30,000*).

Writers get into trouble here mostly as a result of separating things that should not be separated—for example, a subject and a verb (*Bob, Carol, Ted, and, Alice* ~~decided to see a movie~~) or an adjective and a noun (*a quiet, unassuming* ~~of~~ *personality*). Yet this is not where the comma trauma begins to set in.

The real crunch comes with the commas that set off. These are the commas that set off words, phrases, or clauses that (1) provide additional but nonessential information or (2) are out of their normal order in the sentence or (3) manage, in one way or another, to disrupt the flow of the sentence from subject to verb to object or complement. What makes it so difficult for people to use these commas correctly is that they have a hard time analyzing the difference between an expression used as an essential element in one context and as a nonessential element in another.

Consider the following example. I would venture that most people have been taught to punctuate the sentence exactly as it is given here:

It is, therefore, essential that we audit all accounts at once.

To be specific, they have probably been taught that *therefore* is always nonessential when it occurs within a sentence and that it must therefore always be set off by commas. What they probably have not been taught is that commas that set off (unlike commas that separate) usually signal the way a sentence should sound when spoken aloud. For example, if I were to read

the foregoing sentence aloud the way it has been punctuated, I would pause slightly at the sign of the first comma and then let my voice drop on the word *therefore*:

IT IS, therefore, ESSENTIAL . . .

Now if this is the reading that is desired, then the use of commas around *therefore* is quite correct. Yet I would venture that most people would read the sentence this way:

It is THEREFORE essential . . .

letting the voice rise on *therefore* to give it the special emphasis it demands. If this is the desired reading, then commas would be altogether wrong in this sentence, for they would induce a “nonessential” inflection in the voice where none is wanted.

If people have been mechanically inserting commas around *therefore* and similar words where commas do not belong, it is because they have not been encouraged to listen to the way the sentences are supposed to sound. Certainly once you become aware of the differences in inflection and phrasing that accompany essential and nonessential elements, it becomes a lot easier for you to distinguish between them and to insert or omit commas accordingly. Given this kind of approach, sentences like the following pair are simple to cope with.

Please let me know *if I have remembered everything correctly*.

He said he would meet us at three, *if I remember correctly*.

Although it would be possible, by means of a structural analysis, to establish why the first *if* clause is essential and why the second is not, you would do well to be guided by the inflection implied in each sentence. In the first instance, the voice arcs as it bridges the gap between *Please let me know* and *if I have remembered everything correctly*. In the second instance, the inflectional arc embraces only the first part of the sentence, *He said he would meet us at three*; then comes a slight pause followed by the *if* clause, which is uttered in a much lower register, almost as if it were an afterthought.

As you gain confidence in your ability to detect the inflectional patterns characteristic of essential and nonessential expressions, you should have no difficulty in picking your way through a variety of constructions like these:

I must report, *nevertheless*, that his work is unsatisfactory.

I must *nevertheless* report that his work is unsatisfactory.

The location, *I must admit*, is quite attractive.

The location is one *I must admit* I find attractive.

There are, *of course*, other possible answers to the problem.

It is *of course* your prerogative to change your mind.

This awareness of inflectional patterns is especially helpful when it comes to coping with appositives, a frustrating area in which the use or omission of commas often seems illogical. When the appositive expression is truly nonessential, as in:

Ed Brown, *the president of Apex*, would like to meet you.

the customary pause and the characteristic drop in voice are there. And when the appositive expression is essential, as in phrases like *the year 2007* and *the term “recommend”*, you can hear the single inflectional arc that embraces each group of words in one closely knit unit. You can also hear the same continuous arc in the phrase *my wife Marie*. By all that is logical, the name

Marie should be set off by commas because it is not needed to establish which of my wives I'm speaking about; unlike an Arabian sheik, I have only one wife. Yet according to today's standards, *my wife Marie* is considered good form. Although not essential to the meaning, the name *Marie* is treated as if it were essential because of what style manuals call "a very close relationship with the preceding words." Although it is difficult, if not impossible, to state in concrete terms what constitutes "a very close relationship," you can tell by the sound when it exists. There is a very subtle but very real difference in the phrases *my sister Florence* and *my sister, Florence Stern*. When the full name is given, there tends to be a slight pause after *sister* and the voice tends to drop while uttering the full name. Yet it is not safe to conclude that adding the second name accounts for the difference in the inflection, for when one speaks of *the composer John Cage or the author Toni Morrison*, one hears the same inflectional pattern as in *my wife Marie* or *the year 2007*. So in the case of appositives, it is wise to be wary of simple generalizations and to listen attentively in each case to the way the expression ought to sound.

In stressing, as I have, the significance of inflection and phrasing as a guide to the use of commas, I do not mean to suggest that one can punctuate by sound alone and can safely ignore structure and meaning. What I am suggesting is that in a number of cases, such as those I have cited, an awareness of the sound of sentences can help you grasp relationships that might otherwise be obscure.

There are many other problems involving the comma that should be discussed here, but someone else (Ogden Nash, perhaps) will have to take over . . .

And now if you'll excuse me comma

I must lie down and have my trauma

► For a further discussion of the rules governing the use of commas, see ¶¶122–175.

The Plight of the Compound Adjective—Or, Where Have All the Hyphens Gone?

The hyphen, it grieves me to report, is in trouble. Indeed, unless concerted action is taken at once, the hyphen is likely to become as extinct as the apostrophe in *teachers college*. The problem can be traced to two dangerous attitudes that are afoot these days. One is revolutionary in tone; its motto: "Compound adjectives, unite! You have nothing to lose but your hyphens." The other attitude reflects the view of the silent majority. These are the people who don't pretend to know how to cope with the "hyphen" mess; they just earnestly wish the whole problem would quickly disappear. It may now be too late to reverse the long-range trend. For the present, however, the hyphen exists—and anyone who expects to work with words at an acceptable level of proficiency needs to come to terms with the noble beast. Here, then, is a last-ditch effort to make sense out of an ever-changing and possibly fast-disappearing (but not-soon-to-be-forgotten) aspect of style.

As a general rule, the English language depends largely on word order to make the relationships between words clear. When word order alone is not sufficient to establish these relationships, we typically resort to punctuation. It is in this context that the hyphen has a

real service to offer. The function of the hyphen is to help the reader grasp clusters of words—or even parts of words—as a unit. When a word has to be divided at the end of a line, the hyphen signifies the connection between parts. Whenever two or more words function as a unit but cannot (for one reason or another) be written either as a solid word or as separate words, the hyphen clearly links these words and prevents a lapse in comprehension.

If hyphens are typically required in compound adjectives, it is because there is something “abnormal” about the word order of such expressions. Other kinds of modifiers, by contrast, do not require hyphens. For example, if I write about “*a long, hard winter*,” I am actually referring to a winter *that will be long and hard*; so I need a comma—not a hyphen—to establish the fact that *long* and *hard* modify *winter* independently. If I write about “*a long opening paragraph*,” the word order makes it clear that *opening* modifies *paragraph* and that *long* modifies the two words together; so no punctuation is needed to establish the fact that I’m speaking about “*an opening paragraph that is long*.”

However, if I write about “*a long-term loan*,” an entirely different relationship is established between the elements in the modifier. I am not speaking of a *loan* that is *long* and *term*, nor am I referring to a *term loan* that is *long*. I am speaking about a loan “that is to run for a *long term* of years.” The words *long-term* (unlike *long, hard* or *long opening*) have an internal relationship all their own; it is only as an integral unit that these two words can modify a noun. Thus a hyphen is inserted to establish this fact clearly.

For a better understanding of the internal relationship that exists between the elements in a compound adjective, one has to go back to its origins. A compound adjective is actually a compressed version of an adjective phrase or clause. For example, if I describe a product as carrying “*a money-back guarantee*,” I am actually talking about “*a guarantee to give you your money back if you are not satisfied with the product*.” Or if I refer to “*a black-tie affair*,” I am really speaking about “*an affair at which men are expected to wear formal clothes with a black tie*.” One can easily see from these examples why compound adjectives are so popular, for these expressions are usually a good deal crisper and livelier than the phrases or clauses they represent. These examples give further evidence of why a hyphen is needed. In each case we have zeroed in on a couple of words, we have wrenching them out of context and out of their normal order in a descriptive phrase or clause, and we have inserted them before a noun as if they were an ordinary adjective—a role these two words were never originally designed to play. Deprived of all the other words that would clearly establish the relationship between them, these elements require a hyphen to hold them together.

The two factors of compression and dislocation are all the justification one needs to hyphenate a compound adjective. However, there are often additional clues to the need for a hyphen. In the process of becoming a compound adjective, the individual words frequently undergo a change in form: “*a contract for two years*” becomes “*a two-year contract*”; “*a coworker who has a sharp tongue*” becomes “*a sharp-tongued coworker*.” Sometimes the words are put in inverted order: “*lands owned by the government*” becomes “*government-owned lands*.” Sometimes the elements undergo a change both in form and in word order: “*an employee who works hard*” becomes “*a hard-working employee**; “*bonds exempt from taxation*” becomes “*tax-exempt bonds*.” The change in form or the inversion in word order is an additional signal that you are in the presence of a compound adjective and ought to hyphenate it.

*Or did at one time: *Merriam-Webster's Collegiate Dictionary* now gives *hardworking*.

If the compound adjective is so simple to understand in theory, why is it so difficult to handle in practice? A good deal of the problem can be traced to a neat but now-discredited rule: “Hyphenate compound adjectives when they precede the noun but not when they follow the noun.” It was indeed a very neat rule but not a very precise one. Let’s take it apart and see why.

It is quite true that compound adjectives should be hyphenated when they occur *before* a noun—for the most part. There’s the catch—“for the most part.” The exceptions seem to occur in such a random, hit-and-miss, now-and-then, flip-a-coin, make-it-up-as-you-go-along fashion that one begins to lose respect for the rule. Yet there is a very definite pattern to the exceptions. Keep in mind that the hyphen serves to hold a cluster of words together as a unit. If, through some other means, these words make themselves clearly recognizable as a unit, the hyphen is superfluous and can be omitted. There are at least three such situations when a hyphen is unnecessary: when the compound modifier is a proper name, when it is a well-recognized foreign expression, and when it is a well-established compound noun serving as a compound adjective. Let’s look at some samples.

If I speak of “*a Madison Avenue agency*,” the capital *M* and *A* virtually guarantee that the expression will be quickly grasped as a unit. And if I talk about “*a bona fide contract*,” the reader will recognize this Latin expression as a unit without the help of a hyphen. By the same token, terms like *social security*, *life insurance*, and *high school* are so well established as compound nouns that when they are used as adjectives, we immediately grasp such expressions as a unit, without the support of any punctuation.

If no hyphen is needed in “*social security* benefits,” one may well ask why a hyphen is required in “*short-term* benefits.” After all, words like *short term* and *long range* are adjective-noun combinations that closely resemble *social security*, *life insurance*, and *high school*. Why hyphenate some and not others? The reason is this: Words like *short term*, *long range*, and *high level* don’t have any standing as compound nouns in their own right; they do not represent a concept or an institution (as terms like *social security* and *life insurance* do). Therefore, these words require a hyphen to hold them together when they occur before a noun.

Once you grasp the difference between *social security* and *short-term* as compound adjectives, you can use these two expressions as touchstones in deciding how to handle other adjective-noun combinations. With a principle like this in hand, you don’t have to engage in profound analysis to resolve the “hyphen problem.” Consider a random list of examples such as these:

a <i>red letter</i> day	a <i>white collar</i> worker
a <i>civil service</i> test	a <i>real estate</i> agent
<i>income tax</i> refund	<i>public relations</i> campaign
<i>long distance</i> calls	<i>high level</i> decisions

The expressions *civil service*, *income tax*, *real estate*, and *public relations* all resemble *social security*, since they stand for well-known concepts or institutions; therefore, as compound adjectives they can all be written without hyphens. However, *red-letter*, *long-distance*, *white-collar*, and *high-level* are much more like *short-term* and should have a hyphen.

So much for compound adjectives before the noun. When they occur *after* the noun, according to the traditional rule, they should not be hyphenated. Yet this traditional formulation is somewhat misleading. If we aren’t supposed to hyphenate a “compound adjective” when it follows a noun,

it's for the simple reason that the words in question no longer function as a compound adjective—they are playing a normal role in a normal order. It's one thing to use hyphens in the expression “an *up-to-date* report,” for a prepositional phrase doesn't normally belong before a noun. However, if I said “This report is *up to date*,” there would be no more justification for hyphenating here than there would be if I said “This report is *in good shape*.” Both expressions—*in good shape* and *up to date*—are prepositional phrases playing a normal role in the predicate.

However, if the expression still exhibits an abnormal form or inverted word order in the predicate, it is still a compound adjective—and it must still be hyphenated. For example, whether I speak of “*tax-exempt* items” or say “these items are *tax-exempt*,” the hyphen must be inserted because regardless of where it appears—*before* or *after* the noun—the expression is a compressed version of the phrase “exempt from taxation.”

There are at least four kinds of compound adjectives that must always be hyphenated *after* as well as *before* the noun (because of inverted word order or change of form). These compound adjectives consist of the following patterns:

noun + adjective (*duty-free*)
noun + participle (*interest-bearing*)

adjective + participle (*soft-spoken*)
adjective + noun + *ed* (*old-fashioned*)

Once you learn to recognize these four patterns, you can safely assume that any compound adjective that fits one of these patterns must always be hyphenated, no matter where it falls in a sentence.*

Compound terms that are derived from computer technology pose a special problem, because a number of terms often appear in current writing in several ways. Consider, for example, the term *e-mail*, whether it is used as a noun or as an adjective (as in *an e-mail message*). This term is now rarely seen spelled as *E-mail* (its original form), it is still most frequently seen as *e-mail* (with a hyphen), but it is now increasingly appearing as *email* (without a hyphen). If you are making a style decision with only this one word in mind, you may very well decide to go with *email*. However, if you are trying to maintain a unified style for all the terms beginning with *e-*, you will first have to consider how all the words in this category are now commonly spelled. Once you observe that most of them are spelled with a hyphen (for example, *e-business*, *e-commerce*, *e-tailing*), you will be less likely to drop the hyphen in *e-mail* until you discern a trend to spell all the *e-* words as solid words.

► For a detailed discussion of the styling problems that arise with compound computer terms, see ¶847.

It does no good to pretend that compound adjectives are an easy thing to master. They aren't. And for that very reason people who have to cope with these expressions need more guidance than they get from a simple “hyphenate before but not after” kind of rule. In the final analysis, what becomes of the hyphen over the long run is of little consequence. What does matter is

*There is only one worm in this rosy apple: some of the words that fit these patterns are now acceptably spelled as one word. For example:

Normal Pattern	Exception	Normal Pattern	Exception
water-repellent	waterproof	half-baked	halfhearted
time-consuming	timeworn	clear-sighted	clearheaded

that we express ourselves with precision, verve, and grace. If the hyphen can help us toward that end, why not make use of it?

► *For a further discussion of the treatment of compound adjectives, see §§813–832.*

The Semicolon; and Other Myths

In certain circles that I move in, the fastest way I know to start a quarrel is to attack the semicolon. If I knocked my friends' politics or sneered at their religious beliefs, they would simply smile. But attack their views on the semicolon and they reach for a bread knife. Why this particular mark of punctuation should excite such intense passion escapes me. The semicolon has always been a neurotic creature, continually undergoing an identity crisis. After all, it is half comma and half period, and from its name you would think it is half a colon. It is hardly any wonder, then, that a lot of people are half crazy trying to determine who the semicolon really is and what its mission in life is supposed to be.

In the course of this brief essay, I am going to explore three myths that have grown up over the years about the semicolon and about some other marks of punctuation.

Myth No. 1: If either clause in a compound sentence contains an internal comma, use a semicolon (not a comma) before the coordinating conjunction that connects the clauses. According to this line of reasoning, it is all right to use a comma in a compound sentence like this:

The meeting in Salem has been canceled, but all other meetings will go on as scheduled.

However, if I use commas for a lesser purpose within either clause (for example, by inserting *Oregon* after *Salem* and setting it off with commas), then the comma before the conjunction must be upgraded to a semicolon.

The meeting in Salem, Oregon, has been canceled; but all other meetings will go on as scheduled.

It is harsh, I concede, to dismiss this rule as a myth when it has been taught for years in various classes and various texts. But the fact is that almost no one punctuates that way anymore. The trouble with using a semicolon in such sentences is that it creates a break that is too strong for the occasion. It closes down the action of the sentence at a point where the writer would like it to keep on going. So contemporary writers see nothing wrong with using commas simultaneously to separate clauses and to perform lesser functions within the clauses—unless, of course, total confusion or misreading is likely to result. But in most cases it doesn't. In the following sentence, commas are used both *within* clauses and *between* clauses without any loss of clarity and also without any loss of verbal momentum.

On March 14, 2007, I wrote to your credit manager, Mr. Lopez, but I have not yet heard from him.

This simultaneous use of commas within and between clauses may look offensive to anyone accustomed to the traditional rule. The fact remains that we have been using commas for both purposes in *complex* sentences all along, and it has never occasioned any comment.

Although I wrote to your credit manager, Mr. Lopez, on March 14, 2007, I have not yet heard from him.

It should be clearly understood that the use of a semicolon before the conjunction in a compound sentence is not wrong. If you want a strong break at that point, the semicolon can and should be used. But you ought to know that the reason for using it is the special effect it creates—and not the presence of internal commas. For example:

I have tried again and again to explain to George why the transaction had to be kept secret from him; but he won't believe me.

► For a further discussion of the use of a semicolon in a compound sentence, see §§176–177.

Myth No. 2: Always use a semicolon before an enumeration or an explanation introduced by *for example*, *namely*, or *that is*. In many cases this rule is quite true, but in other cases either a colon or a comma is better suited to the occasion. Let's look at some examples.

There are several things you could do to save your business (?) namely, try to get a loan from the bank, find yourself a partner with good business judgment, or pray that your competitor goes out of business before you do.

If you put a semicolon before *namely*, you will close the action down just when the sentence is starting to get somewhere. Because the first part of the sentence creates an air of anticipation, because it implicitly promises to reveal several ways of saving the business, you need not a mark that closes the action down but one that supports the air of anticipation. Enter the colon.

The colon is one of the underrated stars in the firmament of punctuation. It would be more widely used, perhaps, if its sound effects were better understood. The colon is the mark of anticipation. It is a blare of trumpets before the grand entrance; it is the roll of drums before the dive off the 100-foot tower. It marks the end of the buildup and gets you ready for “the real thing.” Thus:

There are several things you can do to save your business: namely, try to get a loan . . .

Consider this example, however:

Express numbers in figures when they are accompanied by abbreviations; for example, 4 p.m., 8 ft.

The first part of this sample sentence expresses a self-contained thought. If the sentence ended right there, the reader would not be left up in the air. The examples that follow are unexpected, unanticipated, added on almost as an afterthought. We're glad to have them, but they aren't anything we were counting on. The semicolon here is quite appropriate; it momentarily closes down the action of the sentence after the main point is expressed.

In other situations a comma may be the best mark to use before *namely*, *for example*, or *that is*. Consider this sentence as an example:

Do not use quotation marks to enclose an *indirect quotation*, that is, a restatement of a person's exact words.

In this case, a semicolon would be inappropriate before *that is* because it would close off the action just as we were about to get a definition of a term within the main clause. Moreover, a colon would be inappropriate because it would imply that the sentence up to that point was a buildup for what follows—and that is not true in this case. Here all that is needed is a simple

comma to preserve the close relationship between the term *indirect quotation* and the explanatory expression that follows it.

► For a further discussion of the use of a semicolon with for example, namely, or that is, see §§181–183.

Myth No. 3: When a polite request is phrased as a question, end it with a period. This is another statement that does not, unfortunately, always hold true. In fact, once a period is used at the end of some requests, they no longer sound very polite. I once posted the following note in my home: “Will you please close the door.” My children knew that this was not really a polite request but a firm parental command. When they chose to ignore it, I amended the sign to read, “Will you please close the door!” (I was relying on the exclamation point to carry the full force of my exasperation.) That approach failed too, so I tried a new tack in diplomacy, amending the sign once again: “Will you please close the door?” My children now knew they had broken my spirit. They now sensed in the sign a pleading note, a petitioning tone, the begging of a favor. They also knew that now I was asking them a real yes-or-no question (or at least I was creating the illusion of asking). Then, in the paradoxical way that children have, once they knew they had the chance to say no, they began to answer my question with tacit affirmations, tugging the door after them on the way out or kicking it shut behind them on the way in.

My problems with my kids are, of course, my own, but learning how to express and punctuate polite requests tends to be a problem for all of us. Consider, for a moment, the wording of those three signs, alike in all respects except for the final mark of punctuation. The version that ends with a period is really a quiet but nonetheless firm demand. There is no element of a question in it at all. The voice rises in an arc and then flattens out at the end on a note of resolution. In the version that ends with an exclamation point, the voice rises in a higher arc and resounds with greater intensity and force of feeling, but it, too, comes down at the end—this time with something of a bang. In the final version, the one with the question mark, the voice starts on an upward curve and then trails off, still on an upward note. Three different readings of the same words, each with a different impact on the reader—all evoked by three different punctuation marks at the end.

Once you become sensitive to the effects produced by these marks of punctuation, handling polite requests becomes quite simple. All you have to do is say the sentence aloud and listen to the sound of your own voice. If you end the sentence with your voice on an upward note, you know that a question mark is the right punctuation to use. If your voice comes down at the end, you know that you need a period. And if you really feel forceful about it, you probably want an exclamation point.

If there is any potential danger in so simple a rule, it is this: we sometimes express our requests orally as flat assertions (“Will you please do this for me.”) when, as a matter of good taste and good manners, we ought to be asking a question (“Will you please do this for me?”).

Now it is true that in the normal course of events we all make demands on one another, and though we tack on a “Will you please” for the sake of politeness, these are still demands, not

questions. As long as your reader is not likely to consider them presumptuous, it is appropriate to punctuate these demands with periods:

Will you please sign both copies of the contract and return the original to me.

May I suggest that you confirm the departure time for your flight before you leave for the airport.

As opposed to these routine demands, there is the kind of polite request that asks the reader for a special favor. Here, if you really want to be polite, you will punctuate your request as a question so as to give your reader the chance to say no.

May I please see you sometime next week?

May I please get an advance copy of the confidential report you are doing?

Will you please acknowledge all my correspondence for me while I'm away?

In these cases you are asking for things that the reader may be unable or unwilling to grant; therefore, you ought to pose these requests as questions. (If you try reading them as statements, you will observe how quickly they change into peremptory demands.) Suppose, however, that these requests were addressed to your subordinates. Under those conditions you would have the right to expect your reader to make the time to see you, to supply you with an advance copy of the confidential report, and to handle your mail for you; therefore, you would be justified in ending these sentences with periods. But even when you have this authority over your reader, you ought to consider the alternative of asking. The inspired public official who replaced the "Keep Off the Grass" signs with a simple "PLEASE?" understood people and how they like to be talked to. If a question mark will get faster results or establish a nicer tone, why not use it?

► *For a further discussion of polite requests, see ¶103.*

There are other myths that one could discuss, but these three are sufficient to permit me to make one central point. Mastery over the rules of punctuation depends to a considerable extent on cultivating a sensitivity to the way a sentence moves and the way it sounds.

Punctuating by ear has come to be frowned on—and with much justification—for it has come to mean punctuating solely by feeling, by instinct, by intuition, without much regard for (or knowledge of) the structure of the language and the function of punctuation. Yet the solution, it seems to me, is not to abandon the technique of punctuating by ear but to cultivate it, to develop in yourself a disciplined sense of the relationship between the sound and the structure and the mechanics of language. Many authorities on language, if pressed, have to concede that they often consider first whether a thing sounds right or looks right: only then do they utter a pronouncement as to why it is right. If they rely on their ears for this kind of assurance, then why don't you cultivate the same skill?

Re: Abbrevs.

Sensitive environmentalists will tell you that emissions from smokestacks and automobile exhaust pipes are not the only forms of pollution that are potentially deadly to human beings. All about us are forces of depersonalization that continually menace the human touches that

have previously graced our lives. Most of us have become reconciled to being numerical entities on computer printouts. Those of us who are old enough to remember those elegant telephone exchanges (*PLaza 9, ASpinwall 7*) have had to reconcile ourselves to their numerical replacements (759, 277).

But new forms of pollutants continually appear on the atmospheric scene. We are beginning to choke—some of us—on the fog of initialisms and abbreviations and “memorable” acronyms that are intended to identify worthwhile examples of human endeavor. One gem is *HURRAH* (*Help Us Reach and Rehabilitate America’s Handicapped*), an instance where a dignified cause is demeaned by a fatuous label, a hollow cheer, an irrelevant salute. Perhaps in self-defense I ought to found a group called *HELP* (*Help Eliminate Linguistic Pollution*).

To put matters in perspective, it may help to think of abbreviations as belonging to the same class of objects as instant coffee and frozen dinners. They don’t take up much space and they’re great when you’re in a hurry, but they never have the taste of the real thing. Abbreviations are always appropriate in highly expedient documents (such as invoices, purchase orders, low-level interoffice memos, and routine e-mail messages and other correspondence), where the emphasis is on precise communication of data in the briefest possible space without concern for style or elegance of expression. But in other kinds of writing, where some attention is given to the *effect* to be made on the reader, a more formal style prevails—and under these circumstances only certain kinds of abbreviations are acceptable.

Some that are always acceptable, even in the most formal contexts, are those that precede or follow personal names (*Mr., Mrs., Ms., Jr., Sr., Ph.D., Esq.*), those that are part of an organization’s legal name (*Inc., Co., LLC*), those used in expressions of time (*a.m., p.m., PST, EDT*), and a few miscellaneous expressions (such as *B.C.* and *A.D.* or *C.E.* and *B.C.E.*).

Those venerable Latin abbreviations *etc.*, *i.e.*, *e.g.*, and the like are usually acceptable, but in writing that aspires to a certain elegance or formality they ought to be replaced, not by the full Latin expressions, but rather by the English expressions *and so forth* (or *and the like*), *that is, for example*, or appropriate equivalents.

Organizations with long names are now commonly identified by their initials in all but the most formal writing—*AFL-CIO, UNICEF, FBI, PBS*. In fact, some organizations—for example, *AAA, AARP, ABC*, and *NBC*—have now adopted these abbreviations as their formal names.

Even the initials *U.S.* are now acceptable in all but the most formal writing when used in the names of federal agencies (such as the *U.S. Department of Labor*). However, using the initials by themselves (as in *throughout the U.S.*) is bad form.

Abbreviations of days of the week, of names of months, of geographic names, and of units of measure are appropriate only in business forms, in correspondence that is clearly expedient, and in tables where space is tight.

Although it may seem troublesome knowing *when* to abbreviate, it is often more troublesome knowing *how* to abbreviate. There are so many variations in style (involving the use of caps or lowercase, the use or omission of periods, and the use or omission of internal space) that it is often difficult to find an authoritative source to follow. (The eleventh edition

of *Merriam-Webster's New Collegiate Dictionary*, for example, omits virtually all periods in its treatment of abbreviations, as if this were now the commonly accepted practice.)

Here are a few safe guidelines:

1. An all-cap abbreviation made up of the initials of several words is normally written without periods and without internal space (for example, *IBM*, *UAW*, *CEO*, *CD-ROM*, *SEC*, *IQ*). The only major exceptions are geographic names (such as *U.S.A.*), academic degrees (such as *B.A.*, *M.D.*), and a few odd expressions (such as *A.D.*, *C.E.*, and *P.O.*).
2. A lowercase abbreviation that consists of the initials of several words is normally written *with* a period after each initial but *without* space after internal periods (*a.m.*, *e.g.*).
3. When an abbreviation can be styled in all-caps (*COD*, *FOB*) or in lowercase (*c.o.d.*, *f.o.b.*), reserve the use of all-caps for business forms and similar documents where the blatant look of the capitals will not matter.
4. When an abbreviation stands for several words and consists of more than initials, insert a period and a space after each element in the abbreviation (for example, *Lt. Col.*, *nt. wt.*). Academic degrees, however, are an exception: write them *with* the periods but *without* internal space (for example, *Ph.D.*, *Ed.D.*, *LL.B.*).
5. A person's initials are now usually written without periods and space (as in *JFK*) unless they are part of the full name (as in *J. F. Kennedy*).

So much, in brief, for abbreviations. Useful devices on many occasions, but—except for an *R.S.V.P.* delicately scripted in the lower left corner of a formal invitation—not very elegant.

► For a further discussion of the treatment of abbreviations, see Section 5, pages 167–198.

PART 1

Grammar, Usage, and Style

SECTION 1.	Punctuation: Major Marks	2
SECTION 2.	Punctuation: Other Marks	61
SECTION 3.	Capitalization	105
SECTION 4.	Numbers	137
SECTION 5.	Abbreviations	167
SECTION 6.	Plurals and Possessives	199
SECTION 7.	Spelling	223
SECTION 8.	Compound Words	248
SECTION 9.	Word Division	287
SECTION 10.	Grammar	294
SECTION 11.	Usage	354

SECTION 1

Punctuation: Major Marks

The Period (¶¶101–109)

- At the End of a Statement or Command (¶¶101–102)
- At the End of a Polite Request or Command (¶103)
- At the End of an Indirect Question (¶104)
- With Decimals (¶105)
- In Outlines and Displayed Lists (¶¶106–107)
- With Headings (¶108)
- A Few Don’ts (¶109)

The Question Mark (¶¶110–118)

- To Indicate Direct Questions (¶¶110–113)
- To Indicate Questions Within Sentences (¶¶114–117)
- To Express Doubt (¶118)

The Exclamation Point (¶¶119–121)

- To Express Strong Feeling (¶¶119–120)
- With *Oh* and *O* (¶121)

The Comma (¶¶122–175)

- Basic Rules for Commas That Set Off (¶122)
- Basic Rules for Commas That Separate (¶¶123–125)
- With Clauses in Compound Sentences (¶¶126–129)
- With Clauses in Complex Sentences (¶¶130–132)
 - Introductory Dependent Clauses (¶130)
 - Dependent Clauses Elsewhere in the Sentence (¶¶131–132)
- With Clauses in Compound-Complex Sentences (¶¶133–134)
- With Participial, Infinitive, and Prepositional Phrases (¶¶135–137)
 - Introductory Phrases (¶135)
 - Phrases at the Beginning of a Clause (¶136)
 - Phrases Elsewhere in the Sentence (¶137)
- With Transitional Expressions and Independent Comments (¶¶138–143)
 - At the Beginning of a Sentence (¶139)
 - At the End of a Sentence (¶140)
 - Within the Sentence (¶141)
 - At the Beginning of a Clause (¶142)
 - With the Adverb *Too* (¶143)

With Interruptions and Afterthoughts (¶144)
 With Direct Address (¶145)
 With Additional Considerations (¶146)
 With Contrasting Expressions (¶147)
 With Identifying, Appositive, or Explanatory Expressions (¶¶148–152)
 With Residence and Business Connections (¶153)
 In Dates (¶¶154–155)
 With *Jr.*, *Sr.*, Etc. (¶¶156–158)
 With *Inc.* and *Ltd.* (¶159)
 In Geographic References and Addresses (¶¶160–161)
 In a Series (¶¶162–167)
 With Adjectives (¶¶168–171)
 To Indicate Omitted Words (¶172)
 To Indicate Unusual Word Order (¶173)
 For Special Emphasis (¶174)
 For Clarity (¶175)

The Semicolon (¶¶176–186)

Between Independent Clauses—*And*, *But*, *Or*, or *Nor* Omitted (¶176)
 Between Independent Clauses—*And*, *But*, *Or*, or *Nor* Included (¶177)
 With Transitional Expressions (¶¶178–180)
 With *For Example*, *Namely*, *That Is*, Etc. (¶¶181–183)
 Before an Independent Clause (¶181)
 At the End of a Sentence (¶182)
 Within a Sentence (¶183)
 In a Series (¶¶184–185)
 With Dependent Clauses (¶186)

The Colon (¶¶187–199)

Between Independent Clauses (¶187)
 Before Lists and Enumerations (¶¶188–191)
 In Expressions of Time and Proportions (¶¶192–193)
 In Business Documents (¶194)
 In References to Books or Publications (¶195)
 Capitalizing After a Colon (¶¶196–199)

► For definitions of grammatical terms, see the appropriate entries in the Glossary of Grammatical Terms (Appendix A).

101

Punctuation marks are the mechanical means for making the meaning of a sentence easily understood. They indicate the proper relationships between words, phrases, and clauses when word order alone is not sufficient to make these relationships clear.

Changes in punctuation can create different meanings in an identical string of words. If you let the punctuation guide you as you say the following sentences aloud, you will detect differences in intensity and urgency.

I want you to do it now.	Will you please close the door.
I want you to do it. Now.	Will you please close the door?
I want you to do it. Now!	Will you please close the door!

A story in circulation on the Internet tells of an instructor who asked a class of students to punctuate the following sentence:

Woman without her man is nothing

The responses varied according to the gender of the students.

MALE STUDENTS: Woman, without her man, is nothing.

FEMALE STUDENTS: Woman! Without her, man is nothing.

Although the story is likely to be apocryphal, it nevertheless makes the point that punctuation can greatly affect the way words are interpreted.

One important caution about punctuation: If you find it particularly hard to determine the appropriate punctuation for a sentence you have written, the chances are that the sentence is improperly constructed. To be on the safe side, recast your thought in a form you can handle with confidence. In any event, do not try to save a badly constructed sentence by means of punctuation.

Section 1 deals with the three marks of terminal punctuation (the period, the question mark, and the exclamation point) plus the three major marks of internal punctuation (the comma, the semicolon, and the colon). All other marks of punctuation are covered in Section 2.

The Period

At the End of a Statement or Command

- 101** a. Use a period to mark the end of a sentence that makes a statement or expresses a command.

A nanosecond is one-billionth of a second.

A nanomanager is someone who takes micromanaging down to a new level.

I question the need to cut advertising and promotion expenses at this time.

All monthly expense reports must be in by the 10th of the following month.

Make sure that Kate gets to the airport by 10 a.m. (The period that marks the end of the abbreviation also serves to mark the end of the sentence.)

There is no truth to the claim that a grammarian is someone's well-spoken grandmother.

When asked his opinion about a certain book, Abraham Lincoln said, "People who like this sort of thing will find this the sort of thing they like." (For the placement of a period with a closing quotation mark, see ¶247)

- b. Use a period to mark the end of an *elliptical* (condensed) *expression* that represents a complete statement or command. Elliptical expressions often occur as answers to questions or as transitional phrases.

Yes. No. Of course. Indeed. Been there. Done that. No problem.

Enough on that subject. Now, to proceed to your next point. Uh-oh.

Big deal. Yeah, right. And that's all I have to say. Period.

- c. Do not confuse elliptical expressions with sentence fragments. An elliptical expression represents a complete sentence. A sentence fragment is a word, phrase, or clause that is incorrectly treated as a separate sentence when it ought to be incorporated with adjacent words to make up a complete sentence.

Great news! Our 54-inch TV set arrived yesterday. After we had waited for six weeks. (*Great news* is an elliptical expression; it represents a complete sentence, *I have great news*. The clause *After we had waited for six weeks* is a sentence fragment, incorrectly treated as a sentence in its own right; this dependent clause should be linked with the main clause that precedes it.)

REVISED: Great news! Our 54-inch TV set arrived yesterday, after we had waited for six weeks.

NOTE: Under certain circumstances, treating a sentence fragment as a separate sentence can be an effective way of treating this element as if it were an afterthought and thereby giving it special emphasis. However, this treatment can quickly lose its effectiveness if it is overused.

A number of years ago Margaret Mead wrote: “Always remember that you are absolutely unique. Just like everyone else.”

► See also the entry for *And* on page 363.

102 The following guidelines will help you decide whether to use one or two spaces following a period at the end of a sentence.

NOTE: These spacing guidelines also apply to any other element that comes at the end of a sentence—for example, a question mark, an exclamation point, a dash, a closing parenthesis, a closing quotation mark, or a superscript (a raised figure or symbol) keyed to a footnote.

- a. As a general rule, use one space after the period at the end of a sentence, but switch to two spaces whenever you feel a stronger visual break between sentences is needed. In all cases, the deciding factor should be the appearance of the breaks between sentences in a given document.

NOTE: If you are preparing manuscript on a computer and the file will be used for typesetting, use only one space and ignore the issue of visual appearance.

Also use only one space if the text will have justified margins. As the illustration in ¶102f demonstrates, the use of one space will inevitably create some variation in spacing between sentences; with the use of two spaces, the variation may become excessive. (For additional comments on the use of justified margins, see ¶1344g, note.)

If the manuscript has already been typed with two spaces at the end of every sentence, use the *replace* function to change two spaces to one space throughout.

Continued on page 6

102

- b. When monospace fonts (in which all the characters have exactly the same width) were in wide use, it was traditional to leave two spaces between the period and the start of the next sentence.

This example is set in 10-point Courier, a monospace font. Note the use of two spaces after the period at the end of the previous sentence.

Now that the standards of desktop publishing predominate, the use of only one space after the period is quite acceptable with monospace fonts.

This example is also set in 10-point Courier, a monospace font. Note the use of only *one* space after the period at the end of the previous sentence.

- c. Proportional fonts (in which the width of the characters varies) are now much more commonly used. The standard for proportional fonts has always been the same: use only one space between the period and the start of the next sentence.
- d. With some proportional fonts—such as 11-point Calibri (the default font for Microsoft Word)—the use of only one space after the period may not always provide a clear visual break between sentences. Consider these examples:

This example is set in 11-point Calibri with proportional spacing. Note that the use of only *one* space does not create much of a visual break between sentences.

This example is also set in 11-point Calibri, but it uses *two* spaces after the period. Note the improvement in the visual break.

- e. When an abbreviation ends one sentence and begins the next, the use of one space after the period that ends the sentence may also be inadequate. (The following examples are set in 12-point Times New Roman.)

Let's plan to meet at 10 a.m. Mr. F. J. Calabrese will serve as the moderator. (Only *one* space follows *a.m.* at the end of the first sentence.)

Let's plan to meet at 10 a.m. Mr. F. J. Calabrese will serve as the moderator. (Note the improvement in the visual break when *two* spaces follow the period at the end of the first sentence.)

- f. If you prepare a document with a justified right margin (so that every line ends at the same point), the width of a single space between sentences can vary from line to line. (The following examples are set in 10-point Arial.)

We need to start lining up speakers right away. Please consider Patricia Cunningham for the keynote address. Frederick Haley could be approached if she is not available. (The single space after the first sentence is less than the single space after the second sentence.)

We need to start lining up speakers right away. Please consider Patricia Cunningham for the keynote address. Frederick Haley could be approached if she is not available. (Although two spaces have been inserted at the end of each sentence, the break after the second sentence looks excessive.)

► For a summary of guidelines for spacing with punctuation marks, see ¶299.

At the End of a Polite Request or Command

- 103** a. Requests, suggestions, and commands are often phrased as questions out of politeness. Use a period to end this kind of sentence if you expect your reader to respond by *acting* rather than by giving you a yes-or-no answer.

Will you please call us at once if we can be of further help.

Would you please send all bills to my bank for payment while I'm out of the country.

May I suggest that you refer to computer criminals who break into other people's computers as crackers, not hackers. (Hackers are actually dedicated computer programmers.)

If you can't attend the meeting, could you please send someone else in your place.

NOTE: Use a period only when you are sure that your reader is not likely to consider your request presumptuous.

- b. If you are asking a favor or making a request that your reader may be unable or unwilling to grant, use a question mark at the end of the sentence. The question mark offers your reader a chance to say no to your request and helps to preserve the politeness of the situation.

May I ask a favor of you? Could you spare fifteen minutes to tell my son about career opportunities in your company?

Will you be able to have someone in your department help me on the Woonsocket project?

Will you please handle the production reports for me while I'm away?

- c. If you are not sure whether to use a question mark or a period, reword the sentence so that it is clearly a question or a statement; then punctuate accordingly. For example, the sentence directly above could be revised as follows:

Would you be willing to handle the production reports for me while I'm away?

I would appreciate your handling the production reports for me while I'm away.

Continued on page 8

¶104

- d.** When you are addressing a request to someone who reports to you, you expect that person to comply. Therefore, a period can properly be used to punctuate such requests. However, since most people prefer to be *asked* to do something rather than be *told* to do it, a question mark establishes a nicer tone and often gets better results. Consider using a question mark when your request to a subordinate involves something beyond the routine aspects of the job.

Will you please let me know what your vacation plans are for the month of August. (Routine request to a subordinate.)

May I ask that you avoid scheduling any vacation time during August this year? I will need your help in preparing next year's forecasts and budgets. (Special request to a subordinate. The question mark suggests that the writer is sensitive to the problems this request could cause.)

NOTE: If you are unwilling to give your subordinate the impression that your request allows for a yes-or-no answer, simply drop the attempt at politeness and issue a straightforward command.

I must ask that you not schedule any vacation time during August this year. I will need your help in preparing next year's forecasts and budgets.

► *For a more detailed discussion of requests and the punctuation they require, see "Myth No. 3" in the frontmatter on pages xxxviii–xxxix.*

At the End of an Indirect Question

104

- Use a period to mark the end of an indirect question. (See also ¶¶115–116.)

Frank Wilcox has asked whether an exception can be made to our leave-of-absence policy.

The only question she asked was when the report had to be on your desk.

Why Janet Murray left the company so quickly has never been explained.

We know what needs to be done; the question is how to pay for it.

I wonder who defined intuition as the knowledge that your salary won't cover the cost of your children's education.

With Decimals

105

- Use a period (without a space before or after it) to separate a whole number from a decimal fraction; for example, \$5.50, 33.33 percent.

In Outlines and Displayed Lists

106

- Use periods after numbers or letters that enumerate items in an outline or a displayed list—unless the numbers or letters are enclosed in parentheses. Set a tab one or two spaces after these periods in order to achieve an adequate visual break between the numbers or letters and the items that follow on the same line. If you use the *automatic numbering* feature of your word processing program, the program will automatically set a tab 0.25 inch from each number or letter in your list. It will start the text of each item in the list, as well as any turnover lines, at that point. (See ¶¶107a, 199c, 222–223, 1345d, 1424f, 1720–1722; for an illustration, see page 653.)

NOTE: Do not use periods after bullets that introduce items in a displayed list. (See ¶¶1345e, 1424g.)

107 **a.** Use periods after independent clauses, dependent clauses, or long phrases that are displayed on separate lines in a list. Also use periods after short phrases that are essential to the grammatical completeness of the statement introducing the list. (In each of the following examples, the three listed items are all objects of the preposition *on* in the introductory statement.)

Please get me year-end figures *on*:

- a. Domestic sales revenues.
- b. Total operating costs.
- c. Net operating income.

OR: Please get me year-end figures *on*:

- Domestic sales revenues.
- Total operating costs.
- Net operating income.

NOTE: Avoid the use of semicolons and a conjunction when displaying items in a list.

You'll profit from inquiries through:

1. Your toll-free number.
2. A reader service card.
3. A fax-on-demand service.

NOT: You'll profit from inquiries through:

1. Your toll-free number;
2. A reader service card; and
3. A fax-on-demand service.

However, when these items are incorporated in a sentence, treat them as a series (with *and* inserted before the last item). Separate the items in the series with commas (see ¶162) or with semicolons (see ¶¶184–185) as appropriate.

You'll profit from inquiries through (1) your toll-free number, (2) a reader service card, and (3) a fax-on-demand service. (Do not use a colon after *through*. See ¶191d.)

b. No periods are needed after short phrases in a list if the introductory statement is grammatically complete (as in the first example below) or if the listed items are like those on an inventory sheet or a shopping list.

The handheld computers in this price range offer the following features:

- 256 MB of RAM
- Rechargeable lithium battery
- Backlit display

When you next order office supplies, please include:

- Toner cartridge for laser printer
- Pack of padded mailing bags (10½" x 15")
- 300 address labels for laser printer
- 4 surge protectors
- 12 yellow highlighters
- 25 hanging file folders

c. Note that a colon should be used after the element that introduces a displayed list, whether that element is a grammatically complete sentence or only a phrase. (See ¶¶189, 191d.)

d. In a displayed list, note that the first word of each item should begin with a capital letter (see ¶301e). It is acceptable, of course, to begin an item with a figure (see the examples in ¶107b and ¶191d, note). For additional examples of displayed lists, see ¶¶189, 199c, 1345c–e, 1424e–g, 1721.

¶108

With Headings

- 108** a. Use a period after a *run-in heading* (one that begins a paragraph and is immediately followed by text matter on the same line) unless some other mark of punctuation, such as a question mark, is required.

Insuring Your Car. Automobile insurance is actually a package of six different types of coverage. . . .

How Much Will It Cost? How much automobile insurance will cost you depends on your driving record, your age, and how much shopping . . .

- b. Omit the period if the heading is *freestanding* (displayed on a line by itself). However, retain a question mark or an exclamation point with a freestanding head if the wording requires it.

TAX-SAVING TECHNIQUES

Create Nontaxable Income

One of the easiest ways to reduce your tax bill is to invest in municipal bonds. Since the interest payable on these bonds is nontaxable, investing in municipals has become one of the most popular ways to avoid . . .

Is It Legal?

Investing your money so as to avoid taxes is perfectly legal. It is quite different from tax evasion, which is a deliberate attempt to . . .

NOTE: A period follows a run-in expression like *Table 6*, even though the heading as a whole is freestanding.

Table 6. SALARY RANGES

Figure 2-4. Departmental Staff Needs

- c. When using a period or some other mark of punctuation after a run-in heading or a run-in expression (like those illustrated in *a* and *b* above), leave one or two spaces after the punctuation mark as needed to achieve an adequate visual break at that point. (See ¶102.)

► *For the treatment of headings in reports and manuscripts, see ¶1425; for the treatment of headings in tables, see ¶¶1617–1620.*

A Few Don'ts

- 109** Don't use a period:

- a. After letters used to designate persons or things (for example, *Client A, Class B, Grade C, Brand X*). **EXCEPTION:** Use a period when the letter is the initial of a person's last name (for example, *Mr. A.* for *Mr. Adams*).
- b. After contractions (for example, *cont'd*; see ¶505).
- c. After ordinals expressed in figures (*1st, 2d, 3d, 4th*).
- d. After roman numerals (for example, *Volume I, David Weild III*). **EXCEPTION:** Periods follow roman numerals in an outline. (See ¶¶223, 1721–1722.)

► *Periods with abbreviations: see ¶¶506–513, 515.*

Periods with brackets: see ¶296a.

Periods with dashes: see ¶¶213, 214a, 215a.

Periods with parentheses: see ¶¶224c, 225a, 225c, 226c.

Periods with quotation marks: see ¶¶247, 252, 253a, 257–259.

Three spaced periods (ellipsis marks): see ¶¶275–281, 291, 299o.

Spacing with periods: see ¶¶299a, 1433e.

The Question Mark

To Indicate Direct Questions

- 110 a.** Use a question mark at the end of a direct question. Leave one or two spaces between the question mark and the start of the next sentence. (See ¶102. For a summary of guidelines on spacing with punctuation marks, see ¶299.)

Will you be able to meet with us after 5 p.m.?

Either way, how can we lose?

Mark Twain wrote, “Why do you sit there looking like an envelope without any address on it?”
(For the placement of a question mark with a closing quotation mark, see ¶249.)

NOTE: Be sure to place the question mark at the *end* of the question.

How do you account for this entry: “Paid to E. M. Johnson, \$300”?

(NOT: How do you account for this entry? “Paid to E. M. Johnson, \$300.”)

► *For the punctuation of indirect questions, see ¶104.*

- b.** Use a question mark (or, for special emphasis, an exclamation point) after a *rhetorical question*, a question to which no reply is expected.

Who came up with the idea of replacing the term *e-mail* with *e-pistle*?

Who wouldn’t snap up an opportunity like that? (See also ¶119b.)

Wouldn’t you rather be stuck in the sands of Florida this winter than in the snowdrifts of New England?

Isn’t it incredible that people could fall for a scheme like that?

OR: Isn’t it incredible that people could fall for a scheme like that!

NOTE: If the first clause of a compound sentence is a rhetorical question and the second clause is a statement, use a period to end the sentence.

Why don’t you look at the attached list of tasks, and then let’s discuss which ones you would like to take on.

Why not rent a house here for the summer, and then you’ll know whether this is the place where you’d like to retire.

- c.** Be sure to distinguish between a direct question and an indirect question.

DIRECT QUESTION: Do you think Craig will meet the deadline?

INDIRECT QUESTION: I wonder whether Craig will meet the deadline. (See ¶104.)

- 111 a.** Use a question mark at the end of an *elliptical* (condensed) *question*, that is, a word or phrase that represents a complete question.

Marion tells me that you are coming to the Bay Area. When? (The complete question is, “When are you coming?”)

Really? So what? How come? What for?

¶112

NOTE: When a single word like *how*, *when*, or *why* is woven into the flow of a sentence, capitalization and special punctuation are not usually required.

The questions we need to address at our next board meeting are not *why* or *whether* but *how* and *when*.

- b.** Punctuate complete and elliptical questions separately, according to your meaning.

When will the job be finished? In a week or two?

(**NOT:** When will the job be finished in a week or two?)

Where shall we meet? At the airport? (With this punctuation, the writer allows for the possibility of meeting elsewhere.)

Where shall we meet at the airport? (With this punctuation, the writer simply wants to pinpoint a more precise location within the airport.)

- 112** Use a question mark at the end of a sentence that is phrased like a statement but spoken with the rising intonation of a question.

You expect me to believe this story? He still intends to proceed?

Surely you can't be serious about what you said to the CEO yesterday?

- 113** A request, suggestion, or command phrased as a question out of politeness may not require a question mark. (See ¶103.)

To Indicate Questions Within Sentences

- 114** **a.** When a short direct question falls *within a sentence*, set the question off with commas and put a question mark at the end of the sentence.

I can alter the terms of my will, *can't I*, whenever I wish?

It's true, *is it not*, that you had no intention of staying on until the end of the year?

- b.** When a short direct question falls *at the end of a sentence*, use a comma before it and a question mark after it.

We aren't obligated to attend the meeting, *are we?*

You haven't understood a word I've said, *have you?*

Rachel is going to be named head of the Paris office, *isn't she?*

You forgot to make the hotel reservations, *didn't you?*

You were headed south on I-95, *is that correct?*

I'm correct in assuming you'll finish the job on schedule, *aren't I?* (The idiomatic expression *aren't I*—which uses a third-person plural verb, *are*, with a first-person singular pronoun, *I*—is acceptable in informal writing and speech. In formal situations, use *am I not*.)

- c.** Short questions falling within a sentence may also be set off with dashes or parentheses in place of commas. (See ¶¶214b, 224d.)

NOTE: Questions of this type are often referred to as “tag or echo questions.”

- 115** When a longer direct question comes *at the end of a sentence*, it starts with a capital letter and is preceded by a comma or a colon. The question mark that ends the question also serves to mark the end of the sentence.

NOTE: In the following examples and in ¶116, notice how a simple shift in word order converts a direct question to an indirect question. When the verb precedes the subject

(*shall we, can we*), the question is *direct*. When the verb follows the subject (*we shall, we can*), the question is *indirect*.

The key question is, Whom *shall we* nominate for next year's election?

This is the key question: Whom *shall we* nominate for next year's election? (Use a colon if the introductory material is an independent clause.)

BUT: We now come to the key question of whom *we shall* nominate for next year's election. (An indirect question requires no special punctuation or capitalization.)

OR: We now come to the key question of whom to nominate for next year's election.

- 116** When a longer direct question comes *at the beginning of a sentence*, it is followed by a question mark (for emphasis) or simply a comma.

How *can we* achieve these goals? is the next question. (Leave one space after a question mark within a sentence.)

OR: How *can we* achieve these goals, is the next question.

BUT: How *we can* achieve these goals is the next question. (Indirect question; no special punctuation is needed. See ¶115, note.)

- 117** **a.** A series of brief questions at the end of a sentence may be separated by commas or (for emphasis) by question marks. Do not capitalize the individual questions.

Who will be responsible for drafting the proposal, obtaining comments from all the interested parties, preparing the final version, and coordinating the distribution of copies? (As punctuated, this sentence implies that one person may be asked to perform all these tasks.)

OR: Who will be responsible for drafting the proposal? obtaining comments from all the interested parties? preparing the final version? coordinating the distribution of copies? (As punctuated, this sentence implies that different people may be asked to perform each task.)

NOTE: Leave one space after a question mark within a sentence and one or two spaces after a question mark at the end of a sentence. (See ¶102. For complete guidelines on spacing with punctuation marks, see ¶299.)

- b.** The brief questions in *a* above are all related to the same subject and predicate (*Who will be responsible for*). Do not confuse this type of sentence pattern with a series of independent questions. Each independent question starts with a capital letter and ends with a question mark.

Before you accept the job offer, think about the following: Will this job give you experience relevant to your real career goal? Will it permit you to keep abreast of the latest technology? Will it pay what you need?

NOTE: Leave one or two spaces after a question mark that marks the end of an independent question. (See ¶102. For complete guidelines on spacing with punctuation marks, see ¶299.)

- c.** Independent questions in a series are often elliptical expressions. (See ¶111.)

Has Walter's loan been approved? *When?* *By whom?* *For what amount?* (In other words: *When was the loan approved? By whom was the loan approved? For what amount was the loan approved?*)

(NOT: Has Walter's loan been approved, when, by whom, and for what amount?)

¶118

To Express Doubt

118 A question mark enclosed in parentheses may be used to express doubt or uncertainty about a word or phrase within a sentence. Do not insert any space before the opening parenthesis; leave one space after the closing parenthesis unless another mark of punctuation is required at that point.

He joined the firm after his graduation from Columbia Law School in 1999(?).

NOTE: When dates are already enclosed within parentheses, question marks may be inserted as necessary to indicate doubt.

the explorer Verrazano (1485?–1528?)

► *Question marks with dashes: see ¶¶214b, 215a.*

Question marks with parentheses: see ¶¶224d, 225a, 225d, 226c.

Question marks with quotation marks: see ¶¶249, 252, 254, 257–259, 261.

Spacing with question marks: see ¶¶299b, 1433e.

The Exclamation Point

The exclamation point is an emotional mark of punctuation that is most often found in sales and advertising copy. Like the word *very*, it loses its force when overused, so avoid using it wherever possible. F. Scott Fitzgerald took a stronger stand on this matter: “Cut out all these exclamation points. An exclamation point is like laughing at your own joke.”

To Express Strong Feeling

119 a. Use an exclamation point at the end of a sentence (or an elliptical expression that stands for a sentence) to indicate enthusiasm, surprise, disbelief, urgency, or strong feeling. Leave one or two spaces between the exclamation point and the start of the next sentence. (See ¶102. For complete guidelines on spacing with punctuation marks, see ¶299.)

Yes! We're selling our entire inventory below cost! Doors open at 9 a.m.! Ta-da!

Let's roll! No! I don't believe it! Hang in there! Incredible! Yesss!

Buy one! Get one free! Happy holidays! Yee-haw!

End of discussion! We have more pressing matters to deal with!

Sign on the door of a veterinarian's office: Be back in 5 minutes. Sit! Stay!

When I told Sid what had happened, all he said was, “You've got to be kidding!” (For the placement of an exclamation point with a closing quotation mark, see ¶249.)

b. An exclamation point may be used in place of a question mark to express strong feeling. (See also ¶110b.)

How could you do that! What made you think I'd welcome a call at 2:30 a.m.!

What did I tell you!

c. The exclamation point may be enclosed in parentheses and placed directly after a word that the writer wants to emphasize. Do not insert any space before the opening parenthesis, and leave one space after the closing parenthesis unless another mark of punctuation is required at that point.

We won exclusive(!) distribution rights in the Western Hemisphere.

- 120** **a.** A single word may be followed by an exclamation point to express intense feeling. The sentence that follows it is capitalized and punctuated as usual.

Congratulations! Your summation at the trial was superb.

- b.** When a word is repeated for emphasis, an exclamation point should follow each repetition.

Going! Going! Our bargains are almost gone!

- c.** When exclamations are mild, a comma or a period is sufficient.

Well, well, things could be worse.

No. I won't accept those conditions.

With *Oh* and *O*

- 121** **a.** At the beginning of a sentence, the exclamation *Oh* may be followed by either an exclamation point or a comma, depending on the emphasis desired and the word that immediately follows *Oh*.

Oh! I didn't expect that!

Oh, how I wish we could start all over again.

Oh, no! Not that again!

Oh, brother, what a mess you've made!

Oh, wow! What an honor!

Oh, well, what's the use?

When *oh* falls elsewhere in a sentence, treat it like an interrupting element (see ¶122a) and set it off with two commas.

It all happened, oh, so long ago that I really can't remember what Ann Ridley said.

- b.** The capital *O*, the sign of direct address, is usually not followed by any punctuation
O America, where are you headed? Do you know the words to "O Canada"?

- c.** In expressions that appear to be addressed to God or the Lord, use *O* only when the expression represents a true appeal for divine assistance.

O Lord, help me!

O God, give me strength.

Otherwise, begin the expression with *Oh* and insert or omit a comma after it, depending on whether or not you want to create a brief pause before the words that follow.

Oh, God, what have you done now?

OR: Oh God, what have you done now?

Oh my God, I can't believe you actually said that during your TV interview!

(Some writers prefer to use *omigod* to emphasize that a real appeal for divine assistance is not intended.)

► *Exclamation point with dashes:* see ¶¶208, 214b, 215a.

Exclamation point with parentheses: see ¶¶224d, 225a, 225d, 226c.

Exclamation point with quotation marks: see ¶¶249, 252, 254, 257–259, 261.

Spacing with exclamation points: see ¶¶299b, 1433e.

The Comma

The comma has two primary functions: it *sets off* nonessential expressions that interrupt the flow of thought from subject to verb to object or complement, and it *separates* elements within a sentence to clarify their relationship to one another. Two commas are typically needed to set off, but only a single comma is needed to separate.

¶122

The following paragraphs (¶¶122–125) present an overview of the rules governing the use of the comma. For a more detailed treatment of the specific rules, see ¶¶126–175. For a perspective on the rules for using the comma, see the essay in the frontmatter on pages xxx–xxxii.

Basic Rules for Commas That Set Off

122 Use commas to set off *nonessential expressions*—words, phrases, and clauses that are not necessary for the meaning or the structural completeness of the sentence.

IMPORTANT NOTE: In many sentences you can tell whether an expression is nonessential or essential by trying to omit the expression. If you can leave it out without affecting the meaning or the structural completeness of the sentence, the expression is nonessential and should be set off by commas.

NONESSENTIAL: Let's get the advice of Harry Stern, *who has in-depth experience with all types of personal computers*. (When a specific person is named, the *who* clause provides welcome but nonessential information.)

ESSENTIAL: Let's get the advice of someone *who has in-depth experience with all types of personal computers*. (Without the *who* clause, the meaning of the sentence would be incomplete.)

NONESSENTIAL: There is, *no doubt*, a reasonable explanation for his behavior at the board meeting. (The phrase *no doubt* is nonessential, because it can be omitted without affecting the structural completeness of the sentence.)

ESSENTIAL: There is *no doubt* about her honesty. (Without *no doubt*, the structure of the sentence would be incomplete.)

However, in other sentences the only way you can tell whether an expression is nonessential or essential is by the way you would say it aloud. If your voice tends to *drop* as you utter the expression, it is nonessential; if your voice tends to *rise*, the expression is essential.

NONESSENTIAL: Finch and Helwig would prefer, *therefore*, to limit the term of the agreement to two years.

ESSENTIAL: Finch and Helwig would *therefore* prefer to limit the term of the agreement to two years.

► *For additional examples, see ¶141, note.*

a. Interrupting Elements. Use commas to set off words, phrases, and clauses when they break the flow of a sentence from subject to verb to object or complement. (See also ¶¶144–147.)

We can deliver the car on the day of your husband's birthday or, *if you wish*, on the Saturday before then. (When this sentence is read aloud, notice how the voice drops on the nonessential expression *if you wish*.)

They have sufficient assets, *don't they*, to cover these losses? (See ¶114a.)

Let's take advantage of the special price and order, say, 200 reams this quarter instead of our usual quantity of 75.

Mary Cabrera, *rather than George Spengler*, has been appointed head of the New Albany office.

BUT: Mary Cabrera has been appointed head of the New Albany office *rather than George Spengler*. (The phrase is not set off when it does not interrupt.)

- b. Afterthoughts.** Use commas to set off words, phrases, or clauses loosely added onto the end of a sentence. (See also ¶144a.)

Send us your check as soon as you can, *please*.

Grant promised to share expenses with us, *if I remember correctly*.

It is not too late to place an order, *is it?* (See ¶114b.)

Our CEO prefers to think of last year's sales results as "an incomplete success," *not as a failure*. (For the placement of a comma with a closing quotation mark, see ¶247.)

- c. Transitional Expressions and Independent Comments.** Use commas to set off transitional expressions (like *however*, *therefore*, *on the other hand*) and independent comments (like *obviously*, *in my opinion*, *of course*) when they interrupt the flow of the sentence. Do not set these elements off, however, when they are used to emphasize the meaning; the voice goes up in such cases. In the examples that follow, consider how the voice drops when the expression is nonessential and how it rises when the expression is essential. (See also ¶¶138–143.)

NONESSENTIAL: We are determined, *nevertheless*, to finish on schedule.

ESSENTIAL: We are *nevertheless* determined to finish on schedule.

NONESSENTIAL: It is, *of course*, your prerogative to change your mind. (Here the voice rises on *is* and drops on *of course*.)

ESSENTIAL: It is *of course* your prerogative to change your mind. (Here the voice rises on *of course*.)

- d. Descriptive Expressions.** When descriptive expressions *follow* the words they refer to and provide additional but nonessential information, use commas to set them off. (See also ¶¶148–153.)

NONESSENTIAL: His most recent article, "*How to Make a Profit With High-Tech Investments*," appeared in the June 1 issue of *Forbes*. (*His most recent* indicates which article is meant; the title gives additional but nonessential information.)

ESSENTIAL: The article "*How to Make a Profit With High-Tech Investments*" appeared in the June 1 issue of *Forbes*. (Here the title is needed to indicate which article is meant.)

NONESSENTIAL: Thank you for your letter of April 12, *in which you questioned our discount terms*. (The date indicates which letter; the *in which* clause gives additional information. See ¶152.)

ESSENTIAL: Thank you for your letter *in which you questioned our discount terms*. (Here the *in which* clause is needed to indicate which letter is meant.)

- e. Dates.** Use commas to set off the year in complete dates (for example, Sunday, June 4, 2006, . . .). (See also ¶¶154–155.)

- f. Names.** Use commas to set off abbreviations that follow a person's name (Julie Merkin, *Ph.D.*, announces the opening . . .) and to set off names of states or countries following city names (Rye, *New York*, will host . . .). In personal names and company names, the trend is not to set off elements like *Jr.*, *Sr.*, *III*, *Inc.*, or *Ltd.* (for example, *Guy Tracy Jr.* and *Redd Inc.*); however, individual preferences should be respected when known. (See also ¶¶156–159.)

¶123

Basic Rules for Commas That Separate**123** Use a single comma:

- a. To separate the two main clauses in a compound sentence when they are joined by *and*, *but*, *or*, or *nor*. (See also ¶¶126–129.)

Money doesn't buy happiness, but some people think it upgrades despair beautifully.

The Spanish word *esposos* means "husbands," *and* the Spanish word *esposas* means "wives." (Unfortunately, *esposas* is also the Spanish word for "handcuffs.")

- b. To separate three or more items in a series—unless all the items are joined by *and* or *or*. (See also ¶¶162–167.)

It takes time, effort, and a good deal of money.

BUT: It takes time *and* effort *and* a good deal of money.

- c. To separate two or more adjectives that modify the same noun. (See also ¶¶168–171.)

We need to mount an exciting, hard-hitting ad campaign.

- d. To separate the digits of numbers into groups of thousands.

Sales projections for the Southern Region next year range between \$900,000 and \$1,000,000.

NOTE: The comma is now commonly omitted in four-digit whole numbers (*1000* through *9999*) except in columns with larger numbers that require commas. (See also ¶461a, note.)

- e. To indicate the omission of key words or to clarify meaning when the word order is unusual. (See also ¶¶172, 173, 175.)

*Half the purchase price is due on delivery of the goods; the balance, in three months. (The comma here signifies the omission of *is due*.)*

*What will happen, we don't know. (The comma here helps the reader cope with the unusual word order; it separates the object, *What will happen*, from the subject, *we*, which follows.)*

124 Use a single comma after *introductory elements*—items that begin a sentence and come before the subject and verb of the main clause. (See also ¶139c.)

Yes, we can. Well, that depends. (Introductory words.)

Taking all the arguments into consideration, we have decided to modernize these facilities rather than close them down. (Introductory participial phrase.)

To determine the proper mix of ingredients for a particular situation, see the table on page 141. (Introductory infinitive phrase.)

Before we can make a final decision, we will need to run another cost-profit analysis. (Introductory dependent clause.)

- a. Use a comma after an *introductory request* or *command*.

Look, we've been through tougher situations before.

You see, the previous campaigns never did pan out.

Please remember, all expense reports must be on my desk by Friday.

BUT: *Please remember that all . . .* (When *that* is added, *please remember* becomes the main verb and is no longer an introductory element.)

- b.** Commas are not needed after *ordinary introductory adverbs* or *short introductory phrases* that answer such questions as:

WHEN: tomorrow, yesterday, recently, early next week, in the morning, soon, in five years, in 2009
HOW OFTEN: occasionally, often, frequently, once in a while
WHERE: here, in this case, at the meeting
WHY: for that reason, because of this situation

However, commas are used after introductory adverbs and phrases:

- (1) When they function as *transitional expressions* (such as *well*, *therefore*, *however*, *for example*, *in the first place*), which provide a transition in meaning from the previous sentence.
- (2) When they function as *independent comments* (such as *in my opinion*, *by all means*, *obviously*, *of course*), which express the writer's attitude toward the meaning of the sentence. (See also ¶¶138–142.)

In the morning things may look better. (Short prepositional phrase telling *when*; no comma needed.)

In the first place, they don't have sufficient capital. (Transitional expression; followed by comma.)

In my opinion, we ought to look for another candidate. (Independent comment; followed by comma.)

Recently we had a request for information on school enrollment trends. (Introductory adverb telling *when*; no comma needed.)

Consequently, we'll have to cancel the contract. (Transitional expression; followed by comma.)

Obviously, the request will have to be denied. (Independent comment; followed by comma.)

NOTE: Many writers use commas after *all* introductory elements to avoid having to analyze each situation.

125 Separating commas are often improperly used in sentences. In the following examples the slashes indicate points at which single commas *should not* be used.

- a.** Do not separate a subject and its verb.

The person she plans to hire for the job/ is Peter Crotty.

BUT: The person she plans to hire for the job, *I believe*, is Peter Crotty. (Use two commas to set off an interrupting expression.)

Whether profits can be improved/ depends on several key variables. (Noun clause as subject.)
Anyone who contributes/ does so for a good reason.

BUT: *Anyone who contributes, contributes* to a most worthy cause. (In special cases like this, a comma may be required for clarity. See also ¶175b.)

- b.** Do not separate a verb and its object or complement.

The test mailing has not produced/ the results we were hoping for. (Verb and object.)

Mrs. Paterra will be/ the company's new director of marketing. (Verb and complement.)

The equipment is/ easy to operate, inexpensive to maintain, and built to give reliable service for many years. (Verb and complement.)

¶125

Rebecca Hingham *said/ that the research data would be on your desk by Monday morning.* (Noun clause as object.)

BUT: Rebecca Hingham *said, "The research data will be on your desk by Monday morning."* (A comma ordinarily follows a verb when the object is a direct quotation. See also ¶126a.)

The question we really need to address is, *Do we have a better solution to propose?* (A comma also follows a verb when the object or complement is a direct question. See also ¶115.)

- c. Do not separate an adjective from a noun that follows it.

The project requires a highly motivated, research-oriented, *cost-conscious/ manager.*

- d. Do not separate a noun and a prepositional phrase that follows.

The *board of directors/ of the Fastex Corporation* will announce its decision next week.

BUT: The board of directors, *of necessity,* must turn down the merger at this time. (Use two commas to set off an interrupting expression.)

- e. Do not separate a coordinating conjunction (*and, but, or, or nor*) and the following word.

I tried to tell Jeff not to sign that contract, *but/ he* wouldn't listen.

You can read the draft of the division's medium-range plan now *or/ when* you get home tonight.

BUT: You can read the draft of the division's medium-range plan now *or, if you prefer,* when you get home tonight. (Use two commas to set off an interrupting expression.)

- f. Do not separate *two* words, phrases, or clauses that are joined by a coordinating conjunction.

These letters/ and those from Mr. Day should be shown to Ann Poe. (Two subjects.)

He may go on to graduate school at *Stanford/ or Harvard.* (Two objects of the preposition *at.*)

I have just read Ms. Berkowitz's proposal/ and find it extremely well done. (Two predicates. See also ¶127.)

We hope *that you will visit our store soon/ and that you will find the styles you like.* (Two noun clauses serving as objects of the verb *hope.*)

The CEO plans *to visit the Western Region/ and call personally on the large accounts that have stopped doing business with us.* (Two infinitive phrases serving as objects of the verb *plans.*)

BUT: *Frank Albano will handle the tickets, and Edna Hoehn will be responsible for publicity.* (A comma separates two independent clauses joined by a coordinating conjunction. See ¶126.)

If you need special assistance with your orders or if we can help you in any other way, please call us at 1-888-555-1234. (Two dependent clauses preceding the main clause. See also ¶130a, note.)

NOTE: When the main verb in a sentence is followed by two long phrases or clauses that are joined by a coordinating conjunction, the sentence can be awfully hard to follow. The solution is not to insert a comma before the conjunction but to consider (1) converting the second long element into a separate sentence or (2) inserting a parenthetical number or letter before each element. Taking one or the other of these steps will make the meaning of the original sentence clear and easy for a reader to grasp.

CONFUSING: We hope that you will visit the new store that we plan to open in the Westport Mall early next month and that you will find styles you like when you browse through our greatly expanded selection of clothes. (Resist the temptation to insert a comma before *and* in an effort to make the sentence clearer.)

BETTER: We hope that you will visit the new store that we plan to open in the Westport Mall early next month. Moreover, we hope that you will find styles you like when you browse through our greatly expanded selection of clothes.

The following rules (¶¶126–137) deal with the punctuation of clauses and phrases in sentences.

With Clauses in Compound Sentences

- 126** a. When a compound sentence consists of *two* independent clauses joined by a co-ordinating conjunction (*and*, *but*, *or*, or *nor*), place a separating comma before the conjunction. (For an exception, see ¶129.)

Mrs. Fenster noticed a small discrepancy in the figures, *and* on that basis she decided to reanalyze the data.

BUT: Mrs. Fenster noticed a small discrepancy in the figures *and* on that basis decided to reanalyze the data. (See ¶127a–b.)

Show this proposal to Mr. Florio, *and* ask him for his reaction. (See ¶127c.)

Either we step up our promotion efforts, *or* we must be content with our share of the market.

Not only were we the developers of this process, *but* we were the first to apply it successfully.

- b. For special effect, the comma before the coordinating conjunction can be replaced by a period, a question mark, or an exclamation point. The coordinating conjunction is then capitalized, and the second independent clause is treated as a separate sentence. However, this treatment, if overused, can lose its effectiveness very quickly. (See page 363 for a usage note on *and*.)

Is it self-confidence that makes you successful? Or is it success that makes you self-confident?

I told Callahan that we would not reorder unless he cut his prices by 20 percent. And he did.

NOTE: Do not insert a comma directly after the coordinating conjunction unless a parenthetical element begins at that point.

I told Callahan that we would not reorder unless he cut his prices by 20 percent. And, to my total amazement, he did.

- c. When a compound sentence consists of *three* or more independent clauses, punctuate this series like any other series. (See also ¶162.)

Bob can deal with the caterer, Nora can handle publicity, and I can take care of the rest.

- 127** Do not confuse a *compound sentence* with a simple sentence containing a *compound predicate*.

- a. A *compound sentence* contains at least two independent clauses, and each clause contains a subject and a predicate.

Barbara just got her master's, and she is now looking for a job in sales.

- b. A sentence may contain one subject with a *compound predicate*, that is, two predicates connected by a coordinating conjunction. In such sentences no comma separates the two predicates.

Barbara just got her master's and is now looking for a job in sales. (When *she* is omitted from the previous example, the sentence becomes a simple sentence with a compound predicate.)

Ogleby not only *wants a higher discount* but also *demands faster turnarounds on his orders*. (Compound predicate; no comma before *but*.)

BUT: *Ogleby not only wants a higher discount, but he also demands faster turnarounds on his orders.* (When *he* is inserted as the subject of the second predicate, the sentence becomes a compound sentence and a comma should be inserted before *but*)

Continued on page 22

¶128

NOTE: To prevent a misreading, it is necessary in some cases to separate two predicates with a comma. (See the final example in ¶175a.)

► *For a usage note on not only . . . but also, see ¶1081b, note.*

- c. When one or both verbs are in the imperative and the subject is not expressed, treat the sentence as a compound sentence and use a comma between the clauses.

Please look at the brochure I have enclosed, and then get back to me if you have additional questions. You may not be able to get away right now, but do plan to stay with us whenever you find the time.

Call Ellen Chen sometime next week, and ask her whether she will speak at our conference next fall.

BUT: *Call Ellen Chen and ask her whether she will speak at our conference next fall.* (Omit the comma if either clause is short. See ¶129.)

- d. When nonessential elements precede the second part of a *compound predicate*, they are treated as interrupting expressions and are set off by two commas. When these same expressions precede the second clause of a *compound sentence*, they are treated as introductory expressions and are followed by one comma.

We can bill you on our customary terms or, if you prefer, can offer you our new deferred payment plan. (Interrupting expression requires two commas.)

We can bill you on our customary terms, or if you prefer, we can offer you our new deferred payment plan. (Introductory expression requires one comma.)

Frank Bruchman went into the boardroom and, without consulting his notes, proceeded to give the directors precise details about our financial situation. (Interrupting expression.)

Frank Bruchman went into the boardroom, and without consulting his notes, he proceeded to give the directors precise details about our financial situation. (Introductory expression.)

► *See also ¶¶131c, 136a, 142.*

128

Do not use a comma between two independent clauses that are not joined by a coordinating conjunction (*and, but, or, or nor*). This error of punctuation is known as a *comma splice* and produces a *run-on sentence*. Use a semicolon, a colon, or a dash (whichever is appropriate), or start a new sentence. (See ¶¶176, 187, 204–205.)

WRONG: Please review these spreadsheets quickly, I need them back tomorrow.

RIGHT: Please review these spreadsheets quickly; I need them back tomorrow.

OR: Please review these spreadsheets quickly. I need them back tomorrow.

129

If either clause of a compound sentence is short, the comma may be omitted before the conjunction.

Their prices are low and their service is efficient.

I would help you but I don't have the time.

Please initial these forms and return them by Monday.

Consider leasing and see whether it costs less in the long run than buying.

Consider whether leasing costs more than buying and then decide.

NOTE: Make sure that the omission of a comma does not lead to confusion.

CLEAR: Please don't litter, and recycle whenever possible.

CONFUSING: Please don't litter and recycle whenever possible. (Without a comma after *litter*, the sentence could seem to be saying, “ . . . and please don't recycle whenever possible.”)

With Clauses in Complex Sentences

A complex sentence contains one independent clause and one or more dependent clauses. *After, although, as, because, before, if, since, unless, when, and while* are among the words most frequently used to introduce dependent clauses. (See ¶132 for a longer list.)

130 Introductory Dependent Clauses

- a. When a dependent clause precedes the independent clause, separate the clauses with a comma.

Before we can make a decision, we must have all the facts.

When you read the Weissberg study, look at Appendix 2 first.

If they had invested more carefully, they could have avoided bankruptcy.

Because my itinerary gives me no free time, I see no way to fit in a lunch with the Kellys.

After we have studied all aspects of the complaint, we will make a recommendation.

BUT: Only after we have studied all aspects of the complaint will we make a recommendation. (No comma follows the introductory clause when the word order in the main clause is abnormal. Compare the abnormal *will we make* here with the normal *we will make* in the preceding example.)

NOTE: When two dependent clauses both modify the main clause that follows, do not use a comma to separate the dependent clauses. Insert a comma only before the main clause.

*If you send us your résumé in advance and you bring in a portfolio showing samples of your work, we will be glad to set up an interview for you during the last week of this month. (Do not insert a comma after *advance*. A coordinating conjunction—in this case *and*—is all that is needed to connect the two dependent clauses that both modify the main clause.)*

- b. Be sure you can recognize an introductory dependent clause, even if some of the essential words are omitted from the clause. (Such constructions are known as *elliptical clauses*.)

Whenever possible, he leaves his office by six. (Whenever it is possible, . . .)

If so, I will call you tomorrow. (If that is so, . . .)

Should you be late, just call to let me know. (If you should be late, . . .)

- c. Do not use a comma after an introductory clause when it serves as the *subject* of a sentence.

Whomever you nominate will have my support. (Introductory clause as subject.)

BUT: *Whomever you nominate, I will support. (Introductory clause as object.)*

That the firm must be reorganized is no longer questioned. (Introductory clause as subject.)

BUT: *That the firm must be reorganized, I no longer question. (Introductory clause as object.)*

Whatever Helen decides to do is no concern of mine. (Introductory clause as subject.)

BUT: *Whatever Helen decides to do, she needs some professional advice. (Introductory clause as adverb.)*

¶131

- d.** Sentences like those shown in ¶130a–c are often introduced by an expression such as *he said that*, *she believes that*, or *they know that*. To punctuate these sentences correctly, simply ignore everything that comes before *that*. Punctuate what follows *that* in accordance with the examples presented in a–c.

Liz believes that *before we can make a decision*, we must have all the facts. (A separating comma follows the dependent clause, just as if the sentence began with the word *Before*. No comma precedes the dependent clause, because it is considered introductory, not interrupting.)

I think that *when you read the Weissberg study*, you will gain a new perspective on the situation.

Harry says that *whenever possible*, he leaves his office by six.

Everyone knows that *whomever you nominate* will have my support in the next election.

BUT: He said that, *as you may already know*, he was planning to take early retirement. (Two commas are needed to set off an interrupting dependent clause. See also ¶131c.)

1

131 Dependent Clauses Elsewhere in the Sentence

When a dependent clause *follows* the main clause or *falls within* the main clause, commas are used or omitted depending on whether the dependent clause is essential (restrictive) or nonessential (nonrestrictive).

- a.** An *essential* clause is necessary to the meaning of the sentence. Because it *cannot be omitted*, it should not be set off by commas.

Mrs. Foy said *that she would send us an advance program*. (Tells what was said.)

Basil is so disorganized *that his left hand doesn't even know what his left hand is doing*. (Tells to what extent.)

- b.** A *nonessential* clause provides additional descriptive or explanatory detail. Because it *can be omitted* without changing the meaning of the sentence, it should be set off by commas.

Compare the following examples:

ESSENTIAL: The person *who used to be Englund's operations manager* is now doing the same job for Jenniman Brothers. (Tells which person.)

NONESSENTIAL: George Pedersen, *who used to be Englund's operations manager*, is now doing the same job for Jenniman Brothers. (The name indicates which person; the *who* clause simply gives additional information.)

ESSENTIAL: The Pennington bid arrived *after we had made our decision*. (Tells when.)

NONESSENTIAL: The Pennington bid arrived on Tuesday, *after we had made our decision*. (Tuesday tells when; the *after* clause simply adds information.)

ESSENTIAL: Damato's suggestion *that we submit the issue to arbitration* may be the only sensible alternative. (Tells which of Damato's suggestions is meant.)

NONESSENTIAL: Damato's latest suggestion, *that we submit the issue to arbitration*, may be the only sensible alternative. (Latest tells which of Damato's suggestions is meant; the *that* clause is not essential. See ¶1062c.)

- c.** A dependent clause occurring within a sentence must always be set off by commas when it *interrupts* the flow of the sentence.

We can review the wording of the announcement over lunch or, *if your time is short*, over the phone.

Please tell us when you plan to be in town and, *if possible*, where you will be staying. (The complete dependent clause is *if it is possible*.)

Senator Hemphill, *when offered the chance to refute his opponent's charges*, said he would respond at a time of his own choosing.

Ann Kourakis is the type of person who, *when you need help badly*, will be the first to volunteer. If, *when you have weighed the alternatives*, you choose one of the models that cost over \$500, we can arrange special credit terms for you.

BUT: He said that *if we choose one of the models that cost over \$500*, his company can arrange special credit terms for us. (See ¶130d for dependent clauses following *he said that*, *she knows that*, and similar expressions.)

132 The following list presents the words and phrases most commonly used to introduce dependent clauses. For most of these expressions two sentences are given: one containing an essential clause and one a nonessential clause. In a few cases only one type of clause is possible. If you cannot decide whether a clause is essential or nonessential (and therefore whether commas are required or not), compare it with the related sentences that follow.

After. ESSENTIAL: His faxed response came *after you left last evening*. (Tells when.)

NONESSENTIAL: His faxed response came this morning, *after the decision had been made*. (The phrase *this morning* clearly tells when; the *after* clause provides additional but nonessential information.)

All of which. ALWAYS NONESSENTIAL: The rumors, *all of which were unfounded*, brought about his defeat in the last election.

Although, even though, and though. ALWAYS NONESSENTIAL: She has typed her letter of resignation, *although I do not believe she will submit it*.

As. ESSENTIAL: The results of the mailing are *as you predicted they would be*.

NONESSENTIAL: The results of the mailing are disappointing, *as you predicted they would be*. (See page 364 for a usage note on *as*.)

As . . . as. ALWAYS ESSENTIAL: He talked *as persuasively* at the meeting as he did over the telephone. (See page 364 for a usage note on *as . . . as*.)

As if and as though. ESSENTIAL: She drove *as if (OR: as though) the road were a minefield*. (The *as if* clause tells how she drove.)

NONESSENTIAL: She drove cautiously, *as if (OR: as though) the road were a minefield*. (The adverb *cautiously* tells how she drove; the *as if* clause provides additional but nonessential information.)

As soon as. ESSENTIAL: We will fill your order *as soon as we receive new stock*.

NONESSENTIAL: We will fill your order next week, *as soon as we receive new stock*.

At, by, for, in, and to which. ESSENTIAL: I went to the floor *to which I had been directed*.

NONESSENTIAL: I went to the tenth floor, *to which I had been directed*.

Because. *Essential or nonessential*, depending on closeness of relation.

ESSENTIAL: She left *because she had another appointment*. (Here the reason expressed by the *because* clause is essential to complete the meaning.)

NONESSENTIAL: I need to have two copies of the final report by 5:30 tomorrow, *because I am leaving for Chicago on a 7:30 flight*. (Here the meaning of the main clause is complete; the reason expressed in the *because* clause offers additional but nonessential information.)

NOTE: See how the use or omission of a comma in the following sentences affects the meaning: I'm not taking that course of action, *because I distrust Harry's recommendations*. **BUT:** I'm not taking that course of action *because I distrust Harry's recommendations*. (I based my decision on another reason altogether.)

¶132

Before. **ESSENTIAL:** The shipment was sent *before your letter was received*.

NONESSENTIAL: The shipment was sent on Tuesday, *before your letter was received*. (*Tuesday* tells when the shipment was sent; the *before* clause provides additional but nonessential information.)

Even though. See *Although*.

For. **ALWAYS NONESSENTIAL:** Jim needs to raise money quickly, *for his tuition bill has to be paid by next Friday*. (A comma should always precede *for* as a conjunction to prevent misreading *for* as a preposition.)

If. **ESSENTIAL:** Let us hear from you *if you are interested*.

NONESSENTIAL: She promised to call, *if I remember correctly*. (Clause added loosely.)

In order that. *Essential or nonessential*, depending on closeness of relation.

ESSENTIAL: Please notify your instructor *in order that a makeup examination may be scheduled*.

NONESSENTIAL: Please notify your instructor if you will be unable to attend the examination on Friday, *in order that a makeup examination may be scheduled*.

No matter what (why, how, etc.). **ALWAYS NONESSENTIAL:** The order cannot be ready by Monday, *no matter what the store manager says*.

None of which. **ALWAYS NONESSENTIAL:** We received five boxes of samples, *none of which are in good condition*.

None of whom. **ALWAYS NONESSENTIAL:** We have interviewed ten applicants, *none of whom were satisfactory*.

Not so . . . as. **ALWAYS ESSENTIAL:** The second copy was *not so clear as* the first one. (See page 365 for a usage note on *as . . . as—not so . . . as*.)

Since. **ESSENTIAL:** We have taken no applications *since we received your memo*.

NONESSENTIAL: We are taking no more applications, *since our lists are now closed*. (Clause of reason.)

So that. *Essential or nonessential*, depending on closeness of relation.

ESSENTIAL: Examine all shipments *so that any damage may be detected promptly*.

NONESSENTIAL: Examine all shipments as soon as they arrive, *so that any damage may be detected promptly*.

So . . . that. **ALWAYS ESSENTIAL:** The costs ran *so high that we could not make a profit*.

Some of whom. **ALWAYS NONESSENTIAL:** The agency has sent us five applicants, *some of whom seem promising*.

Than. **ALWAYS ESSENTIAL:** The employees seem to be more disturbed by the rumor *than they care to admit*.

That. When *that* is used as a relative pronoun, it refers to things; it also refers to persons when a class or type is meant.

ALWAYS ESSENTIAL: Here is a picture of the plane *that I own*. She is the candidate *that I prefer*. (See also ¶1062.)

When *that* is used as a subordinating conjunction, it links the dependent clause it introduces with the main clause.

ALWAYS ESSENTIAL: We know *that we will have to make cuts in the budget*. (See pages 401–402 for a usage note on *that*.)

Though. See *Although*.

Unless. **ESSENTIAL:** This product line will be discontinued *unless customers begin to show an interest in it*.

NONESSENTIAL: I plan to work on the Aspen proposal all through the weekend, *unless Cindy comes into town*. (Clause added loosely as an afterthought.)

Until. **ALWAYS ESSENTIAL:** I will continue to work *until my children are out of school*.

When. **ESSENTIAL:** The changeover will be made *when Mr. Ruiz returns from his vacation*.

NONESSENTIAL: The changeover will be made next Monday, *when Mr. Ruiz returns from his vacation*. (Monday tells when; the *when* clause provides additional but nonessential information.)

Where. **ESSENTIAL:** I plan to visit the town *where I used to live*.

NONESSENTIAL: I plan to stop off in Detroit, *where I used to live*.

Whereas. **ALWAYS NONESSENTIAL:** The figures for last year cover urban areas only, *whereas those for this year include rural areas as well*. (Clause of contrast.)

Which. Use *which* (rather than *who*) when referring to animals, things, and ideas. Always use *which* (instead of *that*) to introduce nonessential clauses. (See ¶1062.)

The revised report, *which was done by Mark*, is very impressive.

NOTE: *Which* may also be used to introduce essential clauses. (See ¶1062c.)

While. **ESSENTIAL:** The union has decided not to strike *while negotiations are still going on*. (Here *while* means “during the time that.”)

NONESSENTIAL: The workers at the Apex Company have struck, *while those at the Powers Company are still at work*. (Here *while* means “whereas.”)

Who. **ESSENTIAL:** All students *who are members of the Backpackers Club* will be leaving for Maine on Friday.

NONESSENTIAL: John Behnke, *who is a member of the Backpackers Club*, will be leading a group on a weekend trip to Maine.

Whom. **ESSENTIAL:** This package is for the friend *whom I am visiting*.

NONESSENTIAL: This package is for my cousin Amy, *whom I am visiting*.

Whose. **ESSENTIAL:** The prize was awarded to the employee *whose suggestion yielded the greatest cost savings*.

NONESSENTIAL: The prize was awarded to Joyce Bruno, *whose suggestion yielded the greatest cost savings*.

With Clauses in Compound-Complex Sentences

133 A compound-complex sentence typically consists of two independent clauses (joined by *and*, *but*, *or*, or *nor*) and one or more dependent clauses. To punctuate a sentence of this kind, first place a separating comma before the conjunction that joins the two

Continued on page 28

¶134

main parts. Then consider each half of the sentence alone and provide additional punctuation as necessary.

The computer terminals were not delivered until June 12, five weeks after the promised delivery date, and *when I wrote to complain to your sales manager*, it took another three weeks simply for him to acknowledge my letter. (No comma precedes *when* because the *when* clause is considered an introductory expression, not an interrupting expression. See ¶127d.)

I forwarded our proposal to the Mergenthaler people last Friday, and if they agree to our terms, we can start work at once.

Jeff Adler, the CEO of Marshfield & Duxbury, is eager to discuss a joint venture with my boss, *who is off on a six-week trip to the Far East*, but the earliest date I see open for such a meeting is Wednesday, October 20.

NOTE: If a misreading is likely or a stronger break is desired, use a semicolon rather than a comma to separate the two main clauses. (See ¶177.)

- 134** a. When a sentence starts with a dependent clause that applies to both independent clauses that follow, do not use a comma to separate the independent clauses. (A comma would make the introductory dependent clause seem to apply only to the first independent clause.)

Before you start to look for venture capital, you need to prepare an analysis of the market *and* you must make a detailed set of financial projections. (The *before* clause applies equally to the two independent clauses that follow; hence no comma before *and*.)

BUT: Before you start to look for venture capital, you need to prepare an analysis of the market, *but* don't think that's all there is to it. (The *before* clause applies only to the first independent clause; hence a comma is used before *but*.)

NOTE: This guideline also applies to a sentence in which an introductory phrase refers to both independent clauses that follow. (See also ¶135d.)

To get the best results, follow the directions exactly as shown *and* do not use any parts not provided by the manufacturer. (The introductory infinitive phrase applies equally to the two independent clauses that follow; hence no comma before *and*.)

- b. When an introductory element is followed by two independent clauses that are rather long, omitting punctuation between the two clauses could reduce the clarity of the sentence. In that case, it might be better to insert a period or a semicolon after the first independent clause and introduce the second independent clause with an expression such as *then* or *moreover*.

To get the best results, follow the directions exactly as shown on pages 244–247 and in Appendix A and do not use any parts not provided by the manufacturer.

BETTER: To get the best results, follow the directions exactly as shown on pages 244–247 and in Appendix A. Moreover, do not use any parts not provided by the manufacturer.

With Participial, Infinitive, and Prepositional Phrases

135 Introductory Phrases

- a. Use a comma after an *introductory participial phrase*.

Seizing the opportunity, I presented an overview of our medium-range plans.

Established in 1905, our company takes great pride in its reputation for high-quality products.

Having checked the statements myself, I feel confident that they are accurate.

"Drawing on my fine command of language, I said nothing." (From Robert Benchley)

NOTE: Watch out for phrases that look like introductory participial phrases but actually serve as the subject of the sentence or part of the predicate. Do not put a comma after these elements.

Looking for examples of good acknowledgment letters in our files has taken me longer than I had hoped. (Gerund phrase as subject.)

BUT: *Looking for examples of good acknowledgment letters in our files*, I found four that you can use. (Participial phrase used as an introductory element; the subject is *I*.)

Following Mrs. Fahnstock's speech was a presentation by Ms. Paley. (The introductory phrase is part of the predicate; the subject is *a presentation by Ms. Paley*.)

BUT: *Following Mrs. Fahnstock's speech*, Ms. Paley made her presentation. (Participial phrase used as an introductory element; the subject is *Ms. Paley*.)

- b.** Use a comma after an *introductory infinitive phrase* unless the phrase is the subject of the sentence. (Infinitive phrases are introduced by *to*.)

To get the best results from your dishwasher, follow the printed directions. (The subject *you* is understood.)

To have displayed the goods more effectively, he should have consulted a lighting specialist. (The subject is *he*.)

BUT: *To have displayed the goods more effectively* would have required a lighting specialist. (Infinitive phrase used as subject.)

- c.** As a general rule, use a comma after all *introductory prepositional phrases*. A comma may be omitted after a short prepositional phrase if (1) the phrase does not contain a verb form, (2) the phrase is not a transitional expression or an independent comment, or (3) there is no sacrifice in clarity or desired emphasis. (Many writers use a comma after all introductory prepositional phrases to avoid analyzing each situation.)

In response to the many requests of our customers, we are opening a branch in Kenmore Square. (Comma required after a long phrase.)

In 2004 our entire inventory was destroyed by fire. (No comma required after a short phrase.)

BUT: *In 2004*, 384 cases of pneumonia were reported. (Comma required to separate two numbers. See ¶¶1456.)

In preparing your report, be sure to include last year's figures. (Comma required after a short phrase containing a verb form.)

In addition, a 6 percent city sales tax must be imposed. (Comma required after a short phrase used as a transitional expression. See ¶¶138a, 139.)

In my opinion, your ads are misleading as they now appear. (Comma required after a short phrase used as an independent comment. See ¶¶138b, 139.)

In legal documents, amounts of money are often expressed both in words and in figures. (Comma used to give special emphasis to the introductory phrase.)

CONFUSING: After all you have gone through a great deal.

CLEAR: *After all*, you have gone through a great deal. (Comma required after a short phrase to prevent misreading.)

The night before, I decided to move to Arizona. (Insert a comma after *before* to prevent a misreading.)

BUT: The night before I decided to move to Arizona, I talked with a friend who had been living there for two years.

¶136

I was working on the menu with the caterer. *At the same time*, Tony was making all the arrangements for the meeting hall. (In this case, *at the same time* is a transitional expression meaning “meanwhile” and should be followed by a comma.)

BUT: *At the same time* I was working on the menu with the caterer, Tony was making all the arrangements for the meeting hall. (Here *at the same time*—meaning “while” or “at the same time that”—is an essential part of a subordinate clause and not a transitional expression. For that reason this phrase should not be followed by a comma.)

In any case, we have to make the best of a bad situation.

BUT: *In any case* Paige argues in court, her mastery of the facts and the law is superb.

NOTE: Omit the comma after an introductory prepositional phrase if the word order in the rest of the sentence is inverted.

Out of an initial investment of \$5000 came a stake that is currently worth over \$2,500,000. (Normal word order: A stake that is currently worth over \$2,500,000 came out of an initial investment of \$50,000.)

In an article I read in Time was an account of his trip. (Omit the comma after the introductory phrase when the verb in the main clause immediately follows.)

BUT: *In an article I read in Time*, there was an account of his trip.

- d. When a compound sentence starts with a phrase that applies to both independent clauses, do not use a comma to separate the two clauses if doing so would make the introductory phrase seem to apply only to the first clause. (See also ¶134.)

In response to the many requests of our customers, we are opening a branch in Kenmore Square and we are extending our evening hours in all our stores.

136 Phrases at the Beginning of a Clause

- a. When a participial, infinitive, or prepositional phrase occurs *at the beginning of a clause within the sentence*, insert or omit the comma following, just as if the phrase were an introductory element at the beginning of the sentence. (See ¶135.)

I was invited to attend the monthly planning meeting last week, and *seizing the opportunity*, I presented an overview of our medium-range plans. (A separating comma follows the participial phrase just as if the sentence began with the word *Seizing*. No comma precedes the phrase because the phrase is considered introductory, not interrupting. See ¶127d.)

The salesclerk explained that *to get the best results from your dishwasher*, you should follow the printed directions.

We would like to announce that *in response to the many requests of our customers*, we are opening a branch in Kenmore Square.

Last year we had a number of thefts, and *in 2004* our entire inventory was destroyed by fire. (No comma is needed after a short introductory prepositional phrase.)

- b. If the phrase interrupts the flow of the sentence, set it off with two commas.

Pamela is the type of person who, *in the midst of disaster*, always finds something to laugh about.

If, *in the attempt to push matters to a resolution*, you offer that gang new terms, they will simply dig in their heels and refuse to bargain.

137 Phrases Elsewhere in the Sentence

When a participial, infinitive, or prepositional phrase occurs *at some point other than the beginning of a sentence* (see ¶135) or *the beginning of a clause* (see ¶136), commas are omitted or inserted depending on whether the phrase is essential or nonessential.

- a.** An *essential* participial, infinitive, or prepositional phrase is necessary to the meaning of the sentence and cannot be omitted. Do not use commas to set it off.

The catalog *scheduled for release in November* will have to be delayed until January. (Participial.)

The decision *to expand our export activities* has led to a significant increase in profits. (Infinitive.)

The search *for a new general manager* is still going on. (Prepositional.)

- b.** A *nonessential* participial, infinitive, or prepositional phrase provides additional information but is not needed to complete the meaning of the sentence. Set off such phrases with commas.

These essays, *written in the year before his death*, represent his best work. (Participial.)

I'd rather not attend her reception, *to be frank about it*. (Infinitive.)

Morale appears to be much better, *on the whole*. (Prepositional.)

- c.** A phrase occurring within a sentence must always be set off by commas when it *interrupts* the flow of the sentence.

The commission, *after hearing arguments on the proposed new tax rate structure*, will consider amendments to the tax law.

The company, *in its attempt to place more women in high-level management positions*, is undertaking a special recruitment program.

The following rules (¶¶138–161) deal with the various uses of commas to set off nonessential expressions. See also ¶¶201–202, 206, and 218–219 for the use of dashes and parentheses to set off these expressions.

With Transitional Expressions and Independent Comments

- 138** **a.** Use commas to set off *transitional expressions*. These nonessential words and phrases are called *transitional* because they help the reader mentally relate the preceding thought to the idea now being introduced. They express such notions as:

ADDITION: additionally (see page 359), also, besides, furthermore, in addition, moreover, too (see ¶143), what is more

CONSEQUENCE: accordingly, as a result, consequently, hence (see ¶139b), otherwise, so (see ¶¶139b, 179), then (see ¶139b), therefore, thus (see ¶139b)

SUMMARIZING: after all, all in all, all things considered, briefly, by and large, in any case, in any event, in brief, in conclusion, in short, in summary, in the final analysis, in the long run, on balance, on the whole, to sum up

GENERALIZING: as a rule, as usual, for the most part, generally, generally speaking, in general, ordinarily, usually

RESTATEMENT: in essence, in other words, namely, that is, that is to say

CONTRAST AND COMPARISON: by contrast, by the same token, conversely, instead, likewise, on one hand, on the contrary, on the other hand, rather, similarly, yet (see ¶¶139b, 179)

¶138

CONCESSION:	anyway, at any rate, be that as it may, even so, however, in any case, in any event, nevertheless, still, this fact notwithstanding
SEQUENCE:	afterward, at first, at the same time, finally, first, first of all, for now, for the time being, in conclusion, in the first place, in time, in turn, later on, meanwhile, next, respectively, second, then (see ¶139b), to begin with
DIVERSION:	by the by, by the way, incidentally
ILLUSTRATION:	for example, for instance, for one thing

NOTE: The coordinating conjunctions *and*, *but*, *or*, and *nor* are sometimes used as transitional expressions at the beginning of a sentence. When this occurs, do not insert a comma directly after the coordinating conjunction unless a parenthetical element begins at that point.

As I listened to Povitch's plan to reorganize the company, I realized that it would lead to disaster.
And that's what I told him.

At the end of a dinner party, Groucho Marx said to his host, "I've had a perfectly wonderful evening. *But* this wasn't it." (For additional examples, see ¶126b, note.)

► *For the punctuation of transitional expressions depending on where they occur in a sentence, see ¶¶139–142.*

- b. Use commas to set off *independent comments*, nonessential words or phrases that express the writer's attitude toward the meaning of the sentence. By means of these independent comments, writers indicate that what they are about to say carries their wholehearted endorsement (*indeed, by all means*) or deserves only their luke-warm support (*apparently, presumably*) or hardly requires saying (*as you already know, clearly, obviously*) or represents only their personal views (*in my opinion, personally*) or arouses some emotion in them (*unfortunately, happily*) or presents their honest position (*frankly, actually, to tell the truth*). Such terms modify the meaning of the sentence as a whole rather than a particular word within the sentence.

AFFIRMATION:	by all means, indeed, of course, yes
DENIAL:	no
REGRET:	alas, unfortunately, regrettably
PLEASURE:	fortunately, happily
QUALIFICATION:	ideally, if necessary, if possible, literally, strictly speaking, theoretically, hopefully (see pages 382–383)
PERSONAL VIEWPOINT:	according to her, as I see it, in my opinion, personally
ASSERTION OF CANDOR:	actually, frankly, in reality, to be honest, to say the least, to tell the truth
ASSERTION OF FACT:	as a matter of fact, as it happens, as you know, believe it or not, certainly, clearly, doubtless, in fact, naturally, needless to say, obviously, without doubt
WEAK ASSERTION:	apparently, perhaps, presumably, well

► *For the punctuation of independent comments depending on where they occur in a sentence, see ¶¶139–142.*

139 At the Beginning of a Sentence

- a. When the words and phrases listed in ¶138a–b appear at the beginning of a sentence, they should be followed by a comma unless they are used as essential elements.

NONESSENTIAL: *After all*, you have done more for him than he had any right to expect.

ESSENTIAL: *After all* you have done for him, he has no right to expect more.

NONESSENTIAL: *However*, you look at the letter yourself to see whether you interpret it as I do.

ESSENTIAL: *However* you look at the letter, there is only one interpretation.

NONESSENTIAL: *Obviously*, the guest of honor was quite moved by the welcome she received. (Here *obviously* modifies the meaning of the sentence as a whole.)

ESSENTIAL: *Obviously* moved by the welcome she received, the guest of honor spoke with an emotion-choked voice. (Here *obviously* modifies *moved*.)

- b. When *hence*, *then*, *thus*, *so*, or *yet* occurs at the beginning of a sentence, the comma following is omitted unless the connective requires special emphasis or a non-essential element occurs at that point.

Thus they thought it wise to get an outside consultant's opinion.

Then they decided to go back to their original plan.

BUT: *Then*, after they rejected the consultant's recommendation, they decided to go back to their original plan.

The early-retirement package offered by the company over the long run was extremely generous. So many older employees accepted the offer that the company discovered it had greatly underestimated how much this program would cost. (Without a comma after *so*, a reader is likely to grasp *so* as part of the phrase *so many*. In this case, *so* functions as an intensifier enhancing the meaning of *many*.)

BUT: The early-retirement package offered by the company over the long run was extremely generous. So, many older employees who would otherwise have worked until 65 were happy to take advantage of the offer. (The comma after *so* makes it clear that in this context *so* has the meaning of "therefore.")

► See also ¶142a, note.

- c. When an introductory transitional expression or independent comment is incorporated into the flow of the sentence without any intervening pause, the comma may be omitted.

Of course I can handle it.

Perhaps she was joking.

No doubt he meant well.

Did I agree with him? *Of course* not.

Indeed she was not.

Yes I can.

140 At the End of a Sentence

Use one comma to set off a transitional expression or an independent comment at the end of a sentence. However, be sure to distinguish between nonessential and essential elements.

NONESSENTIAL: Philip goes to every employee reception, *of course*.

ESSENTIAL: Philip goes to every employee reception as a matter of *course*.

NONESSENTIAL: The deal is going to fall through, *in my opinion*.

ESSENTIAL: She doesn't rank very high *in my opinion*.

¶141**141 Within the Sentence**

Use two commas to set off a transitional expression or an independent comment when it occurs as a nonessential element within the sentence.

I, too, was not expecting a six-month convalescence.

The doctors tell me, however, that I will regain full use of my left leg.

If, however, the expression is used as an essential element, leave the commas out.

NONESSENTIAL: Let me say, *to begin with*, that I think very highly of him.

ESSENTIAL: If you want to improve your English, you ought *to begin with* a good review of grammar.

NOTE: In many sentences the only way you can tell whether an expression is nonessential or essential is by the way you say it. If your voice tends to *drop* as you utter the expression, it is nonessential and should be set off by commas.

We concluded, *nevertheless*, that their offer was not serious.

Millie understands, *certainly*, that the reassignment is only temporary.

It is critical, *therefore*, that we rework all these cost estimates.

If your voice tends to *rise* as you utter the expression, it is essential and should not be set off by commas.

We *nevertheless* concluded that their offer was not serious.

Millie *certainly* understands that the reassignment is only temporary.

It is *therefore* critical that we rework all these cost estimates.

If commas are inserted in the previous example, the entire reading of the sentence will be changed. The voice will rise on the word *is* and drop on *therefore*. (If this is the way you want the sentence to be read, then commas around *therefore* are correct.)

It is, *therefore*, critical that we rework all these cost estimates.

142 At the Beginning of a Clause

- a. When a transitional expression or independent comment occurs *at the beginning of the second independent clause* in a compound sentence and is *preceded by a semicolon*, use one comma following the expression.

I would love to work in a side trip to Vail; *however*, I don't think I can pull it off.

My boss just approved the purchase; *therefore*, let's confirm a delivery date.

In sentences like the two above, a period may be used in place of a semicolon. The words *however* and *therefore* would then be capitalized to mark the start of a new sentence, and they would be followed by a comma.

NOTE: When *hence*, *then*, *thus*, *so*, or *yet* appears at the beginning of an independent clause, the comma following is omitted unless the connective requires special emphasis or a nonessential element occurs at that point. (See also ¶139b.)

Melt the butter over high heat; *then* add the egg.

BUT: Melt the butter over high heat; *then*, when the foam begins to subside, add the egg.

► For the use of a semicolon before a transitional expression, see ¶¶178–180.

- b.** When the expression or comment occurs *at the beginning of the second independent clause* in a compound sentence and is *preceded by a comma and a coordinating conjunction*, use one comma following the expression. (See also ¶127d.)

The location of the plant was not easy to reach, and *to be honest about it*, I wasn't very taken with the people who interviewed me.

The job seemed to have no future, and *to tell the truth*, the salary was pretty low.

In the first place, I think the budget for the project is unrealistic, and *in the second place*, the deadlines are almost impossible to meet.

NOTE: If the expression or comment is a simple adverb like *therefore*, the comma following the expression is usually omitted. (See also ¶180.)

The matter must be resolved by Friday, and *therefore* our preliminary conference must be held no later than Thursday.

All the general managers have been summoned to a three-day meeting at the home office, and *consequently* I have had to reschedule all my meetings.

- c.** If the expression or comment occurs *at the beginning of a dependent clause*, either treat the expression as nonessential (and set it off with two commas) or treat it as essential (and omit the commas).

If, *moreover*, they do not meet the deadline, we have the right to cancel the contract.

If *indeed* they want to settle the dispute, why don't we suggest that they submit to arbitration?

He is a man who, *in my opinion*, will make a fine marketing director.

She is a woman who *no doubt* knows how to run a department smoothly and effectively.

The situation is so serious that, *strictly speaking*, bankruptcy is the only solution.

The situation is so serious that *perhaps* bankruptcy may be the only solution.

143 With the Adverb *Too*

- a.** When the adverb *too* (in the sense of “also”) occurs at the end of a clause or a sentence, the comma preceding is omitted.

If you feel that way *too*, why don't we just drop all further negotiation?

They are after a bigger share of the market *too*.

- b.** When *too* (in the sense of “also”) occurs elsewhere in the sentence, particularly between subject and verb, set it off with two commas.

You, *too*, could be in the Caribbean right now.

Then, *too*, there are the additional taxes to be considered.

- c.** When *too* is used as an adverb meaning “excessively,” it is never set off with commas.

The news is almost *too* good to be believed.

With Interruptions and Afterthoughts

- 144 a.** Use commas to set off words, phrases, or clauses that interrupt the flow of a sentence or that are loosely added at the end as an afterthought.

Pam is being pursued, *so I've been told*, by three headhunters.

Bob spoke on state-of-the-art financial software, *if I remember correctly*.

¶145

Our order processing service, *you must admit*, leaves much to be desired.
 His research work has been outstanding, *particularly in the field of ergonomics*.

► See also ¶¶131c, 136b, 137c.

- b.** When enclosing an interrupting expression with two commas, be sure the commas are inserted accurately.

WRONG: That is the best, *though not the cheapest way*, to proceed.

RIGHT: That is the best, though not the cheapest, way to proceed.

WRONG: This book is better written, *though less exciting than*, her last book.

RIGHT: This book is better written, though less exciting, than her last book.

WRONG: Glen has a deep interest in, *as well as a great fondness*, for jazz.

RIGHT: Glen has a deep interest in, as well as a great fondness for, jazz.

WRONG: Her work is as good, *if not better than*, that of the man she replaced.

RIGHT: Her work is as good as, if not better than, that of the man she replaced. (Note that the second as is needed to preserve the meaning of the basic sentence.)

- c.** In a compound sentence consisting of two independent clauses joined by a conjunction such as *and*, an interrupting expression may occur at the beginning of the second clause. In this case, set off the interrupting expression with two commas and, to avoid excessive punctuation, omit the comma that would normally precede the conjunction.

I had to sort everything by hand and, believe me, it wasn't easy!

(RATHER THAN: I had to sort everything by hand, and, believe me, it wasn't easy!)

BUT: I had to sort everything by hand, and if Beth had not stayed to help me, I would still be working on this job. (If the element that follows *and* is a dependent clause rather than an interrupting expression, insert the comma before the conjunction and not after it. For other examples of the punctuation of a compound-complex sentence, see ¶133.)

NOTE: When a coordinating conjunction and a transitional expression both occur at the start of the second clause, do not treat the transitional expression as an interrupting expression. Use a comma before the conjunction, and do not insert a comma after the transitional expression. (See also ¶¶142b, 180.)

You can set your own working hours, and *furthermore* you may be able to do most of the job at home.

With Direct Address

145 Names and titles used in direct address must be set off by commas.

No, *sir*; that is privileged information. I count on your support, *Bob*.

We agree, *Mrs. Connolly*, that your order was badly handled.

With Additional Considerations

146 **a.** When a phrase introduced by *as well as*, *in addition to*, *besides*, *along with*, *including*, *accompanied by*, *together with*, *plus*, or a similar expression falls between the subject and the verb, it is ordinarily set off by commas. Commas may be omitted, however, if the phrase fits smoothly into the flow of the sentence or is essential to the meaning.

Everyone, *including the top corporate managers*, will be required to attend the in-house seminars on the ethical dimensions of business.

The business plan *including strategies for the new market segments we hope to enter* is better than the other plans I have reviewed. (The *including* phrase is needed to distinguish this plan from the others; hence no commas.)

One *plus one* doesn't always equal two, as we have seen in the Parker-Jackel merger. (The *plus* phrase is essential to the meaning; hence no commas.)

Jo *as well as* Nina should be invited to participate. (The *as well as* phrase fits smoothly in this sentence.)

► For the effect these phrases have on the choice of a singular or a plural verb, see ¶1007.

- b.** When the phrase occurs elsewhere in the sentence, commas may be omitted if the phrase is closely related to the preceding words.

The refinancing terms have been approved by the trustees *as well as the creditors*.

BUT: I attended the international monetary conference in Bermuda, *together with* five associates *from our Washington office*.

With Contrasting Expressions

- 147** Use commas to set off contrasting expressions. (Such expressions often begin with *but*, *not*, or *rather than*.)

The Sanchezes are willing to sell, *but only on their terms*.

He had changed his methods, *not his objectives*, we noticed.

Paula, *rather than Al*, has been chosen for the job.

NOTE: When such phrases fit smoothly into the flow of the sentence, no commas are required.

It was a busy *but enjoyable* trip.

They have chosen Paula *rather than Al*.

The unit managers *and not the CEO* have to make those decisions. (See ¶1006b.)

► For the punctuation of balancing expressions, see ¶172d.

The following rules (¶¶148–153) deal with descriptive expressions that immediately follow the words to which they refer. When nonessential, these expressions are set off by commas.

With Identifying, Appositive, or Explanatory Expressions

- 148** a. Use commas to set off expressions that provide additional but *nonessential* information about a noun or pronoun immediately preceding. Such expressions serve to further identify or explain the word they refer to.

Harriet McManus, *an independent real estate broker for the past ten years*, will be joining our agency on Tuesday, October 1. (Phrases such as those following *Harriet McManus* and *Tuesday* are appositives.)

His first book, *written while he was still in graduate school*, launched a successful writing career.

Our first thought, *to run to the nearest exit*, would have resulted in panic.

Ms. Ballantine, *who has been a copywriter for six years*, will be our new copy chief.

Timothy Serling, *our new CEO (and the second member of his family to serve in that capacity)*, will assume his new position on July 1. (Note that the comma that normally follows the appositive expression should be inserted after the parenthetical element that accompanies the appositive expression.)

Everyone in our family likes outdoor sports, *such as tennis and swimming*. (See ¶149, note.)

Continued on page 38

149

When using a term that may not be familiar to your readers, follow the term with an explanation or a definition set off by commas.

Acrophobia, that is, the fear of great heights, can now be successfully treated. (See also ¶¶181–183 for other punctuation with *that is*, *namely*, and *for example*.)

However, if some of your readers are sure to know the term and are likely to be offended by having the meaning spelled out for them, you can reverse the sequence: put the definition first and then follow it with the specific term set off by commas.

The fear of great heights, *known as acrophobia*, can now be successfully treated.

- b.** In some cases other punctuation or different wording may be preferable to avoid confusion.

There are two factors to be considered, *sales and collections*. (A colon or a dash could be used in place of the comma. See ¶¶189, 201.)

BUT: There are three factors to be considered: sales, collections, and inventories. (When the explanatory expression consists of a series of *three* or more items and comes at the end of the sentence, use a colon or dash. See ¶¶189, 201.)

OR: These three factors—sales, collections, and inventories—should be considered. (When the explanatory series comes within the sentence, set it off with dashes or parentheses. See ¶¶183, 202, 219b.)

CONFUSING: Mr. Newcombe, *my boss*, and I will discuss this problem next week. (Does *my boss* refer to Mr. Newcombe, or are there three people involved?)

CLEAR: Mr. Newcombe (*my boss*) and I will be discussing this problem next week. (Use parentheses or dashes instead of commas when an appositive expression could be misread as a separate item in a series.)

CONFUSING: I could not have achieved this goal without the help I received from my partner, Julie Duff, and Anne Noonan. (As punctuated, the sentence is ambiguous. Is Julie Duff the writer's partner, or is she someone else?)

CLEAR: I could not have achieved this goal without the help I received from my partner—Julie Duff—and Anne Noonan.

CLEAR: I could not have achieved this goal without the help I received from Anne Noonan and my partner, Julie Duff.

- 149** When the expression is *essential* to the completeness of the sentence, do not set it off. (In the following examples the expression is needed to identify which particular item is meant. If the expression were omitted, the sentence would be incomplete.)

The year *2007* marks the one hundredth anniversary of our company.

The word *liaison* is often misspelled.

The novelist *Anne Tyler* gave a reading last week from a work in progress.

The statement "*I don't remember*" was frequently heard in court yesterday.

The impulse *to get away from it all* is very common.

The notes *in green ink* were made by Mrs. Long.

The person *who takes over as general manager* will need everyone's support.

Does the name *Pavlov* ring a bell?

NOTE: Compare the following sets of examples:

Her article "*Color and Design*" was published in June. (The title is essential; it identifies *which* article.)

Her latest article, "*Color and Design*," was published in June. (Nonessential; the word *latest* already indicates which article.)

Her latest article *on color and design* was published in June. (Without commas, this means she had earlier articles on the same subject.)

Her latest article, *on color and design*, was published in June. (With commas, this means her earlier articles were on other subjects.)

Everyone in our family likes such outdoor sports as *tennis and swimming*. (The phrase *as tennis and swimming* is essential; without it, the reader would not know which outdoor sports were meant.)

Everyone in our family likes outdoor sports, *such as tennis and swimming*. (The main clause, *Everyone in our family likes outdoor sports*, expresses a complete thought; the phrase *such as tennis and swimming* gives additional but nonessential information. Hence a comma is needed before *such as*.)

Words *such as peak, peek, and pique* can be readily confused. (The *such as* phrase is essential; it indicates which words are meant.)

A number of Fortune 500 companies, *such as GE, TRW, and DuPont*, have introduced new programs to motivate their middle managers. (The *such as* phrase provides additional but nonessential information.)

The candy bar *Baby Ruth* was named after President Cleveland's baby daughter, *Ruth*. (The reference to *Baby Ruth* is essential; the reference to *Ruth* is considered nonessential because this person has already been identified as the President's baby daughter.)

150 A number of expressions are treated as essential simply because of a very close relationship with the preceding words. (If read aloud, the combined phrase sounds like one unit, without any intervening pause.)

After a while Gladys *herself* became disenchanted with the Washington scene.

We *legislators* must provide funds for retraining displaced workers.

My wife Eve has begun her own consulting business. (Strictly speaking, *Eve* should be set off by commas, since the name is not needed to indicate *which* wife. However, commas are omitted in expressions like these because they are read as a unit.)

BUT: Eve, *my wife*, has begun her own consulting business. (When the word order is changed, the phrase *Eve, my wife* is no longer read as a unit. Hence commas are needed to set off *my wife*.)

My brother Paul may join us as well.

BUT: My brother, *Paul Engstrom*, may join us as well.

The composer *Stephen Sondheim* has many Broadway hits to his credit.

BUT: My favorite composer, *Stephen Sondheim*, has many Broadway hits to his credit.

If you want some solid advice, *101 Ways to Power Up Your Job Search* by J. Thomas Buck, William R. Matthews, and Robert N. Leech could be just the book for you. (Unless there is another book with the same title, the *by* phrase identifying the authors is not essential and, strictly speaking, should be set off by commas. However, since a book title and a *by* phrase are typically read as a unit, commas are usually omitted.)

151 When *or* introduces a word or a phrase that identifies or explains the preceding word, set off the explanatory expression with commas.

Determine whether the clauses are coordinate, *or of equal rank*. (The nonessential *or* phrase may also be set off by parentheses.)

If *or* introduces an alternative thought, the expression is essential and should not be set off by commas.

Determine whether the clauses are coordinate or *noncoordinate*.

¶152

152 When a business letter or some other document is referred to by date, any related phrases or clauses that follow are usually nonessential.

Thank you for your letter of February 27, *in which you questioned the balance on your account.* (The date is sufficient to identify which letter is meant; the *in which* clause simply provides additional but nonessential information. Of course, if one received more than one letter with the same date from the same person, the *in which* clause would be essential and the comma would be omitted.)

No comma is needed after the date if the following phrase is short and closely related.

Thank you for your letter of February 27 *about the balance on your account.*

NOTE: Under certain circumstances—for example, around the end of the year—it is better to provide the full date rather than the month and day alone.

Thank you for your letter of *December 27, 2010*, in which . . .

► *For a full discussion of this topic, see ¶409.*

With Residence and Business Connections

153 Use commas to set off a *long phrase* that denotes a person's residence or business connections.

Gary Kendall, *of the Van Houten Corporation in Provo, Utah*, will be visiting us next week.

Gary Kendall *of Provo, Utah*, will be visiting us next week. (Omit the comma before *of* to avoid too many breaks in a short phrase. The state name must always be set off by commas when it follows a city name. See also ¶160.)

Gary Kendall *of the Van Houten Corporation* will be visiting us next week. (Short phrase; no commas.)

Gary Kendall *of Provo* will be visiting us next week. (Short phrase; no commas.)

The following rules (¶¶154–161) deal with the “nonessential” treatment of certain elements in dates, personal names, company names, and addresses. These elements cannot truly be called nonessential, but the traditional style is to set them off with commas.

In Dates

154 a. When a date is expressed in a month-day-year sequence, always insert a comma to separate the day and the year. Insert a comma after the year unless a stronger mark of punctuation (such as a period or a semicolon) is required at that point.

On October 31, 2011, I plan to retire and open a bookshop in Maine.

BUT: I plan to open a bookshop in Maine when I retire on October 31, 2011.

The March 15, 2010, issue of *BusinessWeek* is going to do a cover story on our CEO.

The correspondence between July 1, 2008, and March 31, 2009, should shed light on the understanding reached by Schumer and Fallon.

NOTE: It could be logically argued that the comma following the year should be omitted, because using two commas to set off the year gives parenthetical treatment to an element that is not parenthetical. Nevertheless, the use of two commas in this case is a firmly entrenched convention of style and is not likely to change.

- b.** When the month, day, and year are used as a nonessential expression, be sure to set the entire phrase off with commas unless a stronger mark of punctuation is needed in place of the second comma.

The conference scheduled to begin on Monday, *November 25, 2009*, has now been rescheduled to start on *February 8, 2010*.

Payment of estimated income taxes for the third quarter this year will be due no later than Wednesday, *September 15, 2010*.

- 155** **a.** Omit the commas when only the month and year are given.

In *August 2008* Glen and I dissolved our partnership and went our independent ways.

Isn't it about time for *Consumer Reports* to update the evaluation of cell phones that appeared in the *January 2007* issue?

- b.** When the date is expressed in a day-month-year sequence (*3 September 2010*, for example), do not use commas to set off the year unless the sentence requires a comma or some other mark of punctuation after the year.

► *For additional examples involving dates, see ¶410.*

With Jr., Sr., Etc.

- 156** Do not use commas to set off *Jr.*, *Sr.*, or roman or arabic numerals following a person's name unless you know that the person in question prefers to do so.

Kelsey R. Patterson Jr. Benjamin Hart 2d

Christopher M. Gorman Sr. Anthony Jung III

John Bond Jr.'s resignation will be announced tomorrow.

NOTE: When a person prefers to use commas in his name, observe the following style:

Peter Passaro, Jr. (Use one comma when the name is displayed on a line by itself.)

Peter Passaro, Jr., director of . . . (Use two commas when other copy follows.)

Peter Passaro, Jr.'s promotion . . . (Drop the second comma when a possessive ending is attached.)

. . . has been awarded to Peter Passaro, Jr. (Drop the second comma at the end of a sentence.)

Peter Passaro, Jr. (our director of marketing) . . . (Drop the second comma after *Jr.* when a stronger mark of punctuation—such as an opening parenthesis, a semicolon, or a dash—occurs at that point.)

- 157** Abbreviations like *Esq.* and those that stand for academic degrees or religious orders are set off by two commas when they follow a person's name.

Address the letter to Helen E. Parsekian, *Esq.*, in New York.

Roger Farrier, *LL.D.*, will address the Elizabethan Club on Wednesday.

The Reverend James Hanley, *S.J.*, will serve as moderator of the panel.

Ruth Menendez, *M.D.*, *F.A.C.S.*, will be joining the Miles Medical Group on September 1. (See ¶519 for the use of periods in these abbreviations.)

- 158** When a personal name is given in inverted order, set off the inverted portion with commas.

McCaughan, James W., Jr.

¶159**With *Inc.* and *Ltd.***

159 Do not use commas to set off *Inc.*, *Ltd.*, and similar terms in an organization's name unless you know that a particular organization prefers to do so. (See ¶¶1326b, 1326d.)

Time Inc. Field Hats, Ltd.

Time *Inc.* has expanded its operations beyond magazine publishing.

Field Hats, *Ltd.*, should be notified about this mistake.

NOTE: When commas are to be used in an organization's name, follow this style:

Alwyn & Hyde, Inc. (Use one comma when the name is displayed on a line by itself.)

Alwyn & Hyde, Inc., announces the publication of . . . (Use two commas when other copy follows.)

Alwyn & Hyde, Inc.'s annual statement . . . (Drop the second comma when a possessive ending is attached.)

. . . will be released next week by Alwyn & Hyde, Inc. (Drop the second comma at the end of a sentence.)

Alwyn & Hyde, Inc. (founded in 1986) will be . . . (Drop the second comma after *Inc.* when a stronger mark of punctuation—such as an opening parenthesis, a semicolon, or a dash—occurs at that point.)

► For the use of commas with other parts of an organization's name, see ¶163.

In Geographic References and Addresses

160 a. Use two commas to set off the name of a state, a country, or the equivalent when it directly follows the name of a city or a county.

Four years ago I was transferred from Bartlesville, *Oklahoma*, to Bern, *Switzerland*.

The MIT Press is located in Cambridge, *Massachusetts*, not Cambridge, *England*.

Could Pickaway County, *Ohio*, become a haven for retired editors?

Our Pierre, *South Dakota*, office is the one nearest to you.

OR: Our Pierre (*South Dakota*) office is the one nearest to you. (Parentheses are clearer than commas when a city-state expression serves as an adjective.)

Washington, *D.C.*'s transportation system has improved greatly since I was last there. (Omit the second comma after a possessive ending.)

NOTE: It could be logically argued that the comma following the state or country should be omitted, because using two commas to set off this name gives parenthetical treatment to an element that is not parenthetical. Nevertheless, the use of two commas is a firmly entrenched convention of style and is not likely to change.

b. In sentences that mention one or more cities, omit the state or country names if the cities are well known and each city is clearly linked with only one state or country.

We'll be holding meetings in Atlanta, Baltimore, and Chicago.

My agent has arranged for me to address groups of business executives in Oslo, Stockholm, and Copenhagen later this year.

We are planning to open branch operations in Mumbai and Kolkata (previously known as Bombay and Calcutta).

161 When expressing complete addresses, follow this style:

IN SENTENCES: During the month of September you can send all documents directly to me at 402 Woodbury Road, Pasadena, CA 91104, or you can ask my assistant to forward them. (Note that a comma does not precede the ZIP Code but follows it in this sentence to indicate the end of the first independent clause.)

IN DISPLAYED BLOCKS: 402 Woodbury Road
Pasadena, CA 91104

The following rules (¶¶162–175) deal with various uses of separating commas: to separate items in a series, to separate adjectives that precede a noun, and to clarify meaning in sentences with unusual word order or omitted words.

In a Series

- 162 a.** When three or more items are listed in a series and the last item is preceded by *and*, *or*, or *nor*, place a comma before the conjunction as well as between the other items. This comma is often referred to as a *serial comma*. (See also ¶126c.)

Study the rules for the use of the comma, the semicolon, *and* the colon.

The consensus is that your report is well written, that your facts are accurate, *and* that your conclusions are sound.

The show will appeal equally to women and men, adults and children, *and* sophisticates and innocents. (See page 363 for a usage note on *and*.)

Only this software lets you fax, transfer files, exchange e-mail, access the Internet, *and* manage phone calls—all from one window on your computer.

Here's what the comedian Joe E. Lewis had to say about trying to lose weight: "I went on a diet, I swore off drinking and heavy eating, and in fourteen days I had lost exactly two weeks."

An alternative style—often used by newspapers and magazines—omits the comma before *and*, *or*, or *nor* in a series, but this practice can sometimes lead to confusion.

The job involves restocking shelves, cleaning and serving customers. (Without a comma before *and*, the sentence suggests that the person doing this job will be responsible for cleaning the customers in addition to serving them.)

CONFUSING: The financial services, human resources, sales and advertising departments will be located in a building now under construction. (Are *sales* and *advertising* two separate departments or one?)

CLEAR: The financial services, human resources, sales, and advertising departments will be located in a building now under construction. (The insertion of a comma after *sales* makes it clear that *sales* and *advertising* are two separate departments.)

CLEAR: The financial services, human resources, *and* sales and advertising departments will be located in a building now under construction. (When the final element in a series consists of two words joined by *and*, insert a comma and *and* before the final element so that it will be grasped as a unit. This version makes it clear that *sales* and *advertising* represent only one department.)

CONFUSING: I suggested that we invite Hope, Frank and Peggy and Eva and Charlie tended to agree.

CLEAR: I suggested that we invite Hope, Frank, and Peggy, and Eva and Charlie tended to agree. (It would be even clearer to delete *and* after Peggy and replace the comma with a semicolon or a period.)

¶163

Although some writers elect to use a serial comma only when necessary to avoid confusion, it makes more sense to use a serial comma under all circumstances so as to maintain a consistent style. In any case, the customary practice in business is to retain the comma before the conjunction.

- b.** Sometimes, what appears to be an item in a series is actually a modifying expression that refers to the preceding element. Consider this confusing sentence:

Please set up a meeting immediately with Blake Mancuso, the contractor, the plumber, and the electrician.

If Blake Mancuso is the name of the contractor, confusion can be avoided by using different punctuation.

Please set up a meeting immediately with the contractor (Blake Mancuso), the plumber, and the electrician.

However, if Blake Mancuso is one of four people to be invited to the meeting, confusion can only be avoided by changing the wording. For example:

Please set up a meeting immediately with Blake Mancuso as well as the contractor, the plumber, and the electrician.

OR: Please set up a meeting immediately with the following four people: Blake Mancuso, the contractor, the plumber, and the electrician.

► *See also ¶148b.*

- c.** If a nonessential element follows the conjunction (*and*, *or*, or *nor*) in a series, omit the comma before the conjunction to avoid excessive punctuation.

We invited Ben's business associates, his friends and, of course, his parents.

(**RATHER THAN:** . . . his friends, and, of course, his parents.)

These tests should adequately assess the availability, integrity and, above all, the confidentiality of the institution's data and systems.

OR: These tests should adequately assess the availability, integrity, and—above all—the confidentiality of the institution's data and systems.

(**BUT NOT:** These tests should adequately assess the availability, integrity, and, above all, the confidentiality of the institution's data and systems.)

- d.** A range of items connected by *from* and *to* does not constitute a series and should not be separated by commas.

Everything about the property—from its mountaintop setting to its location alongside a well-stocked trout stream to its stunning views of the ocean—suggests that we ought to make an offer on it before someone else buys it.

163 For a series in an organization's name, always follow the style preferred by that organization.

Skadden, Arps, Slate, Meagher & Flom

Skidmore, Owens & Merrill

Friedman Billings Ramsey

Kohn Pedersen Fox

Fox-Pitt Kelton Cochran Caronia Waller

If you do not have access to the organization's letterhead or Web site, follow the standard rule on commas in a series (see ¶162).

Our primary supplier is *Ames, Koslow, Milke, and Company*.

NOTE: Do not use a comma before an ampersand (&) in an organization's name unless you know that a particular organization prefers to do so.

Aspinwall, Bromley, Carruthers & Dalgleish

164 When an expression such as *and so on* or *etc.* closes a series, use a comma before the expression. Also use a comma after the expression unless another mark of punctuation—such as a period, a semicolon, or a closing parenthesis—is required at that point.

Our sale of suits, coats, hats, *and so on*, starts tomorrow.

Tomorrow morning we will start our sale of suits, coats, hats, *etc.*

► *For a usage note on etc., see page 376.*

165 Do not insert a comma after the last item in a series unless the sentence structure demands a comma at that point.

May 7, June 11, and July 16 are the dates for the next three hearings.

May 7, June 11, and July 16, 2010, are the dates for the next three hearings. (The comma after 2010 is one of the pair that sets off the year. See ¶154.)

166 When *and*, *or*, or *nor* is used to connect all the items in a series, do not separate the items by commas. (See also ¶123b.)

Send copies to our employees *and* stockholders *and* major customers.

Neither my brother *nor* his wife *nor* his two sons can explain how my van got dented last night.

167 If a series consists of only two items, do not separate the items with a comma. (See also ¶125f.)

We can send the samples to you *by regular mail* or *by one of the express services*.

NOTE: Use a comma, however, to separate two independent clauses joined by *and*, *but*, *or*, or *nor*. (See ¶126a.)

► *For the use of semicolons in a series, see ¶¶184–185.*

With Adjectives

168 a. When two consecutive adjectives modify the same noun, separate the adjectives with a comma.

Jean is a *generous, outgoing* person. (A person who is *generous and outgoing*.)

This document is filled with *weak, even ludicrous* arguments. (Arguments that are weak and even ludicrous.)

b. Do *not* use a comma between the adjectives if they are connected by *and*, *or*, or *nor*.
Jean is a *generous and outgoing* person.

c. Sometimes two words that seem to be consecutive adjectives are really an adverb plus an adjective. Do not insert a comma in this case.

We have found a *pretty, out-of-the-way* town where we plan to retire. (Two adjectives.)

That's a *pretty out-of-the-way* place to build your East Coast distribution center. (Here *pretty* is used as an adverb meaning "very.")

¶169

169 When two adjectives precede a noun, the first adjective may modify the combined idea of the second adjective plus the noun. In such cases do not separate the adjectives by a comma.

The estate is surrounded by an *old stone* wall. (A *stone* wall that is *old*.)

Here is the *annual financial* statement. (A *financial* statement that is *annual*.)

TEST: To decide whether consecutive adjectives should be separated by a comma or not, try using them in a relative clause *after* the noun, with *and* inserted between them. If they read smoothly and sensibly in that position, they should be separated by a comma in their actual position.

We need an *intelligent, enterprising* person for the job. (One can speak of “a person who is *intelligent* and *enterprising*,” so a comma is correct.)

Throw out your *old down* coat. (One cannot speak of “a coat that is *old* and *down*,” so no comma should be used in the sentence.)

You can purchase any of these printers with a *low down* payment. (In this case the adjective *low* modifies a compound noun, *down payment*.)

To put it gently but plainly, I think Jason is a *low-down* scoundrel. (In this case *low-down* is a compound adjective and requires a hyphen to connect *low* and *down*. See ¶¶1813–832 for a discussion of compound adjectives.)

170 When more than two adjectives precede a noun, insert a comma only between those adjectives where *and* could have been used.

a relaxed, unruffled, confident manner (a relaxed *and* unruffled *and* confident manner)

an experienced, efficient legal assistant (an experienced *and* efficient legal assistant)

the established American political system (*and* cannot be inserted between these adjectives)

171 Do not use a comma between the final adjective in a series and the following noun.

On Monday I put in a long, hard, *demanding day*. (**NOT:** a long, hard, *demanding, day*.)

To Indicate Omitted Words

172 a. Omission of Repetitive Wording. Use a comma to indicate the omission of repetitive wording in a compound sentence. (This use of the comma usually occurs when clauses are separated by semicolons.)

According to Oscar Wilde, “Some cause happiness wherever they go; others, whenever they go.”

Woodrow Wilson wrote, “If I am to speak for ten minutes, I need a week for preparation; if fifteen minutes, three days; if half an hour, two days; if an hour, I am ready now.”

Employees aged 55 and over are eligible for a complete physical examination every year; those between 50 and 54, every two years; and those under 50, every three years.

NOTE: If the omitted words are clearly understood from the context, simpler punctuation may be used.

Employees aged 55 and over are eligible for a complete physical examination every year, those between 50 and 54 every two years, and those under 50 every three years.

Rex Waterman has completed 7 years of service, Jan Goodbody 5, and Rosa Morena 2.

- b. Omission of *That*.** In some sentences the omission of the conjunction *that* creates a definite break in the flow of the sentence. In such cases insert a comma to mark the break.

Remember, this offer is good only through May 31.

The problem is, not all of these assumptions may be correct.

The fact is, things are not working out as we had hoped.

Chances are, the deal will never come off.

In sentences that are introduced by expressions such as *he said*, *she thinks*, *we feel*, or *they know*, the conjunction *that* is often omitted following the introductory expression. In such cases no comma is necessary because there is no break in the flow of the sentence.

We know you can do it.

They think our price is too high.

She said she would handle everything.

We believe we offer the best service.

I heard you were moving back North.

He's so incompetent he couldn't organize a two-car funeral.

NOTE: Do not omit *that* if a misreading is possible.

CONFUSING: Researchers have found some medications, even though approved, carry unforeseen risks. (When *that* is omitted, you might initially mistake *some medications* as the object of *have found* rather than as the subject of a relative clause.)

CLEAR: Researchers have found *that* some medications, even though approved, carry unforeseen risks.

- c. Omission of Some Other Connective.** In some sentences the omission of a preposition or some other connective creates a break in the flow of the sentence. In such cases insert a comma to mark the break.

NOT: Our store is open from 9:30 a.m. to 6 p.m. Monday through Friday. (The omission of a connective before *Monday* creates a break.)

BUT: Our store is open from 9:30 a.m. to 6 p.m., Monday through Friday.

As an alternative, reword the sentence to eliminate the break and the need for a comma.

Our store is open Monday through Friday from 9:30 a.m. to 6 p.m.

Our store is open between 9:30 a.m. and 6 p.m. from Monday through Friday.

- d. Balancing Expressions.** Use a comma to separate the two parts of a balancing expression from which many words have been omitted.

First come, first served.

First in, last out.

Here today, gone tomorrow.

Nothing ventured, nothing gained.

The more we give, the more they take.

GIGO: garbage in, garbage out.

The less I see of him, the better I like it.

NOTE: The phrase *the sooner the better* usually appears without a separating comma.

¶173**To Indicate Unusual Word Order**

- 173** In some colloquial sentences, clauses or phrases occur out of normal order and connective words may be omitted. Use a comma to mark the resulting break in the flow of the sentence.

You must not miss the play, it was that good.

(**NORMAL ORDER:** The play was so good that you must not miss it.)

Why he took the money, I'll never understand.

That the shipment would be late, we were prepared to accept; that you would ship the wrong goods, we did not expect.

NOTE: In formal writing, these sentences should be recast in normal word order.

► See also ¶135c, note.

For Special Emphasis

- 174** Individual words may be set off by commas for special emphasis.

I have tried, *sincerely*, to understand your problems.

They contend, *unrealistically*, that we can cut staff and still generate the same amount of output.

NOTE: The use of commas in the examples above forces the reader to dwell momentarily on the word that has been set off in each case. Without this treatment *sincerely* and *unrealistically* would not receive this emphasis.

For Clarity

- 175** a. Use a comma to prevent misreading.

As you know, nothing came of the meeting.

(**NOT:** As you know nothing came of the meeting.)

To a liberal like Bill, Buckley seems hard to take.

Soon after, the committee disbanded without accomplishing its goal.

At our outdoor party last Saturday night, I watched my brother as he stepped backward into our swimming pool, and burst out laughing. (Believe me, it wasn't my brother who was laughing.)

- b. Sometimes, for clarity, it is necessary to separate two identical words that occur together in a sentence.

All any insurance policy *is, is* a contract for services.

This dispute is not about money, and anyone who thinks it *is, is* very much mistaken.

All the good pieces of furniture that we *have, have* been in my wife's family for generations.

If no confusion is likely, the comma may be omitted.

When is enough enough?

Tiffany protested that that was not true.

All it was was a case of mistaken identity.

Can anyone really say what makes art art?

In many cases, it may be faster to rewrite the sentence than to spend time trying to decide whether or not to insert a comma.

AWKWARD: The person whose wallet this is is going to be hard to track down.

BETTER: The owner of this wallet is going to be hard to track down.

AWKWARD: I'm trying to tell you you are mistaken.

BETTER: I'm trying to tell you that you are mistaken.

c. Use a comma to separate repeated words.

It was a *long, long* time ago.

Well, well, we'll find a way.

That was a *very, very* old argument.

Now, now, you don't expect me to believe that!

BUT: I can prove *that that* conversation never took place.

► *Commas with dashes:* see ¶¶213, 215b.

Commas preceding quotations: see ¶256.

Commas with quotations within a sentence: see ¶¶259–261.

Commas to set off interruptions in quoted material: see ¶¶262–263.

Spacing with commas: see ¶299c.

The Semicolon

► *For a perspective on the use of the semicolon, see the essay in the frontmatter on pages xxxvi–xxxix.*

Between Independent Clauses—*And, But, Or, or Nor* Omitted

176

- a. When a coordinating conjunction (*and, but, or, or nor*) is omitted between two independent clauses, use a semicolon—not a comma—to separate the clauses. (See ¶187.) If you prefer, you can treat the second clause as a separate sentence.

Most of the stockholders favored the sale; the management did not.

OR: Most of the stockholders favored the sale. The management did not.

(**NOT:** Most of the stockholders favored the sale, the management did not.)

Bob is going for his M.B.A.; Janet already has hers.

Workers in the computer industry don't get fired; they get "uninstalled."

(**NOT:** Workers in the computer industry don't get fired, they get "uninstalled.")

If I die, I forgive you; if I live, we'll see. (A Spanish proverb.)

According to Theodore Bernstein, Abraham Lincoln once wrote: "With educated people, I suppose, punctuation is a matter of style; with me it is a matter of feeling. But I must say I have a great respect for the semicolon; it's a useful little chap."

- b. If the clauses are not closely related, treat them as separate sentences.

WEAK: Thank you for your letter of September 8; your question has already been passed on to the manager of mail-order sales, and you should be hearing from Mrs. Livonia within three days.

BETTER: Thank you for your letter of September 8. Your question has already been passed on to the manager of mail-order sales, and you should be . . .

Continued on page 50

¶177

- c. The omission of *but* between two independent clauses requires, strictly speaking, the use of a semicolon between the two clauses. However, when the clauses are short, a comma is commonly used to preserve the flow of the sentence.

Not only was the food bad, the portions were minuscule.

NOTE: A semicolon is used mainly to separate independent clauses. For additional examples, see ¶¶182a, 184–186.

Between Independent Clauses—*And, But, Or, or Nor* Included

177

- A comma is normally used to separate two independent clauses joined by a coordinating conjunction. However, under certain circumstances a semicolon may be used.

- a. Use a semicolon in order to achieve a stronger break between clauses than a comma provides.

NORMAL BREAK: Many people are convinced that they could personally solve the problem if given the authority to do so, but no one will come forward with a clear-cut plan that we can evaluate in advance.

STRONG BREAK: Many people are convinced that they could personally solve the problem if given the authority to do so; but no one will come forward with a clear-cut plan that we can evaluate in advance.

- b. Use a semicolon when one or both clauses have internal commas and a misreading might occur if a comma also separates the clauses.

CONFUSING: I sent you an order for copier paper, computer paper, and No. 10 envelopes, and shipping tags, cardboard cartons, stapler wire, and binding tape were sent to me instead.

CLEAR: I sent you an order for copier paper, computer paper, and No. 10 envelopes; and shipping tags, cardboard cartons, stapler wire, and binding tape were sent to me instead.

NOTE: To prevent misreading, you will usually find it better to reword the sentence than rely on stronger punctuation.

BETTER: I sent you an order for copier paper, computer paper, and No. 10 envelopes, and you sent me shipping tags, cardboard cartons, stapler wire, and binding tape instead. (When you compare this version with the “clear” version above, you will note that the use of an active verb rather than a passive verb eliminates any confusion and produces a stronger sentence as well.)

- c. If no misreading is likely, a comma is sufficient to separate the clauses, even though commas are also used within the clauses.

On June 8, 2006, I discussed this problem with your customer service manager, Fay Dugan, but your company has taken no further action.

All in all, we’re satisfied with the job Bergquist Associates did, and in view of the tight deadlines they had to meet, we’re pleased that they came through as well as they did.

► *For additional examples, see ¶133.*

NOTE: Some writers still insist on using a semicolon in sentences like those in c above simply because of the presence of internal commas in the clauses, even though no misreading is possible. Yet no one appears to be troubled by the use of a comma to separate clauses in a complex sentence when commas also appear within the clauses.

Although I discussed this problem with your customer service manager, Fay Dugan, on June 8, 2011, your company has taken no further action.

In summary, do not use a semicolon in sentences like those in c above except to prevent misreading or to deliberately create a stronger break between clauses.

With Transitional Expressions

- 178** When independent clauses are linked by transitional expressions (see a partial list below), use a semicolon between the clauses. (You can also treat the second independent clause as a separate sentence.)

accordingly	however	so (see ¶179)
besides	moreover	that is (see ¶181)
consequently	namely (see ¶181)	then
for example (see ¶181)	nevertheless	therefore
furthermore	on the contrary	thus
hence	otherwise	yet (see ¶179)

They have given us an oral okay to proceed; *however*, we're still waiting for written confirmation. (OR: . . . okay to proceed. *However*, we're still . . .)

Our costs have started to level off; our sales, *moreover*, have continued to grow.

Let's give them another month to see what they can accomplish; *then* we can pin them down on their progress.

NOTE: Use a comma after the transitional expression when it occurs at the start of the second clause. (See the first example that appears above.) However, no comma is needed after *hence*, *then*, *thus*, *so*, and *yet* unless a pause is wanted at that point. (See the third example that appears above.)

► For the use of commas with transitional expressions, see ¶¶138–143.

- 179** An independent clause introduced by *so* (in the sense of “therefore”) or *yet* may be preceded by a comma or a semicolon. Use a comma if the two clauses are closely related and there is a smooth flow from the first clause to the second. Use a semicolon or a period if the clauses are long and complicated or if the transition between clauses calls for a long pause or a strong break.

These sale-priced attaché cases are going fast, *so* don't delay if you want one.

We have been getting an excessive number of complaints during the last few months about our service; *so* I would like each of you to review the operations in your department and indicate what corrective measures you think ought to be taken. (OR: . . . about our service. So I would like . . .)

Sales have been good, *yet* profits are low.

This report explains why production has slowed down; *yet* it does not indicate how to avoid future glitches.

- 180** If both a coordinating conjunction and a transitional expression occur at the start of the second clause, use a comma before the conjunction.

The site has a number of disadvantages, *and* furthermore the asking price is quite high. (See ¶142b, c, and note.)

REMEMBER: What makes it necessary to separate two independent clauses with a semicolon is not so much the presence of a transitional expression as it is the absence of a coordinating conjunction.

181**With *For Example, Namely, That Is, Etc.*****181 Before an Independent Clause**

- a. In general, when two independent clauses are linked by a transitional expression such as *for example* (*e.g.*), *namely*, or *that is* (*i.e.*), use a semicolon before the expression and a comma afterward.

She is highly qualified for the job; for example, she has had ten years' experience as a research chemist.

NOTE: You can also replace the semicolon with a period and treat the second clause as a separate sentence.

She is highly qualified for the job. For example, she has had . . .

- b. If the first clause serves to anticipate the second clause and the full emphasis is to fall on the second clause, use a colon before the transitional expression.

Your proposal covers all but one point: namely, who is going to foot the bill?

- c. For a stronger but less formal break between clauses, the semicolon or the colon may be replaced by a dash.

Hampton says he will help—that is, he will help if you ask him to.

NOTE: Use the abbreviated forms *e.g.* and *i.e.* only in informal, technical, or “expedient” documents (such as business forms, catalogs, and routine e-mail messages, memos, and letters between business offices).

*Please make sure that all lights are turned off when the office is not being used (*i.e.*, after hours and on weekends).*

- *For a usage note on *i.e.* and *e.g.*, see page 383.*

- d. When using *for example* or *e.g.* to introduce a list of examples, do not end the list with *et cetera* or *etc.* The use of *for example* or *e.g.* is sufficient to indicate that the list of examples was not intended to be complete.

182 At the End of a Sentence

When *for example, namely, or that is* introduces words, phrases, or a series of clauses *at the end of a sentence*, the punctuation preceding the expression may vary as follows:

- a. If the first part of the sentence expresses the complete thought and the explanation that follows seems to be added as an afterthought, use a semicolon before the transitional expression.

Always use figures with abbreviations; for example, 6 m, 9 sq in, 4 p.m. (Here the earlier part of the sentence carries the main thought; the examples are a welcome but nonessential addition.)

NOTE: The use of a semicolon before *for example* with a series of phrases is an exception to the general rule that a semicolon is always followed by an independent clause.

- b. If the first part of the sentence suggests that an important explanation or illustration will follow, use a colon before the transitional expression to throw emphasis on what *follows*.

*My assistant has three important duties: namely, attending all meetings, writing the minutes, and sending out notices. (The word *three* anticipates the enumeration following *namely*. The colon suggests that what follows is the main thought of the sentence.)*

NOTE: Use a comma before the transitional expression to throw emphasis on what precedes.

I checked these figures with three people, *namely*, Alma, Andy, and Jim. (This punctuation emphasizes *three people* rather than the specific names.)

- c.** If *for example*, *namely*, or *that is* introduces an appositive that explains a word or phrase immediately preceding, a comma should precede the transitional expression.

Do not use quotation marks to enclose an indirect quotation, *that is, a restatement of a person's exact words*. (Here again, a comma is used because what precedes the transitional expression is more important than what follows.)

- d.** The semicolon, the colon, and the comma in the examples in ¶182a–c may be replaced by a dash or by parentheses. The dash provides a stronger but less formal break; the parentheses serve to subordinate the explanatory element. (See also ¶¶201–205, 219.)

183 Within a Sentence

When *for example*, *namely*, or *that is* introduces words, phrases, or clauses *within a sentence*, treat the entire construction as nonessential and set it off with commas, dashes, or parentheses. Dashes will give emphasis to the interrupting construction; parentheses will make the construction appear less important than the rest of the words in the sentence.

Many of the components, *for example, the motor*, are manufactured by outside suppliers.

Many of the components—for example, *the motor*—are manufactured by outside suppliers.

Many of the components (*for example, the motor*) are manufactured by outside suppliers.

NOTE: Commas can be used to set off the nonessential element as long as it contains no internal punctuation (other than the comma after the introductory expression). If the nonessential element is internally punctuated with several commas, set it off with either dashes or parentheses.

Many of the components—for example, *the motor, the batteries, and the cooling unit*—are manufactured . . . (Use dashes for emphasis. See ¶201.)

OR: Many of the components (*for example, the motor, the batteries, and the cooling unit*) are manufactured . . . (Use parentheses for subordination. See ¶219b.)

In a Series

- 184 a.** As a general rule, use a semicolon to separate items in a series if any of the items already contain commas. (See also ¶186.)

The company will be represented on the Longwood Environmental Council by Martha Janowski, director of public affairs; Harris Mendel, vice president of manufacturing; and Daniel Santoya, director of environmental systems.

- b.** As an alternative, use parentheses to enclose the title following each name. Then use commas to separate the items in the series.

The company will be represented on the Longwood Environmental Council by Martha Janowski (director of public affairs), Harris Mendel (vice president of manufacturing), and Daniel Santoya (director of environmental systems).

¶185

NOTE: There is no need to use a semicolon to separate items in a series if internal commas appear only within the parenthetical elements.

The committee will consist of three people from Sales (Alma Biden, Jack Feld, and Doug Hoffman), three from Production (Mary Constanza, Phil Kantoff, and Hank Ward), and two from Accounting (Byron Ellis and Jen Rivlin).

Indeed the use of parentheses is often preferable in order to avoid the need for semicolons.

Among those caught up in the investigation were Ben Harrigan (45), Milton Grabowski (62), and Millie Singleton (53).

BETTER THAN: Among those caught up in the investigation were Ben Harrigan, 45; Milton Grabowski, 62; and Millie Singleton, 53.

- c. There is no need to use a semicolon to separate items in a series if internal commas appear only in the final item in the series and there is no chance that the reader will be confused.

Gathering flashlights and candles, securing sources for heat, and *finding ways to protect the home, family, and pets* were my first priorities.

- d. There is no need to use a semicolon to separate items in a series if internal commas appear only in numbers within the series.

We sold 126,110 units in July, 110,209 units in August, and 133,132 units in September.

185 Avoid starting a sentence with a series punctuated with semicolons. Try to recast the sentence so that the series comes at the end.

AWKWARD: New offices in Framingham, Massachusetts; Rochester, Minnesota; Metairie, Louisiana; and Bath, Maine, will be opened next year.

IMPROVED: Next year we will open new offices in Framingham, Massachusetts; Rochester, Minnesota; Metairie, Louisiana; and Bath, Maine.

NOTE: In sentences that mention one or more cities, omit the state names if the cities are well known and each city is clearly linked with only one state. (See also ¶160b.)

Next year we will open new offices in St. Louis, Denver, and Fort Worth.

With Dependent Clauses

186 Use semicolons to separate a series of parallel dependent clauses if they are long or contain internal commas. (See ¶184.)

If you have tried special clearance sales but have not been able to raise the necessary cash; if you have tried to borrow the money and have not been able to find a lender; if you have offered to sell part of the business but have not been able to find a partner, then it seems to me that your only course of action is to go out of business. (See ¶185.)

They promised that they would review the existing specifications, costs, and sales estimates for the project; that they would analyze Merkle's alternative figures; and that they would prepare a comparison of the two proposals and submit their recommendations.

NOTE: A simple series of dependent clauses requires only commas, just like any other kind of series. (See also ¶162.)

Mrs. Bienstock said that all the budgets had to be redone by Monday, that she could not provide us with any extra help, and that we'd better cancel any weekend plans.

- *Semicolons with dashes: see ¶¶213, 215c.*
- Semicolons with parentheses: see ¶224a.*
- Semicolons with quotation marks: see ¶248.*
- Spacing with semicolons: see ¶299d.*

The Colon

Between Independent Clauses

- 187** a. Use a colon between two independent clauses when the second clause explains or illustrates the first clause and there is no coordinating conjunction or transitional expression linking the two clauses.

I have a special fondness for the Maine coast: it reminds me of the many happy summers we spent there before our children went off to college.

I have two major hurdles to clear before I get my Ph.D.: I need to pass the oral exam and write a dissertation.

The second clause that explains or illustrates the first clause may itself consist of more than one independent clause.

It has been said that a successful project goes through three stages: it won't work, it costs too much, and I always knew it was a good idea.

As Mark Twain was fond of saying, "Never try to teach a pig to sing: it wastes your time and annoys the pig."

NOTE: It has been traditional to leave two spaces after a colon. Now that the standards of desktop publishing predominate, the use of only one space is appropriate. Unlike the spacing *between* sentences, where two spaces may be needed to improve the visual break, the use of only one space after a colon *within* a sentence normally provides an adequate visual break, just as it does for a semicolon or a comma. (See also ¶299e.)

- b. Compare the use of the colon and the semicolon in the following sentences.

The job you have described sounds very attractive: the salary, the benefits, and the opportunities for training and advancement seem excellent. (Use a colon when the second clause explains the first.)

The job you have described sounds very attractive; it is the kind of job I have been looking for. (Use a semicolon when the second clause does not explain the first clause.)

The job you have described sounds very attractive; for example, the salary and the benefits are good, and the opportunities for advancement seem excellent. (Ordinarily, use a semicolon when a transitional expression links the clauses. However, see ¶188.)

- c. If you aren't sure whether to use a semicolon or a colon between two independent clauses, you can treat each clause as a separate sentence and use a period at the end of each.

The job you have described sounds very attractive. For example, the salary and the benefits are good, and the opportunities for advancement seem excellent.

¶188

Before Lists and Enumerations

- 188** Place a colon before such expressions as *for example*, *namely*, and *that is* when they introduce words, phrases, or a series of clauses anticipated earlier in the sentence. (See ¶¶181–182.)

The company provides a number of benefits that are not commonly offered in this area: for example, free dental insurance, low-cost term insurance, and personal financial counseling services.

► *For spacing after a colon when it is used with a list or an enumeration within a sentence, see ¶187a, note.*

- 189** When a clause contains an anticipatory expression (such as *the following*, *as follows*, *here is*, *thus*, and *these*) and directs attention to a series of explanatory words, phrases, or clauses, use a colon between the clause and the series.

These are some of the new features in this year's models: a fuel economy indicator, a new rear suspension, and a three-year limited warranty.

The following staff members have been selected to attend the national sales conference in Honolulu:

Frances Berkowitz
Thomas Gomez
Thomas Miscina

NOTE: Use *as follows* (not *as follow*) even if this phrase refers to a plural noun.

The *restrictions* on the use of this property are *as follows*: . . .

- 190** Use a colon even if the anticipatory expression is only implied and not stated.

The house has attractive features: cross ventilation in every room, a two-story living room, and two terraces.

Scientists have devised a most appropriate name for a physical property opposed to gravity: levity. (The colon may be used even when what follows is only a single word. See also ¶210.)

In critiquing someone's report, Andrew Lang wrote, "He uses statistics as a drunken man uses lamp-posts: for support rather than illumination."

- 191** a. Do not use a colon if the anticipatory expression occurs near the beginning of a long sentence.

We have set *the following* restrictions on the return of merchandise, so please be aware of this new policy when dealing with customers. Goods cannot be returned after five days, and price tags must not be removed.

BUT: We have set *the following* restrictions on the return of merchandise: goods cannot be returned . . .

- b. Do not use a colon if the sentence that contains the anticipatory expression is followed by another sentence.

Campers will find that *the following* items will add much to their enjoyment. These articles may be purchased from a store near the camp.

Lightweight backpack
Unbreakable vacuum bottle
Insulated sleeping bag
Polarized sunglasses

- c. Do not use a colon between a verb or a preposition and its direct object unless the object appears on a separate line.

A one-year subscription includes free access to our Web site.

(**NOT:** A one-year subscription includes: free access to our Web site.)

Please forward your questions to <customer.service@mcgraw-hill.com>.

(**NOT:** Please forward your questions to: <customer.service@mcgraw-hill.com>.)

BUT: Please forward your questions to:

<customer.service@mcgraw-hill.com>.

- d. Do not use a colon if an explanatory series follows an introductory clause that does not express a complete thought. (In such cases the introductory element often ends with a verb or a preposition.)

WRONG: Some of the questions that this book answers are: How can you reduce your insurance expenses without sacrificing protection? How can you avoid being over- or underinsured? How can you file a claim correctly the first time around? (Here the introductory clause is incomplete. It has a subject, *Some*, and a verb, *are*, but it lacks a complement.)

RIGHT: Some of the questions that this book answers are these: How can you . . . ? (Here the introductory clause is complete; hence a colon is acceptable.)

RIGHT: Here are some of the questions that this book answers: How can you . . . ? (Here again the introductory clause is complete; hence a colon is acceptable.)

WRONG: The panel consists of: Ms. Seidel, Mrs. Kitay, and Mr. Haddad.

RIGHT: The panel consists of Ms. Seidel, Mrs. Kitay, and Mr. Haddad.

RIGHT: The panel consists of the following people: Ms. Seidel, Mrs. Kitay, and Mr. Haddad.

WRONG: This set of china includes: 12 dinner plates, 12 salad plates, and 12 cups and saucers.

RIGHT: This set of china includes 12 dinner plates, 12 salad plates, and 12 cups and saucers.

RIGHT: This set of china includes the following pieces: 12 dinner plates, 12 salad plates, and 12 cups and saucers.

NOTE: A colon may be used after an incomplete introductory clause if the items in the series are listed on separate lines.

This set of china includes: The panel consists of:

12 dinner plates Ms. Seidel

12 salad plates Mrs. Kitay

12 cups and saucers Mr. Haddad

In Expressions of Time and Proportions

- 192** When hours and minutes are expressed in figures, separate them with a colon, as in the expression 8:25. (No space precedes or follows this colon. See also ¶¶299e, 440g.)

- 193** A colon is used to represent the word *to* in proportions, as in the ratio 2:1. (No space precedes or follows this colon. See also ¶¶299e, 450a.)

¶194**In Business Documents****194**

- a. In business letters, use a colon after the salutation (see also ¶1338b). In social-business letters, use a comma (see also ¶1372b).
- b. In business letters, a colon is often used with elements displayed on separate lines. (In some cases another type of punctuation is also acceptable.)

REFERENCE NOTATIONS:	When replying, refer to: Policy 356 627 894 (see ¶1315)
ATTENTION LINE:	Attention: Ms. Jane Palmer (see ¶1337)
SUBJECT LINE:	Subject: Amendments to Berkowitz Contract (see ¶1343)
REFERENCE INITIALS:	DMD:SBC OR: dmd/sbc OR: sbc (see ¶1355c)
ENCLOSURE NOTATION:	Enclosures: OR: Under separate cover: (see ¶1358)
COPY NOTATION:	cc: P. Malone OR: c: P. Malone OR: Copies to: P. Malone (see ¶1361d-f)
POSTSCRIPT:	PS: Please call on Monday OR: PS. Please call . . . (see ¶1365)

NOTE: Leave one or two spaces after the colon as needed to achieve an adequate visual break. (A colon used in reference initials should not be followed or preceded by any space.)

- c. In memos and other business documents, use a colon after displayed guide words.

TO: FROM: DATE: SHIP TO: BILL TO: *Distribution:*

NOTE: Leave a minimum of two spaces after displayed guide words like these. If a number of displayed guide words are arranged in a column (as in the heading of a memo), set a tab a minimum of two spaces after the longest guide word in the column so that the entries following the guide words will all align at the same point. You may be able to use a preset tab instead of setting a new tab. (See ¶1374f.)

In References to Books or Publications**195**

- a. Use a colon (followed by one space) to separate the title and the subtitle of a book.
Be sure to read *The New Financial Order: Risk in the Twenty-First Century*.
If you want to see how our language is being abused, I urge you to read William Lutz's classic work, *The New Doublespeak: Why No One Knows What Anyone's Saying Anymore*.
- b. A colon may be used to separate volume number and page number in footnotes and similar references. (Leave no space before or after the colon. See also ¶299e.)
8:763–766 (meaning *Volume 8, pages 763–766*; see also ¶1517, note)

NOTE: A reference to chapter and verse in the Bible is handled the same way:

Isa. 55:10 (meaning the Book of Isaiah, *Chapter 55, verse 10*)

Capitalizing After a Colon**196**

- Do not capitalize the first word after a colon if the material that follows cannot stand alone as a sentence.

All cash advances must be countersigned by me, with one exception: when the amount is less than \$50. (Dependent clause following a colon.)

Two courses are required: algebra and English. (Words following a colon.)

EXCEPTION: Capitalize the first word after the colon if it is a proper noun, a proper adjective, or the pronoun *I*.

Two courses are required: English and algebra.

BUT: Two courses are required: algebra and English.

197 Do not capitalize the first word of an independent clause after a colon if the clause explains, illustrates, or amplifies the thought expressed in the first part of the sentence. (See ¶196, exception.)

Essential and nonessential elements require altogether different punctuation: the latter should be set off by commas; the former should not.

198 Capitalize the first word of an independent clause after a colon only if it requires special emphasis or is presented as a formal rule. (In such cases the independent clause expresses the main thought; the first part of the sentence usually functions only as an introduction.)

Let me say this: If the company is to recover from its present difficulties, we must immediately devise an entirely new marketing strategy.

Here is the key principle: Nonessential elements must be set off by commas; essential elements should not.

Although index investing derives from the theory that the markets operate efficiently, its intellectual foundation is based on a simple truth: It is impossible for all stock investors *together* to outperform the overall stock market.

NOTE: Some writers like to capitalize *every* independent clause that follows a colon, even though they would not be tempted to capitalize independent clauses that follow a semicolon or a dash. The best policy is *not* to capitalize independent clauses after a colon except as specifically noted in ¶¶197–199.

199 Also capitalize the first word after a colon under these circumstances:

a. When the material following the colon consists of two or more sentences.

There are two drawbacks to this proposal: First, it will tie up a good deal of capital for the next five years. Second, the likelihood of a significant return on the investment has not been shown.

NOTE: This example could also be properly written as a single sentence.

There are two drawbacks to this proposal: first, it will tie up a good deal of capital for the next five years; second, the likelihood of a significant return on the investment has not been shown.

b. When the material following the colon is a quoted sentence.

Frederick Fontina responded in this way: “We expect to win our case once all the facts are brought out in the trial.” (See ¶256b-f for the use of a colon before a quoted sentence.)

¶199

- c. When the material following the colon starts on a new line (for example, the body of a letter following the salutation or the individual items displayed on separate lines in a list).

Dear John:

I have read your latest draft, and I
find it much improved. However, on
page 4 I wish you would redo . . .

Capitalize the first word of:

- a. Every sentence.
- b. Direct quotations.
- c. Salutations in letters.

- d. When the material *preceding* the colon is an introductory word or phrase.

Note: All expense reports must be submitted no later than Friday.

Remember: All equipment must be turned off before you leave.

Sign on the door of an optometrist's office: If you don't see what you're looking for, you've come to the right place.

- e. When the material *preceding* the colon is the name of a speaker in the transcription of court testimony or in a script for a play. (See also ¶270.)

SPELLMAN: According to Mrs. Genovese's testimony, you called Mr. Mellon "a person of hidden depths."

RISKIN: What I actually said was that I found Mr. Mellon to be a person of hidden shallows.

► *Colons with dashes:* see ¶¶213, 215c.

Colons with parentheses: see ¶224a.

Colons with quotation marks: see ¶¶248, 256b-f.

Spacing with colons: see ¶187a, note, and ¶¶299e, 1433e.

SECTION 2

Punctuation: Other Marks

The Dash (¶¶201–217)

- In Place of Commas (¶¶201–203)
- In Place of a Semicolon (¶204)
- In Place of a Colon (¶205)
- In Place of Parentheses (¶206)
- To Indicate an Abrupt Break or an Afterthought (¶¶207–208)
- To Show Hesitation (¶209)
- To Emphasize Single Words (¶210)
- With Repetitions, Restatements, and Summarizing Words (¶211)
- Before Attributions (¶212)
- Punctuation Preceding an Opening Dash (¶213)
- Punctuation Preceding a Closing Dash (¶214)
- Punctuation Following a Closing Dash (¶215)
- Typing Dashes (¶¶216–217)

Parentheses (¶¶218–226)

- With Explanatory Material (¶¶218–219)
- With References (¶220)
- With Dates (¶221)
- With Enumerated Items (¶¶222–223)
- Parenthetical Items Within Sentences (¶224)
- Parenthetical Items at the End of Sentences (¶225)
- Parenthetical Items as Separate Sentences (¶226)

Quotation Marks (¶¶227–284)

- With Direct Quotations (¶¶227–234)
- For Special Emphasis (¶¶235–241)
- With Titles of Literary and Artistic Works (¶¶242–244)
- Quotations Within Quotations (¶¶245–246)
- With Periods and Commas (¶247)
- With Semicolons and Colons (¶248)
- With Question Marks and Exclamation Points (¶249)
- With Dashes (¶250)
- With Parentheses (¶251)

- Punctuating Quotations That Stand Alone (¶252)
- Punctuating Quotations That Begin a Sentence (¶¶253–255)
- Punctuating Quotations That End a Sentence (¶¶256–258)
- Punctuating Quotations Within a Sentence (¶¶259–261)
- Punctuating Quoted Sentences With Interrupting Expressions (¶¶262–263)
- Punctuating Long Quotations (¶¶264–265)
- Quoting Letters (¶266)
- Quoting Poetry (¶¶267–268)
- Quoting Dialogues and Conversations (¶¶269–270)
- Style in Quoted Material (¶271)
- Capitalization in Quoted Material (¶¶272–273)
- Aligning Quotation Marks (¶274)
- Omissions in Quoted Material (¶¶275–281)
- Insertions in Quoted Material (¶¶282–284)

Italics and Underlining (¶¶285–290)

- For Special Emphasis (¶¶285–288)
- With Titles of Literary and Artistic Works (¶289)
- Guidelines for Italics and Underlining (¶290)

Other Marks of Punctuation (¶¶291–298)

- Ellipsis Marks (...) (¶291)
- The Asterisk (*) (¶¶292–293)
- The Slash (/) (¶¶294–295)
- Brackets ([]) (¶296)
- Angle Brackets (<>) (¶297)
- The Apostrophe (') (¶298)

Spacing With Punctuation Marks (¶299)

► For definitions of grammatical terms, see the appropriate entries in the Glossary of Grammatical Terms (Appendix A).

The Dash

Although the dash has a few specific functions of its own, it most often serves in place of the comma, the semicolon, the colon, or parentheses. When used as an alternative to these other marks, it creates a much more emphatic separation of words within a sentence. Because of its versatility, some writers are tempted to use a dash to punctuate almost any break within a sentence. Indeed, some writers mistakenly think it is fashionable to use dashes in place of periods at the end of sentences. However, this indiscriminate use of dashes destroys the special forcefulness that a dash can convey. So please use the dash sparingly—and then only for deliberate effect.

IMPORTANT NOTE: Dashes come in different lengths—one em, two ems, three ems, and one en. (An em has the same width as a capital M; an en is one-half the width of an em.)

The term *dash* alone, without any modifier, always refers to a one-em dash. Two-em and three-em dashes and en dashes are always identified explicitly as such. The first set of rules that appears below—which includes ¶¶201–215—concerns the uses of *dashes*, that is, one-em dashes, only. The following two rules—¶¶216–217—concern all the different types of dashes. (In the preceding sentences, the dashes that link the numbers in the ranges expressed by ¶¶201–215 and ¶¶216–217 are en dashes. The dashes that set off the entire phrase *which includes* ¶¶201–215 are one-em dashes, also referred to simply as *em dashes*.) See ¶¶216–217 for guidelines on when to use two-em and three-em dashes and en dashes, how to form dashes of different lengths, and how to mark dashes in a manuscript being prepared for publication.

In Place of Commas

- 201** Use dashes in place of commas to set off a nonessential element that requires special emphasis.

At this year's annual banquet, the speakers—and the food—were superb.

Of all the color samples you sent me, there was only one I liked—taupe.

NOTE: Do not use more than one pair of dashes in a sentence. Otherwise, your reader may not be sure which words a given pair of dashes was intended to set off. (For an exception, see ¶209.)

- 202** If a nonessential element already contains internal commas, use dashes in place of commas to set the element off. (If dashes provide too emphatic a break, use parentheses instead. See ¶¶183, 219.)

Our entire inventory of Oriental rugs—including a fine selection of Sarouks, Kashans, and Bokharas—will be offered for sale at a 40 percent discount.

- 203** To give special emphasis to the second independent clause in a compound sentence, use a dash rather than a comma before the coordinating conjunction.

The information I sent you is true—and you know it!

In Place of a Semicolon

- 204** For a stronger but less formal break, use a dash in place of a semicolon between closely related independent clauses. (See ¶¶176, 178.)

I do the work—he gets the credit!

The job needs to be done—moreover, it needs to be done well.

Wilson is totally unqualified for a promotion—for example, he still does not grasp the basic principles of good management.

In Place of a Colon

- 205** For a stronger but less formal break, use a dash in place of a colon to introduce explanatory words, phrases, or clauses. (See ¶¶187–189.)

I need only a few items for my meeting with Kaster—namely, a copy of his letter of May 18, a copy of the contract under dispute, and a bottle of aspirin.

My arrangement with Gina is simple—she handles sales and I take care of promotion.

¶206**In Place of Parentheses**

- 206** Use dashes instead of parentheses when you want to give the nonessential element strong emphasis. (See ¶¶183, 219.)

Call Mike Habib—he’s with Jax Electronics—and get his opinion.

To Indicate an Abrupt Break or an Afterthought

- 207** Use a dash to show an abrupt break in thought or to separate an afterthought from the main part of a sentence. When a sentence breaks off after a dash, leave one or two spaces before the next sentence. (See ¶¶102, 299f.)

I wish you would— Is there any point in telling you what I wish for you?

We offer the best service in town—and the fastest!

According to Bertrand Russell, “Many people would sooner die than think—and usually do.”

- 208** If a *question* or an *exclamation* breaks off abruptly before it has been completed, use a dash followed by a question mark or an exclamation point as appropriate. (See ¶215a.) If the sentence is a *statement*, however, use a dash alone. Leave one or two spaces before the next sentence. (See ¶102.)

Do you want to tell him or—? Suppose I wait to hear from you.

If only— Yet there’s no point in talking about what might have been.

(**NOT:** If only—. Yet there’s no point in talking about what might have been.)

► *For the use of ellipsis marks to indicate a break in thought, see ¶291a.*

To Show Hesitation

- 209** Use a dash to indicate hesitation, faltering speech, or stammering.

A. A. Milne wrote, “Good judgment comes from experience, and experience—well, that comes from poor judgment.”

The work on the Patterson project was begun—oh, I should say—well, about May 1—certainly no later than May 15.

To Emphasize Single Words

- 210** Use dashes to set off single words that require special emphasis.

Jogging—that’s what he lives for.

There is, of course, a secret ingredient in my pasta sauce—fennel.

It was that kind of morning—crazy.

With Repetitions, Restatements, and Summarizing Words

- 211 a.** Use dashes to set off and emphasize words that repeat a previous thought or restate it to make it more specific.

Don’t miss this opportunity—the opportunity of a lifetime!

I believe it was Benjamin Franklin who wrote, “Your argument is sound—nothing but sound.”

Next week—on Thursday at 10 a.m.—we will be making an important announcement at a press conference.

In November and December, fear of family reunions—sometimes referred to as “kindred”—is a common phenomenon.

- b.** Use a dash before such words as *these*, *they*, and *all* when these words stand as subjects summarizing a preceding list of details.

Network television, magazines, and newspapers—*these* will be the big losers in advertising revenues next year.

India, China, and Australia—*all* are important new markets for us.

BUT: India, China, and Australia are all important new markets for us. (No dash is used when the summarizing word is not the subject.)

Before Attributions

- 212** When providing an attribution for a displayed quotation—that is, when identifying the author or the source of the quotation—use a dash before the name of the author or the title of the work.

Never put off till tomorrow that which you can do today.
—Benjamin Franklin

Never do today what you can put off till tomorrow.
—Aaron Burr

Never put off until tomorrow what you can do the day after tomorrow.
—Mark Twain

NOTE: The attribution typically appears on a separate line, aligned at the right with the longest line in the displayed quotation.

If his father had lived to . . . old age and his uncle had died . . . early . . . we can conceive Hamlet's having married Ophelia and got through life with a reputation of sanity, notwithstanding many soliloquies and some moody sarcasms.
—George Eliot, *The Mill on the Floss*

To my daughter Leonora
without whose never-failing sympathy and encouragement
this book would have been finished in half the time.
—P. G. Wodehouse

► For additional examples, see ¶274b.

Punctuation Preceding an Opening Dash

- 213** Do not use a comma, a semicolon, or a colon before an opening dash. Moreover, do not use a period before an opening dash (except a period following an abbreviation).

Quality circles boost productivity—and they pay off in higher profits too.
(**NOT:** Quality circles boost productivity,—and they pay off in higher profits too.)
The catalog proofs arrived before 11 a.m.—just as you promised.

Punctuation Preceding a Closing Dash

- 214 a.** When a *statement* or a *command* is set off by dashes within a sentence, do not use a period before the closing dash (except a period following an abbreviation).

Ernie Krauthoff—he used to have his own consulting firm—has gone back to his old job at Marker's.
(**NOT:** Ernie Krauthoff—He used to have his own consulting firm.—has gone back to his old job at Marker's.)

Your proposal was not delivered until 6:15 p.m.—more than two hours after the deadline.

Continued on page 66

¶215

- b.** When a *question* or an *exclamation* is set off by dashes within a sentence, use a question mark or an exclamation point before the closing dash.

The representative of the Hitchcock Company—do you know her?—has called again.

The new sketches—I can't wait to show them to you!—should be ready by Monday or Tuesday.

NOTE: When a complete sentence is set off by dashes, do not capitalize the first word unless it is a proper noun, a proper adjective, the pronoun *I*, or the first word of a quoted sentence.

Punctuation Following a Closing Dash

- 215** When the sentence construction requires some mark of punctuation following a closing dash, either retain the dash or use the sentence punctuation—but do not use both marks together.

- a.** When a closing dash falls at the end of a sentence, it should be replaced by the punctuation needed to end the sentence—a question mark or an exclamation point (but not a period). (See ¶¶207–208.)

Wheeler's Transport delivers the goods—on time!

(**NOT:** Wheeler's Transport delivers the goods—on time—!)

- b.** When a closing dash occurs at a point where the sentence requires a comma, retain the closing dash and omit the comma.

The situation has become critical—indeed dangerous—but no one seems to care. (Here the closing dash is retained, and the comma before the coordinating conjunction is omitted.)

If you feel you are qualified for the job—and you may very well be—you ought to take the employment test and go for an interview. (Here the closing dash is retained, and the comma that separates a dependent clause from an independent clause is omitted.)

Brophy said—and you can check with him yourself—“This office must be vacated by Friday.” (Here the closing dash is retained, and the comma before the quotation is omitted.)

NOTE: Do not put a phrase in dashes if the closing dash occurs at a point where a comma is needed after an item in a series. Put the phrase in parentheses instead.

CONFUSING: I plan to ask Spalding, Crawford—Betty, not Harold—Higgins, and Martin to investigate why sales have fallen off so sharply.

CLEAR: I plan to ask Spalding, Crawford (Betty, not Harold), Higgins, and Martin to investigate why sales have fallen off so sharply.

- c.** If a closing dash occurs at a point where the sentence requires a semicolon, a colon, or a closing parenthesis, drop the closing dash and use the required sentence punctuation.

Please try to get your sales projections to us by Wednesday—certainly by Friday at the latest; otherwise, they will be of no use to us in planning next year's budget.

Here is what Marsha had to say—or at least the gist of it: look for new opportunities in niche marketing, and move quickly to capitalize on them.

You need a volunteer (for example, someone like Louis Morales—he's always cooperative) to play the part of the customer.

Typing Dashes

- 216** **a.** If you are using word processing software, you will very likely have access to a special character called an *em dash*—so called because it is as wide as a capital M. (This is the dash that appears in all the examples in ¶¶201–215.) If you do not have access to this special character, you can construct a dash by striking the hyphen key *twice* with no space between the hyphens. Whether you use an em dash or two hyphens, leave no space before or after the dash.

Don't believe him—ever!

(**NOT:** Don't believe him – ever!)

OR: Don't believe him--ever!

(**NOT:** Don't believe him -- ever!)

BUT: If only I had realized— But now it's too late. (When a statement breaks off abruptly, leave one or two spaces between the dash and the start of the next sentence. See ¶208 and important spacing guidelines in ¶102.)

- b.** Never use a single hyphen to represent a dash.

There's only one person who can do this job--you!

(**NOT:** There's only one person who can do this job-you! **OR:** . . . this job – you!)

- c.** A two-em dash is used to indicate that letters are missing from a word. If you do not have access to a two-em dash, type four consecutive hyphens (with no space between). If the letters are missing from *within* a word, leave no space before or after the two-em dash. If the letters are missing *at the end* of a word, leave no space before; leave one space after unless a mark of punctuation needs to be inserted at that point.

Mr. T—n was the one who tipped off the police. **OR:** Mr. T---n was the one . . .

Mrs. J— asked not to be identified. **OR:** Mrs. J---- asked not to be identified.

- d.** A three-em dash is used to indicate that an entire word has been left out or needs to be provided. If you do not have access to a three-em dash, type six consecutive hyphens (with no space between hyphens). Since the three-em dash represents a complete word, leave one space before and after the three-em dash unless a mark of punctuation is required after the missing word.

We expect our sales will reach — by the end of the year.

OR: We expect our sales will reach ----- by the end of the year.

NOTE: A three-em dash is also used in bibliographies to represent an author's name in subsequent entries, after the first entry in which the author's name is given in full. See ¶1548 and the illustration on page 581.

- e.** Type a dash at the end of a line (rather than at the start of a new line).

He lives in Hawaii—
on Maui, I believe.

NOT: He lives in Hawaii
—on Maui, I believe.

- 217** **a.** If you are using word processing software, you will very likely have access to a special character called an *en dash*. Use an *en dash*—half the length of an em dash but longer than a hyphen—to connect numbers in a range. The en dash means “up to and including” in expressions like these:

open 10 a.m.–6 p.m., Monday–Friday

see Chapters 2–3, pages 86–124

planned for the week of March 2–8

a loan of \$50,000–\$60,000 for 10–15 years

during the years 2009–2012

retirement plans for employees aged 55–62

a seminar scheduled for May–June 2010

new offices located on Floors 16–17

¶218

► For the use of an en dash in certain compound adjectives, see ¶819b, note, and ¶821b, note; for other examples showing the use of an en dash, see ¶¶459–460.

- b. Use an en dash to signify a minus sign. (See ¶1631e.)
- c. If the equipment you are using does not offer access to an en dash, use a hyphen in expressions like those in a above.
- d. In manuscript being prepared for publication, it is often necessary to use special proofreaders' marks to distinguish en dashes from em dashes and hyphens, especially when hyphens have been used throughout the manuscript to represent dashes of varying length.

The proper way to code the length of dashes is as follows:

$\frac{1}{N}$ $\frac{1}{M}$ $\frac{2}{M}$ $\frac{3}{M}$

The proper way to indicate which hyphens are to be treated as hyphens is to double the hyphen to look like an equal sign. For example:

first[—]rate first[—]rate post[—]Revolutionary War period
 Winston[—]Salem[—]Washington flight connections
 A two[—]day conference will take place early this spring[—]sometime during the week of
 April 4[—]10, I believe. The registration fee of \$250[—]\$300 will be reduced for those who
 sign up for the first[—]day program.

Parentheses

Parentheses and dashes serve many of the same functions, but they differ in one significant respect: parentheses can set off only nonessential elements, whereas dashes can set off essential and nonessential elements. **REMEMBER:** In setting off elements, dashes emphasize; parentheses de-emphasize.

With Explanatory Material

218 Use parentheses to enclose explanatory material that is independent of the main thought of the sentence. The material within parentheses may be a single word, a phrase, an entire sentence, a number, or an abbreviation.

We called him Mr. B. for so long that when I ran into him last week, I couldn't remember his last name (Bertolucci). (A single word.)

By Friday (or sooner if possible) I will have an answer for you. (A phrase.)

Our competitors (we consistently underprice them) can't understand how we are able to do it. (A sentence.)

This note for Five Thousand Dollars (\$5000) is payable within ninety (90) days. (Numbers. See ¶¶420, 436a, note.)

Many corporations have created a new top-level job: chief information officer (CIO). (Abbreviation. See ¶504, note.)

NOTE: Be sure the parentheses enclose only what is truly parenthetical.

WRONG: I merely said I was averse (not violently opposed *to*) your suggestion.

RIGHT: I merely said I was averse (not violently opposed) *to* your suggestion.

219 Use parentheses to set off a nonessential element when dashes would be too emphatic and commas might create confusion.

- a. Parentheses are clearer than commas when a city-state expression occurs as an adjective.

Sales are down in our Middletown (Connecticut) office.

BETTER THAN: Sales are down in our Middletown, Connecticut, office.

- b. Parentheses are clearer than commas when the nonessential element already contains commas. (See ¶¶183, 202.)

In three of our factories (Gary, Detroit, and Milwaukee) output is up.

With References

220 Use parentheses to set off references and directions.

When I last wrote to you (see my letter of July 8 attached), I enclosed photocopies of checks that you had endorsed and deposited.

When a reference falls *at the end of a sentence*, it may be treated as part of the sentence or as a separate sentence. (See also ¶225, note.)

This point is discussed at greater length in Chapter 7 (see pages 90–101).

OR: This point is discussed at greater length in Chapter 7. (See pages 90–101.)

► *For the use of parentheses in footnotes, endnotes, and textnotes, see Section 15.*

With Dates

221 Use parentheses to enclose dates that accompany a person's name, a publication, or an event.

He claims that he can trace his family back to Charlemagne (742–814).

The "Sin On" Bible (1716) got its name from an extraordinary typographical error: instead of counseling readers to "sin no more," it urged them to "sin on more."

With Enumerated Items

222 a. **Within a Sentence.** Use parentheses to enclose numbers or letters that accompany enumerated items within a sentence.

We need the following information to complete our record of Ms. Pavlick's experience: (1) the number of years she worked for your company, (2) a description of her duties, and (3) the number of promotions she received.

NOT: . . . our record of Ms. Pavlick's experience: 1) the number of years she worked for your company, 2) a description of her duties, and 3) the number of promotions she received. (The only acceptable use of a single closing parenthesis is in an outline. See ¶223.)

¶223

NOTE: Use letters to enumerate items within a sentence when the sentence itself is part of a *numbered* sequence.

3. Please include these items on your expense report: (a) the cost of your hotel room, (b) the cost of meals, and (c) the amount spent on travel.
- b. In a Displayed List.** If the enumerated items appear on separate lines, the letters or numbers are usually followed only by periods. (See ¶107a.)

223

Subdivisions in outlines are often enclosed in parentheses. It is sometimes necessary to use a single closing parenthesis to provide another level of subdivision.

- | | |
|-----------|-----------|
| 1. | I. |
| a. | A. |
| (1) | 1. |
| (a) | a. |
| 1) | (1) |
| a) | (a) |
| | 1) |
| | a) |

NOTE: At every level of an outline there should be at least two items. If an item is labeled *A*, there must be at least one more item (labeled *B*) at the same level.

► *For guidelines on formatting outlines, see ¶¶1718–1723.*

Parenthetical Items Within Sentences**224**

If the item in parentheses falls *within a sentence*:

- a.** Make sure that any punctuation that comes after the item (such as a comma, a semicolon, a colon, or a dash) falls *outside* the closing parenthesis.

Unless I hear from you within five working days (by May 3), I will turn this matter over to my attorney.
I tried to reach you last Monday (I called just before noon); however, no one in your office knew where you were.

For Jane there is only one goal right now (and you know it): getting that M.B.A.
I saw your picture in a magazine last week (in *People*, I think)—and how I laughed when I saw who was standing next to you!

NOTE: Do not insert a comma, a semicolon, a colon, or a dash *before* an opening parenthesis.

- b.** Do not capitalize the first word of the item in parentheses, even if the item is a complete sentence. **EXCEPTIONS:** Proper nouns, proper adjectives, the pronoun *I*, and the first word of a quoted sentence. (See examples in *c* below.)

- c.** Do not use a period before the closing parenthesis except with an abbreviation.

Plan to stay with us (we're only fifteen minutes from the airport) whenever you come to New Orleans.

NOT: Plan to stay with us (We're only fifteen minutes from the airport.) whenever you come to New Orleans.

Paul Melnick (he's Boyd's new sales manager) wants to take you to lunch.

At last week's hearing (I had to leave at 4 p.m.), was the relocation proposal presented?

- d.** Do not use a question mark or an exclamation point before the closing parenthesis unless it applies solely to the parenthetical item *and* the sentence ends with a different mark of punctuation.

At the coming meeting (will you be able to make it on the 19th?), let's plan to discuss next year's budget. (A question mark is used in parentheses because the sentence ends with a period.)

May I still get tickets to the show (and may I bring a friend), or is it too late? (A question mark is omitted in parentheses because the sentence ends with a question mark.)

NOT: May I still get tickets to the show (and may I bring a friend?), or is it too late?

Parenthetical Items at the End of Sentences

225 If the item in parentheses is to be incorporated *at the end of a sentence*:

- a.** Place the punctuation needed to end the sentence *outside* the closing parenthesis.

Please return the payroll review sheets by Monday (October 8).

Is it true that there is a special term for gossip spread by e-mail (word of mouse)?

What a prima donna I work with (you know the one I mean)!

- b.** Do not capitalize the first word of the item in parentheses, even if the item is a complete sentence. **EXCEPTIONS:** Proper nouns, proper adjectives, the pronoun *I*, and the first word of a quoted sentence. (See examples in *c* and *d* below.)

- c.** Do not use a period before the closing parenthesis except with an abbreviation.

Our office is open late on Thursdays (until 9 p.m.).

Our office is open late on Thursdays (we're here until nine).

NOT: Our office is open late on Thursdays (We're here until nine.).

- d.** Do not use a question mark or an exclamation point before the closing parenthesis unless it applies solely to the parenthetical element *and* the sentence ends with a different mark of punctuation.

My new assistant is Bill Romero (didn't you meet him once before?).

Be sure to send the letter to Portland, Oregon (not Portland, Maine!).

Then he walked out and slammed the door (can you believe it)!?

Do you know Ellen Smyth (or is it Smythe)?

NOT: Do you know Ellen Smyth (or is it Smythe)?

I'm through with the job (and I mean it)!

NOT: I'm through with the job (and I mean it)!?

NOTE: When a complete sentence occurs within parentheses at the end of another sentence, it may be incorporated into the sentence (as in the examples above) as long as it is fairly short and closely related. If the sentence in parentheses is long or requires special emphasis, it should be treated as a separate sentence (see ¶226).

Parenthetical Items as Separate Sentences

226 If the item in parentheses is to be treated as a *separate sentence*:

- a.** The preceding sentence should close with a punctuation mark of its own.
- b.** The item in parentheses should begin with a capital letter.
- c.** A period, a question mark, or an exclamation point (whichever is appropriate) should be placed *before* the closing parenthesis.

¶226

- d. No other punctuation mark should follow the closing parenthesis. Leave one or two spaces before the start of the next sentence. (See ¶102.)

Then Steven Pelletier made a motion to replace the board of directors. (He does this at every stockholders' meeting.) However, this year . . .

I was most impressed with the speech given by Helena Verdi. (Didn't you used to work with her?) She knew her subject and she knew her audience.

► *Parentheses around question marks: see ¶118.*

Parentheses around exclamation points: see ¶119c.

Parentheses around confirming figures: see ¶420a.

Parentheses around area codes in telephone numbers: see ¶454c.

Parenthetical elements within parenthetical elements: see ¶296b.

Plural endings in parentheses: see ¶626.

Quotation Marks

Quotation marks have three main functions: to indicate the use of someone else's exact words (see ¶¶227–234), to set off words and phrases for special emphasis (see ¶¶235–241), and to display the titles of certain literary and artistic works (see ¶¶242–244).

IMPORTANT NOTE: There are three styles of quotation marks: *curly* (" "), *slanted* (' '), and *straight* ("). (Curly quotation marks are often referred to as *smart quotes*.)

In the following examples, note that curly and slanted quotation marks require a different symbol to mark the opening and closing of the quoted material; straight quotation marks are the same, whether they open or close the quoted material. (Note also that the style of the apostrophe in *won't* matches the style of the quotation marks.)

CURLY: Paul simply said, "It won't work."

SLANTED: Paul simply said, "It won't work."

STRAIGHT: Paul simply said, "It won't work."

The font you select will determine the style of quotation marks to be used. If you wish, you can switch from the default style to an alternative style by accessing an extended character set.

Quotation marks usually appear as a doubled set of symbols, but in certain circumstances single quotation marks are called for. (See ¶¶245–246, 247b, 248b, 249d, 250b, 265b[3], 298a.)

For guidance on how to position punctuation marks in relation to the closing quotation mark—*inside* or *outside*—see ¶¶247–251.

For more specific guidance on when to use punctuation with quoted material and which punctuation to use, refer to the following paragraphs:

► *Quotations standing alone: see ¶252.*

Quotations at the beginning of a sentence: see ¶¶253–255.

Quotations at the end of a sentence: see ¶¶256–258.

Quotations within a sentence: see ¶¶259–261.

Quotations with interrupting expressions: see ¶¶262–263.

Quotations within quotations: see ¶¶245–246.

Long quotations: see ¶¶264–265.

Quoted letters: see ¶266.

Quoted poetry: see ¶¶267–268.

Quoted dialogues and conversations: see ¶¶269–270.

Quotation marks as a symbol for inches: see ¶¶432, 543b.

With Direct Quotations

- 227** Use quotation marks to enclose a *direct quotation*, that is, the exact words of a speaker or a writer.

As Senator Daniel Patrick Moynihan once observed, “You are entitled to your own opinion, but you are not entitled to your own facts.”

In her fight for civil rights during the 1960s, Fannie Lou Hamer said, “I’m sick and tired of being sick and tired.”

According to the actor Stephen Fry, “The e-mail of the species is more deadly than the mail.”

Casey Stengel once said, “The secret of managing is to keep the guys who hate you from the guys who are undecided.”

When I asked Diana whether she liked the new format of the magazine, all she said was “No.” (See ¶¶233, 256a, note.)

In discussing how she tries to help other members of the Supreme Court reach a decision despite fierce disagreements, Justice Ruth Bader Ginsberg recalled the usefulness of the advice her mother-in-law gave her on her wedding day: “Of course, it is important to be a good listener—but it also pays, sometimes, to be a little deaf.”

On the subject of writing, writers have had much to say. According to Thomas Mann, “A writer is somebody for whom writing is more difficult than it is for other people.” Gary Wills has said, “Writing came easy—it would only get hard when I got better at it.” And Gene Fowler perhaps said it best: “Writing is easy; all you do is sit staring at a blank sheet of paper until the drops of blood form on your forehead.”

- 228** a. Do not use quotation marks for an *indirect quotation*, that is, a restatement or a rearrangement of a person’s exact words. (An indirect quotation is often introduced by *that* or *whether* and usually differs from a direct quotation in person, verb tense, or word order.)

DIRECT QUOTATION: Mrs. Knudsen asked her supervisor, “Am I still being considered for the transfer?”

INDIRECT QUOTATION: Mrs. Knudsen asked her supervisor whether she was still being considered for the transfer.

DIRECT QUOTATION: Her supervisor said, “You’re still in the running, but don’t expect a quick decision.”

INDIRECT QUOTATION: Her supervisor said that she was still in the running but should not expect a quick decision.

NOTE: Sometimes *direct* quotations are introduced by *that*. (See ¶¶256f and 272, note.)

- b. In some cases a person’s exact words may be treated as either a direct or an indirect quotation, depending on the kind of emphasis desired.

The chairman himself said, “The staff should be told at once that the rumors about a new building have no foundation.” (The use of quotation marks emphasizes that these are the chairman’s exact words.)

The chairman himself said the staff should be told at once that the rumors about a new building have no foundation. (Without quotation marks, the emphasis falls on the message itself. The fact that the chairman used these exact words is not important.)

¶229

W. H. Auden defined a professor as someone who talks in other people's sleep.

OR: W. H. Auden defined a professor as "someone who talks in other people's sleep."

- c. A single word or short phrase after *say* or *said* typically does not require the use of quotation marks.

While you're there, be sure to say *hello* to Mary for me.

(**NOT:** While you're there, be sure to say "*hello*" to Mary for me.)

If you run into Pete today, please tell him I said *okay* to his proposal.

(**NOT:** If you run into Pete today, please tell him I said "*okay*" to his proposal.)

► *For the use of quotation marks with yes or no, see ¶233.*

- 229** Do not use quotation marks to set off a *direct question* at the end of a sentence unless it is also a *direct quotation* (one that uses someone's exact words).

DIRECT QUESTION: The question is, Who will pay for restoring the landmark?

DIRECT QUOTATION: Mrs. Burchall then asked, "Who will pay for restoring the landmark?"

DIRECT QUOTATION: Mrs. Burchall then replied, "The question is, Who will pay for restoring the landmark?" (See also ¶115.)

- 230** Quotation marks are not needed to set off interior thoughts or imagined dialogue. Treat this kind of material like a *direct question* (as shown in ¶229 above).

After I left Joe's office, I thought, He has no business telling me what to do.

I should have said, I can handle this situation—thank you very much!—without any of your help.

NOTE: In special cases quotation marks may help to preserve clarity or maintain stylistic consistency (for example, when imaginary dialogue is interspersed with actual dialogue).

- 231** a. When only a word or phrase is quoted from another source, be sure to place the quotation marks only around the words extracted from the original source and not around any rearrangement of those words.

Tanya said she would need "more help" in order to finish your report by this Friday. (Tanya's exact words were, "How can he expect me to finish his report by this Friday without more help?")

- b. When a quoted word or phrase comes at the end of a statement, the period goes *inside* the closing quotation mark.

President Harry Truman said he wanted to find a one-armed economist—someone who wouldn't say "on the one hand, on the other hand."

To quote Walter Kerr, I would say my boss has "delusions of adequacy."

NOTE: When a quoted word or phrase comes at the end of a question or an exclamation, the placement of punctuation with respect to the quotation marks will vary. (See ¶258 for guidelines. See also ¶247a, particularly examples 2–4.)

- c. Be particularly sure not to include within the quotation marks such words as *a* and *the* at the beginning of the quotation or *etc.* at the end unless these words were actually part of the original material.

Ben thought you did a "super" job on the packaging design. (Ben's exact words were, "Tell Bonnie I thought the job she did on the packaging design was super.")

Explain the decision any way you want, but tell George I said, "I'm truly sorry about the way things turned out," etc., etc.

- 232** When quoting a series of words or phrases in the exact sequence in which they originally appeared, use quotation marks before and after the complete series. However, if the series of quoted words or phrases did not appear in this sequence in the original, use quotation marks around each word or phrase.

According to Selma, the latest issue of the magazine looked “fresh, crisp, and appealing.” (Selma’s actual words were, “I think the new issue looks especially fresh, crisp, and appealing.”)

BUT: Selma thinks the magazine looks “fresh” and “crisp.”

(NOT: Selma thinks the magazine looks “fresh and crisp.”)

- 233** Do not quote the words *yes* and *no* unless you wish to emphasize that these were (or will be) the exact words spoken.

Please answer the question yes or no.

Don’t say no until you have heard all the terms of the proposal.

You need to start saying no to cookies and yes to laps around the block.

When asked if he would accept a reassignment, Nick thought for a moment; then, without any trace of emotion, he said “Yes.” (The quotation marks imply that Nick said precisely this much and no more. See ¶256a, note, for the use or omission of a comma after *he said*.)

NOTE: When quoting the words *yes* and *no*, capitalize them if they represent a complete sentence.

All she said was “No.”

I would have to answer that question by saying “Yes and no.”

BUT: That question requires something more than a yes-or-no answer.

- 234** Do not use quotation marks with well-known proverbs and sayings. They are not direct quotations.

When I was young, I was taught that the person who laughs last laughs best.

When I was older, I learned that the person who laughs last thinks slowest.

Now that I’m old, I know that people who laugh last.

For Special Emphasis

- 235** When using technical terms, business jargon, or coined words or phrases not likely to be familiar to your reader, enclose them in quotation marks when they are first used.

One computer support center reports that some software users become confused when they are directed to press any key. They call to complain that they cannot find the “any” key.

It takes Joe a long time to get himself “booted up” in the morning. (The quoted phrase refers to the technique whereby a computer gets itself up and running. The quotation marks are unnecessary if you are writing to someone familiar with computer terms.)

- 236** a. Words used humorously or ironically may be enclosed in quotation marks.

Rose’s shop does not sell second-hand clothes. It sells “experienced” clothing.

When I invited Sally to join me today for a lunch alfresco (out of doors), she said she only had time for lunch “al desko.”

My opponent has pledged to oppose any legislation that would levy “new taxes.” However, he is on record as favoring “revenue enhancement through new user fees.”

¶237

However, unless you are convinced your reader will otherwise miss the humor or the irony, omit the quotation marks.

I was totally underwhelmed by Joe's proposal to centralize all purchasing.

(RATHER THAN: I was totally "underwhelmed" by Joe's proposal . . .)

HDL cholesterol is the good kind; it's LDL that's the bad kind.

(RATHER THAN: . . . the "good" kind . . . the "bad" kind . . .)

Is it really true that some Germans refer to their laptop computers as schlepptops?

(RATHER THAN: . . . some Germans refer to their laptop computers as "schlepptops"?)

- b.** A slang expression, the use of poor grammar, or a deliberate misspelling is enclosed in quotation marks to indicate that such usage is not part of the writer's normal way of speaking or writing.

Now that his kids have run off to Europe with the college tuition money, Bob has stopped boasting about his close-knit "nuclear" family. (The writer is mimicking Bob's habitual mispronunciation of *nuclear*.)

As far as I'm concerned, Polly Harrington's version of what happened "ain't necessarily so."

- c.** Quotation marks are not needed for colloquial expressions.

She cares less about the salary than she does about the perks—you know, chauffeured limousine, stock options, and all the rest of it. (*Perks* is short for *perquisites*, meaning "special privileges.")

Pam is planning to temp until she's sure about staying in Los Angeles. (*To temp* means "to do temporary work.")

- 237 a.** Use quotation marks to enclose words and phrases that have been made to play an abnormal role in a sentence—for example, verb phrases made to function as adjectives.

We were all impressed by her "can do" attitude. (*Can do* is a verb phrase used here as an adjective modifying *attitude*.)

OR: We were all impressed by her can-do attitude. (A hyphen may also be used to hold together a phrase used as an adjective before a noun. See ¶828a.)

BUT NOT: We were all impressed by her "can-do" attitude. (Do not use both quotation marks and a hyphen for the same purpose.)

I'm selling my car on an "as is" [OR: as-is] basis.

"Backspace and overstrike" is a hacker's way of saying that you ought to take back something you just said or undo something you just did.

NOTE: When a verb like *must* or a preposition/adverb like *in* becomes established as a noun or an adjective (as indicated in the dictionary), use quotation marks only in those constructions where confusion could otherwise result.

You have to read that book; it's a must.

BUT: You have to get that book; it's "must" reading.

Frank must have an in with their purchasing department.

BUT: I guess she thinks it's still the "in" thing to do.

This has been an off year for real estate sales and housing starts.

You have another think coming. (NOT: You have another thing coming.)

- b.** Do not use quotation marks to enclose phrases taken from other parts of speech and now well established as nouns. (See also ¶625.)

a helpful list of dos and don'ts

all the whys and wherefores

a lot of ifs, ands, or buts (see also ¶285a)
 a widening gap between the haves and the have-nots
 an explanation of the ins and outs of the way things work
 a need to consider the pros and cons of this proposal
 a definite maybe (a decision that the movie producer Samuel Goldwyn promised to give)

- 238** When a word or an expression is formally defined, the word to be defined is usually italicized or underlined and the definition is usually quoted so that the two elements may be easily distinguished. (For the treatment of informal definitions, see ¶286, note.)

Resentment, according to an Irish proverb, is “a poison you drink yourself, hopin’ the other guy will die.”

Someone has come up with a wonderful word that means “to give up all hope of ever having a flat stomach”: *abdicate*.

Bissextile means “pertaining to the leap year or the extra day in the leap year.”

An *erg* is “a unit of work”; an *arg* is “a unit of work done incorrectly.”

► For guidelines on italics and underlining, see ¶290.

- 239** A word referred to as a word may be enclosed in quotation marks but is now more commonly italicized or underlined. (See ¶285a.)

- 240** a. Words and phrases introduced by such expressions as *marked*, *labeled*, *signed*, *entitled*, or *titled* are enclosed in quotation marks.

The carton was marked “Fragile.”

He received a message signed “A Friend.”

The article entitled “Write Your Senator” was in that issue. (See ¶260.)

NOTE: Titles of complete published works following the expression *entitled* or *titled* require italics or underlining rather than quotation marks. (See ¶289 for titles to be italicized or underlined; see ¶¶242–244 for titles to be quoted.)

► For a usage note on entitled and titled, see Section 11, page 375.

- b. Words and phrases introduced by *so-called* do not require quotation marks, italics, or underlining. The expression *so-called* is sufficient to give special emphasis to the term that follows.

The so-called orientation session struck me as an exercise in brainwashing.

- 241** The translation of a foreign expression is enclosed in quotation marks; the foreign word itself is italicized or underlined. (See ¶287.)

With Titles of Literary and Artistic Works

- 242** Use quotation marks around the titles that represent only *part* of a complete published work—for example, the titles of chapters, lessons, topics, sections, and parts within a book; the titles of articles and feature columns in newspapers and magazines; and the titles of essays and short poems. Also use quotation marks around the

¶243

titles of lectures, sermons, conference themes, presentations, events, brochures, and albums. (Italicize or underline titles of *complete* published works. See ¶289.)

The heart of her argument can be found in Chapter 3, “The Failure of Traditional Therapy.” You’ll especially want to read the section entitled “Does Father Know Best?”

An exciting article—“Can Cancer Now Be Cured?”—appears in the magazine I’m enclosing. (See ¶¶260–261 for the use of commas, dashes, and parentheses with quoted titles.)

The theme of next month’s workshop is “Imperatives for the New Millennium—From the Ragged Edge to the Cutting Edge.”

The title of my speech for next month’s luncheon will be “Reforming Our Local Tax Policy.”

BUT: At next month’s luncheon I will be talking about reforming our local tax policy. (Do not enclose the words with quotation marks when they describe the topic rather than signify the exact title.)

Where can I see an original copy of Lincoln’s Gettysburg Address or the Declaration of Independence? (Quotation marks are not necessary for the names of well-known documents or the titles of sacred works. See ¶350.)

NOTE: The titles *Preface*, *Contents*, *Appendix*, and *Index* are not enclosed in quotation marks, even though they represent parts within a book. They are often capitalized, however, for special emphasis.

All the supporting data is given in the Appendix. (Often capitalized when referring to another section within the same work.)

BUT: You’ll find that the most interesting part of his book is contained in the appendix. (Capitalization is not required when reference is made to a section within another work.)

243 Use quotation marks around the titles of *complete but unpublished* works, such as manuscripts, dissertations, and reports.

Thank you for giving us the chance to review “Working out of Your Home.” I have given your manuscript to an editor with a good deal of personal experience in this field.

NOTE: Strictly speaking, the posting of manuscripts, dissertations, and reports online constitutes a form of publication. Nevertheless, use quotation marks around the titles of such documents.

Sandor’s study, “Criteria for Evaluating Staff Efficiency,” is now available online.

244 Use quotation marks around the titles of songs and other short musical compositions and around the titles of individual segments or programs that are part of a larger television or radio series. (Series titles are italicized or underlined. See ¶289.)

Have you ever heard any of these country songs: “All My Exes Live in Texas,” “If the Phone Doesn’t Ring, It’s Me,” or “Your Coffee’s on the Table but Your Sugar’s out the Door”?

And how about “How Can I Miss You When You Won’t Go Away?” (For the placement of the question mark in this example and the one above—before or after the closing quotation mark—see ¶249.)

I understand that our company was briefly mentioned on the *Frontline* program entitled “Pentagon, Inc.,” which was shown last Tuesday night.

Quotations Within Quotations

245 a. A quotation within a quotation should be enclosed in a pair of single quotation marks that match the style of the regular quotation marks you are using: curly (‘ ’), slanted (‘ ’), or straight (‘ ’).

Ulysses S. Grant claimed to know only two tunes: “One is ‘Yankee Doodle’ and the other is not.”

- b. If you do not have access to single quotation marks, use two straight apostrophes to enclose a quotation within a quotation. (See ¶298a.)

Dorothy Parker once said, “The most beautiful words in the English language are ‘Check enclosed.’”

According to an unnamed twelve-year-old (quoted in a BellSouth ad), “The most dreaded words in the English language are ‘Some assembly required.’”

My pal Ike says, “The four most satisfying words in the English language are ‘I told you so.’”

- c. When single and double quotation marks occur together, insert a space between the two marks to keep them distinct.

One blogger writes, “I don’t understand how there can be self-help ‘groups.’”

I always read “‘Twas the Night Before Christmas” to my kids on the night before Christmas.

- 246** If a quotation appears within the single-quoted material, revert to double quotation marks for the inner portion.

Mrs. DeVries then remarked, “I thought it a bit strange when Mr. Fowler said, ‘Put these checks in an envelope marked “Personal Funds,” and set them aside for me.’”

NOTE: For the positioning of punctuation in relation to a single quotation mark, see the following paragraphs:

► *For placement of periods and commas, see ¶247b.*

For placement of semicolons and colons, see ¶248b.

For placement of question marks and exclamation points, see ¶249d.

For placement of dashes, see ¶250b.

The following rules (¶¶247–251) indicate how to position punctuation marks in relation to the closing quotation mark—inside or outside.

With Periods and Commas

- 247** a. Periods and commas always go *inside* the closing quotation mark. This is the preferred American style. (Some writers in the United States follow the British style: Place the period *outside* when it punctuates the whole sentence, *inside* when it punctuates only the quoted material. Place the comma *outside*, since it always punctuates the sentence, not the quoted material.)

Pablo Picasso is the person who said, “Computers are useless. They can only give you answers.”

He wants to change “on or about May 1” to read “no later than May 1.”

Brad denies that he is paranoid; he claims that he is simply “hypervigilant.”

Sign your name wherever you see an “X.”

“Let’s go over the details again,” she said.

“The date stamp indicates that my copy arrived at 10:50 a.m.,” he said.

Their latest article, “Scanning the Future of E-Commerce,” will appear in next month’s issue of *Inc.* magazine.

“Witty,” “clever,” “amusing,” and “hilarious” are only a few of the adjectives that are being applied to her new book.

The package was labeled “Fragile,” but that meant nothing to your delivery crew.

¶248

- b.** Periods and commas also go *inside* the single closing quotation mark.

Mr. Poston said, “Please let me see all the orders marked ‘Rush.’”

“All he would say was ‘I don’t remember,’” answered the witness.

- c.** Do not confuse a single quotation mark with an apostrophe used to show possession or indicate a contraction. When a sentence requires the use of a comma or a period at the same point as an apostrophe, the comma or period follows the apostrophe.

The only message Brad left was, “I’ll be spending the weekend at the Morleys.” (The single quotation mark following *Morleys* is an apostrophe showing possession; the implied meaning is “at the Morleys’ house.” Note that the period follows the apostrophe but comes before the closing quotation mark.)

Dwayne could be heard in the shower, singing “Oh, What a Beautiful Mornin’.” (The single quotation mark following *Mornin* reflects a contraction—the dropping of the *g* at the end of the word. Here again the period follows the apostrophe but precedes the closing quotation mark.)

- d.** Do not confuse a single quotation mark with an apostrophe used as a symbol signifying “feet.” By the same token, do not confuse a double quotation mark with the symbol signifying “inches.” When a sentence requires the use of a comma or a period at the same point as one of these symbols, the comma or period follows the symbol.

... a room 10' × 15'. ... a room 10' 6" × 19' 10".

With Semicolons and Colons

- 248 a.** Semicolons and colons always go *outside* the closing quotation mark.

Last Tuesday you said, “I will mail a check today”; it has not yet arrived.

When the announcement of the changeover was made, my reaction was “Why?”; John’s only reaction was “When?”

The memo I sent you yesterday said that the new workstations would cost “a nominal egg”; it should have said “an arm and a leg.”

Please send me the following items from the file labeled “In Process”: the latest draft of the Berryman agreement and FASB Statement 33.

- b.** Semicolons and colons also go *outside* the single closing quotation mark.

Alice Arroyo called in from Dallas to say, “Please send me the following items from the file labeled ‘In Process’: the latest draft of the Berryman agreement, the comments provided by our lawyer, and FASB Statement 33.”

With Question Marks and Exclamation Points

- 249 a.** At the end of a sentence, a question mark or an exclamation point goes *inside* the closing quotation mark when it applies only to the quoted material.

His first question was, “How long have you worked here?” (Quoted question at the end of a statement.)

Garland still ends every sales meeting by shouting, “Go get ‘em!” (Quoted exclamation at the end of a statement.)

My father-in-law always claimed there were four stages of life: youth, middle age, old age, and “My, don’t you look wonderful!” (Quoted exclamation at the end of a statement.)

- b.** At the end of a sentence, a question mark or an exclamation point goes *outside* the closing quotation mark when it applies to the entire sentence.

When will she say, for a change, “You did a nice job on that”? (Quoted statement at the end of a question.)

Stop saying “Don’t worry”! (Quoted statement at the end of an exclamation.)

Did Billy Wilder actually say that composer had “Van Gogh’s ear for music”? (Quoted phrase at the end of a question.)

I can’t believe anyone in their real estate agency could have approved an ad containing a reference to “floorless workmanship”! (Quoted phrase at the end of an exclamation.)

- c.** If a sentence ends with quoted material and both the sentence and the quoted material require the same mark of punctuation, use only one mark—the one that comes first. (See also ¶¶257–258.)

Have you seen the advertisement that starts, “Why pay more?” (Quoted question at the end of a question.)

Let’s not panic and yell “Fire!” (Quoted exclamation at the end of an exclamation.)

- d.** These same principles govern the placement of a question mark or an exclamation point in relation to a single quotation mark.

What prompted her to say, “Be careful in handling documents marked ‘Confidential’”? (Quoted word within a quoted statement at the end of a question.)

Dr. Marks asked, “Was the check marked ‘Insufficient Funds’?” (Quoted phrase within a quoted question at the end of a statement.)

Miss Parsons then said, “How did you answer him when he asked you, ‘How do you know?’” (Quoted question within a quoted question at the end of a statement.)

With Dashes

- 250** **a.** A dash goes *inside* the closing quotation mark to indicate that the speaker’s or writer’s words have broken off abruptly.

It was tragic to hear Tom say, “If he had only listened—”

- b.** A dash goes *outside* the closing quotation mark when the sentence breaks off abruptly *after* the quotation.

If I hear one more word about “boosting productivity”—

BUT: Mrs. Halliday said, “If I hear one more word from the general manager about ‘boosting productivity’—”

- c.** A closing dash goes *outside* the closing quotation mark when the quotation itself is part of a nonessential element being set off by a pair of dashes.

Get the latest draft of the Montague contract—it’s the one with the notation “Let’s go with this”—and take it to Gladys.

With Parentheses

- 251** **a.** The closing parenthesis goes *inside* the closing quotation mark when the parenthetical element is part of the quotation.

Fox agreed to settle his account “by Friday (July 28)” when he last wrote us.

- b.** The closing parenthesis goes *outside* the closing quotation mark when the quotation is part of the parenthetical element.

Joe Elliott (the one everyone calls “Harper’s gofer”) will probably get the job.

¶252

The following rules (¶¶252–270) indicate what punctuation to use with various kinds of quoted material.

Punctuating Quotations That Stand Alone

- 252** When a quoted sentence stands alone, put the appropriate mark of terminal punctuation—a period, a question mark, or an exclamation point—*inside* the closing quotation mark.

"I think we should switch suppliers at once."

"Can you send us your comments within two weeks?"

"I won't accept that kind of response!"

Punctuating Quotations That Begin a Sentence

- 253** a. When a quoted *statement* occurs at the beginning of a sentence, omit the period before the closing quotation mark and use a comma instead.

"I think we should switch suppliers at once," he said.

(**NOT:** . . . at once.," he said.)

EXCEPTION: Retain the period if it accompanies an abbreviation.

"I'm still planning to go on for an LL.B.," she said.

- b. Omit the comma after a quoted statement if it is smoothly woven into the flow of the sentence.

"I haven't a clue" is all Bert says when you ask what he plans to do next.

(**NOT:** "I haven't a clue," is all Bert says . . .)

- 254** When a quoted *question* or *exclamation* occurs at the beginning of a sentence, retain the question mark or the exclamation point before the closing quotation mark and do *not* insert a comma.

"Can you send us your comments within two weeks?" she asked.

(**NOT:** . . . within two weeks?," she asked.)

"I won't accept that kind of response!" I told him.

(**NOT:** . . . that kind of response!," I told him.)

- 255** When a quoted *word* or *phrase* occurs at the beginning of a sentence, no punctuation should accompany the closing quotation mark unless required by the overall construction of the sentence.

"An utter bore" was the general reaction to yesterday's speaker.

"Managing Your Portfolio," the second chapter in the Klingensteiner book, sets forth some guidelines I have never seen anywhere else. (The comma that follows the chapter title is the first of a pair needed to set off a nonessential expression.)

Punctuating Quotations That End a Sentence

- 256** a. When a quoted *statement*, *question*, or *exclamation* comes at the end of a sentence and is introduced by an expression such as *he said* or *she said*, a comma usually precedes the opening quotation mark.

Mr. Kelley said, "We'll close early on Friday."

In her letter Diana said, "I plan to arrive on Thursday at 6 p.m."

Ulysses S. Grant explained his military success by saying, “The fact is, I think I am a verb instead of a personal pronoun.”

When asked about her successful career in the U.S. Army, Brigadier General Elizabeth P. Hoisington replied, “If I had learned to type, I never would have made brigadier general.”

Upon reflection, Albert Einstein said, “If I had my life to live over again, I’d be a plumber.”

While pondering the demands of political leadership, George Burns said, “Too bad that all the people who know how to run the country are busy driving taxicabs and cutting hair.”

NOTE: If the quotation is quite short or is woven into the flow of the sentence, feel free to omit the comma.

All she said was “No.” **OR:** All she said was, “No.” (The comma creates a slight pause and throws greater emphasis on the quotation.)

Why does he keep saying “It won’t work”?

b. Use a colon in place of a comma if the introductory expression is an independent clause.

Here is more profound wisdom from Albert Einstein: “Once you accept the universe as matter expanding into nothing that is something, wearing stripes with plaid comes easy.”

The artist Willem de Kooning had this to say about poverty: “The trouble with being poor is that it takes up all your time.”

Miss Manners, as usual, makes her point simply but well: “If you can’t be kind, at least be vague.”

When you can’t make up your mind, remember Yogi Berra’s sage advice: “If you come to a fork in the road, take it.”

In the final analysis, Ann Landers said it best: “The best things in life aren’t things.”

c. Use a colon in place of a comma if the quotation contains more than one sentence.

Rita Mae Brown wrote: “The statistics on sanity are that one out of every four Americans is suffering from some form of mental illness. Think of your three best friends. If they’re okay, then it’s you.”

Professor Robert Silensky then said: “We’ve all heard how 1,000,000 monkeys pounding on 1,000,000 typewriters will eventually reproduce Shakespeare’s entire works. Well, now thanks to the Internet, we know that’s not true.”

Flannery O’Connor wrote: “Everywhere I go, I’m asked if I think the universities stifle writers. My opinion is that they don’t stifle enough of them. There’s many a best-seller that could have been prevented by a good teacher.”

d. Use a colon in place of a comma if the quotation is set off on separate lines as an extract. (See also ¶265.)

Sheila’s letter said in part:

I have greatly valued your assistance. You have always
acted as if you were actually part of our staff, with our
best interests in mind.

e. Do not use either a comma or a colon before an indirect quotation.

Sheila said that she had always valued Bob’s assistance on various projects.

f. Do not use either a comma or a colon when a direct quotation is introduced by *that* or is otherwise woven into the flow of the sentence.

In a previous letter to you, I noted that “you have always acted as if you were actually part of our staff, with our best interests in mind.”

NOTE: The first word of the quotation is not capitalized in this case, even though it was capitalized in the original. Compare *you* here with *You* in the example in *d* above. (See ¶272 for the rule on capitalizing the first word of a quoted sentence.)

¶257

- 257** When a quoted *sentence* (a statement, a question, or an exclamation) falls at the end of a larger sentence, do not use double punctuation—that is, one mark to end the quotation and another to end the sentence. Choose the stronger mark. (**REMEMBER:** *A question mark is stronger than a period; an exclamation point is stronger than a period or a question mark.*) If the same mark of punctuation is required for both the quotation and the sentence as a whole, use the one within quotation marks.

Quoted Sentences at the End of a Statement

Bob said, “I can’t wait to get back to work.” (**NOT:** “.)

Mrs. Fahey asked, “How long have you been away?” (**NOT:** ?”)

Mr. Auden shouted, “We can’t operate a business this way!” (**NOT:** !”)

Quoted Sentences at the End of a Question

Did you say, “I’ll help out”? (**NOT:** .”?)

Why did Mary ask, “Will Joe be there?” (**NOT:** ?”?)

Who yelled “Watch out!” (**NOT:** !”?)

Quoted Sentences at the End of an Exclamation

How could you forget to follow up when you were specifically told, “Give this order special attention”! (**NOT:** .”!)

Stop saying “How should I know”! (**NOT:** ?”!)

How I’d like to walk into his office and say, “I quit!” (**NOT:** !”!)

NOTE: When a quoted sentence ends with an abbreviation, retain the abbreviation period, even though a question mark or an exclamation point follows as the terminal mark of punctuation.

The reporter asked, “When did you first hear about the board’s decision to sell the company to Modem Inc.?”

Didn’t Larry tell Meg, “I’ll help you with the tuition for your M.D.?”

However, if a period is required as the terminal mark of punctuation, use only one period to mark the end of the abbreviation and the end of the sentence.

Gloria said, “You can call as early as 6:30 a.m.” (**NOT:** .”)

► *For the placement of periods and commas, see ¶247; for the placement of question marks and exclamation points, see ¶249.*

- 258** When a quoted *word* or *phrase* occurs at the end of a sentence, punctuate according to the appropriate pattern in the following examples. (**NOTE:** If the quoted word or phrase represents a complete sentence, follow the patterns shown in ¶257.)

Quoted Words and Phrases at the End of a Statement

He says he is willing to meet “at your convenience.” (**NOT:** .”)

I thought her letter said she would arrive “at 10 p.m.” (**NOT:** .”)

I’ve been meaning to read “Who Pays the Bill?” (**NOT:** ?”)

Critics have praised his latest article, “Freedom Now!” (**NOT:** !”)

Quoted Words and Phrases at the End of a Question

Why is he so concerned about my “convenience”?

Didn’t she clearly state she would arrive “at 10 p.m.”?

Have you had a chance to read “Who Pays the Bill?” (**NOT:** ?”?)

What did you think of the article “Freedom Now!”?

Quoted Words and Phrases at the End of an Exclamation

He couldn't care less about my "convenience"!

You're quite mistaken—she clearly said "at 10 a.m."!

Don't waste your time reading "Who Pays the Bill?"!

What a reaction he got with his article "Freedom Now!" (**NOT:** !")

Punctuating Quotations Within a Sentence

- 259** Do not use a comma before or after a quotation when it is woven into the flow of the sentence.

Don't say "I can't do it" without trying.

No considerate person would say "Why should I care?" under such desperate circumstances.

The audience shouted "Bravo!" and "Encore!" at the end of Emanuel Ax's recital last night.

NOTE: In such cases do not use a period at the end of a quoted statement, but retain the question mark or the exclamation point at the end of a quoted question or exclamation (as illustrated in the examples above).

- 260** Do not use commas to set off a quotation that occurs within a sentence as an *essential* expression. (See ¶149.)

The luxurious practice of booking passage between England and India on the basis of "Port Outward, Starboard Homeward" (so as to get a cabin on the cooler side of the ship) was once thought to be the origin of the word *posh*.

The chapter entitled "Locating Sources of Venture Capital" will give you specific leads.

- 261** a. When a quotation occurs within a sentence as a *nonessential* expression, use a comma before the opening quotation mark and before the closing quotation mark.

His parting words, "I hardly know how to thank you," were sufficient.

The next chapter, "The Role of Government," further clarifies the answer.

- b. If the *nonessential* quoted matter requires a question mark or an exclamation point before the closing quotation mark, use a pair of dashes or parentheses (rather than commas) to set off the quoted matter.

Your last question—"How can we improve communications between departments?"—can best be answered by you.

RATHER THAN: Your last question, "How can we improve communications between departments?," can best be answered by you.

NOTE: When some or all of the quoted items in a series end with a question mark or an exclamation point, display them in a list to avoid the awkwardness of inserting commas before the quotation marks.

Next month's issue will feature the following articles:

"Will the Internet Replace Long-Distance Telephone Service?"

"Tax Law Changes—Again!"

"Are Business Cycles Obsolete?"

"Whither Wall Street?"

RATHER THAN: Next month's issue will feature the following articles: "Will the Internet Replace Long-Distance Telephone Service?," "Tax Law Changes—Again!," "Are Business Cycles Obsolete?," and "Whither Wall Street?"

¶262

- c. If *essential* quoted material ends with a question mark or an exclamation point and occurs within a sentence where a comma would ordinarily follow (for example, at the end of an introductory clause or phrase), omit the comma.

Although we were all asked last week to read an article entitled “Can U.S. Manufacturers Prosper in Today’s World Markets?” the topic was totally ignored in this week’s seminar.

RATHER THAN: ...an article entitled “Can U.S. Manufacturers Prosper in Today’s World Markets?,” the topic was ...

NOTE: If the omission of a comma at this point could lead to confusion, reword the sentence to avoid the problem.

We were all asked last week to read an article entitled “Can U.S. Manufacturers Prosper in Today’s World Markets?” Yet the topic was ...

OR: We were all asked last week to read an article entitled “Can U.S. Manufacturers Prosper in Today’s World Markets?”; yet the topic was ...

Punctuating Quoted Sentences With Interrupting Expressions

- 262** When a quoted sentence is interrupted by an expression such as *he asked* or *she said*, use a comma and a closing quotation mark before the interrupting expression and another comma after it. Then resume the quotation with an opening quotation mark, but do not capitalize the first word unless it is a proper noun, a proper adjective, or the pronoun *I*.

“During the past month,” the memo said in part, “we have received some welcome news from our overseas branches.”

“The only function of economic forecasting,” John Kenneth Galbraith once wisely observed, “is to make astrology look respectable.”

- 263** If the interrupting expression ends the sentence and the quotation continues in a new sentence, put a period after the interrupting expression and start the new sentence with an opening quotation mark and a capital letter.

“I think we should decline the invitation to the Lombardis’ reception,” Margaret said. “It would be better not to go than to arrive late.”

“I love being a writer,” said Peter De Vries. “What I can’t stand is the paperwork.”

“How many legs does a dog have if you call the tail a leg?” was a question posed by Abraham Lincoln. His answer? “Four. Calling a tail a leg doesn’t make it a leg.”

Punctuating Long Quotations

- 264** If a quotation consists of more than one sentence without any interrupting elements, use quotation marks only at the beginning and at the end of the quotation. Do not put quotation marks around each sentence within the quotation.

Here is the full text of the release he gave to the media: “I have decided to withdraw from the upcoming election. I have personal and family obligations that require my full attention. I want to thank my supporters for their enormous help.”

265 A long quotation that will make four or more lines may be handled in one of the following ways:

- a. Treat the quoted material as a single-spaced extract; this is the preferred style. Indent the extract a half inch from each side margin, and leave a blank line above and below the extract. Do not enclose the quoted material in quotation marks; the indentation replaces the quotation marks. If any quoted material appears within the extract, retain the quotation marks around this material. If the extract consists of more than one paragraph, leave a blank line between paragraphs. (See page 431 for an illustration of an extract in the body of a letter.)

NOTE: Ordinarily, start the quoted material flush left on the shorter line length; however, if a paragraph indentation was called for in the original, indent the first line of the quote a half inch. Indent the first line of any additional paragraphs a half inch also, but do not leave a blank line between indented paragraphs.

- b. Use the same line length and spacing for the quoted material as for other text material on the page.
 - (1) If the quoted material consists of one paragraph only, place quotation marks at the beginning and end of the paragraph. Use the normal paragraph indentation of a half inch.
 - (2) If the quoted material consists of two or more paragraphs, place a quotation mark at the start of each paragraph but at the end of only one paragraph—the last one.
 - (3) Change double quotation marks within the quoted material to single quotation marks, and vice versa. (See ¶¶245–246.)

“When you are writing a letter that grants a request, you can follow this pattern:
“First, express appreciation for the writer’s interest in the company’s product or service.
“Next, give the exact information requested and, if possible, additional information that
may be of interest.
“Finally, express willingness to ‘be of further help.’”

Quoting Letters

266 Letters and other business documents that are to be quoted word for word may be handled in one of the following ways:

- a. Make a printout, a photocopy, or a scanner copy of the material. In this case no quotation marks are used.
- b. If no reproduction equipment is available, type the material on a separate sheet of paper headed *COPY*. In this case no quotation marks are used.
- c. The material, if short, may be treated like a long quotation (see ¶265). If you use a shorter line length, omit the quotation marks. If you use the same line length as you do for other material on the page, then place the opening quotation mark before the first word and the closing quotation mark after the last word.

¶267**Quoting Poetry**

- 267** When quoting a complete poem (or an extended portion of one) in a letter or a report, type it line for line, single-spaced (except for stanza breaks). If the line length is shorter than that of the normal text above and below the poem, no quotation marks are needed; the poem will stand out sufficiently as an extract. If, however, quotation marks are needed to indicate the special nature of the material, place a quotation mark at the beginning of each stanza and at the end of only the last stanza. (See also ¶274.b.)

NOTE: As a rule, follow the poet's layout of the poem. If the poet uses an irregular pattern of indentation (instead of the customary practice of aligning all lines at the left), try to reproduce this layout.

- 268** A short extract from a poem is sometimes woven right into a sentence or a paragraph. In such cases use quotation marks at the beginning and end of the extract, and use a slash (with one space before and after) to indicate where each line breaks in the actual poem.

In a poem about the death of an American poet, Richard Wilbur refers scathingly to the more prominent notices given to a "cut-rate druggist, a lover of Giving, / A lender, and various brokers: gone from this rotten / Taxable world to a higher standard of living."

To describe the difficulty of writing, T. S. Eliot wrote, "Words strain, / Crack and sometimes break, under the burden, / Under the tension, slip, slide, perish, / Decay with imprecision, will not stay in place, / Will not stay still."

Quoting Dialogues and Conversations

- 269** When quoting dialogues and conversations, start the remarks of each speaker as a new paragraph, no matter how brief.

"Waiter, what was in that glass?"

"Arsenic, sir."

"Arsenic. I asked you to bring me absinthe."

"I thought you said arsenic. I beg your pardon, sir."

"Do you realize what you've done, you clumsy fool? I'm dying."

"I am extremely sorry, sir."

"I DISTINCTLY SAID ABSINTHE."

"I realize that I owe you an apology, sir. I am extremely sorry."

—Myles na Gopaleen

- 270** In plays, court testimony, and transcripts of conversations where the name of the speaker is indicated, quotation marks are not needed. (The following example is a fictitious account of a radio conversation supposedly released by the U.S. chief of naval operations.)

STATION 1: Please divert your course 15 degrees to the north to avoid a collision.

STATION 2: Recommend you divert YOUR course 15 degrees to the south to avoid a collision.

STATION 1: This is the captain of a U.S. Navy ship. I say again, divert YOUR course.

STATION 2: No, I say again, you divert YOUR course.

STATION 1: THIS IS THE AIRCRAFT CARRIER ENTERPRISE. WE ARE A LARGE WARSHIP OF THE U.S. NAVY. DIVERT YOUR COURSE NOW!

STATION 2: This is the Puget Sound lighthouse. It's your call.

The following rules (¶¶271–284) cover a number of stylistic matters, such as how to style quoted material (¶271), how to capitalize in quoted material (¶¶272–273), how to align quotation marks (¶274), how to handle omissions in quoted material (¶¶275–281), and how to handle insertions in quoted material (¶¶282–284).

Style in Quoted Material

271 In copying quoted material, follow the extract exactly with regard to punctuation, spelling, hyphenation, and number style. (See ¶284 for the use of *[sic]* to indicate errors in the original.)

Capitalization in Quoted Material

272 Ordinarily, capitalize the first word of every complete sentence in quotation marks.

I overheard Ellis mutter, “Only a fool would make such a claim.”

Here is the key sentence in her memo: “Despite the understaffing in the department, everyone is expected to meet the goals established for the coming year.”

NOTE: If the quoted sentence is preceded by *that* or is otherwise incorporated into the flow of a larger sentence, do not capitalize the first word (unless it is a proper noun, a proper adjective, or the pronoun *I*).

I overheard Ellis mutter that “only a fool would make such a claim.”

In essence, she says that “despite the understaffing in the department, everyone is expected to meet the goals established for the coming year.”

273 When quoting a word or phrase, do not capitalize the first word unless it meets at least one of these conditions:

a. The first word is a proper noun, a proper adjective, or the pronoun *I*.

No one is terribly impressed by what Jim calls his “Irish temper.”

b. The first word was capitalized in its original use.

I watched her scrawl “See me about this at once” at the bottom of the memo, and I could tell that your proposal was not going to fly.

c. The quoted word or phrase occurs at the beginning of a sentence.

“Outrageous” was the publisher’s reaction to Maxon’s attempt to duck the questions of the reporters. (Even if the expression was not capitalized in the original material, it is capitalized here to mark the start of the sentence.)

d. The first word represents a complete sentence.

The Crawleys said “Perhaps”; the Calnans said “No way.”

► See ¶¶278–279 on capitalizing the first word of an incomplete quote.

¶274

Aligning Quotation Marks

- 274** a. In a list, any opening quotation mark should align with the first letter of the other items.

I urge you to read the following materials (which I am sending to you under separate cover):

The PC Is Not a Typewriter by Robin Williams

“How Do I Make Type More Readable?” by Daniel Will-Harris

- b. In a poem, the opening quotation mark at the beginning of each stanza should clear the left margin so that the first letter of each line will align. (See ¶267.)

“So here I am, in the middle way, having had twenty years—
 Twenty years largely wasted, the years of *l'entre deux guerres*—
 Trying to learn to use words, and every attempt
 Is a wholly new start, and a different kind of failure
 Because one has only learnt to get the better of words
 For the thing one no longer has to say, or the way in which
 One is no longer disposed to say it. And so each venture
 Is a new beginning, a raid on the inarticulate
 With shabby equipment always deteriorating
 In the general mess of imprecision of feeling . . .”

—T. S. Eliot

NOTE: When a quoted extract is displayed beneath the title of a chapter or some other work, quotation marks are not necessary.

For all that has been, thanks.

For all that is yet to come, yes!

—Dag Hammarskjöld

► *For other examples of displayed quotations, see ¶212.*

Omissions in Quoted Material

- 275** If one or more words are omitted *within a quoted sentence*, use ellipsis marks (three spaced periods, with one space before and after each period) to indicate the omission.

“During the past fifty years . . . we have been witnessing a change in buying habits, particularly with respect to food.”

NOTE: Omit any marks of internal punctuation (a comma, a semicolon, a colon, or a dash) on either side of the ellipsis marks unless they are required for the sake of clarity.

ORIGINAL VERSION: “The objectives of the proposed bill are admirable, I will cheerfully concede; the tactics being used to gain support for the bill are not.”

CONDENSED VERSION: “The objectives of the proposed bill are admirable . . . ; the tactics being used to gain support for the bill are not.” (The comma preceding the omitted phrase is not needed; however, the semicolon following the omitted phrase must be retained for clarity.)

- 276** If one or more words are omitted *at the end of a quoted sentence*, use three spaced periods followed by the necessary terminal punctuation for the sentence as a whole.

“Can anyone explain why . . . ?” (The original question read, “Can anyone explain why this was so?”)

"During the past fifty years, starting in the mid-1950s, we have been witnessing a change in buying habits . . . Consumers have become more concerned with what's in the package rather than with the package itself." (The first three periods represent the omitted words "particularly with respect to food"; the fourth period marks the end of the sentence. One or two spaces follow before the next sentence; see ¶102.)

NOTE: If the quotation is intended to trail off, use only three spaced periods at the end of the sentence. (See also ¶291a.)

His reaction was, "If I had only known . . ."

- 277** If one or more sentences are omitted *between other sentences* within a long quotation, use three spaced periods *after* the terminal punctuation of the preceding sentence.

"During the past fifty years, starting in the mid-1950s, we have been witnessing a change in buying habits, particularly with respect to food. . . . How far this pattern of change will extend cannot be estimated."

NOTE: There is no space between *food* and the first period because that period marks the end of a sentence. The remaining three periods signify the omission of one or more complete sentences. One or two spaces follow before the next sentence.

- 278** If only a part of a sentence is quoted within another sentence, it is not necessary to use ellipsis marks to signify that words before or after the quoted part have been omitted.

According to Robertson's report, there has been "a change in buying habits" during the past fifty years.

Moreover, if the quotation as given can be read as a complete sentence, capitalize the first word in the quotation, even though this word was not capitalized in the original. (Compare *We* in the following example with *we* in the example in ¶277.)

According to Robertson's report, "We have been witnessing a change in buying habits, particularly with respect to food."

- 279** If a displayed quotation starts in the middle of a sentence, use three spaced periods at the beginning of the quotation.

According to Robertson's report, there has been

. . . a change in buying habits, particularly with respect to food. . . . How far this pattern of change will extend cannot be estimated.

If the fragment, however, can be read as a complete sentence, capitalize the first word of the fragment and omit the ellipsis marks. (Compare *Starting* in the following example with *starting* in the example in ¶277.)

According to Robertson's report:

Starting in the mid-1950s, we have been witnessing a change in buying habits, particularly with respect to food.

- 280** When a long quotation starts with a complete sentence and ends with a complete sentence, do not use three spaced periods at the beginning or the end of the quotation unless you need to emphasize that the quotation has been extracted from a larger body of material.

- 281** If one or more paragraphs are omitted within a long quotation, indicate the omission by adding three spaced periods *after* the terminal punctuation that concludes the preceding paragraph.

¶282

Insertions in Quoted Material

282 For clarity, it is sometimes necessary to insert explanatory words or phrases within quoted material. Enclose such insertions in brackets. (See also ¶296.)

Ms. Rae added, “During the first lawsuit [2009] there was no evidence of fraud.”

283 For special emphasis, you may wish to italicize words that were not so treated in the original. In such cases insert a phrase like *emphasis added* in brackets immediately after the italicized words or in parentheses immediately after the quotation.

In the course of testifying, she stated, “I never met Mr. Norman in my life, *to the best of my recollection*.” (Emphasis added.)

OR: . . . met Mr. Norman in my life, *to the best of my recollection* [emphasis added].”

NOTE: If the equipment you are using does not provide *italic type*, underline the words to be emphasized. (See ¶290 for guidelines on italics and underlining.)

284 When the original wording contains a misspelling, a grammatical error, or a confusing expression of thought, insert the term *sic* (meaning “so” or “this is the way it was”) in brackets to indicate that the error existed in the original material.

As he wrote in his letter, “I would sooner go to jail then [*sic*] have to pay your bill.”

An op-ed piece in our local paper said that many business executives these days are giving much higher priority to “their personal loves [*sic*].”

NOTE: When *sic* is used in this way, italicize the word but not the brackets that enclose it. If you do not have access to an italic font, do not underline *sic*.

► For simple interruptions such as he said or she said, see ¶¶262–263.

Italics and Underlining

IMPORTANT NOTE: Since *italic type* (the counterpart of underlining or underscoring) is provided in word processing and desktop publishing software, it is the preferred means of giving special emphasis to words and phrases and to the titles of literary and artistic works.

For Special Emphasis

285 a. A word referred to as a word is usually italicized or underlined. (Some writers prefer to enclose the word in quotation marks instead.) A word referred to as a word is often introduced by the expression *the term* or *the word*.

The term *muffin-choker* refers to a bizarre item in the morning newspaper that you read as you eat your breakfast.

A number of years ago a newspaper editor expressed his feelings about a certain word as follows: “If I see *upcoming* in the paper again, I will be *downdown* and the person responsible will be *outgoing*.”

If you used fewer compound sentences, you wouldn’t have so many *ands* [OR: *ands*] in your writing. (Only the root word is italicized or underlined, not the *s* that forms the plural.)

BUT: She refused to sign the contract because she said it had too many *ifs*, *ands*, or *butts*. (Neither italics nor underlining is required for the phrase *ifs*, *ands*, or *butts* because the writer is not referring literally to these words as words. The phrase means “too many conditions and qualifications.”)

- b.** Letters referred to as letters are usually italicized or underlined if they are not capitalized. In such cases underlining may be preferable since a single italic letter may not look sufficiently different to stand out.

dotting your i's (**OR:** *i*'s)

the three Rs

minding your p's and q's (**OR:** *p*'s and *q*'s)

three Bs and one C

solving for *x* when *y* = 3 (**OR:** for *x* when *y*)

BUT: to the *n*th degree

According to Albert Einstein, "If A is success in life, then A equals X plus Y plus Z. Work is X; Y is play; and Z is keeping your mouth shut."

- *For the plurals of letters such as i's and Rs, see ¶¶622–623.*

- c.** As a rule, do not use all-caps to give a word or phrase special emphasis. The use of all-caps for that purpose is typically overpowering. Indeed, the use of all-caps in e-mail messages is considered "shouting." In special circumstances, however, the use of all-caps may be justified.

It IS as bad as you think, and they ARE out to get you. (For other examples, see ¶¶269–270.)

- 286** In a formal definition, the word to be defined is usually italicized or underlined and the definition quoted. In this way the two elements may be easily distinguished.

The verb *prevaricate* (a polite way of saying "to lie") comes from the Latin word *praevericari*, which means "to go zigzag, to walk crookedly."

The Italian word *ciao* (which is used as an expression of greeting or farewell) literally means "I am your slave."

The French term *esprit d'escalier* literally means "the wit of the staircase" and refers to the witty retort or the perfect put-down one thinks of when going up to bed and not a few hours earlier when it could have been put to good use.

NOTE: An informal definition does not require any special punctuation.

Did you know that a zitcom is a situation comedy aimed at a teenage audience?

Thomas Hobson was an English stablekeeper who insisted that every customer take the horse nearest the door. Hence the term *Hobson's choice* means that you really have no choice at all. (Because the definition is informal, it does not have to be set off in quotation marks. However, *Hobson's choice* is italicized or underlined, as indicated in ¶285a, because the words are referred to as words.)

The word *blamestorming* refers to the process by which a group of people discuss why something went wrong and who's responsible.

Despite rumors to the contrary, a defibrillator is not a lie detector.

If a Rhode Island resident referred to a cabinet or a Boston resident referred to a frappe, would you know that they were each referring to a milkshake?

The term *voodoo statistics* refers to information that has been twisted to make bad results seem good. For example, in a race involving two contestants, the loser claims to have finished second and says that his or her opponent finished next to last.

- 287** Italicize or underline foreign expressions that are not considered part of the English language. (Use quotation marks to set off translations of foreign expressions.)

It's true, *n'est-ce pas?* (Meaning "isn't that so?")

I have tried to pace my life according to a German musical notation: *Langsam aber nicht schlepend.* (In other words, "Take it slowly but don't drag it.")

¶288

NOTE: Once a foreign expression has become established as part of the English language, italics or underlining is no longer necessary. (Most dictionaries offer guidance on this point.) Here are some frequently used expressions that do not need italics or any other special display:

à la carte	e.g. (see page 383)	magnum opus	pro tem
à la mode	en masse	mano a mano	quid pro quo
a priori	esprit de corps	maven	raison d'être
ad hoc	et al.	mensch	rendezvous
ad infinitum	etc. (see page 376)	modus operandi	repertoire
ad nauseam	ex officio	modus vivendi	résumé
aficionado	fait accompli	non sequitur	savoir faire
alfresco	fatwa	objet d'art	schadenfreude
alma mater	feng shui	ombudsman	simpatico
alter ego	habeas corpus	op. cit.	sine qua non
bona fide	hajj	per annum	status quo
carte blanche	ibid. (see ¶1543)	per capita	sudoku
caveat emptor	i.e. (see page 383)	per diem	summa cum laude
chutzpah	in absentia	per se	tchotchke
cul-de-sac	in toto	prima facie	tête-à-tête
de facto	jihad	prix fixe	tour de force
de jure	joie de vivre	pro forma	vice versa
double entendre	laissez-faire	pro rata	vis-à-vis

► For the use of accents and other diacritical marks with foreign words, see ¶718.

288 The names of ships, trains, airplanes, and spacecraft may be italicized for special display, but they are now commonly written simply with initial caps.

Queen Mary 2	the Boeing 787 Dreamliner
the Acela Express	the Airbus A380
the Atlantis space shuttle	the International Space Station

With Titles of Literary and Artistic Works

289 a. Italicize or underline titles of *complete* works that are published as separate items—for example, books, pamphlets, newsletters, long poems, magazines, and newspapers. Also italicize or underline titles of movies, plays, musicals, operas, ballets, individual videocassettes, DVDs, television and radio series, long musical pieces, paintings, and works of sculpture.

Our ads in *The Wall Street Journal* have produced excellent results.

OR: Our ads in *The Wall Street Journal* have produced excellent results.

Her letter appears in the latest issue of *Sports Illustrated*.

You will particularly enjoy a cookbook entitled *The Supper of the Lamb*.

Next Friday we will hear *Der Rosenkavalier*.

The painting that is popularly referred to as *Whistler's Mother* is actually entitled *Arrangement in Gray and Black No. 1*. (For a usage note on *entitled* and *titled*, see Section 11, page 375.)

NOTE: Do not italicize, underline, or quote the titles of musical pieces that are identified by form (for example, *symphony*, *concerto*, *sonata*) or by key (for example, *A major*, *B flat minor*). However, if a descriptive phrase accompanies this type of

title, italicize or underline this phrase if the work is long; quote this phrase if the work is short.

Beethoven's Sonata No. 18 in E flat minor, Op. 31, No. 3

Tchaikovsky's Symphony No. 6 in B flat minor (the *Pathétique*)

Chopin's Étude No. 12 (the "Revolutionary" Étude)

- b.** Titles of complete works may be typed in all-caps as an alternative to italics or underlining.

Every executive will find RIGHT ON TIME! a valuable guide.

NOTE: The use of all-caps is acceptable when titles occur frequently (as in the correspondence of a publishing house) or when the use of all-caps is intended to have an eye-catching effect. In other circumstances use italics or underlining.

- c.** In material that is being prepared for publication, titles of complete works must be italicized or underlined. This special display indicates that the title must appear in italics in the final version.

Every executive will find *Right on Time!* a valuable guide.

- d.** In titles of magazines, do not italicize, underline, or capitalize the word *magazine* unless it is part of the actual title.

Time magazine **BUT:** *Harper's Magazine*

- e.** In some cases the name of the publishing company is the same as the name of the publication. Italicize or underline the name when it refers to the *publication* but not when it refers to the *company*.

I saw her column in *BusinessWeek*. I wrote to *BusinessWeek* about a job.

Joe used to be *Fortune*'s management editor; now he works as a management consultant to half a dozen *Fortune* 500 companies.

By the same token, do not italicize or underline the name of a publication when it appears in an organizational name.

the Michigan Bar Journal **BUT:** the Michigan Bar Journal Advisory Board

- f.** Italicize or underline a subtitle (but not an edition number) that accompanies the main title of a book.

I think you'll find some good tips in *How to Make Money in Stocks: A Winning System in Good Times or Bad*, Third Edition.

- g.** Italicize or underline the titles of books, newspapers, and magazines that are published in electronic form.

Britannica Online (the electronic version of the *Encyclopaedia Britannica*)

Boston.com (the electronic version of *The Boston Globe*)

Wired Online (an electronic magazine based on *Wired*, a print magazine)

Slate, *Salon*, and *Feed.com* (electronic magazines, also referred to as e-zines or Web zines)

NOTE: While some publications that appear in electronic as well as print form use a different title for each format, other publications use the same title for both formats.

The New York Times (the electronic version of *The New York Times*)

Continued on page 96

¶290

- h.** Do not italicize or underline the titles of video games or any other types of games, no matter how artistic or creative they may appear to be. Simply capitalize these titles. (See ¶365d.)

Pokemon Diamond	Monopoly
Super Paper Mario	Scrabble
Wii Fit	Whac-A-Mole
Babyz for Windows	Rock-Paper-Scissors

- i.** Do not italicize or underline the titles of computer software. (See ¶365c.)

Google Earth	Adobe Reader
YouMail	GraphicConverter
Quicken Online	Microsoft Office Professional

► For the use of quotation marks with titles of literary and artistic works, see ¶¶242–244; for the treatment of titles of sacred works, see ¶350.

Guidelines for Italics and Underlining

290

Italicize or underline as a unit whatever should be grasped as a unit—individual words, titles, phrases, or even whole sentences. For reasons of appearance or ease of execution, the guidelines for italicizing differ slightly from those of underlining.

- a.** When you want to give special emphasis to a unit consisting of two or more words, be sure to italicize or underline the entire unit, including the space between words.

I would not use the phrase *in a nutshell* in the sentence where you sum up your feelings about the place where you work.

OR: I would not use the phrase in a nutshell in the sentence . . .

- b.** It has been traditional to italicize any punctuation that follows an italicized word. A new guideline directs writers to use the same style for the punctuation as for the main text. If the main text is set in roman, then the punctuation should also be set in roman, even when it follows an italicized word.

OLD STYLE: . . . as reported in *BusinessWeek*: to begin with . . .

NEW STYLE: . . . as reported in *BusinessWeek*: to begin with . . .

OLD STYLE: . . . according to *Time*; on the other hand . . .

NEW STYLE: . . . according to *Time*; on the other hand . . .

OLD STYLE: . . . joined by a coordinating conjunction (*and, but, or, or nor*).

NEW STYLE: . . . joined by a coordinating conjunction (*and, but, or, or nor*).

There is one exception to the new guideline on italics. Even when the main text is set in roman, the punctuation that follows an italicized element should also be set in italics if that punctuation is an integral part of that element.

Have you seen the write-up in *Newsweek*?

BUT: Tryouts for *Who's Afraid of Virginia Woolf?* will start next Monday.

We were crazy about the new production of *Much Ado About Nothing*!

BUT: The producer has decided to cancel the revival of *Oklahoma!*

Here's what I like about the new translation of *The Odyssey*: it has . . .

BUT: Have you read *The Measure of a Man: A Spiritual Autobiography*?

NOTE: The punctuation following a boldface item should be in boldface. Thus the colon that follows “**NOTE**” at the start of this paragraph is also set in boldface. By the same token, the punctuation that follows a boldface run-in head should also be set in boldface. (See ¶108 for examples.)

► For the use of italics with parentheses and brackets, see ¶290f–g.

- c. When using *underlining* to give special emphasis to words or phrases in a series, underline only the terms themselves and not any punctuation that intervenes or follows.

Ipsa facto, sine qua non, and pro forma: these are the kinds of expressions . . .

Have you ever read Moby-Dick or War and Peace?

EXCEPTION: This week the Summertime Playhouse is presenting Oklahoma!, next week Where's Charley?, and the following week My Fair Lady. (The exclamation point and the question mark are underlined in this sentence because they are an integral part of the material to be emphasized; however, the commas and the sentence-ending period are not.)

NOTE: Although run-in headings are now commonly typed in boldface (as illustrated in ¶¶108a and 1426), they may be underlined as an alternative. If underlining is used, do not underline the punctuation that follows the heading.

Insuring Your Car. Automobile insurance is actually a package of six different types of coverage . . .

How Much Will It Cost? How much automobile insurance will cost you depends on your driving record, your age, and how much shopping . . .

- d. Do not italicize or underline a possessive or plural ending that is added on to a word being emphasized.

the *Times-Picayune*'s editorial too many *whereases*

OR: the Times-Picayune's editorial **OR:** too many whereases

- e. When giving special emphasis to an element that has to be divided at the end of a line, italicize or underline the dividing hyphen as well.

For a Wall Street exposé with “the suspense of a first-rate thriller,” read *Barbarians at the Gate*.

OR: For a Wall Street exposé with “the suspense of a first-rate thriller,” read Barbarians at the Gate.

- f. It has been traditional to italicize parentheses when the first and last words they enclose are italicized. A new guideline directs writers to use the same style for the parentheses as for the main text. If the main text is set in roman, then the parentheses should also be set in roman.

OLD STYLE: . . . joined by a coordinating conjunction (*and*, *but*, *or*, or *nor*).

NEW STYLE: . . . joined by a coordinating conjunction (*and*, *but*, *or*, or *nor*).

- g. Brackets are not italicized, even when they enclose italicized words; for example, [sic]. (See ¶284, note.)

¶291

Other Marks of Punctuation

Ellipsis Marks (. . .)

291 Ellipsis marks are three spaced periods, with one space before and after each period.

- a. As a general rule, do not use ellipsis marks in place of a period at the end of a sentence. However, ellipsis marks may be used to indicate that a sentence trails off before the end. The three spaced periods create an effect of uncertainty or suggest an abrupt suspension of thought. (No terminal punctuation is used with ellipsis marks in this kind of construction.)

He could easily have saved the situation by . . . But why talk about it?

► *For the use of ellipsis marks to indicate omissions in quoted material, see ¶¶275–281.*

- b. Ellipsis marks are often used in advertising to display individual items or to connect a series of loosely related phrases.

Where can you match these services?

- ... Free ticket delivery
- ... Flight insurance
- ... On-time departures

The Inn at the End of the Road . . . where you may enjoy the choicest offerings . . . by reservation only . . . closed Tuesdays.

- c. Ellipsis marks may also be used to signify a deliberate pause for a deliberate effect.

George Bernard Shaw to Winston Churchill: “I am enclosing two tickets to the first night of my new play. Bring a friend . . . if you have one.”

Winston Churchill, responding to Shaw: “Cannot possibly attend first night; will attend second . . . if there is one.”

The Asterisk (*)

292 The asterisk may be used to refer the reader to a footnote placed at the bottom of a page or a table. (See ¶¶1502f, 1636c.)

- a. When the asterisk and some other mark of punctuation occur together within a sentence, the asterisk *follows* the punctuation mark, with no intervening space. (See also ¶1502b.)
- b. In the footnote itself, leave no space after the asterisk.

293 Asterisks are used to replace words that are considered unprintable.

If the TV cameras had been present when Finney called Schultz a ***** (and about 50 other names as well), tonight’s newscast would have contained the longest bleep in television history.

The Slash (/)

294 a. The slash (also referred to as the diagonal) occurs in certain abbreviations and expressions of time. (See also ¶436b.)

9/11 (see ¶408e) B/S bill of sale w/ with
 24/7 c/o care of n/30 net amount due in 30 days

The copy deadline for the fall '11/winter '12 catalog is April 15.

Please check the figures for fiscal year 2011/12.

I'm concerned about the company's P/E ratio. (Referring to the price/earnings ratio of a company's stock.)

BUT: The code 10-4 means "message received" or "okay"; 10-9 means "repeat." (A hyphen rather than a slash is used to connect the numbers in the ten-codes often used in CB [Citizens Band] radio transmissions.)

- b.** As a general rule, do not leave any space on either side of a slash, as shown in the examples above or in ¶295 below. (See ¶268 for an exception.)
- c.** Try to avoid dividing an expression at the end of a line if the expression contains a slash. If absolutely necessary, type the slash at the end of the line (rather than at the start of a new line).

NOT: a go
 /no-go decision

ACCEPTABLE: a go/
 no-go decision

BETTER: a
 go/no go decision

NOTE: There is one exception to this guideline: If you must divide a URL at the point where a slash occurs, divide before the slash, not after. (See ¶1510a; see also ¶291n.)

295 a. The slash is used to express alternatives.

read/write files	an AM/FM tuner
an on/off switch	an either/or proposition
a go/no-go decision	meet on Monday and/or Tuesday
input/output systems	(see a usage note for <i>and/or</i> on page 363)

- b.** The slash may be used to indicate that a person has two functions or a thing has two closely related components.

a client/server network	zoned for commercial/industrial activities
a Time/CNN poll	planning to hold a dinner/dance

NOTE: A number of similar expressions typically make use of a hyphen rather than a slash. (See ¶¶806, 818b.)

- c.** The slash is also used in writing fractions (for example, 4/5) and in some code and serial numbers (for example, 2S/394756).
- d.** The slash is used on both sides of the letter *s*—/s—to signify that a stamped or printed signature has been used in place of the handwritten signature that appears on the original document. In effect, /s/ stands for "original signed by."

/s/ Matilda LaBranche

NOTE: A slash often appears in the following expressions: *he/she*, *his/her*, *him/her*, and *s/he*. All of these expressions should be avoided; for alternatives, see ¶1052a. In addition, the legalistic term *and/or* should be avoided in ordinary writing. (See also the usage note on page 363.)

► *For the use of the slash when quoting poetry, see ¶268; for the use of the slash in telephone numbers, see ¶454c.*

¶296

Brackets ([])

- 296** a. A correction or an insertion in a quoted extract should be enclosed in brackets. (See also ¶¶282–284.)

The transcript of his testimony contains this incredible statement: “I did not approach Commissioner Zajac *at any time* [emphasis added] while my petition was being considered.”

“If we all pull together, we can bring a new level of political leadership to this state. [Extended applause.] Please give me your support in this campaign.” (Note the capitalization of *Extended* and the use of a period before the closing bracket when the bracketed element is treated as a separate sentence. See also ¶¶226, 283.)

As Herb Caen once shrewdly observed, “For a doryphore [someone who derives great pleasure from pointing out the errors of others], what is more delightful than a mistake in a correction?”

- b. When a parenthetical element falls within another parenthetical element, enclose the smaller element in brackets and enclose the larger element in parentheses.

Scalzo said on television yesterday that prices would begin to fall sharply. (However, in an article published in the *Times* [May 15, 2007], he was quoted as saying that prices would remain steady for the foreseeable future.)

- c. Do not italicize brackets even if what they enclose is in italics.

His final request was this: “Please keep me apprised [*sic*] of any new developments.” (See ¶284, note.)

Angle Brackets (< >)

- 297** a. Use angle brackets to set off Web site and e-mail addresses when they appear within sentences or in bibliographical notes and citations. When an address is set off in this way, any punctuation that precedes or follows cannot be mistaken as part of the address. (See ¶1536.)

For that information, please consult the publisher’s Web site: <www.mcgraw-hill.com>.

NOTE: If you are writing for knowledgeable readers who are accustomed to dealing with URLs, angle brackets are unnecessary and may be omitted. But for the general reader, it is safer to continue to use them. (See ¶1511c.)

- b. If a URL is presented as a parenthetical element set off in parentheses, omit the angle brackets.

If you consult the publisher’s Web site (<http://www.mcgraw-hill.com>), you will find the information you are looking for.

- c. Angle brackets may also be used to set off abbreviations and other elements when it is necessary to clarify whether a mark of punctuation is part of the element or part of the sentence punctuation.

Do a global search and replace every <L.B.J> with <LBJ>.

The USPS abbreviation for Arkansas is <AR>.

The Apostrophe (')

298 The apostrophe is a versatile mark of punctuation that comes in three styles: *curly* ('), *slanted* ('), and *straight* ('). The font you select will determine the style of apostrophe to be used. If you wish, you can switch from the default style to an alternative style by accessing an extended character set. (See the important note that precedes ¶227.)

The apostrophe may be used:

- As a single *closing* quotation mark. (See ¶¶245–246, 247b, 248b, 249d, 250b, 265b[3].)

NOTE: The straight apostrophe (') may also be used as a single *opening* quotation mark. The curly and slanted styles use different symbols for a single opening quotation mark (‘ and ’).

- To indicate the omission of figures in dates. (See ¶¶412, 505g, 624a.)
- As a symbol for feet. (See ¶¶432, 543.) Use either the slanted or straight apostrophe for this function (but not the curly style).
- To form contractions. (See ¶505.)

NOTE: Do not confuse an apostrophe used to indicate a contraction or possession with a single quotation mark. When a sentence requires the use of a period or a comma, this punctuation should precede the single quotation mark but should follow an apostrophe that signifies a contraction or possession.

Garrison Keillor has written new lyrics to the tune of “Ain’t Misbehavin’.” (The period follows the apostrophe that signifies a contraction but precedes the closing quotation mark. See also ¶247c.)

When Craig writes, “From now on in the evenings, you can reach me at the Hendersons;” do you think that means he has broken up with Doris? (The comma follows the apostrophe that signifies possession but precedes the closing quotation mark.)

The article states, “When Winston Churchill wanted to label something a lie without baldly calling it a lie, he referred to it as a ‘terminological inexactitude.’” (The period precedes an apostrophe used as a single quotation mark. Note that a space has been inserted between the single and double quotation marks to keep them distinct. See also ¶245.)

► *For guidance on how to type an apostrophe at the beginning of a word (Shake ‘n Bake) or a figure (the class of ‘08), see ¶505g.*

- To form the plurals of letters, abbreviations, figures, and words in a few special cases. (See ¶¶622–625.)
- To form possessives. (See ¶¶247c, 627–653.)
- To form expressions derived from all-cap abbreviations. (See ¶551.)

¶299

Spacing With Punctuation Marks

299 The following guidelines provide a handy summary of the number of spaces to be left before and after marks of punctuation.

IMPORTANT NOTE: When you are offered a choice of one or two spaces following a mark of punctuation at the end of a sentence, choose one space as a rule unless two spaces are needed to create an adequate visual break between sentences. For a fuller discussion of this topic as well as a number of helpful illustrations, see ¶102.

a. Period (.)

No space *before*.

One or two spaces *after* the end of a sentence. (See ¶¶102, 1433e.)

One or two spaces *after* a period when it follows a number or letter that indicates an enumeration. (See ¶106.)

One space *after* an abbreviation within a sentence. (See also ¶511.)

No space *after* a decimal point.

No space *after* when another mark of punctuation follows the period (for example, a closing quotation mark; a closing parenthesis; a closing dash, a comma, a semicolon, or a colon following an “abbreviation” period).

b. Question Mark (?) or Exclamation Point (!)

No space *before*.

One or two spaces *after* the end of a sentence. (See ¶102.)

One space *after* a question mark within a sentence. (See ¶¶116–117.)

No space *after* when another mark of punctuation follows (for example, a closing quotation mark, a closing parenthesis, or a closing dash).

c. Comma (,)

No space *before*.

One space *after* unless a closing quotation mark follows the comma.

No space *after* a comma within a number.

d. Semicolon (;)

No space *before*; one space *after*.

e. Colon (:)

No space *before*.

No space *before* or *after* in expressions of time (*8:20 p.m.*), in proportions (*2:1*), or in reference initials (*EJN:GPL*).

One or two spaces *after* within a sentence. (See ¶187a, note.)

One or two spaces *after* reference notations, attention and subject lines, enclosure and copy notations, and postscripts. (See ¶194b.)

Two or more spaces *after* displayed guide words in memos (*TO:*, *FROM:*, *DATE:*) and in other business documents (*SHIP TO:*, *BILL TO:*). (See ¶194c.)

f. Em Dash (—)

No space *before* or *after* an em dash. (See ¶216a.)

No space *before*, *between*, or *after* hyphens used to represent an em dash.

One or two spaces *after* an em dash at the end of a statement that breaks off abruptly. (See ¶¶102, 207–208.)

g. Hyphen (-)

No space *before*; no space *after* except with a suspending hyphen or a line-ending hyphen. (See also ¶¶832, 833d.)

h. Opening Parenthesis (() or Bracket ([]) or Angle Bracket (<)

One space *before* when parenthetical material is within a sentence.

One or two spaces *before* when parenthetical material follows a sentence. In this case the parenthetical material starts with a capital letter and closes with its own sentence punctuation. (See ¶¶226, 296.)

No space *after*.

NOTE: In special cases, space may be omitted before an opening parenthesis. For examples, see ¶¶118 and 626.

i. Closing Parenthesis ()) or Bracket (]) or Angle Bracket (>)

No space *before*.

One space *after* when parenthetical material is within a sentence.

One or two spaces *after* when parenthetical material is itself a complete sentence and another sentence follows. (See ¶¶102, 226, 296, 297.)

No space *after* if another mark of punctuation immediately follows.

j. Opening Quotation Mark (“)

One or two spaces *before* when quoted material starts a new sentence or follows a colon.

No space *before* when a dash or an opening parenthesis precedes.

One space *before* in all other cases.

No space *after*.

k. Closing Quotation Mark (")

No space *before*.

One or two spaces *after* when quoted material ends the sentence. (See ¶102.)

No space *after* when another mark of punctuation immediately follows (for example, a semicolon or colon).

One space *after* in all other cases.

¶299

l. Opening Single Quotation Mark (')

One space *before* when a double quotation mark immediately precedes.

One or two spaces *before* when the material within single quotation marks follows a colon *and* is not immediately preceded by a double quotation mark.

One or two spaces *before* when the material within single quotation marks begins a new sentence and is not immediately preceded by a double quotation mark.

No space *after*.

m. Closing Single Quotation Mark (')

No space *before*.

One space *after* when a double quotation mark immediately follows.

No space *after* when some other mark of punctuation immediately follows. (See ¶¶245–246, 247b, 248b, 249d, 250b, 265b[3], 298a.)

One or two spaces *after* when the material within the single quotation marks ends a sentence and another sentence follows within the quotation. (See ¶102.)

One space *after* in all other cases.

n. Apostrophe (')

No space *before*, either within a word or at the end of a word.

One space *after* only if it is at the end of a word within a sentence.

No space *after* when another mark of punctuation immediately follows (for example, a comma or a period).

o. Ellipsis Marks (. . .)

One space *before* and *after* each of the three periods within a sentence. (See ¶¶275–276.)

No space *before* when an *opening* quotation mark precedes ellipsis marks.

No space *after* when a *closing* quotation mark follows ellipsis marks. (See ¶276, note.)

One or two spaces *after* ellipsis marks that follow a period, a question mark, or an exclamation point at the end of a sentence. (See ¶102 and the example in ¶277.)

p. Asterisk (*)

No space *before* an asterisk following a word or punctuation mark within a sentence or at the end of a sentence.

One or two spaces *after* an asterisk at the end of a sentence. (See ¶102.)

One space *after* an asterisk following a word or punctuation mark within a sentence.

No space *after* an asterisk in a footnote. (See ¶292.)

q. Slash(/)

No space *before* or *after* a slash. (See ¶268 for an exception.)

SECTION 3

Capitalization

Basic Rules (¶¶301–310)

First Words (¶¶301–302)

Proper Nouns (¶¶303–306)

Common Nouns (¶¶307–310)

Special Rules (¶¶311–366)

Personal Names (¶311)

Titles With Personal Names (¶¶312–317)

Family Titles (¶¶318–319)

Names of Organizations (¶¶320–324)

Names of Government Bodies (¶¶325–330)

Names of Places (¶¶331–337)

Points of the Compass (¶¶338–341)

Days of the Week, Months, Holidays, Seasons, Events, and Periods (¶¶342–345)

Acts, Laws, Bills, and Treaties (¶346)

Intercaps (¶366)

► For definitions of grammatical terms, see the appropriate entries in the *Glossary of Grammatical Terms* (Appendix A).

¶301

The function of capitalization is to give distinction, importance, and emphasis to words. Thus the first word of a sentence is capitalized to indicate distinctively and emphatically that a new sentence has begun. Proper nouns like *George*, *Chicago*, *General Motors*, *the Parthenon*, *January*, and *Friday* are capitalized to signify the special importance of these words as the official names of particular persons, places, and things. A number of words, however, may function either as proper nouns or as common nouns—for example, terms like *the company* or *the board of directors*. For words like these, capitalization practices vary widely, but the variation merely reflects the relative importance each writer assigns to the word in question.

Despite disagreements among authorities on specific rules, there is a growing consensus against overusing capitalization—a practice that could properly be considered a capital offense. Indeed, the use of all-capital letters in e-mail messages is considered the equivalent of shouting. Those who are forced to read messages typed that way would be justified in considering this a form of capital punishment.

When too many words are emphasized, none stand out. The current trend, then, is to use capitalization more sparingly—to give importance, distinction, or emphasis only when and where it is warranted.

The following rules of capitalization are written with ordinary situations in mind. If you work or study in a specialized field, you may find it necessary to follow a different style.

► *For a perspective on the rules of capitalization, see the essay in the frontmatter on pages xxvii–xxix.*

NOTE: In the guidelines throughout this manual, the verb *capitalize* means to treat only the first letter of a word as a capital letter (for example, *Society*). The verb *lowercase* means that none of the letters in a word are to appear as capital letters (for example, *society*). A word in which every letter is capitalized is said to appear in *all-capital letters* or *all-caps* (for example, *SOCIETY*); if this word is executed in boldface type, it is said to appear in *bold caps* (for example, ***SOCIETY***). A phrase in which the first letter of each key word is capitalized is said to appear in *caps and lowercase* (for example, *the American Society for Training and Development*).

Basic Rules

First Words

301 Capitalize the first word of:

- a. Every sentence. (See ¶302 for exceptions.)

Try to limit each of your e-mail messages to one screen.

Will you be able to pull everything together by then?

The deadline we have been given is absolutely impossible!

- b. An expression used as a sentence. (See also ¶¶101b–c, 111, 119a, 120.)

So much for that.	Really?	No!
-------------------	---------	-----

Enough said.	How come?	Congratulations!
--------------	-----------	------------------

- c. A quoted sentence. (See also ¶¶272–273.)

Mrs. Eckstein herself said, “We surely have not heard the complete story.”

d. An independent question within a sentence. (See also ¶¶115–117.)

The question is, Whose version of the argument shall we believe?

BUT: Have you approved the divisional sales forecasts? the expense projections? the requests for staff expansion? (See ¶117.)

e. Each item displayed in a list or an outline. (See also ¶¶107, 1345c, 1721d.)

Here is a powerful problem-solving tool that will help you:

- Become an effective leader.
- Improve your relations with subordinates, peers, and superiors.
- Cope with stressful situations on the job.

f. Each line in a poem. (Always follow the style of the poem, however.)

From wrong to wrong the exasperated spirit
Proceeds, unless restored by that refining fire
Where you must move in measure, like a dancer.
—T. S. Eliot

g. The salutation and the complimentary closing of a letter. (See also ¶¶1338f, 1346b.)

Dear Mrs. Pancetta: Sincerely yours,

302

a. When a sentence is set off by *dashes* or *parentheses* within another sentence, do not capitalize the first word following the opening dash or parenthesis unless it is a proper noun, a proper adjective, the pronoun *I*, or the first word of a quoted sentence. (See ¶¶214, 224–225 for examples.)

b. Do not capitalize the first word of a sentence following a colon except under certain circumstances. (See ¶¶196–199.)

c. Whenever possible, rewrite a sentence to avoid beginning with a name that starts with a lowercase letter—for example, *eBay*, *iPod*.

AVOID: eBay was founded in September 1995 to provide a global trading platform where practically anyone can trade practically anything.

REWRITE: Founded in September 1995, eBay serves to provide a global trading platform where practically anyone can trade practically anything.

NOTE: If rewriting the sentence is not an option, begin these names with a capital letter—for example, *EBay*, *IPod*.

► *For the treatment of these names in headings and titles, see ¶363c.*

Proper Nouns

303

Capitalize every *proper noun*, that is, the official name of a particular person, place, or thing. Also capitalize the pronoun *I*.

William H. Gates III

Wednesday, February 8

Baton Rouge, Louisiana

the Great Depression

Sun Microsystems

the Civil Rights Act of 1964

the Red Cross

the Japanese

the Internet (**OR:** the Net)

Jupiter and Uranus

the University of Chicago

French Literature 212

the Statue of Liberty

a Xerox copy

¶304

the Center for Science in
the Public Interest
a Pulitzer Prize
Microsoft Word
Google and Yahoo!

Gone With the Wind
the Smithsonian Institution
United Farm Workers of America
Flight 403
the House of Representatives

NOTE: Prepositions (like *of*, *for*, and *in*) are not capitalized unless they have four or more letters (like *with* and *from*). (See also ¶¶360–361.) The articles *a* and *an* are not capitalized; the article *the* is capitalized only under special circumstances. (See ¶324.) Conjunctions (like *and* and *or*) are also not capitalized. However, follow the capitalization style used by the owner of the name.

Book-of-the-Month Club	3-IN-ONE oil
Books In Print	Bit-O-Honey
Books on Tape	SpaghettiOs
Chock full o'Nuts	Dollar Rent A Car
Easy-Off oven cleaner	Etch A Sketch
Snap-on tools	Hide-A-Bed
Plug-ins	One A Day vitamins
Pull-Ups	Rice-A-Roni

304 Capitalize adjectives derived from proper nouns.

America (n.), American (adj.)	Machiavelli (n.), Machiavellian (adj.)
Glasgow (n.), Glaswegian (adj.)	Hemingway (n.), Hemingwayesque (adj.)

EXCEPTIONS: Congress, congressional; the Senate, senatorial; the Constitution (U.S.), constitutional (see also ¶306)

305 Capitalize imaginative names and nicknames that designate particular persons, places, or things. (See ¶¶333–335 for imaginative place names; see ¶344 for imaginative names of historical periods.)

the Founding Fathers	a Big Mac
the First Lady	McMansion
the White House	the Establishment
the Oval Office	the Lower 48
the Stars and Stripes	El Niño and La Niña
Air Force One	the Western Wall
the Black Caucus	Gen X (the generation born in the 1960s and 1970s)
the Gopher State (Minnesota)	Gen Y (the generation born in the 1980s and 1990s)
BUT: red states and blue states	the Millennial Generation OR: the Millennials
every state in the Union	(alternative terms referring to those born in the 1980s and 1990s)
Mother Nature	Amber Alert
the Queen Bee	Ground Zero (the site of the World Trade Center)
Smokey Bear	the Big Enchilada
Whoopi Goldberg	the Big Kahuna
Mr. Nice Guy	Big Brother (intrusive big government)
a Good Samaritan	BUT: my big brother
Fannie Mae (see ¶524b)	
the Middle Ages	
BUT: the space age	

306 Some expressions that originally contained or consisted of proper nouns or adjectives are now considered common nouns and should not be capitalized. (See ¶309b.)

charley horse	napoleon	ampere	texas leaguer
plaster of paris	boycott	watt	arabic numbers
manila envelope	diesel	joule	roman numerals
bone china	macadam	kelvin	BUT: Roman laws

NOTE: Check an up-to-date dictionary or style manual to determine capitalization for words of this type.

Common Nouns

307 A *common noun* names a class of things (for example, *books*), or it may refer indefinitely to one or more things within that class (*a book*, *several books*). Nouns used in this way are considered general terms of classification and are often modified by indefinite words such as *a*, *any*, *every*, or *some*. Do not capitalize nouns used as general terms of classification.

a company	every board of directors
any corporation	some senators

NOTE: When circumstances warrant, capitalization may be used to give special emphasis to a common noun, but this approach should not be overused.

ORDINARY USAGE: Many of these politicians tend to view the press as *the enemy*.

FOR SPECIAL EMPHASIS: Many of these politicians tend to view the press as *The Enemy*.

ORDINARY USAGE: How will *corporate America* react to these new tax proposals?

FOR SPECIAL EMPHASIS: How will *Corporate America* react to these new tax proposals?

ORDINARY USAGE: If you move to Maine, people who were born there are likely to refer to you as *someone from away*.

FOR SPECIAL EMPHASIS: If you move to Maine, people who were born there are likely to refer to you as *Someone From Away*.

308 A common noun may also be used to name a *particular* person, place, or thing. Nouns used in this way are often modified (a) by *the*, *this*, *these*, *that*, or *those* or (b) by possessive words such as *my*, *your*, *his*, *her*, *our*, or *their*. Do not capitalize a general term of classification, even though it refers to a particular person, place, or thing.

COMMON NOUN: our doctor	the hotel	the river
PROPER NOUN: Dr. Tsai	Hotel Algonquin	the Colorado River

NOTE: Do not confuse a general term of classification with a formal name.

Logan Airport (serving Boston) the U.S. Postal Service

BUT: the Boston airport **BUT:** the post office

309 a. Capitalize a common noun when it is part of a proper name but not when it is used alone in place of the full name. (For exceptions, see ¶310.)

Professor Perry	BUT: the professor
the Goodall Corporation	the corporation
the Easton Municipal Court	the court
Sunset Boulevard	the boulevard
the Clayton Antitrust Act	the act

¶310

NOTE: Also capitalize the plural form of a common noun in expressions such as *the Republican and the Democratic Parties, Main and Tenth Streets, the Missouri and Ohio Rivers, and the Atlantic and Pacific Oceans*.

- b. In a number of compound nouns, the first element is a proper noun or a proper adjective and the second element is a common noun. In such cases capitalize only the first element, since the compound as a whole is a common noun.

a Rhodes scholar	a Dutch oven	Wedgwood blue	Canada geese
a Ferris wheel	Danish pastry	Prussian blue	(NOT: Canadian geese)
Labrador retriever	French doors	BUT: Deep Blue (IBM's	Botts dots (highway
Tex-Mex cooking	BUT: french fries	chess-playing computer)	lane markers)

NOTE: Check an up-to-date dictionary or style manual for words of this type. After extensive usage the proper noun or adjective may become a common noun and no longer require capitalization. (See ¶306.)

- 310** Some *short forms* (common-noun elements replacing the complete proper name) are capitalized when they are intended to carry the full significance of the complete proper name. It is in this area, however, that the danger of overcapitalizing most often occurs. Therefore, do not capitalize a short form unless it clearly warrants the importance, distinction, or emphasis that capitalization conveys. The following kinds of short forms are commonly capitalized:

PERSONAL TITLES: Capitalize titles replacing names of high-ranking national, state, and international officials (but not ordinarily local officials or company officers). (See ¶313.)

ORGANIZATIONAL NAMES: Do not capitalize short forms of organizational names except in formal or legal writing. (See ¶321.)

GOVERNMENTAL NAMES: Capitalize short forms of names of national and international bodies (but not ordinarily state or local bodies). (See ¶¶326–327, 334–335.)

PLACE NAMES: Capitalize only well-established short forms. (See ¶¶332, 335.)

NOTE: Do not use a short form to replace a full name unless the full name has been mentioned earlier or will be understood from the context.

Special Rules

Personal Names

- 311** a. Treat a person's name—in terms of capitalization, spelling, punctuation, and spacing—exactly as the person does.

Alice Mayer	Charles Burden Wilson
Alyce Meagher	L. Westcott Quinn
Steven J. Dougherty, Jr.	R. W. Ferrari
Stephen J. Dockerty Jr.	Peter B. J. Hallman

NOTE: It is commonly assumed that *e. e. cummings* was the poet's preferred way of spelling his name. He actually wrote his name *E. E. Cummings*.

► For the treatment of initials such as FDR, see ¶516b–c; for the use or omission of commas with terms such as Jr., see ¶156.

- b.** Respect individual preferences in the spelling of personal names.

Katharine Hepburn	Alan Greenspan	Ginger Rogers
Katherine Mansfield	Edgar Allan Poe	Richard Rodgers
Catherine T. MacArthur	Allen Ginsberg	Mister Rogers
Nicolas Cage	Kate Winslet	Dolly Parton
St. Nicholas	Cate Blanchett	Dolley Madison
Ann Landers	Steven Spielberg	Marian Anderson
Anne Frank	Stephen Sondheim	Marianne Moore

- c.** In names containing the prefix *O'*, always capitalize the *O* and the letter following the apostrophe; for example, *O'Brian* or *O'Brien*.
- d.** Watch for differences in capitalization and spacing in names containing prefixes like *d'*, *da*, *de*, *del*, *della*, *di*, *du*, *l'*, *la*, *le*, *van*, and *von*.

D'Amelio, d'Amelio, Damelio	deLaCruz, DeLacruz, Dela Cruz, DelaCruz
LaCoste, Lacoste, La Coste	VanDeVelde, Van DeVelde, vandeVelde

NOTE: If you are using only a surname when referring to a person with a prefixed last name, it is customary to retain the prefix. However, when the surnames of famous people stand alone, they do not always conform to this guideline.

Vincent van Gogh	Van Gogh (note the capitalized <i>V</i>)
Ludwig van Beethoven	Beethoven
Charles de Gaulle	de Gaulle (note the lowercase <i>d</i>)
Alexis de Tocqueville	Tocqueville

- e.** When a surname with an uncapitalized prefix stands alone (that is, without a first name, a title, or initials preceding it), capitalize the prefix to prevent a misreading.

Paul de Luca Mr. de Luca P. de Luca **BUT:** Is De Luca leaving?

NOTE: If there is no risk of misreading (for example, when the person's name is well known), it is not necessary to capitalize the prefix except at the beginning of a sentence.

Charles *de Gaulle* served for many years as . . . When he retired, *de Gaulle* . . .

BUT: De Gaulle served for many years as . . .

- f.** When names that contain prefixes are to be typed in all-caps, follow these principles: If there is no space after the prefix, capitalize only the initial letter of the prefix. If space follows the prefix, capitalize the entire prefix.

NORMAL FORM:	MacDonald	Mac Donald
ALL-CAPS FORM:	MacDONALD	MAC DONALD

- g.** Capitalize both elements of a hyphenated surname. (For the use of a hyphenated surname in the salutation of a letter, see ¶1338g.)

Baden-Powell, the founder of the Boy Scout movement

Rimsky-Korsakov, the Russian composer

Joliet-Curie, the French physicist

¶312

- h.** When a nickname or a descriptive expression precedes or replaces a person's first name, simply capitalize it. However, if the nickname or descriptive expression falls between a person's first and last names, enclose it either in quotation marks or in parentheses.

Ol' Blue Eyes
A-Rod

BUT: Frank "Ol' Blue Eyes" Sinatra
Alex "A-Rod" Rodriguez

OR: Frank (Ol' Blue Eyes) Sinatra
Alex (A-Rod) Rodriguez

► For the plurals of personal names, see ¶¶615–616; for the possessives of personal names, see ¶¶630–633.

Titles With Personal Names

- 312 a.** Capitalize all official titles of honor and respect when they *precede* personal names.

PERSONAL TITLES:

Mrs. Norma Washburn (see ¶517)
Ms. Terry Fiske

Miss Popkin
Mr. Benedict

EXECUTIVE TITLES:

President Julia McLeod

Vice President Saulnier

PROFESSIONAL TITLES:

Professor Henry Pelligrino
Professor Emerita Ann Marx (see page 375)

Dr. Khalil (see ¶517)
Dean Aboud

CIVIC TITLES:

Governor Samuel O. Bolling
Mayor-elect Louis K. Uhl (see ¶317)

Ambassadors Ross and Perez
ex-Senator Hausner (see ¶317)

MILITARY TITLES:

Colonel Perry L. Forrester

Commander Comerford

RELIGIOUS TITLES:

the Reverend William F. Dowd
Sister Marianne McGuire
Bishop Byron Ellington

Rabbi Gelfand
Ayatollah Ali Sistani
Sheik Jawad al-Khalisi

- b.** Do not capitalize such titles when the personal name that follows is in apposition and is set off by commas. (Some titles, like that of the President of the United States, are usually capitalized. See ¶313 for examples of such exceptions.)

Yesterday the *president*, Julia McLeod, revealed her plans to retire next June.

BUT: Yesterday *President* Julia McLeod revealed her plans to retire next June.

- c.** Do not capitalize occupational titles (such as *author*, *surgeon*, *publisher*, and *lawyer*) preceding a name.

The reviews of *drama critic* Simon Ritchey have lost their bite.

(NOT: The reviews of *Drama Critic* Simon Ritchey have lost their bite.)

Occupational titles can be distinguished from official titles in that only official titles can be used with a last name alone. Since one would not address a person as "Author Collins" or "Lawyer Jefferson" or "Director of Marketing Bellini" or "Chief Executive Officer Fry," these are not official titles and should not be capitalized.

NOTE: As a general rule, put no title before a person's name unless it is short and you would actually use that title when addressing a person aloud.

Professor Jane Flint has recently been awarded a McArthur Fellowship.

BUT: Jane Flint, professor of molecular biology, has recently been awarded . . .

(**NOT:** Professor of molecular biology Jane Flint has recently been awarded . . .)

- d.** Do not confuse a true title preceding a name (such as *Judge*) with a generic expression (such as *federal judge*).

Judge Ann Bly **OR:** federal judge Ann Bly (**BUT NOT:** federal Judge Ann Bly)

President Julia McLeod **OR:** company president Julia McLeod

(**BUT NOT:** company President Julia McLeod)

- e.** Always capitalize titles used with personal names when they appear in an inside address, in a complimentary closing, on an envelope, or on a business card.

- 313 a.** In general, do not capitalize titles of honor and respect when they *follow* a personal name or are used *in place of* a personal name.

Julia McLeod, *president* of McLeod Inc., has revealed her plans to retire next June. During her sixteen years as *president*, the company grew . . .

Henry Fennel, *emeritus professor* of English history, will lead a tour of Great Britain this summer. (For a usage note on *emeritus*, see page 375.)

However, exceptions are made for important officials and dignitaries, as indicated in the following paragraphs.

- b.** Retain the capitalization in the titles of high-ranking national, state, and international officials when they *follow* or *replace* a specific personal name. Below are examples of titles that remain capitalized.

NATIONAL OFFICIALS: the *President*, the *Vice President*, Cabinet members (such as the *Secretary of State* and the *Attorney General*), the heads of government agencies and bureaus (such as the *Director* or the *Commissioner*), the *Ambassador*, the *Speaker* (of the House), the *Representative*, the *Senator*, the *Chief Justice of the United States* (**NOT:** of the Supreme Court)

STATE OFFICIALS: the *Governor*, the *Lieutenant Governor* (**BUT:** the *attorney general*, the *senator*)

FOREIGN DIGNITARIES: the *Queen of England*, the *King*, the *Prime Minister*

INTERNATIONAL FIGURES: the *Pope*, the *Secretary-General of the United Nations* (see ¶808a)

NOTE: Many authorities now recommend that even these titles not be capitalized when they follow or replace the names of high-ranking officials. For example:

During her tour of the United States, the *queen* will visit the *president* in Washington.

When using this style, try to give the parties equal treatment. Refer to them both by using their titles alone (as in the example above) or by using each title with a name (*Queen Elizabeth* and *President Obama*). Try to avoid treating each party differently; for example, *a meeting of Queen Elizabeth and the president*.

- c.** Titles of local governmental officials and those of lesser federal and state officials are not usually capitalized when they follow or replace a personal name. However, these titles are sometimes capitalized in writing intended for a limited readership (for example, in a local newspaper, in an organization's internal communications, or in correspondence coming from or directed to the official's office), when the intended reader would consider the official to be of high rank.

¶314

The *Mayor* promised only last fall to hold the city sales tax at its present level. (Excerpt from an editorial in a local newspaper.)

BUT: Francis Fahey, *mayor* of Coventry, Rhode Island, appeared before a House committee today. The *mayor* spoke forcefully about the need to maintain federal aid to . . . (Excerpt from a national news service release.)

I would like to request an appointment with the *Attorney General*. (In a letter sent to the state attorney general's office.)

BUT: I have written for an appointment with the *attorney general* and expect to hear from his office soon.

- d.** Titles of *organizational officials* (for example, the *president*, the *general manager*) should not be capitalized when they follow or replace a personal name. Exceptions are made in formal minutes of meetings (see page 626) and in rules and bylaws.

The *president* will visit thirteen countries in a tour of company installations abroad. (Normal style.)

The *Secretary's* minutes were read and approved. (In formal minutes.)

NOTE: Some organizations choose to capitalize these titles in all their communications because of the great respect the officials command within the organization. However, this practice confers excessive importance on people who are neither public officials nor eminent dignitaries, and it should be avoided.

- e.** In general, do not capitalize job titles when they stand alone. However, in procedures manuals and in organizational memos and announcements, job titles are sometimes capitalized for special emphasis.

Marion Conroy has been promoted to the position of *senior accountant*.

OR: Marion Conroy has been promoted to the position of *Senior Accountant*.

- f.** Titles *following* a personal name or *standing alone* are often capitalized in formal citations and acknowledgments.

- 314** Do not capitalize titles used as general terms of classification. (See ¶307.)

a United States senator	every king
a state governor	any ambassador

EXCEPTION: Because of the special regard for the office of the President of the United States, this title is capitalized even when used as a general term of classification; for example, every *President*, *Presidential* campaigns. (However, see ¶313b, note.)

- 315** Capitalize any title (even if not of high rank) when it is used in *direct address* (that is, quoted or unquoted speech made directly to another person).

DIRECT ADDRESS: Please tell me, *Doctor*, what risks are involved in this treatment.

INDIRECT ADDRESS: I asked the *doctor* what risks were involved in this treatment.

NOTE: In direct address, do not capitalize a term like *madam*, *miss*, or *sir* if it stands alone without a proper name following.

Isn't it true, *sir*, that the defendant offered you money for trade secrets?

- 316** In the *inside address* of a letter, in the *writer's identification block*, and on an *envelope*, capitalize all titles whether they precede or follow the name. (See ¶¶1321–1324, 1348–1354, and the illustrations on page 480.)

- 317** a. Do not capitalize *late*, *former*, *ex-*, *-elect*, *acting*, or *-designate* when used with titles. (See ¶363 for the style in headings.)

the late President Truman

Mayor-elect Ellen Kourmadas

former President Carter

acting Superintendent Alix Beaudette

ex-President Bush

Chairman-designate Fenton Fogg

NOTE: Always hyphenate *ex*, *elect*, and *designate* when attaching them to titles.

- b. To indicate that someone has previously held a certain office, it is possible to use *then* or *then the* before the title.

Ben Bradlee, *then the* executive editor of *The Washington Post*, . . .

There are less awkward ways to express this thought.

Ben Bradlee, who was *then* the executive editor of *The Washington Post*, . . .

Ben Bradlee, the executive editor of *The Washington Post* at the time, . . .

It is not necessary to insert a hyphen after *then* except to avoid ambiguity.

Then Governor Fazio wanted to find a way to cap greenhouse gas emissions.

(Without a hyphen, *Then Governor Fazio* appears to mean “the next thing he did.”)

Then-Governor Fazio wanted to find a way to cap greenhouse gas emissions.

(With a hyphen, *Then-Governor Fazio* clearly means he was governor at the time.)

- c. Always capitalize *Honorable* when it appears in the phrase *the Honorable* before a person’s name. The phrase is typically used with the names of most government officials and diplomats. (See ¶¶1806–1807.)

Family Titles

- 318** Capitalize words such as *mother*, *father*, *aunt*, and *uncle* when they stand alone or are followed by a personal name.

Let me ask *Mother* and *Dad* whether that date is open for them.

We’ll be glad to put up *Aunt Peg* and *Uncle Fred* when they come to visit.

I hear that *Brother Bobby* has gone off the deep end again.

Do you think *Grandmother Harvey* will be pleased when she hears the news?

- 319** a. Do not capitalize family titles when they are preceded by possessives (such as *my*, *your*, *his*, *her*, *our*, and *their*) and simply describe a family relationship.

Let me ask my *mother* and *dad* whether that date is open for them.

Do you think your *brother* *Bobby* would like to meet my *sister* *Fern*?

- b. If the words *uncle*, *aunt*, or *cousin* form a unit when used together with a first name, capitalize these titles, even when they are preceded by a possessive.

Frank wants us to meet his *Uncle John*. (Here *Uncle John* is a unit.)

BUT: Frank wants us to meet his *uncle*, *John Cunningham*. (Here *uncle* simply describes a family relationship.)

I hope you can meet my *Cousin May*. (The writer thinks of her as *Cousin May*.)

BUT: I hope you can meet my *cousin* *May*. (Here the writer thinks of her as *May*; the word *cousin* merely indicates relationship.)

¶320

- c. Family titles introduced by the prefix *grand* are written solid; those introduced by the prefix *great* are hyphenated. (See also ¶839.)

grandmother	great-grandfather	great-great-grandmother
grandson	great-granddaughter	great-great-grandnephew

- d. Family titles that include terms like *once removed* require no special treatment.

Phyllis and I are first cousins. Phyllis's son Alex is my first cousin once removed. Alex's daughter Melanie is my first cousin twice removed.

Names of Organizations

- 320** a. Capitalize the names of companies, unions, associations, societies, independent committees and boards, schools, political parties, conventions, foundations, fraternities, sororities, clubs, religious bodies, and teams.

Starbucks Corporation	the National Institutes of Health
RAND Worldwide	the Hopewell Chamber of Commerce
The Carlyle Group	The Johns Hopkins University
the Transport Workers Union of America	(NOT: The John Hopkins University)
the Screen Actors Guild	the Democratic and Liberal Parties
the American Society for Training & Development	(see ¶309a, note)
the Committee for Economic Development	the Republican National Convention
the Financial Accounting Standards Board	the League of Women Voters
the Centers for Disease Control and Prevention	the Andrew W. Mellon Foundation
the World Economic Forum	Sigma Chi Fraternity
the Natural Resources Defense Council	the Myopia Hunt Club
Global Green USA	African Methodist Episcopal Church
the TED Conference	B'nai B'rith
X PRIZE Foundation	Parents Anonymous Inc.
	the Boston Red Sox
	the Toledo Mud Hens

- b. Try to follow the style established by the organization itself, as shown on the organization's letterhead or Web site.

Disney World	Kmart
BUT: Disneyland	Wal-Mart Stores, Inc.
craigslist	
athenahealth, Inc.	EXCEPTION: Toys "R" Us (don't try to replicate the backward <i>R</i>)
eBay (see ¶¶302c, 363c)	
FULL NAME: E. I. du Pont de Nemours and Company	SHORT FORM: DuPont

NOTE: An organization may refer to itself in two ways: by means of an abbreviated form (for example, *JCPenny*) or its full legal name (*J. C. Penny Company, Inc.*). The abbreviated form is acceptable except in legal documents and other communications where it is important to invoke the full authority of the organization.

► See also ¶1326b.

c. Also capitalize imaginative names used to refer to specific organizations. (See also ¶333b.)

Big Blue (IBM)	the Big Board (the New York Stock Exchange)
Ma Bell (AT&T)	the Baby Bells (the U.S. regional phone companies)
Big Pharma	(the largest U.S. pharmaceutical companies)
The large U.S. accounting firms—once known as the Big Eight—have become the Big Four.	

► *For the treatment of articles (like the), prepositions (like of or for), and conjunctions (like and), see ¶303, note; for the capitalization of abbreviations and acronyms used as organizational names, see ¶¶520, 522.*

321 When the common-noun element is used in place of the full name (for example, *the company* in place of *the Andersen Hardware Company*), do not capitalize the short form unless special emphasis or distinction is required (as in legal documents, minutes of meetings, bylaws, and other formal communications, where the short form is intended to invoke the full authority of the organization). In most cases, capitalization is unnecessary because the short form is used only as a general term of classification. (See ¶¶307–308.)

The *company* has always made a conscientious effort to involve itself in community affairs. However, our *company* policy specifically prohibits our underwriting any activity in support of a candidate for public office. (As used here, *company* is a term of general classification.)

BUT: On behalf of the *Company*, I am authorized to accept your bid. (Here the full authority of the company is implied; hence *Company* is spelled with a capital C.)

Mr. Weinstock has just returned from a visit to Haverford College. He reports that the *college* is planning a new fund-raising campaign to finance the construction of the new media center.

BUT: The *College* hopes to raise an additional \$10,000,000 this year to finance the construction of the new media resource center. (Announcement in the alumni bulletin.)

NOTE: Do not capitalize the short form if it is modified by a word other than *the*. In constructions such as *our company*, *this company*, and *every company*, the noun is clearly a general term of classification. (See also ¶¶307–308.)

322 Common organizational terms such as *advertising department*, *manufacturing division*, *finance committee*, and *board of directors* are ordinarily capitalized when they are the actual names of units within the writer's own organization. These terms are not capitalized when they refer to some other organization unless the writer has reason to give these terms special importance or distinction.

The *Board of Directors* will meet next Thursday at 2:30. (From a company memo.)

BUT: Julia Perez, senior vice president of the Mulholland Bancorp, has been elected to the *board of directors* of the Kensington Trade Corporation. (From a news release intended for a general audience.)

The *Finance Committee* will meet the first week of November to review next year's budget. (Style used by insiders.)

BUT: Gilligan says his company cannot discuss sponsorship of a new art center until its *finance committee* has reviewed our proposal. (Style normally used by outsiders.)

The *Advertising Department* will unveil the fall campaign on Friday, October 21. (Style used by insiders.)

BUT: The *advertising department* of Black & London will unveil its fall campaign this Friday. (Style used by outsiders.)

¶323

NOTE: Do not capitalize these organizational terms when they are modified by a word other than *the*. Constructions such as *this credit department*, *their credit department*, *every credit department*, *your credit department*, and *our credit department* are terms of general classification and should not be capitalized. (See also ¶321, note.)

Black & London always seems to have a great deal of turnover in *its advertising department*.

We don't have as much turnover in *our advertising department* as you may think. (Some insiders prefer to write *our Advertising Department* because of the special importance they attach to their own organizational structure.)

I would like to apply for the position of copywriter that is currently open in *your advertising department*. (Some outsiders might write *your Advertising Department* if they wanted to flatter the reader by giving special importance to the reader's organizational structure.)

323 Capitalize such nouns as *marketing*, *advertising*, and *promotion* when they are used alone to designate a department within an organization.

Paul Havlicek in *Corporate Communications* is the person to talk with.

I want to get a reaction from our people in *Marketing* first.

BUT: Talk to our *marketing* people first. (Here *marketing* is simply a descriptive adjective.)

324 a. Capitalize the word *the* preceding the name of an organization only when it is part of the legal name of the organization.

The Associated Press

The Wall Street Journal (see ¶289e)

The Vanguard Group

The Times-Picayune

The Body Shop

The New Yorker

The Sharper Image

BUT: the Los Angeles Times

b. Even when part of the organizational name, *the* is often not capitalized except in legal or formal contexts where it is important to give the full legal name.

c. Do not capitalize *the* when the name is used as a modifier or is given in the form of an abbreviation.

the Associated Press report

the AP

works for the Times

Names of Government Bodies

325 Capitalize the names of countries and international organizations as well as national, state, county, and city bodies and their subdivisions.

the People's Republic of China

Washington State (see ¶335)

the United Nations

New Mexico Environment Department

the Kennedy Administration

Ohio General Assembly

the Cabinet

Wisconsin Court of Appeals

the House of Representatives

Middlesex County

BUT: the federal government

St. Charles Parish

(see ¶¶328–329)

Salt Lake City (see ¶334)

the Electoral College

the New York State Board of Regents

the Department of Veterans Affairs

the Cook County Commission on Human Rights

(formerly Veterans Administration)

the Boston City Council

► For city and state names, see ¶¶334–335.

326 Capitalize short forms of names of national and international bodies and their major divisions.

- the House (referring to the House of Representatives)
- the Department (referring to the Department of Justice, the State Department, the Department of the Treasury, etc.)
- the Bureau (referring to the Bureau of the Budget, the Federal Bureau of Investigation, the Bureau of the Census, etc.)
- the Commission (referring to the Federal Trade Commission, the Federal Communications Commission, the Security and Exchange Commission, etc.)
- the Administration (referring to the General Services Administration, the Social Security Administration, the Small Business Administration, etc.)
- the Court (referring to the United States Supreme Court, the International Court of Justice, etc.)
- the Fed **OR:** the Board (referring to the Federal Reserve Board)
- BUT:** the feds (referring to federal regulators)

Do not capitalize short forms of names of state or local government groups except when special circumstances warrant emphasis or distinction. (See ¶327.)

327 Common terms such as *police department*, *board of education*, and *county court* need not be capitalized (even when referring to a specific body), since they are terms of general classification. However, such terms should be capitalized when the writer intends to refer to the organization in all of its official dignity.

We are awaiting the release of next year's budget from *City Hall*. (*City Hall* is capitalized here because the term refers to the seat of municipal power in its full authority.)

You can't fight *City Hall*. (Here again, the term is intended to invoke the full authority of a particular city government.)

BUT: The public school teachers will be staging a rally in front of *city hall*. (In this case a particular building is being referred to in general terms.)

The *Police Department* has announced the promotion of Robert Boyarsky to the rank of sergeant. (The short form is capitalized here because it is intended to have the full force of the complete name, the *Cranfield Police Department*.)

BUT: The Cranfield *police department* sponsors a youth athletic program that we could well copy. (No capitalization is used here because the writer is referring to the department in general terms and not by its official name.)

NOTE: Do not capitalize the short form if it is not actually derived from the complete name. For example, do not capitalize the short form *police department* if the full name is *Department of Public Safety*.

328 Capitalize *federal* only when it is part of the official name of a federal agency, a federal act, or some other proper noun.

the *Federal Reserve Board* the *Federal/Insurance Contributions Act*

BUT: . . . subject to *federal*, state, and local laws.

NOTE: It is customary to capitalize *federal* when making reference to a specific style of American architecture.

329 The terms *federal government* and *government* (referring specifically to the United States government) are now commonly written in lowercase because they are considered

¶330

terms of general classification. In government documents, however, and in other types of communications where these terms are intended to have the force of an official name, they are capitalized.

The *federal government* is still wrestling with the problem of corporate welfare—that is, *federal* subsidies to large corporations.

BUT: If you can't fight City Hall, what makes you think it's any easier to fight the *Federal Government*? (Here the writer wants to emphasize the full power of the national government as an adversary.)

330 a. Capitalize *union* only when it refers to a specific government.

Wilkins has lectured on the topic in almost every state in the *Union*.

b. Capitalize *commonwealth* only when it is part of an official name. (See also ¶335c.)

the Commonwealth of Independent States (formerly the U.S.S.R.)

the Commonwealth **OR:** the Commonwealth of Nations (formerly the British Commonwealth)

► For the capitalization of state, see ¶335; for the capitalization of city, see ¶334.

Names of Places

331 Capitalize the names of places, such as streets, buildings, parks, monuments, rivers, oceans, and mountains. Do not capitalize short forms used in place of the full name. (See ¶332 for a few exceptions.)

Montgomery Street	BUT: the street
Avenue of the Americas	the avenue
Empire State Building	the building
Stone Mountain Park	the park
Sacramento River	the river
Lake of the Ozarks	the lake
Biscayne Bay	the bay
Chebeague Island	the island
Colony Surf Hotel	the hotel
Rittenhouse Row	the row
Union Square	the square
Riverside Drive	the drive
Dupont Circle	the circle
Bighorn Mountain	the mountain
Shoshone Falls	the falls
the Washington Monument	the monument
the Lincoln Memorial	the memorial
Glastonbury Abbey	the abbey
Stapleton Airport	the airport (see ¶308, note)
the Fogg Art Museum	the museum
Golden Gate Bridge	the bridge
Nicollet Mall	the mall

► For plural expressions like the Atlantic and Pacific Oceans, see ¶309a, note; for the treatment of prepositions and conjunctions in proper names, see ¶303, note.

332 A few short forms are capitalized because of clear association with one place.

the Coast (the West Coast)

the Continent (Europe)

the Channel (English Channel)

the Indies (the East Indies)

BUT: the indies (films and recordings made by independent producers)

the Hill (Capitol Hill)

the Street (Wall Street)

the Village (Greenwich Village)

333 a. Capitalize imaginative names that designate specific places or areas.

Down East (coastal Maine)

the Lower East Side (in Manhattan)

the Eastern Shore (of Chesapeake Bay)

the South Side (of Chicago)

the Near North (in Chicago)

the South Lawn (of the White House)

inside the Beltway (Washington, D.C.)

the Main Line (the Philadelphia suburbs)

the Big D (Dallas)

the Big Muddy (the Missouri River)

the Research Triangle (in North Carolina)

the Big Apple (New York)

TriBeCa (the triangular area below

Canal Street in Manhattan)

NoLita (north of Little Italy in Manhattan)

the Outer Banks (of North Carolina)

Back Bay (in Boston)

the Bay Area (around San Francisco)

La-La Land (Los Angeles)

Tinseltown (Hollywood)

the Magnificent Mile (in Chicago)

the French Quarter (in New Orleans)

DUMBO (part of Brooklyn down under

the Manhattan Bridge overpass)

SoHo (in New York); Soho (in London)

SoHa (south of Harlem)

Down Under (Australia and New Zealand)

the Pacific Rim

the Far East **OR:** the Orient

the Middle East

NOTE: The terms *Sunbelt*, *Snowbelt*, and *Frostbelt* are now commonly spelled as one word; the terms *Farm Belt*, *Corn Belt*, and *Cotton Belt* are still commonly spelled as two words. Within the same context treat these terms the same way—as two words; for example, *in the Farm Belt and the Frost Belt*.

b. Some place names are used imaginatively to refer to specific types of businesses or institutions.

Silicon Valley (the cluster of high-tech industries south of San Francisco)

Silicon Alley (the cluster of software development firms in Manhattan)

Siliwood (the collaboration between Silicon Valley and Hollywood)

Bollywood (the film industry of India)

Lollywood (the film industry of Pakistan)

the K Street crowd (the lobbying industry in Washington, D.C.)

Gucci Gulch (the halls of Congress where lobbyists ply their trade)

Madison Avenue (the advertising industry)

Wall Street (the financial industry)

Off-Off-Broadway (experimental theater in New York City)

Foggy Bottom (the U.S. State Department)

334 Capitalize the word *city* only when it is part of the corporate name of the city or part of an imaginative name.

Kansas City

the Windy City (Chicago)

BUT: the city of Dallas

135

- 335** a. Capitalize *state* only when it follows the name of a state or is part of an imaginative name.

New York *State* is also called the Empire *State*.

The *state* of Alaska is the largest in the Union.

Washington *State* entered the Union in 1889, the forty-second *state* to do so.

Next year we plan to return to the *States*. (Meaning the *United States*.)

- b. Do not capitalize *state* when it is used in place of the actual state name.

He is an employee of the *state*. (People working for the state government, however, might write *State*.)

- c. Kentucky, Massachusetts, Pennsylvania, and Virginia are actually commonwealths. In ordinary usage, however, they are referred to as states.

the commonwealth of Kentucky **OR:** the state of Kentucky

- 336** According to the U.S. Government Printing Office *Style Manual*, the terms used to refer to the residents of the fifty states are formed according to different patterns.

- a. Sixteen states just add *n*.

Alaskan	Iowan	Nevadan	South Dakotan
Arizonan	Minnesotan	North Dakotan	Utahn
Californian	Montanan	Oklahoman	Virginian
Georgian	Nebraskan	Pennsylvanian	West Virginian

NOTE: Many residents of Oklahoma prefer to be called Okies.

- b. Eight states add *an*.

Delawarean	Idahoan	Massachusettsan	Missourian
Hawaiian	Illinoisan	Mississippian	Ohioan

NOTE: Many residents of Massachusetts prefer to be called Bay Staters.

- c. Six states drop the final letter and add *n* or *an*.

Arkansan	Kansan	Tennessean
Coloradan	New Mexican	Texan

- d. Three states add *ian*.

Michiganian	Oregonian	Washingtonian
-------------	-----------	---------------

NOTE: Many residents of Michigan prefer to be called Michiganders. Another term cited by authorities is Michiganites.

- e. Seven states drop the final letter and add *ian*.

Alabamian	Indianian	Louisianian	South Carolinian
Floridian	Kentuckian	North Carolinian	

NOTE: It is more common to refer to residents of Indiana as Hoosiers, and many residents of North Carolina prefer to be called Tarheels.

- f. Only one state adds *r*.

Mainer	OR: Mainiac (the term favored by some residents)
--------	---

g. Five states add *er*.

Connecticuter	New Yorker	Vermontter
Marylander	Rhode Islander	

h. Three states add *ite*.

New Jerseyite	Wisconsinite	Wyomingite
---------------	--------------	------------

i. One state drops the final letter and adds *ite*.

New Hampshirite

337 **a.** Capitalize *the* only when it is part of the official name of a place.

The Dalles	BUT: the Bronx
The Hague	the Netherlands

b. Capitalize the words *upper* and *lower* only when they are part of an actual place name or a well-established imaginative name.

Upper Peninsula	Lower East Side	Lower California (more commonly)
Upper West Side	Newton Lower Falls	known as Baja California)

c. Capitalize the word *greater* when it precedes a city name, referring to the city plus the outlying suburbs; for example, *Greater Atlanta*, *Greater Los Angeles*, *Greater Cleveland*.

Points of the Compass

338 **a.** Capitalize *north*, *south*, *east*, *west*, and derivative words when they designate definite regions or are an integral part of a proper name.

in the North	the Far North	the North Pole
down South	the Deep South	the South Side
out West	the Far West	the West Coast
back East	the Middle East	the Eastern Seaboard

b. Do not capitalize these words when they merely indicate direction or general location.

Many start-up companies have moved from the *Northeast* to the *Midwest*. (Region.)

BUT: They maintain a villa in the *south* of France. (General location.)

OR: Go *west* on Route 517 and then *south* on I-95. (Direction.)

John is coming back *East* after three years on the *West Coast*. (Region.)

BUT: The *west coast* of the United States borders on the Pacific. (Referring only to the shoreline, not the region.)

Most of our customers live on the *East Side*. (Definite locality.)

BUT: Most of our customers live on the *east side* of town. (General location.)

339 Capitalize such words as *Northerner*, *Southerner*, and *Midwesterner*.

340 Capitalize such words as *northern*, *southern*, *eastern*, and *western* when they refer to the people in a region or to their political, social, or cultural activities. Do not capitalize these words when they merely indicate general location or refer to the geography or climate of the region.

341

Eastern bankers	BUT: the eastern half of Pennsylvania
Southern hospitality	southern temperatures
Western civilization	westery winds
the Northern vote	a northern winter
The <i>Northern</i> states did not vote as they were expected to. (Political activities.)	
BUT: The drought is expected to continue in the <i>northern</i> states. (Climate.)	
My sales territory takes in most of the <i>southeastern</i> states. (General location.)	

NOTE: When terms like *western region* and *southern district* are used to name units within an organization, capitalize them.

The *Western Region* reports that sales are 12 percent over budget for the first six months this year. (*Western Region* here refers to a part of the national sales staff.)

341

When words like *northern*, *southern*, *eastern*, and *western* precede a place name, they are not ordinarily capitalized because they merely indicate general location within a region. However, when these words are actually part of the place name, they must be capitalized. (Check an atlas or the geographic listings in a dictionary when in doubt.)

Preceding a Place Name

northern New Jersey
western Massachusetts

Part of a Place Name

Northern Ireland
Western Australia

NOTE: Within certain regions it is not uncommon for many people who live there to capitalize the adjective because of the special importance they attach to the regional designation. Thus people who live in southern California may prefer to write *Southern California*.

Days of the Week, Months, Holidays, Seasons, Events, and Periods

342

Capitalize the names of days, months, holidays, and religious days.

Tuesday	Juneteenth (June 19)	St. Patrick's Day
February	the Fourth of July	Good Friday
New Year's Eve	Election Day	All Saints' Day
Presidents' Day	Kwanza OR: Kwanzaa	Rosh Hashanah
April Fools' Day	Martin Luther King Day	Yom Kippur
Father's Day	Cinco de Mayo	Ramadan
Veterans Day	Kamehameha Day	Mawlid (Muhammad's birthday)
Pi Day—a holiday celebrated chiefly by mathematicians and scientists—falls on March 14. That date—when expressed as 3.14—represents the first three digits of the mathematical constant Pi.		
Pi Approximation Day is most commonly celebrated on July 22, because that date—when expressed in day-month format (22/7)—approximately represents the first three digits of Pi.		

► For the use of apostrophes in names of holidays, see ¶651.

343

a. Do not capitalize the names of the seasons unless they are personified.

We hold our regional sales conferences during the *fall* and *winter*, but our national conference always takes place early in the *spring*.

We do not plan to announce our new line of software applications until our *fall '09/winter '10 catalog*.

BUT: And this you can see is the bolt. The purpose of this
Is to open the breech, as you see. We can slide it
Rapidly backwards and forwards: we call this
Easing the spring. And rapidly backwards and forwards
The early bees are assaulting and fumbling the flowers:
They call it easing the Spring.

—Henry Reed

NOTE: Companies sometimes capitalize the names of seasons in promotional materials.

the fall '09/winter '10 catalog **OR:** the Fall '09/Winter '10 catalog

- b.** Keep in mind that the sequence of the seasons is reversed in the Northern and Southern Hemispheres. When it is summer in the United States and Germany, it is winter in Brazil and Australia. If the document you are creating is likely to be read by people living in both hemispheres, you can avoid confusion by not using the name of a season to refer to a certain period of time.

AVOID: during the winter of 2010

USE: in early 2010, during the first three months of 2010,
during the first quarter of 2010

- 344 a.** Capitalize the names of historical events and imaginative names given to historical periods.

the Renaissance	the Roaring Twenties
the Counter-Reformation	Prohibition
the Enlightenment	the Great Depression
the American Revolution	the New Deal
the Reign of Terror	World War II
the Industrial Revolution	the Holocaust
the Gay Nineties	the War on Poverty

- b.** References to cultural *ages* are usually capitalized. However, contemporary references are not usually capitalized unless they appear together with a capitalized reference.

the Bronze Age	BUT: the space age
the Dark Ages	the atomic age
the Middle Ages	the digital age

The course spans the development of civilization from the *Stone Age* to the *Space Age*.

- c.** References to cultural *eras* are usually capitalized, but references to cultural *periods* are usually not.

the Common Era	BUT: the romantic period
the Victorian Era	the colonial period

- d.** Capitalize the names of sporting events.

the Super Bowl	the World Series OR: the Series
the Masters	the Kentucky Derby OR: the Derby
the U.S. Open	the Olympic Games OR: the Games OR: the Olympics
the Grand Slam	Iditarod Trail Sled Dog Race

¶345

345 Do not capitalize the names of decades and centuries.

during the fifties

in the twenty-first century

in the nineteen-nineties

during the nineteen hundreds

NOTE: Decades are capitalized, however, in special expressions.

the Gay Nineties

the Roaring Twenties

► *For a discussion of how to label the first decade of the twenty-first century, see ¶439b.*

Acts, Laws, Bills, and Treaties

346 a. Capitalize formal titles of acts, laws, bills, treaties, and amendments, but do not capitalize common-noun elements that stand alone in place of the full name.

the Americans With Disabilities Act

the act

Public Law 480

the law

the Treaty of Versailles

the treaty

the First Amendment

the amendment

the Constitution of the United States

BUT: the Constitution (see ¶304)

BUT: When Pelletier takes the stand next week, we think he is likely to take the *Fifth*. (Referring to the Fifth Amendment.)

b. Do not capitalize generic or informal references to existing or pending legislation except for proper nouns and adjectives.

an environmental protection bill

the Brady gun control law

c. “Laws” that make humorous or satirical observations about human and organizational behavior are capitalized to suggest that they carry the same authority as an actual piece of legislation.

Parkinson’s Law states that work expands to fill the time that has been allotted for its completion.

Parkinson’s Law of Data states that data expands to fill the space available.

Murphy’s Law holds that if something can go wrong, it will.

The Peter Principle maintains that people in an organization tend to be promoted until they reach their level of incompetence.

According to *Fudd’s First Law of Opposition*, if you push something hard enough, it will fall over.

A relatively new proverb called *Hanlon’s Razor* states, “Never attribute to malice that which can be adequately explained by stupidity.”

d. In the names of authentic scientific laws, capitalize only proper nouns and adjectives.

Gresham’s law

Newton’s first law of motion

Mendel’s law

the first law of thermodynamics

Programs, Movements, and Concepts

347 a. Do not capitalize the names of programs, movements, or concepts when they are used as general terms.

social security numbers

the civil rights movement

BUT: the Social Security Administration

BUT: the Civil Rights Act

medicare payments

the big bang theory

BUT: the Medicare Act

existentialism and rationalism

NOTE: Some writers capitalize *social security*, *medicare*, and *medicaid* under all circumstances.

- b.** Capitalize proper nouns and adjectives that are part of such terms.

the Socratic method	Newtonian physics
Keynesian economics	Marxist-Leninist theories

- c.** Capitalize imaginative names given to programs and movements.

the New Deal	the New Frontier
the Great Society	the War on Poverty

- d.** Capitalize terms like *democrat*, *socialist*, and *communist* when they signify formal membership in a political party but not when they merely signify belief in a certain philosophy.

a lifelong <i>Democrat</i> (refers to a person who consistently votes for candidates of the Democratic Party)	a lifelong <i>democrat</i> (refers to a person who believes in the principles of democracy)
the right wing	leftists

NOTE: Ordinarily, do not capitalize a reference to *independent voters*. However, in a context where polls or election results make reference to Republican voters and Democratic voters, it would be appropriate to refer to *Independent voters*. Moreover, in a context where politicians or officeholders are referred to in terms of their party affiliation, an unaffiliated politician or officeholder may be referred to as an *Independent* (for example, *a bill cosponsored by Republican Senator John McCain from Arizona and Independent Senator James Jeffords from Vermont*).

Races, Peoples, and Languages

- 348 a.** Capitalize the names of races, peoples, tribes, and languages.

Caucasians	Hispanics	Native Americans	BUT: the blacks
the Japanese	the Inuit	Mandarin Chinese	the whites

NOTE: The people who live in the Philippines are called Filipinos, and the official language of the country is called Filipino.

- b.** Do not hyphenate terms like *African Americans* or *French Canadians* when they are used as nouns, because the first word in each case modifies the second. However, hyphenate such terms when they are used as adjectives; for example, *African-American enterprises*, *French-Canadian voters*. Moreover, hyphenate such terms when the first element is a prefix; for example, *an Afro-American style*, *the Anglo-Saxons*, *the Indo-Chinese*.

► *For a usage note on ethnic references, see pages 376–378.*

Religious References

- 349 a.** Capitalize all references to a supreme being.

God	the Supreme Being	Allah
the Lord	the Messiah	Yahweh
the Holy Spirit	the Almighty	Providence

Toward the end of his life, Winston Churchill wrote, “I am prepared to meet my *Maker*. Whether my *Maker* is prepared for the great ordeal of meeting me is another matter.”

¶350

NOTE: The word *god* is capitalized in such compound expressions as *God-fearing* and *Godspeed* but not in such terms as *godly*, *godforsaken*, and *god-awful*.

- b.** Capitalize personal pronouns referring to a supreme being when they stand alone, without an antecedent nearby.

Offer thanks unto *Him*. **BUT:** Ask the Lord for *his* blessing.

Mr. Dooley (the pseudonym of Finley Peter Dunne) said, “A fanatic is a man that does what he thinks the *Lord* would do if *he* knew the facts of the case.”

NOTE: Some writers capitalize these personal pronouns under all circumstances. When quoting other writers, respect their use of capitalization.

In a letter to Thomas Jefferson, John Adams wrote, “Power always thinks it has a great soul and vast views beyond the comprehension of the weak; and that it is doing God’s service when it is violating all *His* laws.”

- c.** Capitalize references to persons revered as holy.

the Prince of Peace	Buddha	John the Baptist
the Good Shepherd	the Prophet	Saint Peter (see ¶518e)
the Blessed Virgin	the Apostles	Luke the Evangelist

- d.** Capitalize the names of religions, their members, and their buildings.

Reform Judaism	Mormons	Saint Mark’s Episcopal Church
Zen Buddhism	Methodists	Temple Beth Sholom
the Roman Catholic <i>Church</i> (meaning the institution as a whole)		
BUT: the Roman Catholic <i>church</i> on Wyoming Avenue (referring to a specific building)		
the Church of Jesus Christ of Latter-day Saints (see ¶363b)		

- e.** Capitalize references to religious events. (See also ¶342.)

the Creation	the Exodus	the Crucifixion
the Flood	the Second Coming	the Resurrection

- f.** In general, do not capitalize references to specific religious observances and services. However, if you are writing from the perspective of a particular religion, follow the capitalization style of that religion.

bar mitzvah	baptism	BUT: the Eucharist
bat mitzvah	christening	the Mass
seder	confirmation	Pentecost

- 350 a.** Capitalize (but do not quote, italicize, or underline) references to works regarded as sacred.

the Bible	the Qur'an	the Ten Commandments
BUT: biblical sources	OR: the Koran	Psalms 23 and 24
the Revised Standard Version	the Talmud	the Sermon on the Mount
the Hebrew Bible	the Torah	the Gospel of Mark
OR: the Old Testament	the Our Father	Kaddish
the Book of Genesis	the Lord's Prayer	Hail Mary
	Hebrews 13:8	the Apostles' Creed

Wisdom is better than weapons of war, but one bungler destroys much good. (*Ecclesiastes* 9:18)

► For the use of a colon in references to chapter and verse in the Bible, see ¶195b, note.

- b. Do not capitalize *bible* when the work it refers to is not sacred.
That reference manual has become my *bible*.
- c. Biblical scholars now prefer to use the term *the Hebrew Bible* rather than *the Old Testament*. As part of the same trend, biblical scholars prefer to use the abbreviations *B.C.E.* (before the Common Era) and *C.E.* (the Common Era) in place of *B.C.* and *A.D.* (For a further discussion of these abbreviations, see the entry for *A.D.–B.C.* on page 359.)
- d. According to the Muslim Information Center, *Qur'an* is now the preferred spelling for the *Koran*. (See *a* above.)

Celestial Bodies

351 Capitalize the names of planets (*Jupiter, Mars*), stars (*Polaris, the North Star*), and constellations (*the Big Dipper, the Milky Way*). However, do not capitalize the words *sun*, *moon*, and *earth* unless they are used in connection with the capitalized names of other planets or stars.

With the weather we've been having, we haven't seen much of the *sun*.

We have gone to the ends of the *earth* to assemble this collection of jewelry.

Compare the orbits of *Mars, Venus*, and *Earth*.

The name of the constellation you have in mind is spelled *Orion*, not O'Ryan.

Course Titles, Subjects, and Academic Degrees

352 a. Capitalize the names of specific course titles. However, do not capitalize names of subjects or areas of study (except for any proper nouns or adjectives in such names).

American History 201 meets on Tuesdays and Thursdays. (Course title.)

Harriet got a bachelor's degree in *American history*. (Area of study.)

I can't decide whether to major in *philosophy, religion, English literature*, or *computer science*. (Areas of study.)

b. The names of scholarships and fellowships are typically capitalized.

a MacArthur Fellowship

a National Merit Scholarship

a Pell Grant

a Fulbright Scholar

353 Do not capitalize academic degrees used as general terms of classification. However, capitalize a degree used after a person's name.

a bachelor of arts degree

received his bachelor's (see ¶644)

a master of science degree

working for a master's

an associate degree in office
management

was awarded an associate's
degree

a doctor of laws degree

will soon receive her doctorate

BUT: Claire Hurwitz, Doctor of Philosophy

354 a. In references to academic years, do not capitalize the words *freshman, sophomore, junior*, and *senior*.

My son Jim is spending his *junior* year in France. He'll return to Bowdoin for his *senior* year.

b. Some schools and colleges prefer to refer to freshmen as *first-year students*.

All incoming *freshmen* must register by September 4.

Our daughter Melanie is now a *first-year student* at Arizona State University.

¶355

- c. In references to grade levels, capitalize the word *grade* when a number follows but not when a number comes first.

Our oldest child is in *Grade 8*, our second child is a *fifth-grade* student, our third child is in the *third grade*, and our youngest will be a *first-grader* next year. (Use a figure when the number follows *Grade*. Spell out the number when it precedes the word *grade*. See ¶424.)

Commercial Products

- 355** Capitalize trademarks, brand names, proprietary names, names of commercial products, and market grades. The common noun following the name of a product should not ordinarily be capitalized; however, manufacturers and advertisers often capitalize such words in the names of their own products to give them special emphasis.

Elmer's glue

BUT: Krazy Glue

NOTE: Be alert to the correct spelling of proper nouns.

Macintosh computers

BUT: McIntosh apples

► For the capitalization of short words in the names of products, see ¶303, note; for the use of intercaps, see ¶366.

- 356** a. Capitalize all trademarks except those that have become clearly established as common nouns. To be safe, consult the International Trademark Association by phone (212.642.1700) or by e-mail <info@inta.org>. As an alternative, do an Internet search for the term and see how it is treated on the home page of the organization that controls it.

NOTE: The following list contains many trademarks that are often mistakenly considered to be uncapitalized generic terms.

Google, Yahoo!

Thinsulate, Polartec, GORE-TEX

Xerox **BUT:** photocopy, photostat

Birkenstock sandals, Top-Siders

Telecopier **BUT:** fax

AAdvantage, Airbus, JetBlue, Learjet

LaserWriter, LaserJet; **BUT:** laser printer

Plexiglas, Fiberglas **BUT:** fiberglass

Express Mail, Hotmail, FedEx, Filofax

Sheetrock, Spackle, Masonite

BUT: e-mail, voice mail, yellow pages

Formica, Styrofoam, Lucite, Mylar

Magic Marker, Hi-Liter, Day-Glo inks

AstroTurf, Bushwacker, DustBuster,

Post-it Notes, Scotch Tape, Rolodex

Laundromat, Dumpster, Crock-Pot

PowerPoint, PostScript, TrueType

Frigidaire, Jacuzzi, Disposall, Thermos

Adobe, Listserv, Lexus, Linux

Teflon, Easy-Off, Pyrex, Dixie cup

Realtor **BUT:** real estate agent

Clorox, Drano, Drygas

CliffsNotes, SparkNotes

Handi Wipes, Handi-Wrap, Bubble Wrap

Baggies, Ziploc bags, Jiffy bags

Big Mac, Whopper, SPAM (meat)

Acrilan, Dacron, Lycra, Orlon

BUT: spam (electronic junk mail)

Naugahyde, Ultrasuede, Kevlar

Kool-Aid, Gatorade, Slurpee, Sanka

BUT: nylon, spandex

Frappuccino **BUT:** cappuccino

Levi's, Lands' End, L'eggs, Dockers

Mrs. Fields cookies, Mrs. Paul's frozen foods

Velcro, Windbreaker, Supp-Hose

Mr. Goodwrench, Mister Softee

Popsicle, Pop-Tarts, RyKrisp	Ping-Pong, Trivial Pursuit
M&M's, PowerBar, Reese's, Turtles	Technicolor, Polaroid, Netflix, TiVo
Equal, Splenda, NutraSweet	IMAX, Skycam BUT: camcorder
Sweet'N Low BUT: aspartame	Nintendo, Rubik's Cube, Xbox
Kleenex, Band-Aid, Ace bandage	Havahart trap, Seeing Eye dog
Vaseline, VapoRub, Bengay	Humvee, Jeep, Land Rover, Sno-Cat
ChapStick, Novocain, Botox	Neon (car) BUT: neon (gas)
Nicotrol, NyQuil, Motrin, Demerol	E-ZPass, MapQuest
BUT: penicillin, cortisone	Breathalyzer, Jaws of Life
Rolaids, Tylenol BUT: aspirin	Q-tips, U-Haul, Special K, Oral-B
Adrenalin BUT: adrenaline	Jell-O, SpaghettiOs, Bac~Os
Aqua-Lung, Jet Ski, Ski-Doo	X-Acto knives. Xbox, X-Files
StairMaster, NordicTrack	Chips Ahoy!, Jeopardy!, E!, Off!
Jazzercise, Nautilus, Hula-Hoop	Fabergé, Nescafé, Nestlé, Guess?
Rollerblades, Walkman	Estée Lauder, Häagen-Dazs, Ragú
Frisbee, Slinky, Silly Putty, Nerf	

- b.** Trademark holders typically use a raised symbol (such as TM or [®]) after their trademarks in all of their correspondence, promotional material, and product packaging. If you refer to other organizations' trademarks in material of a commercial nature that will be publicly distributed, use a raised symbol after each trademark. In all other documents, the symbols are not necessary, but do use the proper spelling and capitalization for these trademarks.

NOTE: If a mark of punctuation (such as a period or a comma) falls at the same point as a trademark plus a raised symbol, insert the punctuation after the symbol.

- *For additional examples of trademarks, see ¶303, note, ¶366, ¶402, note, ¶505b, note, and ¶516a, note.*

Business Terms and Titles

- 357** **a.** Words ordinarily written in lowercase may be capitalized for emphasis in advertising copy, procedures manuals, and in-house communications. (This style is inappropriate in all other kinds of communication.)

Save money now during our *Year-End Clearance Sale*.

It's the event *Luxury Lovers* have been waiting for . . . from Whitehall's!

- b.** Titles of business forms are customarily capitalized in procedures manuals and in in-house communications. However, a generic reference to a common form (such as a purchase order or an invoice) does not have to be capitalized unless it is followed by a number or a letter (see ¶359).

You will have to fill out a *Leave of Absence Request form*. (Do not capitalize the word *form* unless it is actually a part of the title.)

Fill out a *purchase requisition* and send it to Felix Estaban for an okay.

Please track down *Purchase Requisition* 6489, which has not yet been approved.

- *For titles of organizational officials, see ¶313d–e.*

¶358

Legal Documents

358 Although it has been traditional in legal documents to capitalize many words that would ordinarily be written in lowercase, there is no agreement on one uniform style for these documents. The prevailing practice currently is to capitalize key terms—for example, references to the parties (*the Buyer, the Seller, the Landlord, the Tenant, the Plaintiff, the Defendant*), references to the nature of the document (*the Agreement, the Affidavit, the Motion, the Memorandum*), and spelled-out amounts of money (see ¶420). The use of all-caps for such references is losing ground, but terms like *ORDERED, GRANTED, and DENIED* still often appear this way in court orders. Leading authorities for the plain language movement advocate eliminating capitalization, especially for terms that refer to the document unless these terms are proper nouns.

Nouns With Numbers or Letters

359 Capitalize a noun followed by a number or a letter that indicates sequence. **EXCEPTIONS:** Do not capitalize the nouns *line, note, page, sentence, paragraph, size, step, and verse*.

Account 66160	Exhibit A	Phase III
Act 1	Extension 2174	Plate XV
Appendix A	Figure 9	Platform 3
Article 2	Form 1040	Policy 394857
Book III	(BUT: a W-2 form)	Proposition 215
Building 4	Grade 6 (see ¶354c)	Room 501
Bulletin T-119	Illustration 19	Route 46
Catch-22	Interstate 5 OR: I-5	Rule 3
Channel 55	Invoice 270487	Section 1
Chapter V	Item 9859D	sentence 5
Chart 3	Lesson 20	size 10
Check 181	line 4	step 3
Class 4	Model B671-4	Table 7
Column 1	note 1	type 2 (diabetes)
Day One	page 158	Unit 2
Diagram 4	paragraph 2a	verse 3
Exercise 8	Part Three	Volume II

NOTE: It is often unnecessary to use *No.* before the number. (See ¶455b.)

Purchase Order 4713 (**RATHER THAN:** Purchase Order *No.* 4713)

BUT: Social Security No. 042-62-5340 (**NOT:** Social Security 042-62-5340)

Titles of Literary and Artistic Works; Headings

360 a. In titles of literary and artistic works and in displayed headings, capitalize all words with *four or more* letters. Also capitalize words with fewer than four letters except:

ARTICLES: *a, an, the*

SHORT CONJUNCTIONS: *and, as, but, if, or, nor*

SHORT PREPOSITIONS: *at, by, for, in, of, off, on, out, to, up*

► *For additional exceptions, see ¶361.*

- b. Be sure to capitalize short verb forms like *is* and *be*. However, do not capitalize *to* when it is part of an infinitive.

How to Succeed in Business Without Really Trying

"Redevelopment Proposal Is Not Expected to Be Approved"

- c. In magazine titles, capitalize the word *magazine* only if it is actually part of the magazine name.

Harper's Magazine

BUT: *Time* magazine

Golf Magazine

Smithsonian magazine

- d. When citing titles in text, headings, source notes, or bibliographies, it is important to maintain a consistent style of capitalization. You may thus find it necessary to disregard the capitalization style used on the title page of a particular book or in the heading of a particular article or in the listings in a particular catalog. For reasons of typographic design or graphic appeal, titles may appear in such places in a variety of styles—in all-caps, lowercase, small caps, or some combination of these styles. In some cases, only the first word of the title and subtitle is capitalized. In other cases, the first letter of *every* word is capitalized. In some books a different style of capitalization is used on the book jacket, the title page, and the copyright page. In light of all these variations in capitalization style that you are likely to encounter, impose a consistent style as described in ¶¶360–361. However, do not alter the all-cap style used for acronyms (for example, *AIDS*) and organizational names (for example, *IBM*).

NOTE: The capitalization rules in ¶¶360–361 also apply to the words in a subject line of a letter. (See ¶¶1342–1343.)

361 Even articles, short conjunctions, and short prepositions should be capitalized under the following circumstances:

- a. Capitalize the first and last word of a title.

"A Home to Be Proud Of"

"The New Economy: Signs and Signals to Watch For"

CAUTION: Do not capitalize *the* at the beginning of a title unless it is actually part of the title.

For further details check *the Encyclopaedia Britannica*.

This clipping is from *The New York Times*.

- b. Capitalize the first word following a dash or colon in a title.

Abraham Lincoln—The Early Years

The Treaty of Versailles: A Reexamination

Living Past Eighty: On Borrowed Time

- c. Capitalize short words like *in*, *out*, *off*, *up*, and *by* in titles when they serve as adverbs rather than as prepositions. (These words may occur as adverbs in verb phrases or in hyphenated compounds derived from verb phrases. See ¶¶803, 1070.)

"Microsoft Chalks Up Record Earnings for the Year"

"LeClaire Is Runner-Up in Election" (see also ¶363)

BUT: "Sailing up the Mississippi"

¶362

The Spy Who Came In From the Cold

“Foxworth Is Considered a Shoo-In for Governor”

BUT: “Pollsters Project an Easy Win for Foxworth *in* Heavy Voter Turnout”

“Governor Ramos Stands *By* His Tax Proposal”

BUT: “Governor’s Tax Proposal Not Supported *by* Legislators”

NOTE: Capitalize these short words when they serve as other parts of speech.

Resolving the Conflict *Is* a Big *If*

Jackson’s Success *Is* Anything *But*

Traveling With the *In* Crowd

Movie Costars Have a Falling *Out*

- d.** Capitalize short prepositions like *up*, *in*, *on*, and *for* when used together with prepositions having four or more letters.

“Sailing *Up* and *Down* the Mississippi”

“Happenings *In* and *Around* Town”

“Mall Opening *On* or *About* May 1”

“Voters *For* and *Against* the New Budget Clash at Hearing”

- e.** When a title or heading is displayed on more than one line, do not capitalize the first word of any turnover line unless it needs to be capitalized on the basis of the preceding guidelines.

Should You Invest *for* the Long Pull
or Should You Trade Continually?

Millions
of Dollars

Income
per Capita

- For the capitalization of Preface, Contents, Appendix, and Index, see ¶242, note; for the use of all-caps with titles, see ¶289b.

- 362** Do not capitalize a book title when it is incorporated into a sentence as a descriptive phrase.

In his book on basic marketing, Bill Perreault points out that . . .

BUT: In his book *Basic Marketing*, Bill Perreault points out that . . .

Hyphenated Words

- 363 a.** Within a sentence, capitalize only those elements of a hyphenated word that are proper nouns or proper adjectives. At the beginning of a sentence, capitalize the first element in the hyphenated word but not other elements unless they are proper nouns or proper adjectives. In a heading or title, capitalize all the elements except articles, short prepositions, and short conjunctions. (See ¶360.)

Within Sentences

Self-Confidence

Within Sentences	Beginning Sentences	In Headings and Titles
de-emphasize	De-emphasize	De-Emphasize
follow-up	Follow-up	Follow-Up (see ¶361c)
Ninety-ninth Congress	Ninety-ninth Congress	Ninety-Ninth Congress
post-World War II	Post-World War II	Post-World War II
one-sixth	One-sixth	One-Sixth
twenty-first	Twenty-first	Twenty-First
eBay	(see ¶363c)	eBay

- b.** In the hyphenated names of organizations and products, the word or letter following a hyphen may or may not be capitalized. Follow the organization's style in each case.

Snap-on tools	Post-it Notes	Play-Doh
EASY-OFF oven cleaner	Book-of-the-Month Club	La-Z-Boy

- c.** When a name like *eBay* or *iPod* occurs within a sentence or anywhere in a heading or a title, retain the lowercase letter that begins the name. If it is absolutely essential that such a name appear at the beginning of a sentence, capitalize the first letter (*EBay*, *IPod*). Whenever possible, avoid using this type of name to begin a sentence in order to preserve the lowercase letter at the beginning of the name.

Awards and Medals

- 364** Capitalize the names of awards and medals.

Pulitzer Prize winners	the Medal of Honor
the Nobel Prize	the Distinguished Service Medal
Oscars and Emmys	the Purple Heart
the Tonys	the Webby Awards (for the world's best Web sites)
a MacArthur Fellowship	a National Merit Scholarship

Computer Terminology

- 365** **a.** The capitalized term *Internet* refers to the established global system of linked computer networks. The lowercased term *internet* is used to refer to a collection of local area networks that are linked with one another but not necessarily connected with the Internet. The term *intranet* refers to a private network established by an organization for its own internal purposes; the term is lowercased in normal usage, but an organization may choose to label its private network the *Intranet* for special emphasis within its own internal communications.
- b.** Capitalize the names of Internet search engines (*Google*, *Yahoo!*), Internet service providers (*UUNet*) and commercial online services (*America Online*), Web sites (*HotWired*), online communities (*Usenet*), and online databases (*LexisNexis*, *Dialog*). Some of these names (such as UUNet and HotWired) follow a special capitalization style known as *intercaps*. (See ¶366 for more examples.)
- c.** Capitalize the names of software programs. (See ¶290i.)

Adobe Acrobat	Norton Internet Security
TurboTax	AppleScript

¶366

- d. Capitalize the names of computer games. (See ¶290h.)

Super Mario 64

Myst V: End of Ages

Brain Age

Star Wars Battlefront II

► For the capitalization of words or phrases beginning with Web, see ¶847f.

Intercaps

366

The names of many organizations and products are written with an unusual style known as *intercaps* or *BiCaps*. Follow the organization's style in each case.

- a. The names of computer organizations, computer products, and even Web sites commonly reflect an intercap style. For example:

BlackBerry

NextPath

MySpace

BlackPlanet.com

PayScale

myYearbook

PlayStation

CareerBuilder

QuickBooks

RealPlayer

ThinkFree

BUT: Facebook

LiveJournal

FireWire

CorelDRAW

AlltheWeb

ThinkPad

iPod

AltaVista

WebCrawler

InterNIC

EarthLink

LinkedIn

QuarkXPress

PageMaker

- b. The use of intercaps appears in other areas of business as well. For example:

LensCrafters

DieHard batteries

PlaySkool toys

RadioShack

KitchenAid appliances

ReaLemon juice

SaladShooter

MasterCard purchases

TripTik maps

CreataCard greeting cards

SparkNotes study guides

VapoRub ointment

NOTE: For additional examples of intercaps, see ¶356a.

► *Capitalization of questions within sentences: see ¶¶115, 117.*

Capitalization after a colon: see ¶¶196–199.

Capitalization after an opening bracket: see ¶296a.

Capitalization after an opening dash: see ¶214, note.

Capitalization after an opening parenthesis: see ¶¶224b, 225b, 226b.

Capitalization after an opening quotation mark: see ¶¶272–273.

Capitalization of abbreviations: see ¶¶514, 522, 541–542.

Capitalization for special emphasis: see ¶285c.

Expressing Large Numbers in Abbreviated Form (¶470)

► For definitions of grammatical terms, see the appropriate entries in the Glossary of Grammatical Terms (Appendix A).

¶401

There is a significant difference between using figures and using words to express numbers. Figures are big (like capital letters) and compact and informal (like abbreviations); when used in a sentence, they stand out clearly from the surrounding words. By contrast, numbers expressed in words are unemphatic and formal; they do not stand out in a sentence. It is this functional difference between figures and words that underlies all aspects of number style.

► *For a perspective on the rules for using numbers, see the frontmatter on pages xxiv–xxvi.*

Basic Rules

The rules for expressing numbers would be quite simple if writers would all agree to express numbers entirely in figures or entirely in words. But in actual practice the exclusive use of figures is considered appropriate only in tables and statistical matter, whereas the exclusive use of words to express numbers is found only in ultraformal documents (such as proclamations and social invitations). In writing that is neither ultraformal nor ultratechnical, most style manuals call for the use of both figures and words in varying proportions. Although authorities do not agree on details, there are two sets of basic rules in wide use: the *figure style* (which uses figures for most numbers above 10) and the *word style* (which uses figures for most numbers above 100). Unless you deal with a very limited type of written communication, you should be prepared to use each style appropriately as the situation demands.

Figure Style

The figure style is most commonly used in ordinary business correspondence (dealing with sales, production, finance, advertising, and other routine commercial matters). It is also used in journalistic and technical material and in academic work of a technical or statistical nature. In writing of this kind, most numbers represent significant quantities or measurements that should stand out for emphasis or quick comprehension.

- 401** a. Spell out numbers from 1 through 10; use figures for numbers above 10. This rule applies to both exact and approximate numbers. However, use figures for 1 through 10 (as in the statement of this rule) when these numbers need to stand out for quick comprehension. (See ¶401b.)

I would like *ten* copies of this article, but I need only *two* or *three* right away.

I sensed that the project was in trouble from *Day One*. (See ¶359.)

Brad and I exchanged *high fives* after we persuaded the board to approve our proposal.

If I thought I could get away with it, I'd like to *deep-six* these reorganization plans.

An executive coach named Marsha Egan has devised a *12-step* program to treat e-mail addiction.

At the convention we got more than *75* requests for a copy of your report.

We expect about *30* to *35* employees to sign up for the graphic arts course.

The advertising is deliberately pitched at the *40-plus* age group. (See ¶817c.)

My letter in last Sunday's paper provoked over *25* letters and some *60-odd* phone calls.

There has been a *sixfold* increase in the number of reported incidents. (See ¶817c.)

BUT: There has been a *20-fold* increase in the number of reported incidents.

One bookstore chain has already ordered 2500 copies. (See ¶461a, note, on the omission of commas in four-digit figures.)

The exhibition drew more than 12,000 people in the first month.

We send out about 200,000 catalogs almost every month, but our year-end holiday catalog is mailed to over 1,000,000 households. (See ¶403b.)

NOTE: Some authorities recommend spelling out only single-digit numbers (1–9) and using figures for all numbers starting with 10.

► *For a note on alternative ways to express approximate numbers, see the entry for More than—over—nearly—almost—less than—about—around on page 392; for a note on the use of zero, see ¶465d.*

- b.** Use all figures—even for the numbers 1 through 10 (as in this sentence)—when they have technical significance or need to stand out for quick comprehension. This all-figure style is used in tables, in statistical material, and in expressions of dates (*May 3*), money (*\$6*), clock time (*4 p.m.*), proportions and ratios (*a 5-to-1 shot*), sports scores (*3 to 1*), votes (*a 6–3 decision*), academic grades (*95*), and percentages (*8 percent*). This style is also used with abbreviations and symbols (*12 cm, 8°F, our No. 1 sales rep*), with numbers referred to as numbers (*think of a number from 1 to 10*), with highway designations (*U.S. Route 1, I-80*), and with technical or emphatic references to age (*a tristate clinical study of 5-year-olds*), periods of time (*a 6-month loan*), measurements (*parcels over 3 pounds*), and page numbers (*page 1*).
- c.** In isolated cases spell out a number above 10 in order to de-emphasize the number or make it seem indefinite.

Jonathan could give you *a thousand and one* reasons why he can't find a job that's right for him.

I have *a hundred* things to do today. (In this context *100* things would seem too precise, too exact.)

Thanks *a million* for all your help on the Tennyson deposition.

When I asked Fran to reconsider, all she said was, "*A thousand* times no!"

Doug is so pleased that it's hard to say whether he's on *cloud nine* or in *seventh heaven*.

You know that proposal I worked on for more than six months? Well, it's been *eighty-sixed*.

- d.** Also use words for numbers at the beginning of a sentence, for most ordinals (*our twenty-fifth anniversary*), for fractions (*one-third of our sales*), and for nontechnical or nonemphatic references to age (*my son just turned twelve*), periods of time (*twenty years ago*), and measurements (*I need to lose another thirty pounds*).

► *For rules on how to express numbers in figures, see ¶¶461–464; for rules on how to express numbers in words, see ¶¶465–467.*

402 Use the same style to express *related* numbers above and below 10. If any of the numbers are above 10, put them all in figures.

When people annoy you, remember this: it takes 42 muscles to frown but only 4 muscles to extend your arm and whack 'em.

We used to have *two* dogs, *one* cat, and *one* rabbit.

BUT: We now have *5* dogs, *11* cats, and *1* rabbit. (The rabbit is male.)

¶403

When the museum guard was asked how he could be so sure that the dinosaur skeleton on display was precisely *80,000,009* years old, he explained that the dinosaur had been *80,000,000* years old when he started working at the museum 9 years earlier.

Our *four* sons consumed a total of *18* hamburgers, *5* large bottles of diet Coke, *12* DoveBars, and about *2000* cookies—all at *one* sitting. (Figures are used for all the related items of food; the other numbers—*four* and *one*—are spelled out, since they are not related and are not over 10.)

NOTE: In the names of organizations and products, follow the organization's style.

A.1. steak sauce	3-IN-ONE oil	a 7-Eleven store
Pier 1 Imports	WD-40 oil	a can of 7UP
Century 21	501 jeans	a glass of V8 juice
Formula 409	4-H Club	9 Lives cat food
One A Day vitamins	Saks Fifth Avenue	After Eight candy
K2r spot remover	Motel 6	17 Mile Drive clothing
3M office products	Six Flags	20 Mule Team Borax

- 403** a. For fast comprehension, numbers in the *millions* or higher may be expressed as follows:

21 million (in place of 21,000,000)
 3 billion (in place of 3,000,000,000)
 14½ million OR: 14.5 million (in place of 14,500,000)
 2.4 billion (in place of 2,400,000,000)
 Bindel & Boggs is placing an order for *2.4 million* barrels of oil.
BUT: Bindel & Boggs is placing a *2.4-million-barrel* order. (See ¶817a.)

NOTE: This style may be used only when the amount consists of a whole number with nothing more than a simple fraction or decimal following. A number such as *4,832,067* must be written all in figures. However, if the situation permits numbers to be rounded, this number can be rewritten as *4.8 million*. (See also ¶416.)

► For the use of M in abbreviated expressions of millions, see ¶470.

- b. Treat related numbers alike.

Last year we sold *21,557,000* items; this year, nearly *23,000,000*.
(NOT: 21,557,000 . . . 23 million.)

► For examples involving money, see ¶¶413–420.

Word Style

The word style of numbers is used mainly in high-level executive correspondence (see ¶¶1371–1372) and in nontechnical material, where the writing is of a more formal or literary nature and the use of figures would give numbers an undesired emphasis and obtrusiveness. Here are the basic rules for the word style.

- 404** a. Spell out all numbers, whether exact or approximate, that can be expressed in one or two words. (A hyphenated compound number like *twenty-one* or *eighty-nine* counts as one word.) In effect, spell out all numbers from 1 through 100 and all

round numbers above 100 that require no more than two words (such as *sixty-two thousand or forty-five million*).

Mr. Ryan received *twenty-three* letters praising the talk he gave at the Rotary Club.

Last January more than *twelve million* people attended the art exhibition that our company sponsored.

Some *sixty-odd* people have called to volunteer their services.

More than *two hundred* people attended the reception for Helen Russo.

BUT: More than *250* people attended the reception. (Use figures when more than two words are required.)

NOTE: Some authorities recommend spelling out only one- and two-digit numbers (1–99) and using figures for all numbers above 99.

- b.** In writing of an ultraformal nature—proclamations, social invitations, and many legal documents—even a number that requires more than two words is spelled out. However, as a matter of practicality the word style ordinarily uses figures when more than two words are required.
- *For guidelines on how to express numbers in words, see §§465–467; for a note on the use of zero, see §465d.*

405 Express related numbers the same way, even though some are above 100 and some below. If any must be in figures, put all in figures.

We sent out *three hundred* invitations only last week and have already received more than *one hundred* acceptances.

BUT: We sent out *300* invitations and have already received *125* acceptances.

(**NOT:** three hundred . . . 125.)

406 Numbers in the millions or higher that *require more than two words when spelled out* may be expressed as follows:

231 million (in place of 231,000,000)

9% billion **OR:** 9.75 billion (in place of 9,750,000,000)

671.4 million (in place of 671,400,000)

Even a two-word number such as *sixty-two million* should be expressed as *62 million* when it is related to a number such as *231 million* (which cannot be spelled in two words). Moreover, it should be expressed as *62,000,000* when it is related to a number such as *231,163,520*.

Special Rules

The preceding rules on figure style (§§401–403) and word style (§§404–406) are basic principles that govern in the absence of more specific guidelines. The following rules cover those situations that require special handling (for example, expressions of dates and money). In a number of cases where either figures or words are acceptable, your choice will depend on whether you are striving for emphasis or formality.

¶407**Dates**

The following rules apply to dates in sentences. See ¶1313 for the treatment of date lines in business correspondence.

- 407** a. When the day *precedes* the month or *stands alone*, express it either in ordinal figures (*1st, 2d, 3d, 4th*) or in ordinal words (*the first, the twelfth, the twentieth*).

FOR EMPHASIS: This year's international sales conference runs from Monday, the *2d* of August, through Thursday, the *5th*.

FOR FORMALITY: We leave for Australia and New Zealand on the *third* of June and return on the *twenty-fifth*.

- b. When the day *follows* the month, use a cardinal figure (*1, 2, 3*, etc.) to express it.
on March 6

NOTE: Do not use the form *March 6th* or *March sixth*, even though those versions reflect the way the date would sound when spoken aloud.

► For the use of commas and other punctuation with dates, see ¶410.

- 408** a. Express complete dates in month-day-year sequence.

on March 6, 2009

- b. In United States military correspondence and in letters from foreign countries, the complete date is expressed in *day-month-year* sequence.

on 6 March 2009

- c. The form *3/6/09* (representing a *month-day-year* sequence) is acceptable on business forms and in informal letters and memos. Avoid this form, however, if there is any chance your reader could misinterpret it as a *day-month-year* sequence.

- d. A form similar to *3/6/09* uses dots and is gaining in popularity—*3.6.09*. Here again, avoid this form if your reader might interpret the first number as the day rather than as the month.

- e. Avoid the following forms: *March 6th, 2009; Mar. 6, 2009; the 6th of March 2009; the sixth of March 2009*. (For an exception, see ¶411b.)

- f. Because of the extraordinary events on September 11, 2001, this date is frequently referred to simply as *9/11* (without any reference to the year). In a formal context, use the standard format for expressing this date: *September 11* or *September 11, 2001*.

- g. The International Organization for Standardization (ISO), a network of the standards institutes of 157 countries, has created a new standard for expressing complete dates in a year-month-day sequence formatted as YYYY-MM-DD.

October 12, 2009, is expressed as 2009-10-12.

December 25, 2009, is expressed as 2009-12-25.

Since this standard requires that months and days be expressed as two digits, a zero must be inserted before the digits 1 through 9.

February 14, 2009, is expressed as 2009-02-14.

November 5, 2009, is expressed as 2009-11-05.

July 4, 2009, is expressed as 2009-07-04.

This ISO standard is now widely used in Japan, Korea, Denmark, and Sweden.

NOTE: In view of the different formats used throughout the world to express dates, an all-figure style could create confusion if used in a document that will be read by people in different countries. Spelling out the name of the month—regardless of the position it occupies in the complete date—is the surest way to avoid confusion.

- 409** **a.** When you make reference to a previous document in the first sentence of a document you are composing, it is usually sufficient to cite only the month and the day.

Thank you for your letter of May 22, in which you asked us to explain why your request for a larger discount could not be granted. (A reader will assume that the current year—as shown in your date line—also applies to the letter of May 22.)

► *For the use of a comma between the date and the in which clause, see ¶152.*

However, in cases where there can be no room for the slightest ambiguity (for example, in legal documents), it is safer to cite the full month-day-year date in the first sentence.

Thank you for your letter of December 27, 2010, in which you asked us to explain why your request for a larger discount could not be granted.

NOTE: It is especially helpful to give the full date when the document you are citing was written in a prior year or when the document is part of a large file that spans two or more years. Some writers, as a matter of policy, cite the full date under all circumstances.

- b.** When you make reference to dates elsewhere in the document you are composing, the decision to include or omit the year in these dates will depend on the nature of the document. If the dates are significant from a legal perspective (for example, in schedules specifying deadlines for performance and incremental payments), include the year in all subsequent references to dates. In ordinary correspondence, however, when it is clear from the context that the subsequent dates all fall within the same year as the one shown in the date line or in the first sentence in your document, the use of month and day alone is sufficient.
- c.** When making reference to an event in a previous month, you could inadvertently cause confusion by using *last* to modify the month.

AMBIGUOUS: I wrote to Marie Robichaud *last March*. (Someone reading this in June might wonder whether the letter was written this year or last year.)

CLEARER: I wrote to Marie Robichaud *in March*. (Implying “this year.”)

OR: I wrote to Marie Robichaud *in March last year*.

¶410

410 Note the use of commas and other punctuation with expressions of dates.

On August 13, 2010, my husband and I received the bank loan that permitted us to start our own restaurant. (Two commas set off the year following the month and day.)

BUT: *On 13 August 2010 my husband and I . . .* (Do not use commas to set off the year in a day-month-year sequence unless the sentence requires a comma or some other mark of punctuation after the year.)

We set a formal opening date of *November 15, 2010*; we actually opened on *March 18, 2011* (because of the flash fire that virtually destroyed the restaurant and forced us to start from scratch). (Note that the second comma is omitted after 2010 and 2011 because in each case other punctuation—a semicolon or an opening parenthesis—is required at that point.)

I will be out of the office on the following days: *November 6, 16, and 24, 2009; December 4, 8, and 14, 2009; and January 4, 11, and 19, 2010*.

Please review all the correspondence dated from *May 1 to June 30, 2008*, to see if Angus Wilson expressed any doubts about the will he had just signed.

(**NOT:** . . . from May 1–June 30, 2008. See ¶459b.)

The *March 1, April 1, and May 1, 2010*, payments were applied on *May 31, 2010*.

This information was derived from the reports dated *December 31, 2009*, and *December 31, 2010*.

Sales for *February 2009* hit an all-time low. (Omit commas around the year when it follows the month alone.)

BUT: Once we introduced our new product line in *September 2010*, it was clear that we were finally on the road to a strong recovery. (The comma following 2010 is needed to separate an introductory dependent clause from the rest of the sentence, not because of the date.)

The *May 2009* issue of *The Atlantic* carried an excerpt from Brenda's forthcoming book. (No commas are used when the month-year expression serves as an adjective.)

BUT: The *May 16, 2009*, issue of *Newsweek* broke the story. (Use two commas to set off the year when a complete date serves as an adjective. See ¶154.)

In *2009* we opened six branch offices in . . . (No comma follows the year in a short introductory phrase unless a nonessential element follows immediately.)

On *February 28* we will decide . . . (No comma follows the month and day in a short introductory phrase unless a nonessential element follows immediately.)

BUT: On *February 28*, the date of the next board meeting, we will decide . . . (Insert a comma when a nonessential element follows immediately.)

On *February 28*, 27 managers from the Iowa plant will . . . (Insert a comma when another figure follows immediately. See ¶456.)

Yesterday, *April 3*, I spoke to a group of exporters in Seattle. On Tuesday, *April 11*, I will be speaking at an international trade fair in Singapore. (Set off a month-day expression when it serves as an appositive. See ¶148.)

On *August 28*, when the malfunction was first reported, we notified all of our dealers by e-mail about an equipment recall. (The phrase *On August 28* establishes *when*; the *when* clause that follows is nonessential and is set off with commas.)

► *For the use or omission of a comma when a date is followed by a related phrase or clause, see ¶152.*

- 411** a. In formal invitations and proclamations, spell out the day and the year. A number of styles may be used:

May twenty-first

the twenty-first of May

the twenty-first day of May

two thousand and ten

in the year of our Lord two thousand and ten

b. In legal documents, dates are frequently expressed in the following style:

executed the 17th day of November 2010

- 412** **a.** Well-known years in history may appear in abbreviated form. An apostrophe is used to represent the figures omitted from the year. (See ¶505g.)

the stock market crash in '29 the gold rush of '49 (1849)
the Olympic Winter Games of '10 **BUT:** the San Francisco 49ers

NOTE: When one of the years is expressed in full, an apostrophe is not needed in the year expressed as an abbreviation; for example, during the years 1941–45.

- b.** Years also appear in abbreviated form in certain business expressions. (See ¶294.)

FY2008/09 **OR:** fiscal year 2008/09 the fall '05/winter '06 catalog (see ¶343)

- c.** Class graduation years often appear in abbreviated form.

the class of '99 the class of '00 the class of '09

NOTE: There is still no consensus on how to refer *aloud* to academic classes in the first decade of the twenty-first century. On the basis of the style commonly used at the start of the twentieth century, the class of 2009 (or '09) could be referred to aloud as “the class of aught-nine” or “the class of oh-nine.” The more challenging question is how to refer to the class of 2000. One solution is simply to say “the class of two thousand.” Other suggestions include “the class of aughty-aught,” “the class of naughty-naught,” “the double-ohs,” “the oh-ohs,” and even “the uh-ohs.” In time, one expression will probably become established through usage as the dominant form. Until then feel free to choose (or devise) whatever form appeals to you.

► *For the expression of centuries and decades, see ¶¶438–439; for dates in a sequence, see ¶¶458–460.*

Money

- 413** **a.** Use figures to express exact or approximate amounts of money.

\$7	over \$1500	more than \$5,000,000 a year
\$13.50	nearly \$50,000	OR: more than \$5 million a year (see ¶403a)
a \$50 bill	almost \$6500	a \$5,000,000-a-year account
\$350 worth	less than \$100,000	OR: a \$5 million-a-year account (see ¶403a)

NOTE: Modifiers like *nearly*, *almost*, and *less than* have a subtle way of affecting the interpretation of numbers. To speak of “nearly \$100,000 in profits” is to suggest how close one has come to achieving a goal. To speak of “less than \$100,000 in profits” is to emphasize the failure to meet that goal.

► *For a note on the use of commas in figures, see ¶461a; for a note on alternative ways to express approximate numbers, see the entry for More than–over–nearly–almost–less than–about–around on page 392; for a note on the use of less than, see the entry for Fewer–less on page 379.*

¶414

- b.** When amounts of money from different countries are referred to in the same context, the unit of currency in each case usually appears as an abbreviation or symbol (or both) before the numerical amount.

US\$10,000	(refers to 10,000 U.S. dollars)
Can\$10,000	(refers to 10,000 Canadian dollars)
Mex\$10,000	(refers to 10,000 Mexican pesos)
£10,000	(refers to 10,000 British pounds)
¥10,000	(refers to 10,000 Japanese yen)
€10,000	(refers to 10,000 euros)

- c.** An isolated, nonemphatic reference to money may be spelled out.

two hundred dollars	a half-dollar	five thousand dollars' worth
nearly a thousand dollars	half a million dollars	(note the apostrophe)
a twenty-dollar bill	a million-dollar house	

When you consider the rate of inflation, telling someone she looks like *a million dollars* is not as flattering as it used to be.

BUT: The \$64,000 question is whether we can get matching funds from the federal government.

414 Spell out indefinite amounts of money.

a few million dollars many thousands of dollars a multibillion-dollar investment

415 **a.** When a *whole* dollar amount occurs within a sentence, it is not necessary to add a decimal point and two zeros unless (1) this amount occurs in the same context with an amount consisting of dollars and cents or (2) you want to give special emphasis to the exact amount.

This model costs \$32.50; that model costs \$50.

OR: This model costs \$32.50; that model costs \$50.00

I am enclosing a check for \$525 to settle my dispute with Loring.

BUT: Tell Loring I'll settle this dispute for \$500.00 and not a penny more.

- b.** In a column, if any amount contains cents, add a decimal point and two zeros to all *whole* dollar amounts to maintain a uniform appearance. (See also ¶1629.)
- | |
|-----------|
| \$ 150.50 |
| 25.00 |
| 8.05 |
| <hr/> |
| \$ 183.55 |

NOTE: If an item consisting only of cents (.65) appears in a column of items consisting mainly of dollars and cents, do not insert zeros before the decimal that precedes the expression of cents. Note that the dollar sign at the head of the column must align with the dollar sign that precedes the total. **EXCEPTION:** If you work in financial services, you may find that your company's style manual requires that you use a zero as a placeholder when representing cents alone. In that case represent an amount like 65 cents as \$0.65.

\$.65
1.38
10.00
98.18
<hr/>
\$110.21

- 416** a. Money in round amounts of a million or more may be expressed partly in words.
(The style given in the first column is preferred.)

\$12 million	OR: 12 million dollars
\$10½ million	OR: 10½ million dollars
\$10.5 million	OR: 10.5 million dollars
\$6¼ billion	OR: 6¼ billion dollars
\$6.25 billion	OR: 6.25 billion dollars OR: \$6250 million

NOTE: Do not hyphenate these expressions when they are used as adjectives.

a \$12 million investment a \$2.5 million compensation package

- b. This style may be used only when the amount consists of a whole number with nothing more than a simple fraction or decimal following.

10.2 million dollars **BUT:** \$10,235,000

This style may also be used with the suffix *plus*. (See also ¶817c.)

a \$10 million-plus deal

- c. Express related amounts the same way.

from \$500,000 to \$1,000,000 (**NOT:** from \$500,000 to \$1 million)

- d. Repeat the word *million* (*billion*, etc.) with each figure to avoid misunderstanding.

\$5 million to \$10 million (**NOT:** \$5 to \$10 million)

a \$10 million- to \$15 million-a-year industry (For the use of a suspending hyphen after *\$10 million*, see ¶832.)

► *For the use of M in abbreviated expressions of millions, see ¶470.*

- 417** Fractional expressions of large amounts of money should be either completely spelled out (see ¶427) or converted to an all-figure style.

one-quarter of a million dollars **OR:** \$250,000

(**BUT NOT:** ¼ of a million dollars **OR:** \$¼ million)

a half-billion dollars **OR:** \$500,000,000

(**BUT NOT:** ½ billion dollars **OR:** \$½ billion)

- 418** a. For amounts under a dollar, ordinarily use figures and the word *cents*.

I am sure that customers will not pay more than 99 cents for this item.

This machine can be fixed with 80 cents' worth of parts. (Note the apostrophe with *cents*.)

These 50-cent tokens can be used at all tollbooths.

In 1901 sugar cost 4 cents a pound, eggs were 14 cents a dozen, and coffee cost 15 cents a pound.

NOTE: An isolated, nonemphatic reference to cents may be spelled out.

I wouldn't give two cents for that car.

- b. Do not use the style \$.75 in sentences except when related amounts require a dollar sign.

It will cost you \$5.47 a copy to do the company manual: \$.97 for the paper, \$1.74 for the printing, and \$2.76 for the special binder.

- c. The cent sign (¢) may be used in technical and statistical material.

The price of aluminum, 78.6¢ a pound a year ago, now runs around 69.8¢ a pound; copper, then selling for 98.6¢ a pound, now costs 87.6¢ a pound.

¶419

- 419** When using the dollar sign or the cent sign with a price range or a series of amounts, use the sign with each amount.

\$5000 to \$8000 \$10 million to \$20 million
10¢ to 20¢ (**BUT NOT:** \$10 to \$20 million)

These three properties are valued at \$832,900, \$954,500, and \$1,087,000, respectively.

If the term *dollars* or *cents* is to be spelled out, use the term only with the final amount.

I wouldn't spend more than forty or fifty *dollars* on their wedding present.

Those flowers shouldn't cost more than eighty or ninety *cents* apiece.

- 420** **a.** In some legal documents, amounts of money are expressed first in words and then, within parentheses, in figures. (See also ¶¶465–467.)

One Hundred Dollars (\$100)
OR: One Hundred (100) Dollars
BUT NOT: One Hundred (\$100) Dollars
Three Thousand One Hundred and 50/100 Dollars (\$3100.50)

- b.** When spelling out amounts of money, omit the *and* between hundreds and tens of dollars if *and* is used before the fraction representing cents.

Six Hundred Thirty-two and 75/100 Dollars
(NOT: Six Hundred *and* Thirty-two and 75/100 Dollars)

NOTE: In whole dollar amounts, the use of *and* between hundreds and tens of dollars is optional.

Six Hundred Thirty-two Dollars
OR: Six Hundred and Thirty-two Dollars

- c.** The capitalization of spelled-out amounts may vary. Sometimes the first letter of each main word is capitalized (as in the examples in *a* above); sometimes only the first letter of the first word is capitalized (as on checks); sometimes the entire amount is in all-caps.

The following rules (¶¶421–428) cover situations in which numbers are usually spelled out: at the beginning of sentences and in expressions using indefinite numbers, ordinal numbers, and fractions.

At the Beginning of a Sentence

- 421** Spell out a number that begins a sentence, as well as any related numbers.

Thirty-four former students of Dr. Helen VanVleck came from all parts of the country to honor their professor on the occasion of her retirement.

Eight hundred people have already signed the recall petition.

Forty to fifty percent of the people polled on different occasions expressed disapproval of the mayor's performance in office.

(NOT: *Forty to 50* percent . . .)

- 422** If the number requires more than two words when spelled out or if figures are preferable for emphasis or quick reference, reword the sentence.

The company sent out 298 copies of its consumer guidelines last month.

(NOT: *Two hundred and ninety-eight* copies of its consumer guidelines were sent out by the company last month.)

We had a good year in 2009.

(**NOT:** *Two thousand nine* [**OR:** 2009] was a good year for us.)

Our mining operations in Nevada provide 60 to 70 percent of our revenues.

(**NOT:** 60 to 70 percent of our revenues come from our mining operations in Nevada.)

Indefinite Numbers and Amounts

- 423** Spell out indefinite numbers and amounts.

several hundred investors	hundreds of inquiries
a few thousand acres	thousands of readers
a multimillion-dollar sale	many millions of dollars
umpteen number of cases	a gazillion years ago
a man in his late forties	a roll of fifties and twenties

► For approximate numbers, see ¶401a (figure style) and ¶404a (word style).

Ordinal Numbers

- 424** In general, spell out all ordinal numbers (*first, second, third*, etc.) that can be expressed in one or two words. (A hyphenated number like *twenty-first* counts as one word.)

in the first place	the two millionth visitor
the second in command	sales for the third quarter
on the twentieth of July	during the eighth inning
in the twenty-first century	the twelfth juror to be selected
twenty-first-century art	the firm's one hundredth anniversary
on the forty-eighth floor	(BUT: the firm's 125th anniversary)
on my fifty-fifth birthday	the Ninety-ninth Congress (in text)
the Fourteenth Ward	the Ninety-Ninth Congress
at the eleventh hour	(in headings and titles; see ¶363)
a seventh-grade student	the 112th Congress
a seventh-grader	the Eighteenth Amendment
in the seventh grade (see ¶354c)	the Seventh-Day Adventist Church

NOTE: When a hyphenated term like *twenty-first* is the first element in a compound adjective (as in *twenty-first-century art*), the second hyphen may be changed to an en dash (*twenty-first-century art*).

► For the distinction between ordinals and fractions, see ¶427d.

- 425** a. Use figures for ordinals in certain expressions of dates (see ¶¶407–408), in numbered street names above 10 (see ¶1329b), and in situations calling for special emphasis.

In Advertising Copy

Come to our 25th Anniversary Sale! (Figures for emphasis.)

Come to our Twenty-fifth Anniversary Sale! (Words for formality.)

In Ordinary Correspondence

Watkins & Glenn is having a *twenty-fifth* anniversary sale.

- b. Ordinal figures are usually expressed in an on-the-line style: *1st, 2d* or *2nd, 3d* or *3rd, 4th*, etc. Do not use an “abbreviation” period following an ordinal figure.

► For the use of *2d* in preference to *2nd*, see ¶503.

Continued on page 150

¶426

NOTE: Many word processing programs have a default feature that treats ordinal suffixes as superscripts. For example:

21st 32^d **OR:** 32nd 43^d **OR:** 43rd 54th

The superscript style should not be used except in writing of an informal nature. On that basis, it would make sense to deselect this style as one of the default features of your software.

- 426** Ordinals that follow a person's name may be expressed in arabic or roman numerals. As a rule, use arabic numerals unless you know that the person in question prefers roman numerals.

James A. Wilson 3d **OR:** James A. Wilson III
C. Roy Post 4th **OR:** C. Roy Post IV

► *For the use of commas with numerals after a person's name, see ¶156.*

Fractions

427 Fractions Standing Alone

- a. Ordinarily, spell out a fraction that stands alone (without a whole number preceding); for example, *one-third*. Use figures, however, if the spelled-out form is long and awkward or if the fraction is used in a technical measurement or some type of computation.

one-half the audience (see ¶427c)	three-fourths of the profits
two-thirds of our employees	one-quarter of a million dollars
multiply by 2/5	a quarter pound of butter
3/4-yard lengths (BETTER THAN: three-quarter-yard lengths)	
5/32 inch (BETTER THAN: five thirty-seconds of an inch)	
He came back <i>a half hour</i> later (OR: <i>half an hour</i> later).	

NOTE: Hyphenate *half dozen* or *half a dozen* when this phrase is used as a compound modifier before a noun. (See also ¶817a.)

I'll take a *half-dozen* eggs (**OR:** *half-a-dozen* eggs).

BUT: I'll take *a half dozen* (**OR:** *half a dozen*).

- b. When a fraction is spelled out, hyphenate the numerator and the denominator unless either element already contains a hyphen.

five-eighths thirteen thirty-seconds twenty-seven sixty-fourths

NOTE: Some authorities hyphenate *simple fractions* (those that require only a single word for the numerator and the denominator) when they are used as adjectives but not as nouns.

a *two-thirds* majority **BUT:** *two thirds* of the voters

- c. In constructions involving the balanced phrases *one half . . . the other half*, do not hyphenate *one half*.

One half of the shipment was damaged beyond use; *the other half* was salvageable.

- d.** Distinguish between large spelled-out fractions (which are hyphenated) and large spelled-out ordinals (which are not).

The difference is less than *one-hundredth* of 1 percent. (Hyphenated fraction meaning $1/100$.)

BUT: This year the company will be celebrating the *one hundredth* anniversary of its founding. (Unhyphenated ordinal meaning *100th*.)

- e.** Fractions expressed in figures should not be followed by endings like *sts*, *ds*, *nds*, or *ths* or by an *of* phrase.

3/200 (**NOT:** 3/200ths) 9/64 inch (**NOT:** 9/64ths of an inch)

If a sentence requires the use of an *of* phrase following the fraction, spell the fraction out.

three-quarters of an hour (**NOT:** $3/4$ of an hour)

- f.** A fractional expression may be used to indicate that one thing is smaller than another.

This year's sales of our aging hi-tech product line will be about *one-third* of what they were last year.

OR: This year's sales of our aging hi-tech product line will be about *two-thirds less* than they were last year.

BUT NOT: This year's sales of our aging hi-tech product line will be about *two times less* than they were last year. (Do not say that something is *two times less* or *two times smaller*. The term *times* implies the use of multiplication.)

Be careful in the way you describe something as smaller or larger. It is easy to convey a meaning you did not intend. Consider these examples:

The old library was *one-quarter smaller* than the new one. (If the new library has 12,000 square feet, the old library was three-quarters the size of the new library—9000 square feet.)

NOT: The new library is *one-quarter larger* than the old one. (This changes the meaning of the sentence above. If the old library had 9000 square feet, the new library would have gained only 2250 square feet, which is one-quarter of 9000.)

BUT: The new library is *one-third larger* than the old one. (This version preserves the original meaning. If the old library had 9000 square feet, the new one gained an additional 3000 square feet, an increase of one-third—for an accurate total of 12,000.)

Our new warehouse is *three times as large* as our old one. (If the old warehouse had 10,000 square feet, the new warehouse has 30,000 square feet.)

NOT: Our new warehouse is *three times larger* than our old one. (This sentence does not mean the same thing as the one above. If the old warehouse had 10,000 square feet, the new warehouse would have an additional 30,000 square feet—for a total of 40,000. Since the wording of this sentence could mislead a reader, write *three times as large* to avoid any ambiguity.)

NOTE: You can avoid the possibility of misstating these comparisons and misleading your reader by expressing these sizes without using fractional expressions.

The new library has 12,000 square feet, whereas the old library had only 9000 square feet.

428 Fractions in Mixed Numbers

- a.** Ordinarily use figures to express a mixed number (a whole number plus a fraction); for example, $3\frac{1}{4}$. Spell out a mixed number at the beginning of a sentence.

Our sales are now $4\frac{1}{2}$ times as large as they were in 2000.

We need to make plans for a $2\frac{1}{2}$ -day seminar.

(**RATHER THAN:** We need to make plans for a two-and-a-half-day seminar.)

Continued on page 152

¶429

Two and a quarter [OR: *Two and one-quarter*] inches of rain fell over the weekend. (Note the use of *and* between the whole number and the fraction.)

BETTER: Over the weekend we had $2\frac{1}{4}$ inches of rain. (Whenever possible, reword to avoid starting a sentence with a mixed number.)

- b. When constructing fractions that do not appear on the keyboard or in a special character set with word processing software, use the slash (/). Separate a whole number from a fraction by means of a space (not with a hyphen).

Can you still get a fixed-rate mortgage for $4\frac{3}{4}$? (NOT: 4-3/4.)

Last month factory inventories fell by $7\frac{3}{8}$ percent. (NOT: 7-3/8 percent.)

- c. In the same sentence, do not mix ready-made fractions ($\frac{1}{2}$, $\frac{1}{4}$) with those that you construct yourself ($\frac{7}{8}$, $\frac{5}{16}$).

from $3\frac{1}{2}$ to $3\frac{3}{4}$ OR: from $3\frac{1}{3}$ to $3\frac{5}{8}$

(BUT NOT: from $3\frac{1}{2}$ to $3\frac{5}{8}$)

NOTE: To simplify typing, convert constructed fractions (and simpler ones used in the same context) to a decimal form whenever feasible.

The rate on commercial paper has dropped from 5.75 percent a year ago to 5.5 percent today.

The yield on these municipal bonds rose from 5.25 percent to 5.5 percent in the past year.

- d. When a mixed number is followed by a unit of measure, use the plural form of the unit of measure.

$1\frac{1}{2}$ inches OR: 1.5 inches BUT: $\frac{3}{4}$ inch 1 inch

NOTE: If you are using an abbreviated form for a unit of measure, the abbreviation is usually the same for the singular and plural. (See ¶535a.)

The following rules (¶¶429–442) deal with measurements and with expressions of age and time (elements that often function as measurements). When these elements have technical or statistical significance, they are expressed in figures; otherwise, they are expressed in words.

Measurements

- 429** a. Most measurements have a technical significance and should be expressed in figures (even from 1 through 10) for emphasis or quick comprehension. However, spell out an isolated measurement that lacks technical significance.

A higher rate is charged on parcels over *2 pounds*.

BUT: I'm afraid I've gained another *two pounds* this week.

Add *1 quart* of sugar for each *4 quarts* of strawberries.

BUT: Last weekend we picked *four quarts* of strawberries from our own patch.

There is no charge for delivery within a *30-mile* radius of Chicago.

BUT: It's only a *thirty-mile* drive up to our summer place.

This pattern calls for *9 yards* of material.

BUT: I'm prepared to go the whole *nine yards* if that's what it takes to win this election.

I hope I can find an affordable *4x4* off-road vehicle next spring.

BUT: I hope I can find an affordable *four-wheel-drive* off-road vehicle next spring.

b. Dimensions, sizes, and exact temperature readings are always expressed in figures.

I'm looking for a 4- by 6-foot rug for my reception room. (See also ¶432.)

Please send me a half-dozen blue oxford shirts, size 17½/33.

The thermometer now stands at 32°F, a drop of 5 degrees in the past hour.

BUT: The temperature has been in the low *thirties* [OR: 30s] all week. (An indefinite reference to the temperature may be spelled out or expressed in figures.)

Next week the temperature is expected to reach the *mid-* to *upper 40s*. (For the use of a suspending hyphen after the prefix *mid*, see ¶833e.)

c. The expression *a 180-degree turn* is often used to indicate that a person has adopted a point of view that is the exact opposite of his or her original position.

Phil has done a *180-degree turn* in his thinking; he is now willing to support the proposal. (To turn 180 degrees is to go halfway around a circle. In this context it means that Phil has changed his mind; instead of opposing the proposal, he now favors it.)

Phil has done a *one-eighty* in his thinking about the proposal. (Spell out the number when it is referred to in this colloquial way.)

NOTE: Some writers mistakenly refer to this change of mind as a 360-degree turn. However, to turn 360 degrees is to go completely around a circle, that is, to return to the point from which one started. In this context, it would mean that Phil had not changed his thinking at all.

430 When a measurement consists of several elements, do not use commas to separate the elements. The measurement is considered a single unit.

The package weighed *8 pounds 11 ounces*.

The punch bowl holds *4 quarts 1 pint*.

Hal is *6 feet 8 inches* tall in his stocking feet.

The surgery lasted exactly *3 hours 35 minutes*.

NOTE: If this type of measurement is used as a compound modifier before a noun, use hyphens to connect all the elements as a single unit. (See also ¶817a.)

a 6-foot-8-inch man

431 The unit of measurement may be abbreviated (for example, *12 ft*) or expressed as a symbol (for example, *12'*) in technical material or in tables. If either an abbreviation or a symbol is used, the number must be expressed as a figure.

► For the style of abbreviations for units of measure, see ¶¶535–538; for the use of figures with abbreviations and symbols, see ¶453.

432 Dimensions may be expressed as follows:

GENERAL USAGE: a room 15 by 30 feet a 15- by 30-foot room

TECHNICAL USAGE: { a room 15 × 30 ft a 15- × 30-ft room
 { a room 15' × 30' a 15' × 30' room

GENERAL USAGE: a room 5 by 10 meters a 5- by 10-meter room

TECHNICAL USAGE: a room 5 × 10 m a 5- × 10-m room

¶433

GENERAL USAGE: 15 feet 6 inches by 30 feet 9 inches

TECHNICAL USAGE: 15 ft 6 in × 30 ft 9 in **OR:** 15' 6" × 30' 9"

► *For the use of suspending hyphens in dimensions, see ¶832.*

NOTE: When using symbols to signify feet and inches, select either the *straight* style of quotation marks (' for feet and " for inches) or preferably the slanted style (‘ and ’), as shown in the examples above. (See ¶543b.) If necessary, access an extended character set to avoid the use of curly quotation marks (‘ and ’) in expressions of feet and inches.

Ages and Anniversaries

433 Express ages in figures (including 1 through 10) when they are used as significant statistics or as technical measurements.

Ethel Kassarian, 38, has been promoted to executive director of marketing services in our Houston office.

The attached printout projects the amount of the monthly retirement benefit payable *at the age of* 65. (See the entry for *Age-aged-at the age of* on page 361.)

A computer literacy program is being offered to all *8- and 9-year-olds*. (See ¶832.)

This insurance policy is specially tailored for people in the *50-plus* age group.

You will be violating the law if you disregard the job application of a person *aged* 58. (**NOT:** age 58.)

NOTE: When age is expressed in years, months, and days, do not use commas to separate the elements; they make up a single unit.

On January 1 she will be *19 years 4 months and 17 days old*. (The *and* linking months and days may be omitted.)

434 Spell out ages in nontechnical references and in formal writing.

My son is *three years old* and my daughter is *one*.

This line of greeting cards celebrates life with children from birth to the terrible *twos*.

Our new product line is designed to appeal to *teens* and *twentysomethings*.

Have you ever tried keeping a group of *five-year-olds* happy and under control at the same time?

We've got a surprise party planned for Jack when he reaches the *Big Five-Oh*.

Shirley is in her early *forties*; her husband is in his *mid-fifties*.

My grandfather was in his *mid- to late sixties* when he struck it rich. (For the use of a suspending hyphen after the prefix *mid*, see ¶833e.)

435 Spell out ordinals in references to birthdays and anniversaries except where special emphasis or more than two words are required. (See also ¶¶424–425.)

on my thirtieth birthday

our Tenth Anniversary Sale

our twenty-fifth anniversary

OR: our 10th Anniversary Sale

her forty-first class reunion

the company's 135th anniversary

Periods of Time

436 a. Use figures (even from 1 through 10) to express periods of time when they are used as technical measurements or significant statistics (as in discounts, interest rates, and credit terms).

a 35-hour workweek

a 30-year mortgage

a note due in 6 months

NOTE: In legal documents, periods of time are often expressed twice: first in words and then in figures (enclosed in parentheses).

payable in ninety (90) days

NOT: payable in ninety (90 days)

- b.** Figures are also used with a slash in special expressions. (See also ¶294.)

a 24/7 telephone service (24 hours a day, 7 days a week)

a 4/10 work schedule (4 days a week, 10 hours a day)

- c.** When a period of time is expressed in hours, minutes, and seconds, do not use commas to separate the elements.

The hearing lasted only 3 hours 25 minutes.

Dana can run a mile in 5 minutes 50 seconds.

- 437** Spell out nontechnical references to periods of time unless the number requires more than two words.

a twenty-minute wait

the next twelve days

forty-odd years ago

eight hours later

a two-week cruise

three hundred years ago

a half hour from now

in twenty-four months

BUT: 350 years ago

BUT: 1½ hours from now (see ¶428a)

in the last thirty years

two thousand years ago

According to an African proverb, the best time to plant a tree is *twenty* years ago. The next best time is today.

Harry found a way at *the eleventh hour* to block the sale of the company.

- 438** Centuries may be expressed as follows:

the 1900s **OR:** the nineteen hundreds **OR:** the twentieth century

the twenty-first century twenty-first-century music **OR:** music of the twenty-first century

- 439** **a.** Decades may be expressed as follows:

the 1990s **OR:** the nineteen-nineties **OR:** the nineties **OR:** the '90s

the early 1960s **OR:** the late 1960s

the mid-1960s **OR:** the mid-sixties **OR:** the mid-'60s

in the 1980s and 1990s **OR:** in the '80s and '90s

(**BUT NOT:** in the 1980s and '90s **OR:** in the 1980s and nineties)

during the years 1993–2003 **OR:** from 1993 to 2003 (see ¶459b)

OR: between 1993 and 2003 (see ¶459b)

- *For the use of an apostrophe in contractions of figures (the '90s), see ¶505g; for the omission of an apostrophe in the plurals of figures (the 1990s), see ¶624a.*

- b.** There is still no consensus on how to refer to the first decade of the twenty-first century. One possibility is *the aughts* (the term used to refer to the first decade of the twentieth century). Among the other suggestions currently circulating are *the ohs*, *the zeros*, *the zips*, *the naughties*, and *the preteens*. Until one expression becomes established through usage as the dominant term, it may be safest to refer simply to *the first decade of the twenty-first century*.

- c.** Decades are not capitalized except in expressions such as *the Gay Nineties* and *the Roaring Twenties*.

¶440**Clock Time****440 With a.m., p.m., Noon, and Midnight**

- a. Always use figures with *a.m.* or *p.m.*

We take off at 8:45 a.m. The bus is due at 2 p.m.

By 8 p.m., CST, the first election returns should be in.

OR: By 8 p.m. (CST) the first election returns should be in.

► For abbreviations of time zones such as CST, see ¶534.

- b. In books, journals, and similar publications, *a.m.* and *p.m.* usually appear in small caps without internal space (A.M., P.M.). In other material, *a.m.* and *p.m.* typically appear in lowercase without internal space; however, you can use small caps if you have that option. Avoid the use of all-caps.

- c. For time “on the hour,” zeros are not needed to denote minutes unless you want to give special emphasis to the precise hour.

Our store is open from 9:30 a.m. to 6 p.m. (**OR:** 6:00 p.m. for special emphasis).

BUT: Our store is always open until 6:00. (See ¶442a for the use of zeros when *a.m.* or *p.m.* is omitted.)

You may call me between 7:30 a.m. and 4 p.m., Monday through Friday. You can reach me on the weekend between 2 p.m. and 5 p.m. (**NOT:** between 2 p.m.–5 p.m.; see ¶459b.)

We always close from 12 noon to 1:30 p.m. (**NOT:** from 12 noon–1:30 p.m.; see ¶459b.)

From a church bulletin: The Low Self-Esteem Support Group will meet on Thursday between 9:30 a.m. and 11 a.m. Please use the back door.

In tables, however, when some entries are given in hours and minutes, add a colon and two zeros to exact hours to maintain a uniform appearance.

	Arr.	Dep.
	8:45	9:10
	9:00	9:25
	9:50	10:00

► For other illustrations showing the alignment of clock times in columns, see ¶1627b; for the 24-hour system of expressing clock times, see ¶1627c.

- d. Do not use *a.m.* or *p.m.* unless figures are used.

this morning	tomorrow afternoon
(NOT: this a.m.)	(NOT: tomorrow p.m.)

- e. Do not use *a.m.* or *p.m.* with *o’clock*.

6 o’clock	OR: 6 p.m.	ten o’clock	OR: 10 a.m.
(NOT: 6 p.m. o’clock)		(NOT: 10 a.m. o’clock)	

NOTE: The expression *o’clock* is more formal than *a.m.* or *p.m.*

- f. Do not use *a.m.* or *p.m.* with the expressions *in the morning*, *in the afternoon*, *in the evening*, and *at night*. The abbreviations themselves already convey one of these meanings.

at 9 p.m. **OR:** at nine in the evening (**NOT:** at 9 p.m. in the evening)

- g. Use a colon (without space before or after) to separate hours from minutes (as in 3:22). Many countries use a period instead of a colon: for example, 9.40 a.m. rather than 9:40 a.m.

- h.** The times *noon* and *midnight* may be expressed in words alone. However, use the forms *12 noon* and *12 midnight* when these times are given with other times expressed in figures.

Dinner is served in the main dining room until *midnight*.

BUT: Dinner is served from *6 p.m.* until *12 midnight*.

NOTE: Plane and train schedules often refer to noon as *12 p.m.* and midnight as *12 a.m.*, but in other contexts these designations are not as clear as the forms shown above.

441 With *O'Clock*

- a. With *o'clock*, use figures for emphasis or words for formality.

NOTE: Do not use a colon and two zeros when using *o'clock* to express time “on the hour.”

Please try to arrive before 8 o'clock tonight. (**NOT:** 8:00 o'clock.)

- b.** To express hours and minutes with *o'clock*, use this style:

OR: half after four o'clock

(BUT NOT: four-thirty o'clock **OR:** 4:30 o'clock)

- c. Expressions of time containing *o'clock* may be reinforced by such phrases as *in the morning* and *in the afternoon*.

10 o'clock at night seven o'clock in the morning

For quick comprehension, use the forms *10 p.m.* and *7 a.m.*

442 Without *a.m.*, *p.m.*, or *O'Clock*

- a. When expressing time without *a.m.*, *p.m.*, or *o'clock*, either spell the time out—or for quick comprehension—convert the expression to an all-figure style.

arrive at eight **OR:** arrive at 8:00 (**NOT:** at 8)

five after six **OR:** 6:05

a quarter past ten **OR:** 10:15

twenty of four **OR:** 3:40

a quarter to five **OR:** a quarter of five **OR:** 4:45

half past nine **OR:** **nine-thirty** **OR:** **9:30**

nine forty-two **OR:** 9:42

- b. A hyphen is used between hours and minutes (*seven-thirty*) but not if the minutes must be hyphenated (*seven thirty-five*).

- c. Another way of expressing clock time without the use of *a.m.*, *p.m.*, or *o'clock* is the "24-hour system," in which 1 a.m. is 0100 and 1 p.m. is 1300. (The guidelines presented in §§440–441 reflect the "12-hour system" of expressing clock time.)

This 24-hour system is reflected in a standard issued by the International Organization for Standardization (ISO), a network of the standards institutes of

¶443

157 countries. This standard calls for clock time to be expressed in an hour-minute-second sequence—HH:MM:SS—with the elements separated by colons. In ordinary use, when seconds are not included in the expression of clock time, colons are often omitted.

To convert an expression of “a.m.” clock time to the 24-hour system, add zeros to the “a.m.” time as necessary to express hours and minutes as two digits.

2 a.m. is expressed as 0200

7:05 a.m. is expressed as 0705

To convert an expression of “p.m.” clock time to the 24-hour system, add 12 to the “p.m.” time. Add zeros as necessary to express hours and minutes as two digits.

10:15 p.m. is expressed as 2215

8 p.m. is expressed as 2000

For the period between 12 midnight and 1 a.m., use two zeros to represent the hour.

12:18 a.m. is expressed as 0018

Midnight may be expressed two ways, depending on whether your point of reference is the day just ending or the day just beginning.

starting at 2230 and ending at 2400 **OR:** starting at 0000 and ending at 0230

The abbreviations *a.m.* and *p.m.* are not used in the 24-hour system, because times expressed simply as 0400 and 1600 make it quite clear whether one is referring to 4 o’clock in the morning or 4 in the afternoon.

The 24-hour system of time is widely used throughout the world, although a number of countries also use the 12-hour system for certain occasions. The United States is one of the few countries that still use the 12-hour system as their basic style, but the 24-hour system is used by the U.S. armed services and is often referred to as “military time.”

NOTE: In view of the different formats used throughout the world to express time, be sensitive to the possibility of confusion if you are creating a document that will be read by people in different countries.

► *For an illustration of the 24-hour system of expressing clock times, see ¶1627c.*

The following rules (¶¶443–455) deal with situations in which numbers are always expressed in figures.

Decimals

443 Always write decimals in figures. Never insert commas in the decimal part of a number.

665.3184368 (no comma in decimal part of the number)

58,919.23785 (comma used in whole part of the number)

► *For the metric style of writing decimals, see ¶461b.*

- 444** When a decimal stands alone (without a whole number preceding the decimal point), insert a zero before the decimal point. (Reason: The zero keeps the reader from overlooking the decimal point.)

0.55 inch 0.08 gram

EXCEPTIONS: a Colt .45; a .357 Magnum revolver; a .22-caliber rifle

- 445** Ordinarily, drop the zero at the end of a decimal (for example, write 2.787 rather than 2.7870). However, retain the zero (a) if you wish to emphasize that the decimal is an exact number or (b) if the decimal has been rounded off from a longer figure. In a column of figures add zeros to the end of a decimal in order to make the number as long as other numbers in the column. (For illustrations, see ¶¶1627, 1629, 1630, 1632.)

- 446** Do not begin a sentence with a decimal figure.

The temperature was 63.7.

(**NOT:** 63.7 was the temperature.)

Percentages

- 447** a. Express percentages in figures, and spell out the word *percent*. (See ¶¶421–422 for percentages at the beginning of a sentence.)

When your mortgage rate goes from 5 *percent* to 5.5 *percent*, it may have increased by less than 1 percentage point, but you'll pay 10 *percent* more in interest.

Yogi Berra once said, "Baseball is 90 *percent* mental. The other half is physical."

My client expected a 25 *percent* discount. (**NOT:** a 25-percent discount.)

Our terms are 2 *percent* 10 days, net 30 days. (Abbreviate these credit terms as 2/10, n/30 on invoices and other business forms.)

NOTE: The % symbol may be used in tables, on business forms, and in statistical or technical material.

- b. Spell out the number when the percentage does not represent a technical measurement. (See ¶401c.)

We're behind you a *hundred percent*.

- 448** a. Fractional percentages *under 1 percent* may be expressed as follows:

one half of 1 percent **OR:** 0.5 percent (see ¶444)

- b. Fractional percentages *over 1 percent* should be expressed in figures.

7½ percent **OR:** 7.5 percent 9¼ percent **OR:** 9.25 percent

- 449** In a range or series of percentages, the word *percent* follows the last figure only. If the symbol % is used (see ¶447a, note), it must follow each figure.

We give discounts of 10, 20, and 30 *percent*. (**BUT:** 10%, 20%, and 30%).

► *For the use of % in a column of figures, see ¶1630; for the use of percent and percentage, see page 394.*

Ratios and Proportions

- 450** a. As a rule, write ratios and proportions in figures.

a proportion of 5 to 1 **OR:** a 5-to-1 ratio **OR:** a 5:1 ratio

the odds are 100 to 1 **OR:** a 100-to-1 shot

- b. A nontechnical reference may be spelled out.

a fifty-fifty chance of success **OR:** a 50-50 chance of success

¶451**Scores and Voting Results**

451 Use figures (even for 1 through 10) to express scores and voting results.

a score of 85 on the test	a vote of 17 to 6	a 5-4 Supreme Court decision
New York 8, Chicago 6	BUT: a 17-6 vote	a Senate vote of 58-42

Numbers Referred to as Numbers

452 Always use figures to express numbers referred to as numbers.

pick a number from 1 to 10	divide by 16	multiply by %
----------------------------	--------------	---------------

Figures With Abbreviations and Symbols

453 a. Always use figures with abbreviations and symbols.

\$50	10:15 a.m.	43%	2 in	OR: 2"	FY2010 (see ¶1621c)
65¢	6 p.m.	No. 631	I-95		200 km (see ¶537a)

b. If a symbol is used in a range of numbers, it should be repeated with each number. A full word or an abbreviation used in place of the symbol is given only with the last number.

20°–30°C	BUT: 20 to 30 degrees Celsius (see ¶537b)
5½" × 8"	5½ by 8 inches OR: 5½ × 8 in
9' × 12'	9 by 12 feet OR: 9 × 12 ft
30%–40%	30 to 40 percent
50¢–60¢	50 to 60 cents
\$70–\$80	seventy to eighty dollars

NOTE: A symbol should be used with each number in a series.

discounts of 5%, 10%, and 15%	BUT: discounts of 5, 10, and 15 percent
-------------------------------	--

Telephone Numbers

454 a. Insert a hyphen after the first three digits of a telephone number; for example, 555-1789. If a company chooses to express its phone number partially or entirely in words, follow the company's style; for example, 345-GIFT, 4-ANGIES, JOB-HUNT, CASH-NOW, GOFEDEX, PICK-UPS.

b. When providing a telephone extension along with the main number, use the following form: 555-4890, Ext. 6041. (In formal correspondence, spell out *Extension*.)

c. When the area code precedes a phone number, there are several ways to treat the number. The style most commonly seen, especially in text material, uses a hyphen (with no space on either side) to connect the elements: 707-555-3998.

The style that encloses the area code in parentheses—(707) 555-3998—is also frequently used, but it does not work well in text material when the phone number as a whole has to be enclosed in parentheses.

You can reach me by phone (707-555-3998) during normal business hours.

BUT NOT: . . . by phone ((707) 555-3998) during normal business hours.

In a growing number of areas, it has become necessary to use the area code even for local calls. In that case enclosing the area code in parentheses is inappropriate, since the area code is now an essential part of the phone number.

When telephone numbers are displayed (for example, in letterheads and on business cards), other styles are often seen. Some writers prefer to use a slash after the area code: 707/555-3998. Others simply leave spaces between the elements: 707 555 3998. And an up-and-coming style—707.555.3998—uses periods to separate the elements; because these periods resemble the dots in e-mail addresses, this style is growing in popularity.

► *For the types of phone numbers used in business letterheads, see §§1310–1311.*

- d. When an access code precedes the area code and the phone number, use a hyphen to connect all the elements.

Please use our toll-free, 24/7 phone number: 1-877-555-6400.

NOTE: Do not use “800 number” as a synonym for “toll-free phone number,” since toll-free numbers may now begin with a different area code—for example, 855, 866, 877, and 888.

- e. International phone numbers typically contain a series of special access codes. Use hyphens to connect all the elements.

011-64-9-555-1523

└ international access code from the United States
 └ country access code
 └ city access code

NOTE: The international access code 011 is valid only for international calls originating within the United States.

- f. When you are providing a U.S. phone number in a printed or electronic document that may elicit calls from other countries, use a plus sign to represent the international access code and the numeral 1 to represent the country access code for the United States. For example:

+ 1-415-555-2998

└ a symbol representing another country's international access code
 └ the country access code for the United States
 └ a U.S. area code

Since each country has its own international access code—for example, 191 is the code for outgoing calls from France—use a plus sign rather than a specific international access code unless you are sure all international calls to your number will come from only one country.

NOTE: Telephone calls between the United States and Canada, Puerto Rico, and most places in the Caribbean/Atlantic calling region do not require the use of international access codes.

¶455**No. or # With Figures**

- 455 a.** If the term *number* precedes a figure, express it as an abbreviation (singular: *No.*; plural: *Nos.*). At the beginning of a sentence, however, spell out *Number* to prevent misreading.

Our check covers the following invoices: *Nos.* 8592, 8653, and 8654.

Number 82175 has been assigned to your new policy. (NOT: *No.* 82175 . . .)

Becky Noonan is our *No.* 1 resource on matters covered by environmental law. (See ¶817e.)

Kyle Kenton will be the *No.* 2 person after the merger takes place.

- b.** If an identifying noun precedes the figure (such as *Invoice*, *Check*, *Room*, or *Box*), the abbreviation *No.* is usually unnecessary.

Our check covers *Invoices* 8592, 8653, and 8654. (See ¶463 for exceptions.)

- c.** The symbol # may be used on business forms and in technical material.

► *For the capitalization of nouns preceding figures, see ¶359.*

The following rules (¶¶456–470) deal with two technical aspects of style: (1) treating numbers that are adjacent or in a sequence and (2) expressing numbers in figures, words, roman numerals, or abbreviated forms.

Adjacent Numbers

- 456** When two numbers come together in a sentence and both are in figures or both are in words, separate them with a comma.

In 2009, 78 percent of our field representatives exceeded their sales goal.

Although the staff meeting was scheduled for *two*, *ten* people did not show up.

On page 192, 25 problems are provided for review purposes.

On Account 53512, \$125.40 is the balance outstanding.

On May 8, 18 customers called to complain.

NOTE: No comma is needed when one number is in figures and the other is in words.

On May 9 *seven* customers called to complain.

- 457** When two numbers come together and one is part of a compound modifier (see ¶817), express one of the numbers in figures and the other in words. As a rule, spell out the first number unless the second number would make a significantly shorter word.

two 8-room houses

BUT: 500 four-page leaflets

sixty \$5 bills

150 five-dollar bills

ten \$50 gift certificates

225 fifty-dollar certificates

Numbers in a Sequence

- 458** Use commas to separate numbers that do not represent a continuous sequence.

on pages 18, 20, and 28

the years 2000, 2004, and 2008

- 459 a.** Use an en dash (or a single hyphen if you do not have access to an en dash) to link two figures that represent a continuous sequence. The en dash means “up to and including” in the following expressions:

on pages 18–28

in Articles I–III

during the week of May 15–21

during the years 2003–2006

NOTE: Do not insert space before or after the en dash or the hyphen. (See also ¶299f.)

► *For a full discussion of the use of the en dash and additional examples, see ¶217.*

- b.** Do not use the en dash (or hyphen) if the sequence is introduced by the word *from* or *between*.

from 1998 to 2001
 (NOT: from 1998–2001)
 from 11 a.m. to 2 p.m.
 (NOT: from 11 a.m.–2 p.m.)

between 2009 and 2010
 (NOT: between 2009–2010)
 between 5 p.m. and 8 p.m.
 (NOT: between 5 p.m.–8 p.m.)

- c.** When you want to indicate that some numerical quantity has risen or decreased from “here” to “there,” it is customary to express the “from” number before the “to” number.

The latest sales projections indicate an increase this year *from* \$5.2 million *to* \$6.3 million.

Some authorities recommend expressing the “to” number before the “from” number to avoid a possible misreading.

The latest sales projections indicate an increase this year *to* \$6.3 million *from* \$5.2 million. (This wording is intended to prevent readers from concluding that the actual amount of the sales increase will fall somewhere *between* \$5.2 million *and* \$6.3 million.)

If no misreading seems likely, use a “from here to there” sequence.

- 460 a.** In a continuous sequence of figures connected by an en dash or a hyphen, the second figure may be expressed in abbreviated form. This style is used for sequences of page numbers or years when they occur quite frequently. In isolated cases, do not abbreviate. (See ¶217.)

1997–98 (OR: 1997–1998)	pages 110–12 (OR: pages 110–112)
2008–9 (OR: 2008–2009)	pages 101–2 (OR: pages 101–102)

NOTE: An apostrophe is used to signify the omission of numbers from a date that stands alone (for example, *during the year of '09*). However, no apostrophe is used when an abbreviated number appears in a sequence of dates (*2008–9*).

- b.** Do not abbreviate the second number when the first number ends in two zeros.

2000–2009 (NOT: 2000–09)	pages 100–101 (NOT: pages 100–1)
--------------------------	----------------------------------

- c.** Do not abbreviate the second number when it starts with different digits.

1998–2008 (NOT: 1998–08)	pages 998–1004 (NOT: pages 998–04)
--------------------------	------------------------------------

- d.** Do not abbreviate the second number when it is under 100.

46–48 C.E.	pages 46–48
------------	-------------

► *For a usage note on C.E., see the entry for A.D.–B.C. on page 359.*

Expressing Numbers in Figures

- 461 a.** When numbers run to five or more figures, use commas to separate thousands, hundreds of thousands, millions, etc., in *whole* numbers. Do not use commas in the decimal part of a number. (See also ¶443.)

12,375	147,300	\$11,275,478	4,300,000,000	BUT: 70,650.37248
--------	---------	--------------	---------------	-------------------

Continued on page 164

¶462

BUT: The Dow Jones Industrial Average closed at 11722.98 on January 14, 2000. (A comma is not used in these five-digit numbers. See the illustrations on pages 611 and 615.)

Now that Pluto is no longer considered a planet, it has been assigned the following asteroid number: 134340. (Commas are not used in these numbers.)

NOTE: The comma is now commonly omitted in four-digit whole numbers except in columns with larger numbers that require commas.

3500 **OR:** 3,500

\$2000.50 **OR:** \$2,000.50

- b.** In metric quantities, use a space to separate digits into groups of three. Separate whole numbers and decimal fractions, counting from the decimal point.

12 945 181 (**RATHER THAN:** 12,945,181) 0.594 31 (**RATHER THAN:** 0.59431)

NOTE: When a four-digit number is used as a metric quantity, do not leave a space unless the number is used in a column that has larger numbers.

5181 **OR:** 5 181

0.3725 **OR:** 0.372 5

- 462** Do not use commas in year numbers, page numbers, house or building numbers, room numbers, ZIP Code numbers, telephone numbers, heat units, and decimal parts of numbers.

2011

8760 Sunset Drive

New York, NY 10021

1500°C

page 1246

Room 1804

602-555-2174 (see ¶454)

13,664.9999

- 463** Serial numbers (for example, invoice, style, model, or lot numbers) are usually written without commas. However, some serial numbers are written with hyphens, spaces, or other devices. In all cases follow the style of the source.

Invoice 38162

BUT: Social Security No. 152-22-8285

Patent No. 222,341

► *For the capitalization of nouns before numbers, see ¶359; for the use of No., see ¶455.*

- 464** To form the plurals of figures, add *s*. (See ¶624a.)

in the '90s (decades)

in the 90s (temperature)

Expressing Numbers in Words

- 465 a.** When expressing numbers in words, hyphenate all compound numbers between 21 and 99 (or 21st and 99th), whether they stand alone or are part of a number over 100.

twenty-one

twenty-one hundred

twenty-first

twenty-one hundredreth

seven hundred and twenty-five (*and* may be omitted)

five thousand seven hundred and twenty-five (no commas)

- b.** Do not hyphenate other words in a spelled-out number over 99.

one hundred

nineteen hundred

six hundred million

two thousand

three hundred thousand

fifty-eight trillion

- c.** When a spelled-out number appears in a place name, follow the style shown in an authoritative postal directory or atlas.

Twentynine Palms, California

Ninety Six, South Carolina

Eighty Four, Pennsylvania

Thousand Oaks, California

d. Spell out the word *zero*, but express it as a figure when it is part of a larger number.

a ceremony at Ground Zero

zero percent financing (for formality)

adopted a zero-tolerance policy

0% financing (for emphasis)

When a decimal stands alone, insert a zero before the decimal point; for example, 0.375 inch. (See also ¶444.)

e. Use an en dash (or a hyphen if necessary) to create a minus sign. (See ¶¶217b, 1631e.)

► For the capitalization of hyphenated numbers, see ¶363a.

466 When there are two ways to express a number in words, choose the simpler form. For example, use the form *fifteen hundred* rather than *one thousand five hundred*. (The longer form is rarely used except in formal expressions of dates. See ¶411.)

467 To form the plurals of spelled-out numbers, add *s* or *es*. For numbers ending in *y*, change the *y* to *i* before *es*. (See ¶624b.)

ones	twos	threes	sixes	twenty-fives
thirds	sixths	eighths	twenties	thirty-seconds

► For spelled-out dates, see ¶411; for spelled-out amounts of money, see ¶¶413c, 414, 417, 418a, 420; for spelled-out fractions, see ¶¶427–428.

Expressing Numbers in Roman Numerals

468 Roman numerals are used chiefly for the important divisions of literary and legislative material, for main topics in outlines, for dates, and in proper names.

Chapter VI	Title IX	MCMXCIX (1999)	Thomas E. Granger II
Volume III	World War II	MMIX (2009)	Pope John XXIII

NOTE: Pages in the front section of a book or a formal report (such as the preface and table of contents) are usually numbered in small roman numerals: *iii*, *iv*, *v*, etc. Other pages are numbered in arabic numerals: 1, 2, 3, etc. (See ¶¶1420, 1427.)

469 To form roman numerals, consult the following table.

1	I	13	XIII	60	LX	1,100	MC
2	II	14	XIV	70	LXX	1,400	MCD
3	III	15	XV	80	LXXX	1,500	MD
4	IV	19	XIX	90	XC	1,600	MDC
5	V	20	XX	100	C	1,900	MCM
6	VI	21	XXI	200	CC	2,000	MM
7	VII	24	XXIV	400	CD	5,000	᠁
8	VIII	25	XXV	500	D	10,000	᠁
9	IX	29	XXIX	600	DC	50,000	᠁
10	X	30	XXX	800	DCCC	100,000	᠁
11	XI	40	XL	900	CM	500,000	᠁
12	XII	50	L	1,000	M	1,000,000	᠁

NOTE: A bar appearing over any roman numeral indicates that the original value of the numeral is to be multiplied by 1000.

¶470**Expressing Large Numbers in Abbreviated Form**

- 470** a. In technical and informal contexts and in material where space is tight (such as tables and classified ads), large numbers may be abbreviated.

ROMAN STYLE: 48M (48,000); 6.3M (6,300,000)

METRIC STYLE: 31K (31,000); K stands for *kilo*, signifying thousands

5.2M (5,200,000); M stands for *mega*, signifying millions

8.76G (8,760,000,000); G stands for *giga*, signifying billions

9.4T (9,400,000,000,000); T stands for *tera*, signifying trillions

- b. Using *M* to express large numbers can create confusion, because *M* represents *thousands* in the roman style and *millions* in the metric style. As a general rule, use *M* only if you can be sure your readers will know what *M* stands for. When you cannot be sure who your readers are likely to be, either avoid using *M* or indicate at the outset what meaning you have assigned to it.
- c. People who work in the financial industry typically use different abbreviations to express *millions* and *billions*. One common practice is to use *B* to indicate billions and *MM* to indicate millions, reserving the use of *M* to indicate thousands. Do not use these special abbreviations unless you are sure your readers will understand your intended meaning. If your organization has established a special style for these abbreviations, be sure to follow that style.
- *Division of large numbers at the end of a line: see ¶915.*
House, street, and ZIP Code numbers: see ¶¶1328–1332.

Miscellaneous Expressions (¶¶547–551)

► For definitions of grammatical terms, see the appropriate entries in the *Glossary of Grammatical Terms* (Appendix A).

¶501

Basic Rules

► For a perspective on the rules for using abbreviations, see the essay in the frontmatter on pages xxxix–xl.

When to Use Abbreviations

501 a. An abbreviation is a shortened form of a word or phrase used primarily to save space. Abbreviations occur most frequently in technical writing, statistical material, tables, and notes.

b. Abbreviations that are pronounced letter by letter—for example, *IBM*, *Ph.D.*, *p.m.*—are called *initialisms*. Abbreviations that are pronounced as words—for example, *ZIP* (Code), *AIDS*, *laser*—are called *acronyms* (see ¶522). Consider these two expressions: *CT scan* and *CAT scan*. Both refer to a procedure used by radiologists (computerized axial tomography). *CT* is an initialism; *CAT* is an acronym. Occasionally, an abbreviation may have two acceptable pronunciations—for example, *URL* (which stands for *uniform resource locator* and refers to a specific Web address for an individual or an organization). When *URL* is pronounced *yoo-ar-ell*, it is an initialism; when pronounced *erl*, it is an acronym. As another example, consider *ROTC*: when pronounced letter by letter, this abbreviation is an initialism; when pronounced *ROT-see*, it is an acronym.

NOTE: The use of *a* or *an* before an abbreviation will depend on whether the abbreviation is regarded as an initialism (and pronounced letter by letter) or is considered an acronym (and pronounced as a word). See the entry for *a—an* on page 358.

c. When using an abbreviation, do not follow it with a word that is part of the abbreviation. (See also ¶522e.)

a collection of CDs (**NOT:** CD discs)

runs on AC (**NOT:** AC current)

find an ATM (**NOT:** an ATM machine)

tested for HIV (**NOT:** HIV virus)

forgot my PIN (**NOT:** PIN number)

a list of ISBNs (**NOT:** ISBN numbers)

► For examples of redundant computer expressions to be avoided, see ¶544b.

502 a. In business writing, abbreviations are appropriate in expedient documents (such as business forms, catalogs, and routine e-mail messages, memos, and letters between business offices), where the emphasis is on communicating data in the briefest form. In other kinds of writing, where a more formal style is appropriate, use abbreviations sparingly. When in doubt, spell it out.

b. Some abbreviations are always acceptable, even in the most formal contexts: those that precede or follow personal names (such as *Mr.*, *Ms.*, *Mrs.*, *Jr.*, *Sr.*, *Esq.*, *Ph.D.*, *S.J.*); those that are part of an organization's legal name (such as *Co.*, *Inc.*, *Ltd.*); those used in expressions of time (such as *a.m.*, *p.m.*, *CST*, *EDT*); and a few miscellaneous expressions (such as *A.D.* and *B.C.*).

c. Organizations with long names are now commonly identified by their initials in all but the most formal writing (for example, *NAACP*, *SEC*). In fact, a number of organizations have now adopted those abbreviations as their formal names. (See ¶520b.)

- d. Days of the week, names of the months, geographic names, and units of measure should be abbreviated only on business forms, in expedient documents, and in tables, lists, and narrow columns of text; for example, in a newsletter or brochure where space is tight. (See ¶532 for abbreviations of months.)
- e. When an abbreviation is only one or two keystrokes shorter than the full word (for example, *Pt.* for *Part*), do not bother to abbreviate except to achieve consistency in a context where similar terms are being abbreviated.

503 Consult a dictionary or an authoritative reference work for the acceptable forms of abbreviations. When a term may be abbreviated in several ways, choose the form that is shortest without sacrifice of clarity.

continued:	Use <i>cont.</i> rather than <i>contd.</i>
2 pounds:	Use <i>2 lb</i> rather than <i>2 lbs</i> (see ¶620a).
Enclosures 2:	Use <i>Enc. 2</i> rather than <i>Encs. 2</i> or <i>Encl. 2</i> .
second, third:	Use <i>2d, 3d</i> rather than <i>2nd, 3rd</i> (see also ¶425b, note).
megabyte, kilobyte:	Use <i>MB, KB</i> for clarity rather than <i>M, K</i> (see also ¶470b).

NOTE: *Merriam-Webster's Collegiate Dictionary*, Eleventh Edition, the basic authority for all spelling in this manual, shows virtually every abbreviation without any periods, even though in actual practice many abbreviations are still written with periods. Thus, for example, unless your Latin is very good, you may not realize that in the expression *et al.*, the word *et* is a full word (meaning “and”) and requires no period, whereas *al.* is short for *alii* (meaning “others”) and does require a period. Under these circumstances, for specific abbreviations not shown in this manual, you will need to consult another up-to-date dictionary.

The forms shown here reflect the spellings found in *Merriam-Webster*, but the punctuation is based on observations of actual practice and is consistent with the style recommended by other authorities.

504 Be consistent within the same material: do not abbreviate a term in some sentences and spell it out in other sentences. Moreover, having selected one form of an abbreviation (say, *c.o.d.*), do not use a different style (*COD*) elsewhere in the same material. (See ¶542.)

NOTE: If you want to use an abbreviation that may not be familiar to your reader, spell out the full term when it is first used and then provide the abbreviation in parentheses. Thereafter, you can use the abbreviation freely without further explanation.

At the end of *fiscal year (FY) 2009*, we showed a profit of \$1.2 million; at the end of *FY2010*, however, we showed a loss of \$1.8 million.

However, if your reader is more likely to recognize the abbreviation, give the abbreviation first and then provide the full term in parentheses.

At the end of *FY2009 (fiscal year 2009)* . . .

After you leave your job, you will be able to get short-term health coverage through COBRA (an insurance plan established by the Consolidated Omnibus Budget Reconciliation Act).

505 a. Given a choice between an abbreviation and a contraction, choose the abbreviation. It not only looks better but is easier to read.

cont. (**RATHER THAN:** *cont'd*)

dept. (**RATHER THAN:** *dep't*)

govt. (**RATHER THAN:** *gov't*)

mfg. (**RATHER THAN:** *m'fg*)

Continued on page 170

1505

- b.** When a word or phrase is shortened by contraction, an apostrophe is inserted at the exact point where letters are omitted and no period follows the contraction except at the end of a sentence.

you're	doesn't	could've	rock 'n' roll	ne'er-do-well	up and at 'em
let's	don't	o'clock	s'mores	nor'easter	ol' boy network
EXCEPTIONS: c'mon (come on)			wannabes (want-to-bes)		
li'l (little)			zine (magazine)		

NOTE: Respect a company's preference when it uses a contraction in its corporate name or in the name of a product.

Wash'n Dri	Spray 'n Wash	Dunkin' Donuts	Bran'nola
Sweet'N Low	Linens 'n Things	Cap'n Crunch	Chock full o' Nuts
Shake 'n Bake	Light n' Lively	Ship 'n Shore	Land O'Lakes

- c.** As a rule, contractions are used only in writing that aims for a relaxed, colloquial tone.

If you can't lick 'em, join 'em.	How've you been?
You ain't seen nothin' yet.	What will it cost to fill 'er up?
We're moving out to the 'burbs.	What's the matter with him?
I'd've gone if he'd invited me.	You shouldn't've done it.
If I'd known you were interested in the topic, I would've asked you to join the discussion. (The contracted phrase here stands for "If I had known.")	
(NOT: If I'd've known . . . This contracted phrase stands for "If I had have known" or "If I would have known," either of which is incorrect.)	

However, contractions of verb phrases (such as *can't* for *cannot*) are commonly used in business communications where the writer is striving for an easy, colloquial tone. In formal writing, contractions are not used (except for *o'clock*, which is considered a more formal way to express time than *a.m.* or *p.m.*).

- d.** Be sure to distinguish certain contractions from possessive pronouns that sound the same but do not use an apostrophe.

Ron has been pushing the Kirschner proposal for all <i>it's</i> worth. (In other words, for all <i>it is</i> worth.)
Let's get an outside consultant to analyze the Kirschner proposal and assess <i>its</i> worth. (Here <i>its</i> is a possessive pronoun; no apostrophe should be used.)
We had a lot of snow on Sunday, but most of <i>it's</i> melted now. (In other words, <i>it has</i> melted.)

► *For further examples and a test on whether to use a contraction or a possessive pronoun, see ¶1056e.*

- e.** Note that certain contractions can have more than one meaning.

What's her name? (What <i>is</i> her name?)
What's he do for a living? (What <i>does</i> he do for a living?)
What's been happening? (What <i>has</i> been happening?)
When's the last time you saw her? (When <i>was</i> the last time you saw her?)
Let's find out. (Let <i>us</i> find out.) (For a usage note on <i>let's</i> , see page 389.)

- f.** When adding an apostrophe plus *s* to a noun, be alert to the possibility of confusing your reader, who might be momentarily unsure whether the apostrophe plus *s* represents a contraction for *is* or serves as a sign of the possessive.

Mrs. Rushmore's teaching has won many accolades for the results she achieves with her students. (In this sentence *Mrs. Rushmore's* is a possessive form.)

Mrs. Rushmore's teaching her students a new technique for solving these problems. (Here *Mrs. Rushmore's* stands for *Mrs. Rushmore is* but could be initially misconstrued as a possessive form.)

CLEARER: Mrs. Rushmore is teaching her students a new technique for solving these problems.

- g.** When typing an apostrophe to indicate the omission of one or more letters or figures, make sure the apostrophe is a *closing* quotation mark ('), not an *opening* mark ('). When the apostrophe occurs within a word (for example, *doesn't* or *o'clock*), you will automatically get a closing quotation mark. However, if the apostrophe occurs at the beginning of a word or a number (for example, '09 for 2009), you are likely to get an opening mark ('09). One way to solve this problem is to type the apostrophe twice ("'09) and backspace to delete the opening mark; you will be left with the closing mark you want ('09). The *help* feature or user's manual of your word processing program may suggest another way to create a closing quotation mark at the beginning of a word.

'stache

rock 'n' roll (**NOT:** rock 'n' roll)

'nuff said

Shake 'n Bake (**NOT:** Shake 'n Bake)

NOTE: If you frequently need to type an apostrophe at the beginning of a word or a figure, consider using a straight apostrophe (') rather than a curved (') or slanted (') apostrophe, since the straight apostrophe serves as both an opening and a closing quotation mark. You may be able to deselect the *smart quotes* feature of your word processing program so that the program automatically provides straight marks for either single or double quotation marks.

Punctuation and Spacing With Abbreviations

- 506** **a.** The abbreviation of a single word requires a period at the end.

Mrs.	Jr.	Corp.	pp.	Wed.
misc.	Esq.	Inc.	Nos.	Oct.

NOTE: When the abbreviations appear in the names of organizations and products, the period is occasionally omitted. Always follow the style of the organization.

Dr. Denton's clothing

BUT: Dr Pepper soft drinks (no period after *Dr*)

- b.** Units of measurement are now commonly written without periods. (See ¶¶535a, 538b.)

- c.** In certain expressions, abbreviations are written without periods. Consider the treatment of *Gen*, the abbreviation for *Generation*:

Gen X (the generation born in the 1960s and 1970s)

Gen Y (the generation born in the 1980s and 1990s)

- 507** Almost all lowercase abbreviations made up of single initials require a period after each initial but no space after each internal period.

a.m.	i.e.	f.o.b.	BUT: rpm	mpg
p.m.	e.g.	e.o.m.	cpi	mph

► For the omission of periods with abbreviations of units of measure, see ¶535a; for the definition of business abbreviations like f.o.b. and e.o.m., see ¶541.

¶508

508 All-cap abbreviations made up of single initials normally require no periods and no internal space.

AMA	IRS	CEO	PIN	WWW
UAW	UN	VIP	ATM	RAM
PBS	AICPA	PSAT	IRA	OCR
MIT	NFL	VCR	UFO	FTP

EXCEPTIONS: Retain the periods in abbreviations of geographic names (such as *U.S.A.*) and a few expressions (such as *A.D.*, *B.C.*, and *P.O.*). Also retain the periods when they are used in the names of organizations and products (for example, *B.V.D. underwear*, *S.O.S. scouring pads*).

► *For the use of periods in academic abbreviations consisting of single initials—for example, B.A. (bachelor of arts) and M.S. (master of science)—see ¶519.*

509

If an abbreviation of two or more words consists of more than single initials, insert a period and a space after each element in the abbreviation.

N. Mex. Lt. Col. Rt. Rev. loc. cit. nol. pros.

► *For the use of periods in academic abbreviations consisting of more than single initials—for example, Ph.D. (doctor of philosophy), LL.B. (bachelor of laws), and Litt.D. (doctor of letters)—see ¶519; for the omission of periods with units of measurement, see ¶535a.*

510

A number of shortened forms of words are not abbreviations and should not be followed by a period. (See ¶¶236c, 524c.)

abs	dis	intel	pharma	specs
alum	elhi	lab	photo op	stereo
app	enviro	lats	prefab	street cred
carbs	expo	limo	premed	sync
cell phone	fave	logo	prep	temp
chemo	fax	max	promo	typo
combo	fridge	meds	rehab	veggies
comp	glutes	memo	repo	vet
condo	hi-fi	micros	req	vibes
co-op	high-def	narc	sales rep	Wi-Fi
decaf	hype	pecs	sci-fi	zine
deli	indie	perks	sitcom	before the 2d
demo	info	perp	slo-mo	after the 5th

A number of *sales reps* have sent a *fax*, asking for *info* on this year's incentive *comp* plans. When you check the proofs for *typos*, please watch out for the problems we had in our last *promo* piece, and make sure our *logo* is not left off this time.

Also check everything against the original *specs*, and tell me what the total *prep* costs are.

511 One space should follow an abbreviation within a sentence unless another mark of punctuation follows immediately.

You ought to talk to your CPA about that problem.

Dr. Wilkins works in Washington, D.C., but his home is in Bethesda.

Please call tomorrow (before 5:30 p.m.).

When Jonas asked, "When do you expect to finish your Ph.D.?" Fred looked embarrassed. (See ¶261c regarding the omission of a comma after an introductory dependent clause.)

I'm waiting for some word on Harrison, Inc.'s stock repurchase plan. (See ¶¶638–639 for possessive forms of abbreviations.)

512 One or two spaces should follow an abbreviation at the end of a sentence that makes a statement. (See ¶102.) If the abbreviation ends with a period, that period also serves to mark the end of the sentence. If the abbreviation ends without a period, insert one to mark the end of the sentence.

Helen has just returned from a trip to Washington, D.C. Next year . . .

NOTE: Ordinarily, placing an abbreviation at the end of a sentence that makes a statement poses no problem. However, when the correct form of an abbreviation is the issue under discussion, place the abbreviation elsewhere in the statement. In that way the reader will not have to guess whether the period that marks the end of the statement also marks the end of the abbreviation.

The correct postal abbreviation for *Alaska* is *AK*. (Here the period applies only to the end of the sentence.)

CLEARER: *AK* is the correct postal abbreviation for *Alaska*.

The correct abbreviation for *numbers* is *Nos.* (Here the period applies to the end of the statement and the abbreviation.)

CLEARER: *Nos.* is the correct abbreviation for *numbers*.

If rewording the sentence is not feasible, use this solution:

The correct postal abbreviation for *Alaska* is *AK* (no period).

As an alternative, consider the use of angle brackets. (See ¶297c.)

513 No space should follow an abbreviation at the end of a question or an exclamation. Insert a question mark or exclamation point directly after the abbreviation.

Did you see Jack Hainey being interviewed last night on CBS?

Because of bad weather our flight didn't get in until 4 a.m.!

Capitalization

514 Most abbreviations use the same capitalization as the full words for which they stand.

Mon. Monday e-mail electronic mail

Btu British thermal unit D.C. District of Columbia

EXCEPTIONS: CST Central standard time

A.D. anno Domini (see page 359)

► For abbreviations with two forms (for example, COD or c.o.d.), see ¶542; for the capitalization of acronyms, see ¶522d.

¶515

The following rules (¶¶515–551) offer guidance on how to treat specific types of abbreviations.

Special Rules

Personal Names and Initials

515 Use periods with abbreviations of first or middle names but not with nicknames.

Thos.	Jos.	Robt.	Benj.	Jas.	Wm.	Saml.	Edw.
Tom	Joe	Bob	Ben	Jim	Bill	Sam	Ed

NOTE: Do not abbreviate first and middle names unless (a) you are preparing a list or table where space is tight or (b) a person uses such abbreviations in his or her legal name. (See also ¶1320b.)

516 **a.** Each initial in a person's name should be followed by a period and one space.

W. E. B. Du Bois	Mr. L. Bradford Anders
Samuel F. B. Morse	L. B. Anders Inc. (see also ¶159)

NOTE: Respect the preference of individuals and of companies that use a person's initials in their company name.

Harry S Truman	BFGoodrich	FAO Schwarz	RR Donnelley
L.L.Bean	JCPenney	T.J. Maxx	

b. When personal initials stand alone, type them preferably without periods or space. If periods are used, omit the internal space.

JTN **OR:** J.T.N.

c. For names with prefixes, initials are formed as follows:

JDM (for John D. MacDonald)	FGO (for Frances G. O'Brien)
-----------------------------	------------------------------

NOTE: If you know that an individual prefers some other form (for example, *FGO'B* rather than *FGO*), respect that preference.

d. Do not use a period when the initial is only a letter used in place of a real name. (See also ¶109a.)

I have selected three case studies involving a *Ms. A*, a *Mr. B*, and a *Miss C*. (Here the letters are used in place of real names, but they are not abbreviations of those names.)

BUT: Call *Mrs. G.* when you get a chance. (Here *G.* is an initial representing an actual name like *Galanos*.)

e. The abbreviation *NMI* is sometimes used on forms and applications to indicate that an individual has no middle initial.

Abbreviations With Personal Names

517 **a.** Always abbreviate the following titles when they are used with personal names:

SINGULAR:	{ Mrs. (for Mistress)	Ms.	Mr.	Dr.
	{ Mme. (for Madame)			
PLURAL:	Mmes. OR: Mesdames	Mses. OR: MSS.	Messrs.	Drs.

Mr. and *Mrs.* Pollo both speak highly of *Dr.* Fry.

Ms. Harriet Porter will serve as a consultant to the Finance Committee.

NOTE: Strictly speaking, *Ms.* is not an abbreviation, but it is followed by a period to maintain a consistent style for all of these titles.

- b.** The title *Ms.* is used (1) when a woman has indicated that she prefers this title, (2) when a woman's marital status is unknown, or (3) when a woman's marital status is considered not relevant to the situation. Always respect the individual woman's preference. If her preference is unknown, use *Ms.* or omit the title altogether. (See also ¶¶618, 1321b, 1352.)
- *For the proper use of the singular and plural forms of these titles, see ¶618; for the use of Dr. and other titles with academic degrees, see ¶519c.*
- c.** The titles *Miss* and *Misses* are not abbreviations and should not be followed by periods.
- d.** In general, spell out all other titles used with personal names.

Vice President Howard Morse
Mayor Wilma Washington
Governor Warren R. Fishback
Senator Hazel Benner

Professor Harriman
Father Hennelly
Dean Castaneda
Captain Stamm

- e.** Long military, religious, and honorable titles are spelled out in formal situations but may be abbreviated in informal situations as long as the surname is accompanied by a first name or initials.

Formal

Brigadier General Percy J. Cobb
Brigadier General Cobb (**NOT:** Brig. Gen. Cobb)
Lieutenant Governor Nancy Pulaski
Lieutenant Governor Pulaski (**NOT:** Lt. Gov. Pulaski)

Informal

Brig. Gen. P. J. Cobb
Lt. Gov. Nancy Pulaski

NOTE: Do not abbreviate *Reverend* or *Honorable* when these words are preceded by *the*.

Formal

the Reverend William R. Bullock
the Honorable Sarah T. McCormack

Informal

Rev. W. R. Bullock
Hon. Sarah T. McCormack

- *For the treatment of titles in addresses, see ¶¶1321–1323; for the treatment of titles in salutations, see ¶¶1322, 1338–1341.*

518 **a.** Always abbreviate *Jr.*, *Sr.*, and *Esq.* when these terms follow personal names.

- b.** The forms *Jr.* and *Sr.* should be used only with a full name or initials. A title like *Mr.* or *Dr.* may precede the name.

Mr. Henry J. Boardman Jr. **OR:** Mr. H. J. Boardman Jr.

Mr. and Mrs. Henry J. Boardman Jr. **OR:** Henry J. Boardman Jr. and Sybil P. Boardman
(**BUT NOT:** Henry J. and Sybil P. Boardman Jr. **OR:** Henry J. Jr. and Sybil P. Boardman)

¶519

NOTE: Ordinarily, do not use *Jr.* or *Sr.* with a surname alone. However, in an office where both father and son work, it may be necessary in internal communications to refer to *Mr. Boardman Sr.* and *Mr. Boardman Jr.* as the only practical way to tell them apart.

► For the use or omission of commas with *Jr.* and *Sr.*, see ¶156.

- c. The form *Esq.* should also be used only with a full name or initials, but no title should precede the name. (See ¶157.)

George W. LaBarr, *Esq.*

(**NOT:** Mr. George W. LaBarr, *Esq.*)

NOTE: In the United States the form *Esq.* is used primarily by lawyers. Although by derivation the title applies strictly to males, it is now common practice for women who are lawyers to use the title as a professional designation.

- d. The terms *2d* or *II* and *3d* or *III* following personal names are not abbreviations and should not be used with periods. (See ¶156.)
- e. When the word *Saint* is part of a person's name, follow that person's preference for abbreviating or spelling out the word.

Yves Saint-Laurent

Camille Saint-Saëns

Ruth St. Denis

St. John Perse

NOTE: When used with the name of a person revered as holy, the word *Saint* is usually spelled out, but it may be abbreviated in informal contexts and in lists and tables where space is tight.

Saint Jude

Saint Peter Claver

Saint Thérèse

Saint Catherine

► For the treatment of *Saint* in place names, see ¶529b.

Academic Degrees, Religious Orders, and Professional Designations

5

- 519** a. Abbreviations of academic degrees and religious orders are customarily written with a period after each element in the abbreviation but no internal space.

B.S. LL.B. B.Ch.E. M.D. S.J.

M.B.A. Litt.D. B.Arch. D.D.S. O.S.B.

Ph.D. Ed.D. M.Div. R.N. S.N.D.

NOTE: Some authorities now recommend omitting periods from academic degrees, but the style that retains the periods is the one more commonly used at present.

- b. The term *M.B.A.* is now commonly written without periods when it is used to signify an executive with a certain type of training rather than the degree itself.

We have just hired two Stanford *MBAs* and one from Harvard.

BUT: After I get my *M.B.A.*, I plan to go on to law school.

- c. When academic degrees follow a person's name, do not use such titles as *Dr.*, *Mr.*, *Ms.*, *Miss*, or *Mrs.* before the name.

Dr. Helen Garcia **OR:** Helen Garcia, M.D.

(**BUT NOT:** Dr. Helen Garcia, M.D.)

However, other titles may precede the name as long as they do not convey the same meaning as the degree that follows.

- | | |
|-----------------------------|--|
| Professor Rex Ford, Ph.D. | the Reverend John Day, D.D. |
| President Jean Dill, L.H.D. | OR: the Reverend Dr. John Day |
| Dean May Ito, J.S.D. | (BUT NOT: the Reverend Dr. John Day, D.D.) |

► See also ¶¶1323c–e, 1350.

- d.** When two or more academic degrees follow a person's name, list them in the order in which they were awarded. Honorary degrees (if any) should follow earned degrees.

Kim LeClaire, B.A., LL.B., J.D.

- e.** Use academic degrees only after a full name (*George A. Schell, Ph.D.*), not after a last name alone (*Professor Schell, Ph.D.*).

- f.** Academic degrees standing alone may be abbreviated except in very formal writing.

I am now completing my *Ph.D.*

She received her *M.A.* last year.

OR: . . . her *master of arts* degree last year. (See also ¶353.)

- g.** The term *ABD* (without periods) is often used to identify a graduate student who has completed all the requirements for a doctorate except the dissertation. (The initials stand for *all but dissertation*.)

So far we have received résumés from two *Ph.D.s* and seven *ABDs*. (See ¶622a for guidelines on forming the plurals of these abbreviations.)

- h.** Professional designations such as *CPA* (certified public accountant), *CPS* (certified professional secretary), *CAP* (certified administrative professional), *PLS* (certified professional legal secretary), *CFP* (certified financial planner), *CLU* (chartered life underwriter), and *FACS* (fellow of the American College of Surgeons) are commonly written *without* periods when they are used alone but *with* periods when they are used with academic degrees.

Anthony Filippo, CPA **BUT:** Anthony Filippo, B.S., M.B.A., C.P.A.

Ruth L. Morris, CLU Ruth L. Morris, B.A., C.L.U.

NOTE: List professional designations after a person's name (for example, in the signature line in a letter) only in situations where one's professional qualifications are relevant to the topic under discussion.

- i.** There is no fixed sequence for listing two or more professional designations after a person's name. If the person does not indicate the sequence he or she prefers, these designations may simply be listed in alphabetic order. When academic degrees and professional designations both follow a person's name, the academic degrees should come first (as illustrated in *h* above).

¶520**Names of Organizations**

- 520** a. Names of well-known business organizations, labor unions, societies, associations (trade, professional, charitable, and fraternal), and government agencies are often abbreviated except in the most formal writing. When these abbreviations consist of all-cap initials, they are typed without periods or spaces.

RIAA	Recording Industry Association of America
AFL-CIO	American Federation of Labor and Congress of Industrial Organizations
ILGWU	International Ladies' Garment Workers' Union
NAACP	National Association for the Advancement of Colored People
NAM	National Association of Manufacturers
YMCA	Young Men's Christian Association
NYSE	New York Stock Exchange
AMEX	American Stock Exchange (BUT: <i>AmEx</i> referring to American Express)
CBOT	Chicago Board of Trade
CBOE	Chicago Board Options Exchange
FTSE	Financial Times Stock Exchange (pronounced <i>FOOT-see</i>)
IRS	Internal Revenue Service
SEC	Securities and Exchange Commission

► For other abbreviations of the names of government agencies, see ¶524.

- b. A number of organizations that were commonly referred to by abbreviations have now adopted those abbreviations as their formal names.

AAA	(American Automobile Association)
AARP	(American Association of Retired Persons)
Jaycees	(Junior Chamber of Commerce)
ABC	(American Broadcasting Company)
NBC	(National Broadcasting Company)
CBS	(Columbia Broadcasting System)
AT&T	(American Telephone & Telegraph Company)
IHOP	(International House of Pancakes)
RBK	(Reebok)
KFC	(Kentucky Fried Chicken)

- c. The following terms are often abbreviated in the names of business organizations. However, follow the individual company's preference for abbreviating or spelling out. (See ¶159.)

Co.	Company	Inc.	Incorporated	Mfg.	Manufacturing
Corp.	Corporation	Ltd.	Limited	Mfrs.	Manufacturers

- 521** In ordinary correspondence, for the sake of brevity and simplicity, you may drop abbreviations and other elements in organizational names as long as your reader will know which organization you are referring to. For example, *Charles Schwab & Co., Inc.*, may be referred to simply as *Schwab*; *America Online, Inc.*, may be referred to as *America Online* or *AOL*. In formal and legal documents, an organization's name should be given in full when it is first introduced; if appropriate, a shorter form may be used in subsequent references.

Acronyms

522 a. An acronym—for example, *NOW*—is a shortened form normally derived from the initial letters of the words that make up the complete form. Thus *NOW* is derived from *National Organization for Women*. Like all-cap initialisms such as *IRS* and *FBI*, acronyms are usually written in all-caps and without periods; however, unlike those abbreviations, which are pronounced letter by letter, acronyms are pronounced as words. (See ¶501b.) Because they have been deliberately coined to replace the longer expressions they represent, acronyms are appropriate for use on all occasions. However, if your reader may not be familiar with a particular acronym, provide the full expression when the acronym is first used. (See ¶504, note.)

DAM	Mothers <u>A</u> gainst <u>D</u> yslexia
C-SPAN	<u>C</u> able <u>SP</u> ublic <u>A</u> ffairs <u>N</u> etwork

Continued on page 180

*ZIP *Code* is the style used by the United States Postal Service, the organization that invented the concept. The term may also be styled as *Zip code* or *zip code*.

1522

SWAT (team)	Special Weapons and Tactics
NASCAR	National Association for Stock Car Auto Racing
CAFÉ	Corporate Average Fuel Economy (standards for cars and light trucks)
LEED	Leadership in Energy and Environmental Design
TIES	The International Ecotourism Society
AIDS	acquired immune deficiency syndrome
SARS	severe acute respiratory syndrome
CARE	Cooperative for American Relief to Everywhere
NIMBY	not in my backyard (as in a NIMBY protest)
BANANA	build almost nothing anywhere near anything
CAVE	Citizens Against Virtually Everything
SADD	Students Against Destructive Decisions
FONZ	Friends of the National Zoo
MoMA	Museum of Modern Art
KIPP	Knowledge Is Power Program (a KIPP school)
WARM2Kids	We Are Role Models to Kids
EPIC	Every Person Influences Children
COPPA	Children's Online Privacy Protection Act
EMILY's List	a political fund-raising group based on the concept that early money is like yeast (and makes the dough rise)
SPELL	Society for the Preservation of English Language and Literature
SHARP	Society for the History of Authorship, Reading & Publishing
MEGO	my eyes glaze over
BOGSAT	bunch of guys sitting around a table (an ad hoc decision-making process)
SITCOM	couple with a single income, two children, and an onerous mortgage
DINK	couple with a double income and no kids
SINK	single, independent, no kids
OINK	one income, no kids
THINKER	two healthy incomes, no kids, early retirement
YAWNs	people who are young and wealthy but normal
PONA	person of no account (someone not hooked up to the Internet; pronounced POH-nuh)
WOMBAT	waste of money, brains, and time
PEBCAK	problem exists between chair and keyboard (computer service technician's diagnosis in the absence of other problems; an alternative to the diagnosis of ID-10-T ("IDIOT"))
YAHOO	yet another hierarchically officious oracle
YABA	yet another bloody acronym
TEAL	Typo Eradication Advancement League

NOTE: In some cases, writers select a word to serve as an acronym, and then they strain to create a phrase that will support the acronym. This type of abbreviation is often referred to as a *backronym* because it is created backward. For example:

USA Patriot Act	Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act
ACRONYM	A Contrived Result of Nomenclature Yielding Mechanism

- b.** In a few cases acronyms derived from initial letters are written entirely in lowercase without periods.

spim	spam sent by instant messaging
scuba	self-contained underwater breathing apparatus
laser	light amplification by stimulated emission of radiation
yuppies	young urban professionals
duppies	depressed urban professionals
gorp	good old raisins and peanuts (a high-energy snack)
BUT: Ninja	referring to mortgages made to people with no income, no jobs or assets

- c.** Some coined names use more than the first letters of the words they represent. Such names are often written with only the first letter capitalized.

Ameslan	American Sign Language
Delmarva	an East Coast peninsula made up of Delaware and parts of Maryland and Virginia
Conrail	Consolidated Rail Corporation
Amtrak	American travel by track
CalPERS	California Public Employees Retirement System
Echo	East Coast Hang Out (an online service)
The Well	The Whole Earth Electronic Link (an online community)
radar	radio detecting and ranging
sonar	sound navigation ranging
modem	modulator/demodulator
medevac	medical evacuation
hazmat	hazardous materials
canola (oil)	Canada oil low acid
op-ed page	the page that is opposite the editorial page
pixel	picture element
domos	downwardly mobile professionals
BUT: AmEx	American Express
FedEx	Federal Express
INTELPOST	International Electronic Postal Service
LASIK	Laser-Assisted In Situ Keratomileusis

- d.** Very long acronyms (with five or more letters) are sometimes written with only the initial letter capitalized to avoid the distracting appearance of too many capital letters.

UNESCO **OR:** Unesco (the United Nations Educational, Scientific, and Cultural Organization)

UNICEF **OR:** Unicef (the United Nations International Children's Emergency Fund; now simply called the United Nations Children's Fund)

NASDAQ **OR:** Nasdaq (the National Association of Securities Dealers Automated Quotation System)

- e.** When using an acronym, do not follow it with a word that is part of the acronym. For example, write *PIN* (personal identification number), not *PIN number*. (For other examples, see ¶¶501c, 544b.)

¶523**Names of Broadcasting Stations and Systems**

523 The names of radio and television broadcasting stations and the abbreviated names of broadcasting systems are written in all-caps without periods and without spaces.

Portsmouth: WRAP-AM	San Antonio: KISS-FM	CNN (BUT: CNNfn)
Houston: KILT-FM	New Orleans: WYES-TV	MSNBC

According to *ABC* and *CBS*, the earthquake had a magnitude of 6.8.

Names of Government and International Agencies

524 a. The names of well-known government and international agencies are often abbreviated. They are written without periods or spaces.

GAO	Government Accountability Office
GNMA	Government National Mortgage Association (referred to as Ginnie Mae)
SLMA	Student Loan Marketing Association (referred to as Sallie Mae)
FEMA	the Federal Emergency Management Agency
EEOC	the Equal Employment Opportunity Commission
NIH	National Institutes of Health
WHO	World Health Organization
WTO	World Trade Organization
ILO	International Labor Organization
OCHA	Office for the Coordination of Humanitarian Affairs

► For UNESCO and UNICEF, see ¶522d.

b. The initials *FNMA* are no longer used to refer to the Federal National Mortgage Association. The official name of this agency is now *Fannie Mae* (a nickname widely used for many years and derived from the attempt to sound out the initials FNMA). By the same token, the initials *FHLMC* are no longer used to refer to the Federal Home Loan Mortgage Corporation. The name of this agency has been officially changed to *Freddie Mac* (a nickname that had also been widely used for many years).

c. Expressions such as *the Fed* (for *the Federal Reserve Board*) and *the Ex-Im Bank* (for *the U.S. Export-Import Bank*) involve shortened forms rather than true abbreviations and thus are written without periods.

525 The name *United States* is usually abbreviated when it is part of the name of a government agency. When used as an adjective, the name is often abbreviated, though not in formal usage. When used as a noun, the name is spelled out.

U.S. Department of Agriculture	USDA
U.S. Air Force	USAF
the United States government	the U.S. government
United States foreign policy	U.S. foreign policy
throughout the United States (NOT: throughout the U.S.)	

Geographic Names

526 Do not abbreviate geographic names except in tables, business forms, and expedient documents (see ¶502) and in place names with *Saint*. (See ¶529b.)

NOTE: In informal writing, the city of Washington may be referred to as *D.C.* and Los Angeles as *L.A.* In general, however, spell these names out.

INFORMAL CONTEXT: Did you know that Liz has been transferred from the *D.C.* office to the branch in *L.A.*?

OTHER CONTEXTS: Did you know that Liz has been transferred from the *Washington, D.C.* office to the branch in *Los Angeles*?

- 527** a. When abbreviating state names *in addresses*, use the two-letter abbreviations (without periods) shown on page 452 and on the inside back cover of this manual.

- b. *In all situations other than addresses*, it has been traditional to use the following abbreviations (with periods and spacing as shown). Some authorities now advocate abandoning this practice and using the two-letter abbreviations wherever the abbreviation of state names is acceptable. (See also ¶¶1334a, note, and 1540a, note.)

Alabama	Ala.	Nevada	Nev.
Arizona	Ariz.	New Hampshire	N.H.
Arkansas	Ark.	New Jersey	N.J.
California	Calif.	New Mexico	N. Mex.
Canal Zone	C.Z.	New York	N.Y.
Colorado	Colo.	North Carolina	N.C.
Connecticut	Conn.	North Dakota	N. Dak.
Delaware	Del.	Oklahoma	Okla.
District of Columbia	D.C.	Oregon	Oreg.
Florida	Fla.	Pennsylvania	Pa.
Georgia	Ga.	Puerto Rico	P.R.
Illinois	Ill.	Rhode Island	R.I.
Indiana	Ind.	South Carolina	S.C.
Kansas	Kans.	South Dakota	S. Dak.
Kentucky	Ky.	Tennessee	Tenn.
Louisiana	La.	Texas	Tex.
Maryland	Md.	Vermont	Vt.
Massachusetts	Mass.	Virgin Islands	V.I.
Michigan	Mich.	Virginia	Va.
Minnesota	Minn.	Washington	Wash.
Mississippi	Miss.	West Virginia	W. Va.
Missouri	Mo.	Wisconsin	Wis.
Montana	Mont.	Wyoming	Wyo.
Nebraska	Nebr.		

NOTE: Alaska, Guam, Hawaii, Idaho, Iowa, Maine, Ohio, and Utah are not abbreviated.

- 528** a. Geographic abbreviations made up of single initials require a period after each initial but *no* space after each internal period.

U.K. United Kingdom

P.R.C. People's Republic of China

N.A. North America

C.I.S. Commonwealth of Independent States

B.W.I. British West Indies

(formerly the U.S.S.R.)

NOTE: When a company uses a geographic abbreviation in its corporate name or in the name of a product, respect the company's style.

U.S.A. **BUT:** USA Today

U.S. **BUT:** USDataLink

Continued on page 184

¶529

- b.** If the geographic abbreviation contains more than single initials, space once after each internal period.

N. Mex.

N. Dak.

W. Va.

W. Aust.

- 529 a.** In place names, do not abbreviate *Fort*, *Mount*, *Point*, or *Port* except in tables and lists where space is tight.

Fort Wayne

Mount Pleasant

Point Pleasant

Port Arthur

Fort Myers

Mount Rainier

Point Pelee

Port Ludlow

- b.** In U.S. place names, abbreviate *Saint*. For other place names involving *Saint*, follow the style shown in an authoritative dictionary or atlas.

St. Louis, Missouri

St. Lawrence River

St. Petersburg, Florida

St. Charles Avenue

► For the abbreviation or the spelling out of names of streets, cities, states, and countries, see also ¶¶1328b–c, 1333–1336.

Compass Points

- 530 a.** Spell out compass points used as ordinary nouns and adjectives.

The company has large landholdings in the *Southwest*.

We purchased a lot at the *southwest* corner of Green and Union Streets.

► For the capitalization of compass points, see ¶¶338–341.

- b.** Spell out compass points included in street names except in lists and tables where space is tight. (See also ¶1330a.)

143 South Mountain Avenue

1232 East Franklin Street

- 531 a.** Abbreviate compass points without periods when they are used *following* a street name to indicate the section of the city. (See also ¶1330b.)

1330 South Bay Boulevard, SW

NOTE: In some communities the predominant style is to use periods in such abbreviations; for example, *S.W.*, *N.E.* (See ¶1330b.)

- b.** In technical material (especially pertaining to real estate and legal or nautical matters), abbreviate compass points without periods.

N north

NE northeast

NNE north-northeast

S south

SW southwest

SSW south-southwest

Days and Months

- 532** Do not abbreviate names of days of the week and months of the year except in tables or lists where space is limited. In such cases the following abbreviations may be used:

Sun.

Thurs., Thu.

Jan.

May

Sept., Sep.

Mon.

Fri.

Feb.

June, Jun.

Oct.

Tues., Tue.

Sat.

Mar.

July, Jul.

Nov.

Wed.

Apr.

Aug.

Dec.

NOTE: When space is extremely tight, as in the column heads of some computer reports, the following one- and two-letter abbreviations may be used.

Su	M	Tu	W	Th	F	Sa
Ja	F	Mr	Ap	My	Je	Jl
					Au	S
					O	N
					D	

Time and Time Zones

533 Use the abbreviations *a.m.* and *p.m.* in expressions of time. These abbreviations most commonly appear in lowercase, but you may use small caps (A.M., P.M.) if you have that option. (See ¶440.) For more formal expressions of time, use *o'clock* (see ¶441).

534 a. The standard time zones in the continental United States are abbreviated as follows:

EST (Eastern standard time)	MST (Mountain standard time)
CST (Central standard time)	PST (Pacific standard time)

► *For examples, see ¶440a.*

b. When daylight saving time is in effect, use *DST* (daylight saving time) or one of the following forms:

EDT (Eastern daylight time)	MDT (Mountain daylight time)
CDT (Central daylight time)	PDT (Pacific daylight time)

NOTE: When referring to daylight saving time, note that *saving* is singular. Do not say “daylight *savings* time.”

c. An alternative style of time zone abbreviations eliminates all references to standard and daylight time.

ET (Eastern time)	MT (Mountain time)
CT (Central time)	PT (Pacific time)

These shorter abbreviations are especially useful in promotional materials that are to be distributed without change throughout the year.

To place an order, call our toll-free number between 7 a.m. and 6 p.m., PT.

OR: . . . between 7 a.m. and 6 p.m. (PT).

d. Puerto Rico and the U.S. Virgin Islands are in the Atlantic standard time zone (AST). Hawaii is in the Hawaii-Aleutian time zone (abbreviated simply as HST with reference to Hawaii). Most of Alaska falls in the Alaska time zone (which has the same abbreviation as the Atlantic time zone—AST). However, a portion of the Aleutian Islands falls in the Hawaii-Aleutian time zone (HST).

Customary Measurements

535 Abbreviate units of measure when they occur frequently, as in technical and scientific work, on invoices and other business forms, and in tables.

a. Units of measure are now commonly abbreviated without periods. The abbreviations are the same for the singular and the plural.

yd (yard, yards)	oz (ounce, ounces)	rpm (revolutions per minute)
ft (foot, feet)	gal (gallon, gallons)	cpi (characters per inch)
mi (mile, miles)	lb (pound, pounds)	mph (miles per hour)

¶536

NOTE: Units of measure consisting of two words are written with spaces but without periods.

sq in (square inch, square inches) cu ft (cubic foot, cubic feet)

- b.** The abbreviation *in* (for *inch* or *inches*) may be written without a period if it is not likely to be confused with the preposition *in*.

8 in **OR:** 8 in. **BUT:** 8 sq in 8 ft 2 in

- c.** In a set of simple dimensions or a range of numbers, use an abbreviation only with the last number. Repeat a symbol with each number.

a room 10 × 15 ft **BUT:** a room 10' × 15' (see ¶543f)

35° to 45°F **OR:** 35°–45°F (see ¶¶538d, 543f)

NOTE: In a set of complex dimensions, where more than one unit of measure is involved, repeat the abbreviations with each number.

a room 10 ft 6 in × 19 ft 10 in **OR:** a room 10' 6" × 19' 10" (see ¶432)

- 536** In nontechnical writing, spell out units of measure.

a 20-gallon container 8½ by 11 inches

a 150-acre estate an 8½- by 11-inch book (see ¶817)

Metric Measurements

The following rules of style are based on the *Metric Editorial Guide*, published by the American National Metric Council (Washington, D.C.). For a full listing of metric terms, consult a dictionary.

- 537** **a.** The most common metric measurements are derived from three basic units and several prefixes indicating multiples or fractions of a unit, as shown below. The abbreviations for these terms appear in parentheses in the first column below.

Basic Units

meter (m) One meter is 10 percent longer than a yard (39.37 inches).

gram (g) A thousand grams (a *kilogram*) is 10 percent heavier than 2 pounds (2.2 pounds).

liter (L)* A liter is about 5 percent larger than a quart (1.057 quarts).

Prefixes Indicating Fractions

deci (d) 1/10 A *decimeter* (dm) equals one-tenth of a meter.

centi (c) 1/100 A *centigram* (cg) equals one-hundredth of a gram.

milli (m) 1/1000 A *milliliter* (mL) equals one-thousandth of a liter.

nano (n) 1/1,000,000,000 A *nanosecond* (ns) equals one-billionth of a second.

pico (p) 1/1,000,000,000,000 A *picogram* (pg) equals one-trillionth of a gram.

Prefixes Indicating Multiples

deka (da) 10 A *dekameter* (dam) equals 10 meters (about 11 yards).

hecto (h) 100 A *hectogram* (hg) equals 100 grams (about 3½ ounces).

kilo (k) 1000 A *kilometer* (km) equals 1000 meters (about ½ mile).

► For the prefixes mega, giga, and tera, see ¶470.

- b.** Temperatures are expressed in terms of the Celsius scale (abbreviated *C*).

Water freezes at 0°C (32°F) and boils at 100°C (212°F).

*The abbreviation for *liter* is often shown as a lowercase *l*. However, because an *l* can easily be mistaken for the numeral *1*, the use of a capital *L* is recommended as the abbreviation for *liter*.

With a temperature of 37°C (98.6°F), you can't be very sick.

The temperature here on the island stays between 20° and 30°C (68° and 86°F).

Here's an easy way to relate the two temperature scales: when it's 16°C, it's 61°F; when it's 28°C, it's 82°F.

► *For the use of spaces in figures expressing metric quantities, see ¶461b.*

- 538** a. Metric units of measurement, like the customary units of measurement described in ¶535, are abbreviated in technical and scientific work, on business forms, and in tables. In nontechnical writing, metric units are ordinarily spelled out, but some expressions typically appear in abbreviated form (for example, *35-mm film*).
- b. Abbreviations of metric units of measurement are written without periods except at the end of a sentence.

100-mm cigarettes (10 centimeters or about 4 inches)

a 30-cm width (about 12 inches or 1 foot)

an office 5 × 3 m (about 5.5 by 3.3 yards)

a 1000-km trip (620 miles)

weighs 100 kg (about 220 pounds)

50 to 75 kg (about 110 to 165 pounds)

feels like 10°C weather (50°F weather)

NOTE: In abbreviations of expressions like *kilometers per hour*, a slash is used to express *per*.

an 80-km/h speed limit (50 miles per hour)

- c. Metric abbreviations are the same for the singular and the plural.

1 kg (1 kilogram) 5 kg (5 kilograms)

- d. When expressing temperatures, leave no space between the number and the degree symbol or between the degree symbol and the abbreviation for Celsius.

14°C (**NOT:** 14° C)

- e. In printed material, metric measurements for area and volume are usually expressed with superscripts (raised numbers).

m^2 square meter cm^3 cubic centimeter

If the equipment you are using makes it difficult or awkward to create raised numbers, use the following forms:

sq m square meter cu cm cubic centimeter

NOTE: In material that also uses superscripts for footnote references, use the forms *sq m* and *cu cm* to avoid the possibility of confusion.

Chemical and Mathematical Expressions

- 539** Do not use a period after the symbols that represent chemical elements and formulas.

K (potassium) NaCl (sodium chloride—table salt)

The chemical notations H₂O and CO₂ stand for “dihydrogen oxide” (namely, water) and “carbon dioxide.” They do not refer, as one student observed, to hot water and cold water.

- 540** Do not use a period after such mathematical abbreviations as *log* (for *logarithm*) and *tan* (for *tangent*).

¶541**Business Expressions**

541 A number of terms are commonly abbreviated on business forms, in tables, and in routine business documents. In addition to the list of abbreviations shown below, several other lists are provided in the following paragraphs:

► *Computer abbreviations: see ¶544.*

Abbreviations in foreign expressions: see ¶546.

Common abbreviations in general usage: see ¶547.

AA	administrative assistant, Alcoholics Anonymous, author's alteration(s)	C	100, Celsius (temperature) central business district
A.A.	associate in arts (degree)	CBD	compact disc, certificate of deposit
acct.	account	CD	community development corporation
ack.	acknowledge	CDC	chief executive officer
addl.	additional	CEO	chief financial officer
agt.	agent	CFO	centigram(s)
AHS	automated highway systems	cg	charge
AI	artificial intelligence	chg.	cost, insurance, and freight (see ¶542)
a.k.a.	also known as	c.i.f. OR: CIF	chief information officer
amt.	amount	CIO	chief knowledge officer
anon.	anonymous	CKO	centimeter(s)
AP	accounts payable	cm	Company
APB	all points bulletin	Co.	care of
approx.	approximately	c/o	cash (or collect) on delivery (see ¶542)
APR	annual percentage rate	c.o.d. OR: COD	cost-of-living adjustment
AR	accounts receivable	COLA	continued
ARM	adjustable-rate mortgage	cont.	chief operating officer
A.S.	associate in science (degree)	COO	Corporation
ASAP	as soon as possible	Corp.	certified public accountant (see ¶519h)
Assn.	Association	CPA	characters per inch (see ¶507)
assoc.	associate(s)	cpi	consumer price index
asst.	assistant	CPI	cost per thousand
att.	attachment	CPM	certified professional secretary (see ¶519h)
Attn.	Attention	CPS	credit
avg.	average	cr.	carton
bal.	balance	ctn.	hundredweight
bbl	barrel(s)	cwt.	d.b.a. OR: DBA
bf	boldface type	d.b.a. OR: d/b/a	doing business as (see ¶542)
bl	bale(s)	dept.	department
BL OR: B/L	bill of lading	dis.	discount
bldg.	building	dist.	district
BO	back order		
BS OR: B/S	bill of sale		
B-school	graduate school of business		
bu	bushel(s)		
c, cc	copy, copies (see ¶1361a)		

distr.	distributor, distribution, distributed	GM	general manager, General Motors, genetically modified (food)
div.	division	GPS	Global Positioning System
DJIA	Dow Jones industrial average	gr.	gross
doz	dozen	gr. wt.	gross weight
dr.	debit record	hdlg.	handling
dstn.	destination	HMO	health maintenance organization
dtd.	dated	HOV	high-occupancy vehicle
DVD	digital video disc, digital versatile disc	HP OR: hp	horsepower
ea.	each	HQ	headquarters
EBITDA	earnings before interest, taxes, depreciation, and amortization	hr	hour(s)
EEO	equal employment opportunity	Hz	hertz (a unit of frequency)
EFIGS	English, French, Italian, German, and Spanish	in OR: in.	inch(es) (see ¶535b)
EIN	employer identification number	Inc.	Incorporated (see ¶159)
enc.	enclosed, enclosure	incl.	including, inclusive
EOE	equal opportunity employer(s)	ins.	insurance
e.o.m. OR: EOM	end of month (see ¶542)	intl.	international
Esq.	Esquire (see ¶157)	inv.	invoice
ETA	estimated time of arrival	IPO	initial public offering (of company shares)
ETD	estimated time of departure	ips	inches per second
exec.	executive	JIT	just in time
F	Fahrenheit (temperature)	kg	kilogram(s) (see ¶537a)
f.a.s. OR: FAS	free alongside ship (see ¶542)	kHz	kilohertz
f.b.o. OR: FBO	for the benefit of (see ¶542)	km	kilometer(s) (see ¶537a)
FIFO	first in, first out	km/h	kilometers per hour (see ¶538b, note)
f.o.b. OR: FOB	free on board (see ¶542)	I., II.	line, lines
fps	feet per second	L	liter(s) (see ¶537a)
ft	foot, feet (see ¶535)	lb	pound(s) (see ¶535a)
ft-ton	foot-ton(s)	LBO	leveraged buyout
fwd.	forward	I.c.l. OR: LCL	less-than-carload lot (see ¶542)
FY	fiscal year (see ¶504)	LIFO	last in, first out
FYI	for your information	LLC	limited-liability company
g	gram(s) (see ¶537a)	LLP	limited-liability partnership
GAAP	generally accepted accounting principles	LP	limited partnership
gal	gallon(s) (see ¶535a)	Ltd.	Limited (see ¶159)
GATT	General Agreement on Tariffs and Trade	m	meter(s) (see ¶537a)
GED	General Educational Development (tests); general equivalency diploma	M	1000 (see ¶469)
		M&A	mergers and acquisitions
		max.	maximum
		mdse.	merchandise

¶541

mfg.	manufacturing	PERT	program evaluation and review technique
mfr.	manufacturer	pkg.	package(s)
mg	milligram(s) (see ¶537a)	PLC	public limited company
mgr.	manager	PO	purchase order
mgt. OR: mgmt.	management	P.O.	post office
MHz	megahertz	POD	publishing on demand
mi	mile(s) (see ¶535a)	p.o.e. OR: POE	port of entry (see ¶542)
min	minute(s)	pop.	population
min.	minimum	POP	point of purchase
MIS	management information systems	POS	point of sale
misc.	miscellaneous	POV	point of view
mL	milliliter(s) (see ¶537a)	PP	parcel post
mm	millimeter(s) (see ¶537a)	ppd.	postpaid, prepaid (postage paid in advance)
mo	month(s)	pr.	pair(s)
MO	mail order, money order (see <i>M.O.</i> in ¶546)	PS, PS.	postscript
mpg	miles per gallon	pt	pint(s)
mph	miles per hour	pt.	part, point(s), port
msg.	message	QA	quality assurance
mtg. OR: mtge.	mortgage	Q&A	question and answer
n/30	net in 30 days	qt	quart(s)
NA	not applicable, not available	qtr.	quarter(ly)
n.d.	no date	qty.	quantity
NGO	nongovernmental organization	®	registered trademark
NIC	newly industrialized country	recd.	or service mark
NMI	no middle initial	reg.	received
No., Nos.	number(s) (see ¶455)	REIT	registered, regular
nt. wt.	net weight	ret.	real estate investment trust
NV	no value	rev.	retired
OAG	<i>Official Airline Guide</i>	RIF	revised
OJT	on-the-job training	ROA	reduction in force
opt.	optional	ROE	return on assets
OS	out of stock	ROI	return on equity
OTC	over the counter	rpm	return on investment
oz	ounce(s) (see ¶535a)	S&H	revolutions per minute
p., pp.	page, pages	SASE	shipping and handling
P&H	postage and handling	sc OR: SC	self-addressed stamped envelope
P&L OR: P/L	profit and loss (statement)	sec	small caps (see ¶533)
PC	personal computer, politically correct	sec.	second(s)
P.C.	professional corporation	shtg.	secretary
pd.	paid	SM	shortage
PE	printer's error(s), Professional Engineer	SO	unregistered service mark
P/E	price/earnings (ratio)	SOV	shipping order
			single-occupancy vehicle

SSN	social security number	VAT	value-added tax
std.	standard	VP	vice president
stmt.	statement	vs.	versus (v. in legal citations)
SUV	sport utility vehicle	w/	with
t.b.a. OR: TBA	to be announced (see ¶542)	whsle.	wholesale
t.b.d. OR: TBD	to be determined (see ¶542)	w/o	without, week of
™	unregistered trademark	wt.	weight
TO	table of organization	yd	yard(s) (see ¶535a)
treas.	treasury, treasurer	YOB	year of birth
UPC	Universal Product Code	yr	year(s)
		YTD	year to date

542 A few common business abbreviations listed in ¶541 are frequently typed in lower-case (with periods) when they occur within sentences but are typed in all-caps (without periods) when they appear on business forms. For example:

c.i.f. OR: CIF	e.o.m. OR: EOM	l.c.l. OR: LCL	t.b.a. OR: TBA
c.o.d. OR: COD	f.o.b. OR: FOB	p.o.e. OR: POE	t.b.d. OR: TBD

Symbols

543 a. A number of symbols are often used on business forms, in tables and statistical material, and in informal business documents. If you are using software with special character sets, you can access these symbols.

@	at	°	degrees	¶	paragraph
&	and	'	feet	×	by, multiplied by, times
%	percent	"	inches; ditto	®	a registered trademark or service mark
\$	dollars	§	section	™	an unregistered trademark
¢	cents	#	number (before a figure)	℠	an unregistered service mark
=	equals	#	pounds (after a figure)	©	copyright

► For a comment on the use of trademark symbols, see ¶356b.

b. When using symbols for feet and inches, use either the *slanted* version of the single and double quotation mark (' and ") or the *straight* version (‘ and ’). Do not use the *curly* version (‘ and ’).

c. Leave one space before and after the following symbols:

= if $a = 7$ and $b = 9$ × a room 12×18 ft

d. Leave one space before and after the *at* symbol (@) except in an e-mail address.

@ order 200 @ \$49.95 cwbrown200@yahoo.com

NOTE: Do not use @ in place of *at* in nontechnical documents.

Let's plan to leave at 11:30 a.m. (**NOT:** Let's plan to leave @ 11:30 a.m.)

1544

- e. Leave one space before and after an ampersand (&).

& Barnes & Noble	Arm & Hammer
Black & Decker	Head & Shoulders
Ben & Jerry's	Bed Bath & Beyond

NOTE: As a rule, do not leave any space before and after an ampersand (&) in all-cap abbreviations.

AT&T pursues a wide range of R&D [research and development] activities.

At the next shareholders' meeting we need to anticipate some tough queries during the Q&A [question and answer] session about our M&A [merger and acquisition] activities.

- f. Do not leave space between a figure and one of the following symbols:

% a 65% sales increase	# use 50# paper for the job
¢ about 30¢ a pound	' a 9' × 12' Oriental carpet
° reduce heat to 350°	" an 8½" × 11" sheet of paper

- g. Do not leave any space after these symbols when they are followed by a figure:

\$ in the \$250-\$500 range	¶ as explained in ¶1218-1220
# reorder #4659 and #4691	§ will be covered in §14.26

- h. Do not leave any space between a trademark or a service mark and the raised symbol that follows it.

® Yahoo!®	Xerox®
TM BlackBerry®	Wendy's®
SM Google™	Rolodex™
SM Windows Vista™	Best Buy™
SM Universal Studios™	Nationwide Financial Network™
SM iTunes Store™	SPDRs™

NOTE: If a mark of punctuation (such as a period or a comma) falls at the same point as one of these raised symbols, insert the punctuation after the symbol.

Computer Abbreviations

- 544** a. The following list presents some of the abbreviations commonly used in references to computers and the Internet.

ASCII	American Standard Code for Information Interchange (pronounced as-kee)
b	bit
B	byte
BASIC	Beginner's All-Purpose Symbolic Instruction Code
BBSs	bulletin board services (see ¶622a)
BCD	binary coded decimal
BD	Blu-ray Disc
BIOS	basic input/output system
bit	binary digit
BLOB	binary large object
blog	Web log

bps	bits per second
B2B	business-to-business (online transactions)
B2C	business-to-consumer (online transactions)
B2G	business-to-government (online transactions)
CAD	computer-aided design
CAI	computer-aided instruction
CAM	computer-aided manufacturing
CAR	computer-assisted retrieval
CD-R	compact disc-recordable
CD-ROM	compact disc-read-only memory
CD-RW	compact disc-rewritable
CGA	color graphics adapter
CPU	central processing unit
CRT	cathode-ray tube
DBMS	database management system
DNS	domain name system
DOS	disk operating system (see page 373), denial of service
dpi	dots per inch
DRAM	dynamic random access memory
DRM	Digital Rights Management
DSL	digital subscriber line
DTP	desktop publishing
DVD	digital video disc, digital versatile disc
DVD-R	digital video disc-recordable
DVD-RW	digital video disc-rewritable
DVR	digital video recorder
e-mail	electronic mail
EOF	end of file
f2f	face to face
FAQ	frequently asked question (pronounced <i>fak</i>)
FAT	file allocation table
FTP	File Transfer Protocol
GB	gigabyte
GHz	gigahertz
.gif	Graphics Interchange Format
GIGO	garbage in, garbage out
GUI	graphical user interface (pronounced <i>goo-ee</i>)
HD-DVD	high-definition digital video (OR: versatile) disc
IC	integrated circuit
ICQ	I seek you (a form of instant messaging)
IM	instant messaging
I/O	input/output

¶544

IP	Internet Protocol
ISP	Internet service provider
IT	information technology
JPEG OR: jpeg	Joint Photographic Experts Group
Kb	kilobit
KB OR: K	kilobyte (see ¶503)
LAN	local area network
LCD	liquid crystal display
LQ	letter quality
Mb	megabit
MB OR: M	megabyte (see ¶503)
Mbps	megabits per second
megs	megabytes
MHz	megahertz
MICR	magnetic ink character reader
mips	million instructions per second
MPEG OR: .mpeg	Moving Picture Experts Group
MP3	MPEG-1 Audio Layer 3
NC	network computer
OCR	optical character recognition OR: reader
OS	operating system
P2P	peer-to-peer (network)
PAN	personal area network
PC	personal computer
PCI	Peripheral Component Interface
PDA	personal digital assistant
PDF	Portable Document Format (as in “to attach a PDF file”)
.pdf	Portable Document Format as a file extension
PGP	Pretty Good Privacy (a computer program)
POD	publishing on demand
ppm	pages per minute
PPP	Point-to-Point Protocol
RAM	random-access memory
RISC	reduced instruction set computer
ROM	read-only memory
SCSI	small computer system interface port (pronounced <i>scuzzy</i>)
SLIP	Serial Line Internet Protocol
spim	spam sent by instant messaging
TB	terabyte
TCP/IP	transmission control protocol/Internet protocol
TOS	terms of service
USB	universal serial bus
VA	virtual assistant

VDT	<u>v</u> ideo <u>d</u> isplay <u>t</u> erminal
VGA	<u>V</u> ideo <u>GA</u> rray
VM	<u>v</u> oice <u>m</u> ail
VoIP	<u>V</u> oice <u>O</u> ver <u>I</u> nternet <u>Pvoh-eep)</u>
VR	<u>v</u> irtual <u>reality</u>
WAIS	<u>w</u> ide <u>a</u> rea <u>i</u> nformation <u>s</u> erver (pronounced <i>ways</i>)
WAN	<u>w</u> ide <u>a</u> rea <u>n</u> etwork
WAP	<u>W</u> ireless <u>A</u> pplication <u>P</u>
Wi-Fi	<u>w</u> ireless <u>f</u> idelity
WORM	<u>w</u> rite <u>o</u> nce-read <u>m</u> any times
WWW OR: W3	the <u>W</u> orld <u>W</u> ide <u>W</u> eb (sometimes pronounced <i>triple-dub</i> to avoid having to say <i>double-u, double-u, double-u</i>)
W3C	<u>W</u> orld <u>W</u> ide <u>W</u> eb Consortium
WYSIWYG	<u>w</u> hat you <u>s</u> ee is <u>w</u> hat you <u>g</u> et (pronounced <i>wiz-ee-wig</i>)
XGA	<u>e</u> xtended <u>graphics <u>a</u>rray</u>
XML	<u>e</u> xtensible <u>markup <u>language</u></u>

- b. When using a computer abbreviation like those listed above, do not follow it with a word that is part of the abbreviation. (See also ¶501c.)

CD-ROM	(NOT: CD-ROM disc)	LCD	(NOT: LCD display)
DOS	(NOT: DOS operating system)	RAM	(NOT: RAM memory)
ISP	(NOT: ISP provider)	TCP/IP	(NOT: TCP/IP protocol)

NOTE: The abbreviation *PDF* stands for “Portable Document Format,” not “Portable Document File.” Strictly speaking, one should refer to a *PDF file* or to a number of *PDF files*, but in ordinary usage it is acceptable to refer to a single file as a *PDF* and to a number of files as *PDFs*.

► For a glossary of computer terms, see the Gregg Web site at <<http://www.gregg.com>>; for the capitalization of computer terms, see ¶¶365, 366a, 847f.

Names of Products

545 The practice of dropping letters from ordinary words in instant messaging and texting has created a new fad in the naming of products. For example, Motorola has given its line of cell phones names like PEBL (Pebble), RAZR (Razor), ROKR (Rocker), and SLVR (Sliver). Levi's now sells DLX (deluxe) jeans, and brand names such as Flickr (Flicker), Delivr (Deliver), and Frappr (Frappier) designate a variety of electronic services.

Foreign Expressions

546 Many foreign expressions contain or consist of short words, some of which are abbreviations and some of which are not. Use periods only with abbreviations.

ad hoc	meaning “for a particular purpose”
ad val.	<i>ad valorem</i> , meaning “according to the value”

¶547

c. OR: ca.	<i>circa</i> , meaning “approximately”
cf.	<i>confer</i> , meaning “compare”
Cie.	<i>Compagnie</i> , meaning “Company”
C.V.	<i>curriculum vitae</i> , meaning “course of one’s life”; a résumé
e.g.	<i>exempli gratia</i> , meaning “for example” (see ¶181a)
et al.	<i>et alii</i> , meaning “and other people”
etc.	<i>et cetera</i> , meaning “and other things,” “and so forth” (see the entry for <i>Etc.</i> on page 376)
ibid.	<i>ibidem</i> , meaning “in the same place”
idem	meaning “the same”
i.e.	<i>id est</i> , meaning “that is” (see ¶181a)
infra	meaning “below”
inst.	<i>instans</i> , meaning “the current month”
loc. cit.	<i>loco citato</i> , meaning “in the place cited”
M.O.	<i>modus operandi</i> , meaning “the way in which something is done”
N.B.	<i>nota bene</i> , meaning “note well”
nol. pros.	<i>nolle prosequi</i> , meaning “to be unwilling to prosecute”
non seq.	<i>non sequitur</i> , meaning “it does not follow”
op. cit.	<i>opere citato</i> , meaning “in the work cited”
p.a. OR: PA	<i>per annum</i> , meaning “for each year”
p.d. OR: PD	<i>per diem</i> , meaning “for each day”
pro tem	<i>pro tempore</i> , meaning “for the time being”
prox.	<i>proximo</i> , meaning “in the next month”
Q.E.D.	<i>quod erat demonstrandum</i> , meaning “which was to be demonstrated”
q.v.	<i>quod vide</i> , meaning “which see”
re OR: in re	meaning “in the matter of,” “concerning”
R.S.V.P. OR: R.s.v.p.	<i>Répondez s'il vous plaît</i> , meaning “please reply”
supra	meaning “above”
ult.	<i>ultimo</i> , meaning “in the last month”

Miscellaneous Expressions

547 The following list of expressions presents common abbreviations acceptable in general usage.

A-OK	very definitely OK	a team spirit that is A-OK
ATM	automated teller machine	got \$60 from the nearest ATM
ATV	all-terrain vehicle	saving up for an ATV
AV	audiovisual	a list of AV materials
CB	citizens band	called in on her CB radio
CD	certificate of deposit, compact disc	investing in 3% CDs
CPR	cardiopulmonary resuscitation	the quality of a CD recording
CRP	C-reactive protein	a need for CPR training
EKG	electrocardiogram	arranging for a CRP evaluation waiting for the results of my EKG

ESP	extrasensory perception	a manager who must have ESP
GDP	gross domestic product	the GDP for the fourth quarter
ID	identification	signing up for caller ID
IED	improvised explosive device	the threat of attack from IEDs
IOU	I owe you	holds my IOU for \$500
IQ	intelligence quotient	taking an IQ test
IRA	individual retirement account	making a tax-deductible deposit to your IRA
IV	intravenous	still hooked up to an IV (device)
NIH	not invented here	a proposal rejected for NIH reasons
PA	public address	a problem with our PA system
PAC	political action committee	limiting the role of PACs
PR	public relations	working on your PR campaign
PTSD	post-traumatic stress disorder	funding treatment for PTSD
R&D	research and development	need a bigger R&D budget
S&L	savings and loan association	a small S&L mortgage
SOP	standard operating procedure	learning the SOP for submitting expense reports
SRO	standing room only	an SRO audience at our show
TLC	tender, loving care	giving this customer some TLC
TV	television	as seen on TV
UFO	unidentified flying object	took off like a UFO
VCR	videocassette recorder	playing this tape on your VCR
VIP	very important person	treating these VPs like VIPs
YOYO	you're on your own	YOYO government policies

NOTE: Initialisms and acronyms are continually entering the language, and while some may not yet be widely used, in many cases they ought to be. For example:

QCD	quarterly charm deficiency (an emotional disorder that afflicts executives at the end of each fiscal quarter)
IAD	Internet addictive disorder (a compulsive form of behavior in which the victim chooses cyberspace activities over real-world responsibilities and relationships)
TLTGOOBS	too lazy to get out of bed syndrome
TMTOWTDI	there's more than one way to do it
ROMEOs	retired old men eating out
SAHD	stay-at-home dad
MOP	millionaire on paper
BIC	best in class
CLM	career-limiting move
IRL	in real life (that is, offline)
MSM	mainstream media
TMI	too much information
DWT	driving while texting

548 Do not use periods with letters that are not abbreviations. (See also ¶¶109a, 807.)

Brand X	V-neck	f-stop	I-beam pointer	V-chip
X-ray	T square	y-axis	U-turn	B picture

¶549

549 The abbreviation *OK* is written without periods. In sentences, the forms *okay*, *okayed*, and *okaying* look better than *OK*, *OK'd*, and *OK'ing*, but the latter forms may be used. (See also ¶551.)

550 The dictionary recognizes *x* as a verb; however, *cross out*, *crossed out*, and *crossing out* look better than *x out*, *x-ed out*, and *x-ing out*.

551 In a few cases all-cap initialisms such as *MC* (for *master of ceremonies*) or *DJ* (for *disc jockey*) may also be spelled out in an uncapitalized form (*emcee* and *deejay*). The spelled-out forms are preferable when such abbreviations are used as verbs.

Fran Zangwill *emceed* [RATHER THAN: MC'd] the fund-raiser kickoff dinner.

Who has been *okaying* [RATHER THAN: OK'ing] these bills? (See ¶549.)

BUT: You'd find it easier to get up in the morning if you didn't *OD* on TV every night. (Here the choice is between *OD* and *overdose*, not *oh-dee*.)

BUT: You will have to *ID* everyone who wants to remove files from this department. (Here again the choice is between *ID* and *identify*, not *eye-dee*.)

► *Plurals of abbreviations: see ¶¶619–623.*

Possessives of abbreviations: see ¶¶638–639.

SECTION 6

Plurals and Possessives

Forming Plurals (¶¶601–626)

Basic Rule (¶601)

Nouns Ending in *S, X, CH, SH*, or *Z* (¶¶602–603)

Nouns Ending in *Y* (¶¶604–605)

Nouns Ending in *O* (¶¶606–607)

Nouns Ending in *F, FE*, or *FF* (¶608)

Nouns With Irregular Plurals (¶¶609–610)

Compound Nouns (¶¶611–613)

Foreign Nouns (¶614)

Proper Names (¶¶615–617)

Titles With Personal Names (¶618)

Abbreviations, Letters, Numbers, Words, and Symbols (¶¶619–625)

Plural Endings in Parentheses (¶626)

Forming Possessives (¶¶627–653)

Possession Versus Description (¶¶627–629)

Singular Nouns (¶¶630–631)

Plural Nouns (¶¶632–633)

Compound Nouns (¶¶634–635)

Pronouns (¶¶636–637)

Abbreviations (¶638)

Personal, Organizational, and Product Names (¶¶639–640)

Nouns in Apposition (¶641)

Separate and Joint Possession (¶¶642–643)

Possessives Standing Alone (¶644)

Inanimate Possessives (¶¶645–646)

Possessives Preceding Verbal Nouns (¶647)

Possessives in *Of* Phrases (¶648)

Possessives Modifying Possessives (¶649)

Possessives as Antecedents of Pronouns (¶650)

Possessives in Holidays (¶651)

Possessives in Place Names (¶652)

Miscellaneous Expressions (¶653)

► For definitions of grammatical terms, see the appropriate entries in the Glossary of Grammatical Terms (Appendix A).

¶601

Forming Plurals

When you are uncertain about the plural form of a word, consult a dictionary. If no plural is shown, form the plural according to the rules in ¶¶601–626.

Basic Rule

601 Plurals are regularly formed by adding *s* to the singular form.

idea	ideas	egg	eggs	rhythm	rhythms
quota	quotas	cloth	cloths	option	options
suburb	suburbs	length	lengths	handicap	handicaps
fabric	fabrics	alibi	alibis	author	authors
dividend	dividends	ski	skis	flight	flights
committee	committees	taxi	taxis	menu	menus
freebie	freebies	check	checks	guru	gurus
league	leagues	appraisal	appraisals	arrow	arrows

NOTE: A few words have the same form in the plural as in the singular. (See ¶¶603, 1016, 1017.) A few words have no plural form; for example, *news*, *information*. (See ¶1014.)

Nouns Ending in *S*, *X*, *CH*, *SH*, or *Z*

602 When the singular form ends in *s*, *x*, *ch*, *sh*, or *z*, the plural is formed by adding *es* to the singular.

virus	viruses	sketch	sketches
summons	summonses	wish	wishes
business	businesses	quartz	quartzes
fax	faxes	BUT: quiz	quizzes

NOTE: When *ch* at the end of a singular word has the sound of *k*, form the plural by simply adding *s*.

epoch	epochs	monarch	monarchs
stomach	stomachs	BUT: arch	arches

► For plural forms of proper names ending in *ch*, see ¶¶615b, 617a.

603 Singular nouns ending in silent *s* do not change their forms in the plural. (However, the *s* ending is pronounced when the plural form is used.)

one corps two corps a rendezvous many rendezvous

Nouns Ending in *Y*

604 When a singular noun ends in *y* preceded by a *consonant*, the plural is formed by changing the *y* to *i* and adding *es* to the singular.

copy	copies	liability	liabilities
policy	policies	proxy	proxies

605 When a singular noun ends in *y* preceded by a *vowel*, the plural is formed by adding *s* to the singular.

delay	delays	boy	boys	BUT: soliloquy	soliloquies
attorney	attorneys	guy	guys	colloquy	colloquies

NOTE: The regular plural of *money* is *moneys*. The plural form *monies* does not follow the rule, but it often appears in legal documents nonetheless. To avoid the use of either plural, simply write *funds*.

Nouns Ending in O

- 606** Singular nouns ending in *o* preceded by a *vowel* form their plurals by adding *s* to the singular.

stereo	stereos	shampoo	shampoos
ratio	ratios	boo	boos
portfolio	portfolios	tattoo	tattoos
scenario	scenarios	duo	duos

- 607** Singular nouns ending in *o* preceded by a *consonant* form their plurals in different ways.

- a. Some nouns in this category simply add *s*.

euro	euros	macro	macros
solo	solos	demo	demos
zero	zeros	memo	memos
ego	egos	placebo	placebos
photo	photos	two	twos
typo	typos	weirdo	weirdos
logo	logos	hairdo	hairdos

- b. Some add *es*.

potato	potatoes	hero	heroes
tomato	tomatoes	embargo	embargoes
echo	echoes	fiasco	fiascoes
veto	vetoes	motto	mottoes

- c. Some have two plural forms. (The preferred form is given first.)

cargo	cargoes, cargos	zero	zeros, zeroes
no	nos, noes*	tuxedo	tuxedos, tuxedoes
proviso	provisos, provisoes	innuendo	innuendos, innuendoes

- d. Singular musical terms ending in *o* form their plurals by adding *s*.

soprano	sopranos	piano	pianos
alto	altos	cello	cellos
basso	bassos	banjo	banjos

► For foreign nouns ending in *o*, see ¶614.

Nouns Ending in F, FE, or FF

- 608** a. Most singular nouns that end in *f*, *fe*, or *ff* form their plurals by adding *s* to the singular form.

belief	beliefs	safe	safes
proof	proofs	tariff	tariffs

Continued on page 202

*The 2009 printing of *Merriam-Webster's Collegiate Dictionary*, Eleventh Edition, shows *noes* first.

609

- b.** Some commonly used nouns in this category form their plurals by changing the *f* or *fe* to *ve* and adding *s*.

half	halves	self	selves
wife	wives	shelf	shelves
calf	calves	knife	knives
thief	thieves	life	lives
leaf	leaves	BUT: the Maple Leafs	

- c.** A few of these nouns have two plural forms. (The preferred form is given first.)

scarf	scarves, scarfs	dwarf	dwarfs, dwarves
-------	-----------------	-------	-----------------

Nouns With Irregular Plurals

- 609** The plurals of some nouns are formed by a change of letters within.

woman	women	foot	feet
mouse	mi ^c ce*	goose	geese

- 610** A few plurals end in *en* or *ren*.

ox	oxen	brother	brethren (<i>an alternative plural to brothers</i>)
child	children		

Compound Nouns

- 611** When a compound noun is a *solid* word, pluralize the final element in the compound as if it stood alone.

printout	printouts	birthday	birthdays
flashback	flashbacks	photocopy	photocopies
wineglass	wineglasses	grandchild	grandchildren
hatbox	hatboxes	foothold	footholds
eyelash	eyelashes	forefoot	forefeet
strawberry	strawberries	toothbrush	toothbrushes
bookshelf	bookshelves	mousetrap	mousetraps
standby	standbys (NOT: standbies)	workman	workmen
BUT: passerby		BUT: talisman	
	passersby		talismans (NOT: talismen)

- 612** **a.** The plurals of *hyphenated* or *spaced* compounds are formed by pluralizing the chief element of the compound.

father-in-law	father ^s -in-law	couch potato	couch potatoes
senator-elect	senators-elect	bill of lading	bills of lading
looker-on	lookers-on	letter of credit	letters of credit
runner-up	runners-up	account payable	accounts payable
grant-in-aid	grants-in-aid	editor in chief	editors in chief
attorney at law	attorneys at law	deputy chief of staff	deputy chiefs of staff
board of directors	boards of directors	lieutenant general	lieutenant generals
hole in one	holes in one	BUT: chaise longue [†]	
BUT: time-out		chaise longues	filets mignons
	time-outs	filet mignon	

► For the plurals of foreign compound words, see ¶614.

*Mice may refer to computer devices as well as to rodents. Some authorities prefer *pointing devices* when writing about computers.

[†]Note that the correct spelling of this word is *longue* (not *lounge*).

- b.** When a hyphenated compound does not contain a noun as one of its elements, simply pluralize the final element.

go-between	go-betweens	come-on	come-ons
get-together	get-togethers	show-off	show-offs
hang-up	hang-ups	run-through	run-throughs
hand-me-down	hand-me-downs	two-by-four	two-by-fours
drive-in	drive-ins	no-no	no-nos*
fade-out	fade-outs	has-been	has-beens
have-not	have-nots (see ¶625a)	do-it-yourselfer	do-it-yourselfers
know-it-all	know-it-alls	shoot-'em-up	shoot-'em-ups
so-and-so	so-and-sos	no-see-um	no-see-ums

- c.** Some of these compounds have two recognized plural forms. (The first plural form shown below is preferred because it adds the plural sign to the chief element of the compound.)

court-martial	<i>courts-martial, court-martials</i>
notary public	<i>notaries public, notary publics</i>
attorney general	<i>attorneys general, attorney generals</i>

- d.** When the first element of a compound is a *possessive*, simply pluralize the final element.

collector's item	collector's items
traveler's check	traveler's checks
rabbit's foot	rabbit's feet
proofreaders' mark	proofreaders' marks
seller's market	seller's markets
farmers' market	farmers' markets
women's college	women's colleges
finder's fee	finder's fees
visitor's permit	visitor's permits

- e.** Do not convert a singular possessive form into a plural unless the context clearly requires it. (See ¶653.)

The number of *driver's licenses* issued last year was 15 percent ahead of the number issued the year before.

BUT: As a result of the highway checkpoints set up by the state police, more than 200 *drivers' licenses* have been revoked in the past four weeks.

I'm still waiting for a *doctor's report* on my husband's condition. (One report written by one doctor.)

Have you seen *any doctor's reports*? (Reports written by different doctors.)

Have you seen *the doctors' report*? (One report written jointly by two doctors.)

Have you seen *the doctors' reports*? (Several reports written jointly by two doctors.)

613 The plurals of compounds ending in *ful* are formed by adding *s*.

armful	armfuls	handful	handfuls	teaspoonful	teaspoonfuls
cupful	cupfuls	basketful	basketfuls	pocketful	pocketfuls

Compare the difference in meaning in these phrases:

six *cupfuls* of sugar (a quantity of sugar that would fill one cup six times)

six cups *full* of sugar (six separate cups, each filled with sugar)

*Merriam-Webster shows the plural of *no-no* two ways: first as *no-no's* and then as *no-nos*.

¶614**Foreign Nouns****614**

Many nouns of foreign origin retain their foreign plurals, others have been given English plurals, and still others have two plurals—an English and a foreign one. When two plural forms exist, one may be preferred to the other or there may be differences in meaning that govern the use of each. Consult your dictionary to be sure of the plural forms and the meanings attached to them.

► For agreement of foreign-plural subjects with verbs, see ¶1018.

WORDS ENDING IN US

Singular	English Plural	Foreign Plural
alumnus (m.)		alumni (see note below)
apparatus	apparatuses*	apparatus
cactus	cactuses	cacti*
campus	campuses	
census	censuses	
corpus		corpora
focus	focuses*	foci†
fungus	funguses	fungi*
genus		genera
hiatus	hiatuses	
ignoramus	ignoramuses	
locus		loci
nucleus	nucleuses	nuclei*
octopus	octopuses*	octopi
opus	opuses	opera*
prospectus	prospectuses	
radius	radiiuses	radii*
status	statuses	
stimulus		stimuli
stylus	styluses	styli*
syllabus	syllabuses	syllabi*
terminus	terminuses	termini*
thesaurus	thesauruses	thesauri*

NOTE: The term *alumni* (the plural of *alumnus*) refers to a group of male graduates; the term *alumnae* (the plural form of *alumna*, shown below) refers to a group of female graduates. Traditionally, *alumni* has also been used to refer to a mixed group of male and female graduates; in fact, many colleges still have an “alumni association” with a mixed group of members. However, this use of *alumni* is no longer appropriate. When referring to a mixed group, either write *alumni* and *alumnae* or simply refer to members of the mixed group as *graduates*.

*Preferred form.

†Merriam-Webster shows this form first.

WORDS ENDING IN A

Singular	English Plural	Foreign Plural
agenda	agendas	
alga	algas	algae*
alumna (f.)		alumnae (see note on page 204)
antenna	antennas (of radios)	antennae (of insects)
dogma	dogmas*	dogmata
formula	formulas*	formulae
lacuna	lacunas	lacunae*
larva	larvas	larvae*
minutia		minutiae (see page 687)
schema	schemas*	schemata†
stigma	stigmas	stigmata*
vertebra	vertebras	vertebrae*

WORDS ENDING IN UM

Singular	English Plural	Foreign Plural
addendum		addenda
auditorium	auditoriums*	auditoria
bacterium		bacteria
candelabrum	candelabrum	candelabra*
colloquium	colloquia*	colloquia
consortium	consortiums*	consortia†
cranium	craniums*	crania
curriculum	curriculums	curricula*
curriculum vitae		curricula vitae
datum	datums	data* (see ¶1018b)
emporium	emporiums*	emporia
erratum		errata
forum	forums*	fora
gymnasium	gymnasiums*	gymnasia
honorarium	honorariums*	honoraria†
maximum	maximums*	maxima†
medium	mediums (spiritualists)	media (for advertising and communication) (see ¶1018c)
memorandum	memorandums*	memoranda
millennium	millenniums*	millennia*
minimum	minimums*	minima†
momentum	momentums*	momenta†
optimum	optimums*	optima†
podium	podiums*	podia
referendum	referendums*	referenda†
sanitarium	sanitariums*	sanitaria
stadium	stadiums*	stadia†
stratum		strata
symposium	symposiums*	symposia†
ultimatum	ultimatums*	ultimata

*Preferred form.

†Merriam-Webster shows this form first.

Continued on page 206

1614**WORDS ENDING IN O**

Singular	English Plural	Foreign Plural
concerto	concertos*	concerti
crescendo	crescendos*	crescendi
graffito		graffiti
libretto	librettos*	libretti
paparazzo		paparazzi
tempo	tempos	tempi (in music)
virtuoso	virtuosos*	virtuosi

WORDS ENDING IN ON

Singular	English Plural	Foreign Plural
automaton	automatons*	automata
criterion	criterions	criteria*
phenomenon	phenomenons	phenomena*

emphasis		emphases
exegesis		exegeses
hypothesis		hypotheses
oasis		oases
parenthesis		parentheses
prognosis		prognoses
synopsis		synopses
synthesis		syntheses
thesis		theses

*Preferred form.

¹Merriam-Webster shows this form first.

WORDS ENDING IN EU OR EAU

Singular	English Plural	Foreign Plural
adieu	adieus*	adieux
beau	beaus*	beaux
bureau	bureaus*	bureaux
château	châteaus*	châteaux
milieu	milieus*	milieux
plateau	plateaus*	plateaux
tableau	tableaus*	tableaux
trousseau	trousseaus*	trousseaux

NOTE: The *x* ending for the preceding foreign plurals is pronounced like *z*.

COMPOUND WORDS

Singular	English Plural	Foreign Plural
chaise longue	chaise longues*	chaises longues
coup d'état		coups d'état
éminence grise		éminences grises
fait accompli		faits accomplis
hors d'œuvre	hors d'oeuvres*	hors d'oeuvre
idiot savant	idiot savants	idiots savants*
maître d'	maître d's	
maître d'hôtel		maîtres d'hôtel
nouveau riche		nouveaux riches
pas de deux		pas de deux

Proper Names

615 a. Most surnames are pluralized by the addition of *s*.

Mr. and Mrs. Brinton	the Brintons
Mr. and Mrs. Romano	the Romanos
Mr. and Mrs. Chung	the Chungs
Mr. and Mrs. Gray	the Grays

b. When a surname ends in *s*, *x*, *ch*, *sh*, or *z*, add *es* to form the plural.

Mr. and Mrs. Banks	the Bankses
Mr. and Mrs. Van Ness	the Van Nesses
Mr. and Mrs. Maddox	the Maddoxes
Mr. and Mrs. March	the Marches
Mr. and Mrs. Welsh	the Welches
Mr. and Mrs. Perez	the Perezes
Mr. and Mrs. Jones	the Joneses
Mr. and Mrs. James	the Jameses
Mr. and Mrs. Barnes	the Barneses

NOTE: Omit the *es* ending if it makes the plural surname awkward to pronounce.

the Hodges (**NOT:** Hodgeses)

the Hastings (**NOT:** Hastingses)

*Preferred form.

¶616

- c. Never change the original spelling of a surname when forming the plural. Simply add *s* or *es*, according to *a* and *b* above.

Mr. and Mrs. McCarthy

the McCarthys (**NOT:** McCarthies)

Mr. and Mrs. Wolf

the Wolfs (**NOT:** Wolves)

Mr. and Mrs. Martino

the Martinos (**NOT:** Martinoes)

Mr. and Mrs. Goodman

the Goodmans (**NOT:** Goodmen)

Mr. and Mrs. Lightfoot

the Lightfoots (**NOT:** Lightfeet)

Mr. and Mrs. Fairchild

the Fairchilds (**NOT:** Fairchildren)

- d. When a surname is followed by *Jr.*, *Sr.*, or a number like *2d* or *II*, the plural can be formed two ways.

ORDINARY USAGE: the Roy Van Allen *Jrs.*

the Ellsworth Hadley *3ds*

FORMAL USAGE: the Roy Van *Allens* Jr.

the Ellsworth *Hadleys* 3d

- 616** To form the plurals of *first names*, add *s* or *es* but do not change the original spellings.

Marie Maries

Douglas Douglasses

Timothy Timothys

Ralph Ralphs

Dolores Doloreses

Beatrix Beatrixes

Waldo Waldos

Gladys Gladyses

Fritz Fritzes

- 617** a. To form the plural of other proper names, add *s* or *es* but do not change the original spelling.

three Texans

two Christmases ago

the Norwegians

checked our Rolodexes

the Dakotas

bought two BlackBerrys

the Tonys, the Emmys, and the Grammys

Marches (*es* after *ch* sound)

the two Kansas Citys (**NOT:** Cities)

Czechs (*s* after *k* sound)

- b. In a few cases the original spelling is altered when the plural is formed.

the Alleghenies (for Allegheny Mountains) the Rockies (for Rocky Mountains)

- c. U.S. Treasury bills, notes, and bonds are often referred to simply by the plural form of *Treasury*. Some publications create the plural according to the standard rule: *Treasurys* (which is correct but looks odd). Others violate the rule to create a more normal-looking form: *Treasuries*. To avoid choosing between these plural forms, use *Treasury* as an adjective: for example, *Treasury bills*, *Treasury notes*, *Treasury bonds*.

- d. When the singular form ends with an apostrophe plus *s*, adding *es* to form the plural produces an awkward result.

AWKWARD: There are two *Bloomingdale's* close to where I live.

BETTER: There are two *Bloomingdale's* . . .

OR: There are two *Bloomingdale's stores* . . .

- e. When forming the plural of an italicized or underlined proper name, do not italicize or underline the plural ending. (See also ¶290d.)

I've accumulated a year's worth of *BusinessWeeks* (**OR:** BusinessWeeks).

Titles With Personal Names

- 618** a. The plural of *Mr.* is *Messrs.* (not *Mrs.*); the plural of *Ms.* is *Mses.* or *Mss.*; the plural of *Mrs.* or *Mme.* is *Mmes.* (for *Mesdames*); the plural of *Miss* is *Misses* (with no period). However, the use of plural titles normally occurs only in formal situations. In ordinary usage, simply retain the singular form and repeat it with each name.

Formal Usage

Messrs. Rae and Tate	Mmes. (OR: Mesdames) Byrd and Clyde
Misses Russo and Dupree	Miss Russo and Miss Dupree
Mses. (OR: Mss.) Lai and Cohen	Ms. Lai and Ms. Cohen

Ordinary Usage

Mr. Rae and Mr. Tate	Mrs. Byrd and Mrs. Clyde
Miss Russo and Miss Dupree	Ms. Lai and Ms. Cohen

- b. When these titles apply to two or more people with the same surname, the plural may be formed in two ways: (1) pluralize only the title (formal usage); (2) pluralize only the surname (ordinary usage).

Formal Usage

the Messrs. Steele	the Mmes. (OR: Mesdames) Bergeret
the Misses Conroy	the Miss Conroys
the Mses. (OR: Mss.) Purdy	the Ms. Purdys

Ordinary Usage

the Mr. Steeles	the Mrs. Bergerets
the Miss Conroys	the Ms. Purdys

Abbreviations, Letters, Numbers, Words, and Symbols

- 619** Form the plurals of most abbreviations by adding *s* to the singular. (See ¶623.)

apt.	apts.	Vol.	Vols.	No.	Nos.	Dr.	Drs.
bldg.	bldgs.	par.	pars.	Co.	Cos.	401(k)	401(k)s

- 620** a. The abbreviations of many customary units of weight and measure, however, are the same in both the singular and the plural. (See also ¶535a.)

oz (ounce OR: ounces)	ft (foot OR: feet)
deg (degree OR: degrees)	in (inch OR: inches)
bbl (barrel OR: barrels)	mi (mile OR: miles)

NOTE: For a number of these abbreviations, two plural forms have been widely used: for example, *lb* or *lbs* (meaning “pounds”), *yd* or *yds* (meaning “yards”), *qt* or *qts* (meaning “quarts”). However, the trend is toward using *lb*, *yd*, and *qt* to signify the plural.

- b. The abbreviations of metric units of weight and measure are the same in both the singular and the plural. (See also ¶¶537–538.)

km (kilometer OR: kilometers)	cg (centigram OR: centigrams)
mL (milliliter OR: milliliters)	dam (dekameter OR: dekameters)

► For the omission of periods with abbreviations of measurements, see ¶¶535a, 538b.

¶621

- 621** a. The plurals of a few single-letter abbreviations (such as *p.* for *page* and *f.* for *the following page*) consist of the same letter doubled.

p. 64 (page 64)	c. (copy)
pp. 64–72 (pages 64 through 72)	cc. (copies)
pp. 9 f. (page 9 and the following page)	n. 3 (note 3)
pp. 9 ff. (page 9 and the following pages)	nn. 3–4 (notes 3 and 4)
I. 23 (line 23)	
II. 23–24 (lines 23 through 24)	

- b. Plurals of certain symbols consist of the same symbol doubled.

¶ paragraph ¶¶ paragraphs § section §§ sections

- 622** a. Capital letters and abbreviations ending with capital letters are pluralized by adding *s* alone.

three Rs	HMOs	BBSs	R.N.s	VCRs
four Cs	POs	IQs	M.D.s	DVDs
five VIPs	S&Ls	PTAs	Ph.D.s	FAQs

NOTE: *FAQ* can be interpreted as “a frequently asked question” or “frequently asked questions.” When you are referring to a single item, write *FAQ*; when you are referring to several items, write *FAQs*.

- b. Use an apostrophe before the *s* where confusion might otherwise result.

three A's too many l's two U's

When the context is clear, no apostrophes are necessary.

His report card showed three As, two Bs, and one C.

Our CEO is not the company's only Type A. All the people who report to him are Type As.

Luciano Pavarotti was frequently referred to as the King of the High Cs.

- 623** For the sake of clarity, uncapitalized letters and most uncapitalized abbreviations are pluralized by adding an apostrophe plus *s*. (See ¶619; see also ¶285b.)

dotting the *i*'s *p*'s and *q*'s sending out three bcc's

four c.o.d.'s wearing pj's **BUT:** 401(k)s and 403(b)s

Following their losses in the stock market, Al and Tyler now refer to their 401(k)s as 201(k)s.

NOTE: When initials are spelled out, the plurals are formed normally.

emcees deejays okays Jaycees

- 624** a. Numbers expressed in figures are pluralized by the addition of *s* alone.

updating the W-2s in the 1990s

filling the 1099s in the '90s (decade; see ¶505g)

offering MP3s for sale in the 90s (temperature)

- b. Numbers expressed in words are pluralized by the addition of *s* or *es*.

ones twos threes sixes twenties (see ¶604) twenty-fives

- 625** a. When words taken from other parts of speech are used as nouns, they are usually pluralized by the addition of *s* or *es*.

ifs, ands, or buts ins and outs pros and cons whereabouts
dos and don'ts ups and downs the haves and whys and
yeses and nos yeas and nays the have-nots wherefores

- b.** If the pluralized form is unfamiliar or is likely to be misread, use an apostrophe plus *s* to form the plural.

- c. If the singular form contains an apostrophe, simply add s to form the plural.

ain't's mustn't's don't's ma'ams

For the use of italics or underlining with words referred to as words, see §§285, 290.

Plural Endings in Parentheses

- 626** When referring to an item that could be either singular or plural, enclose the plural ending in parentheses.

Please send the appropriate *form(s)* to the appropriate state *agency(ies)*.

NOTE: If you try to use an item expressed in this way as the subject of a sentence, you are likely to have difficulty in deciding whether the verb should be singular or plural.

The appropriate form(s) *is*?/*are*? available at your local motor vehicle office.

Choose a verb form that can serve both a singular and a plural subject.

The appropriate form(s) may be obtained at your local motor vehicle office.

As an alternative, simply reword the sentence to avoid the problem.

You may obtain the appropriate form(s) at your local motor vehicle office.

Forming Possessives

Possession Versus Description

- 627** a. A noun ending in the sound of s is usually in the possessive form if it is followed immediately by another noun. In the following examples note that possessive forms may express a number of different relationships, only one of which refers literally to possession or ownership.

my boss's approval (meaning the approval *of my boss*)

Belknap's farm (meaning the farm possessed or owned by Belknap)

IBM's product line (meaning the product line *made or sold by IBM*)

Faulkner's novels (meaning the novels *written by Faulkner*)

Matisse's paintings (meaning the paintings *created by Matisse*)

Frank's nickname (meaning the nickname *given to* or *used by* Frank)

a two weeks' vacation (meaning a vacation *for* or *lasting* two weeks)

TE: An apostrophe alone or an apostrophe plus s is the s-

To be sure that the possessive form should be used, try substituting one of phrases

- b. To be sure that the possessive form should be used, try substituting *an* or *of* phrase or making a similar substitution as in the examples above. If the substitution works, the possessive form is correct.

¶628

- 628** a. Do not mistake a descriptive form ending in *s* for a possessive form.

sales effort (*sales* describes the kind of effort)

savings account (*savings* describes the kind of account)

news release (*news* describes the type of press release)

earnings record (*earnings* describes the type of record)

- b. Some cases can be difficult to distinguish. Is it *the girls basketball team* or *the girls' basketball team*? Try substituting an irregular plural like *women*. You wouldn't say *the women basketball team*; you would say *the women's basketball team*. By analogy, *the girls' basketball team* is correct.

- c. Sometimes the possessive form in a name becomes a descriptive form and loses the apostrophe plus *s*. For example, what was traditionally called *Down's syndrome* now appears without an apostrophe or an *s* (1) in such names as the *National Down Syndrome Society* and the *National Association for Down Syndrome* and (2) in general usage as *Down syndrome*.

► For descriptive and possessive forms in organizational names, see ¶640a–c.

- 629** In a number of cases only a slight difference in wording distinguishes a descriptive phrase from a possessive phrase.

Descriptive

a six-month leave of absence
a high school diploma
the California climate
the Burgess account
the Crosby children

Possessive

a six months' leave of absence
a high school's performance rating
California's climate
Burgess's account
the Crosbys' children
OR: Mr. and Mrs. Crosby's children

Singular Nouns

- 630** a. To form the possessive of a singular noun *not* ending in an *s* sound, add an apostrophe plus *s* to the noun.

my lawyer's advice
a child's game
Gloria's career

Mr. and Mrs. Goodwin's party
Alzheimer's disease
Hobson's choice

- b. When a singular noun ends in a silent *s* sound, add an apostrophe plus *s*.

Illinois's highways
Arkansas's mountains
Degas's paintings

the corps's leadership
Des Moines's mayor
Saint Croix's beaches

- 631** To form the possessive of a singular noun that ends in an *s* sound, be guided by the way you pronounce the word.

- a. If a new syllable is formed in the pronunciation of the possessive, add an apostrophe plus *s*.

your boss's approval
the witness's reply

Mr. and Mrs. Morris's plane tickets
Phoenix's suburbs

¶632

Congress's intention	Ms. Lopez's application
Dallas's business district	Mr. Marsh's office
St. Louis's airport	my coach's training regimen

- b. If the addition of an extra syllable would make a word ending in an *s* hard to pronounce, add the apostrophe only.

Mr. Hastings' proposal	Jesus' parables
Peter Jennings' newscasts	Moses' flight from Egypt
Texas' best-known writer	Euripides' plays
Los Angeles' freeways	Achilles' heel
New Orleans' restaurants	BUT: Achilles tendon

NOTE: Individual differences in pronunciation will affect the way some of these possessives are written. For example, if you pronounce the possessive form of *Perkins* as two syllables, you will write *Mr. Perkins' kindness*; if you pronounce the possessive of *Perkins* as three syllables, you will write *Mr. Perkins's kindness*. The important thing is to listen to your own pronunciation. When you hear yourself pronounce the possessive of *boss* as two syllables (*boss's*) and the possessive of *witness* as three (*witness's*), you will not be tempted to write *your boss' approval* or *the witness' reply*. Naturally, tradition should take precedence over your ear. For example, an ambassador to Great Britain is appointed to the *Court of St. James's* (not, as you might expect, the *Court of St. James*).

- c. In the idiomatic expressions *for goodness' sake* and *for conscience' sake*, only an apostrophe is required to create the possessive form of *goodness* and *conscience*. These two words already end in an *s* sound, and the possessive form of these words does not call for the pronunciation of an extra *s* sound. By contrast, an apostrophe plus *s* is required in the expression *for heaven's sake* because *heaven* does not end in an *s* sound.
- d. When forming the possessive of any noun ending in *s* (for example, *Mr. Hodges*), always place the apostrophe at the end of the original word.

Mr. Hodges' message (**NOT:** Mr. Hodge's message)
 Brahms' symphonies (**NOT:** Brahm's symphonies)
 the United States' policy (**NOT:** the United State's policy)
Robert's Rules of Order (**NOT:** Roberts' Rules of Order)

Plural Nouns

- 632** a. For a *regular* plural noun (one that ends in *s* or *es*), add only an apostrophe to form the plural possessive. (See ¶¶639–640 for the use of the apostrophe in organizational names.)

investors' objectives	the agencies' conflicting rules
the witnesses' contradictions	the Hodges' legal residence (see ¶615b, note)
the Darlings' grandchildren	an old boys' network
attorneys' fees	BUT: a teachers college (see ¶653)

¶633

- b.** Since the singular and plural possessives for the same word usually sound exactly alike, pay particularly close attention to the meaning in order to determine whether the noun in question is singular or plural.

An *investor's* objectives should largely define investment strategy.

BUT: *Investors'* objectives are often not clearly defined.

We will need a ride to Mr. and Mrs. *Gaines's* party.

BUT: We will need a ride to the *Gaineses'* party.

I especially want to hear the last *witness's* testimony.

BUT: I especially want to hear the last two *witnesses'* testimony.

Season's greetings! (Referring to the holidays that occur in only one season—winter.)

Do you know the name of Fran and Jay *Boyd's* new store? The *Boys'* Nest. Awful, isn't it?

NOTE: In some cases only a dictionary can help you determine whether the possessive form should be singular or plural. For example, a plural possessive is used in *Legionnaires' disease*, but a singular possessive is used in *Hodgkin's disease* since the discoverer's name was Dr. Hodgkin (and not, as you might have expected, the more common name Hodgkins). Unlike the term *deacon's bench* (which uses a singular possessive), the term *Parsons table* involves no possessive form at all.

- 633** For an *irregular* plural noun (one that does not end in *s*), add an apostrophe plus *s* to form the plural possessive.

women's blouses

men's shirts

the alumni's reunion

children's toys

BUT: menswear

the alumnae's contribution

(originally, men's wear)

IMPORTANT NOTE: To avoid mistakes in forming the possessive of plural nouns, form the plural first; then apply the rule in ¶632 or ¶633, whichever fits.

Singular	Plural	Plural Possessive
boy	boys (regular)	boys'
boss	bosses (regular)	bosses'
hero	heroes (regular)	heroes'
Mr. and Mrs. Fox	the Foxes (regular)	the Foxes'
child	children (irregular)	children's
alumnus	alumni (irregular)	alumni's
alumna	alumnae (irregular)	alumnae's

Compound Nouns

- 634** To form the *singular* possessive of a compound noun (whether solid, spaced, or hyphenated), add an apostrophe plus *s* to the last element of the compound.

my son-in-law's job prospects

my stockbroker's advice

the secretary-treasurer's report

the notary public's seal

the owner-manager's policies

an eyewitness's account

a do-it-yourselfer's obsession

the attorney general's decision

If the compound noun already ends in *s*, simply add an apostrophe to the last element of the compound.

the board of directors' meeting (**NOT:** the board of director's meeting)

635 To form the *plural* possessive of a compound noun, first form the plural.

- a. If the plural form ends in *s*, add only an apostrophe.

Singular	Plural	Plural Possessive
stockholder	stockholders	stockholders'
vice president	vice presidents	vice presidents'
wheeler-dealer	wheeler-dealers	wheeler-dealers'
salesclerk	salesclerks	salesclerks'

- b. If the plural form does not end in *s*, add an apostrophe plus *s*.

Singular	Plural	Plural Possessive
editor in chief	editors in chief	editors in chief's
brother-in-law	brothers-in-law	brothers-in-law's

NOTE: To avoid the awkwardness of a plural possessive such as *editors in chief's* or *brothers-in-law's*, rephrase the sentence.

AWKWARD: We may have to invite my three *sisters-in-law's* parents too.

BETTER: We may have to invite the parents of my three *sisters-in-law* too.

AWKWARD: Mr. Ahmed's statement agrees with both *attorneys general's* views.

BETTER: Mr. Ahmed's statement agrees with the views of both *attorneys general*.

Pronouns

636 The possessive forms of *personal pronouns* and of the relative pronoun *who* do not require the apostrophe. These pronouns have their own possessive forms.

I: my, mine	he: his	we: our, ours
you: your, yours	she: her, hers	they: their, theirs
it: its		who: whose

My copy of the letter arrived last week, so she should have received *hers* by now. (**NOT:** her's.)
Each unit comes carefully packed in *its* own carton. (**NOT:** it's.)

The two products look so much alike that it's [it is] hard to tell *ours* from *theirs*. (**NOT:** our's from their's.)

CAUTION: Do not confuse personal possessive pronouns with contractions that are pronounced the same way. (See ¶1056e for examples.)

637 a. Some *indefinite pronouns* have regular possessive forms.

one's choice	one another's help	no one's responsibility
anyone else's job	anybody's guess	someone's chance

NOTE: When forming the possessive, be sure to place the apostrophe correctly.

the other's claim (only one person is involved) each other's claim

the others' claim (more than one person is involved) (**NOT:** each others' claim)

b. For those indefinite pronouns that do not have possessive forms, use an *of* phrase.

Although the children in this group seem very much alike, the needs *of each* are different. (**NOT:** each's needs.)

¶638

Abbreviations

- 638** To form the singular possessive of an abbreviation, add an apostrophe plus *s*. To form the plural possessive, add an *s* plus an apostrophe to the singular form. (See also ¶639.)

Singular

Mr. C.'s opinion
PBS's programming
this HMO's doctors

Plural

the M.D.s' diagnoses
the Ph.D.s' dissertations
the CPAs' meeting

Personal, Organizational, and Product Names

- 639** a. To form the possessive of a personal or an organizational name that ends with an abbreviation, a number, a prepositional phrase, or a mark of punctuation, add an apostrophe plus *s* at the end of the complete name.

Tiffany & Co.'s new stores
the Knights of Columbus's drive
United Bank of Arizona's loan rates
Yahoo!'s Web site
A&E's evening schedule

Hyde & Sikh Inc's dividends
Century 21's real estate agents
David Weild II's retirement
Walter Frick Jr.'s campaign
BUT: Carl's Jr. restaurants

- b. If *no extra s* sound is created when you pronounce the possessive form, add only an apostrophe.

the Gerald Curry Jrs.' yacht

- c. If an organization's name already exists as a possessive form, do not add an apostrophe or an apostrophe plus *s* when this name is used as a possessive.

McDonald's new locations (**NOT:** McDonald's' new locations; see also ¶617d)

- *For the treatment of possessive forms when terms like Jr. and Inc. are set off by commas, see ¶¶156, 159.*

- 640** The names of many organizations, products, and publications contain words that could be considered either possessive or descriptive terms.

- a. As a rule, use an apostrophe if the term is a singular possessive noun or an irregular plural noun.

Bloomingdale's	T.G.I. Friday's	Levi's jeans	Edy's ice cream
Macy's	Sam's Club	Elmer's glue	Lay's chips
FedEx Kinko's	Hellmann's mayonnaise	Campbell's soup	Hershey's candy bars
Wendy's	Uncle Ben's rice	Smucker's jams	Reese's Pieces
Denny's	St. Joseph's aspirin	Kellogg's cereals	Wrigley's gum
Arby's	Domino's pizzas	Welch's grape juice	M&M's candy
Children's Hospital (normal style)		St. Patrick's Cathedral	
BUT: Childrens Hospital (in Los Angeles)		America's Cup (yachting)	
St. Elizabeths Hospital (in D.C.)		BUT: Presidents Cup (golf)	

- b.** As a rule, do not use an apostrophe if the term is a regular plural.

National Governors Association	U.S. Department of Veterans Affairs
Investors Trust Company	American Bankers Association
Underwriters Laboratories Inc.	Government Employees Insurance Company
Consumers Union	International Chemical Workers Union
Authors Guild	BUT: Reserve Officers' Training Corps

- c.** In all cases follow the organization's preference when known.

Standard & Poor's	CliffsNotes
Actors' Equity	Diners Club members
Taster's Choice	Little Charlies pizzas
ShoppersChoice.com	Planters peanuts
Clarks	Folgers coffee
Mrs. Paul's frozen foods	Starbucks coffee
Mrs. Fields cookies	Talbots stores
Doc Martens shoes	Thomas' English muffins
Dockers khakis	Lands' End catalogs

- d.** In titles of books, periodicals, and similar works, always follow the style as given.

<i>Gulliver's Travels</i>	<i>Harper's Bazaar</i>
BUT: <i>Howards End</i>	<i>Women's Wear Daily</i>
<i>Finnegans Wake</i>	<i>Men's Fitness</i>
<i>Reader's Digest</i>	<i>McCall's</i>
BUT: <i>Consumers Digest</i>	<i>Barron's</i>

- e.** When adding the sign of the possessive to a phrase that must be italicized or underlined, do not italicize or underline the possessive ending. (See also ¶290d.)

Meet the Press's moderator *Gone With the Wind's main characters*

Nouns in Apposition

641 Sometimes a noun that normally would be in the possessive is followed by an *appositive*, a closely linked explanatory word or phrase. In such cases add the sign of the possessive to the appositive.

Stowe, *Vermont's* ski runs Washington, *D.C.'s* museums Lima, *Peru's* climate

(Note that the comma that normally follows an appositive is omitted after a possessive ending.)

You will faint when you see Paul *the plumber's* bill. (If the noun and the appositive are closely linked as a unit, even the first comma is omitted. See also ¶150.)

NOTE: To avoid an awkward construction, use an of phrase instead.

You will need to get the signature of *Mr. Bartel*, the executor.

(**BETTER THAN:** You will need to get Mr. Bartel, *the executor's* signature.)

Separate and Joint Possession

642 **a.** To indicate separate possession, add the sign of the possessive to the name of each individual.

the buyer's and the seller's signatures

the Joneses' and the Browns' houses

NOTE: Repeating *the* with each name emphasizes that ownership is separate.

Continued on page 218

643

- b.** If one or both of the individuals' names are replaced by a possessive pronoun, watch out for awkwardness and reword if necessary.

AWKWARD: my and the seller's signatures

BETTER: the seller's and my signatures

OR: the seller's signature and mine

AWKWARD: their and our houses

BETTER: their house and ours

AWKWARD: your and your husband's passports

BETTER: the passports for you and your husband

WRONG: he and his wife's work schedules

RIGHT: his and his wife's work schedules

- 643 a.** To indicate joint (or common) ownership, add the sign of the possessive to the *final* name alone.

the Barneses and the Terrys' property line a house like Paul and Molly's

waiting for the CEO and the board of directors' decision (a joint decision)

BUT: listening to the CEO's and the board of directors' opinions (separate opinions)

NOTE: In organizational names, follow the company's preference.

Ben & Jerry's ice cream Barnes & Noble's Web site

- b.** If one of the owners is identified by a pronoun, make each name and pronoun possessive.

Karen's and my ski lodge Andy's and her new SUV

BUT: Karen and Brian's ski lodge **BUT:** Andy and Gina's new SUV

Possessives Standing Alone

- 644** Sometimes the noun that the possessive modifies is not expressed but merely understood.

Fred is getting a *master's* [degree] in international economics.

Ask for it at your *grocer's* [store].

Wear your oldest shirt and *Levi's* [jeans]. (The trademark *Levi's* is a singular possessive form.)

We have been invited to dinner at the *Furnesses'* [house].

BUT: We always enjoy an evening with the *Furnesses*. (The people themselves are referred to; hence no possessive.)

NOTE: The possessive form must be used in the following construction in order to keep the comparison parallel.

This year's product line is pulling better than *last year's* [product line].

NOT: This year's product line is pulling better than last year. (Incorrectly compares *product line* with *last year*.)

Inanimate Possessives

- 645** As a rule, nouns referring to inanimate things should not be in the possessive. Use an *of* phrase instead.

the bottom of the barrel (**NOT:** the barrel's bottom)

the top of the bookcase (**NOT:** the bookcase's top)

the wording of the agreement (**NOT:** the agreement's wording)

the lower level of the terminal (**NOT:** the terminal's lower level)

- 646** In many common expressions that refer to time and measurements, however, and in phrases implying personification, the possessive form has come to be accepted usage. (See also ¶817b.)

at a moment's notice	a dollar's worth	this morning's news
an hour's work	several dollars' worth	for heaven's sake
a nine days' wonder	two cents' worth	for conscience' sake
two years' progress	at arm's length	(see ¶631c)
the company's assets	New Year's resolutions	the earth's atmosphere
the computer's memory	Season's greetings!	(see ¶351)

NOTE: Be sure to distinguish possessive expressions like those above from similar wording where no possessive relation is involved.

two weeks' salary **BUT:** two weeks ago, two weeks later, two weeks overdue

I bought *five dollars'* worth of chocolate truffles.

BUT: I found *five dollars* lying on the sidewalk.

Possessives Preceding Verbal Nouns

- 647 a.** When a noun or a pronoun modifies a *gerund* (the *ing* form of a verb used as a noun), the noun or pronoun should be in the possessive.

Our goal is to provide the best service you could ask for—without *your* having to ask.

(**NOT:** Our goal is to provide the best service you could ask for—without *you* having to ask.)

What would have been the point of *our* directing any further questions to the speaker?

(**NOT:** What would have been the point of *us* directing any further questions to the speaker?)

NOTE: The use of a possessive form before a gerund can produce a sentence that is grammatically correct but is awkward nonetheless. In such cases reword the sentence.

AWKWARD: He wanted to be reassured about his *children's* being given a ride home.

BETTER: He wanted to be reassured that his children would be given a ride home.

- b.** Not every noun or pronoun preceding the *ing* form of a verb should be in the possessive form. Compare the following pairs of examples:

What do you think of that *man* lighting a cigarette at the next table? (Here the focus is on the man himself, who is identified by the fact that he is lighting a cigarette.)

What do you think of that *man's* lighting a cigarette at the next table? (Here the focus is on the act of lighting a cigarette close to where you are sitting.)

I heard *you* singing at the party. (Here the emphasis is on *you*, the object of *heard*; *singing* is a participle that modifies *you*.)

I liked *your* singing at the party. (Here the emphasis is on *singing*, a gerund that is the object of *liked*; the pronoun *your* is in the possessive form because it modifies *singing*.)

Our success in this venture depends on *Allen* acting as the coordinator. (This suggests that the success depends on Allen himself rather than on the role he is playing. Even if Allen's role should change, success seems likely as long as he is associated with the project in some way.)

Our success in this venture depends on *Allen's* acting as the coordinator. (This puts the emphasis squarely on Allen's acting in a certain role. If he ceases to function as the coordinator, the venture may not succeed.)

648**Possessives in *Of* Phrases**

- 648** a. The object of the preposition *of* should not ordinarily be in the possessive form, since the *of* phrase as a whole expresses possession. However, possessives are used in a few idiomatic expressions.

Tony and Fiona are good friends of *ours* as well as our *children's*.

Did you know that Polly and Fred are neighbors of the *Joneses'*?

Bobby Busoni is a business associate of *Gordon's*.

That car of *yours* is going to need a new muffler.

The restaurant at the Bradley Inn is a real favorite of *mine*.

- b. Note the difference in meaning in the following phrases:

a statue of Rodin (a statue showing the likeness of the sculptor Rodin)

a statue of Rodin's (a statue created by Rodin)

a controversial view of the President (a view held by someone else)

a controversial view of the President's (a view held by the President)

- c. Avoid adding the sign of the possessive to an *of* phrase.

AWKWARD: *A friend of mine's house* burned down last night.

BETTER: *The house of a friend of mine* burned down last night.

AWKWARD: *One of my friends' son* has been named a Rhodes scholar.

BETTER: *The son of one of my friends* has been named a Rhodes scholar.

AWKWARD: I just found out that *the director of our training program's husband* is the chief information officer of your company.

BETTER: I just found out that *the husband of the director of our training program* is the chief information officer of your company.

NOTE: Attaching the sign of the possessive to an *of* phrase can sometimes create humorous confusion in addition to awkwardness.

CONFUSING: You must negotiate the purchase price with the owner of the horse's wife.

CLEAR: You must negotiate the purchase price of the horse with the owner's wife.

Possessives Modifying Possessives

- 649** Avoid attaching a possessive form to another possessive. Change the wording if possible.

AWKWARD: I have not yet seen the *utility company's lawyer's* petition.

BETTER: I have not yet seen the petition of the *utility company's lawyer*.

Possessives as Antecedents of Pronouns

- 650** Using a possessive as the antecedent of a pronoun (for example, “A *man's* home is *his* castle”) was formerly frowned upon by strict grammarians but is now generally considered to be acceptable.

Malcolm's comments indicate that *he* doesn't really understand the situation.

Before investing, you need to consider the *company's* results and *its* future plans.

Does *Harriet's* boss know that *she* is looking for another job?

Do not use a possessive as an antecedent if there is any chance of ambiguity.

Does *Harriet's* boss plan to announce *her* decision? (Is this Harriet's decision or her boss's decision?)

Possessives in Holidays

651 a. Possessives in names of holidays are usually singular.

New Year's Eve	Valentine's Day	BUT: Presidents' Day
Lincoln's Birthday	Saint Patrick's Day	April Fools' Day
Mother's Day	Father's Day	All Saints' Day

- b. Some holiday names contain a plural form rather than a plural possessive; for example: *Armed Forces Day*, *Veterans Day*, *United Nations Day*.
- c. The celebration that used to be called *Secretary's Day* is now called *Administrative Professionals Day* (with no apostrophe).

Possessives in Place Names

652 Place names that contain a possessive form typically do not use an apostrophe.

Dobbs Ferry, New York	Grants Pass, Oregon	Pikes Peak, Colorado
Colts Neck, New Jersey	Howards Grove, Wisconsin	Saint Catharines, Ontario
Devils Lake, North Dakota	Kings Point, New York	Toms River, New Jersey
BUT: Devil's Island	Loves Park, Illinois	Travelers Rest, South Carolina
Farmers Branch, Texas	BUT: Martha's Vineyard	Nomans Land, Massachusetts

Miscellaneous Expressions

653 a. A number of common expressions contain possessive forms.

athlete's foot	dog's life	proofreaders' mark
traveler's check	cat's-paw	lovers' lane
cashier's check	rabbit's foot	fielder's choice
collector's item	bull's-eye	child's play
baker's dozen	lion's share	workers' compensation (see 1809a, note)
cook's tour	coon's age	writer's block
dean's list	snail's pace	Adam's apple
visitor's permit	hornet's nest	no man's land
seller's market	mare's nest	witches' brew
BUT: farmers' market	rogues' gallery	women's room
finder's fee	crow's nest	BUT: woman's rights
winner's circle	captain's chair	states' rights
fool's paradise	widow's walk	BUT: state's evidence
arm's length	baby's breath	citizen's arrest
stone's throw	bachelor's buttons	BUT: citizens band
wrecker's ball	Queen Anne's lace	teacher's pet
king's ransom	Jacob's ladder	BUT: teachers college
King's English	mind's eye	

¶653

- b. Although a number of states now issue *drivers licenses* (without an apostrophe), the preferred form remains *driver's licenses*.
► For the plural forms of expressions like these, see ¶612d.
- c. Although *Merriam-Webster* says that you may be “at your wit’s end” (singular) or “at your wits’ end” (plural), you may prefer to be thought of as someone with more than one wit, especially when overwhelmed by trying circumstances. Moreover, “being at your wits’ end” tracks with expressions such as “being scared out of your wits” or “living by your wits” or, better yet, “keeping your wits about you.”

SECTION 7

Spelling

Spelling Guides (¶¶701–718)

- When a Final Consonant Is Doubled (¶¶701–702)
- When a Final Consonant Is Not Doubled (¶¶703–706)
- Final Silent *E* (¶¶707–709)
- When Final *Y* Is Changed to *I* (¶¶710–711)
- EI* and *IE* Words (¶712)
- Words Ending in *ABLE* and *IBLE* (¶713)
- Words Ending in *ANT*, *ANCE*, *ENT*, and *ENCE* (¶714)
- Words Ending in *IZE*, *ISE*, and *YZE* (¶715)
- Words Ending in *CEDE*, *CEED*, and *SEDE* (¶716)
- Words Ending in *C* (¶717)
- Words With Diacritical Marks (¶718)

Words That Sound Alike or Look Alike (¶719)

Troublesome Words (¶720)

► For definitions of grammatical terms, see the appropriate entries in the *Glossary of Grammatical Terms* (Appendix A).

Section 7 offers three kinds of assistance: ¶¶701–718 present the basic guidelines for correct spelling; ¶719 provides a list of look-alike and sound-alike words for review and fast reference; ¶720 presents a list of troublesome words.

The authority for spelling in this manual is the 2009 printing of *Merriam-Webster's Collegiate Dictionary*, Eleventh Edition. Whenever two spellings are allowable, only the first form is usually given here.

NOTE: The dictionaries and spell checkers that are built into word processing software may not always agree with the dictionary that serves as the authority for spelling in this manual. A spell checker will flag any word not listed in its own dictionary or in a supplemental dictionary you create, even if the word is spelled correctly. Reduce the number of “false alarms” by expanding your dictionary to include frequently used terms and names. In addition, always proofread carefully since no spell checker will flag words spelled correctly but used incorrectly. (See ¶1202b.) For example, if you write “Summer is our *peek* season for swimwear,” the spell checker will not question *peek* because it is spelled correctly. You will have to find the error yourself or suffer the embarrassing consequences.

¶701

Spelling Guides

When a Final Consonant Is Doubled

- 701** When a word of one syllable ends in a single consonant (*bag*) preceded by a single vowel (*bag*), double the final consonant before a suffix beginning with a vowel (*bagage*) or before the suffix *y* (*baggy*). (See ¶703.)

rub	<u>rubbed</u>	swim	<u>swimmer</u>	stop	<u>stopped</u>
glad	<u>gladden</u>	skin	<u>skinny</u>	slip	<u>slippage</u>
if	<u>iffy</u>	clan	<u>clannish</u>	star	<u>starring</u>
fog	<u>foggy</u>	run	<u>running</u>	bet	<u>bettor</u>

EXCEPTIONS:

yes	<u>yeses</u>	dew	<u>dewy</u>	tax	<u>taxing</u>
bus	<u>buses</u>	bow	<u>bowed</u>	fax	<u>faxed</u>
gas	<u>gases</u>	sew	<u>sewing</u>	box	<u>boxy</u>

NOTE: When a one-syllable word ends in *y* preceded by a single vowel, do not double the *y* before a suffix beginning with a vowel. (See ¶711.)

pay	<u>payee</u>	joy	<u>joyous</u>	toy	<u>toying</u>
key	<u>keyed</u>	boy	<u>boyish</u>	buy	<u>buyer</u>

- 702** When a word of more than one syllable ends in a single consonant (*refer*) preceded by a single vowel (*refer*) and the accent falls on the last syllable of the root word (*refer*), double the final consonant before a suffix beginning with a vowel (*referred*). (See ¶704.)

forbid	<u>forbidden</u>	begin	<u>beginning</u>	infer	<u>inferred</u>
unclog	<u>unclogged</u>	unzip	<u>unzipped</u>	occur	<u>occurring</u>
retag	<u>retagging</u>	concur	<u>concurrent</u>	regret	<u>regrettable</u>
control	<u>control/er</u>	defer	<u>deferring</u>	admit	<u>admitting</u>

EXCEPTIONS (see ¶711):

display	<u>displaying</u>	obey	<u>obeyed</u>	enjoy	<u>enjoyable</u>
---------	-------------------	------	---------------	-------	------------------

NOTE: When a suffix beginning with a vowel is added, do not double the final consonant if the accent shifts from the second syllable.

refer	<u>referred</u>	prefer	<u>preferred</u>	transfer	<u>transferred</u>
BUT: <u>reference</u>		BUT: <u>preferable</u>		BUT: <u>transferee</u>	

When a Final Consonant Is Not Doubled

- 703** When a word of one syllable ends in a single consonant (*bad*) preceded by a single vowel (*bad*), do not double the final consonant before a suffix beginning with a consonant (*badly*).

glad	<u>gladness</u>	star	<u>stardom</u>	play	<u>playful</u>
ten	<u>tenfold</u>	wit	<u>witless</u>	joy	<u>joyfully</u>
ship	<u>shipment</u>	flag	<u>flagship</u>	boy	<u>boyhood</u>

704 When a word of more than one syllable ends in a single consonant (*benefit*) preceded by a single vowel (*benefit*) and the accent *does not* fall on the last syllable of the root word (*benefit*), *do not* double the final consonant before a suffix beginning with a vowel (*benefited*).

catalog	cataloged, cataloging	differ	differed, different
total	totaled, totaling	credit	credited, creditor
cancel	canceled, canceling	profit	profited, profiting
	BUT: cancellation	benefit	benefited, benefiting
worship	worshiped, worshiper	borrow	borrowed, borrowing
gossip	gossiped, gossiping	index	indexed, indexing

EXCEPTIONS:

program	program <u>med</u> , program <u>ming</u>	outfit	outfitted, outfit <u>ng</u>
format	format <u>ted</u> , format <u>ting</u>	kidnap	kidnapped, kidnapping
diagram	diagram <u>med</u> , diagram <u>ming</u>	handicap	handicapped, handicapping

705 When a word of one or more syllables ends in a single consonant (*cloud*, *repeat*) preceded by more than one vowel (*cloud*, *repeat*), *do not* double the final consonant before any suffix (*cloudless*, *repeating*).

gain	gain <u>ful</u>	bias	biased	wool	woolen
haul	haul <u>ing</u>	chief	chiefly		BUT: woolly
dream	dreamy	riot	riotous	loud	loudness
cheer	cheery	broad	broadly	equal	equaled
deceit	deceit <u>ful</u>	poet	poet <i>c</i>	duel	dueling
feud	feud <u>al</u>	toil	toil <u>som</u> e	buoy	buoyant

EXCEPTIONS:

equip	equipped, equipping	BUT: equipment	quit	quitting
quiz	quizzed, quizzing, quizzical		squat	squatter

706 When a word of one or more syllables ends with more than one consonant (*work*, *detach*), do not double the final consonant before any suffix (*workday*, *detached*).

comb	combing	back	backward	shirr	shirring
hand	handy	curl	curly	mass	massive
self	selfish	warm	warmy	slant	slantwise
swing	swinging	return	returned	jinx	jinxed
wish	wishful	harp	harping	blitz	blitzing

NOTE: Words ending in *ll* usually retain both consonants before a suffix. However, when adding the suffix *ly*, drop one *l* from the root word. When adding the suffix *less* or *like*, insert a hyphen between the root and the suffix to avoid three *l*'s in a row.

skill	skill <u>ful</u>	full	full <u>y</u>	hull	hull- <u>less</u>
install	install <u>ment</u>	dull	dull <u>y</u>	shell	shell- <u>like</u>

707**Final Silent E**

- 707** a. Words ending in silent *e* usually drop the *e* before a suffix beginning with a vowel.

sale	<u>salable</u>	sense	<u>sensible</u>	propose	<u>proposition</u>
size	<u>sizable</u>	argue	<u>arguing</u>	execute	<u>executive</u>
store	<u>storage</u>	issue	<u>issuing</u>	sincere	<u>sincerity</u>
arrive	<u>arrival</u>	blue	<u>bluish</u>	desire	<u>desirous</u>
accuse	<u>accusation</u>	true	<u>truisms</u>	use	<u>usual</u>

EXCEPTIONS:

agree	<u>agreeing</u>	mile	<u>mileage</u>	dye	<u>dyeing</u>
see	<u>seeing</u>	acre	<u>acreage</u>	eye	<u>eyeing</u>
puree	<u>pureeing</u>	segue	<u>segueing</u>	canoe	<u>canoeing</u>
sauté	<u>sautéing</u>	queue	<u>queueing</u>	tiptoe	<u>tiptoeing</u>

- b. Words ending in silent *e* usually drop the *e* before the suffix *y*.

ease	<u>easy</u>	ice	<u>icy</u>	edge	<u>edgy</u>
chance	<u>chancy</u>	bounce	<u>bouncy</u>	range	<u>rangy</u>

EXCEPTIONS:

cage	<u>cagey</u>	dice	<u>dicey</u>	price	<u>pricey</u>
home	<u>homey</u>	hole	<u>holey</u>	dope	<u>dopey</u>

- c. Words ending in *ce* or *ge* usually retain the *e* before a suffix beginning with *a* or *o* (so as to preserve the soft sound of the *c* or *g*).

enforce	<u>enforceable</u>	trace	<u>traceable</u>	change	<u>changeable</u>
notice	<u>noticeable</u>	advantage	<u>advantageous</u>	knowledge	<u>knowledgeable</u>
replace	<u>replaceable</u>	courage	<u>courageous</u>	manage	<u>manageable</u>
service	<u>serviceable</u>	outrage	<u>outrageous</u>	marriage	<u>marriageable</u>

EXCEPTIONS:

pledge	<u>pledgor</u>	mortgage	<u>mortgagor</u>
--------	----------------	----------	------------------

NOTE: Before suffixes beginning with *i*, the *e* is usually dropped.

force	<u>forcible</u>	college	<u>collegial</u>	age	<u>aging</u>
reduce	<u>reducible</u>	finance	<u>financial</u>	enforce	<u>enforcing</u>

EXCEPTIONS:

singe	<u>singeing</u>	tinge	<u>tingeing</u>	age	<u>ageism</u>
-------	-----------------	-------	-----------------	-----	---------------

- 708** Words ending in silent *e* usually retain the *e* before a suffix beginning with a consonant.

hope	<u>hopeful</u>	manage	<u>management</u>	trouble	<u>troublesome</u>
care	<u>careless</u>	like	<u>likeness</u>	nine	<u>ninety</u>
sincere	<u>sincerely</u>	flame	<u>flameproof</u>	edge	<u>edgewise</u>

EXCEPTIONS:

wise	<u>wisdom</u>	true	<u>truly</u>	argue	<u>argument</u>
awe	<u>awful</u>	due	<u>duely</u>	judge	<u>judgment</u>
nine	<u>ninth</u>	gentle	<u>gently</u>	acknowledge	<u>acknowledgment</u>
whole	<u>wholly</u>	subtle	<u>subtly</u>	abridge	<u>abridgment</u>

709 Words ending in *ie* change the *ie* to *y* before adding *ing*.

die	<u>dying</u>	tie	<u>tying</u>	lie	<u>lying</u>
-----	--------------	-----	--------------	-----	--------------

When Final Y Is Changed to I

710 a. Words ending in *y* preceded by a consonant change the *y* to *i* before most suffixes.

vary	<u>variable</u>	fly	<u>flier</u>	likely	<u>likelihood</u>
custody	<u>custodial</u>	easy	<u>easier</u>	ordinary	<u>ordinarily</u>
Italy	<u>Italian</u>	heavy	<u>heaviest</u>	accompany	<u>accompaniment</u>
defy	<u>defiant</u>	fifty	<u>fiftieth</u>	happy	<u>happiness</u>
carry	<u>carried</u>	fancy	<u>fanciful</u>	fallacy	<u>fallacious</u>

EXCEPTIONS:

dry	<u>dryly</u>	shy	<u>shyly</u>	country	<u>countrywide</u>
-----	--------------	-----	--------------	---------	--------------------

b. Words ending in *y* preceded by a consonant usually retain the *y* when the suffix begins with *i*.

try	<u>trying</u>	thirty	<u>thirtyish</u>	lobby	<u>lobbyist</u>
crony	<u>cronyism</u>	fogy	<u>foguish</u>	copy	<u>copyist</u>

EXCEPTIONS:

academy	<u>academic</u>	economy	<u>economic</u>	symphony	<u>symphonie</u>
---------	-----------------	---------	-----------------	----------	------------------

711 Words ending in *y* preceded by a vowel usually retain the *y* before any suffix.

okay	<u>okayed</u>	convey	<u>conveyance</u>	employ	<u>employable</u>
clay	<u>clayey</u>	obey	<u>obeying</u>	joy	<u>joyful</u>
display	<u>displaying</u>	survey	<u>surveyor</u>	buy	<u>buyer</u>

EXCEPTIONS:

pay	<u>paid</u>	day	<u>daily</u>	gay	<u>gaily</u>
lay	<u>laid</u>	say	<u>said</u>	slay	<u>slain</u>

EI and IE Words

712 According to the old rhyme:

Put *i* before *e*
Except after *c*
Or when sounded like *a*
As in *neighbor* and *weigh*.

I Before E

believe	brief	field	niece	BUT: either	height
relieve	chief	wield	piece	neither	leisure
belief	thief	yield	anxiety	seize	foreign
relief	friend	view	variety	weird	caffeine
grieve	sieve	lien	achieve	feisty	protein
alien	adieu	client	acquiesce	forfeit	apartheid
ambient	besiege	priest	mischievous	albeit	leitmotif

Continued on page 228

¶713

After C

deceive	receive	conceive	perceive	BUT: ancient	conscience
deceit	receipt	conceit	ceiling	science	financier

Sounded Like A

freight	their	eight	vein	heinous	surveillance
weight	heir	beige	feign	feint	spontaneity
sleigh	skein	deign	reign	rein	chow mein

Words Ending in ABLE and IBLE

- 713** a. The ending *able* is more commonly used.

admirable	dispensable	movable	salable
advisable	doable	payable	transferable
changeable	knowledgeable	probable	unmistakable
dependable	likable	reasonable	usable
desirable	measurable	receivable	valuable

► For guidelines on dropping or retaining silent e before the ending, see ¶707.

- b. However, a number of frequently used words end in *ible*.

accessible	deductible	irresistible	responsible
admissible	eligible	legible	sensible
compatible	feasible	negligible	susceptible
convertible	flexible	permissible	terrible
credible	irrepressible	possible	visible

Words Ending in ANT, ANCE, ENT, and ENCE

- 714** Words ending in *ant*, *ance*, *ent*, and *ence* follow no clear-cut pattern. Therefore, consult a dictionary when in doubt.

account <u>ant</u>	acquaint <u>ance</u>	depend <u>ent</u>	confidenc <u>e</u>
defend <u>ant</u>	assistance	eminent	experience
descendant	attendance	permanent	intelligence
exorbitant	guidance	persistent	occurrence
irrelevant	maintenance	prevalent	reference
resistant	relevance	strident	subsistence

Words Ending in IZE, ISE, and YZE

- 715** a. Most of these words end in *ize*.

apologize	criticize	minimize	realize	summarize
authorize	economize	organize	recognize	vandalize
characterize	emphasize	prize	specialize	visualize

- b. A number of common words end in *ise*.

advertise	comprise	disguise	franchise	supervise
advise	compromise	enterprise	improvise	surmise
apprise	concise	excise	merchandise	surprise
arise	despise	exercise	paradise	televise
chastise	devise	expertise	revise	treatise

- c. Only a few words end with *yze*.

analyze	catalyze	paralyze
---------	----------	----------

Words Ending in ***CEDE***, ***CEED***, and ***SEDE***

- 716** a. Most words ending with the sound of “seed” are spelled *cede*: *precede*, *secede*, *recede*, *concede*, *accede*, *intercede*.
- b. Only *three* words end in *ceed*: *exceed*, *proceed*, *succeed*. (Note, however, that derivatives of these three words are spelled with only one *e*: *excess*, *procedure*, *success*.)
- c. Only *one* word ends in *sede*: *supersede*.

Words Ending in **C**

- 717** Words ending in *c* usually take the letter *k* before a suffix so as to preserve the hard sound of the *c*.

mimic	mimicked, mimicking	BUT: mimicry
panic	panicked, panicking	panicky
picnic	picnicked, picnicking	picnicker
shellac	shellacked, shellacking	
traffic	trafficked, trafficking	
BUT: arc	arced, arcing	
spec	specced, specging	

Words With Diacritical Marks

- 718** Many French words are now considered part of the English language and no longer require italics or underlining (see ¶287). Some of these words still retain diacritical marks from the French form. If you are using software with special character sets, you can access these diacritical marks. Otherwise, you will have to insert them by hand.

- a. **Acute Accent.** An acute accent (‘) over the letter *e* (é) signifies that the letter is to be pronounced *ay* (as in *may*). Moreover, it signifies that at the end of a word the letter *é* is to be pronounced as a separate syllable.

attaché	détente	habitué	Estée Lauder
blasé	éclat	née	Fabergé
café	élan	outré	L'Oréal
cliché	entrée	passé	Nescafé
communiqué	exposé	précis	BUT: matinee
consommé	fiancé (m.)	risqué	melee
crudité	fiancée (f.)	touché	puree

A few words call for two acute accents:

résumé	protégé	décolleté	déclassé
--------	---------	-----------	----------

719

The word *naiveté* has an acute accent over the final *e*, and at one time it was commonly written with a diaeresis (two dots) over the *i*—*naïveté*. The diaeresis was used to indicate that the *i* should be pronounced as a separate syllable and not like the *ai* in *Maintain*. For the correct pronunciation of this word, see page 687.

NOTE: The word *forte* does not have an acute accent over the *e*. It is pronounced *FOR-tay* only when it refers to a musical direction (meaning “loud”). When *forte* means “one’s strong point,” it should be pronounced as one syllable—*FORT*.

b. Grave Accent. A few French expressions retain a grave accent (˘).

à la carte	vis-à-vis	crèche	pièce de résistance
à la mode	pied-à-terre	voilà	cause célèbre

c. The Circumflex. A few phrases derived from the French retain a circumflex (^).

maître d'hôtel	raison d'être	pâté	papier-mâché
table d'hôte	tête-à-tête	bête noire	BUT: fete

Words That Sound Alike or Look Alike

719 The following list contains two types of words: (a) words that are pronounced *exactly alike* though spelled differently, and (b) words that look and sound *somewhat alike*.

► *For additional words that are frequently confused, see Section 11.*

accede to comply with; to give consent

exceed to surpass

accent stress in speech or writing

ascent act of rising

assent consent

accept (v.) to take; to receive

except (v.) to exclude; (prep.) excluding (see page 378)

access admittance

excess surplus

axis an alliance; a line signifying direction or motion

ad short for *advertisement*

add to join

adapt to adjust

adept proficient

adopt to choose

addenda (see *agenda*)

addition something added

edition one version of a printed work

adherence attachment

adherents followers

ado making a fuss over trivial details (as in *much ado about nothing; without further ado*)

adieu farewell (see page 360)

adopt (see *adapt*)

adverse harmful; hostile; unfavorable (see page 360)

averse opposed (to)

advice (n.) information; recommendation

advise (v.) to recommend; to give counsel

affect (v.) to influence; to change; to assume (see page 360)

effect (n.) result; impression; (v.) to bring about

agenda list of things to do

addenda additional items

aid (n.) a form of help; (v.) to help

aide an assistant

ail to be in ill health

ale a drink much like beer

air atmosphere

heir one who inherits

err to make a mistake

aisle (see *isle*)

allot to assign or distribute a share of something (see page 362)

a lot a great deal (**NOT:** alot)

allowed permitted

aloud audibly

allusion an indirect reference

illusion an unreal vision;

misapprehension

delusion a false belief

elusion adroit escape

almost nearly (see pages 361, 392)

all most all very much

already previously (see page 362)

all ready all prepared

- altar** part of a church
alter to change
- alternate** (n.) substitute; (v.) to take turns
alternative (n.) one of several things from which to choose
- altogether** entirely (see page 363)
all together everyone in a group
- always** at all times (see page 363)
all ways all means or methods
- amused** entertained
bemused puzzled
- annals** historical records
annual yearly
annul to cancel
- ante-** a prefix meaning “before”
anti- a prefix meaning “against”
- antecedence** priority
antecedents preceding things; ancestors
- anyone** anybody (see ¶1010)
any one any one person in a group
- anyway** in any case (see page 364)
any way any method
- apportion** (see *portion*)
- appraise** to set a value on (see page 364)
apprise to inform
- arc** something arched or curved
ark a ship; a place of protection
- are** (see *hour*)
- area** surface; extent
aria a melody
- arrears** that which is due but unpaid
- arrange** to put in order
arraign to call into court
- ascent** (see *accent*)
- assay** (v.) to test, as an ore
essay (n.) a treatise; (v.) to attempt
- assent** (see *accent*)
- assistance** help
assistants those who help
- assure** (see *ensure*)
- ate** past tense of *eat*
eight the numeral 8
- attain** to gain; to achieve
attend to be present at
- attendance** presence
attendants escorts; followers; companions; associates
- aught** (see *ought*)
- averse** (see *adverse*)
- away** absent, distant
aweight raised clear of the bottom (as in *anchors aweigh*)
- awhile** (adv.) for a short time (see page 365)
- a while** (phrase) a short period of time
- axis** (see *access*)
- bail** (n.) security; the handle of a pail; (v.) to dip water
bale a bundle
- baited** past tense of *bait*
bated restrained (as in *bated breath*)
- baloney** nonsense
bologna smoked sausage
- bare** (adj.) naked; empty; (v.) to expose
- bear** (n.) an animal; (v.) to carry; to produce; to endure (as in *grin and bear it*)
- base** (n.) foundation; (adj.) mean
bass a fish (rhymes with *mass*); lower notes in music (pronounced like *base*)
- bases** plural of *base* and of *basis*
- basis** foundation
- bated** (see *baited*)
- bazaar** (see *bizarre*)
- bear** (see *bare*)
- beat** (n.) throb; tempo; (v.) to strike
- beet** a vegetable
- bellow, bellows** (see *billow*)
- bemused** (see *amused*)
- berry** a fruit
bury to submerge; to cover over
- berth** a bed
birth being born
- beside** by the side of; separate from (see page 367)
- besides** in addition to; also
- better** (adj.) greater than; more effective; (adv.) to a greater degree
- bettor** one who bets
- bibliography** list of writings pertaining to a given subject or author
- biography** written history of a person's life

- birth** (see *berth*)
- bizarre** fantastic; extravagantly odd
- bazaar** a place for selling goods
- bite** a small amount (as in a *sound bite*)
- byte** a unit of computer information consisting of 8 bits
- blew** past tense of *blow*
- blue** a color

Continued on page 232

719

block (n.) a solid piece of material; (v.) to obstruct
bloc an interest group pursuing certain political or economic goals (as in *bloc voting*)
board a piece of wood; an organized group; meals
bored penetrated; wearied
boarer one who pays for meals and often for lodging as well
border edge
bolder more daring
boulder a large rock
bologna (see *baloney*)
born brought into life
borne carried; endured
bouillon (see *bullion*)
bow (v.) to bend; (n.) the forward part of a ship (rhymes with *cow*); an instrument used with an arrow or a stringed instrument (rhymes with *snow*)
bough a branch of a tree (rhymes with *cow*)
bowl a concave container (as in *soup bowl*); postseason football game (as in *Rose Bowl*)
boll the pod of a cotton plant (as in *boll weevil*)
boy a male child
buoy a float
brake (n.) a retarding device; (v.) to retard
break (n.) an opening; a fracture; (v.) to shatter; to divide
breach a breaking (as in *breach of contract*); a violation (as in *a breach of the peace*)
breech the hind end of the body
breeches pants
britches pants (as in *too big for his britches*)
bread food
bred brought up

breath respiration
breathe to inhale and exhale
breadth width
bridal concerning the bride or the wedding
bridle (n.) means of controlling a horse; (v.) to take offense
broach to open; to introduce
brooch ornament
build (see *billed*)
bullion uncoined gold or silver
bouillon broth (as in *bouillon cube*)
buoy (see *boy*)
burro a donkey
burrow a hole in the ground
bury (see *berry*)
byte (see *bite*)
cachet, cachet (see *cash*)
calendar a record of time
calender a machine used in finishing paper and cloth
colander a strainer
callous (adj.) hardened, unfeeling
callus (n.) a hardened surface
canapé an appetizer
canopy a cloth covering over a bed; an awning; a marquee
cannot usual form (meaning “to be unable”)
can not two words in the phrase *can not only* (where *can* means “to be able”)
canon a body of rules or standards
cannon a piece of artillery
canvas (n.) a coarse cloth
canvass (v.) to solicit
capital, capitol, Capitol (see page 369)
careen to lurch; to sway from side to side
career (v.) to move at top speed
caret a wedge-shaped mark (^)
carat a unit of weight for precious stones
karat a unit of fineness for gold
carton a pasteboard box
cartoon a caricature
cash ready money
cache a hiding place
cachet a mark of approval
casual incidental; informal
causal causing
cease to stop
seize to grasp
cede to grant; to give up
seed that from which anything is grown
ceiling top of a room; any overhanging area
sealing closing
cell (see *sell*)
cellar (see *seller*)

surge (n.) a billow; (v.) to rise suddenly

serial (see *cereal*)

serve to help (see page 397)

service to keep in good repair

session (see *cession*)

sew (see *so*)

shear to cut; to trim

sheer transparent; utter

sheik (see *chic*)

shoot to fire

chute a slide

shown displayed; revealed; past participle of *show*

shone gave off light; did shine

sic (adv.) written this way in the original; (v.) attack (as in *sic 'em*)

sick in ill health

sight, site (see *cite*)

simple plain; uncomplicated

simplistic oversimplified; falsely simple

skimp (see *scrimp*)

sleight dexterity (as in *sleight of hand*)

slight (adj.) slender; scanty; (v.) to make light of

so therefore

sew to stitch

sow to scatter seed

soar (see *sore*)

soared did fly

sword weapon

sole one and only; a fish

soul the immortal spirit

Continued on page 242

719

soluble having the ability to dissolve in a liquid
solvable capable of being solved or explained
some a part of
sum a total
someone somebody (see ¶1010)
some one some person in a group
sometime at some unspecified time (see page 400)
some time a period of time
sometimes now and then
son male child
sun the earth's source of light and heat
sore painful
soar to fly
soul (see *sole*)
sow (see *so*)
spacious having ample room
specious outwardly correct but inwardly false
specially (see *especially*)
squash (see *quash*)
staid grave; sedate
stayed past tense and past participle of *to stay*
stair a step
stare to look at
stake (n.) a pointed stick; a prize; (v.) to wager
steak a slice of meat or fish
stanch to stop the flow of something (such as blood or tears)
staunch faithful; steadfast
stationary fixed
stationery writing materials
statue a carved or molded figure
stature height
statute a law
stayed (see *staid*)

steak (see *stake*)
steal to take unlawfully
steel a form of iron
straight not crooked; directly
strait a water passageway; (plural) a distressing situation (as in *dire straits*)
succor (n.) something that provides relief; (v.) to relieve
sucker someone easily cheated
suit (n.) a legal action; clothing; (v.) to please
suite a group of things (such as rooms) forming a unit
sweet having an agreeable taste
sum (see *some*)
sun (see *son*)
superintendence management
superintendents supervisors
surge (see *serge*)
sweet (see *suit*)
sword (see *soared*)
symbol something that stands for or suggests something else
cymbal a bronze plate that produces a clashing sound when struck by another cymbal
sympathy (see *empathy*)
tack (n.) direction; (v.) to change direction (see page 401)
tact considerate way of behaving so as to avoid offending others
tail the end
tale a story (as in *thereby hangs a tale*)
tare allowance for weight
tear (n.) a rent or rip (pronounced like *tare*); a secretion from the eye (pronounced like *tier*); (v.) to rip
tier a row or layer
taught did teach
taut tight; tense
team a group
team to abound
tear (see *tare*)
tenant one who rents property
tenet a principle
than conjunction of comparison (see page 401)
then (adv.) at that time
their belonging to them (see ¶1056e)
there in that place
they're contraction of *they are*
theirs possessive form of *they*; used when a noun does not follow
there's contraction of *there is* or *there has* (see ¶1056e)
therefor for that thing
therefore consequently
thrash to beat; to flog
thresh to separate seeds from a plant (as in *to thresh grain*)
throes a painful struggle (as in *death throes, the throes of passion*)
throws hurls; flings
through by means of; from beginning to end; because of
threw did throw (as in *threw someone for a loop*)
thorough exhaustive
tier (see *tare*)
to (prep.) toward
too (adv.) more than enough; also
two one plus one
toe to stand in a designated position (as in *toe the line* or *toe the mark*) (see page 402)
tow to haul; to pull
tortuous winding; twisty; devious
torturous cruelly painful
track a trail
tract a treatise; a piece of land

trial examination; experiment; hardship
trail a path

trooper a soldier
trouper a theatrical performer; one who endures hardships (as in a *real trouper*)

trustee a person to whom something is entrusted
trusty (n.) a convict who is considered trustworthy; (adj.) dependable

turban a headdress
turbine an engine

turbid opaque
turgid swollen; bombastic (as in *turgid prose*)

undo to open; to render ineffective
undue improper; excessive (as in *undue influence*)

uninterested (see *disinterested*)

urban pertaining to the city
urbane polished; suave

vain proud; conceited; useless; futile (as in *all in vain*)

vane a weathercock

vein a blood vessel; (as in *to follow in the same vein as*); a bed of mineral materials

vale a valley
veil a concealing cover or cloth (as in *a veil of tears*)

venal corrupt; bribable
venial forgivable (as in *venial sin*)

vendee purchaser
vendor seller

veracious truthful
voracious greedy

veracity truthfulness
voracity ravenousness; greediness

verses poems; lines of poetry

versus against (often abbreviated as *vs.* or *v.*)

vial a small flask for liquids

vile disgusting; despicable

vice wickedness; a prefix used with nouns to designate titles of office (see ¶1808c)

vise a clamp

voracity (see *veracity*)

waist part of the body

waste (n.) needless destruction; useless consumption; (v.) to expend uselessly

wait to stay

weight heaviness

waive (v.) to give up

wave (n.) a billow; a gesture; (v.) to swing back and forth

waiver the giving up of a claim

waver to hesitate

wangle to get by devious means (as in *to wangle an invitation*)

wrangle to bicker; to herd horses

want (n.) a need; (v.) to lack; to desire

wont a custom (pronounced like *want*)

won't contraction of *will not*

ware goods

wear to have on; to diminish

were form of *to be*

where at the place in which

warranty a guarantee

warrantee the person who receives a warranty

wave (see *waive*)

waver (see *waiver*)

way direction; distance; manner

weigh to find the weight (as in *to weigh in*); to heave up (as in *to weigh anchor*)

weak not strong

week seven days

weather (n.) state of the atmosphere; (v.) to come through safely

whether if (see pages 383–384)

weigh (see *way*)

weight (see *wait*)

wet (v.) to moisten

whet (v.) to sharpen (as in *to whet one's appetite*)

where (see *ware*)

whoever anyone who

who ever two words (see page 404)

whole (see *hole*)

wholly (see *holy*)

whose possessive of *who*

who's contraction of *who is* or *who has* (see ¶1063)

willfully in a determined manner

willingly cheerfully; happily; with one's free will

wither to become dry; to lose freshness

whither to whatever place

woe grief (as in *woe is me*)

whoa stand still

won (see *one*)

wont, won't (see *want*)

wood lumber

would an auxiliary verb form (as in *they would like some*)

wrangle (see *wangle*)

wrap (see *rap*)

wrapped (see *rapt*)

wreak (see *reek*)

wreckless (see *reckless*)

¶720**wright, write** (see *right*)**wringer** (see *ringer*)**wrote** (see *rote*)**wry** (see *rye*)**yoke** a crosspiece that holdstwo things together; an
oppressive constraint
(as in *the yoke of
oppression*)**yolk** the yellow part of an egg**you** second-person pronoun**yew** an evergreen tree or bush**ewe** a female sheep**your** belonging to *you* (see ¶1056e)**you're** contraction of *you are*

Troublesome Words

720

The following list presents a selection of words that business writers often misspell or stop and puzzle over. In some cases the difficulty results from the inability to apply an established rule; for such words, references to the rules are given. In many other instances, however, errors result from the peculiar spelling of the words themselves; in such cases the only remedy is to master the correct spelling of such words on an individual basis.

► For troublesome words that sound alike or look alike, see ¶719 and Section 11; for troublesome compound words, see Section 8.

abscess	already (see page 362)	basically
absence	amateur	beautician
accessory	amortize (see ¶715a)	believe
accidentally (see page 359)	analogous	bellwether
accommodate	analysis	beneficiary
accompanying	analyze (see ¶715c)	benefited (see ¶704)
accumulate	anomalous	benign
acknowledgment (see ¶708)	answer	Berkeley (California)
acquaintance	antecedent	biased (see ¶705)
acquiesce	appall	bicycle
acquire	apparatus	biscuit
acquisition	apparent	bizarre
across	archaeology OR: archeology	boundary
adjacent	architect	breakfast
advantageous (see ¶707c)	arctic	broccoli
adviser BUT: advisory	argument (see ¶708)	brochure
aegis	assistance (see ¶714)	buoyant
aesthetics OR: esthetics	asthma	bureau
affidavit	attendance	business
aggressive	attorney	busy
aging (see ¶707c, note)	Audubon	calendar
Albuquerque	autumn	caliber
algorithm	auxiliary	calorie
alignment	bachelor	campaign
all right (see page 361)	bankruptcy	canceled (see ¶704)
alleged	bargain	cancellation (see ¶704)

candor	develop	fluorescent
Caribbean	dictionary	forbade
carriage	dietitian	foreign (see ¶712)
catalog	dilemma	foresee
category	disappear	forfeit
ceiling	disappoint	forty
cemetery	disastrous	fourteen
census	dissatisfied	fourth
chaise longue (see ¶612a)	dissimilar	freight
changeable (see ¶707c)	doctrinaire	fulfill
chaplain	dossier	gaiety
chronological	double	gauge
Cincinnati	duffel bag	glamorous
circuit	dysfunctional	glamour
coincidence	ecstasy	goodwill
collateral	eighth	government
colonel	either	grammar
colossal	eliminate	grateful
column	embarrass	gray
commitment	emphasize	grievous
committee	empty	gruesome (see ¶708)
comparison	entrepreneur	guarantee
condemn	enumerate	guardian
Connecticut	environment	guerrilla
connoisseur	erroneous	guesstimate
conscience	escrow	handkerchief
conscientious	exaggerate	harass
conscious	exceed (see ¶716b)	harebrained
consensus	excellent	harken
corduroy	exercise	hearten
correspondent	exhaustible	height (see ¶712)
courtesy	exhibition	hemorrhage
debt	exhilarate	heterogeneous
debtor	exonerate	hindrance
deductible	exorbitant	homogeneous
de-emphasize (see ¶835a)	extension	hors d'oeuvre
defendant (see ¶714)	extraordinary	humorous
defense	eyeing	hygiene
deficit	facsimile	hypocrisy
definite	familiar	idiosyncrasy
dependent (see ¶714)	fantasy	impasse
Des Moines	fascinating	impostor
descendant (see ¶714)	fatigue	inasmuch as
describe	February	incidentally
desperately	fiery	independent (see ¶714)
detrimental	financier	indict

souvenir	their (see ¶712)	weird (see ¶712)
specimen	theory	whether
sponsor	thoroughly	whiskey
straitjacket	threshold	wholly
stratagem	through	withhold
strength	tomato, tomatoes	woeful
subpoena	totaled (see ¶704)	woolly (see ¶705)
subtlety	tragedy	yield (see ¶712)
subtly	traveler (see ¶704)	

SECTION 8

Compound Words

Compound Nouns (¶¶801–810)

Compound Verbs (¶¶811–812)

Compound Adjectives (¶¶813–832)

Basic Rules (¶¶813–815)

Adjective + **Noun** (as in **short-term note**: ¶816)

Compound With **Number** or **Letter** (as in **40-hour week**: ¶817)

Compound Noun (as in **high school graduate**: ¶818)

Proper Name (as in **Madison Avenue** agencies: ¶819)

Noun + **Adjective** (as in **tax-free imports**: ¶820)

Noun + **Participle** (as in **time-consuming details**: ¶821)

Adjective + **Participle** (as in **nice-looking layout**: ¶822)

Adjective + **Noun + ED** (as in **quick-witted assistant**: ¶823)

Adverb + **Participle** (as in **privately owned stock**

and as in well-known facts: ¶824)

Adverb + **Adjective** (as in **very exciting test results**: ¶825)

Participle + **Adverb** (as in **warmed-over ideas**: ¶826)

Adjective + **Adjective** (as in **annual financial statement**: ¶827)

Verb + **Verb** (as in **stop-and-go traffic**: ¶828)

Verb + **Adverb** (as in **read-only memory**: ¶829)

Verb + **Noun** (as in **take-home pay**: ¶830)

Phrasal Compound (as in **up-to-date accounts**: ¶831)

Suspending Hyphen (¶832)

Prefixes and Suffixes (¶¶833–846)

Compound Computer Terms (¶847)

Sometimes One Word, Sometimes Two Words (¶848)

► For definitions of grammatical terms, see the appropriate entries in the Glossary of Grammatical Terms (Appendix A).

Some compound words are written as solid words, some are written as separate words, and some are hyphenated. As in other areas of style, authorities do not agree on the rules. Moreover, style is continually changing: many words that used to be hyphenated are now written solid or as separate words. While the only complete guide is an up-to-date dictionary, a careful reading of the following rules will save you many a trip to the dictionary.

NOTE: This section includes words and phrases that you may not find in a dictionary. The spellings in this section generally agree with those in the 2009 printing of *Merriam-Webster's Collegiate Dictionary*, Eleventh Edition, unless otherwise indicated.

Compound Nouns

- 801 a.** Compound nouns follow no regular pattern. Some are written solid, some are spaced, and some are hyphenated.

airfreight	air conditioner	air-conditioning (see ¶¶801b, 812a)
airmail	voice mail	e-mail (see ¶847)
checklist	check mark	check-in
closeout	close shave	close-up
crossroad	cross section	cross-reference
daytime	day care	day-tripper
doubleheader	double take	double-dipper
eyewitness	eye shadow	eye-opener
goodwill	good faith	good-for-nothing
halftime	half hour	half-truth
hardball	hard drive	hard-liner
highbrow	high five	a high-rise
jobholder	job action	job-hopper
lifestyle	life span	life-form
lightbulb	light meter	light-year
moneylender	money market	money-grubber
nightclub	night owl	night-light
placeholder	place mat	place-name
pocketbook	pocket money	pocket-handkerchief
showbiz	show business	show-off
sickroom	sick pay	sick-out
stockbroker	stock dividend	stock-in-trade
timetable	time deposit	time-saver
trademark	trade name	trade-off
bondholder	bond paper	masterpiece
bookstore	book review	master plan
bylaw	by-product	paperwork
cashbook	cash flow	payroll
database	data processing	salespeople
earbud	ear candy	schoolteacher
handbook	hand truck	standby
homeowner	home port	voiceprint
landline	land mine	wageworker
		workstation

1801

- b.** To be sure of the spelling of a compound noun, check an up-to-date dictionary. Since dictionaries pride themselves on being *descriptive* (simply showing how individual words are most commonly spelled) rather than *prescriptive* (imposing consistent spelling patterns on similar words), you will sometimes encounter troubling inconsistencies like these:

air conditioner (spaced)	layoff (solid)	copywriter (solid)
air-conditioning (hyphenated)	payoff (solid)	copyholder (solid)
makeup (solid)	play-off (hyphenated)	copyedit (solid)
shake-up (hyphenated)	skydiving (solid)	copy editor (spaced)

skin diving (spaced)

When such inconsistencies appear within the same context and are likely to distract the reader, you may treat the troubling words the same way:

- Choose the spaced form over the hyphenated form.

air conditioner air conditioning

- Choose the solid form over the hyphenated form.

makeup shakeup layoff payoff playoff

- Choose the solid form over the spaced form.

skydiving skindiving copywriter copyholder copyedit copyeditor

CAUTION: Do not convert a spaced or hyphenated compound noun to the solid form if the resulting word will be hard to grasp. For example, *co-op*—the short form of *cooperative*—is still written with a hyphen to avoid confusion with the word *coop* (even though the hyphen has now been dropped from *cooperative*). In short, do not pursue the goal of stylistic consistency if the result will confuse your reader.

Also keep in mind that adjusting dictionary spellings to avoid inconsistencies requires careful and experienced judgment. If you are not confident about your ability to make such judgments, follow the dictionary. Moreover, if you are working for an organization that strives for a consistent style in all of its written material, do not make any adjustments in spelling that could put you in conflict with the style of your organization.

- c.** When you cannot find a compound noun in the dictionary, the traditional guideline is to treat the noun in question as two words. As an alternative, you may treat the noun the same way that similar compounds appear in the dictionary.

We now go *house hunting*?/*house-hunting*?/*househunting*? every weekend.

If you consult *Merriam-Webster* for similar words, you will find two patterns:

SOLID: housebreaking, housecleaning, housekeeping, housewarming

HYPHENATED: house-raising, house-sitting

According to the guidelines in *b* above, choose the solid form over the hyphenated form. On that basis you could safely write *househunting* as a solid word. Moreover, for the sake of consistency, you could also write *houseraising* and *housesitting* as solid words.

NOTE: The cautionary note in *b* above applies here as well. If you are not confident about the best way to treat compounds not in the dictionary, follow the traditional rule and treat the elements of the compound as separate words.

- d.** Even an online dictionary cannot keep up with all of the ongoing changes in the spelling of compound words. Certain terms that appear in the dictionary as *hyphenated* or *spaced* may show up in current publications as *solid*. Indeed, a study of actual usage will often show two or even three forms of a term in use. This situation is especially acute in compound computer terms (see ¶847), where the original form—for example, *E-mail*—is now primarily spelled as *e-mail* but is increasingly appearing as *email* (see page 284 and ¶847g).

When you notice that a certain term is appearing in different ways in actual usage, how do you decide which version to select? For example, is it *health care* or *healthcare*? A search on the Internet will show the two-word form in organizational names such as the American Health Care Association and the Bureau of Primary Health Care; the solid form is used by the Agency for Healthcare Research and Quality and a publication titled *Modern Healthcare*. Most postings, however, use the two-word form, so you can clearly see which spelling is currently preferred. Moreover, when you consider that related terms appear as two words (for example, *child care*, *day care*, and *managed care*), you will find further support for the notion that *health care* is the form to use for nouns.

NOTE: To make your own Internet search to determine which spelling predominates in current usage, go to <<http://news.google.com>>. You will be offered two options: “Search News” (which involves a search of “4,500 news sources continuously updated”) or “Search the Web” (which involves a search of the entire Internet). As a rule, you will get better results if you choose “Search News,” because the material in news sources undergoes some professional editing.

- e.** Here are a few more terms that continue to appear in different ways. Is it *Inbox*/*Outbox*, *in-box/out-box*, or *inbox/outbox*? Microsoft Word favors *Inbox* and *Outbox*, and *Merriam-Webster* recommends *in-box* and *out-box*, but a Google search of news sources indicates that *inbox* and *outbox* are the most common forms currently in use. As another example, *Merriam-Webster* favors *good-bye*, but a Google search indicates that *goodbye* is now the more common form in use.

802

Some solid and hyphenated compound nouns closely resemble verb phrases. Be sure, however, to treat the elements in a verb phrase as separate words.

Nouns

- a *breakdown* in communications
- a thorough *follow-up* of the report
- operate a *drive-in*
- a high school *dropout*
- at the time of *takeoff*

Verb Phrases

- when communications *break down*
- to *follow up* on your recommendation
- drive in* to your dealer's
- don't *drop out* of high school
- planes cannot *take off* or land

1803**Nouns**

when they give us a *go-ahead*
 come to a *standstill*
 let's have a *run-through*
 plan a *get-together*
 they have the *know-how*
 expect a *turnaround* in sales
 we have to make a *getaway*
 to attempt a *takeover* of their firm
 I was a *standby* on Flight 968A
 Paul's speech was merely a *put-on*
 protect data with regular *backups*
 after you complete the *logon**
 devise another plan as a *fallback*
 need to reduce staff *turnover*
 schedule a *cleanup* for Friday
 plan a *crackdown* on these violators

Verb Phrases

we can *go ahead* with the plan
 we can't *stand still*
 let's *run through* the presentation
 plan to *get together*
 they *know how* to handle it
 once our sales *turn around*
 we have to *get away*
 to attempt to *take over* their firm
 we can't *stand by* and do nothing
 your requisition was *put on hold*
 always *back up* the data in the file
 after you *log on* to the program
 we can always *fall back* on Plan B
 need to *turn over* a new leaf
 we need to *clean up* this mess
 let's *crack down* on these violators

803 a. Up Words. Compound nouns ending in *up* are solid or hyphenated. For example:

backup	lookup	call-up	mock-up
blowup	makeup	catch-up	pop-up
breakup	markup	close-up	push-up
brushup	matchup	cover-up	runner-up
buildup	pasteup	crack-up	send-up
checkup	pickup	flare-up	shake-up
cleanup	pileup	follow-up	sign-up
cutup	roundup	foul-up	start-up
dustup	setup	frame-up	summing-up
getup	slipup	grown-ups	tie-up
holdup	smashup	hang-up	toss-up
hookup	speedup	higher-ups	touch-up
letup	warmup*	jam-up	tune-up
lineup	windup	lead-up	wrap-up
linkup	workup	mix-up	write-up

b. Down Words. Most compound nouns ending in *down* are solid. For example:

breakdown	lowdown	shakedown	BUT: dressing-down
closedown	markdown	showdown	put-down
comedown	meltdown	shutdown	sit-down
countdown	phasedown	slowdown	step-down
crackdown	rubdown	sundown	thumbs-down
letdown	rundown	turndown	write-down

*Merriam-Webster hyphenates this word.

c. In Words. Compound nouns ending in *in* are typically hyphenated. For example:

break-in	fade-in	shoo-in	trade-in
cave-in	fill-in	shut-in	turn-in
check-in	lead-in	sit-in	walk-in
drive-in	plug-in	stand-in	weigh-in
drop-in	run-in	tie-in	write-in

d. Out Words. Compound nouns ending in *out* are typically solid. For example:

bailout	foldout	readout	BUT: cop-out
blackout	handout	rollout	diner-out
blowout	hangout	sellout	fade-out
breakout	hideout	shakeout	falling-out
burnout	holdout	shutout	lights-out
buyout	layout	standout	pig-out
carryout	lockout	tryout	psych-out
checkout	lookout	turnout	shoot-out
closeout	payout	walkout	sick-out
dropout	phaseout	washout	speak-out
fallout	printout	workout	time-out

e. On Words. Compound nouns ending in *on* are typically hyphenated. For example:

add-on	come-on	hangers-on	slip-on
carry-on	follow-on	lookers-on	turn-on
carryings-on	goings-on	run-on	BUT: logon* (see ¶847b)

f. Off Words. Compound nouns ending in *off* are either solid or hyphenated. For example:

blastoff	leadoff	brush-off	sell-off
castoff	liftoff	drop-off	send-off
checkoff	logoff (see ¶847b)	face-off	show-off
cutoff	payoff	goof-off	sign-off
falloff	shutoff	play-off	spin-off
kickoff	standoff	rake-off	tip-off
knockoff	takeoff	rip-off	trade-off
layoff	turnoff	rub-off	write-off

g. Over Words. Compound nouns ending in *over* are typically solid. For example:

carryover	leftover	runover	turnover
changeover	makeover	slipover	walkover
crossover	popover	spillover	BUT: comb-over
hangover	pullover	stopover	going-over
holdover	pushover	switchover	once-over
layover	rollover	takeover	voice-over

*Merriam-Webster hyphenates this word.

Continued on page 254

1804

h. Back Words. Compound nouns ending in *back* are typically solid. For example:

buyback	fallback	kickback	pullback
callback	feedback	leaseback	rollback
comeback	flashback	payback	setback
cutback	giveback	piggyback	snapback
drawback	hatchback	playback	throwback

i. Away Words. These compounds are typically solid. For example:

breakaway	giveaway	runaway	straightaway
getaway	hideaway	stowaway	throwaway

j. Compounds Ending in *About*, *Around*, and *By*. These compounds are typically solid. For example:

knockabout	runabout	runaround	flyby
layabout	turnabout	turnaround	passersby
roundabout	whereabouts	wraparound	standbys

k. Compounds Ending in *Between*, *Through*, and *Together*. These compounds are typically hyphenated. For example:

go-between	follow-through	walk-through	get-together
in-between	run-through	BUT: breakthrough	

804 a. Hyphenate a compound noun that lacks a noun as one of its elements.

the also-rans	two-by-fours	a sing-along
a big to-do	the old one-two	a set-to
a cure-all	know-it-alls	me-tooism
a go-ahead	hand-me-downs	a talking-to
a go-getter	the well-to-do	set-asides
get-up-and-go	rough-and-tumble	a must-see
goings-on	a shoot-'em-up	give-and-take
from the get-go	do-it-yourselfers	half-and-half
pick-me-up	my one-and-only	all this back-and-forth
a has-been	a ne'er-do-well	on the up-and-up
the have-nots	a merry-go-round	show-and-tell
know-how	a free-for-all	the old so-and-so
a look-alike	the be-all and end-all	BUT: ups and downs
make-believe	the same-old same-old	wear and tear
say-so	no get-up-and-go	wannabes

b. Words that are coined from repeated syllables or rhyming syllables are typically hyphenated.

boo-boo	wheeler-dealer	BUT: bling bling*
goody-goody	culture-vulture	voodoo
no-no	hurly-burly	hodgepodge
hocus-pocus	nitty-gritty	fender bender
razzle-dazzle	walkie-talkie	mumbo jumbo

*Merriam-Webster hyphenates this word.

fuddy-duddy
namby-pamby

hanky-panky
hurry-scurry

okey-dokey*
goo-goos

The steady *drip-drip-drip* of negative reports from the field is driving me crazy.

The CEO had to field the rapid *rat-a-tat-tat* of stockholders' questions.

I'd say that our sales for the first four months of the year are *hunk-y-dory*. By the end of the year they could even be *hotsy-totsy*.

► For examples of similar words used as compound adjectives, see ¶831e.

Other coined words may be hyphenated or solid.

a fixer-upper
a no-brainer
one-upmanship
stick-to-itiveness
pitter-patter
a flip-flop
a fine how-de-do
one-liners

a thank-you
a thank-you-ma'am
a tree-hugger†
a straight-shooter†
a rainmaker
comeuppance
whodunit
flimflam

twofers
a gofer
riprap
jimjams
a mishmash
a chitchat
BUT: a slam dunk
a high five

c. Many compound nouns that end with a prepositional phrase are hyphenated.

ambassador-at-large
brother-in-law
grants-in-aid
hole-in-the-wall
jack-of-all-trades
Johnny-on-the-spot

man-about-town
right-of-way
stay-at-home
stick-in-the-mud
stock-in-trade
theater-in-the-round

BUT: attorney at law*
chief of staff
editor in chief
line of credit
power of attorney
standard of living

805 a. As a general rule, treat a compound noun like *problem solving* as two words unless your dictionary specifically shows it as solid or hyphenated. Many words of this pattern are not shown in a dictionary.

bean counting
decision making
instant messaging
number crunching
problem solving
profit sharing
skill building
skin diving
BUT: skydiving
speed dating

brainstorming
downloading
downsizing
housewarming
letterspacing
logrolling
safekeeping
tailgating
trailblazing
troubleshooting

consciousness-raising
fund-raising
house-sitting
name-dropping
price-cutting
soul-searching
speed-reading
time-sharing
whistle-blowing
witch-hunting

b. As an alternative to the approach described in a above, when you cannot find a word of this type in the dictionary, treat it like a similar compound that does appear

Continued on page 256

*Merriam-Webster gives okeydokey.

†Merriam-Webster does not hyphenate this term.

*Merriam-Webster hyphenates this term, but many attorneys no longer do.

¶806

in the dictionary. For example, if you know that *price-cutting* appears in *Merriam-Webster* (and in the list above) as a hyphenated word, then you may hyphenate *cost-cutting* (which does not appear in *Merriam-Webster*) for the sake of stylistic consistency. By the same token, when the dictionary treats similar compounds differently—for example, *skin diving* and *skydiving* or *housewarming* and *housesitting* (as shown in the list above)—you may treat them the same way for stylistic consistency. See ¶801b–d for guidance on how to deal with these situations. Also see ¶812 for guidance on how to treat compound nouns derived from infinitives.

- 806** Hyphenate two nouns when they signify that one person or one thing has two functions.

actor-director	director-producer	secretary-treasurer
dinner-dance	owner-manager	chef-owner
photocopier-printer	doctor-lawyer	editor-publisher

NOTE: A number of similar expressions typically make use of a slash rather than a hyphen. (See ¶295b.)

- 807** Compound nouns with a single letter as their first element are usually hyphenated.

A-list	I beam	V-chip
B-school	I-280	X-ray
C-section	BUT: iMac, iPod	x-axis
D-day	O-ring	y-coordinate
f-stop	T-shirt	
G suit	BUT: T square	
H-bomb	U-turn	

- 808** a. Do not hyphenate civil and military titles of two or more words.

Chief of Police Potenza	Attorney General Liebowitz
General Manager Werner	Rear Admiral Byrd
Vice President Vega	Lieutenant Colonel Payne

EXCEPTION: Secretary-General of the United Nations

- b. Hyphenate compound titles containing *ex* and *elect*.

ex-President Bush	Vice President-elect Biden
-------------------	----------------------------

NOTE: Also use a hyphen when *ex* is attached to a noun (*ex-wife*, *ex-convict*), but omit the hyphen in Latin phrases (*ex officio*, *ex cathedra*).

► For the capitalization of titles with *ex* and *elect*, see ¶¶317, 363a; for the correct usage of *ex*, see the entry for *Ex-former* on page 378.

- c. The hyphen is still customary in *vice-chancellor* and *vice-consul*, but it has disappeared from *vice president* and *vice admiral* (for example, *Vice President Warren*).

- 809** a. Compound nouns containing *man* or *men* as an element were traditionally used generically to refer to males and females alike. For example:

not for the average <i>layman</i>	the history of <i>mankind</i>
of concern to all <i>businessmen</i>	reduce the number of <i>man-hours</i>
write your <i>congressman</i>	a new source of <i>manpower</i>

The *generic* use of such terms is now considered unacceptable, because the masculine bias of these terms makes them unsuitable for reference to women. The following list suggests appropriate alternatives.

In Place of the Generic Term	Use
layman	layperson
businessmen	business owners, business executives, business managers, businesspeople
congressmen	members of Congress, representatives
mankind	people, humanity, the human race, human beings
man-hours	worker-hours
manpower	workforce, human resources, staff, personnel, labor
salesmen	salespeople, sales representatives, salespersons, salesclerks, sales staff, sales force, sales associates
foreman	supervisor, presiding juror
policemen	police officers, the police
fireman	firefighter
mailmen	mail carriers, letter carriers
workmen	workers
spokesmen	press office
councilmen	council members
a six-man team	a six-member team, a six-person team

► For alternatives to words ending with feminine suffixes, see ¶840.

- b. *Workmen's compensation insurance* (or *workmen's comp*) is now referred to as *workers' compensation insurance* (or *workers' comp*).
- c. Anyone who does not like the term *freshmen* should consider *first-year students* as an alternative. (See also ¶354b.)
- d. Words like *chair*, *chairperson*, and *spokesperson* have been coined as a means of avoiding the generic use of masculine compound nouns. Personal taste or institutional policy will dictate whether to use these terms or not.
- e. Whenever possible, replace a word like *salesmanship* with an alternative expression (for example, *selling skills*). However, words such as *craftsmanship*, *workmanship*, *sportsmanship*, *brinkmanship*, *showmanship*, and *one-upmanship* are still widely used because of the difficulty in devising alternative expressions.
- f. When naming a job or role, avoid the use of compound terms ending in *man* or *woman* unless the term refers to a specific person whose gender is known.

There are ten candidates seeking election to the City *Council*. (NOT: . . . seeking election as city *councilmen*.)

BUT: *Councilwoman* Walters and *Councilman* Holtz will study the proposal.

OR: *Council members* Walters and Holtz will study the proposal.

Write to your *representative* in *Congress*. (NOT: Write to your *congressman*.)

BUT: I was very much impressed by *Congresswoman* Nancy Pelosi of California.

¶810

Who will be appointed as *head* of the committee? **OR:** Who will be appointed to *chair* the committee? (**NOT:** . . . appointed *chairman* of the committee?)
BUT: Robert Haas has been appointed *chairman* of the committee.

- g.** Terms like *doctor*, *lawyer*, and *nurse* are generic—that is, they apply equally to women and men. Therefore, do not use compound nouns like *woman lawyer* and *male nurse* unless there is a legitimate reason for making a distinction according to gender.

Next Wednesday there will be a seminar on the special problems facing *women lawyers* in the courtroom.

► *Capitalization of hyphenated compound nouns: see ¶363.*

Plurals of compound nouns: see ¶¶611–613.

Possessives of compound nouns: see ¶¶634–635.

810

- a.** A number of well-known organizations and products have a hyphenated element in their names, and some have an element that looks as if it should be hyphenated but in fact is not. If necessary, go to an organization's Web site to confirm how an organization's name should be spelled.

Baskin-Robbins
Mercedes-Benz
Miracle-Gro

Harley-Davidson
Hewlett-Packard
Wal-Mart

BUT: Etch A Sketch
Dollar Rent A Car
Kmart

- b.** Do not overlook the use of hyphens in titles of books and journals.

Moby-Dick

Journal of Cross-Cultural Gerontology

Compound Verbs

811

- a.** Compound verbs are usually hyphenated or solid.

to air-condition	to pooh-pooh	to backstop	to highlight
to cherry-pick	to right-click	to blackball	to homeschool
to color-code	to rubber-stamp	to bulldoze	to mastermind
to custom-tailor	to second-guess	to buttonhole	to moonlight
to deep-six	to shilly-shally	to dillydally	to pigeonhole
to double-down	to shrink-wrap	to downgrade	to pinpoint
to double-space	to soft-pedal	to download	to sandbag
to dry-clean	to spot-check	to downsize	to shortchange
to field-test	to strong-arm	to freeload	to sidetrack
to fine-tune	to swift-boat	to ghostwrite	to troubleshoot
to jump-start	to test-drive	to hamstring	to waterproof
to nickel-and-dime	to window-shop	to handpick	to whitewash

NOTE: If you try to check the spelling of a compound verb in a dictionary and do not find the verb listed, hyphenate the components.

- b.** Do not hyphenate verb phrases such as *make up*, *slow down*, *tie in*. (See ¶802 for other examples.)

- 812** a. If the infinitive form of a compound verb has a hyphen, retain the hyphen in other forms of the verb. (See the note below for several exceptions.)

Would you like to *air-condition* your entire house?

The theater was not *air-conditioned*.

We need an *air-conditioning* expert to advise us.

You need to *double-space* all these reports.

Please *double-space* this letter.

This material should not be *double-spaced*.

BUT: Leave a *double space* between paragraphs. (No hyphen in *double space* as a compound noun.)

NOTE: The gerund derived from a hyphenated compound verb requires no hyphen unless it is followed by an object.

*Air conditioning** is no longer as expensive as it used to be.

BUT: In *air-conditioning* an office, you must take more than space into account.

Double spacing would make this table easier to read.

BUT: *Double-spacing* this table would make it easier to read.

Spot checking is all we have time for.

BUT: In *spot-checking* the data, I found some disturbing errors.

Dry cleaning is the best way to treat this garment.

BUT: *Dry-cleaning* this sweater will not remove the spot.

- b. If the infinitive form of a compound verb is solid, treat other forms of the verb solid as well.

to copyedit a manuscript finish the copyediting by Friday

to handpick a candidate handpicking the ripest tomatoes

to proofread the galleys proofreading the catalog copy

- c. The compound verb *to nickel-and-dime* and others that fit this pattern have alternative forms for the past tense and the present participle:

nickeled-and-dimed OR: *nickel-and-dimed*

nickeling-and-diming OR: *nickel-and-diming*

In such cases, choose the form that is shorter and easier to pronounce.

The bean counters in Corporate Finance have been *nickel-and-diming* us since the beginning of the year.

Compound Adjectives

No aspect of style causes greater difficulty than compound adjectives. When a compound adjective is shown hyphenated in the dictionary, you can assume only that the expression is hyphenated when it occurs directly *before* a noun. When the same combination of words falls elsewhere in the sentence, the use or omission of hyphens depends on how the words are used.

- For a clear perspective on the rules for compound adjectives, see the essay in the frontmatter on pages xxxii–xxxvi.

Continued on page 260

*Merriam-Webster treats this as a hyphenated word, even though it treats *air conditioner* as two words.

¶813

The basic rules for the treatment of compound adjectives are presented in ¶¶813–815. For detailed comments, see the following paragraphs:

- ➡ *Adjective + noun (as in short-term note): see ¶816.*
- Compound with number or letter (as in 40-hour week): see ¶817.*
- Compound noun (as in high school graduate): see ¶818.*
- Proper name (as in Madison Avenue agencies): see ¶819.*
- Noun + adjective (as in tax-free imports): see ¶820.*
- Noun + participle (as in time-consuming details): see ¶821.*
- Adjective + participle (as in nice-looking layout): see ¶822.*
- Adjective + noun + ed (as in quick-witted assistant): see ¶823.*
- Adverb + participle (as in privately owned stock): see ¶824a.*
- Adverb + participle (as in well-known facts): see ¶824b.*
- Adverb + adjective (as in very exciting test results): see ¶825.*
- Participle + adverb (as in warmed-over ideas): see ¶826.*
- Adjective + adjective (as in annual financial statement): see ¶827.*
- Verb + verb (as in stop-and-go traffic): see ¶828.*
- Verb + adverb (as in read-only memory): see ¶829.*
- Verb + noun (as in take-home pay): see ¶830.*
- Phrasal compound (as in up-to-date accounts): see ¶831.*
- Suspending hyphen: see ¶832.*

NOTE: If you try to check the spelling of a compound adjective in a dictionary and do not find it listed, match up the components with one of the patterns shown on the previous page and follow the standard style for that pattern.

Basic Rules

813 A compound adjective consists of two or more words that function as a unit and express a single thought. These one-thought modifiers are derived from (and take the place of) adjective phrases and clauses. In the following examples the left column shows the original phrase or clause; the right column shows the compound adjective.

Adjective Phrase or Clause

- terminals installed at the point of sale*
- a career moving along a fast track*
- a guarantee to give you your money back*
- a woman who speaks softly*
- an actor who is well known*
- a conference held at a high level*
- a building ten stories high*
- a report that is up to date*
- a fabric treated to repel water*
- an article that is as long as a book*
- an environment where people work under high pressure*

Compound Adjective

- point-of-sale terminals*
- a fast-track career*
- a money-back guarantee*
- a soft-spoken woman*
- a well-known actor*
- a high-level conference*
- a ten-story building*
- an up-to-date report*
- a water-repellent fabric*
- a book-length article*
- a high-pressure environment*

Adjective Phrase or Clause

a PC *that delivers a high level of performance, carries a low cost, and is easy to use*

a stock split *that gives holders two shares for each one that they now own*

Compound Adjective

a *high-performance, low-cost, easy-to-use* PC

a *two-for-one* stock split

NOTE: In the process of becoming compound adjectives, the adjective phrases and clauses are usually reduced to a few essential words. In addition, these words frequently undergo a change in form (for example, *ten stories high* becomes *ten-story*); sometimes they are put in inverted order (for example, *who speaks softly* becomes *soft-spoken*); sometimes they are simply extracted from the phrase or clause without any change in form (for example, *well-known, high-level*).

814 Hyphenate the elements of a compound adjective that occurs *before* a noun. (**REASON:** The words that make up the compound adjective are not in their normal order or a normal form and require hyphens to hold them together.)

high-tech equipment (equipment *that reflects a high level of technology*)

a worst-case scenario (a scenario *based on the worst case that could occur*)

an old-fashioned dress (a dress *of an old fashion*)

a \$30,000-a-year salary (a salary *of \$30,000 a year*)

long-range plans (plans *projected over a long range of time*)

machine-readable copy (copy *readable by a machine*)

an eye-catching display (a display *that catches the eye*)

a high-ranking official (an official *who ranks high in the organization*)

same-day service (service *completed the same day you bring the item in*)

a black-tie affair (an affair *at which men must wear formal clothes with a black tie*)

the rubber-chicken circuit (a circuit or series of banquets *at which speeches are given and rubbery chicken or some equally bad food is served*)

revolving-door management (a management *with such rapid turnover that managers seem to be arriving and departing through a continuously revolving door*)

bottom-line results (the results that are *shown on the bottom line of a financial statement*)

open-collar workers (workers who dress casually, with *open collars*; in other words, those who work at home, telecommuters)

gut-check time (time to find out how you feel about something by *checking your gut reaction*)

EXCEPTIONS: A number of compounds like *real estate* and *high school* do not need hyphens when used as adjectives before a noun, because they are well-established compound nouns and easily grasped as a unit. (See ¶818a.)

815 a. When these expressions occur *elsewhere in the sentence*, drop the hyphen if the individual words occur in a normal order and in a normal form. (In such cases the expression no longer functions as a compound adjective.)

¶816**Before the Noun**

a high-level decision

an up-to-date report

a follow-up letter

a never-to-be-forgotten book

an off-the-record comment

a no-nonsense attitude

a low-key sales approach

a cause-and-effect relationship

a four-color cover

Elsewhere in Sentence

The decision must be made at a *high level*.
(Object of preposition.)

Please bring the report *up to date*.
(Prepositional phrase.)

Let's *follow up* at once with a letter.
(Verb + adverb.)

Your latest book is *never to be forgotten*.
(Adverb + infinitive phrase.)

The next comment is *off the record*.
(Prepositional phrase.)

Marion will tolerate *no nonsense* from you.
(Object of verb.)

Christopher pitches his sales approach in a *low key*.
(Object of preposition.)

Is there a relationship of *cause and effect* in this case?
(Object of preposition.)

Is this cover printed in *four colors*?
(Object of preposition.)

- b. When these expressions occur elsewhere in the sentence *but are in an inverted word order or an altered form*, retain the hyphen.

Before the Noun

a tax-exempt purchase

government-owned lands

a friendly-looking watchdog

high-priced goods

Elsewhere in Sentence

The purchase was *tax-exempt*.

BUT: The purchase was *exempt from taxes*.

These lands are *government-owned*.

BUT: These lands are *owned by the government*.

That watchdog is *friendly-looking*.

BUT: That watchdog *looks friendly*.

These goods are *high-priced*.

BUT: These goods carry a *high price*.

NOTE: The following kinds of compound adjectives almost always need to be hyphenated:

► *Noun + adjective* (for example, *tax-exempt*): see ¶820.

Noun + participle (for example, *government-owned*): see ¶821.

Adjective + participle (for example, *friendly-looking*): see ¶822.

Adjective + noun + ed (for example, *high-priced*): see ¶823.

Adjective + Noun (see also ¶¶817–819)**816**

- a. Hyphenate an adjective and a noun when these elements serve as a compound modifier *before* a noun. Do not hyphenate these elements when they play a normal role *elsewhere in the sentence* (for example, as the object of a preposition or of a verb). However, if the expression continues to function as a compound adjective, retain the hyphen.

Before the Noun

- high-speed* printers
 a *plain-paper* fax

red-carpet treatment
 a *closed-door* discussion

 an *all-day* seminar
next-generation PCs

 a *bad-hair* day

 a *long-term* investment
 in bonds

 a *part-time* job

Elsewhere in Sentence

- These printers run at *high speed*. (Object of preposition.)
 Please be sure to order a fax that uses *plain paper*.
 (Object of verb.)
 They plan to roll out the *red carpet*. (Object of infinitive.)
 The discussion was held behind *closed doors*. (Object of preposition.)
 The seminar will last *all day*. (Normal adverbial phrase.)
 I'm waiting for the *next generation* of PCs. (Object of preposition.)
 Jo is having one of those days *when her hair looks bad*.
 (Dependent clause.)
 This investment in bonds runs for a *long term*.
 (Object of preposition.)
BUT: This investment in bonds is *long-term*. (Compound adjective.)
 This job is *part-time*. (Compound adjective.)
 I work *part-time*. (Compound adverb.)
 I travel *part of the time*. (Normal adverbial phrase.)

NOTE: Combinations involving comparative or superlative adjectives plus nouns follow the same pattern.

Before the Noun

- a *larger-size* shirt
 the *finest-quality* goods

Elsewhere in Sentence

- He wears a *larger size*. (Object of verb.)
 These goods are of the *finest quality*. (Object of preposition.)

- b.** A few compound adjectives in this category are now written solid—for example, a *commonsense* solution, a *freshwater* pond, a *surefire* success.

Compound With Number or Letter

- 817** **a.** When a number and a noun form a one-thought modifier *before* a noun (as in *six-story building*), make the noun singular and hyphenate the expression. When the expression has a normal form and a normal function *elsewhere in the sentence*, do not hyphenate it.

Before the Noun

- a *one-way* street
 a *page-one* story
 a *first-person* account
 a *first-rate* job

first-quarter profits
 a *two-piece* suit
 a *two-wage-earner* family
 the *second-highest* rating
 a *three-ring* circus

Elsewhere in Sentence

- a street that runs only *one way*
 a story appearing on *page one*
 a story written in the *first person*
 a job that deserves the *first* (or highest) *rating*
BUT: a job that is *first-rate*
 profits for the *first quarter* (see ¶1069b)
 a suit consisting of *two pieces*
 a family with *two wage earners*
BUT: was rated the *second-highest* in the state
 a circus with *three rings*

¶817

**Before the Noun**

a *four-point* program
 a *5-liter* container
 a *fifth-grade* student (see ¶354c)
 an *8-foot* ceiling
 a *20-year* mortgage
 a *twenty-five-year* period
 the *Twenty-Five-Year Club*
 the *under-30* market segment
twenty-first-century art (see ¶424, note)
 a *50-cent* fee
 an *\$85-a-month* charge
 a *100-meter* sprint
 an *8½- by 11-inch* book (see ¶832)
 a *55-mile-an-hour* speed limit
 a *2-million-ton* shipment
 the *800-pound* gorilla in the room
 a *10-inch-thick* panel
 a *12,000-square-foot* building
 (see ¶813, note)
 a *7-foot-2-inch* basketball player
 a *6-foot-9* teenager
 a *3-hour-10-minute* procedure
 a *2-year-4-month-old* child
 a *nineteen-year-old* sophomore
24-hour-a-day service
600-dpi graphics
 a *25 percent-a-year* increase
 a *\$50 billion* investment
 a *2½-day* program
second-degree murder
BUT: *secondhand* smoke
 a *onetime* offer
 a *3 o'clock* meeting
 the *late-'90s* bull market

Elsewhere in Sentence

a program containing *four points*
 a container that holds *5 liters*
 a student in the *fifth grade*
 a ceiling *8 feet* above the floor
 a mortgage running for *20 years*
 a period of *twenty-five years*
 for employees with *25 years* of service
 focus on those *under 30*
 art of the *twenty-first century*
 a fee of *50 cents*
 a charge of *\$85 a month*
 a sprint of *100 meters*
 a book *8½ by 11 inches*
 a speed limit of *55 miles an hour*
 a shipment of *2 million tons*
 weighs over *800 pounds*
 a panel *10 inches thick*
 an area of *12,000 square feet*
 a basketball player *7 feet 2 inches* tall (see ¶430)
 standing *6-foot-9* in his stocking feet
 a procedure lasting *3 hours 10 minutes*
 a child *2 years 4 months old*
 a sophomore *nineteen years old*
 service *24 hours a day*
 graphics composed of *600 dpi* (dots per inch)
 an increase of *25 percent a year*
 a investment of *\$50 billion* (see ¶416a, note)
 a program lasting *2½ days*
 murder in the *second degree*
 bought a car *secondhand*
BUT: to be *two-timed* by a colleague
 a meeting at *3 o'clock*
 the bull market in the *late '90s*

► For the hyphenation of fractional expressions serving as compound adjectives (like *half-dozen* or *1/4-inch*), see ¶¶427a, 428a.

b. A hyphenated compound adjective and an unhyphenated possessive expression often provide *alternative* ways of expressing the same thought. Do not use both styles together.

a *one-year* delay
OR: a one year's delay
(BUT NOT: a one-year's delay)

a *two-week* cruise
OR: a two weeks' cruise
(BUT NOT: a two-weeks' cruise)

c. Hyphenate compound adjectives involving a number and *odd* or *plus*.

The embezzlement occurred some *twenty-odd* years ago.

I now give my age simply as *forty-plus*.

If the merger negotiations are successful, we could be looking at a \$25 *million-plus* deal.

However, treat compound adjectives involving a number and *fold* as solid words.

Our profits have increased *fourfold* in the past year.

BUT: Our profits have increased *12-fold* in the past year. (Insert a hyphen when the number is expressed as a figure.)

d. Compound adjectives involving two numbers (as in ratios and scores) are expressed as follows:

a <i>50-50</i> (OR: <i>fifty-fifty</i>) chance	an <i>18-7</i> victory	a <i>3-to-1</i> ratio OR: a <i>3:1</i> ratio
<i>20/20</i> (OR: <i>twenty-twenty</i>) vision	<i>a 1000-to-1</i> possibility	BUT: a ratio of <i>3 to 1</i>

► See also ¶¶450–451.

e. Other compound expressions involving a number or letter are expressed as follows:

our <i>number-one</i> * (OR: <i>No. 1</i>) goal	a <i>3-D</i> graphic	<i>Class A</i> materials
BUT: we will be <i>number one</i>	an <i>8-bit</i> machine	a grade of <i>A plus</i> (OR: <i>A+</i>)
in <i>A1</i> condition	a <i>4-H</i> project	BUT: does <i>A-plus</i> (OR: <i>A+</i>) work
BUT: <i>A.1.</i> steak sauce	a <i>G-8</i> member	a passing mark of <i>D minus</i> (OR: <i>D-</i>)
<i>Title IX</i> provisions	an <i>NC-17</i> rating	BUT: a <i>D-minus</i> (OR: <i>D-</i>) student

f. The use or omission of hyphens can sometimes lead to ambiguity.

20 *year-old* records (refers to a batch of 20 records all dating back one year)

20-*year-old* records (refers to an unspecified number of records all 20 years old)

Avoid the possibility of any confusion by rewriting. For example:

a batch of 20 records from last year

a batch of records 20 years old

Compound Noun

818 a. A number of adjective-noun combinations (such as *real estate* or *social security*) and noun-noun combinations (such as *life insurance* or *money market*) are well-established compound nouns serving as adjectives. Unlike *short-term*, *low-risk*, and the examples in ¶816a, these expressions refer to well-known concepts or institutions. Because they are easily grasped as a unit, they do not require a hyphen.

<i>accounts payable</i> records	<i>government bond</i> funds	<i>money market</i> funds
<i>branch office</i> reports	<i>high school</i> diploma	<i>nuclear energy</i> plant
<i>consumer protection</i> agency	<i>human resources</i> professionals	<i>public relations</i> adviser
<i>corporate earnings</i> reports	<i>income tax</i> return	<i>real estate</i> agent
<i>financial systems</i> specialist	<i>investor relations</i> brochures	<i>social security</i> tax
<i>financial services</i> industry	<i>life insurance</i> policy	<i>social networking</i> site
<i>free market</i> system	<i>mass production</i> techniques	<i>word processing</i> center

EXCEPTION: a *mail-order* business

Continued on page 266

*Merriam-Webster does not hyphenate *number-one* before a noun.

¶819

NOTE: When dictionaries do not provide guidance on a specific adjective-noun combination, consider whether the expression is more like a well-known compound such as *social security* or more like *short-term*. Then space the combination or hyphenate it accordingly.

- b.** When a noun-noun combination involves two words of relatively equal rank, hyphenate the combination.

<i>red state-blue state</i> campaigns	<i>the space-time</i> continuum	<i>an air-sea</i> search
<i>cost-benefit</i> analyses	<i>labor-management</i> relations	<i>a sand-gravel</i> mixture

EXCEPTION: the *price/earnings* ratio **OR:** the *P/E* ratio

NOTE: A number of other noun-noun combinations make use of a slash rather than a hyphen. (See ¶295b.)

- c.** As a general rule, when a compound noun is used as a compound adjective, the decision to hyphenate or not will depend on how familiar you think your reader is with the term in question. Thus a term like *small business owner* would not be hyphenated if you feel your reader is familiar with the concept of *small business*. However, if your reader could misinterpret *small business owner* as a reference to the size of the person rather than to the size of the business, write *small-business owner*.
- d.** A compound noun like *African American* is hyphenated when used as an adjective.* (See ¶348b.)

Proper Name

819

- a.** Do not hyphenate the elements in a proper name used as an adjective.

<i>a Supreme Court</i> decision	<i>a Rodeo Drive</i> location
<i>a Saks Fifth Avenue</i> store	<i>Mickey Mouse</i> procedures
<i>a Goldman Sachs</i> hedge fund	<i>a New York</i> minute

- b.** When two or more distinct proper names are combined to form a one-thought modifier, use a hyphen to connect the elements.

<i>a German-American</i> restaurant	the cuisine is <i>German-American</i>
-------------------------------------	---------------------------------------

NOTE: If one of the elements already contains a hyphen or is an open compound noun, use an en dash or two hyphens to connect the two proper names.

<i>the Winston-Salem-Atlanta</i> bus trip	<i>the Scranton-Wilkes-Barre</i> area
<i>an Air France-KLM</i> subsidiary	<i>the New York-Chicago-Los Angeles</i> flight
BUT: the flight to <i>New York, Chicago, and Los Angeles</i>	

Noun + Adjective

820

- a.** When a compound adjective consists of a noun plus an adjective, hyphenate this combination whether it appears before or after the noun. (See ¶815b.)

<i>accident-prone</i>	<i>capital-intensive</i>	<i>energy-efficient</i>
<i>bone-dry</i>	<i>class-conscious</i>	<i>fat-free</i>
<i>brain-dead</i>	<i>color-blind</i>	<i>heat-resistant</i>

*Merriam-Webster also hyphenates this term when it is used as a noun. (See ¶348b.)

ice-cold	price-conscious	tone-deaf
knee-deep	risk-averse	top-heavy
machine-readable	sky-high	trigger-happy
paper-thin	street-smart	user-friendly
pitch-dark	tax-exempt	water-repellent
power-hungry	toll-free	year-round

Your suggestion is ingenious but not *cost-competitive*.

You are trying to solve an *age-old* problem.

She wants everything to be *letter-perfect*.

We import these *water-repellent* fabrics *duty-free*.

I want a computer that is *IBM-compatible*.

NOTE: Do not use a hyphen when an em dash is called for.

Lawn equipment for rent–free delivery.

(**NOT:** Lawn equipment for rent-free delivery.)

- b.** Retain the hyphen in a noun plus an adjective combination when the expression functions as an adverb rather than as an adjective.

ADJECTIVE: Please call me on my *toll-free* number. (See ¶454d, note.)

ADVERB: You can always call me *toll-free*.

ADJECTIVE: The information is encoded on *paper-thin* wafers.

ADVERB: The wafers have to be sliced *paper-thin*.

- c.** When an open compound noun (for example, *federal tax*) and an adjective (for example, *free*) make up a compound adjective, insert only one hyphen to link the two elements (*federal tax-free* **NOT:** *federal-tax-free*). (See ¶821b, note.)

NOTE: If combining an open compound noun with an adjective creates an expression that is ambiguous or unclear, reword the sentence to eliminate this problem.

federal tax-free plans **CLEARER:** plans free of federal taxes

OR: federal plans that are tax-free

- d.** When a hyphenated compound noun is combined with an adjective to form a one-thought modifier, insert an en dash before the adjective.

a *Merriam-Webster-accessible* database

- e.** A few words in this category are now written solid. For example:

-wide: worldwide, nationwide, countrywide, statewide, countywide, citywide, communitywide, industrywide, companywide, storewide

-proof: waterproof, fireproof, shatterproof, weatherproof, childproof, bulletproof, foolproof, rustproof, soundproof, shockproof

-worthy: praiseworthy, newsworthy, trustworthy, creditworthy, noteworthy, seaworthy

-sick: homesick, airsick, carsick, heartsick, lovesick, seasick

-long: daylong, nightlong, weeklong, monthlong, yearlong, lifelong, agelong, headlong, hourlong*

**Merriam-Webster* hyphenates this word.

¶821

Noun + Participle

- 821** a. When a compound adjective consists of a noun plus a participle, hyphenate this combination whether it appears before or after the noun. (See ¶815b.)

attention-getting	interest-bearing	poll-tested
awe-inspiring	law-abiding	research-based
bell-shaped	market-tested	smoke-filled
case-sensitive	mind-boggling	snow-covered
decision-making	muscle-bound	tailor-made
eye-popping	nerve-racking	tax-sheltered
hair-raising	oven-roasted	tongue-tied
hand-lettered	panic-stricken	weather-beaten
home-cooked	penny-pinching	Windows-based

This number-crunching software uses eye-popping graphics.

Buying custom-tailored suits can easily become habit-forming.

The use of computer-aided design and productivity-enhancing equipment has boosted our profits enormously.

Thanks to an SBA-guaranteed loan, we expect to have a record-breaking year.

Do you think a Republican-led Congress will introduce an additional tax-cutting measure?

Our company is now 40 percent employee-owned.

- b. When an open compound noun is combined with a participle to form a one-thought modifier, insert a hyphen only before the participle.

<i>U.S. government-owned lands</i>	<i>a Pulitzer Prize-winning play</i>
<i>a Labor Department-sponsored conference</i>	<i>a Dayton, Ohio-based consortium</i>
<i>health care-related expenditures</i> (see ¶801d)	<i>solar energy-oriented research</i>

NOTE: For greater clarity use an en dash instead of a hyphen when combining an open compound with a participle. (See also ¶819b, note.)

<i>a White House-backed proposal</i>	<i>a New Orleans-bound traveler</i>
<i>a Frank Lloyd Wright-designed building</i>	<i>a Silicon Valley-based venture capitalist</i>

- c. Combining an open compound noun with a participle to form a compound adjective can often lead to awkward constructions. Reword to eliminate this problem.

AWKWARD: This software is *Novell network-compatible*.

BETTER: This software can also be used on a Novell network.

- d. When a hyphenated compound noun is combined with a participle to form a one-thought modifier, insert an en dash before the participle.

<i>a Hewlett-Packard-sponsored event</i>	<i>a Minneapolis-St. Paul-based organization</i>
<i>a Times-Picayune-backed investigation</i>	<i>Wi-Fi-equipped coaches</i>

- e. A few words in this category are now written solid. For example:

hand-:	handheld, handmade, handpicked, handwoven, handwritten
heart-:	heartbreaking, heartbroken, heartfelt, heartrending, heartwarming
home-:	homebound, homegrown, homemade, homespun

time-:	timeserving, timeworn
	BUT: time-consuming, time-honored, time-saving, time-sharing, time-tested
pain-:	painkilling, painstaking

Adjective + Participle (see also ¶824b)

- 822** a. When a compound adjective consists of an adjective plus a participle, hyphenate this combination whether it appears before or after the noun. (See ¶815b.)

clean-cut	high-ranking	rough-hewn
friendly-looking (see ¶824a, note)	long-standing	smooth-talking
half-baked	odd-sounding	soft-spoken
hard-hitting	ready-made	sweet-smelling

I'm *half-tempted* to apply for the Singapore opening myself.

He is a *smooth-talking* operator who never delivers what he promises.

Betty was anything but *soft-spoken* in arguing against the new procedures.

- b. Retain the hyphen even when a comparative or superlative adjective is combined with a participle—for example, *nicer-looking*, *best-looking*, *oddest-sounding*, *better-tasting*.

As the *highest-ranking* official present, Mrs. Egan took charge of the meeting.

This year's brochure is *better-looking* than last year's.

Why can't we attract *better-qualified* people to our company?

The conference got a *better-than-expected* turnout.

Pinney & Cobb is the *fastest-growing* employer in the state.

Adjective + Noun + ED

- 823** a. When a compound adjective consists of an adjective plus a noun plus *ed*, hyphenate this combination whether it appears before or after the noun. (See ¶815b.)

broad-minded	two-faced	round-shouldered
empty-headed	clear-eyed	empty-handed
quick-witted	hard-nosed	light-fingered
hot-tempered	tight-mouthed	two-fisted
good-humored	thin-lipped	loose-jointed
high-spirited	sharp-tongued	double-breasted
fair-haired	red-cheeked	long-winded
good-hearted	full-bodied	fast-paced
deep-seated	open-ended	broad-based
flat-bottomed	closed-captioned	coarse-grained
clean-limbed	low-pitched	double-edged
weak-kneed	high-priced	single-spaced (see ¶812a)
long-legged	middle-aged	deep-rooted
flat-footed	old-fashioned	high-powered
hot-blooded	short-lived (pronounce the <i>i</i> as in <i>life</i>)	one-sided
thin-skinned	pint-sized (see ¶823d)	BUT: lopsided

¶824

Our success was *short-lived*: the business folded after six months. (*Short-lived* is derived from the phrase *of short life*. For that reason the *i* in *lived* is pronounced like the long *i* in *life*, not like the short *i* in *given*.)

These symptoms commonly occur in *middle-aged* executives.

I'm too *old-fashioned* to be that *broad-minded*.

- b.** Retain the hyphen in comparative or superlative forms—for example, *smaller-sized*, *highest-priced*, *best-natured*.

Our *higher-priced* articles sold well this year.

These goods are *higher-priced* than the samples you showed me.

Fred is the *longest-winded* speaker I ever heard.

Fred's speech was the *longest-winded* I ever heard.

- c.** Some words ending with a noun + *ed* are now written solid. For example:

-headed: bareheaded, bullheaded, chowderheaded, clearheaded, coolheaded, fatheaded, hardheaded, hotheaded, levelheaded, muddleheaded, pigheaded, redhead, softheaded, soreheaded, thickheaded, woodenheaded, wrongheaded
BUT: bald-headed, empty-headed, light-headed, pointy-headed

-hearted: bighearted, brokenhearted, coldhearted, halfhearted, heavyhearted, light-hearted, openhearted, softhearted, stouthearted, tenderhearted, warmhearted, wholehearted
BUT: good-hearted, hard-hearted, single-hearted

-mouthed: closemouthed, openmouthed, widemouthed, bigmouthed, loudmouthed, mealymouthed
BUT: tight-mouthed

-fisted: hardfisted, tightfisted, closefisted, ironfisted
BUT: two-fisted, ham-fisted

-sighted: nearsighted, shortsighted, farsighted, foresighted
BUT: clear-sighted, sharp-sighted

-brained: birdbrained, featherbrained, harebrained (**NOT:** hairbrained), lamebrained, scatterbrained

-minded: feebleminded, absentminded, simpleminded
BUT: broad-minded, civic-minded, fair-minded, high-minded, like-minded, low-minded, narrow-minded, open-minded, serious-minded, single-minded, small-minded, strong-minded, tough-minded, weak-minded

- d.** Compound adjectives ending in *sized* (such as *pint-sized*, *pocket-sized*, *life-sized*, *full-sized*, *giant-sized*, *king-sized*, *queen-sized*, and *twin-sized*) are commonly written without the final *d*.

Our community center is building an *Olympic-size* pool.

Adverb + Participle (see also ¶825)

- 824 a.** Do not hyphenate an adverb-participle combination if the adverb ends in *ly*. (See also ¶825b.)

a *poorly constructed* house

a *wholly owned* subsidiary

a *highly valued* employee

a *newly formed* division

a *clearly defined* set of terms

an *extremely tiring* trip

NOTE: Hyphenate nouns and adjectives ending in *ly* when they are used with participles. (See also ¶822.)

a friendly-sounding voice

a motherly-looking woman

► To distinguish between adjectives and adverbs ending in *ly*, see ¶1069a–b.

- b.** Other adverb-participle compounds are hyphenated *before* the noun. When these same combinations occur in the predicate, drop the hyphen if the participle is part of the verb.

Before the Noun

a well-known consultant

much-needed reforms

the above-mentioned facts

the ever-changing tides

a long-remembered tribute

a soon-forgotten achievement

Elsewhere in Sentence

This consultant *is* well *known*.

These reforms *were* much *needed*.

These facts *were mentioned* above.

The tides *are* ever *changing*.

Today's tribute *will be* long *remembered*.

Her achievement *was* soon *forgotten*.

However, if the participle does not become part of the verb and continues to function with the adverb as a one-thought modifier in the predicate, retain the hyphen.

Before the Noun

a well-behaved child

a clear-cut position

a well-intentioned proposal

Elsewhere in Sentence

The child is *well-behaved*.

Their position was *clear-cut*.

The proposal was *well-intentioned*.

NOTE: You couldn't say, "The child is behaved" or "Their position was cut" or "The proposal was intentioned." Since the participle is not part of the verb, it must be treated as part of a compound adjective. Compare the use of *fast-moving* in the following examples.

Before the Noun

a fast-moving narrative

Elsewhere in Sentence

The narrative is *fast-moving*.

BUT: The narrative *is* fast *moving* toward a climax.

- c.** A hyphenated adverb-participle combination like those in *b* above retains the hyphen even when the adverb is in the comparative or superlative.

a better-known brand

a faster-moving stock clerk

the best-behaved child

the fastest-growing sector of the economy

- d.** A few words in this category are now written solid. For example:

-going: easygoing, ongoing, outgoing, thoroughgoing

far-: farseeing, farsighted

BUT: far-fetched, far-flung, far-reaching

free-: freehanded, freehearted, freestanding, freethinking, freewheeling

BUT: free-falling, free-flowing, free-floating, free-spoken, free-swinging

wide-: widespread

BUT: wide-eyed, wide-ranging, wide-spreading

¶825

Adverb + Adjective

- 825** a. A number of adverb-adjective combinations resemble the adverb-participle combinations described in ¶824. However, since an adverb normally modifies an adjective, do not use a hyphen to connect these words.

a <i>not too interesting</i> report	a <i>very moving</i> experience
a <i>rather irritating</i> delay	a <i>quite trying</i> day

NOTE: In these examples you can omit the adverb and speak of an *interesting* report, an *irritating* delay, a *moving* experience, and a *trying* day; hence no hyphen is needed. However, as explained in ¶824b, note, you cannot speak of a *behaved* child, a *cut* position, or an *intentioned* proposal; for that reason, the adverb preceding *behaved*, *cut*, and *intentioned* must be linked by a hyphen.

- b. Do not hyphenate an adverb-adjective combination if the adverb ends in *ly*. (See also ¶824a.)

a <i>highly intelligent</i> candidate	a <i>totally ridiculous</i> idea
a <i>closely guarded</i> secret	a <i>terribly boring</i> speech

- c. Do not hyphenate a comparative or superlative form when the adverb *more*, *most*, *less*, or *least* is combined with an adjective.

a <i>more determined</i> person	a <i>less complicated</i> transaction
the <i>most exciting</i> event	the <i>least interesting</i> lecture
a <i>more exciting</i> competition	a <i>less appealing</i> design

NOTE: Try to avoid situations in which the use of *more* or *less* can create ambiguity.

They need *more creative* solutions to all the problems they face. (Do they need a greater number of creative solutions, or do they need solutions that are more creative?)

That supermarket sells *less fresh* fruits and vegetables than it ought to. (Does that supermarket not offer enough fresh fruits and vegetables for sale, or are the fruits and vegetables that it sells not as fresh as they ought to be?)

The best solution in such cases is to reword the sentences to avoid the ambiguity.

They need a greater number of creative solutions to all the problems they face.

OR: They need solutions that are more creative in order to deal with all the problems they face.

That supermarket sells fruits and vegetables that are not as fresh as they ought to be.

OR: That supermarket offers a much too limited selection of fresh fruits and vegetables for sale.

If rewording is not feasible, you may insert a hyphen after *more* or *less* to indicate that it is being used to form the comparative form.

They need *more-creative* solutions to all the problems they face. (Solutions that are more creative.)

That supermarket sells *less-fresh* fruits and vegetables than it ought to. (Fruits and vegetables that are less fresh.)

- d. Hyphenate a comparative form that includes *than* when this form precedes a noun.

Before the Noun

a <i>better-than-expected</i> outcome	an outcome that was <i>better than expected</i>
a <i>larger-than-usual</i> turnout	a turnout that was <i>larger than usual</i>

Elsewhere in Sentence

an outcome that was <i>better than expected</i>	a turnout that was <i>larger than usual</i>
---	---

Before the Noun

a hotter-than-normal July
a less-than-adequate performance
a smaller-than-projected profit

Elsewhere in Sentence

a July that was hotter than normal
a performance that was less than adequate
a profit that was smaller than projected

► For a usage note on more, see pages 391–392.

Participle + Adverb

826 Hyphenate a participle-adverb combination *before* the noun but not when it occurs elsewhere in the sentence.

Before the Noun

filled-in forms
worn-out equipment
a tuned-up engine
a scaled-down proposal
baked-on enamel
a cooling-off period
unheard-of bargains
an agreed-upon date
warmed-over ideas

Elsewhere in Sentence

These forms should be filled in.
The equipment was worn out.
The engine has been tuned up.
The proposal must be scaled down.
This enamel has been baked on.
Don't negotiate without cooling off first.
These bargains were unheard of.
We agreed upon a date.
His ideas were warmed over for the occasion.

► See also the examples in ¶831.

Adjective + Adjective

827 a. Do not hyphenate independent adjectives preceding a noun.

a long and tiring trip (*long* and *tiring* each modify *trip*)
a warm, enthusiastic reception (*warm* and *enthusiastic* each modify *reception*; a comma marks the omission of *and*)
a distinguished public orator (*public* modifies *orator*; *distinguished* modifies *public orator*)

► For the use of commas with adjectives, see ¶¶168–171, especially the final examples in ¶169.

b. In a few special cases two adjectives joined by *and* or *or* are hyphenated because they function as one-thought modifiers. These, however, are rare exceptions to the rule stated in a.

a cut-and-dried presentation
a hard-and-fast rule
a high-and-mighty attitude
a tried-and-true method
an open-and-shut case
a black-and-blue bruise
black-and-white answers
an up-or-down vote

an out-and-out lie
an up-and-coming lawyer
a lean-and-mean approach
a rough-and-tumble environment
a spick-and-span kitchen
an on-and-off switch
sweet-and-sour chicken
in-and-out trading (in the stock market)

Henry views the matter in *black-and-white* terms. (A one-thought modifier.)

BUT: Sue wore a *black and white* dress to the Mallory party. (Two independent adjectives.)

¶828

- c. Hyphenate two adjectives that express the dual nature of the thing that they refer to. (See also ¶¶295b, 806, 818b.)

a *true-false* test

a *compound-complex* sentence

BUT: a *bittersweet* ending

- d. Hyphenate expressions such as *blue-black*, *green-gray*, *snow-white*, and *red-hot* before and after a noun. However, do not hyphenate expressions such as *bluish green*, *dark gray*, or *bright red* (where the first word clearly modifies the second).

Sales have been *red-hot* this quarter.

Her dress was *bluish green*.

Blue-black ink will show up best.

His moods range from black to *dark gray*.

Verb + Verb

- 828** a. Hyphenate a compound adjective consisting of two verbs (sometimes joined by *and* or *or*) when the adjective appears *before* the noun.

a *drag-and-drop* operation

a *plug-and-play* Web server

point-and-click navigating

a *wait-and-see* attitude

the *cut-and-paste* procedure

graded on a *pass-fail* basis

a *hit-or-miss* marketing strategy

a *can-do* spirit

a *make-or-break* financial decision

a *do-or-die* commitment

stop-and-go production lines

a *live-and-let-live* philosophy

rank-and-yank sessions (annual job reviews)

wash-and-wear fabrics

a *hunt-and-peck* approach to the keyboard

a *show-and-tell* presentation

operating only on a *cash-and-carry* basis

a *hit-and-run* accident

a *buy-and-hold* stock

search-and-rescue helicopters

We had some *touch-and-go* moments until our funding was renewed.

Their *hide-and-seek* style of financial reporting has finally been exposed.

If you can believe the advance buzz, Hollywood is about to release six *must-see* movies.

Negotiations were conducted in a *give-and-take* atmosphere.

Our CEO's *ready-fire-aim* approach does not inspire confidence.

- b. Do not hyphenate these elements when they play a normal function *elsewhere in the sentence*. However, retain the hyphen if these expressions continue to function as a compound adjective.

They're never sure whether they'll *hit or miss* their marketing targets.

BUT: Their marketing strategy can best be described as *hit-or-miss*.

Verb + Adverb

- 829** a. Hyphenate a compound adjective consisting of a verb plus an adverb when the adjective appears *before* the noun.

our *break-even* point

their *die-hard* fans

a *read-only* memory

a *drop-dead* party dress

the *trickle-down* theory of financing

dress-down Fridays

a *get-well* card

a *zip-out* lining

a *mail-in* rebate

a *tow-away* zone

a *pop-up* menu

run-on sentences

a *stand-up* comedian

carry-on luggage

a <i>wake-up</i> call	a <i>fall-back</i> position
<i>start-up</i> costs	their <i>go-to</i> person
a <i>sit-down</i> dinner	a <i>drive-through</i> window
a <i>twist-off</i> cap	a <i>set-aside</i> program

- b.** Do not hyphenate these elements when they play a normal function *elsewhere in the sentence*.

At what point will we *break even*?

Does this lining *zip out*?

Verb + Noun

- 830 a.** Hyphenate a compound adjective consisting of a verb plus a noun (or pronoun) when the adjective appears *before* the noun.

take-home pay

a *show-me* kind of attitude

a *take-charge* kind of person

BUT: a *turnkey* computer system

a *thank-you* note

a *lackluster* approach

- b.** Do not hyphenate these elements when they play a normal function *elsewhere in the sentence*.

In terms of salary it's not so much what you gross as it is what you *take home*.

Betsy is inclined to *take charge* of any situation in which she finds herself.

Phrasal Compound

- 831 a.** Hyphenate phrases used as compound adjectives *before* a noun. Do not hyphenate such phrases when they occur normally elsewhere in the sentence.

Before the Noun

up-to-date expense figures
down-to-earth projections
on-the-job training
off-the-shelf software
an in-service workshop
a going-out-of-business sale
an out-of-the-way location
over-the-counter stocks
under-the-table payments
an above-average rating
below-the-line charges
a middle-of-the-road position
before-tax earnings
after-dinner speeches
around-the-clock service
across-the-board cuts
a between-the-lines reading
behind-the-scenes contract negotiations

Elsewhere in Sentence

The expense figures are *up to date*.
These projections appear to be *down to earth*.
I got my training *on the job*.
You can buy that software *off the shelf*.
Modify only the equipment currently *in service*.
Is Chelsea's Drugs *going out of business*?
Why is the shopping mall so far *out of the way*?
These stocks are sold only *over the counter*.
Don't make any payments *under the table*.
Our unit's performance was rated *above average*.
These charges will show up *below the line*.
His political position never strays far from the *middle of the road*.
What were our earnings *before taxes*?
Speeches *after dinner* ought to be prohibited.
We offer service *around the clock*.
The CEO wants budget cuts *across the board*.
When you read *between the lines*, Jan's memo takes on a completely different meaning.
Contract negotiations went on *behind the scenes*.

¶831

**Before the Noun**

inside-the-Beltway pundits
outside-the-box thinking
a state-of-the-art installation
a spur-of-the-moment decision
a change-of-address form
a matter-of-fact approach
quality-of-life issues
a hands-on manager
a dog-in-the-manger attitude

straight-from-the-shoulder talk
made-to-order wall units
a pay-as-you-go tax plan
a get-rich-quick scheme

a would-be expert
a by-invitation-only seminar
a how-to manual
a soon-to-be-released report
a \$150,000-a-year fee
a well-thought-of designer
a well-thought-out plan
a what-if scenario
an inside-the-Beltway type
in-depth analysis
word-of-mouth marketing
the go-to person
going-home traffic
a lot of feel-good hype
made-for-TV movies
a much-talked-about party
a nine-year-old girl
BUT: a *9½-year-old* girl
(NOT: a nine-and-a-half-year-old girl)

Elsewhere in Sentence

What are the pundits *inside the Beltway* saying?
You need to think *outside the box*.
This model reflects the current *state of the art*.
Barra's decision was made on the *spur of the moment*.
Please show your *change of address*.
Jan accepted the situation as a *matter of fact*.
These issues affect everyone's *quality of life*.
She likes to get her *hands on* everything she manages.
Joe's attitude reminds me of the fable about the *dog in the manger*.
I gave it to him *straight from the shoulder*.
These wall units were *made to order*.
The new tax plan requires you to *pay as you go*.
Don't trust any scheme that promises that you will *get rich quick*.
Roy hoped he *would be* accepted as an expert.
Attendance at the seminar is *by invitation only*.
This manual will show you *how to* get published.
The consultant's report is *soon to be released*.
Our legal fees run about *\$150,000 a year*.
Our former designer was *well thought of*.
The plan was *well thought out*.
What if we bought a controlling interest in this business?
Jo seems to know just about everybody *inside the Beltway*.
Corey has analyzed your budget proposal *in depth*.
We depend chiefly on *word of mouth* to market our products.
Pam is the one to *go to* when you need some good advice.
How bad is the traffic *going home*?
This hype is designed to make you *feel good*.
The movies Hal produces are all *made for TV*.
Your party was *much talked about*.
Michelle is only *nine years old*.
Michelle is only *9½ years old*. (See ¶428a.)

NOTE: When the elements of a phrasal compound are hyphenated, the result may sometimes be unattractive or even disconcerting. In such cases you may use quotation marks (instead of hyphens) to hold the phrase together as a unit. In the following examples compare the hyphenated forms (which are correct) with the forms enclosed in quotation marks.

That country has been granted *most-favored-nation* status.

OR: That country has been granted “*most favored nation*” status.

Next month we will be holding a *going-out-of-business* sale.

OR: Next month we will be holding a “*going out of business*” sale.

Our two senators are taking a *middle-of-the-road* position.

OR: Our two senators are taking a “*middle of the road*” position.

I find it hard to take Peg's perpetual *been-there, done-that* attitude.

OR: I find it hard to take Peg's perpetual "*been there, done that*" attitude.

We're still following a *buy-low, sell-high* investment strategy.

OR: We're still following a "*buy low, sell high*" investment strategy.

- b.** When a phrase consists of two words joined by *and, or, to, by, or in*, hyphenate the phrase when it is used as a compound adjective before a noun.

a *cock-and-bull* story
 a *dog-and-pony* show*
 a *chicken-and-egg* situation
 a *cat-and-mouse* game
 a *life-and-death* matter
 a *David-and-Goliath* battle
bread-and-butter issues
 some *nuts-and-bolts* tips
horse-and-buggy days
 the airlines' *hub-and-spoke*
 (**OR:** *hub-and-hope*) system
 a *question-and-answer*
 (**OR:** *Q&A*) presentation
 a *day-to-day* arrangement
 a *face-to-face* meeting
back-to-back classes
coast-to-coast flights
hand-to-hand combat
 a *hand-to-mouth* existence
bumper-to-bumper traffic
 an *up-or-down* vote
 a *do-or-die* mission
 a *make-or-break* decision

a *trial-and-error* approach
 a *mom-and-pop* operation
 a *carrot-and-stick* proposal
 a *meat-and-potatoes* kind of guy
 the *rank-and-file* members of the party
 a *cause-and-effect* hypothesis
 a *cloak-and-dagger* operation
 a *tax-and-spend* policy
foot-and-mouth disease
 a *bricks-and-mortar* business
 (one that sells things in stores)
 a *clicks-and-mortar* business (one that sells things online as well as in stores)
 a *clicks-to-bricks* business (an Internet company that opens stores)
 an *eye-to-eye* confrontation
 an *apples-to-apples* comparison
peer-to-peer technology
head-to-head competition
 a *case-by-case* analysis
hour-by-hour deadlines
 a *state-by-state* breakdown
 a *tongue-in-cheek* remark

- *For additional examples, see ¶828a.*

- c.** As a rule, do not hyphenate foreign phrases used as adjectives before a noun. (See also ¶287.)

an *ad hoc* committee
 an *à la carte* menu
 a *bona fide* transaction
 an *ad hominem* attack

an *ex officio* member
 a *pro rata* assessment
 a *per diem* fee
 a *prix fixe* dinner menu

EXCEPTIONS: an *ad-lib* speech, a *laissez-faire* economic policy

- d.** When a compound modifier consists of two or more hyphenated phrases, separate the phrases with a comma.

a *penny-wise, pound-foolish* approach to handling money
 a *knock-down, drag-out* fight over ownership of the company
 an *all-out, no-holds-barred* strategy
 the *first-in, first-out* method of accounting
 a *first-come, first-served* policy of seating

Continued on page 278

*Merriam-Webster shows this term without hyphens—*dog and pony show*.

¶832

- a *no-fee, no-load* IRA
- a *chin-up, back-straight, stomach-in* posture
- an *on-again, off-again* wedding
- BUT:** a *go/no-go** decision (see also ¶295a)

e. Hyphenate repeated or rhyming words used before a noun.

- | | |
|--------------------------------------|---|
| a <i>go-go</i> attitude | a <i>razzle-dazzle</i> display |
| a <i>rah-rah</i> spirit | a <i>fancy-schmancy</i> wedding |
| a <i>hush-hush</i> venture | a <i>rinky-dink</i> setup |
| a <i>buddy-buddy</i> relationship | a <i>tidy-tacky</i> operation |
| a <i>win-win</i> situation | a <i>super-duper</i> production |
| a <i>goody-goody</i> image | a <i>lovey-dovey</i> couple |
| a <i>higgledy-piggledy</i> layout | a <i>hoity-toity</i> accent |
| a <i>teeny-weeny</i> salary increase | an <i>artsy-craftsy</i> boutique |
| a <i>palsy-walsy</i> deal | a <i>topsy-turvy</i> world |
| a <i>loosey-goosey</i> style | a <i>helter-skelter</i> file of documents |
| a <i>wishy-washy</i> administrator | a <i>ho-hum</i> marketing campaign |

f. Hyphens may also be used to signify an exaggerated pronunciation of a word.

- If the Walshes agree to support your cause, I would be so-o-o-o-o-o-o surprised.
 And you thought I'd lend you money? No-o-o-o-o way.
 You expect me to believe that? *Puh-lease*.

Suspending Hyphen

832 **a.** When a series of hyphenated adjectives has a common basic element and this element is shown only with the last term, insert a suspending hyphen after each of the incomplete adjectives to indicate a relationship with the last term.

- | | |
|--|---|
| <i>long- and short-term</i> securities | <i>10- and 20-year</i> bonds |
| <i>private- and public-sector</i> partnerships | <i>a three- or four-color</i> cover |
| <i>single-, double-, or triple-spaced</i> copy | <i>two- and four-wheel</i> drive |
| set in a <i>10- or 12-point</i> font | <i>two- and three-day</i> workshops |
| <i>credit- and debit-card</i> fees | <i>middle- and upper-class</i> consumers |
| <i>ice- and snow-packed</i> roads | <i>8½- by 11-inch</i> paper |
| <i>open- and closed-door</i> sessions | BUT: <i>8½" × 11"</i> paper (see ¶432) |

b. When the common element appears only at the start of the first term, insert a hyphen before each of the incomplete adjectives to indicate a relationship with the first term. (See ¶833f.)

- a *well-known and -loved* figure in the community a *better-planned and -executed* session

c. Use one space after each suspending hyphen unless a comma is required at that point.

- | | |
|---------------------------------------|-------------------------------------|
| a <i>six- to eight-week</i> delay | <i>3-, 5-, and 8-gallon</i> buckets |
| a <i>10- to 12-hour</i> trip | <i>6-, 12-, and 24-month</i> CDs |
| in the <i>150- to 200-pound</i> range | <i>30-, 40-, and 50-year-olds</i> |

*Merriam-Webster shows this term as *go-no-go*.

- d.** When two or more solid compound adjectives with a common element are used together (for example, *lightweight* and *heavyweight*) and the common element is shown only with the last term, use a suspending hyphen with the incomplete forms to indicate a relationship with the common element.

This product is available in *light-* and *heavyweight* versions.

Please provide *day-* and *nighttime* phone numbers.

NOTE: Repeat the common element with each word if the use of the suspending hyphen looks odd or confusing; for example, *boyfriend or girlfriend* (rather than *boy- or girlfriend*).

► *For the use of a suspending hyphen with prefixes or suffixes, see ¶833d-f.*

Prefixes and Suffixes

- 833** **a.** In general, do not use a hyphen to set off a prefix at the beginning of a word or a suffix at the end of a word. (See ¶808b for two exceptions: *ex-* and *-elect*.)

aftertaste (see ¶842)	misspell	changeable
<i>ambidextrous</i>	<i>monosyllable</i>	<i>patronage</i>
<i>antedate</i>	<i>multitasking</i>	<i>freedom</i>
<i>antitrust</i> (see ¶834)	<i>nonessential</i>	<i>sixfold</i>
<i>audiovisual</i>	<i>offbeat</i> (see ¶845)	<i>agreeable</i>
<i>biweekly</i>	<i>online</i>	<i>meaningful</i>
<i>byline</i> BUT: by-product	<i>outsourcing</i>	<i>sonogram</i>
<i>circumlocution</i>	<i>overconfident</i>	<i>photograph</i>
<i>coauthor</i> (see ¶835b)	<i>paramedical</i>	<i>likelihood</i>
<i>counterbalance</i>	<i>polysyllabic</i>	<i>convertible</i>
<i>decentralize</i> (see ¶835a)	<i>posttest</i>	<i>misspelling</i>
<i>downsizing</i>	<i>prerequisite</i> (see ¶835a)	<i>fiftyish</i>
<i>extralegal</i>	<i>proactive</i>	<i>thankless</i> (see ¶846)
<i>forefront</i>	<i>pseudoscientific</i>	<i>booklet</i>
<i>hypersensitive</i>	<i>reorganize</i> (see ¶837)	<i>childlike</i> (see ¶846)
<i>hypocritical</i>	<i>retroactive</i>	<i>inducement</i>
<i>illegal</i>	<i>semiannual</i> (see ¶834)	<i>uppermost</i>
<i>immaterial</i>	<i>subprime</i>	<i>happiness</i>
<i>indefensible</i> (see ¶843)	<i>supernatural</i>	<i>computernik</i>
<i>infrastructure</i>	<i>supranatural</i>	<i>fireproof</i>
<i>interoffice</i>	<i>transcontinental</i>	<i>censorship</i>
<i>intramural</i> (see ¶834)	BUT: <i>trans fat</i>	<i>handsome</i>
<i>introversion</i>	<i>trilateral</i>	<i>homestead</i>
<i>macroeconomics</i>	<i>ultraconservative</i> (see ¶834)	<i>backward</i>
<i>micromanage</i>	<i>unaccustomed</i>	<i>nationwide</i> (see ¶820e)
<i>midwinter</i> (see ¶844)	<i>undercurrent</i>	<i>edgewise</i> (see page 404–405)
<i>minibike</i>	<i>upshot</i>	<i>trustworthy</i>

NOTE: Be wary of spell checkers that may urge you to insert hyphens after the prefixes that appear in these examples.

¶833

- b.** Whenever necessary, use a hyphen to prevent one word from being mistaken for another. (See ¶837.)

lock the <i>coop</i>	<i>multiply</i> by 12	a <i>unionized</i> factory
buy a <i>co-op</i>	a <i>multi-ply</i> fabric	an <i>un-ionized</i> substance

- c.** As a rule, when adding a prefix to a hyphenated or spaced compound word, use a hyphen after the prefix.

<i>pre</i> -Revolutionary War times	<i>non</i> -interest-bearing notes
<i>post</i> -Enron regulatory reforms	<i>non</i> -computer-literate adults
<i>post</i> -9/11 policies	<i>non</i> -civil service position (see ¶818a)
	<i>ex</i> -attorney general

EXCEPTIONS: coeditor in chief, unair-conditioned, unself-conscious (as shown in *Merriam-Webster*)

- d.** When two or more prefixes have a common element and this element is shown only with the final prefix, insert a suspending hyphen after each of the unattached prefixes to indicate a relationship with the common element. (See ¶832.)

<i>pre</i> - and <i>postnatal</i> care	<i>maxi</i> -, <i>midi</i> -, and <i>miniskirts</i>
<i>macro</i> - and <i>microeconomics</i>	<i>inter</i> - and <i>intraoffice</i> networks
<i>pro</i> - and <i>anti</i> union forces	<i>over</i> - and <i>underqualified</i> job applicants

- e.** When a prefix and an adjective both modify a noun and the prefix precedes the adjective, insert a suspending hyphen after the prefix to indicate a relationship with the noun.

Felicia appears to be in her *mid*- to late forties.
 The temperature tomorrow is expected to reach the *mid*- to upper 90s.
 The Templetons were married sometime during the *mid*- to late '70s.

- f.** When two or more suffixes have a common element, it is possible to leave one of the suffixes unattached and insert a suspending hyphen to indicate the relationship with the common element; for example, *servicemen* and *-women*. However, to avoid confusion or awkwardness, it is usually better to repeat the common element with each suffix. (See ¶832.)

AWKWARD: I thought Nancy's reaction was more *thoughtless* than *-ful*.
BETTER: I thought Nancy's reaction was more *thoughtless* than *thoughtful*.
AWKWARD: I would characterize his behavior as *childlike* rather than *-ish*.
BETTER: I would characterize his behavior as *childlike* rather than *childish*.

- g.** When elements that serve as prefixes are used as other parts of speech, do not attach them to the word that follows.

extralegal activities (activities not regulated by law; here *extra* is a prefix)
extra legal responsibilities (additional legal responsibilities; here *extra* is an adjective)
 caught up in the *undercurrent* (here *under* is a prefix)
under current regulations (here *under* is a preposition)

- h.** When a prefix is followed by a hyphen in an organizational name, respect the organization's preference.

Anti-Defamation League Community Anti-Drug Coalitions of America

- i. Do not insert a hyphen when attaching the suffix *esque* to a base word.

Hemingwayesque	statuesque
Kafkaesque	arabesque
Dantesque	humoresque

- 834** When the prefix ends with *a* or *i* and the base word begins with the same letter, use a hyphen after the prefix to prevent misreading.

ultra-active	anti-intellectual	semi-independent
intra-abdominal	anti-inflationary	multi-institutional

- 835 a.** When the prefix ends with *e* and the base word begins with the same letter, the hyphen is almost always omitted.

redit	preminent	BUT: de-emphasize
reeducate	preemployment	de-energize
reelect	preempt	de-escalate
reemphasize	preexisting	
reemploy	BUT: pre-engineered	
reenforce	pre-owned	

- b.** When the prefix is *co* and the base word begins with *o*, use a hyphen except in a few commonly used words.

co-occurrence	co-opt	BUT: coordinate
co-official	co-organizer	cooperate
co-op	co-owner	cooperative

However, when the base word following *co* begins with a letter other than *o*, omit the hyphen.

coauthor	codition*	copromoter
cocaptain	coeditor	copublisher
cochair	cofounder	cosign
coconspirator	copartner	cosigner
cocontributor	copayment*	cosponsor
codefendant	copilot	costar
codeveloper	coproducer	coworker

- 836 a.** Use a hyphen after *self* when it serves as a prefix.

self-addressed	self-fulfilling	self-serving
self-censorship	self-help	self-study
self-confidence	self-important	self-supporting
self-destruct	self-paced	self-worth
self-evident	self-parody	unself-conscious

- b.** Omit the hyphen when *self* serves as the base word and is followed by a suffix.

selfdom	selfhood	selfness
selfish	selfless	selfsame

- c.** Avoid the expression *him-* or *herself*. Use *himself* or *herself*.

*Merriam-Webster hyphenates this word.

¶837

837 As a rule, the prefix *re* (meaning “again”) should not be followed by a hyphen. A few words require the hyphen so that they can be distinguished from other words with the same spelling but a different meaning.

to <i>re-act</i> a part in a play	to <i>react</i> calmly to pressure
to <i>re-coil</i> the hose	to <i>recoil</i> from danger
to <i>re-collect</i> the slips	to <i>recollect</i> the mistake
to <i>re-cover</i> a chair	to <i>recover</i> from an illness
to <i>re-create</i> the crime scene	to <i>recreate</i> on a long vacation
to <i>re-dress</i> the mannequins	to <i>redress</i> a wrong
to <i>re-form</i> the rows	to <i>reform</i> a sinner
to <i>re-lay</i> the carpet	to <i>relay</i> a message
to <i>re-lease</i> the apartment	to <i>release</i> the hostage
she <i>re-marked</i> the ticket	as he <i>remarked</i> to me
to <i>re-press</i> the jacket	to <i>repress</i> one’s emotions
to <i>re-prove</i> your point	to <i>reprove</i> an offender
to <i>re-search</i> the files for the missing contract	to <i>research</i> (investigate) a problem in depth
I <i>re-sent</i> the letter yesterday	I <i>resent</i> her criticisms
to <i>re-serve</i> your customers	to <i>reserve</i> the right to sue
to <i>re-side</i> my house	to <i>reside</i> in comfort and safety
to <i>re-sign</i> the contracts	to <i>resign</i> the position
to <i>re-solve</i> this riddle	to <i>resolve</i> the conflict
to <i>re-sort</i> the cards	to <i>resort</i> to violence
to <i>re-strain</i> one’s wrist	to <i>restrain</i> one’s impulses
to <i>re-treat</i> the cloth	to <i>retreat</i> to safer ground

838 When a prefix is added to a word that begins with a capital letter, use a hyphen after the prefix.

anti-Semitic	mid-January	non-Windows application
inter-African	trans-Canadian	pre-Revolutionary War days
un-American	pro-Republican	post-World War II period
BUT: transatlantic, transpacific, the Midwest		

839 Always hyphenate family terms involving the prefix *great* or the suffix *in-law*, but treat terms involving *step* and *grand* solid. (See ¶319c.)

my great-grandfather	your brother-in-law	my grandmother
their great-aunt	my stepdaughter	her great-grandchild

Note how the use or omission of a hyphen changes the meaning.

- Martha Henderson is a *great-grandmother*. (At least one of her grandchildren has a child.)
 Martha Henderson is a *great grandmother*. (She treats her grandchildren extremely well.)

840 a. Avoid feminine suffixes like *ess*, *ette*, and *trix*.

- She has an established reputation as an *author* and a *poet*. (**NOT:** authoress and poetess.)
 If you have any questions, ask your *flight attendant*. (**NOT:** stewardess.)

b. A few terms with feminine suffixes are still widely used; for example, *heroine*, *heiress*, and *fiancée*. Women who have traditionally been called *actresses* are now often identified simply as *actors*; however, the traditional form continues to be used in the Oscar award for best actress. Women traditionally referred to as *hostesses* are increasingly called *hosts*. *Waitresses* are increasingly called *waiters* or *servers*; they are sometimes called *waitrons* and *waitpersons*, awkward terms that ought to be avoided. In legal documents, the terms *executrix* and *testatrix* are increasingly being replaced by *executor* and *testator*.

- 841** Use a hyphen after *quasi* when an adjective follows.

quasi-judicial	quasi-public
quasi-legislative	BUT: quasi corporation

- 842** When *after* is used as a prefix, do not use a hyphen to set it off from the root word. When *after* is used as a preposition in a compound adjective, insert a hyphen.

aftereffect	afternoon	BUT: an after-dinner speech
afterlife	aftershock	an after-hours club
aftermarket	aftertaste	my after-tax income
aftermath	afterthought	an after-theater snack

- 843** When *in* is used as a prefix meaning “not,” do not use a hyphen to set it off from the root word. When *in* is used as a preposition in a compound adjective, insert a hyphen.

inactive	infallible	BUT: an in-depth analysis
inarticulate	insensitive	in-flight movies
incapable	insolvent	our in-house designers
indecisive	intolerable	an in-service program

- 844** Although a hyphen is not ordinarily used to set off the prefix *mid*, a hyphen normally follows *mid* in expressions involving numbers or capitalized words.

during the mid-sixties **OR:** the mid-60s (see ¶¶434, 439a)
 temperatures in the mid- to upper 40s
 sailing in the mid-Atlantic in mid-June (see ¶838)

- 845** Many words beginning with the prefix *off* are written solid, but some are hyphenated.

offhand	offshore	BUT: off-color
offline*	offspring	off-key
offset	offstage	off-season
offshoot	offtrack	off-white

- 846** If the addition of the suffix *less* or *like* causes three *l*'s to occur in succession, insert a hyphen before the suffix. (See also ¶706, note.)

lifelike	businesslike	BUT: bell-like	wall-like
faultless	bottomless	shell-less	skill-less

*Merriam-Webster hyphenates this word.

¶847

Compound Computer Terms

847 The free spirits who coin most computer terms typically feel no obligation to follow the standard rules for the treatment of compound words. Consider the term *World Wide Web*. According to ¶820e, *worldwide* should be a solid word, but actual usage—in this case, *World Wide*—must always take precedence over rules. Indeed, the rules merely represent an attempt to impose some order and consistency on a language that cheerfully persists in disorder and inconsistency.

The problem is especially severe in the treatment of compound words in computer terminology, where changes occur so rapidly that it is impossible to establish a style that one can confidently expect to last for several years. What's more, at any given time a particular word may be in a state of unsettled transition and appear in several ways—hyphenated, spaced, and solid. The general tendency is for hyphenated forms to give way to either spaced or solid forms and for the spaced forms to give way to solid forms.

Consider the word *e-mail*. Initially presented as *electronic mail*, the term evolved into *E-mail*, and conservative writers still write the word with a capital *E*. Writers on the cutting edge, who continually press for fewer hyphens and less capitalization, converted the term to *email* some time ago. Those currently occupying the middle ground treat the word as *e-mail*, but with the passage of time (two years? four years? six months?) *email* may become the standard form. (See ¶847g, note.)

Dictionaries typically show the more conservative spellings, because they cannot keep pace with the changes rapidly taking place in this field. Where, then, do you turn for up-to-date guidance? The best places to look are (1) the magazines and dictionaries devoted to computer and Internet technology and (2) the manuals and style guides published by industry insiders. If you are writing for a knowledgeable audience of computer users, you can choose the emerging style for the treatment of compound words. If, on the other hand, you are writing for readers who are not immersed in the field, you may find it safer to stay with the more conservative treatment of these words, because such readers will more easily grasp, say, *file name* than *filename*.

The following paragraphs provide some guidelines on the current treatment of compound computer terms.

- a. In the following list, the two-word forms (shown first) are still more common, but the one-word forms are starting to take hold.

file name	OR:	filename	screen saver	OR:	screensaver
home page	OR:	homepage	spell checker	OR:	spellchecker
menu bar	OR:	menubar	voice mail	OR:	voicemail

- b. In the following list, the one-word forms (shown first) are more common, but the spaced or hyphenated forms are still being used.

barcode	OR:	bar code	logoff (n.)	OR:	log-off
handheld	OR:	hand-held	BUT: log off (v.)		
hardwired	OR:	hard-wired	logon (n.)	OR:	log-on
offline	OR:	off-line	BUT: log on (v.)		

offscreen	OR: off-screen	touchpad	OR: touch pad
online	OR: on-line	touchscreen	OR: touch screen
onscreen	OR: on-screen	wordwrap	OR: word wrap

- c. In the following list, the two-word forms (shown first) are more common, but the hyphenated forms (which follow the standard rules) are also being used.

dot matrix printers	OR: dot-matrix printers
local area networks	OR: local-area networks
wide area networks	OR: wide-area networks

- d. In the following list, the hyphenated forms (shown first) are more common, but the solid or spaced forms (if given) are used in materials aimed at industry insiders.

dot-com	drop-down menu	OR: dropdown menu
pop-up window	pull-down menu	OR: pulldown menu
read-only memory	ink-jet printer	OR: inkjet printer
write-only files	random-access memory	OR: random access memory

- e. The following compound words are solid except in a few special cases.

backup (n. & adj.)	lookup (n.)	trackball
BUT: back up (v.)	BUT: look up (v.)	trackpad
desktop	newsgroup	uplink (n. & v.)
downlink (n. & v.)	newsreader	upload (n. & v.)
download (n. & v.)	BUT: news server	userid (derived from <i>user ID</i>)
keyword	palmtop	whois (derived from <i>who is</i>)
laptop	toolbar	workstation

- f. Compound words beginning with *Web* are usually two words.

Web site	Web server	BUT: Webmaster
Web page	Web browser	Webcasting
Web surfer	Web directory	Webzine
Web index	Web clipping	Weblog
Web cam	Web terminal	Webinar

NOTE: The term *Web site* is still most commonly written as two words with a capital *W*. However, along with a few other Web compounds, it has started to appear as a solid word without an initial cap (*website*). In order to maintain a consistent style, it is better to retain the capital *W* until a majority of these terms (such as the *World Wide Web* and *the Web*) lose their initial cap as well.

- g. Compound words beginning with the prefix *e* are usually hyphenated.

e-banking	e-credit	e-tail OR: e-tailing
e-book	e-currency	e-text
e-business	e-dress (an e-mail address)	e-wallet
e-cash	e-lance	BUT: eBay (see ¶363c)
e-commerce	e-learning	eDonkey
e-economy	e-money	eHarmony

¶848

NOTE: The term *e-mail* can still be seen as *E-mail* (the original form of the word) and also as *email* (without the hyphen), but the hyphenated form is still the one most commonly used. In order to maintain a consistent style, it is better to retain the hyphen in *e-mail* until many of the other *e* words start to drop the hyphen as well.

- h.** The prefix *i* (which refers to the Internet) appears both with and without a hyphen when it is attached to a base word.

iPod	i-Lighter
iMac	i-Newswire
iTunes	i-flex solutions
iPhone	i-Safe
iTools	BUT: I-80 (here <i>I</i> stands for Interstate)

- i.** The prefix *m* (which refers to the use of mobile phones) is usually followed by a hyphen when it is attached to a base word.

m-business	m-commerce
------------	------------

Sometimes One Word, Sometimes Two Words

- 848** A number of common words may be written either as one solid word or as two separate words, depending on the meaning. See individual entries listed alphabetically in ¶1101 (unless otherwise indicated) for the following words:

Almost-all most	Indirect-in direct
Already-all ready	Into-in to (see <i>In</i>)
Altogether-all together	Maybe-may be
Always-all ways	Nobody-no body
Anymore-any more	None-no one (see ¶1013a-b)
Anyone-any one (see ¶1010, note)	Onto-on to (see <i>On</i>)
Anytime-any time	Someday-some day
Anyway-any way	Someone-some one (see ¶1010, note)
Awhile-a while	Sometime-sometimes-some time
Everyday-every day	Upon-up on (see <i>On</i>)
Everyone-every one (see ¶1010, note)	Whatever-what ever
Indifferent-in different	Whoever-who ever

► *Hyphens in spelled-out numbers:* see ¶¶427, 465.

Hyphens in spelled-out dates: see ¶411a.

Hyphens in spelled-out amounts of money: see ¶420b.

Hyphens in spelled-out fractions: see ¶427.

Hyphens in numbers representing a continuous sequence: see ¶¶459–460.

SECTION 9

Word Division

Basic Rules (¶¶901–906)

Preferred Practices (¶¶907–919)

Breaks Within Word Groups (¶¶920–921)

Guides to Correct Syllabication (¶¶922–923)

- For definitions of grammatical terms, see the appropriate entries in the *Glossary of Grammatical Terms* (Appendix A).

Automatic hyphenation is a feature of many word processing programs. When the automatic hyphenation feature is turned on, the program consults its electronic dictionaries to determine where to insert a hyphen when dividing a word at the end of a line. The electronic dictionaries may not always agree with the authority for word divisions shown in this manual (the 2009 printing of *Merriam-Webster's Collegiate Dictionary*, Eleventh Edition). Moreover, some of the electronic word divisions may break the “unbreakable” rules in ¶¶901–906. Therefore, always review all electronic word-division decisions and adjust them as necessary.

When the automatic hyphenation feature is turned on, the hyphen that divides a word at the end of a line is a *soft hyphen* (that is, a nonpermanent hyphen). If you subsequently change your text so that the divided word no longer falls at the end of a line, the soft hyphen will disappear. If you are typing an expression in which a hyphen must always appear, use a *regular hyphen*. If such an expression crosses the end of a line, it will be divided after the hyphen. If you are typing a hyphenated expression (such as a phone number) that should not be divided at the end of a line, use a *hard* (or *nonbreaking*) *hyphen*. In that way the complete expression will remain on the same line. (See ¶903b.)

Some writers prefer to turn off the automatic hyphenation feature and break the lines themselves. If you follow this practice, you will be inserting a hard hyphen at the end of such lines. Thus if your line endings subsequently change, you will have to inspect your copy carefully to remove those hyphens that no longer fall at the end of a line. To avoid overlooking unnecessary hyphens in such a case, make all your copy changes first and then, as a final step, adjust the line endings as necessary.

The following rules for word division include (1) those that must never be broken (¶¶901–906) and (2) those that should be followed whenever space permits a choice (¶¶907–921).

¶901**Basic Rules**

- 901** a. Whenever possible, avoid dividing a word at the end of a line. Word divisions are unattractive and they may confuse a reader. However, an extremely ragged right margin is also very unattractive.
- b. When word division is unavoidable, try to divide at the point that is least likely to disrupt the reader's grasp of the word.
- c. Divide words only between syllables. Whenever you are unsure of the syllabication of a word, consult a dictionary. (See also ¶¶922–923 for some guidelines on correct syllabication.)
 ex- traordinary **OR:** extraor- diary **OR:** extraordi- nary (**BUT NOT:** extra- ordinary)
- d. Some syllable breaks shown in the dictionary are not acceptable as points of word division. (See ¶¶903–904.)

NOTE: Professional typesetters often take liberties with the rules of word division in order to fit copy within a limited amount of space. For that reason you may occasionally notice word divisions in this professionally typeset manual that do not follow the guidelines presented in Section 9.

- 902** Do not divide one-syllable words. Even when *ed* is added to some words, they still remain one-syllable words and cannot be divided.

stressed	through	spring	hour
planned	thoughts	straight	rhythm

- 903** a. Do not set off a one-letter syllable at the beginning or the end of a word.

amaze (NOT: a- maze)	ideal (NOT: i- deal)
media (NOT: medi- a)	lucky (NOT: luck- y)

NOTE: So as to discourage word division at the beginning or end of a word, some dictionaries no longer mark one-letter syllables at these points.

- b. When typing a word like *e-mail*, use a hard (or nonbreaking) hyphen so that the word will not be divided after the *e*.

- 904** Do not divide a word unless you can leave a syllable of at least three characters (the last of which is the hyphen) on the upper line and you can carry a syllable of at least three characters (the last may be a punctuation mark) to the next line.

ad- mit	de- ter	un- der	in- ert
do- ing	re- new	set- up,	happi- ly.

NOTE: Whenever possible, avoid dividing any word with fewer than six letters.

- 905** Do not divide abbreviations.

ACTION	UNICEF	AMVETS	NASDAQ
irreg.	approx.	assoc.	introd.

NOTE: An abbreviation like *AFL-CIO* may be divided after the hyphen.

- 906** Do not divide contractions.

haven't	shouldn't	mustn't	o'clock
---------	-----------	---------	---------

Preferred Practices

While it is acceptable to divide a word at almost any syllable break shown in the dictionary, it is often better to divide at some points than at others in order to obtain a more intelligible grouping of syllables. The following rules indicate preferred practices whenever you have sufficient space left in the line to permit a choice.

907 Divide a solid compound word between the elements of the compound.

eye- witness	time- table	photo- copy	socio- economic
copy- writer	master- minding	trouble- shooting	muddle- headed

908 Divide a hyphenated compound word at the point of the hyphen.

self- confidence	father- in-law	cross- reference	senator- elect
whistle- blowing	window- shopper	pocket- handkerchief	consciousness- raising

909 Divide a word *after* a prefix (rather than within the prefix).

Preferred	Acceptable
..... intro- in-
duce inter-	troduce in-
national super-	ternational su-
sonic circum-	personic cir-
stances ambi-	cumstances .. am-
dextrous	bidextrous

However, avoid divisions like the following, which can easily confuse a reader.

Confusing	Better
..... inter- in-
rogate super-	terrogate su-
lative circum-	perlative cir-
ference ambi-	cumference ... am-
tious hyper-	bitious hy-
bole extra-	perbole ex-
neous coin-	traneous..... co-
cide	icide

910 Divide a word *before* a suffix (rather than within the suffix).

appli- cable (**RATHER THAN:** applica- ble)
comprehen- sible (**RATHER THAN:** comprehensi- ble)

911 When a word has both a prefix and a suffix, choose the division point that groups the syllables more intelligibly.

replace- ment (**RATHER THAN:** re- placement)

The same principle applies when a word contains a suffix added on to a suffix. Choose the division point that produces the better grouping.

helpless- ness (**RATHER THAN:** help- lessness)

¶912

912 Whenever you have a choice, divide after a prefix or before a suffix (rather than within the root word).

over- active (**RATHER THAN:** overac- tive)

success- ful (**RATHER THAN:** suc- cessful)

NOTE: Avoid divisions that could confuse a reader.

re- address (**NOT:** read- dress)

co- insure (**NOT:** coin- sure)

re- allocate (**NOT:** real- locate)

co- operate (**NOT:** coop- erate)

re- arrest (**NOT:** rear- rest)

sources (**NOT:** sour- ces)

re- invest (**NOT:** rein- vest)

be- atify (**NOT:** beat- ify)

913 When a one-letter syllable occurs within the root of a word, divide *after* it (rather than before it).

impera- tive

pene- trate

simi- lar

congratu- late

nega- tive

reme- dies

apolo- gize

salu- tary

914 When two separately sounded vowels come together in a word, divide between them.

recre- ation

medi- ation

pro- active

situ- ated

pre- eminent

experi- ence

po- etic

influ- ential

spontane- ity

anti- intellectual

auto- immune

ingenu- ity

courte- ous

patri- otic

co- opting

continu- ous

NOTE: Do not divide between two vowels when they are used together to represent one sound.

main- tained

treasur- er

en- croaching

ac- quaint

extraor- dinary

es- teemed

ap- point

guess- ing

pa- tience

sur- geon

ty- coon

acquit- tal

por- tion

neu- tral

pro- nounce

mis- quoted

915 When necessary, an extremely long number can be divided after a comma; for example, 24,358,- 692,000. Try to leave at least four digits on the line above and at least six digits on the line below, but always divide after a comma.

916 Try not to end more than two consecutive lines in hyphens.

917 Try not to divide at the end of the first line or at the end of the last full line in a paragraph.

918 Do not divide the last word on a page.

919 Always type a dash or a slash at the end of a line (rather than at the start of a new line).

► *For the division of URLs and e-mail addresses at the end of a line, see ¶1510.*

Breaks Within Word Groups

920 Try to keep together certain kinds of word groups that need to be read together—for example, page (or chapter) and number, month and day, month and year, title and surname, surname and abbreviation (or number), telephone number, number and

abbreviation (or symbol), symbol and number, number and unit of measure, noun and number, and number and noun.

page 203	Mrs. Connolly	10:30 a.m.	Room 612
Chapter 7	Maria Mosca, M.D.	3 o'clock	Flight 760
April 29	Adam Leeman III	\$348.50	80 percent
July 2010	563.555.1212	465 miles	18.6%
Section 5	Grade 8	Form 1040	Room 308

NOTE: If you are using word processing software, insert a *hard space* (also known as a *nonbreaking space*) between the elements of a word group that should not be broken at the end of a line. The complete word group will remain on the same line.

921 When it is not possible to keep longer word groups together on one line, try to observe the following guidelines in deciding where to break these word groups:

a. *Dates* may be broken between the day and year.

..... November 14,	NOT:	November
2009,	14, 2006,

b. *Street addresses* may be broken between the name of the street and *Street, Avenue, etc.* or the like. If the street name consists of two or more words, the break may come between words in the street name.

..... 1024 Westervelt	NOT:	1024
Boulevard	Westervelt Boulevard
..... 617 North	NOT:	617
Fullerton Street	North Fullerton Street

c. *Names of places* may be broken between the city and the state or between the state and the ZIP Code. If the city or state name consists of two or more words, the break may come between these words.

..... Portland,	OR:	Portland, Oregon
Oregon 97229,	97229,
..... Grand	OR:	Grand Forks, North
Forks, North Dakota,	Dakota,

d. *Names of persons* may be broken between the given name (including a middle name or initial if given) and the surname. A surname that consists of two names linked by a hyphen may be broken before the surname or after the hyphen but not within either surname.

..... E. B.	NOT:	E.
White	B. White
..... John F.	NOT:	John
Kennedy	F. Kennedy
..... Franklin Delano	NOT:	Franklin
Roosevelt	Delano Roosevelt
..... Carol	OR:	Carol Wilson-
Wilson-Story	Story

¶921

NOTE: If it is absolutely necessary, a person's name may be divided. Follow the same principles given for dividing ordinary words.

Eisenhower Spilane (see ¶923c) **BUT:** Spellman (see ¶923a)

e. *Names preceded by a short title* may be broken after the title or before the surname.

..... Mayor	OR: Mayor Harlan
Harlan Jefferson		Jefferson

f. *Names preceded by an abbreviated title* may be broken before the surname.

..... Dr. Ellen	NOT: Dr.
Davis		Ellen Davis

g. *Names preceded by long titles* may be broken between the title and the name (preferably) or between words in the title.

..... Assistant Commissioner	OR: Assistant
Roy N. Frawley		Commissioner Roy N. Frawley

h. *Names followed by an abbreviation or a number* may be broken before the surname or after the abbreviation or number.

..... Frank	NOT: Frank Castaneda
Castaneda Jr.		Jr.

i. *Names of departments* may be broken between words.

..... Human Bureau of
Resources Department	Public Safety

j. *A numbered or lettered enumeration* may be broken before (but not directly after) any number or letter.

..... these points: (1) All cards should	NOT: these points: (1) All cards should
---	------	---

k. *A sentence with a dash in it* may be broken after the dash. (See also ¶216e.)

..... Early next year— say, in March—let's	NOT: Early next year —say, in March—let's
---	------	---

l. *A sentence with ellipsis marks in it* may be broken after the ellipsis marks.

Tennis ... health spa ... golf ... and more.	NOT:	Tennis ... health spa ... golf ... and more.
---	------	---

m. *An expression with an ampersand in it* may be broken after the ampersand.

..... Abercombie &	NOT: Abercombie
Fitch		& Fitch

► For a guideline on dividing an expression with a slash in it, see ¶294c.

- n.** A Web site address (a URL) may be broken *after* the double slash (//) and *before* (never after) a dot (.), a single slash (/), a hyphen (-), an underscore (_), or any other mark of punctuation. Never insert a hyphen within a URL to signify an end-of-line break. Always try to avoid dividing a URL. (See ¶1510a for examples.)
- o.** An e-mail address may be broken *before* the at symbol (@) or before a dot (.). Never insert a hyphen within an e-mail address to signify an end-of-line break. Always try to avoid dividing an e-mail address. (See ¶1510b for examples.)

Guides to Correct Syllabication

922 Syllabication is generally based on pronunciation rather than on roots and derivations.

knowl- edge (**NOT:** know- ledge) chil- dren (**NOT:** child- ren) prod- uct (**NOT:** pro- duct)

Note how syllabication changes as pronunciation changes.

Verbs

pre- sent (to make a gift)
re- cord (to make an official copy)
pro- ject (to throw forward)

Nouns

pres- ent (a gift)
rec- ord (an official copy)
proj- ect (an undertaking)

923 **a.** If a word ends in double consonants *before* a suffix is added, you can safely divide *after* the double consonants (as long as the suffix creates an extra syllable).

sell- ers staff- ing bless- ing buzz- ers **BUT:** filled, stressed

b. If a final consonant of the base word is doubled *because* a suffix is added, you can safely divide *between* the double consonants if the suffix creates an extra syllable.

begin- ner omit- ted ship- ping refer- ral **BUT:** shipped, referred

c. When double consonants appear elsewhere *within* the base word (but not as the final consonants), you can safely divide between them.

bub- bling mid- dle strug- gle recom- mend sup- pose neces- sary
suc- cess dif- fer mil- lion con- nect cur- rent bet- ter

SECTION 10

Grammar

Subjects and Verbs (¶¶1001–1029)

- Basic Rule of Agreement (¶1001)
- Subjects Joined by *And* (¶1002)
- Subjects Joined by *Or* or Similar Connectives (¶¶1003–1005)
- Intervening Phrases and Clauses (¶¶1006–1007)
- One of . . .* (¶1008)
- Indefinite Pronouns Always Singular (¶¶1009–1011)
- Indefinite Pronouns Always Plural (¶1012)
- Indefinite Pronouns Singular or Plural (¶1013)
- Nouns Ending in *S* (¶¶1014–1016)
- Nouns Ending in *ICS* (¶1017)
- Nouns With Foreign Plurals (¶1018)
- Collective Nouns (¶1019)
- Organizational Names (¶1020)
- Geographic Names (¶1021)
- Names of Publications and Products (¶1022)
- The Number* and *A Number* (¶1023)
- Expressions of Time, Money, and Quantity (¶1024)
- Fractional Expressions (¶1025)
- Phrases and Clauses as Subjects (¶1026)
- Subjects in Inverted Sentences (¶¶1027–1028)
- Subjects and Predicate Complements (¶1029)

Verbs (¶¶1030–1048)

- Principal Parts (¶1030)
- Forming Verb Tenses (¶¶1031–1035)
- Passive Forms (¶¶1036–1037)
- Verbs Following Clauses of Necessity, Demand, Etc. (¶1038)
- Verbs Following *Wish* Clauses (¶1039)
- Verbs in *If* Clauses (¶¶1040–1041)
- Verbs in *As If* or *As Though* Clauses (¶¶1042–1043)
- Infinitives (¶¶1044–1046)
- Sequence of Tenses (¶1047)
- Omitting Parts of Verbs (¶1048)
- Troublesome Verbs

Pronouns (¶¶1049–1064)

- Agreement With Antecedents: Basic Rules (¶1049)
- Agreement With Common-Gender Antecedents (¶¶1050–1052)
- Agreement With Indefinite-Pronoun Antecedents (¶1053)
- Personal Pronouns (¶¶1054–1059)
 - Nominative Forms of Personal Pronouns (¶1054)
 - Objective Forms of Personal Pronouns (¶1055)
 - Possessive Forms of Personal Pronouns (¶1056)
- Compound Personal Pronouns (¶1060)
- Interrogative and Relative Pronouns (¶¶1061–1063)
 - Who* and *Whom*; *Whoever* and *Whomever* (¶1061)
 - Who*, *Which*, and *That* (¶1062)
 - Whose* and *Who's* (¶1063)
- Pronouns With *To Be* (¶1064)
- Troublesome Pronouns

Adjectives and Adverbs (¶¶1065–1073)

- Problems of Comparison (¶¶1071–1073)
- Troublesome Adjectives and Adverbs

Negatives (¶¶1074–1076)

Prepositions (¶¶1077–1080)

- Words Requiring Certain Prepositions (¶1077)
- Superfluous Prepositions (¶1078)
- Necessary Prepositions (¶1079)
- Prepositions at the End of Sentences (¶1080)
- Troublesome Prepositions

Sentence Structure (¶¶1081–1088)

- Parallel Structure (¶1081)
- Dangling Constructions (¶¶1082–1085)
- Misplaced Modifiers (¶¶1086–1087)
- Run-On Sentences (¶1088)

► For definitions of grammatical terms, see the appropriate entries in the *Glossary of Grammatical Terms* (Appendix A).

1001

Section 10 provides guidelines on how to make your sentences grammatically correct. But a sentence that is grammatically correct (for example, “He was thought to be she”) may still be a bad sentence—one that is stiff and awkward and possibly even a little pompous. A grammatically correct sentence may still not be “right”; that is, it may use language and a tone that are inappropriate for the situation.

Consider this story about a woman from out of town, taking a New York City taxi for the first time. When she gets to her destination, she places the exact amount shown on the meter—along with a tip—into the driver’s outstretched palm. The driver makes no comment but simply stares at the money in his hand. From his silence and his frozen body language, she realizes that he is unhappy about the size of the tip. Rather nervously, she asks, “Isn’t that correct?” He says, “It’s correct, lady, but it ain’t right.”

The driver’s response applies as much to good writing as it does to good tipping. Aim not only for sentences that are grammatically correct. Consider the person who will read what you are writing, and think about the effect you would like to have on your reader. Consider whether the situation calls for a formal approach or for something more colloquial. In short, aim for sentences that are not only correct but right for the occasion.

In any case, do not look to Robert Frost for a free pass on matters of grammar. It is true that he wrote, “You can be a little ungrammatical if you come from the right part of the country.” He did not specify which part of the country that was, so you’d better not assume that you live there.

Subjects and Verbs

Basic Rule of Agreement

1001 **a.** A verb must agree with its subject in number and person.

I am eager to start work. (First-person singular subject *I* with first person singular verb *am*.)

It seems odd that *Farmer has* not followed up on our last conversation. (Third-person singular subjects *it* and *Farmer* with third-person singular verbs *seems* and *has* not *followed up*.)

He is coming to stay with us for a week. (Third-person singular subject *he* with third-person singular verb *is coming*.)

She does intend to call you this week. (Third-person singular subject *she* with third-person singular verb *does intend*.)

We were delighted to read about your promotion. (First-person plural subject *we* with first-person plural verb *were*.)

They are convinced that the *Foys are* worth millions. (Third-person plural subjects *they* and *Foys* with third-person plural verbs *are convinced* and *are*.)

Your order for six laptop computers *was shipped* last Friday. (Third-person singular subject *order* with third-person singular verb *was shipped*.)

Our efforts to save the business *have been* unsuccessful. (Third-person plural subject *efforts* with third-person plural verb *have been*.)

NOTE: See the chart on pages 316–317, where the pattern of agreement between subject and verb is clearly laid out for the verbs *to see*, *to be*, and *to have*.

b. A plural verb is always required after *you*, even when *you* is singular, referring to only one person.

You alone have understood the full dimensions of the problem. (Second-person singular subject *you* with second-person plural verb *have understood*.)

You both have been a great help to us. (Second-person plural subject *you* with second-person plural verb *have been*.)

You do enjoy your work, don't you? (Second-person singular subject *you* with second-person plural verb *do enjoy*.)

- c. Although *s* or *es* added to a *noun* indicates the plural form, *s* or *es* added to a *verb* indicates the third-person singular. (See ¶1035.)

Singular

The price *seems* reasonable.
The tax *applies* to everyone.

Plural

The prices *seem* reasonable.
The taxes *apply* to everyone.

Subjects Joined by *And*

- 1002** a. If the subject consists of two or more words that are connected by *and* or by *both . . . and*, the subject is plural and requires a plural verb.

Ms. Rizzo and Mr. Bruce have received promotions.

Both the *collection* and the *delivery* of mail are to be curtailed as of July 1. (The repetition of *the* with the second subject emphasizes that two different items are meant.)

The *general managers* and the *controllers* are attending a three-day meeting in Chicago.

The *director of marketing* and the *product managers* are now reviewing the advertising budgets.

The *sales projections* and the *cost estimate* do not have to be revised.

- b. Use a singular verb when two or more subjects connected by *and* refer to the same person or thing. (See also ¶1028a, fourth example.)

Our secretary and treasurer is Frances Eisenberg. (One person.)

Corned beef and cabbage was his favorite dish. (One dish.)

Wear and tear has to be expected when you're in the rental business. (One type of damage.)

- c. Use a singular verb when two or more subjects connected by *and* are preceded by *each*, *every*, *many a*, or *many an*. (See also ¶1009b.)

Every computer, printer, and fax machine is marked for reduction.

Many a woman and man has responded to our plea for contributions.

Subjects Joined by *Or* or Similar Connectives

- 1003** If the subject consists of two or more *singular* words that are connected by *or*, *either . . . or*, *neither . . . nor*, or *not only . . . but also*, the subject is singular and requires a singular verb.

Either *July or August is* a good time for the sales conference.

Neither the *Credit Department* nor the *Accounting Department has* the file.

Not only a cost-profit *analysis* but also a marketing *plan needs* to be developed.

NOTE: Traditionally, *either . . . or* and *neither . . . nor* have been used to connect only two items. It is now acceptable, however, to use them to connect more than two items.

Neither the *general manager* nor the *divisional controller* nor the *marketing director has* the authority to engage the services of a management consultant without higher-level approval.

► See ¶1013c for the treatment of one or more as the subject of a sentence.

¶1004

1004 If the subject consists of two or more *plural* words that are connected by *or*, *either . . . or*, *neither . . . nor*, or *not only . . . but also*, the subject is plural and requires a plural verb.

Neither the *regional managers* nor the *salesclerks* have the data you want.

Not only the *dealers* but also the *retailers* are unhappy about our new policy.

1005 If the subject is made up of both singular and plural words connected by *or*, *either . . . or*, *neither . . . nor*, or *not only . . . but also*, the verb agrees with the nearer part of the subject. Since sentences with singular and plural subjects usually sound better with plural verbs, try to locate the plural subject closer to the verb whenever this can be done without sacrificing the emphasis desired.

Either *Miss Hertig* or her *assistants* have copies of the new catalog. (The verb *have* agrees with the nearer subject, *assistants*.)

Neither the *buyers* nor the *sales manager* is in favor of the system. (The verb *is* agrees with the nearer subject, *sales manager*.)

BETTER: Neither the *sales manager* nor the *buyers* are in favor of the system. (The sentence reads better with the plural verb *are*. The subjects *sales manager* and *buyers* have been rearranged without changing the emphasis.)

Not only the *teachers* but also the *superintendent* is in favor of the plan. (The verb *is* agrees with the nearer subject, *superintendent*. With the use of *not only . . . but also*, the emphasis falls on the subject following *but also*.)

Not only the *superintendent* but also the *teachers* are in favor of the plan. (When the sentence is rearranged, the nearer subject, *teachers*, requires the plural verb *are*. However, the emphasis has now changed.)

Not only my *colleagues* but I am in favor of the plan. (The first-person verb *am* agrees with the nearer subject, *I*. Rearranging this sentence will change the emphasis.)

Neither the *board* nor the *CEO* nor the *stockholders* were in favor of the buyout offer. (The verb *were* agrees with the nearest subject, *stockholders*.)

NOTE: When the subjects reflect different grammatical persons (first, second, or third), the verb should agree in person as well as number with the nearer subject. If the result seems awkward, reword as necessary.

ACCEPTABLE: Neither you nor I am in a position to pay Ben's legal fees.

BETTER: Neither one of us is in a position to pay Ben's legal fees. (See ¶1009a.)

ACCEPTABLE: Neither you nor she has the time to take on the Fuller case.

ACCEPTABLE: Neither she nor you have the time to take on the Fuller case.

BETTER: She and you are each too busy to take on the Fuller case. (See ¶1009c.)

AWKWARD: If you or Gary is coming to the convention, please visit our booth.

BETTER: If Gary or you are coming to the convention, please visit our booth.

► For *neither . . . nor* constructions following there is, there are, there was, or there were, see the last four examples in ¶1028a; for examples of subject-verb-pronoun agreement in these constructions, see ¶1049c.

Intervening Phrases and Clauses

- 1006** a. When establishing agreement between subject and verb, disregard intervening phrases and clauses.

The *purchase order* for new notebooks has not been found. (Disregard *for new notebooks*. The subject, *purchase order*, is singular and takes the singular verb *has not been found*.)

The *prices* shown in our catalog do not include sales tax.

Only *one* of the items that I ordered has been delivered. (See also ¶1008a.)

Her *experience* with banks and brokerage houses gives her excellent qualifications for the position.

Several *phases* of our order processing system are out of sync.

One in seven families in this country uses a digital camera.

“Dividends, Not Growth, Are the Wave of the Future” (headline in *The Wall Street Journal*)

A key *factor*, the company’s assets, is not being given sufficient weight in the analysis. (The subject *factor*, not the intervening appositive, determines that the verb should be singular in this case.)

BUT: The company’s *assets*, a key factor, are not being given sufficient weight in the analysis.

NOTE: When certain indefinite pronouns (*all, none, any, some, more, most*) and certain fractional expressions (for example, *one-half of, a part of, a percentage of*) are used as subjects, you may have to look at an intervening phrase or clause to determine whether the verb should be singular or plural. See ¶¶1013 and 1025 for examples.

- b. When a sentence has both a positive and a negative subject, make the verb agree with the positive subject. Set off the negative subject with commas unless it is preceded by *and* or *but*.

Profit and not *sales* is the thing to keep your eye on. (The verb *is* agrees with the positive subject *profit*.)

The *design* of the container, not the contents, determines what the consumer’s initial reaction to the product will be.

The *members* of the Executive Committee and not the president wield the real power in the corporation.

It is not the president but the *members* of the Executive Committee who wield the real power in this corporation. (In the main clause the verb *is* agrees with the subject *it*; the verb *wield* in the *who* clause is plural to agree with the antecedent of *who*, the positive subject *members*. See ¶1062d.)

BUT: It is the *president* and not the *members* of the Executive Committee who wields the real power in this corporation. (In this sentence the positive subject is *president*, a singular noun; therefore, the verb *wields* in the *who* clause must also be singular.)

- 1007** The number of the verb is not affected by the insertion between subject and verb of phrases beginning with such expressions as:

along with

as well as

plus

except

together with

in addition to

besides

rather than

and not (see ¶1006b)

accompanied by

including

not even

Continued on page 300

¶1008

If the subject is singular, use a singular verb; if the subject is plural, use a plural verb.

This *study*, along with many earlier reports, shows that the disease can be arrested if detected in time.

Mr. and Mrs. Swenson, together with their son and daughters, are going to New Mexico.

No one, not even the executive vice presidents, knows whether the CEO plans to resign. (See ¶1010.)

The *director* of finance, not the divisional controllers, is authorized to approve unbudgeted expenditures over \$5000. (See ¶1006b.)

Your *participation* in our meetings as well as your financial support is greatly *appreciated*. (If you feel a grammatically correct sentence like this one seems awkward, simply change as well as to and and make the verb plural.)

NOTE: When the construction of a sentence like those above requires a singular verb but a plural verb would sound more natural, reword the sentence to create a plural subject.

CORRECT: The national sales *report*, along with the regional breakdowns you specifically requested plus the individual performance printouts, was sent to you last week.

BETTER: The national sales *report*, the regional *breakdowns* you specifically requested, and the individual performance *printouts* were sent to you last week. (The three subjects joined by *and-report*, *breakdowns*, and *printouts*—call for a plural verb.)

One of . . .

- 1008 a.** Use a singular verb after a phrase beginning with *one of* or *one of the*; the singular verb agrees with the subject *one*. (Disregard any plural that follows *of* or *of the*.)

One of my backup drives has been stolen.

One of the reasons for so many absences is poor motivation.

One of us has to take over the responsibility for in-service training.

One of you is to be nominated for the office.

One of the interviewers is going to call you early next week.

- b.** The phrases *one of those who* and *one of the things that* are followed by plural verbs because the verbs refer to *those* or *things* (rather than to *one*).

She is one of those who favor increasing the staff. (In other words, of *those* who *favor* increasing the staff, she is one. *Favor* is plural to agree with *those*.)

He is one of our employees who are never late. (Of our *employees* who *are* never late, he is one.)

I ordered one of the new copiers that were advertised in Monday's paper. (Of the new *copiers* that *were advertised* in Monday's paper, I ordered one.)

You are one of those rare individuals who are always honest with themselves. (Of those rare *individuals* who *are* always honest with *themselves*, you are one.)

Tyson is one of the best programmers who have ever come along. (Of the best *programmers* who *have ever come* along, Tyson is one.)

One in four who have tried this medication has reported serious side effects. (This sentence is grammatically correct but awkward.)

BETTER: *Of those who have tried this medication, one in four has reported serious side effects.*

1010

- c. When the words *the only* precede such phrases, the meaning is singular and a singular verb is required. Note that both words, *the* and *only*, are required to produce a singular meaning.

John is *the only one* of the staff members who *is going* to be transferred. (Of the staff members, John is *the only one* who *is going* to be transferred. Here the singular verb *is going* is required to agree with *one*.)

BUT: John is only one of the *staff members* who *are going* to be transferred. (Of the *staff members* who *are going* to be transferred, John is only one.)

Indefinite Pronouns Always Singular

- 1009** a. The words *each*, *every*, *either*, *neither*, *one*, *another*, and *much* are always singular. When they are used as subjects or as adjectives modifying subjects, a singular verb is required.

Each has a clear-cut set of responsibilities.

Each employee was informed of the new policy well in advance.

One shipment was sent yesterday; *another is* to leave the warehouse tomorrow morning.

Neither one of the applicants *is* eligible.

OR: *Neither applicant is* eligible.

Much remains to be done on the Belgravia project.

OR: *Much work remains* to be done on the Belgravia project.

► *For the use of either . . . or and neither . . . nor, see §§1003–1005.*

- b. When *each*, *every*, *many a*, or *many an* precedes two or more subjects joined by *and*, the verb should be singular.

Every customer and supplier has been notified.

Many a liberal and conservative has raised objections to that proposal.

► *See §1002c for other examples.*

- c. When *each* follows a plural subject, keep the verb plural. In that position, *each* has no effect on the number of the verb. To test the correctness of such sentences, mentally omit *each*.

The *members each feel* their responsibility.

They each have high expectations.

Twelve each of these items are required.

- 1010** The following compound pronouns are always singular and require a singular verb:

anybody

everybody

somebody

nobody

anything

everything

something

nothing

anyone

everyone

someone

no one

OR: any one

OR: every one

OR: some one

Was anybody monitoring actual costs against the budget?

Everyone is required to register in order to vote.

Something tells me I'm wrong.

No one could explain why the project was so far behind schedule.

Continued on page 302

1011

NOTE: Spell *anyone*, *everyone*, and *someone* as two words when these pronouns are followed by an *of* phrase or are used to mean “one of a number of things.”

Every one of us [each person in the group] likes to be appreciated.

BUT: *Everyone* [everybody] likes to be appreciated.

I think that *any one* of these designs [each of them] creates a warm, inviting impression.

BUT: I think that *anyone* [anybody] who sees these designs will find them warm and inviting.

- 1011** Use a singular verb when two compound pronouns joined by *and* are used as subjects.

Anyone and *everyone* is entitled to a fair hearing.

Nobody and *nothing* is going to stop me.

Indefinite Pronouns Always Plural

- 1012** The words *both*, *few*, *many*, *others*, and *several* are always plural. When they are used as subjects or as adjectives modifying subjects, a plural verb is required.

Several members were invited; the *others* were overlooked.

Both books are out of print.

Many were asked but *few* were able to answer.

Indefinite Pronouns Singular or Plural

- 1013** a. *All*, *none*, *any*, *some*, *more*, and *most* may be singular or plural, depending on the noun that they refer to. (The noun often occurs in an *of* phrase that follows.)

All of the manuscript has been finished.

All of the reports have been handed in.

Is there *any* (money) left?

Are there *any* (bills) still to be paid?

Do *any* of you know John Ferguson well? (*Any* is plural because it refers to the plural *you*; hence the plural verb *do know*.)

Does *any one* of you know John Ferguson well? (*Any* is singular because it refers to the singular *one*; hence the singular verb *does know*.)

Some of the software seems too high-priced.

Some of the videotapes seem too high-priced.

Some was acceptable. (Meaning some of the manuscript.)

Some were acceptable. (Meaning some of the reports.)

More of these computer stands are due.

Most of the stock has been sold.

More than one customer has complained about that item. (*More* refers to the singular noun *customer*; hence the singular verb *has complained*.)

More than five customers have complained... (*More* refers to the plural noun *customers*; hence the plural verb *have complained*.)

- b. In formal usage, *none* is still considered a singular pronoun. In general usage, however, *none* is considered singular or plural, depending on the number of the noun to which it refers. *No one* or *not one* is often used in place of *none* to stress the singular idea.

None of the merchandise was stolen.

None of the packages were properly wrapped.

None were injured. (Meaning none of the passengers.)

Not one of the associates has a good word to say about the managing partner.

- c. When *one or more* is the subject or is used to modify the subject, the verb should be plural.

One or *more* of our *clients* *have* to be reminded of the deadline. (*More* refers to the plural noun *clients*; hence the plural verb *have*.)

One or *more* *pages* in the report *need* to be updated.

- d. The relative pronouns *who*, *which*, and *that* (like the indefinite pronouns discussed in ¶1013a) may be singular or plural, depending on the noun they refer to. (See ¶1062d.)

Nouns Ending in S

- 1014** Some nouns appear to be plural but are actually singular. When used as subjects, these nouns require singular verbs.

news (*no plural*) lens (*plural*: lenses) measles (*no plural*) summons (*plural*: summonses)

The *news* from overseas *is* very discouraging. The *lens* *has* to be reground.

- 1015** A number of nouns are always considered plural, even though they each refer to a single thing. As subjects, they require plural verbs.

assets	dues	grounds	proceeds	savings
belongings	earnings	odds	quarters	thanks
credentials	goods	premises	riches	whereabouts
The <i>premises</i> <i>are</i> now available for inspection.			My <i>earnings</i> this year <i>have</i> not <i>gone</i> up.	

NOTE: The following nouns are considered plural: *glasses*, *scissors*, *pliers*, *pants*, and *trousers*. However, when they are preceded by the phrase *pair of*, the entire expression is considered singular.

These *scissors* *need* sharpening.

BUT: This *pair of scissors* *needs* sharpening.

- 1016** A few nouns (not all of which end in *s*) have the same form in the plural as in the singular. When used as subjects, these nouns take singular or plural verbs according to the meaning.

series	means	chassis	headquarters	deer
species	gross	corps	sheep	moose

The *series* of concerts planned for the spring *looks* very exciting. (One series.)

Three *series* of tickets *are going* to be issued. (Three series.)

One *means* of breaking the impasse *is* to offer more money.

Other *means* of solving the problem *have* not *come* to mind.

Her *means* [her financial resources] *are* not sufficient to justify her current level of spending.

Headquarters *is* not pleased with the performance of the Northeastern Region. (Referring to top management or central authority.)

The Pesco Corporation *headquarters* *are located* at the intersection of Routes 80 and 287. (Referring to the offices of top management.)

¶1017**Nouns Ending in *ICS***

1017 Many nouns ending in *ics* (such as *acoustics*, *economics*, *ethics*, *politics*, and *statistics*) take singular or plural verbs, depending on how they are used. When they refer to a body of knowledge or a course of study, they are *singular*. When they refer to qualities or activities, they are *plural*.

Economics [a course of study] *is* a prerequisite for advanced business courses.

The *economics* [the economic aspects] of his plan *are* not very sound.

Statistics *is* the one course I almost failed.

The *statistics* *indicate* that the market for this product line is shrinking.

Acoustics *was* not *listed* in last year's course offerings.

The *acoustics* in the new concert hall *are* remarkably good.

Ethics *is* a subject that ought to be part of the M.B.A. curriculum.

Frank's *ethics* *have* always *met* the highest standards.

As Tip O'Neill liked to say, "All *politics* *is* local."

Farnsworth's *politics* *are dictated* by the results of the latest poll.

Nouns With Foreign Plurals

1018 a. Watch for nouns with foreign-plural endings (see ¶614). Such plural nouns, when used as subjects, require plural verbs.

No *criteria* *have been established*.

BUT: No *criterion has been established*.

Parentheses are required around such references.

BUT: The closing *parenthesis was omitted*.

NOTE: Nouns such as *cognoscenti*, *digerati*, *graffiti*, and *literati* have foreign-plural endings and require plural verbs when they are used as subjects.

b. The noun *data*, which is plural in form, is commonly followed by a plural verb in technical and scientific usage. In general usage, *data* in the sense of "information" is followed by a singular verb; in the sense of "distinct bits of information," it is followed by a plural verb.

The *data* obtained after two months of experimentation *is* now *being analyzed*. (Here *data* means "information.")

BUT: The *data* assembled by six researchers *are* now *being compared*. (Here *data* refers to several distinct bits of information.)

c. The noun *media* is the plural form of *medium* when that word refers to various forms of mass communication, such as the press, radio, and television.

The *media* through which we reach our clients *are* quality magazines and radio broadcasts.

BUT: The *medium* we find most effective *is* television.

NOTE: *Media* has acquired an acceptable singular meaning when it refers to reporters, journalists, and broadcasters acting in concert. However, treat *media* as a plural when these practitioners are not acting as a unified group.

The *media has given* so much publicity to the claims against the defendant that a fair trial may not be possible.

BUT: The *media have approached* the Bergamot case from a wide range of perspectives.

Collective Nouns

1019 The following rules govern the form of verb to be used when the subject is a collective noun. (A *collective noun* is a word that is singular in form but represents a group of persons, animals, or things; for example, *army, audience, board, cabinet, class, committee, company, corporation, council, department, faculty, firm, group, jury, majority, minority, organization, public, school, society, staff*.)

- a. If the group is acting as a unit, use the singular form of the verb.

The *Board of Directors* meets Friday. The *firm* is one of the oldest in the field.

The *committee* has agreed to submit *its* report on Monday. (The pronoun *its* is also singular to agree with *committee*.)

My *staff* has compiled a set of recommendations for a reorganization.

- b. If the members of the group are acting separately, use a plural verb.

A *group* of researchers are coming from all over the world for the symposium next month. (The members of the group are acting separately in coming together from all over the world.)

BUT: A *group* of researchers is meeting in Geneva next month. (The members of the group are acting as a unit in the process of meeting.)

NOTE: The use of a collective noun with a plural verb often produces an awkward sentence. Whenever possible, recast the sentence by inserting a phrase like *the members of* before the collective noun.

AWKWARD: The *committee* are not in agreement on the action *they* should take. (The verb *are* and the pronoun *they* are plural to agree with the plural *committee*.)

BETTER: The *members* of the committee are not in agreement . . .

- c. In a number of constructions, the choice of a singular or plural verb often depends on whether you wish to emphasize the group as a unit or as a collection of individuals. However, once the choice has been made, treat the collective noun consistently within the same context. If the resulting sentence sounds awkward, recast it as necessary.

I hope your *family* is well. (Emphasizes the family as a whole.)

OR: I hope your *family* are all well. (Emphasizes the individuals in the family.)

SMOOTHER: I hope all the *members* of your *family* are well.

OR: I hope *everyone* in your *family* is well.

- d. References to a married couple can pose problems. When referring to the two people in the context of their wedding, treat *couple* as plural since they are individuals entering into a marriage.

The *couple* were married last Saturday.

After the wedding, when the two people are acting as a unit, treat *couple* as singular.

That *couple* has been married for more than twenty years.

Each *couple* has volunteered to participate in the literacy campaign.

Occasionally, it makes sense to treat *couple* as plural, even though the two people are acting as a unit.

The *couple* have moved into their new house. (More idiomatic than: The *couple* has moved into its new house.)

¶1020

If you are uncertain how to proceed in a specific case, replace the word *couple* with the actual names. Then the subject will be clearly plural.

The *Goodwins have moved* into their new house.

OR: *Bob and Pauline have moved* into their new house.

- e.** The expression *a couple of* is usually plural in meaning.

A couple of customers have already reported the error in our ad.

A couple of orders have been shipped to the wrong address.

BUT: *A couple of days is* all I need to complete the report. (When the phrase refers to a period of time, an amount of money, or a quantity that represents a total amount, treat the phrase as singular. See also ¶1024.)

Organizational Names

- 1020 a.** Organizational names may be treated as either singular or plural. Ordinarily, treat the name as singular unless you wish to emphasize the individuals who make up the organization; in that case, use the plural. Once a choice has been made, use the singular or plural form consistently within the same context.

Brooks & Rice has lost its lease. It is now looking for a new location.

OR: *Brooks & Rice have lost their lease. They are now looking* for . . .

(BUT NOT: *Brooks & Rice has lost its lease. They are now looking* for . . .)

The Boston Red Sox are having a great season this year. (Team names take plural verbs.)

NOTE: If the organization is referred to as *they* or *who*, use a plural verb with the company name. If the organization is referred to as *it* or *which*, use a singular verb. (See also ¶1049a, note.)

- b.** When the subject of a sentence is an abbreviation of an organizational name, treat the abbreviation as singular.

MADD (Mothers Against Drunk Driving) *is* a nonprofit organization that has addressed underage drinking since it was established in 1980.

Geographic Names

- 1021** When a geographic name such as the *United States* or the *Virgin Islands* is used as a subject, use a singular verb if the name represents a single entity; use a plural verb if the individual states or islands are referred to as separate entities.

The Netherlands is the first stop on my itinerary.

The United Nations has sent a special task force to study the problem.

The Philippines was the host of last year's conference on globalization.

The U.S. Virgin Islands consists of three large islands (St. John, St. Croix, and St. Thomas) and about fifty smaller islands.

BUT: *The U.S. Virgin Islands are* among the most beautiful in the world.

The United States has undertaken a new foreign aid program.

BUT: *These United States are bound* together by a common heritage of political and religious liberty.

Names of Publications and Products

- 1022** The name of a publication or product is considered singular, even though it may be plural in form.

Computers in Medicine is an online newsletter that you should consider if you want to market your software to doctors.

Consumer Reports is publishing an update on automobile insurance costs.

Womanwords by Jane Mills discusses how language reflects women's role in society and actively creates that role.

Miss Thistlebottom's Hobgoblins by Theodore M. Bernstein deals forcefully with the "taboos, bugbears, and outmoded rules of English usage."

The Number and A Number

1023 The expression *the number* has a singular meaning and therefore requires a singular verb. *A number* has a plural meaning and requires a plural verb.

The number of branch offices we have in the Southeast has increased in each of the last five years.

A number of our branch offices are now located in suburban malls rather than in the central business district.

You're likely to be shocked by the number of corrections that has?/have? to be made in this season's catalog. (Does the verb in the *that* clause have to be singular to agree with *the number* or plural to agree with *corrections*?)

CORRECT: You're likely to be shocked by the number of corrections that has to be made in this season's catalog. (It is the number of corrections, not the corrections themselves, that causes the shock.)

BETTER: You're likely to be shocked by how many corrections have to be made in this season's catalog. (Simply reword the sentence to avoid the problem.)

Expressions of Time, Money, and Quantity

1024 When subjects expressing periods of time, amounts of money, or quantities represent *a total amount*, use singular verbs. When these subjects represent *a number of individual units*, use plural verbs.

Three months is too long a time to wait.

BUT: *Three months* have passed since we last spoke.

That \$10,000 was an inheritance from my uncle.

BUT: *Thousands of dollars* have already been spent on the project.

Ten acres is considered a small piece of property in this area.

BUT: *Ten acres* were plowed last spring.

A total of 52 orders is not a very good response rate to a full-page ad.

BUT: *A total of 52 callers* have placed an order in response to our ad.

A psychotic is convinced that *2 and 2 equals* 5, whereas a neurotic recognizes that *2 plus 2 is* 4 but can't stand it.

Less than \$1 million was budgeted for the restoration of City Hall. (For a usage note on *fewer-less*, see page 379.)

Fractional Expressions

1025 When the subject is an expression such as *one-half of*, *two-thirds of*, *a part of*, *a majority of*, *a percentage of*, *a portion of*, or *the rest of*:

- a. Use a *singular verb* if a *singular noun* follows *of* or is implied.

Three-fourths of the mailing list has been checked.

Part of our Norfolk operation is being closed down.

Continued on page 308

¶1026

A *majority* of 2000 *signifies* a landslide in this town. (The noun 2000 is considered singular because it is a total amount; see ¶1024. For a usage note on *majority*, see page 390.)

A large *percentage* *has* to be retyped. (Referring to a manuscript.)

About 20 percent of the *production run* *was* unacceptable.

- b.** Use a *plural verb* when a *plural noun* follows *of* or is implied.

Two-thirds of our *customers* *live* in the suburbs.

Part of the *walls* *are* to be papered.

About 20 percent of the *applicants* *have* Ph.D.s.

A large *percentage* of the *students* *hold* part-time jobs.

BUT: *The percentage* of students who hold part-time jobs *is* quite large. (When *percentage* is used as a subject and is preceded by *the*, use a singular verb.)

A majority of our *employees* *have contributed* to the United Way fund drive.

BUT: *A majority* of only 90 *votes* *is* not exactly a ringing endorsement of our candidate. (Sometimes the context requires a singular verb.)

- For constructions involving the number *and* a number, see ¶1023.

- c.** Consider the word *half* as a condensed version of *one-half of*.

Over *half* the *staff* *have signed up* for the additional benefits. (In this case *half the staff* is plural in meaning; the *staff* members are signing up as individuals and not as a group. See ¶1019b.)

- d.** When *handful* is the subject of a sentence and is followed by *of* and a plural noun, use a plural verb.

Only a *handful* of *residents* *have objected* to the new ordinance.

Phrases and Clauses as Subjects

1026 a. When a phrase or clause serves as the subject, the verb should be singular.

Reading e-mail *is* the first thing I do in the morning.

That they will accept the offer *is* far from certain.

Whatever sales brochure they mail me *goes* directly into the circular file.

According to Bill Cosby, *whether the glass is half full or half empty* *depends* on whether you're pouring or drinking.

- b.** Clauses beginning with *what* may be singular or plural, according to the meaning.

What we need *is* a new statement of policy. (The *what* clause refers to *statement*; hence the verb is singular.)

What we need *are* some *guidelines* on personal time off. (Here the *what* clause refers to *guidelines*; hence the verb is plural.)

NOTE: When clauses beginning with *what* appear in the predicate, they may also be accompanied by singular or plural verbs, depending on their meaning.

Conflicting *points of view* *are* what *make* a conference exciting and instructive. (Here *what* stands for "those things that"—namely, *points of view*. For that reason, the verb in the *what* clause should be plural—*make*.)

BUT: *Recruiting panelists with conflicting points of view* *is* what *makes* a conference exciting and instructive. (Here *what* stands for "the thing that"—namely, the noun clause that serves as the singular subject of the sentence: *Recruiting panelists with conflicting points of view*. For that reason, the verb in the *what* clause should be singular—*makes*.)

Subjects in Inverted Sentences

1027 a. Whenever the verb precedes the subject, make sure they agree.

Attached is a swatch of the fabric I'd like to order.

Attached are two copies of the January mailing piece.

Enclosed is a copy of the consultant's recommendations for boosting profits.

Also enclosed are my comments on his suggested plan of action.

Where is [OR: Where's] this strategy going to take us?

Where are the reviews of the Kelly book?

(NOT: Where is [OR: Where's] the reviews of the Kelly book?)

What is missing from the report is the rationale for the decision.

What appear to be problems are often opportunities.

What were your reasons for resigning?

Should a position become available, we will let you know. (In this case the helping verb should precedes the subject. If written in normal word order, this sentence would read: If a position should become available . . .)

b. When the verb is followed by two subjects joined by *and*, the verb should be plural. However, if the resulting sentence sounds awkward, reword as necessary.

AWKWARD: Where are the address and phone number for this customer?

BETTER: Where can I find the address and phone number for this customer?

(BUT NOT: Where is [OR: Where's] the address and phone number for this customer?)

AWKWARD: Why are consumer spending up and retail sales down?

BETTER: Why are retail sales down and consumer spending up?

OR: Why are retail sales down when consumer spending is up?

c. In sentences phrased as questions, the words that precede the verb may not be the subject. If necessary, mentally rearrange the words to convert the question to a statement and then the subject will become obvious.

Which books is?/are the Omega Bookstore going to buy back?

The Omega Bookstore is going to buy back which books?

CORRECT: Which books is the Omega Bookstore going to buy back?

Sometimes the correct version (like the one above) will sound awkward. In that case, rewrite the sentence to avoid the problem altogether.

Which books will the Omega Bookstore buy back?

1028 a. In a sentence beginning with *there is*, *there are*, *here is*, *here are*, or a similar construction, the real subject follows the verb. Use *is* when the real subject is singular, *are* when it is plural.

There is a vast *difference* between the two plans.

There are a great many *angles* to this problem.

Here are two *catalogs* and an *order blank*. (See ¶¶1002a, 1028b.)

Here is an old *friend* and former *partner* of mine. (The subject, *friend* and *partner*, is singular because only one person is referred to. See ¶1002b.)

There is many an *investor* who regrets having invested in such high-risk stocks. (See ¶1002c.)

There is a *branch office* or an *agency* representing us in every major city in the country. (See ¶1003.)

Continued on page 310

¶1029

There *is* not only a 5 percent *state tax* but also a 2.5 percent *city tax*. (See ¶1003.)

There *is* the *cost* of your own time in addition to the substantial outlay for materials that must be figured in. (See ¶1007.)

There *are a number* of problems to be resolved. (See also ¶1023.)

Here *is the number* of orders received since Monday.

Here *is ten dollars* as a contribution. (See also ¶1024.)

Here *are ten silver dollars* for your collection.

There *is a lot* [singular] that we can still do.

There *are a lot of people* [plural] watching what we do.

There *is* neither a *hospital* nor a *clinic* on the island. (See ¶1003 for two singular subjects joined by *neither . . . nor*.)

There *are* neither *motel rooms* nor *condos* available for rent this late in the season. (See ¶1004 for two plural subjects joined by *neither . . . nor*.)

There *were* neither *tennis courts* nor a *swimming pool* in the hotel where we finally found a room. (*Were* agrees with the nearer subject, *tennis courts*. See also ¶1005 for singular and plural subjects joined by *neither . . . nor*.)

There *was* neither *central air conditioning* nor *fans* for any of the rooms in the hotel. (*Was* agrees with the nearer subject, *air conditioning*. See also ¶1005.)

NOTE: Do not use *there is* or *there's* when the context calls for *there are* or *there're*.

There's [There *is*] *more* than one *way* to solve the problem. (See ¶1013a.)

There're [There *are*] *more* than six *candidates* running for mayor. (See ¶1056e.)

(NOT: There's *more* than six *candidates* running for mayor.)

- b.** When the subject consists of two or more singular nouns—or several nouns, the first of which is singular—*there is* or *here is* usually sounds more idiomatic (despite the fact that the subject is plural) than *there are* or *here are*. If you do not feel comfortable with this idiomatic construction, change the wording as necessary.

In the higher-priced model there *is* a more powerful *processor*, a 22-inch *display*, and a 1-TB *hard drive*. (In this construction, *there is* is understood to be repeated before the second and third subjects.)

OR: In the higher-priced model there *are* the following *features*: a more powerful *processor*, a 22-inch *display*, and a 1-TB *hard drive*. (In this version *are* agrees with the plural subject *features*; the three subjects in the sentence above are now simply appositives modifying *features*.)

Within a mile of the airport there *is* a full-service *hotel* and three *motels*.

OR: Within a mile of the airport there *is* a full-service *hotel plus* [**OR:** *in addition to* **OR:** *as well as*] three *motels*. (By changing the connective from *and* to *plus* or something similar, you are left with a singular subject, *hotel*, that calls for the singular verb *is*.)

OR: Within a mile of the airport there *are* three *motels* and a full-service *hotel*. (When the first subject in the series is plural, the verb *are* not only is grammatically correct but also sounds more natural.)

Subjects and Predicate Complements

- 1029 a.** Sentences containing a linking verb (such as *become* or some form of *to be*) sometimes have a plural subject and a singular complement or a singular subject and

a plural complement. In such cases make sure that the verb agrees with the *subject* (and not with the complement).

Bicycles are the only product we make. The key *issue is* higher wages.

One of the things we have to keep track of *is* entertainment expenses. (Use *is* to agree with *one*, the subject.)

It is they who are at fault. (Use *is* to agree with *it*, the subject.)

NOTE: Do not confuse the last two examples with the *inverted* sentences shown in ¶1028. In a sentence beginning with *here is* or *there is*, the subject *follows* the linking verb. In a sentence beginning with *it is* or *one . . . is*, the subject *precedes* the linking verb.

- b.** If sentences of this type seem awkward, do not hesitate to rewrite them.

We *make* only one product: bicycles. Higher wages *are* the key issue.

Verbs

This section deals with the correct use of verb tenses and other verb forms. For the rules on agreement of verbs with subjects, see ¶¶1001–1029.

Principal Parts

1030 The principal parts of a verb are the four simple forms upon which all tenses and other modifications of the verb are based.

- a.** For most verbs, form the past and the past participle simply by adding *d* or *ed* to the present; form the present participle by adding *ing* to the present. (Some verbs require a minor change in the ending of the present form before *ed* or *ing* is added.)

Present	Past	Past Participle	Present Participle
fax	faxed	faxed	faxing
ski	skied	skied	skiing
drop	dropped	dropped	dropping
occur	occurred	occurred	occurring
offer	offered	offered	offering
sneak	sneaked	sneaked	sneaking
fill	filled	filled	filling
warm	warmed	warmed	warming
issue	issued	issued	issuing
dive	dived	dived	diving
die	died	died	dying
try	tried	tried	trying
obey	obeyed	obeyed	obeying
panic	panicked	panicked	panicking

1030

- b.** Many verbs have principal parts that are irregularly formed. The following list presents the ones most commonly used, beginning with the most irregular of all—*to be*.

Present	Past	Past Participle	Present Participle	
am, is, are	was, were	been	being	(see pages 316–317)
become	became	become	becoming	
begin	began	begun	beginning	(see ¶1032b, d, e)
break	broke	broken	breaking	(see ¶1033d)
bring	brought	brought	bringing	(see ¶1032b, d, e)
buy	bought	bought	buying	
catch	caught	caught	catching	
choose	chose	chosen	choosing	
come	came	come	coming	
cost	cost	cost	costing	
deal	dealt	dealt	dealing	
do	did	done	doing	(see ¶1032b, d, e)
draw	drew	drawn	drawing	
drink	drank	drunk	drinking	(see ¶1032b, d, e)
drive	drove	driven	driving	
eat	ate	eaten	eating	
fall	fell	fallen	falling	
feel	felt	felt	feeling	
find	found	found	finding	
fly	flew	flown	flying	
forbid	forbade	forbidden	forbidding	
forget	forgot	forgotten OR: forgot	forgetting	
forgive	forgave	forgiven	forgiving	
get	got	gotten	getting	
give	gave	given	giving	
go	went	gone	going	
grow	grew	grown	growing	
hang (suspend)	hung	hung	hanging	
hang (execute)	hanged	hanged	hanging	
hold	held	held	holding	
keep	kept	kept	keeping	
know	knew	known	knowing	
lay (place)	laid	laid	laying	(see page 387)
lie (recline)	lay	lain	lying	(see page 387)
lend	lent	lent	lending	
make	made	made	making	
mean	meant	meant	meaning	
pay	paid	paid	paying	
prove	proved	proved OR: proven	proving	
ring	rang	rung	ringing	
rise	rose	risen	rising	(see ¶1033d)
say	said	said	saying	
see	saw	seen	seeing	(see ¶1032b, d, e)

1032

Present	Past	Past Participle	Present Participle	
sell	sold	sold	selling	
send	sent	sent	sending	
set	set	set	setting	(see pages 397–398)
shrink	shrank	shrunk	shrinking	(see ¶¶1032b, d, e 1033d)
sit	sat	sat	sitting	(see pages 397–398)
speak	spoke	spoken	speaking	
spring	sprang	sprung	springing	
swim	swam	swum	swimming	
swing	swung	swung	swinging	
take	took	taken	taking	
teach	taught	taught	teaching	
tell	told	told	telling	
think	thought	thought	thinking	
throw	threw	thrown	throwing	
understand	understood	understood	understanding	
wear	wore	worn	wearing	(see ¶1033d)
write	wrote	written	writing	

NOTE: Dictionaries typically show the principal parts for all *irregular* verbs. If you are in doubt about any form, consult your dictionary. If the principal parts are not shown, the verb is regular. (See ¶1030a.)

► For the formation of principal parts of verbs ending in *c* (for example, *to picnic*, *to spec*), see ¶717.

c. The past participle and the present participle, if used as part of a verb phrase, must always be used with one or more helping verbs, also known as auxiliary verbs. The most common helping verbs are:

is	was	can	do	has	have	might	shall	will
are	were	could	did	had	may	must	should	would

► For a graphic view of how all the tenses are formed, see the chart on pages 316–317.

Forming Verb Tenses

1031 The first principal part of the verb (the *present tense*) is used:

a. To express *present time*.

We *fill* all orders promptly. She *does* what is expected of her.

b. To make a statement that is *true at all times*.

There *is* an exception to every rule (including this one).

c. With *shall* or *will* to express *future time*.

We *will order* [OR: *shall order*] new stock next week. (For the use of the helping verbs *shall* and *will* in the future tense, see page 398.)

► For the third-person singular form of the present tense, see ¶1035.

1032 **a.** The second principal part of the verb (the *past tense*) is used to express *past time*. (No helping verb is used with this form.)

We *filled* the order yesterday. She *did* what was expected of her.

1033

- b.** Do not use a past participle form to express the past tense.
- I saw it. (**NOT:** I seen it.) He drank his coffee. (**NOT:** He drunk his coffee.)
They began it together. (**NOT:** They begun it together.)
He was the one who did it. (**NOT:** He was the one who done it.)
I can't believe this sweater shrank. (**NOT:** . . . this sweater shrunk.)
Jill brought me up to date on the Cox project. (**NOT:** Jill brung me . . .)
New businesses sprang up to take advantage of this new technology. (**NOT:** New businesses sprung up . . .)
The rumors about a cover-up sank without a trace. (**NOT:** The rumors about a cover-up sunk . . .)
The room stank of cigar smoke. (**NOT:** The room stunk . . .)
- c.** The verbs *dive* and *sneak* have acquired alternative past tense forms: *dived/dove* and *sneaked/snuck*. *Dove* and *snuck* are now generally considered acceptable, but careful writers will continue to use *dived* and *sneaked* in formal writing.
- Operating income dived nearly 22% last year. (Formal.)
Kimberly dove off the balcony into the motel pool without a moment's hesitation. (Informal.)
Someone sneaked this earmark into the budget bill when no one else was looking. (Formal.)
Someone snuck into my locker yesterday and stole my wallet. (Informal.)
- d.** The form *brung* is not an acceptable alternative to *brought* except as noted in e below.
- e.** A number of idiomatic expressions deliberately use incorrect verb forms. Don't try to correct them.
- If it ain't broke, don't fix it.
Who would've thunk it?
Remember the last game of the season? We really stunk!
You gotta dance with them what brung you.
According to Dizzy Dean, "It ain't braggin' if you really done it!"
Carl Sandburg wrote, "I never made a mistake in grammar but one in my life, and as soon as I done it, I seen it."

1033 The third principal part of the verb (the *past participle*) is used:

- a.** To form the *present perfect tense*. This tense indicates action that was started in the past and has recently been completed or is continuing up to the present time. It consists of the verb *have* or *has* plus the past participle.
- We have filled the orders. (**NOT:** We have filled the orders yesterday.)
She has always done what we expect of her.
Consumers have become an articulate force in today's business world.
- b.** To form the *past perfect tense*. This tense indicates action that was completed before another past action. It consists of the verb *had* plus the past participle.
- We had filled the orders before we saw your letter.
She had finished the job before we arrived.
- c.** To form the *future perfect tense*. This tense indicates action that will be completed before a certain time in the future. It consists of the verb *shall have* or *will have* plus the past participle.
- We will have filled the orders by that time. (See page 398 for a usage note on *shall* and *will*.)
She will have finished the job by next Friday.

- d.** Do not use a past tense form (the second principal part) in place of a past participle.

I have *broke* the racket. (**NOT:** I have *broke* the racket.)

The dress has *shrunk*. (**NOT:** The dress has *shrank*.)

Prices have *risen* again. (**NOT:** Prices have *rose* again.)

He has *worn* his shoes out. (**NOT:** He has *wore* his shoes out.)

I would have *gone* with you. (**NOT:** I would have *went* with you.)

1034 The fourth principal part of the verb (the *present participle*) is used:

- a.** To form the *present progressive tense*. This tense indicates action still in progress. It consists of the verb *am*, *is*, or *are* plus the present participle.

We *are filling* all orders as fast as we can.

She *is doing* all that can be expected of her.

- b.** To form the *past progressive tense*. This tense indicates action in progress sometime in the past. It consists of the verb *was* or *were* plus the present participle.

We *were waiting* for new stock at the time your order came in.

She *was doing* a good job when I last checked her work.

- c.** To form the *future progressive tense*. This tense indicates action that will be in progress in the future. It consists of the verb *shall be* or *will be* plus the present participle.

We *will be working* overtime for the next two weeks. (See page 398 for a usage note on *shall* and *will*.)

They *will be receiving* additional stock throughout the next two weeks.

- d.** To form the *present perfect progressive*, the *past perfect progressive*, and the *future perfect progressive tenses*. These tenses convey the same meaning as the simple perfect tenses (see ¶1033) except that the progressive element adds the sense of continuous action. These tenses consist of the verbs *has been*, *have been*, *had been*, *shall have been*, and *will have been* plus the present participle. Compare the following examples with those in ¶1033.

We *have been filling* these orders with Model 212A instead of Model 212. (Present perfect progressive.)

We *had been filling* these orders with Model 212A until we saw your directive. (Past perfect progressive.)

By next Friday we *will have been working* overtime for two straight weeks. (Future perfect progressive.)

1035 The first principal part of the verb undergoes a change in form to express the third-person singular in the present tense.

- a.** Most verbs simply add *s* in the third-person singular.

he feels

BUT: I feel, you feel, we feel, they feel

she thinks

I think, you think, we think, they think

it looks

I look, you look, we look, they look

1035 CONJUGATION OF THE VERB TO SEE

PRESENT, PAST, AND FUTURE TENSES (¶¶1031–1032)

INFINITE	TO SEE	TO BE	TO HAVE
PRESENT TENSE First Principal Part	I see you see he or she sees	I am you are he or she is	I have you have he or she has
	we see you see they see	we are you are they are	we have you have they have
PAST TENSE Second Principal Part	I saw you saw he or she saw	I was you were he or she was	I had you had he or she had
	we saw you saw they saw	we were you were they were	we had you had they had
FUTURE TENSE Helping Verb (<i>shall</i> or <i>will</i>) + Main Verb (first principal part)	I shall see you will see he or she will see	I shall be you will be he or she will be	I shall have you will have he or she will have
	we shall see you will see they will see	we shall be you will be they will be	we shall have you will have they will have

PASSIVE TENSES (¶¶1036–1037)

INFINITE	TO SEE
PRESENT PASSIVE TENSE Helping Verb (present tense of <i>be</i>) + Main Verb (past participle)	I am seen you are seen he or she is seen
	we are seen you are seen they are seen

1036

- b.** Verbs ending in *s, x, z, sh, ch*, or *o* add *es*.

he misses	he wishes
she fixes	she watches
it buzzes	it does

- c.** Verbs ending in a vowel plus *y* add *s*; those ending in a consonant plus *y* change *y* to *i* and add *es*.

say: he says	buy: he buys
convey: she conveys	apply: it applies
employ: she employs	try: she tries

- d.** Verbs ending in *i* simply add *s*.

taxi: he taxis	ski: she skis
----------------	---------------

- e.** The verb *to be* is irregular since *be*, the first principal part, is not used in the present tense. (See the chart on pages 316–317.)

I am	we are
you are	you are
he, she, it is	they are

- f.** A few verbs remain unchanged in the third-person singular.

PRESENT TENSE:	he may	she can	it will
PAST TENSE:	he might	she could	it would

► See page 374 for a usage note on don't.

Passive Forms

1036 The passive forms of a verb consist of some form of the helping verb *to be* plus the past participle of the main verb.

it is intended (present passive of *intend*)
 we were expected (past passive of *expect*)
 they will be audited (future passive of *audit*)
 she has been notified (present perfect passive of *notify*)
 you had been told (past perfect passive of *tell*)
 he will have been given (future perfect passive of *give*)

1037 A *passive* verb directs the action toward the subject. An *active* verb directs the action toward an object.

ACTIVE: Melanie [subject] will lead [verb] the discussion [object].

PASSIVE: The discussion [subject] will be led [verb] by Melanie.

► For additional examples, see the entry for voice in Appendix A.

- a.** The passive form of a verb is appropriate (1) when you want to emphasize the *receiver* of the action (by making it the subject) or (2) when the *doer* of the action is not important or is deliberately not mentioned.

I was seriously injured as a result of your negligence. (Emphasizes *I*, the receiver of the action.)
RATHER THAN: Your negligence seriously injured me.

This proposal is based on a careful analysis of all available research studies. (Emphasizes the basis for the proposal; the name of the person who drafted the proposal is not important.)

1038

The decision was made without consulting any of the board members. (Emphasizes how the decision was made and omits the name of the person responsible.)

Mistakes were made. (A frequent comment made by politicians and corporate executives who have to acknowledge failure or wrongdoing but do not want to acknowledge personal responsibility or guilt.)

Fred Allen once defined a conference as a gathering of important people who “singly can do nothing but together can decide that nothing can be done.”

- b.** In all other cases, use active verb forms to achieve a simpler and more vigorous style. Except in those circumstances cited in *a* above, passive verb forms typically produce awkward or stilted sentences.

WEAK PASSIVES: It *has been decided* by the Human Resources Committee that full pay *should be given* to you for the period of your hospitalization.

STRONG ACTIVES: The Human Resources Committee *has decided* that you *should receive* full pay for the period of your hospitalization.

NOTE: During World War II Winston Churchill received the following message:

Permission is hereby urgently requested for the implementation of your directive with regard to the floating piers.

Churchill's response:

If you mean, should you build the piers? Yes, build them. Do it. Carry on. Implement me no directives ever!

On another occasion Churchill launched a further attack on the use of the passive.

What if I had said, instead of “We shall fight on the beaches,” “Hostilities will be engaged with our adversaries on the coastal perimeter”?

- c.** Watch out for passive constructions that unintentionally point to the wrong *doer* of the action.

CONFUSING: Two computers were reported stolen over the weekend by the head of corporate security.

CLEAR: The head of corporate security reported that two computers were stolen over the weekend.

CONFUSING: One of our second-shift workers was found injured by a Good Samaritan outside the parking lot entrance last night.

CLEAR: Last night one of our second-shift workers was injured outside the parking lot entrance and was found there by a Good Samaritan.

Verbs Following Clauses of Necessity, Demand, Etc.

1038 Sentences that express *necessity, demand, strong request, urging, or resolution* in the main clause require a *subjunctive* verb in the dependent clause that follows.

► *For a definition of subjunctive, see the entry for Mood, subjunctive in Appendix A.*

- a.** If the verb in the dependent clause requires the use of the verb *to be*, use the form *be* with all three persons (not *am, is*, or *are*).

NECESSITY: It is necessary [OR: important OR: essential] that these questions *be answered* at once. (**NOT:** are answered.)

Continued on page 320

¶1039

DEMAND: I insist that I *be allowed* to present a minority report at the next board meeting. (**NOT:** am allowed.)

REQUEST: They have asked that you *be notified* at once if matters do not proceed according to plan. (**NOT:** are notified.)

URGING: We urged [**OR:** suggested] that he *be given* a second chance to prove himself in the job. (**NOT:** is given.)

RESOLUTION: The committee has resolved [**OR:** decided **OR:** ruled] that the decision *be deferred* until the next meeting. (**NOT:** is deferred.)

- b.** If the verb in the dependent clause is a verb other than *be*, use the ordinary *present tense* form for all three persons. However, do not add *s* (or otherwise change the form) for the third-person singular.

NECESSITY: It is essential that he *arrive* on time. (**NOT:** arrives.)

DEMAND: I must insist that he *do* the work over. (**NOT:** does.)

REQUEST: They have asked that she *remain* on the committee until the end of the year. (**NOT:** remains.)

URGING: I suggested that she *type* the material triple-spaced to allow room for some very heavy editing. (**NOT:** types.)

RESOLUTION: They have resolved that Fred *represent* them. (**NOT:** represents.)

Verbs Following *Wish* Clauses

1039 Sentences that start with *I wish*, *she wishes*, and so on, require a subjunctive verb in the dependent clause that follows.

- a.** To express *present* time in the dependent clause, put the verb in the *past tense*.

I wish I *knew* how to proceed.

I wish I *could attend*.

NOTE: If the verb is *to be*, use *were* for all three persons.

I wish I *were going* to the reception. (**NOT:** was going.)

I wish he *were going* with me.

- b.** To express *past* time in the dependent clause, put the verb in the *past perfect tense*.

I wish she *had invited* me. I wish I *had been* there.

I wish they *had hired* you. I wish I *could have attended*.

- c.** To express *future* time in the dependent clause, use the helping verb *would* instead of *will*.

I wish he *would arrive* on time. I wish she *would make* more of an effort.

Verbs in *If* Clauses

1040 **a.** When an *if* clause states a condition that is highly *improbable*, *doubtful*, or *contrary to fact*, the verb in the *if* clause requires special treatment, like that described in ¶1039. *To express present time, use the past tense; to express past time, use the past perfect tense.* (In the following examples note the relationship of tenses between the dependent clause and the main clause.)

If I *knew* the answer [but I don't], I *would not ask* you.

If I *had known* the answer [but I didn't], I *would not have asked* you.

If I *were* you [but I am not], I *would take* the job.
 If I *had been* in your shoes [but I wasn't], I *would have taken* the job.
 If he *were invited* [but he isn't], he *would be* glad to go.
 If he *had been invited* [but he wasn't], he *would have been* glad to go.

b. As a general rule, do not use *would have* for *had* in an *if* clause.

If I *had known* of your interest in the project, I would have asked you to participate in the planning process.
(NOT: If I *would have known* of your interest in the project, I would have asked you to participate in the planning process.)

There are a few exceptions when *would have* has a special meaning.

If John *would have us* over tonight, I would cancel my other plans in a second. (In this sentence *would have* means "would invite.")
 If you *would have* a vegetarian meal, I would be glad to cook it for you. (Here *would have* means "would eat.")
 If she *would have* me, I would give her the ring in a minute. (Here *would have* means "would accept")

► For a usage note on *would have*, see page 405.

1041 When an *if* clause states a condition that is *possible* or *likely*, the verb in the *if* clause requires no special treatment. *To express present time, use the present tense; to express past time, use the past tense.* Compare the following pairs of examples. Those labeled "Probable" reflect the verb forms described here in ¶1041. Those labeled "Improbable" reflect the verb forms described in ¶1040.

PROBABLE: If I *leave* this job [and I may do so], I *will take* a full-time teaching position.
IMPROBABLE: If I *left* this job [but I probably won't], I *would take* a full-time teaching position.
PROBABLE: If I *go* to Tokyo [and I may], I *will want* you to go too.
IMPROBABLE: If I *were going* to Tokyo [but I probably won't be], I *would want* you to go too.
PROBABLE: If she *was* in yesterday [and she may have been], I *did not see* her.
IMPROBABLE: If she *had been* in yesterday [but she wasn't], I *would have seen* her.

Verbs in *As If* or *As Though* Clauses

1042 When an *as if* or *as though* clause expresses a condition *contrary to fact*, the verb in the clause requires special treatment, like that described in ¶1040.

She acts as if she *were* the only person who mattered. (But she isn't.)
 He talks as if he *knew* the facts of the situation. (But he doesn't.)
 You act as though you *hadn't* a care in the world. (But you have.)

1043 *As if* or *as though* clauses are now often used to express a condition that is *highly probable*. In such cases do not give the verb special treatment. *Use the present tense to express present time, the future tense to express future time, and the past tense to express past time.*

It looks as if it *will rain*. **OR:** It looks as if it *is going* to rain.
 She acted as if she *planned* to look for another job.

¶1044**Infinitives**

1044 An infinitive is the form of the verb preceded by *to* (for example, *to write*, *to do*, *to be*). When two or more infinitives are used in a parallel construction, the word *to* may be omitted after the first infinitive unless special emphasis is desired.

Ask Ruth Gonzales *to sign* both copies of the contract, *return* the original to us, and *keep* the other copy. (*Return* and *keep* are infinitives without *to*.)

I would like you *to explain* the job to Harry, *to give* him help if he needs it, and *to see* that the job is done properly. (For emphasis, *to* is used with all three infinitives—*explain*, *give*, and *see*.)

NOTE: The word *to* is usually dropped when the infinitive follows such verbs as *see*, *hear*, *feel*, *let*, *help*, and *need*.

Will you please help me *prepare* the report? (**RATHER THAN:** help me *to prepare*.)

You need not *return* the clipping. **BUT:** You do not need *to return* the clipping.

1045 a. Infinitives have two main tense forms: present and perfect.

(1) The perfect infinitive is used to express action that has been completed before the time of the main verb.

I am sorry *to have caused* you so much trouble last week. (The act of causing trouble was completed before the act of expressing regret; therefore, the perfect infinitive is used.)

(2) The present infinitive is used in all other cases.

I planned *to leave* early. (**NOT:** *to have left*. The act of leaving could not have been completed before the act of planning, so the present infinitive is used.)

b. The passive form of the present infinitive consists of *to be* plus the past participle. Do not omit *to be* in such constructions.

This office needs *to be repainted*. (**NOT:** This office needs *repainted*.)

1046 *Splitting an infinitive* (that is, inserting an adverb between *to* and the verb) has been considered acceptable for some time. Yet some anxious writers and editors still act as if doing so were a grave sin. Many years ago, Raymond Chandler wrote with some exasperation, “Would you convey my compliments to the purist who reads your proofs and tell him or her that . . . when I split an infinitive . . . I split it so it will stay split.”

Yet splitting an infinitive should be avoided when it produces an awkward construction and the adverb functions more effectively in another location.

WEAK: It was impossible to *even see* a foot ahead.

BETTER: It was impossible to see *even a* foot ahead.

WEAK: He always tries to *carefully* do the work.

BETTER: He always tries to do the work *carefully*.

When alternative locations of the adverb produce an awkward or weakly constructed sentence, do not be afraid to split the infinitive.

NOTE: Do not place the adverb where it can create ambiguity. (See ¶1087.)

CONFUSING: Our research people need to be trained *quickly* to communicate their findings to the sales reps. (Do they need to be trained quickly or to communicate their findings quickly?)

CLEAR: Our research people need to be *quickly* trained to communicate their findings to the sales reps.

CLEAR: Our research people need to be trained to *quickly* communicate their findings to the sales reps.

- a. Before splitting an infinitive, first try to place the adverb *after the object* of the infinitive. In many instances the adverb functions most effectively in that location.

You ought *to review* these plans *thoroughly*. (**BETTER THAN:** You ought to thoroughly review these plans.)

I need *to make* the decision *quickly*. (**BETTER THAN:** I need to quickly make the decision.)

- b. If step *a* does not produce an effective sentence, try to locate the adverb directly *before* or directly *after* the infinitive. In some cases the adverb functions effectively in this position; in other cases the resulting sentence is awkward.

CONFUSING: I want you *to supervise* the work that is to be done *personally*. (When the object of the infinitive is long, it is difficult to place the adverb after the object without creating confusion. Here *personally* seems to modify *to be done* when it should modify *to supervise*.)

AWKWARD: I want you to supervise *personally* the work that is to be done.

GOOD: I want you *personally* to supervise the work that is to be done.

- c. If steps *a* and *b* fail to produce an effective sentence, try splitting the infinitive. If a good sentence results, keep it; if not, try rewording the sentence.

CONFUSING: I want you *to consider* Jenkins' proposal to handle all our deliveries *carefully*. (When *carefully* is located after the complete object, it no longer clearly refers to *to consider*.)

AWKWARD: I want you *carefully* to consider Jenkins' proposal to handle all our deliveries.

AWKWARD: I want you to consider *carefully* Jenkins' proposal to handle all our deliveries.

GOOD: I want you to *carefully* consider Jenkins' proposal to handle all our deliveries.

- d. When an infinitive consists of *to be* plus a past or present participle of another verb, inserting an adverb before the participle is not considered splitting an infinitive. Nevertheless, in many such sentences it may be possible to locate the adverb to better advantage elsewhere in the sentence.

These plans need to be *thoroughly* reviewed.

Claude appears to be *continually* turning up with last-minute objections to any decision I make.

NOTE: By the same token, it is perfectly acceptable to position an adverb between a helping verb and a past or present participle. It is even acceptable to position an adverb *within* the elements of a helping verb.

This new technology has *already* been *effectively* applied in many industries.

I hear that Martha has been *seriously* considering early retirement.

Sequence of Tenses

1047 When the verb in the main clause is in the past tense, the verb in a dependent *that* clause should also express past time. Consider the following pairs of examples:

She says [present] that she *is now working* [present] for CBS.

She *said* [past] that she *was now working* [past] for CBS.

He says [present] that he *has seen* [present perfect] your résumé.

He *said* [past] that he *had seen* [past perfect] your résumé.

I *think* [present] that he *will see* [future] you tomorrow.

I *thought* [past] that he *would see* [past form of *will see*] you tomorrow.

EXCEPTION: The verb in the dependent clause should remain in the present tense if it expresses a general truth.

Our lawyer *pointed out* [past] that all persons under 18 *are* [present] considered minors.

¶1048**Omitting Parts of Verbs**

1048 When the verbs in a compound predicate share a common element, that element does not need to be repeated.

We *have received* your letter and *forwarded* it to our St. Louis office. (The helping verb *have* is shared by the two main verbs, *received* and *forwarded*.)

We *can* and *will achieve* these goals. (The main verb *achieve* is shared by the two helping verbs, *can* and *will*.)

However, do not omit any element when different parts of the main verb are required.

WRONG: I never *have* and I never *will forget* what you have done for me.

RIGHT: I never *have forgotten* and I never *will forget* what you have done for me.

WRONG: We *have* and still *are asking* for an accounting of the assets.

RIGHT: We *have asked* and still *are asking* for an accounting of the assets.

Troublesome Verbs

► See the individual entries listed alphabetically in Section 11 for the following verbs:

Affect–effect	Gibe–jibe
Aggravate	Graduated–was graduated
Ain’t	Grow
Allude–refer	Had better
Appraise–apprise	Hear
Appreciate	Help
Aren’t I	Home–hone
Augur	Impact
Bear–bare	Imply–infer
Being that	Incentivize–incent
Bring–take	Journal
Cannot help but	Lay–lie
Cease–seize	Lay down–lie down
Click–click on	Learn–teach
Collide with–crash into	Leave–let
Come–go	Lend–borrow
Come to–come and	Lend–loan
Complement–compliment	Let–let’s
Comprise–compose	Libel–slander
Consists of–includes	Log on to–log onto
Convince–persuade	Look forward to
Could have–could of	May–can (might–could)
Could not care less	Maybe–may be
Dialogue	Of–have
Done	Proved–proven
Don’t (do not)	Rack–wrack
Ensure–insure–assure	Raise–rise
Enthused over	Reign
Fall between–fall through	Serve–service
Flaunt–flout	Set–sit
Flesh out–flush out	Shall–will

Should-would	Try and
Should have–should of	Type–key
Soft pedal–back pedal	Used to
Supposed to	Would have–would of
Toe the line–toe the mark	

Pronouns

Agreement With Antecedents: Basic Rules

- 1049 a.** A pronoun must agree with its *antecedent* (the word for which the pronoun stands) in number, gender, and person.

I must stand by my client, just as *you* must stand by yours.

Frank said that he could do the job alone.

Alice wants to know whether her proposal has been approved.

We plan to explain our shift in corporate strategy at the next shareholders' meeting.

The company's auditors will issue their report tomorrow.

The Vanderveers are giving a party at their house.

Why not have each witness write his or her version of the accident? (See ¶1053 for indefinite pronouns as antecedents.)

It is / who am at fault. (*Who* agrees in person and number with the antecedent *I*; the verb *am* also agrees with *I*.)

It is she who is willing to compromise. *It* is they who are not.

It is we, the individual taxpayers, who have to make up for the loss of commercial ratables.

It is you who are to blame. (*Who* refers to *you*; hence the verb is *are* to agree with *you*. See ¶1001b.)

BUT: You are the person who is to blame. (Here *who* refers to *person*; hence the verb is *is* to agree with *person*.)

NOTE: When the antecedent of a pronoun is a collective noun or an organizational name, the decision to use a singular or plural pronoun will depend on whether the antecedent has a singular or plural meaning.

Fein & Goode has announced that *it* will be moving to *its* new office at the beginning of July.

Fein & Goode have announced that *they* will be moving to *their* new office at the beginning of July.

(**BUT NOT:** *Fein & Goode has announced* that *they* will be moving to *their* new office at the beginning of July.)

- *For a discussion of whether to treat collective nouns and organizational names as singular or plural, see ¶¶1019–1020.*

- b.** Use a plural pronoun when the antecedent consists of two singular nouns or pronouns joined by *and*.

Can *Mary* and *you* give us your decision by Monday?

Sonia and *Dave* say they will attend.

The *Montaignes* and the *Reillys* have sent their regrets.

Are *you* and *I* prepared to say we can handle the assignment?

Continued on page 326

¶1049

- c. Use a singular pronoun when the antecedent consists of two *singular* nouns joined by *or* or *nor*. Use a plural pronoun when the antecedent consists of two *plural* nouns joined by *or* or *nor*. (See also ¶¶1003–1005.)

Either *Will* or *Ed* will have to give up *his* office. (**NOT:** their.)

Neither *Joan* nor *Helen* wants to do *her* share. (**NOT:** their.)

Either the *Kopecks* or the *Henleys* will bring *their* digital video recorder.

NOTE: When *or* or *nor* joins a singular noun and a plural noun, a pronoun that refers to this construction should agree in number with the nearer noun. However, a strict application of this rule can lead to problems in sentence structure and meaning. Therefore, always try to make this kind of construction plural by locating the plural subject nearer the verb.

Neither *Mr. Wing* nor his *employees* *have reached* *their* goal. (The plural pronoun *their* is used to agree with the nearer noun, *employees*; the verb *have reached* is also in the plural.)

NOT: Neither the *employees* nor *Mr. Wing* *has reached* *his* goal. (The sentence follows the rule—*his* agrees with *Mr. Wing*, the nearer noun, and the verb *has reached* is singular; however, the meaning of the sentence has been distorted.)

- d. Make sure that the pronouns you use agree in person and number with their antecedents.

The entire *staff* of JTX wishes to express *its* gratitude. (Third-person singular.)

We [**OR:** *All of us*] here at JTX wish to express *our* gratitude. (First-person plural.)

BUT NOT: The entire *staff* of JTX wishes to express *our* gratitude. (Do not use a first-person pronoun to refer to a third-person antecedent.)

► See also ¶1053d.

- e. When pronouns are used as appositives, make sure that they are in the same case as their antecedents.

Our division's two most successful *sales reps* this year—as it happens, *Ken Short* and *I*—received special commendations and extra bonuses. (The nominative pronoun *I* is required because it refers to the subject of the sentence, *sales reps*.)

Special commendations and extra bonuses were given to our division's two most successful *sales reps* this year—as it happens, *Ken Short* and *me*. (The objective pronoun *me* is required because it refers to the object of the preposition *to*, *sales reps*.)

Perry wants *us*—you and *me*—to take charge of this year's conference. (The objective pronoun *me* is required because it refers to *us*.)

BUT: *Perry* wants *us* to take charge of this year's conference, so *you* and *I* should start making plans immediately. (In this sentence, the nominative pronoun *I* is required because it is part of the subject of the *so* clause and not an appositive of *us* in the first clause.)

- f. Make sure that the pronouns you use refer to the antecedents you intend. To avoid confusion, reword as necessary.

CONFUSING: Unrealistic deadlines, excessive pressures, and unsafe working conditions can be very damaging to your employees. You must do everything you can to eliminate *them*. (The employees or the destructive conditions?)

CLEAR: Unrealistic deadlines, excessive pressures, and unsafe working conditions can be very damaging to your employees. You must do everything you can to eliminate *these destructive conditions*.

- g. Although *she* and *her* have traditionally been used to refer to a country or a ship, it is now preferable to use *it* and *its*.

- h.** It is acceptable for the antecedent of a pronoun to be in the possessive case as long as there is no chance of confusion.

Matthew wants to discuss his *company's* obligation to offer *its* employees a variety of benefits.

I have to agree with *Craig's* contention that *he* is not getting support from the home office.

Does *Ava's* husband know that *she* is thinking of taking early retirement?

Nancy's eight-year-old son often accompanies *her* when she goes on business trips.

CONFUSING: *Nancy's* daughter was six when *she* became president of the company.

CLEAR: *Her* daughter was six when *Nancy* became president of the company.

Agreement With Common-Gender Antecedents

- 1050** Nouns that apply to both males and females have a *common* gender.

parent	manager	student	boss	writer
child	doctor	professor	supervisor	speaker
customer	lawyer	instructor	employee	listener

When a singular noun of common gender serves as a *definite* antecedent (one that names a specific person whose gender is known), use the pronoun *he* or *she*.

My *boss* [previously identified as Robert Hecht] prefers to open *his* own mail.

Ask your *doctor* [known to be a woman] to sign *her* name on this form.

- 1051** When a singular noun of common gender serves as an *indefinite* antecedent (*a doctor*, *any doctor*, *every doctor*) or as a *generic* antecedent (*the doctor*, meaning “doctors in general”), it is unacceptable to use *he* as a generic pronoun applying equally to males and females. The masculine bias in the word *he* makes it unsuitable to serve as a pronoun that applies equally to women and men.

By the same token, when an indefinite or generic antecedent names an occupation or a role in which women have tended to predominate (for example, *the teacher*, *the nurse*, *the secretary*, *the administrative professional*), it is generally unacceptable to use *she* as a generic pronoun. The generic use of *she* serves to perpetuate stereotyped notions about women’s occupations or roles, especially now when men and women are taking on jobs that once used to be considered the exclusive domain of one gender or the other.

A number of new words—without masculine or feminine connotations—have been proposed to take the place of the generic use of *he* or *she*. However, since none of these words have been accepted into common usage, consider the alternatives described in ¶1052.

- 1052** **a.** Use *he or she*, *his or her*, or *him or her*. This solution works well in isolated cases but can be clumsy if repeated frequently in the same context. (In any case, avoid the use of *he/she*, *his/her*, *him/her*, *s/he*, and similar constructions.)

An *instructor* should offer *his or her* students challenging projects.

(**RATHER THAN:** An instructor should offer *his* students challenging projects.)

- b.** Change the wording from singular to plural.

Parents of teenage children often *wonder* where *they* went wrong.

(**RATHER THAN:** The parent of a teenage child often *wonders* where *he or she* went wrong.)

Continued on page 328

¶1053**c.** Reword to avoid the generic pronoun.

When a customer calls, be sure to ask for a phone number.

(**RATHER THAN:** When a customer calls, ask *him or her* to leave *his or her* phone number.)

An assistant tries to anticipate the boss's needs.

(**RATHER THAN:** An assistant tries to anticipate the needs of *his or her* boss.)

If a writer submits an unsolicited manuscript to a publisher, *the writer* should also enclose a self-addressed, stamped envelope.

(**RATHER THAN:** . . . *he or she* should also enclose a self-addressed, stamped envelope.)

d. In colloquial speech, the pronouns *they*, *their*, and *them* are often used to refer to a singular antecedent to avoid the awkwardness of *he or she*, *his or her*, and *him and her*. For example:

Everybody likes to do things *their* own way.

However, this usage is not acceptable in business writing or in formal writing of any kind. The problem can be easily avoided by rewriting.

People like to do things *their* own way.

OR: *We* all like to do things *our* own way.

OR: *All of you* like to do things *your* own way.

e. In rare cases, where the use of these various alternatives results in wordiness or an unacceptable shift in meaning or emphasis, it may be necessary—as a last resort—to use a generic form of *he* or *she*. (See the final example in ¶1053a on page 329.) However, this practice should be avoided whenever possible.**Agreement With Indefinite-Pronoun Antecedents****1053 a.** Use a singular pronoun when the antecedent is a singular indefinite pronoun. The following indefinite pronouns are always singular. They are typically used as nouns, but a few (such as *each* and *every*) are used as adjectives.

anyone	everyone	someone	no one
anybody	everybody	somebody	nobody
anything	everything	something	nothing
each	every	either	one
each one	many a	neither	another

Every company has *its* own vacation policy. (**NOT:** *their*.)

Neither one of the campaigns did as well as *it* was supposed to. (**NOT:** *they were*.)

NOTE: In the past, these singular indefinite forms often called for the generic use of *he* or *she* (¶¶1051–1052)—a practice that is now considered unacceptable. The following sentences use alternative wording to show how the generic *he* or *she* can be avoided. The last sentence presents a situation for which no reasonable alternative exists.

All staff *members* should submit *their* expense reports by Friday.

(**RATHER THAN:** *Everyone* should submit *his* expense report by Friday.)

If *anyone* should ask for me, *say* that I won't return until Monday.

(**RATHER THAN:** If *anyone* should ask for me, *tell him* that I won't return until Monday.)

Do *all* the assistants know how *they* are to handle *their* bosses' calls?

(RATHER THAN: Does *every* assistant know how *she* is to handle *her* boss's calls?)

Our *employees* are not willing to work under those conditions, are *they*?

(RATHER THAN: *No one* is willing to work under those conditions, are *they*?)

Nobody could have helped *himself* in a situation like that.

- For agreement of these indefinite pronouns with verbs, see ¶¶1009–1011; for possessive forms of these pronouns, see ¶637.

- b. Use a plural pronoun when the antecedent is a plural indefinite form. The following indefinite pronouns are always plural:

many few several others both

Many customers prefer to help *themselves*; *others* usually like to have someone wait on *them*.

Several sales representatives in the Southern Region made *their* annual goals in nine months.

Both managers have said that *they* want to be considered for Mr. Hall's job when he retires.

- For agreement of these indefinite pronouns with verbs, see ¶1012.

- c. The following indefinite forms may be singular or plural, depending on the noun to which they refer:

all none any some more most

When these words are used as antecedents, determine whether they are singular or plural. Then make the pronouns that refer to them agree in number.

Some of the *employees* have not yet had *their* annual performance review. (*Some* refers to *employees* and is plural; *some* is the antecedent of *their*.)

Some of the *manuscript* has been typed, but *it* has not been proofread. (*Some* refers to *manuscript* and is singular; *some* is the antecedent of *it* in the second clause.)

- For agreement of these indefinite pronouns with verbs, see ¶1013.

- d. Since indefinite forms express the third person, pronouns referring to these antecedents should also be in the third person (*he*, *she*, *it*, *they*).

If *anyone* wants a vacation pay advance, *he* or *she* should apply for it in writing.

(NOT: If *anyone* wants a vacation pay advance, *you* should apply for it . . .)

If the indefinite form is modified so that it strongly expresses the first or second person, the personal pronoun must also agree in number.

Most parents want *their* children to go to college. (Third person.)

Most of us want *our* children to go to college. (First person.)

A few have missed *their* deadlines. (Third person.)

A few of you have missed *your* deadlines. (Second person.)

Each employee knows how much *he* or *she* ought to contribute to the United Way fund drive. (Third person.)

BUT: *Each of us* [each one of us] knows how much *he* or *she* ought to contribute to the United Way fund drive. (Third person. In this sentence, *of us* does not shift the meaning to the first person; the emphasis is on what the individual contributes, not on what *we* contribute.)

¶1054

Pronouns take different forms, not only to indicate a difference in person (*I, you, he*), number (*he, they*), and gender (*he, she*) but also to indicate a difference in case (*nominative, possessive, objective*). Although a pronoun must agree with its antecedent in person, number, and gender, it does *not* necessarily agree with its antecedent in case. The case of a pronoun depends on its own relation to the other words in the sentence. The rules in ¶¶1054–1064 indicate how to choose the right case for pronouns.

► For a chart showing the formation of pronouns, see page 331.

Personal Pronouns**1054 Nominative Forms of Personal Pronouns**

Use *I, we, you, he, she, it, they*:

- a. When the pronoun is the subject of a verb.

I wrote to Eileen McIntyre, but *she* hasn't answered.

Lois says that *she* and her husband will be able to retire next May. (NOT: her and her husband.)

Debbie and *I* can handle the job ourselves. (NOT: Debbie and me OR: me and Debbie.)

Either *he* or *I* can work late tonight. (NOT: him or me.)

NOTE: In sentences like the last two above, try each subject alone with the verb. You would not say "Me can handle the job" or "Him can work late tonight." Therefore, *I* and *he* must be used.

- b. When the pronoun appears in the predicate after some form of the verb *to be* (*am, is, are, was, were*) or after a verb phrase containing some form of *to be* (see the list below). Pronouns that follow these verb forms should be in the nominative.

shall (OR: will) be

have (OR: has) been

should (OR: would) be

had been

shall (OR: will) have been

may (OR: might) be

should (OR: would) have been

may (OR: might) have been

can (OR: could) be

must (OR: ought to) be

could have been

must have (OR: ought to have) been

It could have been *they*.

Was it *he* or *she* who phoned?

It is *I*.

This is *she*.

NOTE: A sentence like *It could have been they*, while grammatically correct, would sound better if reworded in idiomatic English: *They could have been the ones*. Moreover, a sentence like *It's me* is acceptable in colloquial speech and in informal writing. When you hear a telephone caller ask for you by name, do not respond by saying *This is him* or *This is her*. If you wish to respond correctly (and somewhat pompously), say *This is he* or *This is she*. If you wish to respond correctly and sound more natural, say *This is . . .* and then give your name. (See also the usage note on *It's me* on page 386.)

► For special rules governing pronouns with the infinitive to be, see ¶1064.

FORMATION OF PRONOUNS

PERSONAL PRONOUNS	Singular	Plural
Nominative Case		
First person	I	we
Second person	you	you
Third person	he, she, it	they
Possessive Case		
First person	my, mine	our, ours
Second person	your, yours	your, yours
Third person	his, her, hers, its	their, theirs
Objective Case		
First person	me	us
Second person	you	you
Third person	him, her, it	them

RELATIVE PRONOUNS

Nominative Case	who	which	that
Possessive Case	whose	of which	...
Objective Case	whom	which	that

INTERROGATIVE PRONOUNS

Nominative Case	who	which	what
Possessive Case	whose	... of which	... that
Objective Case	whom	which	what

COMPOUND PERSONAL PRONOUNS	Singular	Plural
First person	myself	ourselves
Second person	yourself	yourselves
Third person	himself herself itself	themselves

1055 Objective Forms of Personal Pronouns

Use *me, us, you, him, her, it, them*:

- a. When the pronoun is the direct or indirect object of a verb.

Larry gave Maris and *us* tickets for the opening.

They invited my husband and *me* for the weekend.

NOTE: When *my husband and* is mentally omitted, the objective form *me* is clearly the correct pronoun: “They invited *me* for the weekend.”

Continued on page 332

¶1056**b.** When the pronoun is the object of a preposition.

No one knows except *you* and *me*. (**NOT:** except you and I.)

Between *you* and *me*, that decision is unfair. (**NOT:** between you and I.)

EXCEPTION: He is a friend of *mine* [*yours*, *his*, *hers*, *ours*, *theirs*]. (See ¶1648.)

c. When the pronoun is the subject or object of an infinitive.

The department head asked *him* to resign. (*Him* is the subject of *to resign*.)

Did you ask Janet to call *me*? (*Me* is the object of *to call*.)

NOTE: When the pronoun is the subject or object of the infinitive *to be*, use a nominative form. (See ¶1064.)

I asked Russ *who* he wanted to be. (*Who* is the object of *to be*.)

1056 Possessive Forms of Personal Pronouns**a.** Most personal pronouns have two possessive forms:

my	your	his	her	its	our	their
mine	yours	...	hers	...	ours	theirs

b. Use *my*, *your*, *his*, *her*, *its*, *our*, or *their* when the possessive pronoun immediately precedes the noun it modifies.

That is *my* book. It was *their* choice. George is *her* neighbor.

c. Use *mine*, *yours*, *his*, *hers*, *its*, *ours*, or *theirs* when the possessive pronoun stands apart from the noun it refers to.

That book is *mine*. The choice was *theirs*. George is a neighbor of *hers*.

NOTE: Do not insert an apostrophe before the final *s* in possessive pronouns.

yours (**NOT:** *your's*) *hers* (**NOT:** *her's*) *ours* (**NOT:** *our's*) *theirs* (**NOT:** *their's*)

d. A pronoun that modifies a *gerund* (a verbal noun ending in *ing*) should be in the possessive. (See ¶1647.)

I appreciated *your shipping* the order so promptly.

(**NOT:** I appreciated *you shipping* the order so promptly.)

BUT: If I saw *him picking* up his room, I would be very much surprised. (Here *him* is the object of *saw*; *picking* is a participle modifying *him*. See ¶1647b.)

e. Do not confuse certain possessive pronouns with contractions and other phrases that sound like the possessive pronouns.

its (possessive) *it's* (it is **OR:** it has)

their (possessive) *they're* (they are) **OR:** *there're* (there are)

theirs (possessive) *there's* (there is **OR:** there has)

your (possessive) *you're* (you are)

As a test for the correct form, try to substitute *it is*, *it has*, *they are*, *there are*, *there is*, *there has*, or *you are*, whichever is appropriate. If the substitution does not make sense, use the corresponding possessive form.

The company must protect *its* assets. ("Protect it is assets" makes no sense.)

BUT: *It's* time to take stock of our achievements.

Their investing in municipal bonds was a shrewd idea.

BUT: *They're* investing in municipal bonds.

Their complaints have proved to be unfounded.

BUT: *There are* complaints that have proved to be unfounded.

Theirs no longer works; that's why they borrow ours.

BUT: *There's* no use expecting him to change.

Your thinking is sound, but we lack the funds to underwrite your proposal.

BUT: *You're* thinking of applying for a transfer, I understand.

► *For other possessive pronouns, see also §§636–637.*

1057 When a pronoun follows *than* or *as* in a comparison, determine the correct form of the pronoun by mentally supplying any missing words.

She writes better than I. (She writes better than *I do*.)

Joe is not as talented as she. (Joe is not as talented as *she is*.)

I like you better than him. (I like you better than *I like him*.)

BUT: *I like you better than he.* (I like you better than *he does*.)

NOTE: To avoid correct but awkward sentences, actually supply the missing words, as indicated in the parenthetical examples above.

1058 When a pronoun is used to identify a noun or another pronoun, it is either nominative or objective, depending on how the antecedent is used.

The committee has asked us, Ruth and me, to present the report. (Since *us* is objective, the identifying pronoun *me* is also objective.)

The explanation was for the newcomers, Marie and me. (Was for *me*.)

The exceptions were the newcomers, Marie and I. (Exception was *I*.)

Let's you and me schedule a brown-bag lunch. (*Let's* is a contraction for *let us*. Since *us* is the objective form, the pronouns *you* and *me* are also objective.)

NOTE: In sentences like the following, mentally omit the noun (*employees*) to determine the correct form.

The company wants us employees to work on Saturdays. (The company wants *us* to work on Saturdays.)

We employees need to confer. (*We* need to confer.)

1059 Some writers consistently use *we* instead of *I* to avoid a seeming overemphasis on themselves. However, it is preferable to use *we* only when you are speaking on behalf of an organization you represent and to use *I* when speaking for yourself alone.

We shall prepare the necessary forms as soon as you send us a signed release. (This writer is speaking on behalf of the organization.)

It is my opinion that this patient may be discharged at once. (This writer is speaking only for himself. Under these circumstances it would sound pompous to say, "It is *our* opinion.")

Compound Personal Pronouns

1060 Compound personal pronouns end in *self* or *selves*: *myself, yourself, himself, herself, itself, ourselves, yourselves, themselves*.

- a. They can direct the action expressed by the verb back to the subject.

She found herself the only one in favor of the move.

We have satisfied ourselves as to the wisdom of the action.

Continued on page 334

¶1061

- b.** They can emphasize a noun or pronoun already expressed.

I will write her *myself*. The *trainees* *themselves* arranged the program.

I myself am bewildered. (**BUT NOT:** *I myself* am personally bewildered. Using *myself* and *personally* in the same sentence creates redundancy rather than emphasis.)

- c.** Place a compound personal pronoun carefully to avoid confusion or misreading.

CONFUSING: Now surgeons can have patients wheeled inside a new three-dimensional imaging machine; then they can step inside themselves to operate. (Are the surgeons stepping inside themselves or inside the machine?)

CLEAR: . . . then they themselves can step inside the machine to operate.

If necessary, reword the sentence without using a compound personal pronoun.

CONFUSING: Are you tired of cleaning yourself? Let us do it for you.

CLEAR: Are you tired of doing your own cleaning? Let us do it for you.

- d.** Do not use a compound personal pronoun unless the noun or pronoun to which it refers is expressed in the same sentence.

The tickets are for the Wrights and *me*. (**NOT:** *myself*.)

The report will be prepared by Ray, Nessa, and *me*. (**NOT:** *myself*.)

Henry and *I* can handle all the mail. (**NOT:** *Henry and myself*.)

BUT: *Henry* wants to handle all the mail *himself*.

Interrogative and Relative Pronouns

1061 Who and Whom; Whoever and Whomever

- a.** These pronouns are both *interrogative* pronouns (used in asking questions) and *relative* pronouns (used to refer to a noun or pronoun in the main clause).

Who is going? (Interrogative.)

Mr. Sears is the one *who* is going. (Relative, referring to *one*.)

To *whom* shall I deliver the message? (Interrogative.)

Ms. DeAngelis, *whom* I have never met, is in charge of next month's program. (Relative, referring to *Ms. DeAngelis*.)

- b.** These pronouns may be either singular or plural in meaning.

Who is talking? (Singular.)

Whom do you prefer for this job? (Singular.)

Who are going? (Plural.)

Whom do you prefer for these jobs? (Plural.)

- c.** *Who* (or *whoever*) is the nominative form. Use *who* whenever *he*, *she*, *they*, *I*, or *we* could be substituted in the *who* clause. (If in doubt, mentally rearrange the clause as is done in parentheses after each of the following examples.)

Who is arranging the teleconference? (*She* is arranging the teleconference.)

Who could it *have been*? (It could have been *he*. See ¶1054b.)

Who booked our sales conference in a honeymooners' hideaway? (*He* booked the sales conference.)

Who shall I say *is calling*? (I shall say *he* is calling.)

(**NOT:** *Whom* shall I say *is calling*?)

Who do you think you *are*? (You do think that you are *he*.)

(**NOT:** *Whom* do you think you *are*?)

Who did they say *was chosen*? (They did say *she* was chosen.)

The matter of *who* *should pay* was not decided. (*He* should pay.)

Everybody wants to know who you think should be appointed. (You think *she* should be appointed.)

Whoever wins the primary will win the election. (*She* wins the primary.)

We will select whoever meets our qualifications. (*He* meets our qualifications.)

I will speak to whoever answers the phone. (*He* answers the phone.)

Please write at once to whoever you think can supply the information desired. (You think *she* can supply the information desired.)

Gloria is the one who can best do the job. (*She* can best do the job.)

James is the one who we expect will win. (We expect *he* will win.)

Please vote for the member who you believe has done the most for the club. (You believe *he* has done the most for the club.)

You are free to vote for whoever appeals to you. (*She* appeals to you.)

BUT: You are free to vote for whomever you wish. (You wish to vote for *him*.)

We have referred your claim to our attorney, who we are sure will reply soon. (We are sure *she* will reply soon.)

We have sent this order blank to all who we have reason to believe are interested in our book. (We have reason to believe *they* are interested . . .)

- d.** *Whom* (or *whomever*) is the objective form. Use *whom* whenever *him*, *her*, *them*, *me*, or *us* could be substituted as the object of the verb or as the object of a preposition in the *whom* clause.

Whom did you see today? (You did see *her* today.)

To whom were you talking? (You were talking to *him*.)

Whom were you talking about? (You were talking about *him*.)

Whom did you say you wanted to see? (You did say you wanted to see *her*.)

It depends on whom they mean. (They mean *him*.)

The question of whom we should charge is at issue. (We should charge *her*.)

Whomever you designate will get the promotion. (You designate *him*.)

I will hire whomever I can find. (I can find *her*.)

I will speak to whomever you suggest. (You suggest *her*.)

I will give the job to whomever you think you can safely recommend. (You think you can safely recommend *him*.)

BUT: I will give the job to whoever you think can be safely recommended. (You think *he* can be safely recommended.)

I need a cashier whom I can trust. (I can trust *her*.)

The man to whom I was referring is Ed Meissen. (I was referring to *him*.)

The person whom I was thinking of doesn't have all those qualifications. (I was thinking of *her*.)

The person whom we invited to address the committee cannot attend. (We invited *him* to address the committee.)

Steve Koval is the person whom we all thought the committee would nominate. (We all thought the committee would nominate *him*.)

Elaine Gerrity, whom I considered to be their most promising representative, resigned. (I considered *her* to be their most promising representative.)

NOTE: The humorist Calvin Trillin has said, "As far as I'm concerned, *whom* is a word that was invented to make everyone sound like a butler." In colloquial speech, most people are likely to say, "Who ya gonna vote for?" rather than "Whom are you going to vote for?" But in a business or academic document, be sure to use *whom* when the objective form is called for. If *whom* strikes you as too stilted or sounds unnatural, reword the sentence; for example, "Who is your choice in the next election?"

1062**1062 Who, Which, and That**

- a. *Who* and *that* are used when referring to persons. Select *who* when the individual person or the individuality of a group is meant and *that* when a class or type is meant.

She is the only *one* of my managers *who* can speak Japanese fluently.

He is the *kind* of student *that* should take advanced math.

- b. *Which* and *that* are used when referring to places, objects, and animals. *Which* is always used to introduce nonessential clauses, and *that* is ordinarily used to introduce essential clauses.

Laura's report on employee benefits, *which* I sent you last week, should be of some help. (*Which* introduces a nonessential clause; the report has already been identified.)

The report *that* I sent you last week should be of some help. (*That* introduces an essential clause; it is needed to identify which report the writer is referring to.)

NOTE: *Who* is now often used when an animal is identified by gender or a pet is identified by name.

It was a chocolate Lab named Luke *who* located your missing child.

- c. Many writers now use either *which* or *that* to introduce an essential clause. Indeed, *which* is to be preferred to *that* (1) when there are two or more parallel essential clauses in the same sentence, (2) when *that* has already been used in the sentence, or (3) when the essential clause is introduced by an expression such as *this . . . which*, *that . . . which*, *these . . . which*, or *those . . . which*.

Vivian is taking courses *which* will earn her a higher salary rating in her current job and *which* will qualify her for a number of higher-level jobs.

That is a movie *which* you must not miss.

We need to reinforce *those* ideas *which* were presented in earlier chapters.

Keep in mind that *that* can also introduce a nonessential clause when it serves as a subordinating conjunction rather than as a relative pronoun.

Damato's latest suggestion, *that we submit the issue to arbitration*, may be the only sensible alternative. (In this case, *that* is a subordinating conjunction that introduces a nonessential clause. Since *latest* tells which of Damato's suggestions is meant, the *that* clause provides additional but nonessential information.)

- For a usage note on *that* as a subordinating conjunction, see pages 401–402; for a note on the use of *which* to refer to a previous clause, see page 404.

- d. The verb in a relative clause introduced by *who*, *which*, or *that* should agree in number with the subject of the relative clause. In many cases the subject is clearly expressed.

The laser printer *that you have ordered* will be delivered in two weeks. (The subject of the relative clause is *you*, which requires a plural verb, *have ordered*.)

However, when the relative pronoun *who*, *which*, or *that* is itself the subject of the relative clause, the verb in the relative clause must agree with the antecedent of the relative pronoun.

The laser *printer* that was ordered on May 4 will be delivered in two weeks. (The relative pronoun *that* is the subject of the relative clause and refers to a singular antecedent, *printer*. Therefore, the verb in the relative clause—*was ordered*—must be singular.)

BUT: The laser *printers* that were ordered . . .

I am determined to succeed, not only for myself but for you, who have always encouraged me. (The relative pronoun *who* is the subject of the relative clause and refers to the antecedent *you*, which requires a plural verb—in this case *have encouraged*.)

Sometimes it is difficult to determine the antecedent of the relative pronoun. In such cases mentally rearrange the wording, as is done in the following example.

Hyphenate the elements of a *compound adjective* that occur?/occurs? before a noun. (To determine whether the antecedent of *that* is the plural term *elements* or the singular term *compound adjective*, recast the sentence: “When a *compound adjective* occurs before a noun, hyphenate the elements.” This makes it clear that in the original sentence *compound adjective* is the antecedent of *that*; thus the verb in the relative clause must be singular: *occurs*.)

Hyphenate the elements of a *compound adjective* that occurs before a noun.

- e. *Which*, *that*, and *who* may be used to refer to organizations. When you are referring to the organization as a single entity (in other words, as *it*), then use *which* or *that* as indicated in ¶1062b. However, when you are thinking of the organization in terms of the individuals who make up the organization (in other words, when you think of the organization as *they*), you may use *who* or *that* as indicated in ¶1062a. (See also ¶1020.)

Whenever we run short of computer supplies, the Brown & Weiner Company is the one *that* gives us the best service and the best prices.

We really like doing business with the people at the Brown & Weiner Company. They are a customer-oriented group *who* give us the best service and the best prices. (*That* may also be used in this sentence in place of *who*.)

- f. The possessive form *whose* may be used to refer not only to individuals but also to organizations and inanimate objects.

I heard this story about Brown & Weiner from Janet Malfitano, whose mother works for the company.

Gail has begun working at a foundation whose primary mission is to provide college scholarships for qualified students.

We live in a town whose residents feel comfortable leaving their houses unlocked.

- g. Make sure that a relative clause is placed close to its antecedent to avoid unintended (and sometimes humorous) interpretations. (See also ¶1086.)

NOT: Wanted: Nanny to take care of two-year-old who does not drink or smoke.

BUT: Wanted: Nanny who does not drink or smoke, to take care of two-year-old.

1063 *Whose* and *Who's*

Do not confuse *whose* (the possessive form of *who*) with *who's* (a contraction meaning “who is” or “who has”).

Whose house is it? (It is *his*.) *Who's* the owner of that house? (She is.)

Who's had the most experience in that position? (She has had the most experience . . .)

Who's the most experienced person in that position? (She is the most experienced person . . .)

Whose experience is best suited to that position? (Her experience is.)

¶1064**Pronouns With To Be**

1064 a. If a pronoun is the subject of *to be*, use the *objective* form.

I want *her* to be successful. I expected *them* to be late.

Whom do you consider to be the more expert driver? (You do consider *whom* to be the more expert driver?)

b. If *to be* has a subject and is followed by a pronoun, put that pronoun in the *objective* case.

They mistook the *visitors* to be *us*. (*Visitors*, the subject of *to be*, is in the objective; therefore, the predicate pronoun following *to be* has to be in the objective—*us*.)

They took *her* to be *me*.

Whom did you take *him* to be? (You did take *him* to be *whom*?)

c. If *to be* has *no* subject and is followed by a pronoun, put that pronoun in the *nominative* case.

The *caller* was thought to be *I*. (*I* agrees with the subject, *caller*.)

The *Macauleys* were thought to be *we*.

Who was *he* thought to be? (*He* was thought to be *who*?)

NOTE: The examples directly above are all grammatically correct, but they also sound quite awkward. Whenever possible, use more idiomatic wording. For example, the three sentences above could be recast as follows:

They thought *I* was the one who called.

The *Macauleys* were mistaken for *us*.

Who did they think *he* was?

Troublesome Pronouns

► See the individual entries in Section 11 for the following pronouns and phrases:

All of	Everyone—every one (see ¶1010, note)	Someone—some one (see ¶1010, note)
Anyone—any one (see ¶1010, note)	Its—it's	That—which—who (see ¶1062)
Aren't I	It's me	These sort—these kind
Between you and me (see ¶1055b)	Let—let's	Whatever—what ever
Both—each	Most	Who—whom (see ¶1061)
Both alike	Nobody—no body	Whoever—who ever (see ¶1061)
Each—either—both	None—no one (see ¶1013b)	
Each other—one another		

Adjectives and Adverbs

► For definitions of the terms adjective and adverb, see the appropriate entries in the Glossary of Grammatical Terms (Appendix A).

1065 Only an adverb can modify an adjective.

Packard's will give you a *really* good buy on PDAs.

(**NOT:** Packard's will give you a *real* good buy on PDAs.)

1066 When a word in the predicate refers to the *action of the verb*, use an *adverb* (not an *adjective*).

We guarantee to *ship* the portfolios *promptly*.

They were *injured badly* in the accident.

TEST: If *in a . . . manner* can be substituted for the *ly*-ending word, choose the adverb.

Read the directions *carefully* (in a careful manner).

1067 When a word in the predicate describes the *subject* of the sentence, use an *adjective* (not an *adverb*). Verbs of the *senses* (*feel, look, sound, taste, smell*) and *linking verbs* (the various forms of *be, seem, appear, become*) are followed in most cases by *adjectives*. A few other verbs (such as *grow, prove, get, keep, remain, and turn*) are sometimes followed by *adjectives*.

I feel *bad* [NOT: badly]. (See page 366.)

She looked *happy*.

Your voice sounded *strong*.

He seemed [OR: appeared] *shy*.

They became *famous*.

He has grown *tall*.

The work proved *hard*.

I got *lucky*.

Let's all keep [OR: remain] *calm*.

The weather has turned *cold*.

TEST: If *is, are, was, were*, or some other form of *be* can be substituted for the verb, choose the adjective.

He *looks happy*.

He *is happy*.

NOTE: In the following group of examples, verbs of the senses and linking verbs are used as verbs of action (see ¶1066). Since the modifier refers to the action of the verb (and does not describe the subject), the modifier must be an adverb.

She *looked suspiciously* at the visitor in the reception room.

He *felt carefully* along the ledge for the key.

Our market share *has grown quickly*.

He *appeared quietly* in the doorway.

1068 Several of the most frequently used adverbs have two forms.

close, closely

fair, fairly

loud, loudly

short, shortly

deep, deeply

hard, hardly

quick, quickly

slow, slowly

direct, directly

late, lately

right, rightly

wide, widely

a. In a number of cases the two forms have different meanings.

Ship the goods *direct*. (Meaning "straight," "without detour.")

They were *directly* responsible. (Meaning "without any intervention.")

They arrived *late*.

The truck stopped *short*.

I haven't seen her *lately*.

You will hear from us *shortly*.

You've been working too *hard*.

Turn *right* at the first traffic light.

I could *hardly* hear him.

I don't *rightly* remember.

¶1069

- b.** In some cases the choice is largely a matter of idiom. Some verbs take the *ly* form; others take the short form.

dig deep	go slow	open wide	come close	play fair
wound deeply	proceed slowly	travel widely	watch closely	treat fairly

- c.** In still other cases the choice is simply one of formality. The *ly* forms are more formal.

sell cheap	OR:	sell cheaply	talk loud	OR:	talk loudly
------------	------------	--------------	-----------	------------	-------------

- 1069 a.** Although the *ly* ending usually signifies an adverb, a few adjectives also end in *ly*—for example, *costly*, *orderly*, *timely*, *motherly*, *fatherly*, *friendly*, *neighborly*, *worldly*, *earthly*, *lively*, *lovely*, *lonely*.

Let's look for a less *costly* solution.

Her offer to help you was intended as a *friendly* gesture.

- b.** A few common *ly*-ending words are used both as adjectives and as adverbs—for example, *early*, *only*, *daily*, *weekly*, *monthly*, *quarterly*, *yearly*.

I always try to leave for work at an *early* hour. (Adjective.)

The surge in sales began *early* last month. (Adverb.)

We issue our sales reports on a *quarterly* basis. (Adjective.)

We issue our sales reports *quarterly*. (Adverb.)

We are all waiting for the *first-quarter* sales report. (Compound adjective.)

(**NOT:** We are all waiting for the *first-quarterly* sales report.)

- c.** The words *fast*, *long*, and *hard* are also used both as adjectives and as adverbs.

ADJECTIVES: a *fast* talker a *long*, *hard* winter

ADVERBS: talks *fast* thought *long* and *hard*

- 1070** Words such as *up*, *in*, *out*, *on*, and *off*—commonly recognized as prepositions—also function as adverbs, especially in verb phrases where these words are needed to complete the meaning of the verb. (See also ¶802.)

Used as Adverbs

up:	to <u>look up</u> the definition
	to <u>run up</u> a lot of charges
down:	to <u>take down</u> your name
	to <u>pull down</u> the shade
in:	to <u>trade in</u> your old car
	to <u>stay in</u> for a change
out:	to <u>phase out</u> operations
	to <u>take out</u> the trash
on:	to <u>put on</u> a performance
	to <u>go on</u> working
off:	to <u>write off</u> our losses
	to <u>turn off</u> the lights

Used as Prepositions

to jog <u>up</u> the hill
to run <u>up</u> the steps
to walk <u>down</u> the street
to rappel <u>down</u> the mountain
to see <u>in</u> the dark
to stay <u>in</u> line
to look <u>out</u> the window
to run <u>out</u> the door
to act <u>on</u> the stage
to go <u>on</u> a vacation
to drive <u>off</u> the road
to turn <u>off</u> the road

NOTE: When used in headings and titles as *adverbs*, these short words are capitalized (see ¶361c). When used as *prepositions*, these short words are not capitalized except under special circumstances (see ¶361d).

Problems of Comparison

- 1071** a. Form the comparative degree of *one-syllable* adjectives and adverbs by adding *er* to the positive form. Form the superlative degree by adding *est*. (See *e* below for a few exceptions.)

thin: thinner, thinnest

soon: sooner, soonest

- b. Form the comparative degree of *two-syllable* adjectives and adverbs either by adding *er* to the positive form or by inserting either *more* or *less* before the positive form. Form the superlative degree by adding *est* in some cases or by inserting *most* or *least* before the positive form. In some cases the addition of *er* or *est* will create very awkward forms. Your ear will tell you when to avoid such forms.

happy: happier, more (**OR:** less) happy more hopeful (**NOT:** hopefuller)

likely: likeliest, most (**OR:** least) likely more hostile (**NOT:** hostiler)

often: oftener, more (**OR:** less) often most complex (**NOT:** completest)

highly: highest, most (**OR:** least) highly most troubled (**NOT:** troubledest)

- See ¶825c; see also pages 391–392 for a usage note on *more*.

NOTE: If the positive form ends in a consonant plus *y* (for example, *happy*, *likely*), change the *y* to *i* before adding *er* or *est*. Some *ly*-ending words drop the *ly* in the comparative and superlative (for example, *highly*, *higher*, *highest*; *deeply*, *deeper*, *deepest*). (See also ¶710.)

- c. When adjectives and adverbs contain *three or more syllables*, form the comparative degree by inserting *more* or *less* before the positive form. Form the superlative degree by inserting *most* or *least* before the positive form.

competent: more competent

adventurous: less adventurous

acceptable: most acceptable

carefully: least carefully

- d. Avoid double comparisons.

cheaper (**NOT:** more cheaper)

unkindest (**NOT:** most unkindest)

- e. A few adjectives and adverbs have irregular comparisons. For example:

Positive

good **OR:** well (see page 381)

bad **OR:** ill

far

late

little

many, much

Comparative

better

worse

farther, further (see ¶719)

later, latter (see ¶719)

littler, less, lesser

more

Superlative

best

worst

farthest, furthest

latest, last

littlest, least

most

- f. Some adjectives and adverbs—for example, *square*, *round*, *unique*, *completely*, *universally*, *correct*, *perfect*, *always*, *never*, *dead*—do not logically permit comparison. A square cannot be any *squareer*; a circle cannot be the *roundest* of all circles. Nevertheless, a number of these words may be modified by *more*, *less*, *nearly*, *hardly*, *virtually*, and similar adverbs to suggest something less than absolute perfection in each case.

Next year we hope to do a *more complete* study.

He is looking for a *more universally* acceptable solution.

Continued on page 342

¶1072

Handicraft of this caliber is *virtually unique* these days.

We *almost never* increase our prices more than once a year.

- g.** When referring to *two* persons, places, or things, use the comparative form; when referring to *more than two*, use the superlative form.

That is the *finer* piece of linen. (Only two pieces are involved.)

This is the *finest* piece of linen I could find. (Many pieces are involved.)

Of the two positions open, you have chosen the *more* promising.

Of the three positions open, you have chosen the *most* promising.

That is the *more* efficient of the two methods.

This is the *most* efficient method that could be devised.

I like Evelyn's plan *better* than Joe's or Betty's. (Although three things are involved, they are being compared two at a time; hence the comparative.)

NOTE: In a few idiomatic expressions (such as *Put your best foot forward* and *May the best man win*), the superlative form is used, even though only two things are referred to.

- h.** When comparing a person or a thing *within* the group to which it belongs, use the superlative. When comparing a person or a thing with individual members of the group, use the comparative and the words *other* or *else*.

Susan is the *most* conscientious employee on the staff.

Susan is *more* conscientious than any *other* employee on the staff. (Without the word *other*, the sentence would imply that Susan is not on the staff.)

Los Angeles is the *largest* city in California.

Los Angeles is *larger* than any *other* city in California. (Without *other*, the sentence would imply that Los Angeles is not in California.)

Bert's proposal was the *best* of all that were presented to the committee.

Bert's proposal was *better* than anyone *else's*. (**NOT:** anyone's.)

- i.** Be sure to compare like things. (See also ¶644, note.)

This year's output is lower than last year's. (In other words, "This year's *output* is lower than last year's *output*.")

NOT: This year's output is lower than last year. (Incorrectly compares *this year's output* with *last year*.)

- j.** *More* may be used not only to form the comparative degree of an adjective but also as a simple adjective meaning "many, a greater number of." As a result, the use of *more* can create confusion. For example:

CONFUSING: We need to attract *more talented* applicants for this opening.

CLEAR: We need to attract applicants who are *more talented*.

CLEAR: We need to attract a greater number of *talented* applicants.

► *For a usage note on more, see pages 391–392.*

- 1072** Adverbs such as *only*, *nearly*, *almost*, *ever*, *scarcely*, *merely*, *too*, and *also* should be placed as close as possible to the word modified—usually directly before it. Putting the adverb in the wrong position may change the entire meaning of the sentence. (See also ¶1087.)

Our list of depositors numbers *almost* 50,000. (**NOT:** almost numbers 50,000.)

Only the board can nominate the three new officers. (Cannot be nominated by anyone else.)

The board can *only* nominate the three officers. (They cannot elect.)

The board can nominate *only* the three officers. (They cannot nominate anyone else.)

Elvira and Frank Mancuso have been married for *not quite* two years.

(**NOT:** Elvira and Frank Mancuso have *not quite* been married for two years.)

1073 Do not use an adverb to express a meaning already contained in the verb.

assemble (NOT: assemble together)	finish (NOT: finish up or off)
begin (NOT: first begin)	follow (NOT: follow after)
cancel (NOT: cancel out)	recopy (NOT: recopy again)
combine (NOT: combine together)	recur (NOT: recur again)
confer (NOT: confer together)	refer (NOT: refer back)
continue (NOT: continue on)	repeat (NOT: repeat again)
convert (NOT: convert over)	return (NOT: return back)
cooperate (NOT: cooperate together)	revert (NOT: revert back)

Troublesome Adjectives and Adverbs

► See the individual entries in Section 11 for the following adjectives and adverbs:

A-an	Economic–economical	Livid
Above	En masse	Masterly–masterful
Accidentally	Entitled–titled	Maybe–may be
Ad hominem	Equally–as	More
Adverse–averse	Everyday–every day	More important– more importantly
Afterward–afterwards	Ex–former	More than–over–nearly– almost–less than– about–around
All right	Farther–further	Only
Almost–all most	Fewer–less	Preventive–preventative
Already–all ready	First–firstly, etc.	Proved–proven
Alternate–alternative	Fiscal–financial	Real–really
Altogether–all together	Flammable–inflammable	Reluctant–reticent
Always–all ways	Former–first	Sacrilegious
Another	Fortuitous–fortunate	Said
Anxious–eager	Fulsome	Same
Anymore–any more	Good–well	Scarcely
Anytime–any time	Hardly	Someday–some day
Anyway–any way	Hare-brained	Sometime– sometimes–some time
Awhile–a while	Healthy–healthful	Sure–surely
Backward–backwards	Historic–historical	Unique
Bad–badly	Hopefully	Up
Bald-faced–bare-faced	Incidentally	Verbal
Biannual–biennial– semiannual	Incredible–incredulous	Very
Biweekly–bimonthly	Indifferent–in different	Wise
By and large	Indirect–in direct	Worse–worst
Classic–classical	Intents–intense	
Complementary– complimentary	Lactose–intolerant	
Different–differently	Last–latest	
Disinterested–uninterested	Latter–last	
	Literally	

¶1074

Negatives

- 1074** a. To express a negative idea in a simple sentence, use only one negative expression in the sentence. (A *double negative*—two negative expressions in the same sentence—gives a *positive* meaning.)

We can sit by and do *nothing*.

We *cannot* sit by and do *nothing*. (The *not* and *nothing* create a double negative; the sentence now has a positive meaning: “We ought to do something.”)

Jim is *unaware* of the facts. (Here the negative element is the prefix *un*.)

Jim is *not unaware* of the facts. (With the double negative, the sentence means “Jim *is* aware of the facts.”)

NOTE: A double negative is not wrong in itself. As the examples above indicate, a double negative may offer a more effective way of expressing a *positive thought* than a straightforward positive construction would. However, a double negative *is* wrong if the sentence is intended to have a negative meaning. Remember, two negatives make a positive.

In the course of a lecture on the philosophy of language, Oxford philosopher J. L. Austin noted that while a double negative amounts to a positive, never does a double positive amount to a negative. Someone in the audience was heard to mutter “Yeah, yeah.”

- b. Some words—for example, *hardly*, *only*, and *scarcely*—already have a negative meaning. To preserve this negative meaning, do not use another negative with these words.

Nick *could hardly* expect you to lend him that much money.

(**NOT:** Nick *couldn't hardly* expect you to lend him that much money.)

I *miss hearing* from you on a regular basis.

(**NOT:** I *miss not hearing* from you on a regular basis.)

- c. There is a significant difference between “could not care less” and “could care less.” Saying “I could not care less” means that you no longer care at all. Saying “I could care less” means that you still have a long way to go before you reach the state of “no longer caring at all.” Unfortunately, many people say “I could care less” when what they really mean is “I could not care less.”

► For usage notes on *hardly*, *only*, *scarcely*, and *could not care less*, see the appropriate entries in Section 11.

- 1075** A negative expression gives a negative meaning to the *clause* in which it appears. In a simple sentence, where there is only one clause, the negative expression affects the entire sentence (see ¶1074). In a sentence where there are two or more clauses, a negative expression affects only the clause in which it appears. Therefore, each clause may safely contain one negative expression. A double negative results when there are two negative expressions within the *same* clause.

If Mr. Bogosian *cannot* lower his price, there is *no* point in continuing the negotiations. (The *if* clause contains the negative *not*; the main clause contains the negative *no*. Each clause has its own negative meaning.)

I have *not* met Halliday, and I have *no* desire to meet him.

OR: I have *not* met Halliday, *nor* do I have *any* desire to meet him. (When the negative conjunction *nor* replaces *and*, the adjective *no* changes to *any* so as to avoid a double negative in the second clause.)

We have *never* permitted, *nor* will we permit, any lowering of our standards. (Here the second clause interrupts the first clause. If written out in full, the sentence would read, “We have *never* permitted any lowering of our standards, *nor* will we permit any lowering of our standards.”)

NOTE: A second negative expression may be used in a clause to repeat or intensify the first negative expression. This construction is not a double negative.

No, I did not say that. *He would never, never do a thing like that.* *That's a no-no.*

1076 To preserve the *negative* meaning of a clause, follow these basic principles:

- a. If the clause has a *negative verb* (a verb modified by *not* or *never*), do not use an additional negative expression, such as *nor*, *neither . . . nor*, *no*, *none*, *no one*, or *nothing*. Instead, use the corresponding positive expression, such as *or*, *either . . . or*, *any*, *anyone*, or *anything*.

I have not invited anyone. (**WRONG:** I have *not invited no one.*)

She does not want any. (**WRONG:** She does *not want none.*)

Mary did not have anything to do. (**WRONG:** Mary did *not have nothing to do.*)

I cannot find either the letter or the envelope. (**WRONG:** I *cannot find neither the letter nor the envelope.*)

He did not say whether he would mail the money to us or whether he would bring it himself. (**WRONG:** He *did not say whether he would mail the money to us nor whether he would bring it himself.*)

- b. If a clause contains any one of the following expressions—*no*, *no one*, *none*, *nothing*, or *neither . . . nor* (this counts as one expression)—make sure that the verb and all other words are *positive*.

I see nothing wrong with either proposal. (**NOT:** neither proposal.)

Neither Martha Gutowski nor Yvonne Christopher can attend the meeting. (**NOT:** cannot.)

- c. The word *nor* may be used alone as a conjunction (see the third and fourth examples in ¶1075) or together with *neither*. Do not use *nor* in the same clause with any other negative; use *or* instead.

There are neither diskettes nor toner cartridges in the stockroom.

BUT: *There are no diskettes or toner cartridges in the stockroom.*

(**NOT:** There are *no diskettes nor toner cartridges in the stockroom.*)

There are no clear-cut rights or wrongs in this situation.

(**NOT:** There are *no clear-cut rights nor wrongs in this situation.*)

Francine has not called or written us for some time.

(**NOT:** Francine has *not called nor written us for some time.*)

Never try to argue or debate with Larry.

(**NOT:** *Never try to argue nor debate with Larry.*)

Prepositions

Words Requiring Certain Prepositions

1077 Usage requires that certain words be followed by certain prepositions. Here are some of the most frequently used combinations:

account for something or someone: I find it hard to *account for* his behavior.

account to someone: You will have to *account to* Anne for the loss of the key.

1077

agree on or **upon** (reach an understanding): We cannot *agree on* the price.

agree to (accept another person's plan): Will you *agree to* their terms?

agree with (concur with a person or an idea): I *agree with* your objectives.

angry at or **about** something: He was *angry about* the total disorder in the office.

angry with someone: You have every right to be *angry with* me.

apply for a position: You ought to *apply for* Harry's job, now that he has left.

apply to someone or something: You must *apply yourself to* the job in order to master it. I am thinking of *applying to* the Field Engineering Company.

argue about something: We *argued about* the terms of the contract.

argue with a person: It doesn't pay to *argue with* Bremer.

center on (**NOT:** around): The entire discussion *centered on* increasing our market share.

compare to (assert a likeness): She *compared* my writing *to* E. B. White's. (She said I wrote like E. B. White.)

compare with (analyze for similarities and differences): When she *compared* my writing *with* E. B. White's, she said that I had a similar kind of humor but that my sentences lacked the clean and easy flow of White's material.

conform to (preferred to *with*): These copies do not *conform to* the originals.

consists in (exists in): Happiness largely *consists in* wanting what you have, not having what you want.

consists of (is made up of): Their new formula for a wage settlement *consists of* the same old terms expressed in different language.

convenient for (suitable): What time will be most *convenient for* you?

convenient to (near at hand): Our plant is *convenient to* all transportation facilities in the area.

correspond to (agree with): The shipment does not *correspond to* the sample.

correspond with (exchange letters with): It may be better to see him in person than to *correspond with* him.

differ about something: We *differed about* means but not about objectives.

differ from something else: This job *differs* very little *from* the one that I had.

differ with someone: I *differ with* you over the consequences of our plan.

different from: This product is *different from* the one I normally use.

different than: I view the matter in a *different way than* you do. (Although *from* is normally preferred, *than* is acceptable in order to avoid sentences like "I view the matter in a different way from the way in which you do.")

identical with or **to:** This \$180 suit is *identical with* [**OR:** *to*] one sold for \$235 at other stores.

independent of (**NOT:** from): He wants to be *independent of* his family's money.

interested in: We are *interested in* discussing the matter further with you at the conference.

retroactive to (**NOT:** from): This salary adjustment is *retroactive to* May 1.

speak to (tell something to): You must *speak to* them about their absences.

speak with (discuss with): It was good to *speak with* you yesterday.

wait for: I *waited for* you at the airport. In fact, I *waited for* hours.

wait on: When customers come in, you need to *wait on* them promptly.

Superfluous Prepositions

1078 Omit prepositions that add nothing to the meaning—as in the following examples.

- | | |
|---|--|
| Where is she [at]? | Where did that check go [to]? |
| She could not help [from] laughing. | His office is opposite [to] hers. |
| Your chair is too near [to] your terminal. | The carton apparently fell off [of] the truck. |
| Let's focus [in] on ways to boost sales. | The strike is now over [with]. |
| You'll be working alongside [of] someone who can help you quickly master the new process. | |
| Why don't we meet at about one o'clock? (Omit either <i>at</i> or <i>about</i> .) | |

► For a usage note on all of, see page 361; for a usage note on *at*–*about*, see page 365.

Necessary Prepositions

1079 Conversely, do not omit essential prepositions.

- A couple *of* CDs are missing. (**NOT:** A couple CDs are missing.)
BUT: We'll need to reserve a *couple dozen* rooms for our conference.
Of what use is this gadget? (**NOT:** What use is this gadget?)
 We don't stock that type *of* filter. (**NOT:** We don't stock that type filter.)
 Jo will graduate *from* Yale next spring. (**NOT:** Jo will graduate Yale next spring.)
 Flight 338 is expected to arrive *at* O'Hare at 6:42 p.m.
 (**NOT:** Flight 338 is expected to arrive O'Hare at 6:42 p.m.)
 What time does the Down Easter depart *from* North Station?
 (**NOT:** What time does the Down Easter depart North Station?)
 You appear to have a great interest *in*, as well as a deep respect *for*, fine antiques.
 (**NOT:** You appear to have a great interest, as well as a deep respect *for*, fine antiques.)
 She frequently appears in movies, *in* plays, and *on* television.
 (**NOT:** She frequently appears in movies, plays, and on television.)

NOTE: The preposition *of* is understood in *what color cloth* and *what size shoes*.

Prepositions at the End of Sentences

1080 a. Ending a sentence with a preposition is not incorrect. Whether you do so or not should depend on the emphasis and effect you want to achieve.

INFORMAL: I wish I knew which magazine her article appeared *in*.

FORMAL: I wish I knew *in which* magazine her article appeared.

b. Trying not to end a sentence with a preposition may lead to very awkward results.

STILTED: It is difficult to know *about* what you are thinking.

NATURAL: It is difficult to know what you are thinking *about*.

c. Short questions and statements frequently end with prepositions.

How many can I count *on*? What is this good *for*?

What is this made *of*? We need tools to work *with*.

Where did he come *from*? That's something we must look *into*.

You have nothing to worry *about*. That's the car I want to look *at*.

¶1081

- d.** Some sentences end with what seem like prepositions but are really adverbs.
 I'm sure another job will turn *up*. When does your plane take *off*?
- e.** Sometimes the object of a preposition at the end of a sentence is not expressed.
 Although most of our car trips to the West Coast are uneventful, the last one was anything but.
 (Anything but uneventful.)

NOTE: Many people are familiar with Sir Winston Churchill's complaint to an editor who tried to discourage him from ending his sentences with prepositions:

This is the sort of English up with which I will not put.

At the other extreme is a sentence that probably takes the prize for piling the greatest number of prepositions at the end. It is the complaint of a small child who does not want to listen to a particular bedtime story about Australia:

What did you bring that book that I don't want to be read *to from out of about Down Under up for?*

Both these examples reinforce the main point:

Use good sense in deciding whether or not to end a sentence with a preposition.

BETTER THAN: Use good sense in deciding whether or not to use a preposition to end a sentence with.

Troublesome Prepositions

► See the individual entries in Section 11 for the following prepositions:

At about	In behalf of-on behalf of	Off
Beside-besides	In regards to	On-onto-on to
Between-among	Indifferent-in different	On-upon-up on
Due to-because of-on account of	Indirect-in direct	Opposite
Except	Like-as, as if	Per-a
From-off	Of-have	Toward-towards
In-into-in to		

► For the treatment of words that can function as both prepositions and adverbs, see ¶1070; for the capitalization of such words, see ¶361c-d.

Sentence Structure

Parallel Structure

1081 Express parallel ideas in parallel form.

- a.** Adjectives should be paralleled by adjectives, nouns by nouns, dependent clauses by dependent clauses, and so on.

WRONG: Your new training program was *stimulating* and a *challenge*. (Adjective and noun.)

RIGHT: Your new training program was *stimulating* and *challenging*. (Two adjectives.)

WRONG: The sales representatives have already started *using the new techniques* and *to produce higher sales*. (Gerund phrase and infinitive phrase.)

RIGHT: The sales representatives have already started *using the new techniques* and *producing higher sales*. (Two gerund phrases.)

RIGHT: The sales representatives have already started *to use the new techniques* and *produce higher sales*. (Two infinitive phrases.)

WRONG: This scanner is *easy* to operate, *efficient*, and *it is relatively inexpensive*. (Two adjectives and a clause.)

RIGHT: This scanner is *easy* to operate, *efficient*, and *relatively inexpensive*. (Three adjectives.)

NOTE: Parallelism is especially important in displayed enumerations.

POOR: This article will discuss:

1. How to deal with corporate politics.
2. Coping with stressful situations.
3. What the role of the manager should be in the community.

BETTER: This article will discuss:

1. *Ways* to deal with corporate politics.
2. *Techniques* of coping with stressful situations.
3. The *role* of the manager in the community.

OR: This article will tell managers how to:

1. *Deal* with corporate politics.
2. *Cope* with stressful situations.
3. *Function* in the community.

b. Correlative conjunctions (*both . . . and*, *either . . . or*, *neither . . . nor*, *not only . . . but also*, *whether . . . or*, etc.) should be followed by elements in parallel form.

WRONG: We are flying both *to Chicago* and *San Francisco*.

RIGHT: We are flying to both *Chicago* and *San Francisco*.

RIGHT: We are flying both *to Chicago* and *to San Francisco*.

WRONG: He would neither *apologize* nor *would he promise to reform*.

RIGHT: He would neither *apologize* nor *promise to reform*.

RIGHT: *He would not apologize*, nor *would he promise to reform*.

WRONG: Dwayne is not only *gifted as a violinist* but also *as a music critic*.

RIGHT: Dwayne is gifted not only *as a violinist* but also *as a music critic*.

NOTE: When using the correlative conjunction *not only . . . but also*, you do not have to place *also* immediately after *but*; in fact, *also* may be omitted altogether.

Dwayne is not only *a sensitive musician* but *a music critic* who is sensitive to the gifts of others.

► *For parallelism in headings, see ¶1425; for parallelism in outlines, see ¶1719.*

Dangling Constructions

1082 When a sentence begins with a participial phrase, an infinitive phrase, a gerund phrase, or an elliptical clause (one in which essential words are missing), make sure that the phrase or clause logically agrees with the subject of the sentence; otherwise, the construction will “dangle.” To correct a dangling construction, make the subject of the sentence the doer of the action expressed by the opening phrase or clause. If that is not feasible, use an entirely different construction.

a. Participial Phrases

WRONG: Stashed away in the attic for the past hundred years, the *owner* of the painting has decided to auction it off. (What was stashed in the attic: the owner or the painting?)

RIGHT: The *owner* of the painting that has been stashed away in the attic for the past hundred years has decided to auction it off.

¶1082

WRONG: After coming out of a coma, the *police officer* asked the driver what caused the accident. (As worded, this version suggests that the police officer had been in a coma.)

RIGHT: After the driver came out of a coma, the police officer asked her what caused the accident.

WRONG: Having studied your cost estimates, a few *questions* occur to me about your original assumptions. (This version implies that the *questions* have studied the cost estimates.)

RIGHT: Having studied your cost estimates, I would like to ask you a few questions about your original assumptions. (In the correct version, the person who studied the cost estimates is now the subject of the sentence and is the one asking the questions.)

WRONG: Having said that, *let's* now consider the objections that have been raised against this position.

RIGHT: Having said that, I would now like to consider the objections that have been raised against this position.

WRONG: Putting the issue of costs aside, *production delays* need to be discussed.

RIGHT: Putting the issue of costs aside, we need to discuss production delays.

NOTE: A few participles have now become established as prepositions; for example: *according*, *assuming*, *barring*, *concerning*, *considered*, *considering*, *depending*, *following*, *given*, *judging*, *owing to*, *pending*, *providing*, *regarding*, *respecting*, and *speaking*. Therefore, when they introduce phrases at the start of a sentence, it is not essential that they refer to the subject of the sentence. (For a further discussion of these phrases at the start of a sentence, see ¶1082e.)

Considering how long the lawsuit has dragged on, it might have been wiser not to sue.

According to the latest polls, our candidate should easily win the election.

Regarding your request for a leave of absence, we are still waiting for a response from Human Resources.

b. Infinitive Phrases

WRONG: To appreciate the full significance of Fox's latest letter, all the previous correspondence should be read.

RIGHT: To appreciate the full significance of Fox's latest letter, you should read all the previous correspondence.

WRONG: To obtain this free booklet, the enclosed coupon should be mailed at once.

RIGHT: To obtain this free booklet, mail the enclosed coupon at once.

c. Prepositional-Gerund Phrases

WRONG: By installing a computerized temperature control system, a substantial saving in fuel costs was achieved.

RIGHT: By installing a computerized temperature control system, we achieved a substantial saving in fuel costs.

WRONG: In analyzing these specifications, several errors have been found.

RIGHT: In analyzing these specifications, I have found several errors.

d. Elliptical Clauses

WRONG: If ordered before May 1, a 5 percent discount will be allowed on these goods.

RIGHT: If these goods are ordered before May 1, a 5 percent discount will be allowed.

WRONG: When four years old, my family moved to Omaha.

RIGHT: When I was four years old, my family moved to Omaha.

e. Absolute Phrases

Absolute phrases are not considered to “dangle,” even though they come at the beginning of a sentence and do not refer to the subject.

Strictly speaking, what you did was not illegal—but it wasn’t right.

Speaking of weird performances, what did you think of George’s presentation?

Judging by the response to our ads, our chances of meeting our sales goal this year are nil.

That having been said, I think we can now concentrate on where we go from here.

Assuming the QA review goes smoothly, the software should be ready for sale at the beginning of next month.

Considering our market share at the end of last year, it’s incredible how much we’ve grown in the past six months.

Given the urgency of the situation, we’re going to have to do the best we can with the limited resources we have.

Sometimes an absolute phrase comes at the end of a sentence.

The graduation ceremonies will be held in the quadrangle, *weather permitting*.

I think we’re doing quite well, *all things considered*.

Avoid using absolute phrases when they produce awkward sentences.

AWKWARD: The speeches having been concluded, we proceeded to vote.

BETTER: After the speeches were concluded, we proceeded to vote.

1083 When verbal phrases and elliptical clauses fall elsewhere in the sentence, look out for illogical or confusing relationships. Adjust the wording as necessary.

WRONG: I saw two truck drivers get into a fistfight while jogging down the street.

RIGHT: While jogging down the street, I saw two truck drivers get into a fistfight.

1084 a. A phrase will dangle at the beginning of a sentence if it leads the reader to expect a certain word as the subject and then another word is used instead.

WRONG: As head of the program committee, we think you should make immediate arrangements for another speaker. (The head of the committee is *you*, not *we*.)

RIGHT: Since you are the head of the program committee, we think you should make immediate arrangements for another speaker.

WRONG: As a young boy, the woman I was destined to marry did not appeal to me in any way. (That woman never was a “young boy.”)

RIGHT: When I was a young boy, the woman I was destined to marry did not appeal to me in any way.

WRONG: You voted for change. As your next governor, you will get change. (The voters are not going to be the next governor.)

RIGHT: You voted for change. As your next governor, I will see to it that you get change!

WRONG: Bought as a wreck, Dr. Oliver lovingly restored the 1957 Rolls-Royce. (What was bought as a wreck was the car, not Dr. Oliver.)

RIGHT: Dr. Oliver lovingly restored the 1957 Rolls-Royce he bought as a wreck.

WRONG: After his death, a reporter from the *Times* interviewed many of Marlowe’s business associates in an attempt to create a total picture of the man. (It was not the reporter but Marlowe who had died.)

RIGHT: After Marlowe’s death, a reporter from the *Times* interviewed many of his business associates in an attempt to create a total picture of the man.

¶1085

- b.** A phrase will dangle if the doer of the action is not the subject of the sentence but is expressed as a possessive form modifying the subject.

WRONG: Despite having been declared mentally incompetent, Adam *Blondel's* lawyers tried to protect his claim to his inheritance. (This sentence suggests that the lawyers have been declared mentally incompetent.)

RIGHT: Even though Adam Blondel had been declared mentally incompetent, his lawyers tried to protect his claim to his inheritance.

WRONG: Having called in sick for the fifth straight day, *Paula's* colleagues began to worry about the state of her health. (This sentence suggests that Paula's colleagues are the ones who have been calling in sick.)

RIGHT: After Paula called in sick for the fifth straight day, her colleagues began to worry about the state of her health.

WRONG: A native of Cleveland, *his* first teaching job was at Stanford University. (This sentence suggests that his first teaching job was a native of Cleveland.)

RIGHT: A native of Cleveland, Glen began his career as a teacher at Stanford University.

- 1085** A phrase will dangle at the end of a sentence if it refers to the meaning of the main clause as a whole rather than to the doer of the action.

WRONG: Our sales have been steadily declining for the past six months, thus creating a sharp drop in our profits. (As worded, the sentence makes it appear that our sales, by themselves, have created the drop in profits. Actually, it is *the fact* that our sales have been declining which has created the drop in profits.)

RIGHT: The steady decline in our sales for the past six months has created a sharp drop in our profits.

RIGHT: Our sales have been steadily declining for the past six months. As a result, we have experienced a sharp drop in our profits.

Misplaced Modifiers

- 1086** Watch out for misplaced modifiers (either words or phrases) that provide the basis for unintended (and sometimes humorous) interpretations. (See also ¶1072.)

WRONG: I suspect that my assistant accidentally dropped the report I had been drafting in the wastebasket. (What an uncomfortable location in which to draft a report!)

RIGHT: The report I had been drafting has disappeared. I suspect that my assistant accidentally dropped it in the wastebasket.

WRONG: Here are some helpful suggestions for protecting your valuable possessions from our hotel security staff. (Can no one be trusted?)

RIGHT: Here are some helpful suggestions from our hotel security staff for protecting your valuable possessions.

WRONG: One of our assistant vice presidents has been referred to a personal finance counselor with serious credit problems. (Would you consult such a counselor?)

RIGHT: One of our assistant vice presidents has serious credit problems and has been referred to a personal finance counselor.

WRONG: For anyone who has children and does not know it, there is a free after-school program at the Marshfield Community Center.

RIGHT: Anyone with children will be glad to know that there is a free after-school program at the Marshfield Community Center.

WRONG: The hospital would not disclose the name of the man who drove his car off the pier at the request of his family.

RIGHT: At the request of the family, the hospital would not disclose the name of the man who drove his car off the pier.

WRONG: Lincoln wrote the Gettysburg Address while traveling to Gettysburg on the back of an envelope.

RIGHT: While traveling to Gettysburg, Lincoln wrote the Gettysburg Address on the back of an envelope.

1087 Watch out for *squinting modifiers*—modifiers placed in such a way that they can be interpreted as modifying either what precedes or what follows.

SCINTILLATING: Traveling abroad frequently can become exhausting. (Does *frequently* modify *Traveling abroad* or *can become exhausting*?)

CLEAR: Frequently traveling abroad [OR: Making frequent trips abroad] can become exhausting.

CLEAR: Traveling abroad can *frequently* become exhausting.

NOTE: This problem can also occur with other parts of speech. Consider the following newspaper headlines.

“Software Helps Blind Computer Users”

“District Attorney Declines to Try Shooting Suspect”

“U.S., Allies Demand N. Korea Drop Nukes”

“Security Needs Swell Federal Workforce”

► For additional examples, see ¶1046, note; see also ¶¶1062g, 1072.

Run-On Sentences

1088 When two independent clauses appear in the same sentence with only a comma to separate them, the result is known as a *run-on sentence*. (See also ¶128.) You can correct this error in one of three ways: (a) use a stronger mark of punctuation in place of the comma (a semicolon, a colon, or a dash); (b) insert a coordinating conjunction (*and*, *but*, *or*, or *nor*) after the comma; (c) treat the two independent clauses as separate sentences.

WRONG: Steve and Leslie are now at a conference in Tokyo, they will both be back in the office next week. (A comma is not enough to link two independent clauses in the same sentence.)

RIGHT: Steve and Leslie are now at a conference in Tokyo; they will both be back in the office next week. (Insert a semicolon.)

RIGHT: Steve and Leslie are now at a conference in Tokyo, but they will both be back in the office next week. (Insert a coordinating conjunction.)

RIGHT: Steve and Leslie are now at a conference in Tokyo. They will both be back in the office next week. (Make two sentences.)

SECTION 11

Usage

A-An	Anyway—Any Way
A-Of	Appraise—Apprise
Above	Appreciate
Accidentally	Aren't I
A.D.—B.C.	As
Additionally	As . . . as—Not so . . . as
Ad Hominem	As Far as
Ado—Adieu—To-Do	At—About
Adverse—Averse	Attorney—Lawyer
Affect—Effect	Augur—Auger
Afterward—Afterwards	Author
Age—Aged—At the Age of	Awhile—A While
Aggravate	Backward—Backwards
Ain't	Bad—Badly
All of	Balance
All Right	Bald-Faced—Bare-Faced
Allude—Refer	Bear—Bare
Almost—All Most	Beg the Question
A Lot—Alot—Allot	Being That
Aloud—Out Loud	Bellwether
Already—All Ready	Beside—Besides
Alternate—Alternative	Between—Among
Altogether—All Together	Between You and Me
Always—All Ways	Biannual—Biennial—Semiannual
Amount—Number	Biweekly—Bimonthly
And	Both—Each
And Etc.	Both Alike—Both Equal—Both
And/Or	Together
Another	Bring—Take
Anxious—Eager	But . . . However
Anymore—Any More	But What
Anyone—Any One	By and Large
Anytime—Any Time	Cannot Help but

Capital–capitol–Capitol	Each Other–One Another
Cease–Seize	Economic–Economical
Celebrity–Notoriety	Emeritus–Emerita
Chaise Longue	En Masse
Classic–Classical	Enormity
Click–Click on	Ensure–Insure–Assure
Collide With–Crash Into	Enthused Over
Come–Go	Entitled–Titled
Come to–Come and	Equally–As
Coming Down the Pike	Espresso
Coming to Terms With	Etc.–Et Al.
Compare to–Compare With	Ethnic References
Complement–Compliment	Everyday–Every Day
Complementary–Complimentary	Everyone–Every One
Comprise–Compose	Every Time
Consensus	Ex–Former
Consists of–Includes	Except
Convince–Persuade	Fait Accompli
Copyright	Fall Between–Fall Through
Copywriter	Farther–Further
Core–Corps	Fell Swoop
Could Have–Could of	Fewer–Less
Could Not Care Less	Firm–Company–Corporation
Crescendo	First–Firstly, etc.
Data	Fiscal–Financial
Day and Age	Flack–Flak
Déjà Vu	Flammable–Inflammable
Deserts–Desserts	Flaunt–Flout
Dialogue	Flesh Out–Flush Out
Different–Differently	Former–First
Different From–Different Than	Fortuitous–Fortunate
Dilemma	From–Off
Disc–Disk	Fulsome
Disinterested–Uninterested	Gauntlet–Gantlet
Done	Gender–Sex
Don't (Do Not)	Gibe–Jibe
Doubt That–Doubt Whether	Good–Well
Due Diligence–Due Process	Graduated–Was Graduated
Due to–Because of–On Account of	Grow
Each–Either–Both	Had Better

Hair's Breadth	Lay-Lie
Harbinger	Lay Down-Lie Down
Hardly	Learn-Teach
Hare-Brained	Leave-Let
Healthy-Healthful	Lend-Borrow
Hear-Here	Lend-Loan
Help	Let-Let's
Historic-Historical	Libel-Slander
Hoi Polloi	Like-As-As if
Home-Hone	Like-Such as

Someday—Some Day	Whoever—Who Ever
Someone—Some One	Wise
Sometime—Sometimes—Some Time	Worse—Worst
Spitting Image	Would Have—Would of
Supposed to	

► For a list of words that are frequently misused because they sound alike or look alike, see ¶719; for definitions of grammatical terms, see the appropriate entries in the Glossary of Grammatical Terms (Appendix A).

¶1101

1101 The following entries will help you avoid a number of common mistakes in usage.

A-an. In choosing *a* or *an*, consider the sound (not the spelling) of the word that follows. Use the article *a* before all *consonant* sounds, including sounded *h* (as in *hat*), long *u* (as in *use*), and *o* with the sound of *w* (as in *one*).

a day	a unit	a one-week delay
a week	a union	a 60-day note
a year	a uniform	a CPA
a home	a youthful spirit	a B.A. degree
a house	a euphoric feeling	a PSAT score
a hotel	a European trip	a UN resolution

Use *an* before all *vowel* sounds (except long *u*) and before a silent *h*.

an asset	an heir	an AT&T product
an essay	an hour	an EPA ruling
an eyesore	an honor	an FTC ruling
an input	an honest man	an IRS audit
an opening	an hors d'oeuvre	an NBC newscast
an outcome	an 8-hour day	an OPEC price cut
an umbrella	an 80-year-old man	an ROI objective
an upsurge	an 11 a.m. meeting	an X-ray reading

In speech, both *a historic occasion* and *an historic occasion* are correct, depending on whether the *h* is sounded or left silent. In writing, *a historic occasion* is the form more commonly used.

When you are dealing with an abbreviation, the choice of *a* or *an* will depend on whether you pronounce the expression letter by letter or as a word. For example, if you pronounce URL as *yoo-arr-ell*, you would write “*a URL*.” If you pronounced it as *erl*, you would write “*an URL*.” (See also ¶501b.)

Abbreviations pronounced letter by letter are called *initialisms*; abbreviations pronounced as words are called *acronyms*. (See also ¶501b.)

In the following examples, note that when the consonants *F, H, L, M, N, R*, and *S* are pronounced as letters at the start of an initialism, they are preceded by *an*. When these same letters introduce an acronym and are pronounced as part of a word, they are preceded by *a*.

Pronounced Letter by Letter

- an FBI agent
- an HMO physician
- an L.A.-based firm
- an M.B.A. degree
- an NAACP member
- an R.S.V.P.
- an SRO performance

Pronounced as a Word

- a FICA tax increase
- a HUD project
- a LIFO method of inventory valuation
- a MADD fund-raising drive
- a NATO strategy
- a RICO investigation
- a SWAT team

When other consonants appear at the start of an initialism or an acronym, they are always preceded by *a*.

a CEO's compensation package	a CARE package
a DUI conviction	a DARE researcher
a P&L statement	a PEN conference
a VOA broadcast	a VISTA project
a WTO decision	a WATS line

NOTE: As a rule, use *a* or *an* before each item in a series. However, if the series describes a single concept, use only one article at the outset.

We need *a* scanner, *a* printer, and *a* shredder. (**NOT:** *a* scanner, printer, and shredder.)

Amy's lunch typically consists of *a* peach, *a* pear, and *an* apple.

BUT: The Benners live *a* hop, skip, and jump away from our house.

A-of. Do not use *a* in place of *of*.

What sort *of* turnout did you have at your seminar?

(**NOT:** What sort *a* turnout did you have at your seminar?)

The weather has been kind *of* cool for this time of year.

(**NOT:** The weather has been *kinda* cool for this time of year.)

A-per. See *Per-a*.

About. See *More than—over—nearly—almost—less than—about—around*.

About—at. See *At-about*.

Above. Avoid the use of *above* before a noun. (See also *Said*.)

in the paragraph *above* **OR:** in the *preceding* paragraph

(**RATHER THAN:** in the *above* paragraph)

Accidentally. Note that this word ends in *ally*. (The form *accidently* is incorrect.)

A.D.—B.C. A.D. (abbreviation of *anno Domini*, Latin for “in the year of our Lord”) and **B.C.** (“before Christ”) are usually written in all-caps, with a period following each letter and with no internal space. Do not use a comma to separate **B.C.** or **A.D.** from the year.

150 B.C.

465 A.D. (ordinary usage)

in the first century B.C.

A.D. 465 (formal usage)

You may also type **A.D.** and **B.C.** in small caps (**A.D.**, **B.C.**).

NOTE: In works of history and theology, the term **A.D.** is often replaced by the abbreviation **C.E.** (meaning “in the Common Era”); **B.C.** is replaced by **B.C.E.** (meaning “before the Common Era”).

Additionally. Avoid the use of *additionally* as a transitional expression. Use *in addition*, *moreover*, *furthermore*, or *besides* instead. (See ¶138a.)

AWKWARD: *Additionally*, the new packaging will reduce costs by 20 percent.

BETTER: *Moreover*, the new packaging will reduce costs by 20 percent.

1101

Ad hominem. The correct spelling of this Latin expression is *ad hominem* (**NOT:** ad homonym). A person who makes an *ad hominem* attack on an opponent in a dispute or debate is attacking the opponent's character rather than the opponent's arguments. This expression, which literally means "to the man," is so commonly used that it does not need to be italicized.

Ado-adieu-to-do. *Ado* means "fussing over trivial things." *Adieu* means "farewell."

Paula decided to walk out without further *ado*. (Without making a fuss.)

Paula decided to walk out without further *adieu*. (Without saying good-bye.)

To-do has much the same meaning as *ado* but is used in place of *ado* in certain idiomatic expressions.

Lloyd is making a big *to-do* over the transfer of his key sales rep to another region.

From my perspective, it's all much *ado* about nothing.

Adverse—averse. *Adverse* means "unfavorable, harmful, hostile." *Averse* means "opposed (to), having a feeling of distaste (for)."

This research report will have an *adverse* [unfavorable] effect on our sales.

The medication you are taking could have *adverse* [harmful] side effects.

I am not *averse* [opposed] to working on weekends for the next month.

I am *averse* [opposed] to exercise in any form.

BUT: I have *adverse* [hostile] feelings about exercise in any form.

Affect—effect. *Affect* is normally used as a verb meaning "to influence, change, assume." *Effect* can be either a verb meaning "to bring about" or a noun meaning "result, impression."

The court's decision in this case will not *affect* [change] the established legal precedent.

She *affects* [assumes] an unsophisticated manner.

It is essential that we *effect* [bring about] an immediate improvement in sales.

It will be months before we can assess the full *effect* [result] of the new law.

This new policy is likely to *effect* [bring about] the growth of international investments.

This new policy is likely to *affect* [change] the growth of international investments. (Note that this sentence does not indicate whether international investments will increase or decrease.)

NOTE: In psychology, *affect* is used as a noun meaning "feeling, emotion," and the related adjective *affective* means "emotional." Because of the limited context in which these terms are likely to be used with these meanings, it should be easy to distinguish them from *effect* as a noun and the related adjective *effective*.

We need to analyze the *effects* [results] of this new marketing strategy.

We need to analyze the *affects* [emotions] produced by this conflict.

Which technique is *effective* [capable of producing the desired results]?

Let's deal with the *affective* [emotional] factors first.

Afterward—afterwards. Both forms are correct, but *afterward* is more common in U.S. usage.

Age-aged-at the age of

I interviewed a man *aged* 52 for the job. (**NOT:** a man age 52.)

I don't plan to retire *at the age* of 65. (**NOT:** at age 65.)

NOTE: Elliptical references to age—for example, *at age* 65—should not be used except in technical writing such as human resources manuals.

See the chart on page 64 for the schedule of retirement benefits for employees who retire *at age* 65.

Aggravate. Use *aggravate* to mean “make something worse.”

Although she meant to ease the tension between her partners, Eve's remarks actually *aggravated* the situation. (Made the situation worse.)

Avoid using *aggravate* to mean “irritate, annoy, exasperate.”

AVOID: I get so *aggravated* when Joe tries to tell me how to do my job.

BETTER: I get so *irritated* when Joe tries to tell me how to do my job.

Ain't. *Ain't* has long been considered nonstandard usage, but it is acceptable in certain idiomatic expressions.

Making that many mistakes in one document *ain't* easy.

Two thousand dollars for a thirty-minute speech? That *ain't* hay!

You *ain't* seen nothin' yet.

If it *ain't* broke, don't fix it. (One could clean up this expression grammatically and write, “If it isn't broken, don't fix it,” but then one would lose the special flavor of the original.)

All of. *Of* is not needed after *all* unless the following word is a pronoun serving as the object of the preposition *of*. However, it is not incorrect to use *of* after *all*.

All my plans have gone up in smoke.

OR: *All of* my plans have gone up in smoke.

All the staff members belong to the softball team.

OR: *All of* the staff members belong to the softball team.

All of us belong to the softball team.

All right. Like *all wrong*, the expression *all right* should be spelled as two words. (While some dictionaries list *alright* without comment, this spelling is not generally accepted as correct.)

Allude–refer. *Allude* means “to refer indirectly to something”; *refer* means “to make specific mention of.”

The CEO merely *alluded* to a possible decline in sales this year, but he provided no specific details.

To divert the analysts' attention, he *referred* to the data in last year's annual report.

Almost. See *More than–over–nearly–almost–less than–about–around*.

Almost–all most. See also *Most*.

The plane was *almost* [nearly] three hours late.

We are *all most* pleased [all very much pleased] with the new schedule.

1101

A lot–alot–allot. The phrase *a lot* (meaning “to a considerable quantity or extent”) always consists of two words. Do not spell this phrase as one word (*alot*).

Thanks *a lot* [NOT: *alot*] for all your help on this year’s budget.

Do not confuse this phrase with the verb *allot* (meaning “to distribute or assign a share of something”).

You will have to *allot* a portion of next year’s budget to cover unforeseen expenses, even though you are not likely to have *a lot* of money left over after you cover your basic operations.

► *See Kind of–sort of and Kind of a*

Aloud–out loud. Both terms mean essentially the same thing, but in certain expressions one term sounds more natural than the other. For example, people “laugh out loud,” they often “think out loud,” and they may say, “For crying out loud.” On the other hand, it sounds more natural for someone to “read aloud to children” or “utter her innermost thoughts aloud.”

There is a very subtle difference between these two versions of the same sentence.

Although the letter was marked “Confidential,” he read it *out loud* to everyone in the department. (*Out loud* conveys a louder, more emphatic breach of the silence.)

Although the letter was marked “Confidential,” he read it *aloud* to everyone in the department. (*Aloud* suggests a gentler tone of voice.)

Already—all ready

The order had *already* [previously] been shipped.

The order is *all ready* [all prepared] to be shipped.

Alternate–alternative. In most respects, these two words have distinct meanings. *Alternate* means “happening in turns.”

The committee ordinarily meets at 10:30 on *alternate* Thursdays. (In other words, on every other Thursday.)

Alternate also refers to someone who substitutes for another. Thus *an alternate juror* is someone who hears all the testimony in a court case and is prepared to replace one of the original twelve jurors if the need arises.

Howard Draper and Kris Zetterberg will rotate as *alternate* captains during the coming season.

Alternative can mean “offering a choice or an option” or “one of several choices.” The word appears in such common terms as *alternative medicine*, *alternative therapies*, *the alternative press*, *the alternative minimum tax*, *alternative music*, and *alternative rock*.

If the planning board turns down our proposal to build a warehouse at the site we’ve selected, our only *alternative* will be to look for a site in another town.

Next month’s speaker will discuss *alternative* fuel technologies.

Despite the attempt of grammarians to keep the use of these two terms separate, *alternate* is now acceptably used as a synonym for *alternative* in certain contexts.

If May 24 is not a good day for you to meet with us, we can suggest some *alternate* [OR: *alternative*] dates.

Motorists should look for *alternate* [OR: *alternative*] routes while Highway 35 is closed for repairs.

The full value of an unused ticket can be applied toward the purchase of a ticket to an *alternate* [OR: *alternative*] destination.

Altogether—all together

He is *altogether* [entirely] too lazy to be a success.

The papers are *all together* [all in a group] in the binder I sent you.

Always—all ways

She has *always* [at all times] done good work.

We have tried in *all ways* [by all methods] to keep our employees satisfied.

Among—between. See *Between—among*.

Amount–number. Use *amount* for things in bulk, as in “a large amount of lumber.” Use *number* for individual items, as in “a large number of inquiries.”

Monday’s ad generated a large *amount* of *interest*.

Monday’s ad generated a large *number* of *phone calls*. (**NOT:** a large amount.)

And. Retain *and* before the last item in a series, even when that last item consists of two words joined by *and*.

We need to increase our expense budgets for advertising, staff training, *and* research and development.

(**NOT:** We need to increase our expense budgets for advertising, staff training, research and development.)

Beginning a sentence with *and* or some other coordinating conjunction (*but*, *or*, or *nor*) can be an effective means—if not overused—of giving special attention to the thought that follows the conjunction. No comma should follow the conjunction at the start of a new sentence unless a parenthetical element occurs at that point.

Last Friday George promised to submit the market analysis this Monday. *And* then he took off on a two-week vacation.

Tell him to return to the office at once. *Or* else.

BUT: George called from Lake Tahoe to say that the report was undergoing some last-minute changes and would be on my desk by 11 a.m. *And*, to my delight, it was! (Here the comma following the conjunction *And* precedes the parenthetical element *to my delight*)

Groucho Marx wrote this thank-you note: “I’ve had a perfectly wonderful evening. But this wasn’t it.”

NOTE: Each of the sentences above illustrates the fact that beginning a sentence with a conjunction can be an effective rhetorical device. However, as a group these sentences also show that if you overuse this device you will quickly dissipate its effectiveness.

And etc. Never use *and* before *etc.* (See *Etc.–et al.*)

And/or. Avoid this legalistic term in ordinary writing. Instead of writing *A and/or B*, write *A or B or both*.

Another. Although *another* is often used colloquially as a synonym for *additional*, avoid this usage in formal writing.

FORMAL: I have four copies left, but I will need an *additional* ten copies.

INFORMAL: . . . but I will need *another* ten copies.

¶1101

Anxious–eager. Both *anxious* and *eager* mean “desirous,” but *anxious* also implies fear or concern.

I'm *anxious* to hear whether we won the bid or not.

I'm *eager* [NOT: anxious] to hear about your new house.

Anymore–any more

We used to vacation in Bermuda, but we don't go there *anymore* [any longer].

Please call me if you have *any more* [any additional] suggestions.

Anyone–any one. See ¶1010, note.

Anytime–any time

Come see us *anytime* you are in town. (One word meaning “whenever.”)

Did you have dealings with Crosby at *any time* in the past? (Two words after a preposition such as *at*)

Can you spend *any time* [any amount of time] with Jill and me when you next come to Tulsa?

Anyway–any way

Anyway [in any case], we can't spare him now.

If we can help in *any way* [by any method], please phone.

Appraise–apprise

We would like to *appraise* [set a value on] Mrs. Ellsworth's estate.

I will *apprise* [inform] you of any new developments.

I will keep you *apprised* of the reactions of the board members to your proposal.

(NOT: I will keep you *appraised* of the reactions of the board members to your proposal.)

Appreciate. When used with the meaning “to be thankful for,” the verb *appreciate* requires an object.

NOT: We would appreciate if you could give us your decision by May 1.

BUT: We would appreciate *it* if you could give us your decision by May 1. (Pronoun as object.)

OR: We would appreciate *your* [NOT: you] *giving us your decision by May 1*. (Noun clause as object. See ¶1647b on the use of *your* before a verb ending in *ing*.)

We will always appreciate the *help* you gave us. (Noun as object.)

I will appreciate *whatever you can do for us*. (Noun clause as object.)

Aren't I. This idiomatic expression is grammatically incorrect: it uses a third-person plural verb, *are*, with a first-person singular pronoun, *I*. Nevertheless, it is considered acceptable in informal writing and in speech. In formal situations, use *am I not*.

INFORMAL: I'm getting a new company car this year, *aren't I?*

FORMAL: I'm getting a new company car this year, *am I not?*

Around. See *More than–over–nearly–almost–less than–about–around*.

As. Do not use *as* for *that* or *whether*.

I do not know *whether* [NOT: as] I can go.

Use *because*, *since*, or *for* rather than *as* in clauses of reason.

I can't attend the meeting in Omaha, *because* [NOT: as] I'll be out on the West Coast that day.

As-as if-like. See *Like-as-as if*.

As . . . as—not so . . . as. The term *as . . . as* is now commonly used in both positive and negative comparisons. Some writers, however, prefer to use *not so . . . as* for negative comparisons.

Bob is every bit as bright as his older sister. (Positive comparison.)

It is *not as* important as you think. **OR:** . . . *not so* important as you think. (Negative comparison.)

NOTE: Do not replace the second *as* with *than*.

Our family spends twice *as* much money on entertainment *as* on food.

(**NOT:** Our family spends twice *as* much money on entertainment *than* on food.)

As-equally. See *Equally-as*.

As far as. *As far as* may be used as a preposition or as a subordinating conjunction.

I can drive you *as far as* Spokane. (Used as a preposition.)

I would recommend this template *as far as* format is concerned. (Used as a subordinating conjunction.)

BUT NOT: I would recommend this template *as far as* format. (Either create a clause following *as far as*, as in the example above, or change *as far as* to *on the basis of* or a similar expression: *I would recommend this template on the basis of format*.)

As per. See *Per-a*.

Assure. See *Ensure-insure-assure*.

At-about. Use either *at* or *about* but not both words together. If you write “I’ll meet you *at* 6:30,” you’re promising to be there “at 6:30 on the dot.” If you write “I’ll meet you *about* 6:30,” you’re promising to be there “around 6:30, but don’t hold me to the minute, okay?” In effect, using *at* and *about* together suggests precision and vagueness at the same time. For that reason use one or the other but not both.

Attorney-lawyer. These terms are not synonyms. An *attorney* is someone empowered to serve as another person’s legal agent. A *lawyer* is someone licensed to practice law. An attorney does not have to be a lawyer; by means of a legal instrument called a *power of attorney*, a layperson can be authorized to act as another person’s agent. An attorney who is also a lawyer is known as an *attorney at law*. (See ¶804c.)

Augur-auger. To say that something *augurs* well or does not *augur* well means that the future for that thing either looks bright or looks dismal. Avoid the temptation to spell *augur* as *auger*, since an auger is a tool for boring holes.

Author. Do not use *author* as a verb.

How many books have you *written* [**NOT:** authored]?

Averse-adverse. See *Adverse-averse*.

Awhile-a while. The one-word form is an adverb; the two-word form is a noun.

You may have to wait *awhile*. (Adverb.)

You may have to wait for *a while*. (Noun; object of the preposition *for*.)

I ran into him *a while* back.

NOTE: When a preposition precedes this expression, be sure to spell *a while* as two words.

Once in *a while* I get together with my old friends from high school.

Continued on page 366

¶1101

Back-pedal–soft-pedal. See *Soft-pedal–back-pedal*.

Backward–backwards. Both forms are correct, but *backward* is more common in U.S. usage; for example, “to lean over *backward*.”

Bad–badly. Use the adjective *bad* (not the adverb *badly*) after the verb *feel* or *look*. (See ¶1067.)

I feel *bad* [NOT: badly] about the mistake.

BUT: He was hurt *badly*.

NOTE: The only way you can “feel badly” is to have your fingertips removed first.

Balance. Do not use *balance* to mean “rest” or “remainder” except in a financial or accounting sense.

I plan to use the *rest* of my vacation time next February.

(NOT: I plan to use the *balance* of my vacation time next February.)

BUT: The *balance* of the loan falls due at the end of this quarter.

Bald-faced–bare-faced. When it is shockingly obvious that a statement is untrue, that statement is often referred to as a *bald-faced lie* or a *bare-faced lie* (NOT: a bold-faced lie OR: a bear-faced lie).

B.C.–A.D. See *A.D.–B.C.*

Bear–bare. Use *bear* (NOT: bare) in the following expressions: *bear the brunt*, *bear in mind*, *bear the name*, *bear witness*, and *bring to bear*. However, use *bare* in these expressions: *to bare one's soul*, *to face up to the bare facts*, and *a bare-knuckled or bare-handed fight*. When you are faced with adversity, it's a good thing to *grin and bear it*. If instead you decide to *grin and bare it*, you could be seriously adding to your problems.

Because. See *Reason is because*.

Because–since. See *Since–because*.

Because of. See *Due to–because of–on account of*.

Beg the question. This phrase is often used mistakenly to mean “to avoid answering a question” or “to invite a question.” Here is what it really means: “to assume as a fact the very thing you are trying to prove.” The illustration most often cited is this: “Parallel lines never meet because they are parallel.”

Being that. Do not use *being that* for *since* or *because*.

Because I arrived late, I could not get a seat.

(NOT: *Being that* I arrived late, I could not get a seat.)

Bellwether. A *bellwether* originally was the sheep who led the flock. Now the term designates a leader who points the way to the future. Please note that the correct spelling of this word is *bellwether* (NOT: bellweather).

Beside—besides

I sat *beside* [next to] Mr. Parrish's father at the meeting.

Besides [in addition], we need your support of the measure.

Between—among. Ordinarily, use *between* when referring to *two* persons or things and *among* when referring to *more than two* persons or things.

The territory is divided evenly *between* the two sales representatives.

The profits are to be evenly divided *among* the three partners.

Use *between* with more than two persons or things when they are being considered in pairs as well as in a group.

In packing china, be sure to place bubble sheets *between* the plates.

The memo says something different when you read *between* the lines.

I like to walk barefoot on the beach and feel the sand *between* my toes.

In the course of these negotiations with our trading partners, I've been shuttling *between* Washington, London, Berlin, and Moscow.

Between you, me, and the gatepost, we don't stand a chance of making budget.

Consider how *between* and *among* convey different shades of meaning in the following examples.

Joel resigned because of the numerous disagreements *between* him and his partners. (Use *between* when the intended meaning pits Joel against all of his partners as a bloc.)

Joel resigned because of the numerous disagreements *between* him and each of his partners. (Here again use *between* when Joel's disagreements with his partners are on a one-to-one basis.)

Joel resigned because of the numerous disagreements *among* his partners. (Use *among* when there are multiple disagreements involving two or more partners in the firm.)

Between you and me (not: I). See ¶1055b.

Biannual—biennial—semiannual. *Biannual* and *semiannual* both mean “occurring twice a year.” *Biennial* means “occurring every two years.” Because of the possible confusion between *biannual* and *biennial*, use *semiannual* when you want to describe something that occurs *twice* a year.

PREFERRED: our *semiannual* sales conference

CLEARER THAN: our *biannual* sales conference

If you think that your reader could misconstrue *biennial*, avoid the term and use *every two years* instead.

Within our global organization each national company holds its own sales conference *on a semiannual basis* [**OR:** *semiannually*]; an international sales conference is scheduled *on a biennial basis* [**OR:** *biennially* **OR:** *every two years*].

Biweekly—bimonthly. These two words do not mean the same thing. Moreover, *bimonthly* has two quite different meanings, which could confuse your readers.

If you are paid *biweekly* [every two weeks], you get 26 checks a year.

If you are paid *bimonthly* [twice a month], you get only 24 checks a year.

OR: If you are paid *bimonthly* [every two months], you get only 6 checks a year.

NOTE: To keep your meaning clear, avoid *bimonthly* and say “twice a month” or “every two months.” You may also use *semimonthly* to mean “twice a month.”

1101

Borrow–lend. See *Lend–borrow*.

Both–each. *Both* means “the two considered together.” *Each* refers to the individual members of a group considered separately.

Both designs are acceptable.

The designs are *each* acceptable.

Each sister complained about the other.

(**NOT:** *Both* sisters complained about the other.)

NOTE: Use *each* in cases where *both* leads to confusion or ambiguity.

CONFUSING: There are two statues on *both* sides of the entrance hall. (Is there a total of two statues or four?)

CLEAR: There are two statues on *each* side of the entrance hall.

OR: There is a statue on *each* side of the entrance hall.

► See *Each–either–both*.

Both alike–both equal–both together. *Both* is unnecessary with *alike*, *equal*, or *together*.

These laser printers are *alike*. (**NOT:** both alike.)

These tape systems are *equal* in cost. (**NOT:** both equal.)

We will travel *together* to Japan. (**NOT:** both travel together.)

Bring–take. *Bring* indicates motion toward the speaker. *Take* indicates motion away from the speaker.

Please *bring* the research data with you when you next come to the office. (This office is where the speaker works.)

BUT: Please *take* the research data with you when you next go to the office. (The speaker is referring to someone else’s office.)

Please *take* the enclosed letter to Farley when you go to see him.

You may *take* my copy with you if you will *bring* it back by Friday.

► See *note under Come–go*.

But . . . however. Use one or the other.

We had hoped to see the show, *but* we couldn’t get tickets.

OR: We had hoped to see the show; *however*, we couldn’t get tickets.

(**BUT NOT:** . . . *but* we couldn’t get tickets, *however*.)

But what. Use *that*.

I do not doubt *that* [**NOT:** *but what*] he will be elected.

By and large. This expression, which means “on the whole,” should be spelled *by and large* (**NOT:** *by enlarge* **OR:** *by in large*).

Can–could. See *May–can (might–could)*.

Cannot help but. This expression is a confusion of two others, namely, *can but* and *cannot help*.

I can but try. (**BETTER:** *I can only try*.)

I cannot help feeling sorry for her. (**NOT:** *I cannot help but feel sorry for her*.)

Capital–capitol–Capitol. As an adjective, *capital* can mean “chief” or “foremost” (*of capital importance*); it can also mean “punishable by death” (*a capital crime*). As a noun, *capital* can mean “a principal sum of money” (*a project requiring a great deal of capital*), or it can designate a large letter as opposed to a lowercase letter (*A, B, or C* vs. *a, b, c*).

Capital can also be used to mean “the city that serves as the seat of a country’s government (*Washington, D.C., is this nation’s capital*). Be sure to distinguish *capital* in this sense from these two terms: *capitol*, which refers to the building in which a state legislative body meets, and *Capitol*, which refers to the building in which the U.S. Congress meets. The term *Capitol Hill*, which literally refers to the site of the Capitol, is also an imaginative name for the legislative branch of the U.S. government—the Senate and the House of Representatives or, collectively, the U.S. Congress.

Cease–seize. *Cease* (meaning “to stop”) is the correct word to use in expressions such as *cease fire* and *cease and desist*. *Seize* (meaning “to grasp” or “take by force”) is the correct word to use in expressions such as *seize the day* and *seize the opportunity*.

Celebrity–notoriety. *Celebrity* means “fame.” *Notoriety* also means “fame” but of a disreputable nature.

With the publication of her third novel, Jenna has finally achieved the *celebrity* she deserves.

With the conviction of Fred Koenig and his two sons, the Koenig family has achieved an unparalleled *notoriety* in this community.

Chaise longue. So many people misspell this term as *chaise lounge* and mispronounce it as well that many dictionaries now present *chaise lounge* as an acceptable variation. However, *chaise longue* remains the correct way to spell this word. (For the plural of *chaise longue*, see page 207.)

Class. See *Kind*.

Classic–classical. *Classic* means “serving as a standard or model” (as in a *classic triple play*, a *blunder of classic proportions*). *Classical* refers to the language and art of earlier cultures (as in a *study of classical Greek* or *sketches of classical architecture*).

Last night’s concert offered a *classic* performance of Mahler’s Ninth Symphony.

Next week’s concert will offer an odd program of *classical* and pop music.

Click–click on. To select an item such as a button on the computer screen, one *clicks* the button. The word *on* is not needed.

To get the company’s mailing address, *click* Contact Us. (NOT: click on Contact Us.)

Collide with–crash into. Use *collide with* when two moving objects come together with violent impact. If only one of the objects is moving, use *crash into*.

Wilson claims he was going only 35 miles an hour when he *collided with* an SUV.

Vivian lost control of the car and *crashed into* a telephone pole.

(NOT: Vivian lost control of the car and *collided with* a telephone pole.)

Continued on page 370

¶1101

Come–go. The choice between verbs depends on the location of the speaker. *Come* indicates motion *toward*; *go*, motion *away from*. (See also *Bring–take*.)

When Bellotti *comes* back, I will *go* to the airport to meet him.

A manager speaking over the phone to an outsider: Will it be convenient for you to *come* to our office tomorrow?

NOTE: When discussing your travel plans with a person at your destination, adopt that person's point of view and use *come*.

An outsider speaking over the phone to a manager: Will it be convenient for me to *come* to your office tomorrow?

Midwesterner to Californian: I am *coming* to California during the week of the 11th. I will *bring* the plans with me if they are ready.

However, if you are discussing your travel plans with someone who is *not* at your destination, observe the regular distinction between *come* and *go*.

An outsider speaking to an outsider: I hope it will be convenient for me to *go* to their office tomorrow.

Midwesterner to Midwesterner: I am *going* to California during the week of the 11th. I will *take* the plans with me if they are ready.

Come to–come and. In formal writing, use *come to* instead of the colloquial *come and*.

FORMAL: Come *to* see me.

INFORMAL: Come *and* see me.

Coming down the pike. This expression, which means “coming in the future,” should be spelled *coming down the pike* (**NOT:** coming down the pipe). *Pike* in this expression means “turnpike.”

Coming to terms with. This expression, which means “coming to an agreement,” should be spelled *coming to terms with* (**NOT:** coming to turns with).

Company–firm–corporation. See *Firm–company–corporation*.

Compare to–compare with. See ¶1077.

Complement–compliment. *Complement* as a noun means “something that completes” or “one of two mutually completing parts”; as a verb it means “to complete, to be complementary to.” *Compliment* as a noun means “an admiring or flattering remark”; as a verb it means “to praise, to pay a compliment to.”

A simple dessert of berries and sherbet makes a fine *complement* to an elaborate meal with several rich courses.

The CEO was full of *compliments* for your sales presentation yesterday.

Complementary–complimentary. *Complementary* means “serving to complete” or “mutually supplying what each other lacks.” *Complimentary* means “flattering” or “given free.”

Our top two executives work so well as a team because they bring *complementary* skills and expertise to their jobs.

The CEO had many *complimentary* things to say about your sales presentation.

May I get a *complimentary* copy of your new book?

Comprise–compose. *Comprise* means “to contain, consist of”; *compose* means “to make up.” The parts *compose* (make up) the whole; the whole *comprises* (contains) the parts; the whole is *composed of* (**NOT:** is comprised of) the parts.

The parent corporation *comprises* [consists of] three major divisions.

Three major divisions *compose* [make up] the parent corporation.

Do not use *comprise* in the passive.

The parent corporation *is composed of* [is made up of] three major divisions.

(**NOT:** The parent corporation *is comprised of* three major divisions.)

Do not use *comprise* and *include* as synonyms. *Include* implies that what follows represents some but not all of the parts. *Comprise* implies that what follows embraces all the parts.

The alphabet *includes* the letters A to Y.

BUT: The alphabet *comprises* [**OR:** *consists of*] the letters A to Z. (See the entry for *Consists of–includes*.)

Consensus. One seeks a *consensus* (**NOT:** a consensus of opinion).

Consists of–includes. Use *consists of* to introduce a complete list of items; use *includes* to introduce a partial list.

This mailing list *consists of* all our active accounts.

This mailing list *includes* the active accounts that were opened this year.

NOTE: Do not use *etc.* or *and so on* at the end of a list introduced by *includes*, since the verb makes it sufficiently clear that the list is not complete. (See also the entry for *Etc.–et al.*)

Convince–persuade. You *convince* others when you get them to agree that what you are saying is correct. You *persuade* others when you get them to do something that they hadn’t planned to do. *Convince* implies changing another person’s mind; *persuade* implies getting another person to act. When used in a sentence, *persuade* is typically followed by an infinitive (as in the examples below).

I *convinced* Vic that Maria’s proposal was more cost-effective than his.

I *persuaded* Vic to drop his objections to Maria’s proposal.

Alice *convinced* me that my situation was not as bad as I had thought.

She *persuaded* me to tear up my letter of resignation.

Copyright. *Copyright* is a legal term that refers to the exclusive right to publish or reproduce something (typically, a manuscript). *Copyrighting* signifies the act of obtaining a copyright. If you use *copyright* as a verb, be sure to spell the past tense and the past participle as *copyrighted* (**NOT:** copywritten); the present participle is *copyrighting* (**NOT:** copywriting).

Make sure the material you plan to publish is not already *copyrighted*.

My firm specializes in *copyrighting* material to be published as books or articles.

Copywriter. This term refers to a person who writes advertising copy. It has no connection with *copyrighting*.

¶1101

Core–corps. *Core* refers to the central part or the heart of something. *Corps* refers to a group of people united in a common activity (such as the U.S. Marine Corps or the Peace Corps). When pronounced, *corps* sounds exactly like *core* because the *p* and *s* in *corps* are silent. As a result, it is easy to misuse these words in certain expressions.

loyal to the *corps* (**NOT:** core)

rotten to the *core* (**NOT:** corps)

Corporation–firm–company. See *Firm–company–corporation*.

Could have–could of. See *Of–have*.

Could not care less. To say that you “could not care less” means that you do not care at all. To say that you “could care less” implies that your inability to care has not yet reached rock bottom. If the first meaning is the one you wish to communicate, do not omit *not*. (See also ¶1074c.)

If Val does not attend our class reunion, I *could not care less*. (In effect, I don’t care at all.)

When I told another classmate about Val, he said, “Well, I *could care less*—but then I’d really have to work at it.”

Couldn’t–hardly. See *Hardly*.

Crash into. See *Collide with–crash into*.

Crescendo. This term refers to a process in which something gradually becomes louder or greater. Something can reach a peak or a climax as the result of a crescendo, but it is incorrect to say that something “has reached a crescendo.”

The traffic jams on the Long Island Expressway were so bad last Sunday that the sound of honking horns reached the *highest level* before noon.

(**NOT:** The traffic jams on the Long Island Expressway were so bad last Sunday that the sound of honking horns reached a *crescendo* before noon.)

Data. See ¶1018b.

Day and age. This expression, which refers to the present time, uses *and* (**NOT:** in).

We no longer do things that way in this *day and age*. (**NOT:** in this day in age.)

Déjà vu. Strictly speaking, this term refers to the illusion that what you are now experiencing for the first time is something that happened to you in the past.

The first time we went to Maine for a summer vacation, I had a *déjà vu* sensation that I had been living there for most of my life.

The term is now loosely used to refer to something that actually did happen in the past. In your own writing, use *déjà vu* only to refer to an illusion.

AVOID: When I went back for my twentieth college reunion, I had that *déjà vu* sensation of coming to the campus for the first time as a freshman. (With apologies to Yogi Berra, this is not a case of “*déjà vu* all over again.” This is a memory or a recollection.)

BETTER: When I went back for my twentieth college reunion, it brought back memories of coming to the campus for the first time as a freshman.

Deserts–desserts. Although these two words are pronounced alike, *deserts* refers not to the final course of a meal (*desserts*) but to a richly deserved reward. Thus if

someone has worked hard to achieve a particular goal, that person is entitled to his or her “just deserts.” In the extreme case of a seven-year-old boy who has eaten all of his broccoli at dinner, one might justifiably say that he has earned his “just desserts.” Otherwise, always write “just deserts.”

Dialogue. The use of *dialogue* as a verb is a matter of taste. If it sounds like jargon to you (as it does to most people), use a different word.

Parents need to spend more time *talking* with their children.

(**RATHER THAN:** Parents need to spend more time *dialoguing* with their children.)

Different–differently. When the meaning is “in a different manner,” use the adverb *differently*.

I wish we had done it *differently*.

It came out *differently* than we expected. (See ¶1077.)

After linking verbs and verbs of the senses, the adjective *different* is correct. (See ¶1067.)

That music sounds completely *different*.

He seems [appears] *different* since his promotion.

Don’t believe anything *different*. (Meaning “anything that is different.”)

Different from–different than. See ¶1077.

Dilemma. A *dilemma* is a situation in which one must make a choice between two or more unpleasant alternatives. Do not use *dilemma* as a synonym for *problem* or *predicament*.

Many communities now face a common *dilemma*: whether to raise real estate taxes or cut essential services.

Many communities now face a common *problem*: how to provide adequate shelter for the homeless.

Disc–disk. *Disc* is the customary spelling in terms such as *disc brakes*, *compact disc*, *laser disc*, *optical disc*,* *videodisc*, and *disc jockey*.

Disk is the customary spelling in computer terms such as *disk drive*, *disk space*, *disk directory*, *disk operating system*, *floppy disk*, *hard disk*, and *diskette*; it is also the spelling used for *spinal disk* and *slipped disk*.

Disinterested–uninterested. The primary meaning of *disinterested* is “unbiased, impartial.” This word is now often used incorrectly as a synonym for *uninterested*, which means “unwilling to take an interest in.”

I am trying to evaluate these conflicting accounts from a *disinterested* [impartial] perspective.

I can’t understand why my son is so totally *uninterested* [**NOT:** disinterested] in his courses.

As Roy Blount Jr. has observed in *Alphabet Juice*, “Every time you use *disinterested* to mean *uninterested*, an angel dies.”

Continued on page 374

*The 2009 printing of *Merriam-Webster’s Collegiate Dictionary*, Eleventh Edition, shows *optical disk*, but the form *optical disc* (which appears in other dictionaries) is more consistent with the spelling of *compact disc*, *laser disc*, and *videodisc*.

¶1101

Done. When you hear people say “I done it,” please tell them tactfully to say “I did it.” (See also ¶1032b, e.)

Don’t (do not). When you hear people use one of the following expressions—*he don’t, she don’t, or it don’t*—please tell them tactfully to use *doesn’t*.

He *doesn’t* talk easily.

BUT: I *don’t* think so.

She needs help, *doesn’t* she?

They *don’t* want any help.

It *doesn’t* seem right to penalize them.

We *don’t* understand.

Doubt that–doubt whether. Use *doubt that* in negative statements and in questions. Use *doubt whether* in all other cases. (See also *If–whether*.)

We do not *doubt that* she is capable. (Negative statement.)

Does anyone *doubt that* the check was mailed? (Question.)

I *doubt whether* I can go.

Due diligence–due process. Do not be tempted to write *do* in these expressions. The correct word is *due*. This is also the correct spelling to use when “giving someone his or her due” or “giving credit where credit is due.”

Due to–because of–on account of. *Due to* introduces an adjective phrase and should modify nouns. It is normally used only after some form of the verb *to be* (*is, are, was, were*, etc.).

Her success is *due to* talent and hard work. (*Due to* modifies *success*.)

Because of and *on account of* introduce adverbial phrases and should modify verbs.

He resigned *because of* ill health. (*Because of* modifies *resigned*.)

(**NOT:** He resigned *due to* ill health.)

Each–either–both. Use *each* in cases where *either* or *both* leads to confusion or ambiguity. (See also *Both–each*.)

CONFUSING: The landscaper has planted two gingko trees on *either* side of the driveway. (A total of two trees or four trees?)

CONFUSING: The landscaper has planted two gingko trees on *both* sides of the driveway. (Again, a total of two trees or four trees?)

CLEAR: The landscaper has planted two gingko trees on *each* side of the driveway. (A total of four trees.)

CLEAR: The landscaper has planted one gingko tree on *each* side of the driveway. (A total of two trees.)

Each other–one another. Use *each other* to refer to two persons or things and *one another* for more than *two*.

Al and Ed respected *each other’s* abilities. The four winners congratulated *one another*.

Eager–anxious. See *Anxious–eager*.

Economic–economical. *Economic* refers to economics (as in *the economic factors affecting the volatility of the stock market*). *Economical* means “thrifty” (as in *my mother’s economical habit of keeping a canister for “string too short to be saved”*).

Effect–affect. See *Affect–effect*.

E.g. See *I.e.–e.g.*

Either–each–both. See *Each–either–both*.

Emeritus–emerita. The terms *emeritus* (m.) and *emerita* (f.) are honorary designations used mainly with academic titles to signify that the holders of those titles are now retired from active service. These terms usually follow the title (for example, *Paul Shea, professor emeritus; Jean Lovett, professor emerita*). However, when a title is long, *emeritus* or *emerita* may precede the title for smoother reading (for example, *Denton Fox, emeritus professor of Asian studies OR: Denton Fox, professor emeritus of Asian studies*). Capitalize these honorary titles when they appear before a person's name (for example, *Professor Emeritus Hugh Benz; Dean Emerita Ann Cory*).

En masse. This French expression (meaning "in one body" or "all together") is pronounced "on mass" but is spelled *en masse*. The phrase does not need to be italicized because it is considered part of the English language.

Enormity. Use this word only in reference to an outrageous act or a monstrous condition. Do not use *enormity* to mean "great size"; use *enormousness* or *enormous size* instead.

We are still trying to cope with the *enormity* of the scandal.

BUT: We must find ways to deal with the *enormous size* of the national debt. (Those who are appalled by the nation's current level of debt could, in this instance, justifiably refer to the *enormity* of the national debt.)

Ensure–insure–assure. *Ensure* means "to make certain." *Insure* means "to protect against loss." *Assure* means "to give someone confidence"; the object of this verb should always refer to a person.

I want to *ensure* [make certain] that nothing can go wrong tomorrow.

I want to *insure* this necklace [protect it against loss] for \$5000.

I want to *assure* you [give you confidence] that nothing will go wrong.

Enthused over. Use *was* or *were enthusiastic about* instead.

The sales staff *was enthusiastic about* next year's styles.

(NOT: The sales staff *enthused over* next year's styles.)

Entitled–titled. The primary meaning of *entitled* is "having a right to."

After a year you will be *entitled* to two weeks of vacation time.

It is now generally acceptable to use *entitled* as a synonym for *titled* and say that a book or a similar item is *entitled* in a certain way.

The book I plan to write about my attempts to survive marriage and five children will be *entitled* [OR: *titled*] Looking Out for Number Seven.

You'll find some valuable tips in the article *entitled* "Protecting Yourself From Identity Theft." (Note that a comma is not used before a quoted title.)

Equal. See *Both alike–both equal–both together*.

Equally–as. Use either *equally* or *as* but not both words together.

This printer is the latest model, but that one is *equally* good.

OR: This printer is the latest model, but that one is just *as* good.

(BUT NOT: This printer is the latest model, but that one is *equally as* good.)

¶1101

I would pick Pam for that job, but Joe is *equally* capable.

OR: I would pick Pam for that job, but Joe is every bit *as* capable.

(**BUT NOT:** I would pick Pam for that job, but Joe is *equally as* capable.)

Espresso. This word should be spelled and pronounced as *espresso* (**NOT:** expresso).

Etc.–et al. The abbreviation *etc.* stands for *et cetera* and means “and other things.” The abbreviation *et al.* stands for *et alii* and means “and other people.” *Etc.* is used at the end of a list of things that has been left incomplete. *Et al.* is primarily used in bibliographic citations when a given work has three or more authors; in that case, only the first author is named and *et al.* takes the place of the other authors’ names. (See ¶1537c.) Do not use *and* before *etc.* or *et al.* since these abbreviations already contain a word (*et*) meaning “and.” Although these abbreviations represent Latin phrases, they are considered part of the English language and thus are not italicized in ordinary use.

Use a comma before and after *etc.* and *et al.* (unless the expression falls at the end of a sentence or requires a stronger mark of punctuation such as a semicolon). In formal writing, use *and the like* or *and so on* in place of *etc.*; use *and others* or *and other people* in place of *et al.*

NOTE: Do not use *etc.* or an equivalent expression at the end of a series introduced by *such as*, *for example*, or *e.g.* Such terms imply that only a few selected examples will be given; therefore, it is unnecessary to add *etc.* or *and so on*, which suggests that further examples could be given.

As part of its employee educational program, the company offers courses in report writing, business communication, grammar and style, *and so on*.

OR: . . . the company offers courses *such as* report writing, business communication, and grammar and style.

(**BUT NOT:** . . . the company offers courses *such as* report writing, business communication, grammar and style, *and so on*.)

► *For the use or omission of a comma before such as, see ¶¶148–149.*

Ethnic references. When identifying U.S. citizens or residents as members of a certain ethnic group, use great care in choosing an appropriate term. There is often a good deal of disagreement within the group about which terms are acceptable and which are offensive, so always respect individual preferences if you know what they are. (See ¶348.)

- a. Use *African Americans* or *Afro-Americans* to refer to black people of African ancestry. The terms *Negroes* and *colored people* are rarely used today except in the names of long-established organizations (for example, the United Negro College Fund and the National Association for the Advancement of Colored People). Use the term *blacks* only in a context where you might also refer to *whites*. Use a term like *African Americans* (which reflects ethnic ancestry rather than skin color) in a context where you are also referring to other ethnic groups such as *Latinos*.

the votes of Latinos and *African Americans*

(**RATHER THAN:** the votes of Latinos and *blacks*)

- b.** Use *Hispanics* to refer broadly to people who trace their roots to Latin America or Spain. Use *Latinos* to refer to people of Latin-American ancestry (that is, from Central or South America). The term *Chicanos* may be used to refer to people of Mexican ancestry, but some members of this group consider the term offensive; a safer alternative is *Mexican Americans*.

Within the groups designated *Hispanic*, *Latino*, or *Chicano*, some people are white and some black. Therefore, do not use these terms in the same context with *white* or *black*.

the buying patterns of Hispanics and *African Americans*

(**RATHER THAN:** the buying patterns of Hispanics and *blacks*)

When referring to a group of men, use *Latinos* or *Chicanos*. When referring to a group of women, use *Latinas* or *Chicanas*. When reference is being made to a mixed group of men and women, it has been traditional to simply use the masculine form to refer to the entire group. However, it is now preferable to use both the masculine and the feminine forms in such references; for example, *Latinos and Latinas OR: Chicanos and Chicanas*.

NOTE: The term *Hispanic* does not apply to Brazilians, who trace their roots to Portugal and speak Portuguese. Refer to these people simply as Brazilians.

- c.** The terms *Anglo-Americans* and *Anglos* are used in some parts of the United States to refer to white people who have an English-speaking background.

Are there significant differences in the consumer preferences of Latinos, African Americans, and *Anglos*? (Note that all three groups are identified here by ethnic ancestry and not by color.)

Ideally, the term *whites* should be used only in a context where you might also refer to *blacks*. However, in the absence of a more widely accepted term than *Anglos* or *Anglo-Americans*, use *whites* even though other groups are identified by ethnic ancestry in the same context.

Are there significant differences in the consumer preferences of Latinos, African Americans, and *whites*?

- d.** Use *Asian Americans* to refer to people of South and East Asian ancestry. When appropriate, use a more specific term—for example, *Japanese American* or *Korean American*. When referring to people who live in Asia, use *Asians* (rather than *Asia-tics* or *Orientals*, which many now consider offensive).

- e.** The term *Native American* is still the way many American Indians prefer to be identified. Many others, however, like to be called by the name of their particular tribe (for example, Hopi or Sioux); these same people prefer to be called *American Indians* when reference is made to all the tribes in the United States. The term *Indian* should be used only to refer to people who live in India.

- f.** The term *people of color* refers broadly to people who trace their roots to non-European countries—for example, African Americans, Native Americans, and Asian Americans.

¶1101

- g.** Many ethnic references consist of two words, the second of which is *American*. Do not hyphenate terms like *an African American*, *a German American*, or a *Chinese American* when they are used as nouns, because the first element in each case modifies the second.* Hyphenate such terms, however, when they are used as adjectives: *African-American entrepreneurs*, *a German-American social club*, *Chinese-American restaurants*. Also hyphenate such terms when the first element is a prefix; for example, *Afro-Americans*, *Anglo-Americans*.

NOTE: The term *hyphenated American* refers to an earlier stylistic practice of hyphenating nouns like *Polish Americans* and *Swedish Americans*. This term has fallen into disfavor because it implies that hyphenated Americans are not fully American.

Everyday—every day

You'll soon master the *everyday* [ordinary] routine of the job.

He has called *every day* [each day] this week.

Everyone—every one. See ¶1010, note.

Every time. Always spell this expression as two words.

Every time I come up with a new idea, Wilkerson shoots it down.

(**NOT:** *Everytime* I come up with a new idea, Wilkerson shoots it down.)

Ex-former. Use *ex-* with a title to designate the person who *immediately* preceded the current titleholder in that position; use *former* with a title to designate an earlier titleholder.

Charles Morganstern is the *ex-president* of the West Harrisburg Chamber of Commerce. (He held office immediately before the current president.)

BUT: Charles Morganstern is a *former* president of the West Harrisburg Chamber of Commerce. (He held office sometime before the current president and that person's immediate predecessor.)

Except. When *except* is a preposition, be sure to use the objective form of a pronoun that follows. (See also ¶1055b.)

Everyone has been notified *except* Jean and *me*. (**NOT:** except Jean and *I*.)

Fait accompli. This French expression, which means “a done deal,” should begin with the word *fait* (**NOT:** fate). Because of the frequency with which this expression is used, it does not require italics.

Fall between—fall through. Something can be said to “fall between two stools,” but something cannot be said to “fall between the cracks.” Something may “fall through the cracks.”

Farther—further. *Farther* refers to actual distance; *further* refers to figurative distance and means “to a greater degree” or “to a greater extent.”

The drive from the airport was *farther* [in actual distance] than we expected.

Let's plan to discuss the proposal *further* [to a greater extent].

Fell swoop. In the expression *in one fell swoop*, note that the adjective is spelled *fell* (**NOT:** foul or fowl). *Fell* means “deadly.” This expression is sometimes facetiously changed to “one swell foop.”

*Merriam-Webster hyphenates these terms when they are used as nouns.

Fewer-less. *Fewer* refers to number and is used with *plural* nouns. *Less* refers to degree or amount and is used with *singular* nouns.

Fewer accidents [a smaller number] were reported than we expected.

Less effort [a smaller degree] was put forth by the organizers, and thus *fewer* people [a smaller number] attended.

Note the difference in meaning in the following pair of examples:

In the future our company may hire *fewer* skilled workers [a smaller number of workers who are skilled].

In the future our company may hire *less* skilled workers [workers with a lower level of skill].

► See also the usage note on more on page 391.

When dealing with things that can be counted, you may use either *fewer than* or *less than*, depending on the effect you want to achieve.

Fewer than 20 people attended the in-service workshop. (*Fewer than* is grammatically correct, but it sounds formal, stiff, and even a little stuffy.)

Less than 20 people attended the in-service workshop. (Strictly speaking, the use of *less than* here is not grammatically correct, but like the expression “It’s me,” *less than* is acceptable because it sounds more colloquial, more natural.)

The expression *less than* (rather than *fewer than*) precedes nouns referring to periods of time, distance, amounts of money, quantities, and percentages.

less than ten years ago less than 35 years old

less than six miles away less than 10°F

less than \$1 million less than 20 percent of the voters

less than 20 pounds less than half of our customers

After a reference to a number of items, the expression *or fewer* would certainly be correct, but *or less* is more commonly used.

in 100 words *or less* (RATHER THAN: in 100 words or fewer)

in groups of six people *or less* (RATHER THAN: in groups of six people or fewer)

Sign over a checkout line: 10 items *or less*. (This wording sounds better in the casual setting of a supermarket than *10 items or fewer*.)

Firm-company-corporation. Use *firm* to refer only to a business partnership or a small unincorporated business but not to a company or a corporation. **EXCEPTION:** Within the financial industry, brokerage firms that later become corporations are still referred to as firms.

First-firstly, etc. In enumerations, use the forms *first*, *second*, *third* (NOT: firstly, secondly, thirdly).

Fiscal-financial. The adjective *fiscal* (as in *fiscal year 2009* or *FY2009*) can be used to refer to all types of financial matters—those of governments and private businesses. However, with the exception of *fiscal year*, it is better to use *fiscal* only in connection with government matters and to use *financial* in all other situations.

NOTE: Within a governmental context, it is customary to use *monetary* (rather than *fiscal*) to refer to the nation’s money supply.

The Federal Reserve will be meeting next week to discuss possible changes in *monetary* policy. (Changes in policy that would affect the nation’s money supply.)

Continued on page 380

¶1101

Flack–flak. A *flack* is a PR person—a professional who provides publicity for various clients. The term *flak* originated in World War II and refers to the debris from exploding antiaircraft shells that could bring down an airplane. Since then *flak* has taken on the broader meaning of criticism intended to bring down a person's reputation.

Senator Dingwall has taken a lot of *flak* for the speech he gave last Friday.

He could use a good *flack* to help him recover from this public relations disaster.

Flammable–inflammable. Both terms mean “easily ignitable, highly combustible.” Since some readers may misinterpret *inflammable* to mean “nonflammable,” *flammable* is the clearer form.

Flaunt–flout. *To flaunt* means “to show off, to make a showy display of.” *To flout* means “to disrespect or show one’s contempt for something.” Although *flaunt* is often used where *flout* is the appropriate word, careful writers will respect the difference between these two words.

In his contact with others, Hal does not *flaunt* his wealth or his political connections.

Those restaurant owners intend to *flout* the no-smoking rules recently enacted.

BUT: Those restaurant owners intend to *flaunt* their decision to disregard the no-smoking rules recently enacted.

Flesh out–flush out. These two terms are often confused, even though they mean different things. *To flesh something out* means to add details or specifics to a bare-bones idea. *To flush something out* means to force something out into the open (as hunting dogs do with quail in a forest).

I like the idea you’re toying with. Now *flesh* it *out* so that the board has a full-blown proposal to evaluate.

He’s not telling us everything about his involvement in the Crawley affair. We need to *flush out* the full story.

Former–ex. See *Ex-former*.

Former–first. *Former* refers to the first of two persons or things. When more than two are mentioned, use *first*. (See also *Latter–last*.)

This item is available in wool and in Dacron, but I prefer the *former*.

This item is available in wool, in Dacron, and in Orlon, but I prefer the *first*.

Fortuitous–fortunate. *Fortuitous* means “accidental, happening by chance.” *Fortunate* means “lucky, being rewarded beyond what one deserves.”

I hadn’t seen Arnie in years, so it was *fortuitous* [it happened by chance] that we found ourselves seated next to each other on a flight to Houston.

When he invited me to join him in a new partnership that he was setting up, I realized how *fortunate* [lucky] I was to be in the right place at the right time.

From–off. Use *from* (**NOT:** off) with persons.

I got the answer I needed *from* Margaret [**NOT:** off Margaret].

Fulsome. Do not use *fulsome* to mean “lavish” or “profuse.” As commonly used, *fulsome* has the negative sense of “excessive.” For example, *fulsome praise* is praise so excessive as to be offensive.

Further-farther. See *Farther-further*.

Gauntlet-gantlet. A *gauntlet* is a glove. At one time a person actually threw down his gauntlet as a way of issuing a challenge. The person who then picked up the gauntlet did so to indicate his willingness to accept the challenge. The expressions “to throw down the gauntlet” and “to pick up the gauntlet” remain in use today, even though no glove is actually involved.

A *gantlet* is a form of punishment whereby the victim has to run between two rows of men who have clubs and other weapons with which to strike the victim. Thus the expression “to run the gantlet” has come to mean “to undergo a punishing ordeal.” Although many authorities now accept “to run the gauntlet” as the preferred form, a glove has never been involved in the actual punishment. Thus there is good reason to continue to preserve a distinction and write “to run the gantlet.”

Gender-sex. Use *gender* to refer to social or cultural characteristics of males and females; for example, *gender gap*. Use *sex* to refer to biological characteristics.

The results of the lab tests have been broken down according to the age and sex of the participants in the study.

See Chart 2-5 for an analysis of Presidential voting patterns on the basis of *gender*.

NOTE: In a grammatical context, *gender* refers to the classification of nouns and pronouns as masculine, feminine, and neuter.

Gibe-jibe. A *gibe* is an insulting or taunting remark. *To gibe* means “to scoff at.” Do not use *gibe* as a synonym for *jibe*, which means “to agree.”

The mayor brushed off the *gibe*, saying he was used to insults at the hands of his political opponents.

Why don’t the figures from these two sources *jibe*? (**NOT:** *gibe*.)

Go-come. See *Come-go*.

Good-well. *Good* is an adjective. *Well* is typically used as an adverb but may be used as an adjective to refer to the state of someone’s health.

Marie got *good* grades in school. (Adjective.)

I will do the job as *well* as I can. (Adverb.)

NOTE: *To feel well* means “to be in good health.” *To feel good* means “to be in good spirits.”

He admits he does not feel *well*/today. (Adjective.)

The security guards feel *good* about their new contract. (Adjective.)

Graduated-was graduated. Both forms are acceptable. However, use *from* after either expression.

My daughter *graduated from* [**OR:** *was graduated from*] MIT last year.

(**NOT:** My daughter *graduated* MIT last year.)

Grow. Avoid the use of *grow* as a transitive verb to describe the development of something other than organic matter.

make the economy *grow* **OR:** improve economic *growth* (**RATHER THAN:** *grow* the economy)

You may, of course, *grow roses*, for example, or *grow tomatoes* or *grow a beard*.

¶1101

Had better. This idiomatic phrase means *ought to* or *must*. While *had* is often omitted in speech, be sure to retain it in written material.

You *had better* [OR: You'd better] be sure of your facts.

(NOT: You *better* be sure of your facts.)

Hair's breadth. This expression refers to the width of a single strand of hair, not to the breathing of a rabbit (NOT: a hare's breath).

Harbinger. A *harbinger* is someone who initiates a major change or brings news of a change in the future. Despite the sense of “bringing something” that this word conveys, spell the word *harbinger* (NOT: harbringer).

Hardly. *Hardly* is negative in meaning. To preserve the negative meaning, do not use another negative with it.

You *could hardly* expect him to agree.

(NOT: You *couldn't hardly* expect him to agree.)

Hare-brained. This expression refers disparagingly to the mental capacity of a rabbit, not to the intelligence of one's tresses (NOT: hair-brained).

Have-of. See *Of-have*.

Healthy–healthful. People are *healthy*; a climate or food is *healthful*.

You need to move to a *healthful* [NOT: healthy] climate.

Hear–here. The only time a writer is likely to confuse the meaning of *hear* (“to perceive by ear”) and *here* (“in this place”) is when each word is used twice in succession. *Hear! Hear!* expresses approval of something a speaker has just said. *Here! Here!* expresses a rebuke (as in “Here! Here! Let's have no more of that!”)

Help. Do not use *from* after the verb *help*.

I couldn't *help* [NOT: help from] telling her she was wrong.

Historic–historical. *Historic* means “important” or “momentous.” *Historical* means “relating to the past.”

The Fourth of July commemorates a *historic* event—the adoption of the Declaration of Independence in 1776.

The following article provides a *historical* account of the events leading up to the adoption of the Declaration of Independence.

► *For a usage note on a historic occasion vs. an historic occasion, see A-an.*

Hoi polloi. This Greek expression refers to the common people (not to the upper class or the elite, as some people mistakenly assume). Because *hoi* is the Greek word for *the*, purists consider the use of *the* before *hoi polloi* to be redundant. However, *the hoi polloi* is now generally considered to be acceptable.

Home–hone. One *homes in* (NOT: hones in) on a target. *Hone* means “to sharpen something”—for example, an axe or one's professional skills.

Hopefully. Although the subject of much controversy, the use of *hopefully* at the beginning of a sentence is no different from the use of *obviously*, *certainly*, *fortunately*, *thankfully*, *actually*, *apparently*, and similar words functioning as independent

comments (see ¶138b). These adverbs express the writer’s attitude toward what he or she is about to say; as such they modify the meaning of the sentence as a whole rather than a particular word.

Hopefully, the worst is over and we will soon see a strong upturn in sales and profits.

However. Beginning a sentence with *however* is now considered perfectly acceptable. *However* (like other transitional expressions, such as *therefore* and *moreover*) helps readers relate the thought being introduced to the thoughts that went before. Many readers find it more helpful if they encounter the transitional expression at the beginning of the sentence. In that way they can tell at the outset the direction in which the new sentence is proceeding. (See also *Therefore*.)

However at the start of a sentence can have two meanings: “on the other hand” and “in whatever way.” When it means “on the other hand,” follow *however* with a comma to prevent a misreading. Compare these examples:

However, you decide what you want to say, and we’ll back you up. (Insert a comma after *however* when it means “on the other hand.”)

However you decide to organize your presentation, I’m sure it will be a great success. (Use no comma after *however* when it means “in whatever way.”)

In any case, the location of a transitional expression in a sentence must be determined by the individual writer. (For a list of transitional expressions, see ¶138a.)

► *For the entry But . . . however, see page 368.*

I.e.–e.g. These two abbreviations are often confused, even though they mean entirely different things. *I.e.* is an abbreviation of the Latin term *id est*, which means “that is.” *E.g.* is an abbreviation of the Latin term *exempli gratia*, which means “for example.” In formal writing, use *that is* in place of *i.e.* and use *for example* in place of *e.g.* Although these abbreviations represent Latin phrases, they are considered part of the English language and thus are not italicized in ordinary use.

Always insert a comma after *i.e.* and *e.g.* The punctuation that precedes these abbreviations will depend on where they appear in a sentence. See ¶¶181–183 for guidelines and examples of the punctuation that can be used.

If–whether. *If* is often used colloquially for *whether* in such sentences as “He doesn’t know *whether* he will be able to leave tomorrow.” In formal writing, use *whether*, particularly in such expressions as *see whether*, *determine whether*, *learn whether*, *know whether*, and *doubt whether*. Also use *whether* when the expression *or not* follows or is implied.

Find out *whether* [NOT: if] this format is acceptable *or not*.

Under certain circumstances, the use of *whether* can communicate a clearer meaning than the use of *if*.

Please let me know by the end of this week *whether or not* you want to be listed as a speaker at next month’s conference. (The person sending this message clearly wants the recipient to respond one way or another.)

¶1101

Please let me know *if* you want to be listed as a speaker at next month's conference. (The recipient of this message might reasonably conclude that a response is called for only if the answer is yes. However, this interpretation would leave the person who sent the message in a quandary. Would the lack of a response clearly mean no?)

Impact. Do not use *impact* as a verb unless you really want to convey a sense of a powerful force striking something and producing harsh consequences. Use a simpler, quieter verb like *affect* instead.

Any increase in fuel prices could *affect* [NOT: impact] our travel plans this summer.

Any further cuts in the agency's budget will seriously *impact* [have a destructive effect on] our ability to serve the homeless in this community.

Imply–infer. *Imply* means “to suggest”; you imply something by *your own* words or actions.

Verna *implied* [suggested] that we would not be invited.

Infer means “to assume, to deduce, to arrive at a conclusion”; you infer something from *another person's* words or actions.

I *inferred* [assumed] from Verna's remarks that we would not be invited.

In–into–in to

The correspondence is *in* the file. (*In* implies position within.)

Is there some way we can avoid driving *into* San Jose? (*Into* implies entry.)

Sheila thinks she can turn Brad *into* Mr. Nice Guy. (*Into* implies a change of form.)

All sales reports are to be sent *in to* the sales manager. (*In* is an adverb in the verb phrase *are to be sent in*; *to* is a simple preposition.)

Mr. Boehme came *in to* see me. (*In* is part of the verb phrase *came in*; *to* is part of the infinitive *to see*.)

Failing to distinguish carefully between *into* and *in to* can create humorous confusion.

The fugitives turned themselves *in to* FBI agents.

(NOT: The fugitives turned themselves *into* FBI agents.)

In behalf of–on behalf of. *In behalf of* means “for the benefit of”; *on behalf of* means “acting as the agent of.”

This fund-raiser is *in behalf of* [for the benefit of] the victims of last week's flood.

On behalf of [acting as the agent of] the company, I want to thank you all for your help.

Incentivize–incent. Avoid these recently coined “verbs,” which are an objectionable form of jargon.

AVOID: Research shows that profit-sharing plans *incent* employees to meet their goals.

BETTER: Research shows that profit-sharing plans *encourage* employees to meet their goals.

Incidentally. Note that this word ends in *ally*. Never spell it *incidently*.

Includes–consists of. See *Consists of–includes*.

Incredible–incredulous. *Incredible* means “unbelievable”; *incredulous* means “skeptical, unable to believe something.”

I thought Ralph's account of his whereabouts last night was *incredible* [unbelievable].

I was *incredulous* [skeptical] when I heard Ralph's account of his whereabouts last night.

Indifferent—in different

She was *indifferent* [not caring one way or the other] to the offer.

He liked our idea, but he wanted it expressed *in different* [in other] words.

Indirect—in direct

Indirect [not direct] lighting will enhance the appearance of this room.

This order is *in direct* [the preposition *in* plus the adjective *direct*] conflict with the policy of this company.

Individual—party—person—people. Use *individual* to refer to someone whom you wish to distinguish from a larger group of people.

We wish to honor those *individuals* who had the courage to speak out at a time when popular opinion was defending the status quo.

Use *party* only to refer to someone involved in a legal proceeding.

All the *parties* to the original agreement must sign the attached amendment.

Use *person* to refer to a human being in all other contexts.

Please tell me the name of the *person* in charge of your credit department.

If reference is made to more than one person, the term *people* usually sounds more natural than the plural form *persons*. In any event, always use *people* when referring to a large group.

We need to find five more *people* [**RATHER THAN:** persons] to serve on this committee.

If you like, I can send you a list of all the *people* in our corporation who will be attending this year's national convention.

Infer. See *Imply—infer*.

Inflammable—flammable. See *Flammable—inflammable*.

In regards to. Substitute *in regard to*, *with regard to*, *regarding*, or *as regards*.

I am writing *in regard to* [**NOT:** *in regards to*] your letter of May 1.

Insure. See *Ensure—insure—assure*.

Intents—intense. *Intents* means “aims, goals.” *Intense* means “extreme” (as in *intense pain*) or “deeply felt” (as in *an intense discussion of conflicting views*). Because *intense* is pronounced exactly like *intents*, it is sometimes incorrectly used in place of *intents*.

for all *intents* and purposes (**NOT:** for all intensive purposes)

Invite—invitation. Use *invite* only as a verb, never as a noun.

Do you expect Ron will *invite* you to his retirement party?

Do you expect to be *invited* to Ron's retirement party?

Are you expecting an *invitation* to Ron's party?

(**BUT NOT:** Are you expecting an *invite* to Ron's party?)

Irregardless. Use *regardless*.

Is where—is when. Do not use these phrases to introduce definitions.

A dilemma is a situation *in which* you have to choose between equally unsatisfactory alternatives.

(**NOT:** A dilemma is *where* you have to choose between equally unsatisfactory alternatives.)

¶1101

However, these phrases may be correctly used in other situations.

The Ritz-Carlton *is where* the dinner-dance will be held this year.

Two o'clock *is when* the meeting is scheduled to begin.

Its-it's. See ¶1056e.

It's me. *It's me* is acceptable in colloquial speech and informal writing. To be grammatically correct, one should say *It is I*, but this would produce much the same effect as changing the name of *Toys "R" Us* to *Toys "R" We*. (See also the note to ¶1054b.)

Jibe-gibe. See *Gibe-jibe*.

Journal. The use of *journal* as a verb is a matter of taste. Those who record their thoughts in a journal every day are likely to endorse using *journal* as a verb; those who don't probably won't.

Key-type. See *Type-key*.

Kind. *Kind* is singular; therefore, write *this kind, that kind, these kinds, those kinds* (**BUT NOT:** these kind, those kind). The same distinctions hold for *class, type, and sort*.

Kind of-sort of. These phrases are sometimes followed by an *adjective* (for example, *kind of sorry, sort of baffled*). Use this kind of expression only in informal writing. In more formal situations, use *rather* or *somewhat* (*rather sorry, somewhat baffled*).

I was *somewhat* [**NOT:** kind of, sort of] surprised.

She seemed *rather* [**NOT:** kind of, sort of] tired.

NOTE: When *kind of* or *sort of* is followed by a *noun*, the expression is appropriate in all kinds of situations.

What *sort of business* is Vern Forbes in?

What *kind of expression* is that?

► See *A-of and Kind of a*.

Kind of a. The *a* is unnecessary.

That *kind of* [**NOT:** kind of a] car is very expensive.

Kudos. *Kudos*, a Greek word meaning “praise,” is a singular word, but because of the *s* ending, *kudos* is often mistakenly assumed to be a plural noun that requires a plural verb when it is the subject of a sentence. This mistake has led to a further mistake (now accepted by many dictionaries): the assumption that *kudo* is the singular form of *kudos*. Do not use *kudo* (despite what the dictionaries say), and do not use *kudos* as a plural noun. In fact, avoid the use of *kudos* altogether and use *praise* instead.

Lactose-intolerant. *Lactose* is a type of sugar that is found in milk. To be *lactose-intolerant* is to be unable to digest anything containing lactose. People who are unfamiliar with this term might be tempted to write “lack toast and tolerant.” They should resist the temptation.

Landlubber. Although this term refers to someone who loves being on land rather than on water, it is spelled *landlubber* (**NOT:** land lover).

Last–latest. These two adjectives are commonly distinguished in this way: *last* means “coming after all others” or “final”; *latest* means “most recent.”

Mr. Lin’s *last* act [his final act] before leaving was to recommend Ms. Roth’s promotion.

Attached is the *latest* report [the most recent report] we have received from the Southern Region.

In actual usage, however, *last* can also mean “most recent,” especially in references to time (for example, *last night*, *last week*, *last month*, *last year*). In some cases, the meaning of *last* can be ambiguous unless clarified by the context.

I thoroughly enjoyed Nelson’s *last* book. (Did Nelson never write another book after this one, or was this simply his most recent book, with others likely to be written in the future? One way to avoid ambiguity here is to replace *last book* with *final book* or *most recent book*, depending on the meaning intended.)

Latter–last. *Latter* refers to the second of two persons or things mentioned. When more than two are mentioned, use *last*. (See also *Former–first*.)

July and August are good vacation months, but the *latter* is more popular.

June, July, and August are good vacation months, but the *last* is the most popular.

Lawyer–attorney. See *Attorney–lawyer*.

Lay–lie. *Lay* (principal parts: *lay*, *laid*, *laid*, *laying*) means “to put” or “to place.” This verb requires an object to complete its meaning.

Please *lay* the boxes on the pallets with extreme care.

I *laid* the message right on your desk.

I *had laid* two other notes there yesterday.

He *is* always *laying* the *blame* on his assistants. (Putting the blame.)

The dress *was laid* in the box. (A passive construction implying that someone *laid* the dress in the box.)

Lie (principal parts: *lie*, *lay*, *lain*, *lying*) means “to recline, rest, or stay” or “to take a position of rest.” It refers to a person or thing as either assuming or being in a reclining position. This verb cannot take an object.

Now he *lies* in bed most of the day.

The mountains *lay* before us as we proceeded west.

This letter *has lain* unanswered for two weeks.

Today’s mail *is lying* on the receptionist’s desk.

TEST: In deciding whether to use *lie* or *lay* in a sentence, substitute the word *place*, *placed*, or *placing* (as appropriate) for the word in question. If the substitute fits, the corresponding form of *lay* is correct. If it doesn’t, use the appropriate form of *lie*.

I will (*lie* or *lay*?) down now. (You could not say, “I will *place* down now.” Therefore, write “I will *lie* down now.”)

I (*laid* or *lay*?) the pad on his desk. (“I *placed* the pad on his desk” works. Therefore, write “I *laid* the pad on his desk.”)

I (*laid* or *lay*?) awake many nights. (“I *placed* awake” doesn’t work. Write “I *lay* awake.”)

These files have (*laid* or *lain*?) untouched for some time. (“These files have *placed* untouched” does not work. Write “These files have *lain* untouched.”)

He has been (*laying* or *lying*?) down on the job. (“He has been *placing* down on the job” does not work. Write “He has been *lying* down.”)

¶1101

NOTE: When the verb *lie* means “to tell a falsehood,” it has regularly formed principal parts (*lie, lied, lied, lying*) and is seldom confused with the verbs just described.

Lay down–lie down. You can *lay down the law*, you can *lay down your life for another*, you can *lay down your arms*, and you can *lay down your cards*. You can even *lay yourself down*. But you cannot simply *lay down*. In every one of these acceptable examples, note that *lay down* takes an object (*law, life, arms, cards, yourself*).

You can *lie down on a bed*, you can *lie down on the job*, and you can *lie down with dogs* (but then you are likely to get up with fleas). You can even simply *lie down*, because this verb phrase does not require an object. It is, however, often followed by a prepositional phrase (*on a bed, on the job, with dogs*). For more on the proper use of these phrases, see *Lay–lie* above.

Learn–teach. *Learn* (principal parts: *learn, learned, learned, learning*) means “to acquire knowledge.” *Teach* (principal parts: *teach, taught, taught, teaching*) means “to impart knowledge to others.”

I *learned* from a master teacher.

(**NOT:** I was *learned* by a master teacher.)

A first-rate instructor *taught* me how.

I was *taught* by a first-rate instructor.

Leave–let. *Leave* (principal parts: *leave, left, left, leaving*) means “to move away, abandon, or depart.” *Let* (principal parts: *let, let, let, letting*) means “to permit or allow.” **TEST:** In deciding whether to use *let* or *leave*, substitute the appropriate form of *permit*. If *permit* fits, use *let*; if not, use *leave*.

I now *leave* you to your own devices. (Abandon you.)

Mr. Morales *left* on the morning train. (Departed.)

Let me see the last page. (Permit me to see.)

The expressions “Leave me alone” and “Let me alone” are both acceptable and are commonly considered to have the same meaning. However, some authorities suggest a slight difference between them: “leave me alone” is said to express the wish to be entirely by oneself, for someone else to withdraw; “let me alone” is said to express the wish not to have one’s plans or actions interfered with.

Lectern–podium. See *Podium–lectern*.

Lend–borrow. You lend money *to* someone; you borrow money *from* someone. Do not use *borrow* as a synonym for *lend*.

I *lent* Paul enough money to cover this month’s rent.

(**NOT:** I borrowed Paul enough money to cover this month’s rent.)

Lend–loan. Although *lend* and *loan* have long been used as verbs, it is preferable to use *loan* only as a noun.

Hal has asked for a *loan* of \$500, and I’ll be glad to *lend* it to him.

(**RATHER THAN:** I’ll be glad to *loan* it to him.)

Less–fewer. See *Fewer–less*.

Less than. See *More than–over–nearly–almost–less than–about–around*.

Let–let’s. A pronoun that follows the verb *let* must be in the objective case.

Let *him* who created this mess be the one to clean it up.

(**NOT:** Let *he* who created this mess be the one to clean it up.)

Let’s is a contraction of *let us*. Since *us* is an objective form, any pronouns that refer to *let’s* also have to be in the objective case.

Let’s *you and me* try to work out a compromise we can both live with.

(**NOT:** Let’s *you and I* try to work out a compromise we can both live with.)

If you feel that “Let’s you and me” sounds awkward, simply omit “you and me.”

Let’s try to work out a compromise we can both live with.

It is true that T. S. Eliot began a famous poem with these words: “Let us go then, you and I.” Those of us who are not highly acclaimed poets, however, need to follow the standard grammatical guideline, which calls for pronouns to agree with their antecedents.

Libel–slander. Defaming a person in writing is considered an act of *libel*. Using spoken words to defame a person is considered an act of *slander*.

Lie–lay. See *Lay–lie*.

Lie down–lay down. See *Lay down–lie down*.

Like–as–as if. *Like* is correctly used as a preposition. Although *like* is also widely used as a conjunction in colloquial speech, use *as*, *as if*, or a similar expression in written material.

We need to hire another person *like* you.

Kate, *like* her predecessor, will have to cope with the problem.

As I told you earlier, we will not reorder for six months.

(**NOT:** *Like* I told you earlier, we will not reorder for six months.)

It looks *like* snow.

It looks *as if* it will snow.

(**NOT:** It looks *like* it will snow.)

Mary looks *like* her mother.

Mary looks *as* her mother did at the same age.

OR: Mary looks the way her mother did at the same age.

(**BUT NOT:** Mary looks *like* her mother did at the same age.)

COLLOQUIAL USAGE: Ann Richards, former Governor of Texas, made this observation on the role of women in today’s society: “Like we say in Texas, the roosters may crow but the hens deliver the goods.”

NOTE: When using *like* as a preposition, be alert to the possibility that your reader could mistakenly interpret *like* as a verb on first encounter.

CONFUSING: Part of our mission is to make people like lawmakers more sensitive to the needs of those without medical insurance.

CLEAR: Part of our mission is to make lawmakers and others more sensitive to the needs of those without medical insurance.

¶1101

Like—such as. Although *like* and *such as* are often used interchangeably, there is a real distinction in meaning. Consider these two examples: “companies *such as* Dell and Cisco” and “companies *like* Dell and Cisco.” The example using *such as* refers specifically to Dell and Cisco. The example using *like* literally refers to other companies (companies that are like Dell and Cisco but not specifically these two companies themselves). This is a distinction that careful writers will want to observe.

Literally. This adverb means “actually, truly.” Do not use it in the sense of “almost” to modify a reference to an exaggerated or unreal situation.

NOT: When Jensen got the bill for all the “minor changes” made at the last minute, he *literally* hit the ceiling. (Omit the word *literally* or change it to *almost* unless Jensen actually exploded out of his chair and hit the ceiling headfirst.)

Livid. *Livid* means “pale or ashen,” not “red or flushed with anger.”

Loan—lend. See *Lend—loan*.

Log on to—log onto. One logs *on to* a computer. (One does not log *onto* a computer.)

Look forward to. In this phrase *to* is a preposition and should be followed by a gerund (a verbal noun ending in *ing*) or some other type of noun. Do not mistake *to* in this phrase for the start of an infinitive to be followed by a verb.

I look forward *to meeting* you next Friday. (*Meeting* is a gerund, serving as the object of the preposition *to*.)

OR: I look forward *to our meeting* next Friday. (*Meeting* here is an ordinary noun, serving as the object of the preposition *to*.)

BUT NOT: I look forward *to meet* you next Friday. (Do not use an infinitive after *look forward*.)

Maiden name. Replace this obsolete term with *birth name* or *original name*.

Majority—plurality. A *majority* means “more than half the total.” A *plurality* means “more than the next highest number (but not more than half).”

Edna Welling received a *majority* of the votes in her district. (She received more than 50 percent of the total votes cast.)

Victor Soros won the election by a *plurality*. (He received 43 percent of the total votes cast; his two opponents received 31 percent and 26 percent respectively.)

Manner—manor. Do not use *manor* (which refers to an estate) in place of *manner* (which refers to a way of acting) in expressions such as *to the manner born* and *bedside manner*.

Masterly—masterful. *Masterly* means “skillful.” The primary meaning of *masterful* is “domineering, overpowering,” but over the years it has acquired the meaning of “skillful” as well. To avoid ambiguity, use *masterful* only in its primary sense.

Margaret has a *masterly* [skillful] command of grammar, style, and usage.

Shawna is a *masterful* [domineering] presence at any meeting she attends.

May—can (might—could). *May* and *might* imply permission or possibility; *can* and *could*, ability or power.

You *may* send them a dozen cans of paint on trial. (Permission.)

The report *may* [OR: *might*] be true. (Possibility.)

Can he present a workable plan? (Has he the ability?)

The CEO *could* change this policy if he wanted to. (Power.)

Please call me if you think I *can* be of any help. (Emphasizes the ability to help.)

Please call me if you think I *may* be of any help. (Emphasizes the possibility of helping.)

NOTE: When it is important to maintain sequence of tenses, use *may* to express the present and *might* to express the past. (See ¶1047.)

I *think* [present] that I *may* go to Australia next winter.

I *thought* [past] that I *might* go to Australia next winter.

Under certain circumstances *may* and *might* convey different meanings. Consider the following examples:

The CFO's reorganization plan *may have saved* the company from bankruptcy. (Other factors may also have contributed to the outcome, but the company is still a going concern.)

The CFO's reorganization plan *might have saved* the company from bankruptcy. (However, the CFO's plan was not implemented, and the company did fail.)

Might also may be used in place of *may* to create a greater sense of uncertainty. Telling someone that you *might* decide to go to graduate school is not quite as strong as saying that you *may* decide to go to graduate school.

Maybe—may be. *Maybe* is an adverb; *may be* is a verb.

If we don't receive a letter from them today, *maybe* [an adverb meaning "perhaps"] we should give them a call.

Mr. Boston *may be* [a verb] out of town next week.

Media. *Media*, referring to various channels of communication and advertising, is a plural noun. *Medium* is the singular.

NOTE: Under special circumstances *media* may be considered a singular noun. (See ¶1018c.)

Might. See *May—can (might—could)*.

Moot point. This expression originally referred to something that is debatable or open to discussion. In fact, a *moot case* is a hypothetical case that law students still argue in a *moot court* as a way of developing their legal skills. Over time the term *moot* has come to mean "hypothetical, academic, of no practical significance," and *moot point* has come to mean something totally opposite to its original meaning. Now *moot point* is widely considered to refer to something not worth discussing because it lacks any practical significance. Although some authorities consider this shift in meaning to be an error, this new meaning has become so well established that the original meaning of *moot point* is now often overlooked. Since there is always the possibility of ambiguity, it may be better to avoid this expression and simply say that a given point is debatable or not worth discussing.

More. In some sentences it may not be clear whether *more* is being used to form the comparative degree of an adjective (for example, *more experienced*) or is being used

¶1101

as an adjective meaning “a greater number of.” In such cases reword to avoid confusion.

CONFUSING: We need to hire more experienced workers. (A greater number of experienced workers? Or workers who are more experienced than those now on staff?)

CLEAR: We need to hire a greater number of experienced workers.

CLEAR: We need to hire workers who are more experienced.

If rewording is not feasible, insert a hyphen between *more* and an adjective to make it clear that you are forming the comparative degree of the adjective.

We need to hire more-experienced workers. (That is, workers who are more experienced.)

► *For a usage note on fewer-less, see page 379.*

More important-more importantly. *More important* is often used as a short form for “what is more important,” especially at the beginning of a sentence. *More importantly* means “in a more important manner.”

More important, we need to establish a line of credit very quickly. (What is more important.)

The incident was treated *more importantly* than it deserved. (In a more important manner.)

More than-over-nearly-almost-less than-about-around. These expressions represent alternative ways to express *approximate numbers*—that is, round numbers used in place of actual or more precise numbers. (See ¶113a, note.)

Use *more than* or *over* with an approximate number to emphasize that the actual number is larger.

Our fall catalog brought in *more than* \$400,000 in sales.

How could you lose *over* \$80,000 in the stock market?

In some situations—especially involving age—*more than* is not appropriate.

These provisions apply only to people *over* 50.

When the approximate number is not as great as the actual number, use *nearly* or *almost* when you want to put a positive spin on the approximate number. Use *less than* when you want to emphasize that the approximate number is not quite as large as the actual number.

Although we missed our sales goal, we still managed to rake in *almost* \$5.5 million.

Your results last year were disappointing. Your sales totaled *less than* \$5.5 million.

Use *about* or *around* when you want to present an approximate number without any spin at all.

We managed to do *about* \$5.5 million in sales last year.

Most. Do not use *most* for *almost*.

Almost all the money is gone.

OR: *Most* of the money is gone.

(BUT NOT: *Most all* of the money is gone.)

Nearly. See *More than-over-nearly-almost-less than-about-around*.

Nobody-no body

There was *nobody* [no person] at the information desk when I arrived.

No body [no group] of employees is more cooperative than yours. (Spell *no body* as two words when it is followed by *of*. See also ¶1010.)

None–no one. See ¶1013.

Not so . . . as. See *As . . . as—not so . . . as*.

Notoriety–celebrity. See *Celebrity–notoriety*.

Number. See *Amount–number*.

Of-a. See *A-of*.

Of–have. Do not use *of* instead of *have* in verb forms. The correct forms are *could have*, *would have*, *should have*, *might have*, *may have*, *must have*, *ought to have*, and so forth.

What *could have* happened? (NOT: What could of happened?)

The words *could have*, *would have*, and *should have* sometimes appear deliberately misspelled in the colloquial phrase *could'a*, *would'a*, *should'a*. (The phrase also appears with the words presented in a different order and sometimes linked with hyphens instead of separated by commas.)

The problem with those *could'a*, *would'a*, *should'a* people is that they make all sorts of promises and then deliver excuses instead of results.

OR: The problem with those *would'a-should'a-could'a* people is that they make all sorts of promises and then deliver excuses instead of results.

Off. Do not use *off of* or *off from* in place of *off*. (See also ¶1078.)

The papers fell *off* the desk. (NOT: off of the desk.)

Off–from. See *From–off*.

On–onto–on to

It's dangerous to drive *on* the shoulder. (*On* is a preposition that implies movement over.)

He lost control of the car and drove *onto* the sidewalk. (*Onto* is a preposition that implies movement toward and then over.)

She then went *on to* tell about her experiences in Asia. (*On* is part of the verb phrase *went on*; *to* is part of the infinitive *to tell*.)

Let's go *on to* the next problem, which runs *on to* the next page. (*Go on* and *runs on* are verb phrases followed by the preposition *to*.)

First, log *on to* the Internet. (*On* is part of the verb phrase *log on*; *to* is a preposition.)

Our new marketing campaign is off to a fast start! *Hold on* to your hats!

It's time to stop arguing about this point and *move on* to other matters.

After a brief stop in Minneapolis, we had to drive *on to* St. Cloud.

At the sign for Fire Lane 523 you'll have to turn *onto* an unpaved road to reach our house.

On–upon–up on

His statements were based *on* [OR: *upon*] experimental data. (*On* and *upon* are interchangeable.)

Please follow *up* *on* the case. (*Up* is part of the verb phrase *follow up*; *on* is a preposition.)

The district attorney's whole case hangs *on* [OR: *upon*] the testimony of one witness.

Don't let yourself get hung *up on* a small detail like that. (*Up* is part of the verb phrase *hung up*; *on* is a preposition.)

On account of. See *Due to—because of—on account of*.

On behalf of—in behalf of. See *In behalf of—on behalf of*.

¶1101

One another–each other. See *Each other–one another*.

Only. The adverb *only* can be negative in meaning. Therefore, do not use another negative with it unless you want a positive meaning. (See ¶1072.)

I use this letterhead *only* for formal matters. (I do not use this letterhead for anything else.)

BUT: I do not use this letterhead *only* for formal matters. (I use it for other things too.)

Opposite. When used as a noun, *opposite* is followed by *of*.

Her opinion is the *opposite of* mine.

In other uses, *opposite* is followed by *to* or *from* or by no preposition at all.

Her opinion is *opposite to* [OR: from] mine. She lives *opposite* the school.

Out loud. See *Aloud–out loud*.

Over–more than. See *More than–over–nearly–almost–less than–about–around*.

Parameter. This technical term has now acquired two meanings in general usage. It may refer to a variable factor, the value of which has to be established in specific calculations.

With these basic formulas in place, you can change any *parameter* [OR: any of these *parameters*] and immediately see the effects on the bottom line.

The plural form, *parameters*, can also mean “limits, boundaries.”

We must establish the *parameters* [limits] of this research project before we can draw up detailed plans.

Party–people. See *Individual–party–person–people*.

Per-a. *Per*, a Latin word, is often used to mean “by the,” as in *28 miles per gallon (mpg)* or *55 miles per hour (mph)*. Whenever possible, substitute *a* or *an*; for example, *at the rate of \$8 an hour, 75 cents a liter*. *Per* must be retained, of course, in Latin phrases—for example, *per diem* (by the day) OR: *per capita* (for each person; literally, by the head).

NOTE: Do not use *per* or *as per* in the sense of “according to” or “in accordance with.”

We are sending you the samples *you requested*. (NOT: as per your request.)

Percent–percentage. In ordinary usage, *percent* should always be accompanied by a number; for example, *20 percent, 0.5 percent, 150 percent*. In a table, a column of figures representing percentages may be headed *Percent of Total* or something comparable. In all other cases, use the term *percentage*.

A large *percentage* of the calls we got yesterday came from customers who misread our ad. (NOT: A large *percent* of the calls . . .)

What *percentage* of our subscribers are in the 30–49 age group? (See ¶1025.)

NOTE: In the percentage formula used in mathematics ($\text{base} \times \text{rate} = \text{amount}$), the rate is called a *percent* and the amount is called a *percentage*. Thus you might be asked to calculate the *percentage* when a sales tax of 6 percent (the rate) is applied to a purchase of \$50 (the base). By the same token, you might be asked to calculate the *percent* (the rate) if you know that a tax of \$5 (the amount, or *percentage*) has been paid on an order of \$200. Apart from this special context, *percent* and *percentage* should be used as noted above.

Percent–percentage points. Consider the difference in meaning in the following examples.

Our sales this quarter were up by *10 percent*—from 5 to 5.5 percent.

Our sales this quarter were up by *10 percentage points*—from 5 to 15 percent.

Period ended–period ending. When referring to a period of time that is already in the past, write *period ended*. When the period in question has not yet ended, write *period ending*.

Enclosed are the sales figures for the *period ended* June 30. (It is now July.)

Here are my sales projections for the *period ending* December 31. (It is only September.)

Person–people. See *Individual–party–person–people*.

Persuade–convince. See *Convince–persuade*.

Plurality–majority. See *Majority–plurality*.

Plus. *Plus* can be correctly used as a noun, an adjective, or a preposition. However, do not use it as a conjunction (with the sense of “and”).

Your presence at the hearing was a real *plus* for our cause. (*Plus* used correctly as a noun.)

The decision to offer a 10 percent discount on all orders received by June 1 was a *plus* factor in the campaign. (*Plus* used correctly as an adjective.)

Your willingness to innovate *plus* your patient perspective on profits has permitted this company to grow at an astonishing rate. (*Plus* used correctly as a preposition. Note that a *plus* phrase following the subject of a sentence does not affect the number of the verb. See ¶1007.)

BUT NOT: You have always been willing to innovate, *plus* you have been patient about the profits to be derived from the innovations. (Do not use *plus* as a conjunction; use *and* instead.)

Podium–lectern. A *podium* is a raised platform on which a speaker stands to speak or a conductor stands to conduct. A *lectern* (**NOT:** *lecturn*) is a stand on which a book, a script, or other materials are placed for the benefit of a person standing to read or speak to a group.

Preventive–preventative. Although these words have the same meaning, *preventive* is preferred because it is the shorter form and the one more commonly used.

We need to take some *preventive* [**RATHER THAN:** *preventative*] action before sales drop further.

Principle–principal. The word *principle* can be used only as a noun. It can mean “a basic law or rule” (*a key principle of economics*) or “faithful adherence to a code of ethics” (*a person of principle*, *a matter of principle*). The derivative adjective *principled* also refers to adherence to an ethical code (*a principled politician*).

The word *principal* can serve as a noun or an adjective. As a noun, it may refer to a business owner or a partner (*a principal in the firm*), the head of a school (*appointed principal of Edison Middle School*), or a sum of invested money (*receiving an excellent return on my principal*). As an adjective, *principal* means “the most important” (*my principal reason for quitting*, *the principal parts of a verb*).

1101

Proved—proven. Use *proven* only as a modifier before a noun. Otherwise, use *proved*.

Here is a *proven* remedy for your condition.

This remedy has *proved* [NOT: proven] to be extremely effective.

Rack—wrack. The words *rack* and *wrack* have been used interchangeably so often in certain contexts that some authorities now regard *wrack* as a spelling variant of *rack*. However, careful writers will want to respect the traditional distinction in usage.

to *rack* one's brains

a storm-*wracked* island

a nerve-*racking* encounter

a business *wracked* by heavy losses

to be *racked* with pain

let the property go to *wrack* and ruin

Raise—rise. *Raise* (principal parts: *raise, raised, raised, raising*) means “to cause to lift” or “to lift something.” This verb requires an object to complete its meaning.

Mr. Pinelli *raises* a good question.

Most growers *have raised* the price of coffee.

We *are raising* money for the United Fund.

Our rent *has been raised*. (A passive construction implying that someone *has raised* the rent.)

Rise (principal parts: *rise, rose, risen, rising*) means “to ascend,” “to move upward by itself,” or “to get up.” This verb cannot be used with an object.

We will have to *rise* to the demands of the occasion.

The sun *rose* at 6:25 this morning.

The river *has risen* to flood level.

The temperature *has been rising* all day.

TEST: Remember, you cannot “rise” anything.

Real—really. *Real* is an adjective; *really*, an adverb. Do not use *real* to modify another adjective; use *very* or *really*.

One taste will tell you these cookies were made with *real* butter. (Adjective.)

We were *really* expecting a lower price from you this year. (Adverb.)

BUT: It was *very* nice OR: *really* nice [NOT: real nice] to see you and your family again.

Reason is because. Replace *because* with *that*.

The *reason* for such low sales is *that* [NOT: because] prices are too high.

Refer—allude. See *Allude—refer*.

Reign—rein. The verb *reign* (meaning “to rule over”) is often misused in place of *rein* (meaning “to hold back, restrain, stop”). A newly installed head of state will *reign supreme*, but someone who replaces an existing head of state may be said to *seize the reins of power*. Be sure to use *rein* in an expression such as *to rein in runaway health insurance costs*. And just as one might give *free rein* to a horse, one should give *free rein* to brainstorming colleagues or to one’s own imagination if one hopes to come up with good ideas worth pursuing.

Reluctant—reticent. *Reluctant* means “disinclined,” “unwilling,” or “hesitant.” *Reticent* means “inclined to be silent.” Although some dictionaries now show *reticent* as a synonym for *reluctant*, careful writers and speakers will avoid this usage.

I am *reluctant* [NOT: reticent] to agree to these changes in the contract.

Phil was *reticent* when you asked what he thought of the CEO’s speech.

Retroactive to. After *retroactive* use *to* (**NOT:** from).

These improvements in benefits under the company dental plan will be *retroactive to* July 1.
(See also ¶1077.)

Rights–rites. *Rights* are special privileges that individuals or institutions are entitled to—for example, *civil rights, human rights, patients' rights, the Bill of Rights*. *Rites* are special ceremonies—for example, *initiation rites, last rites, rites of passage*.

Rise–raise. See *Raise–rise*.

Sacrilegious. This term means “acting in a way that is harmful to something sacred.” Because of the relationship between things that are *sacred* and religion, some writers are tempted to misspell this word as “*sacreligious*.” Note that the correct spelling is *sacrilegious*.

Said. Avoid the use of *said* or *above* as an adjective (as in *in the said document* or *the above document*), especially in legal writing, where this usage still tends to persist. There are a number of alternatives readily at hand. You could write *this document, that document, or the document cited above*; you could even use a shortened name to refer to the document. (See also *Above*.)

Same. Do not use *same* to refer to a previously mentioned thing.

We are now processing your order and will have *it* ready for you Monday.

(**NOT:** We are now processing your order and will have *same* ready . . .)

Scarcely. The adverb *scarcely* is negative in meaning. To preserve the negative meaning, do not use another negative with it. (See ¶1072 for the placement of *scarcely*.)

I scarcely recognized [**NOT:** didn't scarcely recognize] you.

Scots–Scottish–Scotch. To refer to the people of Scotland, use *the Scots* or *the Scottish*. As a general rule, use *Scottish* (rather than *Scotch*) as an adjective; for example, *the Scottish language, Scottish weather, Scottish culture*. Restrict the use of *Scotch* to well-established expressions; for example, *Scotch egg, Scotch pine, Scotch tape, Scotch terrier, Scotch whisky*. (*Whiskey* is normally spelled with an *e*, but the *e* is omitted when the word is preceded by *Scotch*.)

Seize–cease. See *Cease–seize*.

Semiannual. See *Biannual–biennial–semiannual*.

Serve–service. Things can be *serviced*, but people are *served*.

We take great pride in the way we *serve* [**NOT:** service] our clients.

For a small additional charge we will *service* the equipment for a full year.

Set–sit. *Set* (principal parts: *set, set, set, setting*) means “to place something somewhere”; in this sense, *set* requires an object to complete its meaning. *Sit* (principal parts: *sit, sat, sat, sitting*) means “to be in a position of rest” or “to be seated.” This verb cannot be used with an object. **REMEMBER:** You cannot “sit” anything.

It's important to *set down* your *recollections* while they are still fresh.

I must have dropped my wallet when I *set* my *suitcase* down.

I *have set* my *alarm* for six in the morning.

Continued on page 398

¶1101

The crew *was setting the stage* for the evening performance.

The date *was set* some time ago. (A passive construction implying that someone *set* the date.)

So here we *sit*, waiting for a decision from top management.

I *sat* next to Ebbetsen at the board meeting.

I don't think we can solve this problem right away. We'll have to let it *sit* for a while.

NOTE: *Set* has a few other meanings in which the verb does not require an object, but these meanings are seldom confused with *sit*.

They *set out* on the trip in high spirits.

The sun *set* at 5:34 p.m. Wednesday.

Allow a full hour for the mixture to *set*.

Sex-gender. See *Gender-sex*.

Shall–will. The helping verb *shall* has given way to the verb *will* in all but the most formal writing and speech. The following rules reflect both ordinary and formal usage.

a. To express simple future time:

(1) In *ordinary* circumstances use *will* with all three persons.

I [OR: *we*] *will* be glad to help you plan the program.

You *will* want to study these recommendations before the meeting.

He [OR: *she, it, they*] *will* arrive tomorrow morning.

(2) In *formal* circumstances use *shall* with the first person (*I, we*) and *will* with the second and third persons (*you, he, she, it, they*).

I [OR: *we*] *shall* be glad to answer all inquiries promptly.

You *will* meet the McGinnesses at the reception this evening.

They [OR: *he, she*] *will* not find the trip too tiring.

b. To indicate *determination, promise, desire, choice, or threat*:

(1) In *ordinary* circumstances use *will* with all three persons.

(2) In *formal* circumstances use *will* for the first person (*I, we*) and *shall* for the second and third persons (*you, he, she, it, they*).

In spite of the risk, I will go where I please. (Determination.)

They shall not interfere with my department. (Determination.)

I will send my check by the end of the week. (Promise.)

We will report you to the authorities if this is true. (Threat.)

You shall regret your answer. (Threat.)

He shall study or *he shall* leave college. (Threat.)

c. To indicate *willingness* (to be willing, to be agreeable to) in both *ordinary* and *formal* circumstances, use *will* with all persons.

Yes, I will meet you at six o'clock.

Shoo-in. This expression, which refers to an easy winner, is spelled *shoo-in* (NOT: *shoe-in*).

Shot across the bow. This expression refers to a shot over the bow of a ship (NOT: over the bough of a tree).

Should–would. *Should* and *would* follow the same rules as *shall* and *will* (see preceding entry) in expressions of future time, determination, and willingness. The distinctions concerning ordinary and formal usage also apply here.

ORDINARY: I *would* like to hear from you.

FORMAL: I *should* like to hear from you.

ORDINARY: We *would* be glad to see her.

FORMAL: We *should* be glad to see her.

ORDINARY: I *would* be pleased to serve on that committee.

FORMAL: I *should* be pleased to serve on that committee.

- a. Always use *should* in all persons to indicate “ought to.”

I *should* study tonight.

You *should* report his dishonesty to the manager.

He *should* pay his debts.

- b. Always use *would* in all persons to indicate customary action.

Every day I *would* swim half a mile.

Time and again they *would* only say, “No comment.”

She *would* practice day after day.

- c. Use *should* in all three persons to express a condition in an *if* clause.

If I *should* win the prize, I will share it with you.

If you *should* miss the train, please call me collect.

- d. Use *would* in all three persons to express willingness in an *if* clause.

If he *would* apply himself, he could win top honors easily.

If you *would* delay your decision, I could offer you more attractive terms.

Should have–should of. See *Of–have*.

Since. *Since* has two meanings: it can refer to some point of time in the past, or it can mean “because.”

Since [from the time that] we last talked, I've found a much better job at another company.

Since [because] I will be traveling for the next two weeks, please hold my mail until I return.

Ordinarily, the context makes it clear which meaning is intended, but reword in cases where the use of *since* could cause confusion.

AMBIGUOUS: Barbara has had no luck in finding a good job *since* she dropped out of college. (Has she simply remained without a good job *ever since* she dropped out of college, or has she not found a good job *because* she dropped out of college?)

CLEAR: Barbara has had no luck in finding a good job *ever since* she dropped out of college.

CLEAR: Barbara has had no luck in finding a good job, *because* she dropped out of college.

Sit–set. See *Set–sit*.

Slander–libel. See *Libel–slander*.

So–so that. *So* as a conjunction means “therefore”; *so that* means “in order that.”

The work is now finished, *so* you can all go home. (See also ¶179.)

Please finish what you are doing *so that* we can all go home.

¶1101

Soft-pedal–back-pedal. *Soft-Pedal* literally means “to use the soft pedal on the piano while playing.” It has come to mean “to play down, to de-emphasize.” Because the term also carries the sense of trying not to give someone a hard-sell, it is easy to understand why some writers are tempted to misspell this term as “soft-peddle.” The correct spelling is *soft-pedal*.

By the same token, the term *back-pedal* takes its origin from bicycle riding, not from peddling.

Someday–some day

Please set up a meeting with Al and Jerry *someday* [on an unspecified day] next week.

BUT: Please set up a meeting with Al and Jerry *for some day* next week. (Two words when used as the object of a preposition such as *for*.)

Someone–some one. See ¶1010, note.

Sometime–sometimes–some time

The order will be shipped *sometime* [at some unspecified time] next week.

Sometimes [now and then] reports are misleading.

It took me *some time* [a period of time] to complete the job.

I saw him *some time* ago [a long time ago].

NOTE: Spell *some time* as two words when the term follows a preposition.

We will be happy to reconsider your proposal *at some time* in the future.

I've been thinking about retiring *for some time*.

Sort. See *Kind*.

Sort of–kind of. See *Kind of–sort of*.

Spitting image. To say that someone is “the spitting image of his father” is to emphasize how much the son looks like his father. The original form of this expression was *spit and image*, in which *spit* meant “the exact likeness” and not “saliva.” This expression was corrupted over time to become “the spitting image.” Until recently the corrupted form was considered an error, but thanks to the frequency with which it has been used, it has become the acceptable form. *Spit and image* is now considered obsolete.

Such as . . . etc. See *Etc.–et al.*

Such as–like. See *Like–such as*.

Supposed to. Be sure to spell *supposed* with a *d*.

Under the circumstances what was I *supposed* to think? (**NOT:** suppose to.)

Sure–surely. *Sure* is an adjective, *surely* an adverb.

I am *sure* that I did not make that mistake. (Adjective.)

You can *surely* count on our help. (Adverb.)

Do not use *sure* as an adverb; use *surely* or *very*.

I was *very* glad to be of help. (**NOT:** sure glad.)

Sure and. In written material use *sure to* in place of the colloquial *sure and*.

Be *sure to* give them my best regards. (**NOT:** Be *sure and* give them my best regards.)

Tack-tact. Use *tack* (**NOT:** *tact*) in the expression *to take a different tack* (meaning “to move in a different direction”). *Tact* means “a considerate way of behaving so as to avoid offending others.”

We may have to take a different *tack* in our negotiations with Firebridge.

Please use a great deal of *tact* when you reply to Korbman’s letter.

Take-bring. See *Bring-take*.

Teach-learn. See *Learn-teach*.

Tenterhooks. Anyone in a state of suspense may be said to be on *tenterhooks* (**NOT:** *tenderhooks*).

Than-then. *Than* is a conjunction introducing a dependent clause of comparison. *Then* is an adverb meaning “at that time” or “next.”

The compulsory retirement age is higher now *than* it was *then*.

They *then* asserted that they could handle the account better *than* we. (See ¶1057 for the case of pronouns following *than*.)

NOTE: Remember that *then* (like *when*) refers to time.

Thank you in advance. Authorities tend to agree that it’s inappropriate to thank someone before that person has actually done something to merit your thanks. To thank someone in advance gratuitously assumes that the person will be certain to grant your request. However, that person may not be able or willing to do what you want. As one alternative, you could write “I will be very grateful for [**OR:** I will very much appreciate] any help that you can give me.” If the help is then forthcoming, that would be the appropriate time to express your thanks.

That. As a subordinating conjunction, *that* links the dependent clause it introduces with the main clause. *That* is often omitted (but understood).

We realize *that* our bargaining position is not a strong one.

OR: We realize our bargaining position is not a strong one.

However, under certain circumstances *that* should not be omitted:

a. When the word or phrase following *that* could be misread as the object of the verb in the main clause.

NOT: I heard your speech next Wednesday had to be rescheduled.

BUT: I heard *that* your speech next Wednesday had to be rescheduled.

b. When *that* introduces two or more parallel clauses.

NOT: Hilary said she had narrowed the applicants for the job down to three people and *that* she would announce her choice by this Friday.

BUT: Hilary said *that* she had narrowed the applicants for the job down to three people and *that* she would announce her choice by this Friday.

Continued on page 402

¶1101

- c.** When an introductory or interrupting element comes between *that* and the subject of the dependent clause.

NOT: I think whenever possible, you should consult everyone involved before making your decision.

BUT: I think *that* whenever possible, you should consult everyone involved before making your decision. (See ¶130d.)

NOTE: If you are in doubt, do not omit *that*.

That–where. See *Where–that*.

That–which–who. See ¶1062.

Therefore. Beginning a sentence with *therefore* is now considered perfectly acceptable. *Therefore* (like other transitional expressions, such as *however* and *moreover*) helps readers relate the thought being introduced to the thought that went before. Many readers find it more helpful if they encounter the transitional expression at the beginning of the sentence. In that way they can tell from the outset the direction in which the new sentence is proceeding. (See also *However*) Compare these examples:

When you are addressing a request to someone who reports to you, you expect that person to comply. A period can be properly used, *therefore*, to punctuate such requests. Since most people prefer to be asked to do something rather than be told to do it, *however*, a question mark establishes a nicer tone and often gets better results.

When you are addressing a request to someone who reports to you, you expect that person to comply. *Therefore*, a period can properly be used to punctuate such requests. *However*, since most people prefer to be asked to do something rather than be told to do it, a question mark establishes a nicer tone and often gets better results.

In any case, the location of a transitional expression in a sentence must be determined by the individual writer. (For a list of transitional expressions, see ¶138a.)

These sort–these kind. Incorrect; the correct forms are *this sort*, *this kind*, *these sorts*, *these kinds*. (See also *Kind*.)

Titled–entitled. See *Entitled–titled*.

To-do. See *Ado–adieu–to-do*.

Toe the line— toe the mark. In these expressions (which mean “to conform to a rule or standard”), the correct spelling of the verb is *toe* (**NOT:** *tow*).

Together. See *Both alike–both equal–both together*.

Tough row to hoe. This expression refers to *hoeing a row in a garden* (**NOT:** *hoeing a road*).

Toward–towards. Both forms are correct, but *toward* is more common in U.S. usage.

Try and. In written material use *try to* rather than the colloquial *try and*.

Please *try to* be here on time. (**NOT:** Please *try and* be here on time.)

Type. See *Kind*.

Type–key. The verb *type* has traditionally been used to refer to actions performed on a typewriter keyboard. The verb *key* was originally introduced to refer to actions performed on a computer keyboard. However, *type* has supplanted *key* in many software manuals and even appears in screen displays.

Uninterested-disinterested. See *Disinterested-uninterested*.

Unique. Do not use *unique* in the sense of “unusual.” A unique thing is one of a kind. (See ¶1071f.)

Up. Many verbs (for example, *end, rest, lift, connect, join, hurry, settle, burn, drink, eat*) contain the idea of “up”; therefore, the adverb *up* is unnecessary. In the following sentences, *up* should be omitted.

You need to rest (up) for a bit.	Save \$50 if you join (up) now.
Let's divide (up) the workload.	I will call him (up) tomorrow.

Upon-up on. See *On-upon-up on*.

Used to. As a general rule, be sure to spell *used* with a *d*.

Marcia *used* to live in Phoenix. **OR:** Marcia *used* to live in Phoenix, didn't she?

However, do not add a *d* to *use* in the expressions *did use to* and *didn't use to*.

Marcia *didn't use* to live in Phoenix. **OR:** *Didn't* Marcia *use* to live in Phoenix?

Reason: A helping verb (in this case, *did* or *didn't*) should be followed by an infinitive (in this case, *use*) rather than a past tense form (*used*). To better understand this principle, consider another example, where *want* takes the place of *used* or *use*:

Marcia *didn't want* to live in Phoenix. (**NOT:** *didn't wanted*.)

As an alternative to these subtle distinctions, reword to avoid *used to* or *didn't use to* altogether.

Marcia *formerly lived* in Phoenix. **OR:** Marcia *lived* in Phoenix *some time ago*.

Did Marcia *ever live* in Phoenix? **OR:** Marcia *never lived* in Phoenix, did she?

Verbal. The word *verbal* can often cause confusion because it means “expressed in words” as well as “oral, not written.” Reword as necessary to make your meaning clear.

AMBIGUOUS: How would you rate Sid's *verbal* skills?

CLEAR: How would you rate Sid's ability to express himself in words?

CLEAR: How would you rate Sid's ability to express himself orally?

CLEAR: How would you rate Sid's ability to express himself in speech and writing?

Avoid expressions such as *verbal contracts* unless you are sure your audience knows that these are *oral agreements*.

Very. This adverb can be used to modify an adjective, another adverb, a present participle, or a “descriptive” past participle.

We are *very happy* with the outcome. (Modifying an adjective.)

This finish dries *very quickly*. (Modifying an adverb.)

It was a *very disappointing* showing. (Modifying a present participle.)

I was *very pleased* with the pictures. (Modifying a descriptive past participle.)

When the past participle expresses action rather than description, insert an adverb like *much* after *very*.

They are *very much opposed* to your plan. (*Opposed* is part of the complete verb *are opposed* and expresses action rather than description.)

(**NOT:** They are *very opposed* to your plan.)

¶1101

Vicious circle. The correct form is *vicious circle* (**NOT:** vicious cycle).

Ways. Do not use *ways* for *way* in referring to distance. For example, “I live a short *way* [**NOT:** ways] from here.”

Well—good. See *Good—well*.

Whatever—what ever

You may write on *whatever* [any] topic you wish.

What ever made you think that was true? (*Ever* is an adverb here.)

Where—that. Do not use *where* in place of *that*.

I saw in yesterday’s paper *that* Schuster’s had decided to close its midtown store.

(**NOT:** I saw in yesterday’s paper *where* Schuster’s had decided to close its midtown store.)

Whether—if. See *If—whether*.

Which. Traditionally, the use of *which* to refer to a previous clause in a sentence has been frowned upon, but it is now considered acceptable if it is not overdone.

Nick Farnsworth promised to forward my movie script to his own agent, *which he did*. (Here *which* refers to the entire main clause in the sentence.)

Avoid this usage when simpler means of expression are readily available.

AVOID: Some legal writing will not be comprehensible to people without legal training, *which is to say, it may refer to legal principles unfamiliar to lay readers*.

BETTER: Some legal writing will not be comprehensible to people without legal training; *that is to say, it may refer to legal principles unfamiliar to lay readers*.

While. *While* has two meanings: “during the time that” and “although.”

While [during the time that] Sam was here as a summer intern, he did a great job in cleaning up our mailing lists.

While [although] I understand your objections, I feel that I must proceed as I had planned.

Ordinarily, the context makes it clear which meaning is intended, but reword in cases where the use of *while* could cause confusion.

Who—which—that. See ¶1062.

Who—whom. See ¶1061.

Whoever—who ever. See ¶1061.

Whoever [anyone who] made such a statement should be fired.

Who ever made such a statement? (*Ever* is an adverb here.)

Will—shall. See *Shall—will*.

Wise. Avoid the temptation to coin new words by attaching the suffix *wise* to various nouns. (Stylewise, it’s considered bad form.)

NOT: *Costwise*, we’re already 20 percent over budget.

BUT: We’re already 20 percent over budget on costs.

NOT: *Sizewise*, what comes after extra large? Gross? (Even when used in a conscious attempt at humor, the approach leaves much to be desired. Once again, avoid the temptation.)

BUT: *In terms of size*, what comes after extra large? Gross?

NOTE: A number of words ending in *wise* are quite acceptable. For example:

clockwise	crosswise	lengthwise	otherwise
counterclockwise	edgewise	likewise	sidewise

In the examples above, *wise* is a suffix meaning “with regard to” or “in the manner of.” *Wise* (in the sense of “knowledgeable about”) is also used in compound adjectives like these:

penny-wise	weather-wise	worldly-wise	streetwise
------------	--------------	--------------	------------

Such words are also quite acceptable.

Worse-worst. The expression “if worst comes to worst” is more commonly used than “if worse comes to worst,” but both versions are considered correct.

Would-should. See *Should-would*.

Would have-would of. Note that the second word in this verb phrase is *have*. The form *would of* is wrong. (See *Of-have*.)

I myself *would have* [NOT: *would of*] taken a different tack.

As a general rule, when a clause begins with *if*, do not use *would have* in place of *had*.

If you *had* come early, you could have talked with Dr. Fernandez yourself.

(NOT: If you *would have* come early, you could have talked with Dr. Fernandez yourself.)

► For a few exceptions to this general rule, see ¶1040b.

Wrack-rack. See *Rack-wrack*.

Proofreaders' Marks (¶1206)

Editing and Proofreading Guidelines

In the traditional business world, *editing* and *proofreading* have been considered activities quite distinct from the act of *composing* (whether letters, reports, or some other documents). In this environment one person composes the document—either in the form of a written draft or in the form of dictated material—and someone else assumes the responsibility for editing and proofreading the material and producing the final document. Although this separation of responsibilities still exists in many offices, only higher-level executives typically continue to enjoy this arrangement.

In the modern business world, the widespread use of computers has greatly affected the way in which documents are prepared and produced. Many people are now responsible both for composing and for producing the final document themselves. In this new environment editing and proofreading become fully integrated into the overall writing process.

Individuals approach the writing process in different ways. Some begin by planning what they want to say in the form of an outline (see ¶¶1718–1723). Then, on the basis of this outline, they compose a first draft of the document. Many other people find it difficult to plan and outline before they begin to write. For such people the first stage of writing is the means by which they discover what they are trying to say. They typically begin by jotting their thoughts down in random order, knowing that the result of this first effort may literally be a mess that needs to be cleaned up. (They may even find it helpful to pretend that someone else has created the mess that they are about to clean up.) People who are paralyzed by the sight of a blank screen or a blank sheet of paper find it comforting to begin the *serious* job of writing by starting with a copy of an existing document and adapting it to fit the current situation.

However writers arrive at a first draft—whether through careful planning and outlining or by means of a random outpouring of thoughts—they must now apply editing techniques to the writing process in order to determine (1) what material to add or leave out, (2) how to organize the material that remains, and (3) how to adjust the wording so as to achieve their objective. As they edit, they must also correct any problems they encounter in grammar, usage, and style.

And as they go through one or more additional drafts, they must also apply proofreading techniques to confirm that each draft accurately presents the material in the form that was intended. When writers proceed in this way, editing and proofreading become totally integrated in the writing process almost from the very beginning.

Whether you are working on material composed by someone else or you are responsible for all phases of the writing process, the following guidelines on editing and proofreading should help you achieve a higher level of quality in the documents you produce.

The Editing and Proofreading Process

1201 **a.** *Editing* is the process by which you look at material that you or someone else has written and evaluate it on its own terms (either in its original form or at a later stage). You question the material on the grounds of accuracy, clarity, coherence, consistency, and effectiveness. If you have drafted the material yourself, you may have to revise it several times in order to resolve all the problems you find. If you encounter problems while editing material that someone else has written, you resolve the ones you are equipped and authorized to handle. You refer the other problems (with suggestions for changes when possible) to the author of the original material, who will then decide how to resolve these problems.

b. *Proofreading* is the process by which you look at copy that you or someone else has written and confirm that this version faithfully reproduces the original material in the intended form. If the copy deviates in any way from the original, you have to mark it for correction. Once the corrections are made, you have to read the copy again to ensure that everything is now as it should be.

NOTE: Ordinarily, one person can handle the task of comparing the copy against the original and noting any necessary corrections. However, if the material is complex or involves many statistics or formulas, it is wise for two people to share the proofreading function: one (known as the *copyholder*) reads the original material aloud and also indicates the intended punctuation, capitalization, and paragraphing, as well as other significant details of style and format, while the other person (the *proofreader*) examines the copy closely to ensure that everything appears as it ought to.

c. If you encounter a set of figures as a proofreader, your responsibility—strictly speaking—is only to ensure that the figures on the copy agree with the corresponding figures in the original. However, as an editor, you may question whether the figures in the original are correct as given or even the best figures that might be supplied. By the same token, if you examine text material as a proofreader, your only responsibility is to confirm that the copy agrees with the original in wording, style, and format. However, as an editor, you might question—and change—the wording, the format, and the style in the interests of accuracy, clarity, coherence, consistency, and effectiveness.

d. Many people often function simultaneously as editors and proofreaders without realizing that they are operating at two levels—one essentially *mechanical*

Continued on page 410

¶1202

(checking for similarities and differences) and the other essentially *analytical* and *judgmental* (looking for problems and solving them). Ideally, editing should be done on the original material so that all problems of substance, grammar, style, and format are resolved before a copy is executed in final form. However, it would be a mistake to read the final copy merely as a mechanical proofreader, assuming that the original is perfect and that you only need to look for places where the copy deviates from the original. On the chance that problems may have gone undetected in the earlier editing, you need to read the final copy in that challenging, questioning way that distinguishes editing from simple proofreading. You may be able to edit and proofread at the same time, or you may need to make several readings, focusing each time on different things.

The following paragraphs (¶¶1202–1203) suggest the kinds of things you should be looking for when you edit and proofread. As you review these suggestions, keep in mind that a sharp eye and sound judgment are essential elements in this process.

What to Look For When Editing

1202 When *editing* a document at any stage in the writing process, consider the material in light of the following factors.

► *For an explanation of the proofreaders' marks used to indicate the necessary corrections in the following examples, see ¶1206 and the charts on pages 420–421.*

- Check for errors in *spelling* (see Section 7). Give special attention to compound words (see Section 8) and words that have plural or possessive endings (see Section 6). When the material is in its final form, confirm the correctness of all word divisions (see Section 9).

We had a similiar break down in communications last May
 when a high-level executive failed to inform us that the
 corporations attorneys had advised against it's proced-
 ati
 ing with merger negotiations. However, that was only the
 tip of the iceburg.

NOTE: Use a spell checker if you have one. However, since spell checkers are not infallible, be prepared to consult a reliable, up-to-date print or online dictionary.

- Make sure that every necessary mark of *punctuation* is correctly inserted. (See Sections 1 and 2.)

How do you account for the fact that whenever we are
 about to launch a new product the company cuts the mar-
 keting dollars we need to promote the product.

- Inspect the material for possible errors in *capitalization, number, and abbreviation style*. (See Sections 3, 4, and 5.)

Please be sure to attend the Managers' meeting scheduled for June 4th at three p. m. There will be 5 announcements of special interest.

- d. Correct any errors in *grammar and usage*. (See Sections 10 and 11.)

Everyone of the sales representatives has made less calls in the past six months than they did in the previous six-month period.

- e. Be on the lookout for *inconsistencies in the wording* of the document. If you are editing someone else's material, resolve any problems that you can and refer the rest to the author of the original material.

When I met with you, Harry Mills, and Paula Fierro on

May 8, we agreed that . . .

Ed: Wasn't Paula
at the 5/8 meeting?

I think that you ought to fill Paula Fierro in on what

happened at our May 8 meeting and get her thoughts about

how we ought to proceed.

NOTE: Be especially alert to wording that conveys a meaning you did not intend.

BAD: We take pride in offering excellent food and service every day except Sunday. (Does this mean that on Sundays the food and service are perfectly dreadful?)

BETTER: We take pride in offering excellent food and service. We are open every day except Sunday.

BAD: To enjoy our specially priced pretheater menu, you must be seated by 6 p.m. Remember, the early bird gets the worm. (Does the menu offer anything more appetizing?)

BETTER: To enjoy our specially priced pretheater menu, you must be seated by 6 p.m. Please try to come earlier if you can.

- f. Also look out for *inconsistencies in format*. Make sure that comparable elements in the document (for example, text, titles, headings, displayed extracts, and numbered or bulleted lists) have been treated the same way in terms of typeface, type size, placement, and so on.
- g. Look for problems in *organization and writing style*. The material could be entirely correct in terms of grammar, style, and usage, but it could still contain unclear or repetitive wording, clumsy sentences, a weak organization, or a tone that is not appropriate for the occasion.
- h. If you are editing someone else's material, determine whether or not fact-checking should be one of your responsibilities. If the answer is yes, ask which internal documents you should consult and which external resources are likely to be most reliable. If your fact-checking turns up evidence of error or inconsistency, let the person who assigned you this task assume responsibility for deciding how to resolve the problem.

¶1203

- i. Look at the document as a whole from the intended readers' perspective, and consider whether it is likely to accomplish its *objective*. If the document is intended to persuade readers to accept a recommendation that they currently tend to oppose, has the writer (you or someone else) anticipated their objections and dealt with them? Or has the writer ignored the existence of such objections and thereby created the need for a follow-up document—or, what is worse, made it likely that the readers' negative leanings will harden into a flat rejection of the writer's recommendations?

NOTE: If you are editing material you yourself have written, consider all the points noted in ¶1202a–i. However, if you are editing material written by someone else, the extent of your editing will depend on your experience and your relationship with the writer. If you are working for a literate boss, determine whether your boss has any special preferences with regard to matters of style. (What may look like an error to you could be an acceptable practice that you are not familiar with.) On the other hand, a boss who does not pretend to grasp the technical points of style will no doubt welcome your editing for such things as spelling, punctuation, capitalization, grammar, usage, and inconsistencies (see ¶1202a–f).

How much your boss—or anyone else for that matter—will appreciate your comments about the organization, writing style, and effectiveness of the material (see ¶1202g–i) will depend not only on your relationship with the writer but also on the tact with which you make your comments. Do not assume that because you have a close relationship with the writer, you can speak bluntly. Indeed, the closer the relationship, the more tact you may need to exercise.

What to Look For When Proofreading

1203 When *proofreading* a document, be especially watchful for the following types of mistakes.

- a. Repeated words (or parts of words), especially at the end of one line and the beginning of the next. (Your spell checker will usually point out this kind of error.)

What are the chances of your
your coming to see us some-
time this summer?

I can help you in the event
in the event you have more
work than you can handle.

I have been awaiting some indi-
cation of a willingness to
compromise.

We are looking forward to the
to the reception you are plan-
ning for the Lockwoods.

NOTE: After you have rewritten a sentence, make sure you have deleted all the words you intended to replace.

ORIGINAL VERSION:

We are looking to serve you best.

INTENDED REVISION:

We are looking for the best way to serve you.

ERRONEOUS REVISION:

We are looking to serve for the best way to serve you.

b. Substitutions and omissions, especially those that change the meaning.**Original Material**

We offer a full range of goods and services.

The court has ruled that this transaction is not legal.

In my opinion, there is no reason to suspect Fred.

I hereby agree to pay you \$87.50 in full settlement of your claim.

Tom has probably reached the acme of his career.

The board has decided to install metal detectors in all the schools.

Ron's test scores ranked near the bottom.

Our employees turn out flawless work every time.

Our hospital ranks high in inpatient care.

I'm getting to my goal slowly but surely.

I hope to run in this year's marathon.

Lord, make me humble.

We've been friends for years.

This spell checker will leave your e-mail looking spic and span.

Now that you've enlisted, when do you expect to be inducted?

Members of the Aid Society have cast off clothing for every occasion.

Dear Ms. Neilson:

Thankyou for your letter of April 24. Let me try to answer each of the questions you raised.

First,we do not sell the components separately; they only come pack aged as a set.

NOTE: As a final step in proofreading, check the appearance of the document. Is the document printed clearly? Are there any smudges or marks that need to be cleaned up? Is the document properly aligned on the page? Does each page as a whole look attractive? Apply standards that are appropriate for the occasion. Documents prepared for higher management and for clients or customers of your organization should meet the highest standards of appearance. On the other hand, manuscripts, drafts, and even rush memos to coworkers can be sent forward with minor corrections neatly inserted by hand. Naturally, if you are using a computer, you can make the corrections and quickly obtain a clean (and correct) page. (See ¶¶1204–1205.)

Editing and Proofreading at the Computer

1204 The computer provides some wonderful enhancements to the editing process. You can insert new copy, kill old copy, rearrange copy as many times as you like, and then print a clean version without any evidence of all the previous changes. Yet in the process of all this electronic “cutting and pasting,” you may have failed to remove every bit of the old version you rejected; you may have changed the subject of a sentence from singular to plural without realizing the effect this change would have on the verb; you may even have inserted new copy in the wrong place and thus unintentionally produced pure gibberish. This is true, even if you make use of the *track changes* feature of Microsoft Word or a similar word processing feature. It is imperative that you carefully proofread copy that has been rewritten and edited on a computer. Try to catch and correct as many errors as you can when reviewing copy on the screen. However, experienced users report that it is difficult to find every error when proofing on the screen, so give the printout a careful reading as well. In any case, edit the material carefully in light of all the factors noted in ¶1202.

To maximize the benefits of using a computer and minimize the drawbacks, follow these guidelines.

- a. If you are composing at the computer, be especially careful when reviewing your work. Experienced writers recognize that when they read what they have written, they have a tendency to see what they intended to write rather than what is actually there. That’s why even good writers always need good editors.
- b. If someone else will be editing your material and preparing the final document, you may be tempted to deliver the material (whether on disk or in some other electronic format) in rough, first-draft form and expect the other person to resolve any problems that remain in your material. However, you need to take full responsibility for the document, even though editorial assistance is provided.

NOTE: If you are delivering a rough draft along with specific instructions on how certain material should be handled, write the instructions in the margin and circle them so that they will not be confused with material to be inserted in the text.

- c. If you are typing material from hard copy, first edit it carefully. If someone else wrote the copy, before you type it, get the writer’s help in resolving any questions about content and style that you do not feel equipped or authorized to resolve yourself. By carefully editing this material prior to typing it, you greatly reduce the likelihood of undetected errors in the final document.
- d. If you are transcribing from recorded input, you may have to consider the first version you print as a draft that must be approved by the author.
- e. By the same token, if you receive input on disc or via the Internet, you may want to give the person who originated the document a chance to review and alter the document before you undertake the final editing and proofreading.
- f. Before you print the material, run it through the spell checker and the grammar checker and make the necessary corrections. (However, see ¶1205 for cautions

¶1205

about relying on spell checkers and grammar checkers.) Also scan the material on the screen for any obvious mistakes (such as those noted in ¶¶1202 and 1203), and make the necessary changes.

NOTE: If you have transcribed from recorded dictation, you will have no original copy to proofread against. Moreover, in the act of transcribing, it is easy to misinterpret and mispunctuate words and phrases or to omit them altogether. Therefore, while you should try to identify and correct as many errors on the screen as you can, you need to recognize that the editing you have done at this stage is not likely to be sufficient.

- g.** After you print the material, examine it carefully for all types of errors as well as possible instances of inconsistency and incoherence. Make the necessary corrections, and then review the new material—first on the screen and then again on the final printout—to make sure you have not introduced any new errors.

NOTE: If more than one draft is required before you get to the final version, use a header or a footer to identify each succeeding draft by number and, if appropriate, by date and time and author or editor. (Your word processing program may well give you the capacity to track the date and time and author or editor automatically.) Identifying a draft by number is particularly important when several people are reviewing and commenting on a document. When you edit, you want to be sure that you are making changes to the most recent version.

Using a Spell Checker and a Grammar Checker

1205

The easy availability of spell checkers and grammar checkers has lulled many a computer user into a complacent (and false) sense of security. While these are extremely useful tools, they will not detect many types of errors. You will still have to read with a keen eye when you proofread, and you will always have to exercise sound judgment when you edit.

- a.** When you use a spell checker, do not assume that it will find all of your errors. If you have mistakenly substituted one correctly spelled word for another, the spell checker will not report this as an error. If you write, “Stella will be included in the bridle party,” the spell checker will not tell you that “bridle” should be “bridal.” If you write, “That article has really peaked my interest,” the spell checker will not tell you that “peaked” should be “piqued.” And if you should write, “Be sure to ruin this material through the spell checker,” the spell checker will utter no protest. If you are still not persuaded that your spell checker is unreliable, try typing the graffiti that is frequently seen on the Internet: “Bad spellers of the world, untie!” Your spell checker will not urge you to change “untie” to “unite”; it will leave you exposed as one of the bad spellers of the world.

NOTE: If you accidentally omit a space between two words, your spell checker will not flag this error if the letters that have run together form a valid word.

I believe that article came **outlast** year.

You can expect a surge in sales **incoming** months.

By the same token, if you accidentally insert a space within a solid word, your spell checker will not flag this error if the letters that have been split apart form two valid words.

What is the out look for the economy in the coming year?

I'm ha ppy to report that everything you shipped arrived in tact.

- b. When you use a grammar checker, do not accept its corrections or suggestions uncritically. Grammar checkers can sometimes provide totally misguided advice. At one time or another, my grammar checker has produced the following howlers:

ORIGINAL VERSION: I was wearing loafers that day.

SUGGESTED REVISION: I was a wearing loafer that day.

ORIGINAL VERSION: Thank you for all you have done to make this achievement possible.

SUGGESTED REVISION: Thank you for all you has done to make this achievement possible.

ORIGINAL VERSION: If the next edition of the book is now available, please let me know.

SUGGESTED REVISION: If the next edition of the book were now available, please let me know.

ORIGINAL VERSION: Let Claudia herself do the necessary work.

SUGGESTED REVISION: Let Claudia herself does the necessary work.

ORIGINAL VERSION: Its time to face the plane truth. (This sentence contains two errors.)

SUGGESTED REVISION: Fragment (consider revising). (No other suggestions were provided.)

ORIGINAL VERSION: I would have been totally confused if I did not know the situation as well as I do.

SUGGESTED REVISION: I would have been totally confused if I did not know the situation as well as I does.

ORIGINAL VERSION: I hope you and your family are enjoying your holiday.

SUGGESTED REVISIONS: I hope you and your family is enjoying your holiday.

I hope you and your families are enjoying your holiday.

If you want further proof that your grammar checker is unreliable, type any sentence that uses the word “like” and omit the *k*. There’s a good chance that your grammar checker will tell you to change “lie” to “lay.”

Proofreaders’ Marks

1206 When you are editing or proofreading hard copy, use the proofreaders’ marks shown on pages 420 and 421 to indicate the corrections that need to be made. Naturally, if your organization mandates a different set of proofreaders’ marks, you will want to use those instead. Variations in the way these marks are formed are unimportant as long as those who have to interpret them clearly understand what corrections have to be made.

Continued on page 420

1206**PROOFREADERS' MARKS**

PROOFREADERS' MARK	DRAFT	FINAL COPY
ss\s Single-space	ss I have heard he is leaving.	I have heard he is leaving.
ds\s Double-space	ds When will you have a decision?	When will you have a decision?
+ l#\#> Insert 1 line space	+ l#\#> Percent of Change 16.25	Percent of Change 16.25
- l#\#> Delete (remove) 1 line space	- l#\#> Northeastern regional sales	Northeastern regional sales
○ Delete space	together	together
# Insert space	It may be	It may not be
○ ↗ Move as shown	it is not true	it is true
○ Transpose	believable	believable
○ Spell out	is it so	it is so
△ OR ↗ Insert a word	2 years ago	two years ago
✗ OR — Delete a word or a punctuation mark	16 Elm St.	16 Elm Street
△ OR ↗ Insert a letter	How much is it?	How much is it?
✗ OR ↗ Delete a letter and close up	it may not be true	it may be true
○ Add on to a word	temperature	temperature
✗ OR / Change a letter	commitment to buy	commitment to buy
✗ OR ↗ Change a word	a real good day	a really good day
.... Stet (don't delete)	this supersedes	this supersedes
/ Lowercase a letter (make it a small letter)	but if you can't	but if you can't
≡ Capitalize	I was very glad	I was very glad
	Federal Government	federal government
	Janet L. greyston	Janet L. Greyston

PROOFREADERS' MARKS (Continued)

PROOFREADERS' MARK	DRAFT	FINAL COPY
▼ Raise above the line	in her new book ²	in her new book ²
▲ Drop below the line	H ₂ SO ⁴	H ₂ SO ₄
○ Insert a period	Mr ² Henry Grenada	Mr. Henry Grenada
△ Insert a comma	a large old house	a large, old house
▽ Insert an apostrophe	my children's car	my children's car
◀ ▶ Insert quotation marks	he wants a loan	he wants a "loan"
— Insert a hyphen	a first-rate job	a first-rate job
	ask the coowner	ask the co-owner
— Insert a one-em dash or change a hyphen to a one-em dash*	Success ² at last!	Success—at last!
	Here it is ² cash!	Here it is—cash!
— Insert italics	Do it <u>now</u> , Bill!	Do it <i>now</i> , Bill!
noital	Do it <u>now</u> noital	Do it now!

Saving Messages (¶1389)

Text Messages (¶1390)

¶1301

Section 13 provides guidelines for formatting letters, memos, and e-mail. These guidelines are not intended as inflexible rules. They can—and should—be modified to fit specific occasions as good sense and good taste require.

Letters

Parts of Letters

1301 A business letter has four parts and a variety of features:

Parts	Standard Features	Optional Features
HEADING:	Letterhead or return address (¶¶1310–1312) Date line (¶1313)	Personal or confidential notation (¶1314) Reference notation (¶1315)
OPENING:	Inside address (¶¶1316–1336) Salutation (¶¶1338–1341)	Attention line (¶1337)
BODY:	Message (¶¶1344–1345)	Subject line (¶¶1342–1343)
CLOSING:	Complimentary closing (¶1346) Writer's signature block (¶¶1348–1354) Reference initials (¶1355)	Company signature (¶1347) File name notation (¶¶1356–1357) Enclosure notation (¶1358) Delivery notation (¶1359) Confirmation notation (¶1360) Copy notation (¶¶1361–1364) Postscript (¶1365)

► Each of these features is illustrated in the model letters on pages 428–432.

Establishing a Format

1302 a. A business letter is usually arranged in one of the following styles:

- (1) **Modified-Block Style—Standard Format.** The date line, the complimentary closing, the company signature, and the writer's identification all begin at center. All other lines begin at the left margin. This style is also referred to simply as the *modified-block style*. (See page 428 for an illustration.)
- (2) **Modified-Block Style—with Indented Paragraphs.** This style is exactly the same as the standard format described in (1) above except for one additional feature: the first line of each paragraph is indented 0.5 inch. This style is also referred to as the *semiblock style*. (See page 430 for an illustration.)
- (3) **Block Style.** All lines typically begin at the left margin. Nothing is indented except for displayed quotations, tables, and similar material. This style is also referred to as the *full-block style*. (See page 431 for an illustration.)
- (4) **Simplified Style.** As in the block style, all lines begin at the left margin. However, the simplified style has these additional features: the salutation is replaced by a subject line in all-caps, the complimentary closing is omitted, the writer's signature block is typed in all-caps on one line, and open punctuation (see ¶1308b) is always used. (See page 432 for an illustration.)

- b. Word processing software typically provides several letter templates that you can choose from. For example, Microsoft Word 2007 provides an Equity template that reflects the block style.

The Equity Letter Template Provided by Microsoft Word 2007 Reflects the Block Style. See ¶1302a(3).

[Pick the date]

Name

[Type the sender company name]

[Type the sender company address]

[Type the recipient name]

[Type the recipient address]

[Type the salutation]

On the Insert tab, the galleries include items that are designed to coordinate with the overall look of your document. You can use these galleries to insert tables, headers, footers, lists, cover pages, and other document building blocks. When you create pictures, charts, or diagrams, they also coordinate with your current document look.

You can easily change the formatting of selected text in the document text by choosing a look for the selected text from the Quick Styles gallery on the Write tab. You can also format text directly by using the other controls on the Write tab. Most controls offer a choice of using the look from the current theme or using a format that you specify directly.

To change the overall look of your document, choose new Theme elements on the Page Layout tab. To change the looks available in the Quick Style gallery, use the Change Current Quick Style Set command. Both the Themes gallery and the Quick Styles gallery provide reset commands so that you can always restore the look of your document to the original contained in your current template.

[Type the closing]

Name

[Type the sender title]

[Type the sender company name]

- c. If you want to create your own letter template, Section 13 will provide you with the detailed guidelines you need. Moreover, the illustrations on pages 428–432 will serve as helpful models of all four letter styles identified in ¶1302a.

Continued on page 426

¶1303

- d.** The illustrations in Section 13 use the following system of notations to indicate how many blank lines to leave between the different elements of a letter or memo. The instruction to leave 1 blank line, for example, means “Begin typing the new element 2 lines down from the previous element.”

◀ 1L#	Leave 1 blank line.*
◀ 2L#	Leave 2 blank lines.
◀ 1 or 2L#	Leave 1 or 2 blank lines.†
◀ 3L#	Leave 3 blank lines.
◀ 4L#	Leave 4 blank lines.
◀ 5L#	Leave 5 blank lines.

*How you create 1 blank line between lines of type will depend on your word processing program. Microsoft Word 2007, for example, leaves 1 blank line when you press *enter* once; Microsoft Word 2003 leaves 1 blank line when you press *enter* twice.

†To conserve space or create a more condensed appearance, leave only 1 blank line. Leave 2 blank lines to create a more open appearance and enhance the readability of your document. The illustrations in Section 13 reflect the more open, more readable effect you may achieve by leaving 2 blank lines between elements in those situations where you have a choice between leaving either 1 or 2.

Stationery Sizes

- 1303** The three sizes of stationery most commonly used are *letter* (also called *standard*), *executive* (also called *monarch*), and *half letter* (also called *baronial*). For more information about stationery sizes, see ¶1305b.

Letter Placement

1304 Top Margin

- a. First Page.** As a general rule, leave a top margin of about 2 inches; this is the standard top margin for all business documents. (See the illustration on page 428.)

A one-page letter typed on blank stationery may be centered vertically. (See the illustration on page 430.)

If you are using letterhead stationery, leave at least a 0.5-inch space between the letterhead and the first element to be typed (ordinarily the date line). If the letterhead design is especially deep (as in the illustration on page 431), the use of vertical centering or a 2-inch top margin may not provide an adequate visual break between the letterhead and the date line.

- b. Continuation Pages.** Use a top margin of about 1 inch on each continuation page of a letter. These pages are always typed on blank stationery (even if the first page is prepared on a printed letterhead). (See ¶1366.)

1305 Side Margins

- a.** Determine the default side margins of the word processing software you are using. For letter and executive stationery, these default side margins are usually adequate.

- b.** Under certain circumstances, you may wish to use wider side margins—whether to lengthen a short letter or to make a letter more attractive or easier to read. On the other hand, you may wish to use narrower side margins if doing so will prevent your letter from continuing on to another page. The following chart shows the extent to which you can adjust the side margins to make them wider or narrower.

Stationery	Defaults		Adjustments for Widest Side Margins		Adjustments for Narrowest Side Margins	
	Side Margins	Maximum Line Length	Side Margins	Maximum Line Length	Side Margins	Maximum Line Length
Letter (Standard) 8½" x 11"	1" 1.25"	6.5" 6"	1.75"	5"	0.75"	7"
Executive (Monarch) 7¼" x 10½"	1" 1.25"	5.25" 4.75"	1.5"	4.25"	0.75"	5.75"
Half Letter (Baronial)* 5½" x 8½"	1" 1.25"	3.5" 3"	1"	3.5"	0.75**	4"

*With half-letter stationery, the use of 0.75" side margins is recommended. (The default side margins of 1.25" produce too short a text line.)

- c.** If you are using letterhead stationery with a column of printed copy running down the left side of the page, set the left margin 0.5 inch to the right of this copy. Set the right margin at a minimum of 1 inch, or simply use the default right margin.
- d.** Once you have established the side margins, the number of characters you can fit on a line of text will depend on the font (typeface) and the font size you select. The following chart displays some common fonts in different sizes so that you can see the variation in the number of characters that will fit in a given line.

Common Fonts and Sizes	Characters (1 Inch)	Sample Text (1.5 Inches)
12-point Times New Roman 11-point Times New Roman	abcdefghijklm abcdefghijklmn	Now is the time for all Now is the time for all g
12-point Cambria 11-point Cambria	abcdefghijklm abcdefghijklm	Now is the time for a Now is the time for all
12-point Calibri 11-point Calibri	abcdefghijklm abcdefghijklmn	Now is the time for all Now is the time for all g
12-Point Arial 11-point Arial	abcdefghijkl abcdefghijklm	Now is the time for a Now is the time for all

NOTE: If the default font of your software looks too small, select a larger size. If the default font is hard to read even when enlarged, choose a different font.

Dear Ms. Morales:

← 1L#

E

We were pleased to receive your letter of application for a sales position with Compudata Consultants.

← 1L#

At the moment we do not have an opening in the Fort Worth area, but we do need a field representative who is based in Lubbock and can cover the northwestern part of the state. If you would like to be considered for this position, please complete the enclosed application and return it to me.

← 1L#

As it happens, I will be attending a convention in Fort Worth next month. I would be delighted to meet with you while I'm in town and describe the job that is available.

← 1L#

When you return your completed application, please let me know whether you would be free to meet me at 4 p.m. on Wednesday or Thursday of the first week of January. I look forward to hearing from you.

← 1L#

F

Sincerely,

← 1L#

J**K****L****M**

- A Letterhead.** The company's name and address, along with other information (such as a telephone number, a fax number, and a Web address). (See ¶¶1310–1311.)
- B Date Line.** The date (month, day, and year) on which the letter is typed or will be mailed. As a general rule, leave a 2-inch top margin before typing the date line (as in the illustration on page 428). One-page letters may be centered vertically (as in the illustration on page 430); in that case type the date on the first available line. On stationery with a deep letterhead (as in the illustrations on pages 431 and 432), type the date line at least 0.5 inch below the letterhead. (For additional details, see ¶1313c–e.)
- C Inside Address.** The name and address of the person to whom you are writing. (See ¶¶1316–1336.)
- D Salutation.** An opening greeting like *Dear Ms. Morales*. (See ¶¶1338–1341.)
- E Message.** The text of the letter. All paragraphs are typed single-spaced with no indentations. Leave 1 blank line between paragraphs. (See ¶¶1344–1345.)
- F Complimentary Closing.** A parting phrase such as *Sincerely*. (See ¶1346.)
- G Company Signature.** An optional element that indicates the writer is acting on behalf of the company. (See ¶1347.)
- H Writer's Signature Block.** The writer's name and title. (See ¶¶1348–1354.)
- I Reference Initials.** The initials of the typist and sometimes those of the writer as well. Reference initials are not necessary when the writer is also the typist. (See ¶1355.)
- J File Name Notation.** A coded notation that indicates where the document is stored in computer memory. (See ¶¶1356–1357.)
- K Enclosure Notation.** An indication that the letter is accompanied by an enclosure. (See ¶1358.)
- L Delivery Notation.** An indication that the letter is being sent a special way. (See ¶1359.)
- M Copy Notation.** The names of those who will receive copies of this letter. (See ¶¶1361–1364.)

Modified-Block Style—With Indented Paragraphs

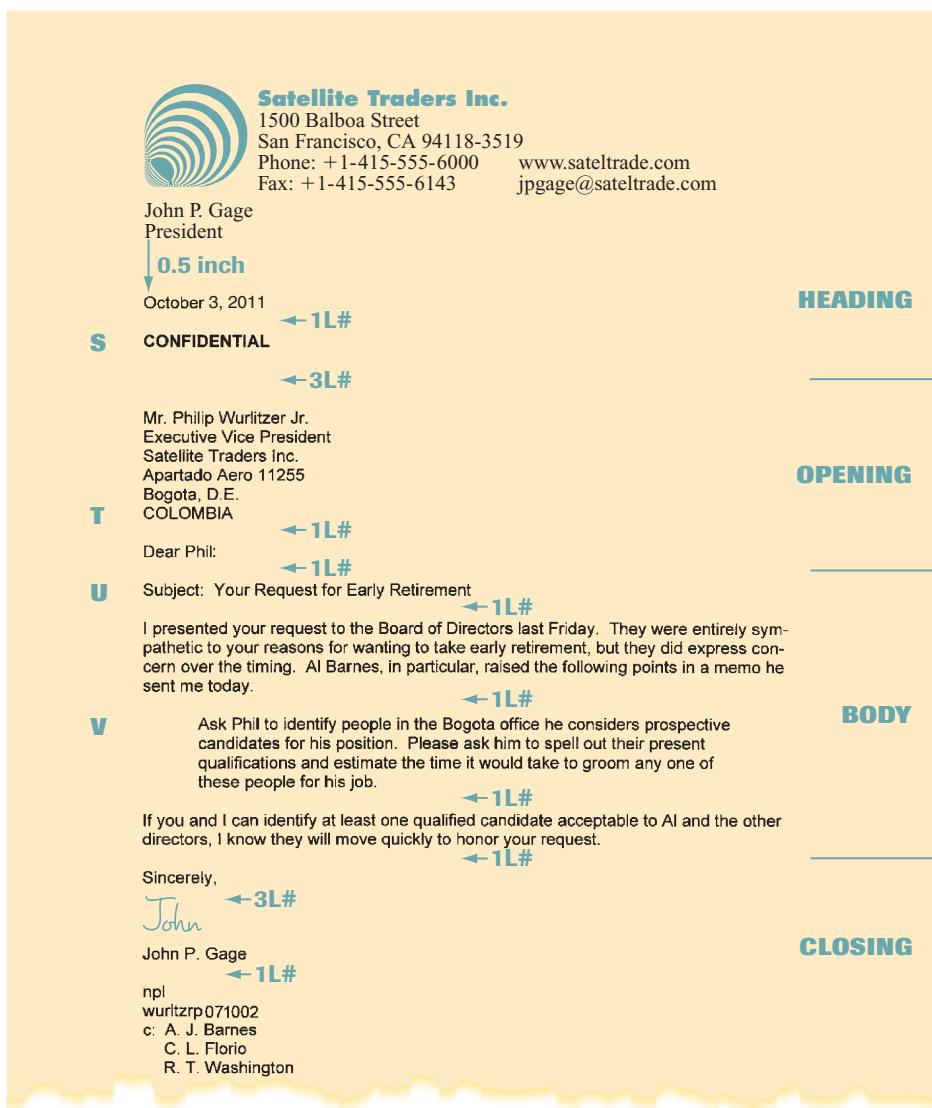

N Return Address. The arrangement that is used in a personal-business letter when an individual writes on blank stationery from home. With word processing software, you can transform the return address into a professional-looking letterhead. (See ¶1312.)

O Reference Notation. A filing code used by the writer or the addressee. (See ¶1315.)

P Attention Line. A means of directing the letter to a particular person or a specific department, even though the letter is addressed to an organization as a whole. Traditionally positioned on a separate line below the inside address, the attention line is now positioned as the first line of the inside address (without the word *Attention*) to reflect the recommended format for the mailing address. (See ¶1337.)

Q Paragraph Indentations. Customarily 0.5 inch. (See ¶1344f.)

R Postscript. A device for presenting a final idea or an afterthought. (See ¶1365.)

Block Style

► For the use of +1 with telephone numbers (as in the letterhead above), see ¶454f.

- S Confidential Notation.** A note indicating that the letter should be read only by the person addressed. (See ¶1314.)
- T International Address.** The name of the country typed in all-caps on a line by itself. (See ¶1336.)
- U Subject Line.** A means of stating what the letter is about. (See ¶¶1342–1343.)
- V Displayed Extract.** Copy set off from the rest of the letter for emphasis; indented 0.5 inch from the left and right margins. (See ¶1345a.)

HEADING

Mrs. Rita Selden
 680 Forrest Road, NE
 Atlanta, GA 30312

OPENING

W THE SIMPLIFIED LETTER

← 2L#

You will be interested to know, Mrs. Selden, that a number of years ago the Administrative Management Society developed a letter format called the simplified style. This is a sample.

← 1L#

1. It uses the block style as well as open punctuation.
2. It omits the salutation and the complimentary closing.
3. It uses a subject line, typed in all-capital letters and preceded and followed by two blank lines. The word *Subject* is omitted.
4. It identifies the signer by an all-capital line that is preceded by four blank lines and followed by one blank line if further notations are used.
5. It tries to achieve a brisk but friendly tone and uses the addressee's name at least in the first sentence.

← 1L#

Perhaps, Mrs. Selden, you ought to give this style a trial.

Z

BODY

X (Ms) Helen F. Holub ← 4L#

Y HELEN F. HOLUB, DIRECTOR, SECRETARIAL TRAINING ← 1L#

jb
 seldennr736

CLOSING

W Subject Line. Replaces the salutation; typed in all-caps on the third line below the inside address. (See also ¶1342.)

X Complimentary Closing. Omitted. (See also ¶1346.)

Y Writer's Signature Block. Typed on one line in all-caps. (See also ¶1349a.)

Z Justified Right Margin. Makes each line in the body of the letter end at the same point. This is an optional feature and may be used with any letter style. (See ¶1344g.)

NOTE: The numbered list in the illustration on page 432 has been typed with a blank line between items to achieve a more open look. Each numbered item in the list starts at the left margin, because that is a requirement of the simplified style. If you use the *numbered list* feature of your word processing program and accept all the defaults, the list may be single-spaced automatically; each numbered item may begin at the left margin or it may be indented from the left margin, depending on the program you are using. To match the style shown in the illustration, press *enter* to leave blank lines as indicated. The *tab* key will align each new item in the list with the item that appears above it. If the list as a whole is automatically indented, define the text of the list and use the *decrease indent* feature to locate the list flush left at the margin. (For illustrations showing various ways to format lists of numbered items, see ¶1345d.)

1306 Bottom Margin

- Leave a bottom margin of at least 1 inch. If you are typing a one-page letter that is to be centered vertically, the bottom margin will be automatically established.
- If the letter requires more than one page, you may increase the bottom margin on the first page up to 2 inches.
- If you are using letterhead stationery with a band of printed copy running across the bottom of the page, leave a minimum margin of 0.5 inch between the last line of text and the band of printed copy.

1307 Adjusting the Length of a Letter

- Lengthening a Short Letter.** To *spread* a short letter (under 8 lines of text) over one page, use any combination of the following techniques:
 - If you have been using narrow or default side margins, increase them. (See the guidelines in the chart in ¶1305b.)
 - If you have been using letterhead stationery, change to executive or half-letter stationery.
 - Increase the font size or select a font that yields fewer characters to an inch.
 - Insert extra space above the inside address, the signature line, and the reference initials. However, do not use more than twice the recommended space in each case.
- Shortening a Long Letter.** To *condense* a long letter (over 23 lines of text), use any combination of the following techniques:
 - If you have been using wide side margins, reduce them. (See the guidelines in the chart in ¶1305b.)
 - If you have been using executive or half-letter stationery, change to letter stationery.

1308

- (3) If a small amount of text carries over to a second page, you may be able to reduce the text to fit on a single page by using the *shrink-one-page* option in your word processing software. Another option is to use a slightly smaller font or font size that fits more characters on a line. Be sure, however, that after you make such adjustments, the type is still quite readable.
- (4) Reduce the space between the date and the inside address to 2 blank lines (instead of the customary 3).
- (5) Reduce the space for the signature from 3 blank lines to 2.

Punctuation Patterns

1308 The message in a business letter is always punctuated with normal punctuation. The other parts may be punctuated according to one of the following patterns:

- a. **Standard (Mixed) Pattern.** Use a colon after the salutation and a comma after the complimentary closing.

NOTE: This is the style most commonly used.

► *For an example of the standard pattern, see the illustration below.*

- b. **Open Pattern.** Use no punctuation at the end of any line outside the body of the letter unless that line ends with an abbreviation (for example, *Jr.*).

Spacing

1309 Type all letters single-spaced. Leave 1 blank line between paragraphs. (See the illustrations on pages 428–432.)

The following guidelines (¶¶1310–1315) deal with the *heading* of a letter. The heading may include a letterhead or a return address (¶¶1310–1312), a date line (¶1313), a personal or confidential notation (¶1314), and a reference notation (¶1315). The model letters shown on pages 428–432 illustrate the position of these elements in the heading.

Letterhead or Return Address

1310 Using a Letterhead

- a. The first page of a standard business letter is customarily written on stationery with a letterhead that contains at least these elements: the organization's name; the street address or post office box number (or both); the city, state, and ZIP Code; a phone number and a fax number. The letterhead may also contain a number of additional elements—for example, an e-mail address, a Web address (see ¶1508), and a logo or some other graphic element. However, large organizations with a number of operating units widely dispersed at the same location often provide a letterhead template that contains only those elements that are common to all operating units. Then each employee can customize the template by inserting contact information that is appropriate for that employee. (See ¶1311b, note.) As an alternative, each employee can provide this specific information in the signature block. (See also ¶1349c.)

Los Angeles, CA 90025-5835
 E-Mail: pater@paterson.com
 Web: www.paterson.com

- b.** High-level members of an organization may have special letterheads showing their name and title.
 ➤ *For an illustration of a top executive's stationery, see page 431.*
- c.** Avoid using abbreviations in a letterhead except those that are part of the organization's name or that represent a state name (see ¶1334a). Abbreviations are also commonly used in references to post office box numbers (*P.O. Box 447*) and telephone numbers.
NOTE: To achieve a more formal effect, spell out the state name and *Post Office*.
 ➤ *For examples of how these abbreviations may be used in letterheads, see the illustrations at the top and at the bottom of this page and on page 437.*
- d.** Even if your organization uses a post office box number as its primary mailing address, show a street address as well. In that way others will know where to direct ordinary mail (to the post office) and where to direct express mail (to the organization's office). If the two addresses have different ZIP Codes, be sure to provide this information.

1311 Designing a Letterhead

The design of a letterhead can take many different forms. If there is any single feature that characterizes contemporary letterhead designs, it is a movement toward a cleaner, sleeker, less cluttered look.

- a.** The illustration in ¶1310 represents a traditional approach. Note that guide words (followed by colons) are used to identify the two telephone numbers and the two electronic addresses. (For another illustration, see page 428.)
- b.** The following letterhead (designed for a small company) reflects a contemporary style, which simplifies or eliminates some of the elements that appear in the traditional format.

poe research associates

www.poeresearch.com
search@poeresearch.com

- (1) Note that no guide words have been provided for the Web and e-mail addresses; they are now considered so familiar that no additional identification is required. In actual practice, most organizations do not include a general e-mail address in their letterhead. (See the note below.)
- (2) It is now commonly accepted practice to omit *http://* from Web addresses in letterheads. Some organizations omit *www* as well.
- (3) Guide words are provided to distinguish the two telephone numbers, one of which is a fax, but no punctuation has been used and *Telephone* has been shortened to *Tel*.

NOTE: As an alternative to providing a main e-mail address in the letterhead, some organizations provide a letterhead template that permits each employee to personalize it with that employee's own e-mail address and phone number. Other organizations provide a "Contact Us" section on their Web site that displays different e-mail addresses for different types of inquiries (general, sales, order fulfillment, technical support, and so on).

- c. Individuals who want to make themselves available to clients and customers at all hours will want to provide more than a mailing address, an e-mail address, and a phone number. They may also insert such elements as a Web address, a home phone number, a mobile phone number, a pager number, and a voice mail number. All of these elements may appear as part of the letterhead at the top of the page, or some may be located at the foot of the page to avoid a cluttered design.
- d. The following letterhead (designed for an individual with a home office) reflects an even simpler style, in which the guide words have been reduced to single letters: *p* for phone, *f* for fax, *v* for voice mail, and *e* for an e-mail address. (For another illustration, see page 432.)

► For guidelines on how to treat telephone numbers in letterheads and on business cards, see ¶454.

¶1312**1312 Using a Return Address**

If you are using plain paper for a *personal-business letter* (one you write as an individual from your home), you can supply the necessary address information in the form of a *return address*.

- a. At the top of the page, provide the following information on three or more single-spaced lines: (1) the street address; (2) the city, state, and ZIP Code; (3) the phone number (if you want the addressee to have it); and (4) the date (see ¶1313).

Apartment 2B

OR: 212 West 22d Street, Apt. 2B

212 West 22d Street

New York, NY 10011-2706

New York, NY 10011-2706

212-555-9097

212-555-9097

January 24, 2011

January 24, 2011

- b. Begin each line of the return address at the same point as the complimentary closing and the writer's typed name—at the center of the page for the *modified-block* style and at the left margin for the *block* and *simplified* styles.

NOTE: If you place the return address at the left margin, you may encounter a small problem when you want to transfer the inside address to the envelope. Some software programs automatically select the address block that comes first. If your program selects your return address for this purpose, you can easily overcome this problem by manually selecting the inside address block for use on the envelope.

- c. Create a top margin of approximately 2 inches. One-page letters may be centered vertically; in this case simply start the return address on the first available line.

Date Line

- 1313** a. The date line consists of the *name of the month* (written in full—never abbreviated or represented by figures), the *day* (written in figures and followed by a comma), and the *complete year*.

September 17, 2010 (**NOT:** Sep. 17, 2010 **OR:** September 17th, 2010)

NOTE: Do not use the style 9/17/10 in the date line of a business letter.

- b. In military correspondence and in letters from other countries, the date typically appears in this order: day, month, year.

17 September 2010

- c. For the *modified-block* letter style, start the date at the center. For the *block* and *simplified* letter styles, start the date at the left margin.

- d. As a general rule, type the date about 2 inches from the top of the page. (See the illustration on page 428.) If you are typing a one-page letter and have decided to center it vertically, type the date on the first available line. (See the illustration on page 430.) If you are using stationery with a deep letterhead, type the date about 0.5 inch below the letterhead. (See the illustration on page 431.)

- e. If you are using a return address at the top of a letter, type the date directly under the last line in the return address block (as illustrated in ¶1312a).

f. If you are using a letter template provided by Word 2007, the date will be inserted when you click on the date field and select a date. If you then file a copy of the letter electronically, that date will change every time you open the document. In order to retain the original date, left-click the *date* field and select “remove content control.” In this way you can also change the default style of the date (for example, from 5/3/10 to May 3, 2010).

If you are using a letter template provided by other word processing software, the current date will also be inserted in position as you begin to type the letter. Here again, if you file a copy of the letter electronically, that date will change every time you open the document. If the document represents a form letter and you want the current date to appear every time you open the document, you will welcome this automatic updating feature that your software template provides. However, if you plan to retain an electronic copy of this letter and want to preserve the original date, you must turn off the *automatic update* feature.

Personal or Confidential Notation

1314 If a letter is of a personal or confidential nature, leave 1 blank line after the date and type the appropriate notation, starting at the same point as the date. Type the notation in bold caps. (See the illustration on page 431.)

PERSONAL

CONFIDENTIAL

Reference Notation

1315 a. If you wish to insert a reference notation, leave 1 blank line after the date (or any notation that follows the date) and start typing at the same point as the date. A reference notation typically begins with the guide words *When replying, refer to:* or something similar.

When replying, refer to: watsonnd363

NOTE: You may insert a file name notation here instead of at the bottom of the letter. (See ¶1357b.)

b. When you are replying to a letter that contains a reference number or when you want to emphasize the fact that your letter concerns an insurance policy, an order, or a similar document, leave 1 blank line after the date (or any notation that follows the date) and then start typing the appropriate reference notation at the same point as the date. (See the illustration on page 430.)

In reply to: G241 782 935

Refer to: Policy 234844

c. When there are two reference notations to be given, type your own reference notation first (as indicated in ¶1315a). Then leave 1 blank line and start typing the addressee's reference notation.

When replying, refer to: dingesc524

← 1L#

Your reference: blockagc747

¶1316

- d.** If you prefer, you can give the addressee's reference notation in a subject line. (For examples, see ¶1343f.)
- e.** If you want the addressee of a given letter to send a response by fax or e-mail, you may make this request in the body of the letter or, for greater emphasis, in the form of a reference notation.

When replying, send fax to: 707.555.9985

When replying, send e-mail message to: mgallagher@gmail.com

NOTE: If the notation is too long to fit on one line, break it after the colon.

When replying, send e-mail message to:

mgallagher@gmail.com

The following guidelines (¶¶1316–1341) deal with the opening of a letter. The opening typically includes two elements: the inside address (¶¶1316–1336) and the salutation (¶¶1338–1341). It may also include an attention line (¶1337).

Inside Address

1316 Letters to an Individual

- a.** The inside address for a letter to an individual's home should include the following information: (1) the name of the person to whom you are writing (see ¶¶1320–1323); (2) the street address, the box number (see ¶1331), or the rural route number (see ¶1316c); and (3) the city, state, and ZIP Code (see ¶¶1332–1335).

Dr. Margaret P. Vanden Heuvel 615 University Boulevard Albuquerque, NM 87106-4553	Mrs. Bernell Williams 5860 Spring-Cypress Road Spring, Texas 77379
Mr. Lawrence Sidelinger 24 Goah-way Road Edgecomb, Maine 04556	Dr. Honora Danforth 176 Labor in Vain Road Ipswich, MA 01938

► For the placement of the inside address, see ¶1318a; for the use of the nine-digit ZIP Code, see ¶1332b.

- b.** If the person lives in an apartment building, give the apartment number after the street address or, if it will not fit, on the line above.

Mr. William E. Slifka 13 Cat Mousam Road, Apt. 1B Kennebunk, Maine 04043	Ms. Susan H. Ellington Apartment 2104 11740 Wilshire Boulevard Los Angeles, CA 90025
--	---

- c.** If you are writing to someone with a rural route address or a highway contract route address, do not use *rural route*, *highway contract route*, *number*, *No.*, or *#* in the address. Use the abbreviation *RR* or *HC* plus a box number. For example:

Margo Zahner
RR 2, Box 116
Bennett, IA 52721

Avoid using a street name in conjunction with an RR or HC address. If one is used, place it on the line above the RR or HC address.

NOTE: You may want to create an autotext entry containing the inside address and salutation for any individual or organization that you frequently write to.

1317 Letters to an Organization

- a. The inside address for a letter to an organization should include the following information: (1) the name of the organization, (2) a street address or a post office box number, and (3) the city, state, and ZIP Code. Whenever possible, address the letter to a specific person in the organization and include that person's job title and department (if known). If you do not have the name of a specific person, use a title instead (for example, *Director of Marketing*).

Mr. Arthur L. Quintero	Director of Research
National Sales Manager	Stanton Chemical Company
Paragon Industries	Post Office (OR: P.O.) Box 21431
211 North Ervay Street	Chattanooga, TN 37421-0431
Dallas, Texas 75201	

► *For the placement of the inside address, see ¶1318a; for the use of the nine-digit ZIP Code, see ¶1332b.*

- b. When the inside address requires a room number, a suite number, or a floor number, insert that element after the street address or, if it will not fit, on the line above. Note the use of a comma when this element follows the street address on the same line. (See ¶1327.)

Ms. Alice G. Alvarez	James W. Chiverton, M.D.
Werler Construction Company	Suite 1200
416 12th Street, Room 8	1111 West Mockingbird Lane
Columbus, Georgia 31901-2528	Dallas, TX 75247-3158

NOTE: Use figures for room numbers and suite numbers, even from 1 through 10. Use words for floor numbers from 1 to 10 and figures for higher floor numbers.

621 Mehring Way, Fourth Floor	521 Fifth Avenue, 17th Floor
Cincinnati, Ohio 45202	New York, NY 10175

1318 a. Whether a letter is going to an individual's home or to an organization, leave 3 blank lines below the date (or any notation that follows the date) and then start typing the inside address at the left margin. (See ¶¶1314–1315.) In the simplified letter style, leave 5 blank lines below the date (or any notation that follows the date) and then start typing the inside address at the left margin.

► *See the illustrations on pages 428–432.*

NOTE: You may need to modify these guidelines if you plan to use a window envelope (see ¶¶1368i, 1370d).

- b. In social-business correspondence (see ¶¶1371–1372), type the inside address at the bottom of the letter. In a purely personal letter, no inside address is given at all.
- c. Single-space the inside address and align each line at the left.

¶1319

- 1319** **a.** If a letter is addressed to two people at the same address, list each name on a separate line. Do not show a position title for each person unless it is short and can go on the same line as the name. Moreover, omit the names of departments unless the people are in the same department. In effect, type only those parts of the address that are common to the two people named at the start. (On the envelope for each person, give the full address for that person.)

Dr. Paul J. Rogers
 Mr. James A. Dawes
 Research Department
 Sloan and Hewitt Advertising
 700 North Harding Avenue
 Chicago, Illinois 60624-1002

NOTE: As an alternative, send each person a customized version of the same letter. See *c* below for a description of this procedure.

- b.** If a letter is addressed to two people at different addresses, type the individual address blocks one under the other (with 1 blank line between) or side by side. If the address blocks take up too much space at the opening of the letter, type them at the end of the letter, starting at the left on the *fourth* line below the final notation or, if there are no notations, on the *fourth* line below the signature block.
- c.** If a letter is addressed to more than two people at different locations, placing an inside address block for each person poses a problem. The simplest solution is to draft the basic letter and then prepare a customized version for each recipient.
- (1) On each letter, insert the appropriate inside address for the intended recipient.
 - (2) Insert the appropriate salutation just for the intended recipient.
 - (3) On the second line below the reference initials, the file name notation, or the enclosure notation (whichever comes last), insert a distribution list. Type *Distribution* in caps and lowercase, followed by a colon. Italicize the word (plus the colon) or underline the word (but not the colon). Beneath this heading, type the names of all the recipients. On each customized version, highlight the name of the intended recipient.

ON FILE COPY

Distribution:
 C. Mowat
 J. Blois
 S. O'Melia

ON S. O'MELIA'S COPY

Distribution:
 C. Mowat
 J. Blois
 S. O'Melia

► *For another illustration of a distribution list, see page 492.*

- (4) Insert the address blocks for all the recipients at the end of the file copy or on a separate sheet attached to the file copy.

The following guidelines (¶¶1320–1336) provide additional details concerning the parts of inside addresses. See also the models in Section 18 for special forms of address used for individuals, couples, organizations, professional people, education officials, government officials, diplomats, military personnel, and religious dignitaries.

Name of Person and Title

- 1320** a. When writing the name of a person in an inside address or elsewhere in a letter, be sure to follow that person's preferences in the spelling, capitalization, punctuation, and spacing of the name. Obviously, the way a person signs his or her letters is the clearest indication of how that person prefers to be addressed. For illustrations of the various ways in which people may sign their letters, see ¶¶1351–1353.
- b. Do not abbreviate or use initials unless the person to whom you are writing prefers that style. For example, do not write *W. B. Sachs* if the person to whom you are writing used *William B. Sachs* in his correspondence.
- c. When writing to a married woman, follow her preference for first and last names if you know it. She may prefer to be addressed by her original name (for example, *Ms. Joan L. Conroy*), or she may prefer to use her husband's last name in conjunction with her own first name and middle initial (for example, *Mrs. Joan L. Noonan*).

NOTE: The form that simply places *Mrs.* in front of her husband's name (for example, *Mrs. James W. Noonan*) should be used only for social purposes. It should not be used (1) when addressing a business letter to a married woman or (2) when a married woman becomes a widow unless she clearly indicates that this is her preference.

- 1321** As a general rule, use a title before the name of a person in an inside address. (See ¶517 for appropriate abbreviations of such titles.)

- a. If the person has no special title (such as *Dr.*, *Professor*, or *The Honorable*), use *Mr.*, *Ms.*, *Mrs.*, or *Miss*. (See also ¶1801.)
- b. In selecting *Ms.*, *Mrs.*, or *Miss*, always respect the individual woman's preference. If her preference is unknown, use *Ms.* or omit the title altogether. (See also ¶1801b–c.)

NOTE: Follow the same procedure in the salutation. (See ¶1339.)

- c. If you have no way of determining whether the person addressed is a man or a woman, do not use a title in the inside address or the salutation. (See also ¶¶1339, 1801d.)

NOTE: People who use initials in place of their first and middle names or who have ambiguous names (like *Marion*, *Leslie*, *Hilary*, and *Lee*) should use a title when they sign their letters so that others may be spared the confusion over which title to use. If they choose not to provide a title, they will have to accept the possibility that they may be inappropriately addressed. (See also ¶¶1351–1352.)

¶1322

- d. Address teenage girls as *Ms.* or *Miss* and respect the individual's preference if you know it. For girls younger than 13, *Ms.* or *Miss* may be used or omitted.
- e. Address teenage boys as *Mr.* For boys younger than 13, omit the title. (*Master* is now rarely used except with the names of very young boys.)

1322 a. A letter to a husband and wife is traditionally addressed in this form:

Mr. and Mrs. Harold D. Bennisch Jr. (NOT: Mr. & Mrs.)

The appropriate salutation for this couple would be *Dear Mr. and Mrs. Bennisch* (NOT: Dear Mr. and Mrs. Bennisch Jr.).

► *For an alternative to this traditional format, see ¶1322f-h.*

- b. If the husband has a special title (such as *Dr.* or *Professor*) and the wife has none, the couple is usually addressed as follows:

Dr. and Mrs. Thomas P. Geiger

The appropriate salutation for this couple would be *Dear Dr. and Mrs. Geiger*.

- c. If the wife has a special title but the husband does not, list the names of the married couple on separate lines.

Dr. Eleanor V. Eberhardt

Mr. Joseph L. Eberhardt

The appropriate salutation for this couple would be *Dear Dr. and Mr. Eberhardt*.

- d. If both spouses have special titles, list their names on separate lines.

Dean Walter O. Goetz

Professor Helen F. Goetz

The appropriate salutation for this couple would be *Dear Dean and Professor Goetz*.

- e. If both spouses have the same special title—for example, *Dr.* or *Rabbi*—list their names on separate lines and use the following salutations:

Dr. Louise Saroyan

Rabbi Richard Cohen

Dr. Henry Saroyan

Rabbi Arla Cohen

.....

.....

Dear Drs. Saroyan:

Dear Rabbis Cohen:

- f. If each spouse has a different surname, list their names on separate lines and use the following salutation:

Ms. Eloise Belmonte

Mr. Edgar DiVito

Mr. Philip O'Connell

Ms. Ruth Dixon-DiVito

.....

.....

Dear Ms. Belmonte and Mr. O'Connell:

Dear Mr. DiVito and Ms. Dixon-DiVito:

- g. Some married couples prefer a style of address that uses the first names of the spouses and omits *Mr.* and *Mrs.* Those who use this style typically do so because

it treats both spouses as equals and does not imply that the wife can be identified only by her husband's name. Respect such preferences when you are aware of them.

Janet and Arnold Rogon **OR:** Arnold and Janet Rogon
(RATHER THAN: Mr. and Mrs. Arnold Rogon)

If you use this format in the inside address, then the appropriate salutation (depending on whose name comes first) would be *Dear Janet and Arnold* (if you know the couple well) or *Dear Janet and Arnold Rogon* (if you don't).

- h.** If you know that a married woman named Ellen Palmer prefers to be addressed as *Ms.* rather than *Mrs.*, do not address the couple as *Mr. and Ms. Fred Palmer*. A married woman who prefers *Ms.* does not want to have her identity submerged in her husband's name. One alternative is to use no titles at all (as suggested in *g.* above) and simply write *Fred and Ellen Palmer* or *Ellen and Fred Palmer*. Another alternative is to retain the titles but write the names on separate lines.

Ms. Ellen Palmer **OR:** Mr. Fred Palmer
Mr. Fred Palmer Ms. Ellen Palmer

- i. If Jr., Sr., or a roman numeral such as *III* accompanies the husband's name, choose one of the following forms:

Janet Rogon and Arnold Rogon Jr.

OR: Arnold Rogon Jr. and Janet Rogon

BUT NOT: Janet and Arnold Rogon Jr.

OR: Arnold Jr. and Janet Rogon

► For other forms of address to use for couples in special circumstances, see ¶1802.

1323

- a. When a man's name ends with *Jr.*, *Sr.*, or a roman numeral such as *III*, omit the comma before this element unless you know that the person being addressed prefers the use of a comma. (See also ¶¶156, 1322i.)
 - b. Do not use a title before a name if the term *Esq.* follows the name. (See also ¶¶518c, 1804a.)

Rita A. Henry, Esq. (**NOT**: Ms. Rita A. Henry, Esq.)

NOTE: Insert a comma to separate the last name from *Esq.*

- c. As a rule, do not insert an academic degree after a person's name in an inside address. However, some doctors of medicine and divinity prefer the use of the degree after their names (rather than the title *Dr.* before). Respect a person's preference if you know what it is. (See also ¶¶1804b, 1810d, 1811a.)

NOTE: If an academic degree follows the person's name, separate it from the last name with a comma. Moreover, omit the titles *Dr.*, *Miss*, *Mr.*, *Mrs.*, and *Ms.* before the name. Another title (for example, *Professor*, *The Reverend*, *Captain*, *Dean*) may

¶1324

be used before the name as long as it does not convey the same meaning as the degree that follows. (See ¶519c.)

Reva C. Calhoun, M.D. (**not:** Dr. Reva Calhoun, M.D.)

The Reverend Ernest G. Wyzanski, D.D.

- d.** If a person uses a doctoral degree after his or her name (for example, *M.D.*, *D.D.*, or *Ph.D.*), then no title should precede the name in the inside address. The name in the salutation should begin with *Dr.*, and the degree should not be used after the name in the salutation.
- e.** Abbreviations of religious orders, such as *S.J.* and *S.N.D.*, are typed after names and preceded by a comma. An appropriate title should precede the name, even though the abbreviation follows the name; for example, *The Reverend Christopher DeMaio, O.P.* (See also ¶¶519a, 1519c, 1809.)

1324

- a.** A title of position, such as *Vice President* or *Sales Manager*, may be included but is not required in an inside address. If a title is to be used, place it on the line following the name.
- b.** If the title is long and requires a second line, indent the turnover 2 or 3 spaces or omit the title altogether.
- c.** Capitalize the first letter of every word in the title except (1) prepositions under four letters (like *of*, *for*, and *in*), (2) conjunctions under four letters (like *and*), and (3) the articles *the*, *a*, and *an* when they appear *within* the title.

Mr. Ralph Nielsen

Vice President and (**not:** &)

General Manager

Mrs. Martha Hansen

Chairman of the Board

NOTE: In the following examples, *In* is capitalized because it is the first element in a compound adjective (rather than a pure preposition as in *Editor in Chief*). By the same token, in the title *Coordinator of On-the-Job Training*, *On* is capitalized as the first element in a compound adjective but *of* and *the* are not.

Ms. Evangeline S. Palmer

Director of In-Service

Training

Mr. Franklin G. Bassinger

Coordinator of On-the-Job

Training

- d.** If the title is very short, it may be typed on the same line as the person's name or the person's department in order to balance the length of the lines in the address. However, do not type a title on the same line as the name of an organization. (See ¶1326.)

Mr. J. C. Lee, President

Merchants National Bank

Mrs. Lucinda Hollingsworth

Manager, Support Services

E. J. Haines & Company

In Care of . . .

1325 Sometimes a letter cannot be sent to the addressee's home or organization; it must be directed instead to a third person who will see that the letter reaches the addressee. In such cases use an *in care of* notation. Here are two versions of this notation.

Professor Eleanor Marschak
In care of Henry Ward, Esq.

OR: Professor Eleanor Marschak
c/o Henry Ward, Esq.

Name of Organization

1326 a. Type the organization's name on a line by itself. If the name of a division or a department is needed in the address, it should precede the name of the organization on a line by itself.

Ms. Laura J. Kidd
Assistant Vice President
Department of Corporate Planning
Holstein, Brooks & Co.

b. When writing the name of an organization in an inside address, always follow the organization's style for spelling, punctuation, capitalization, spacing, and abbreviations. The letterhead on incoming correspondence is the best source for this information. Note the variations in style in these names.

Dell Computer Corporation	eBay Inc.
USLife Corp.	E*TRADE Group, Inc.

c. If the name is long and requires more than one line, indent any turnover line 2 or 3 spaces. (For examples, see ¶1326d.)

d. If you do not have a document that shows the official form of an organization's name, consult the organization's Web site or *Standard & Poor's Register* for this information. If you cannot access these sources, make use of the following guidelines when writing the organization's name.

(1) Spell out the word *and*. Do not use an ampersand (&).

Haber, Curtis, and Hall

(2) Write *Inc.* for *Incorporated* and *Ltd.* for *Limited*. Do not use a comma before the abbreviation unless you are sure that is the organization's preference.

(3) As a rule, spell out *Company* or *Corporation*. If the name is extremely long, however, you may use the abbreviation *Co.* or *Corp.*

¶1327

- (4) Do not cap the word *the* at the beginning of an organization's name unless you are sure it is part of the official name; for example, *The Wall Street Journal* (as illustrated in the note below).
- (5) Capitalize the first letter of every word except (1) prepositions under four letters (like *of* and *for*), (2) conjunctions under four letters (like *and*), and (3) the articles *the*, *a*, and *an* when they appear within the organization's name.

American Society for the
Prevention of Cruelty
to Animals
424 East 92d Street
New York, New York 10128

U.S. Department of Health and
Human Services
200 Independence Avenue, SW
Washington, DC 20201

NOTE: In the following example note that the article *the* is capitalized because it comes at the start of the organization's official name. Note also that the name is not italicized or underlined because here it designates the organization rather than the newspaper. (See also ¶289e.)

The Wall Street Journal
200 Liberty Street
New York, NY 10281-1099

► For the use or omission of apostrophes in organizational names, see ¶640a–c.

Building Name; Room, Suite, or Floor Number

- 1327** If the name of a building is part of the recipient's inside address, type it on a line by itself immediately above the street address. A room number, a suite number, or a floor number should follow the street address, but if it will not fit on that line, insert it before the building name on the line above.

Park Square Building
31 St. James Avenue, Room 858
Boston, MA 02116-4255

Room 118, Acuff Building
904 Bob Wallace Avenue, SW
Huntsville, AL 35801

► For additional examples and for guidelines regarding the use of figures or words with room, suite, or floor numbers, see ¶1317b.

Street Address

- 1328** a. Always type the street address on a line by itself, immediately preceding the city, state, and ZIP Code. (See ¶¶1316–1317 for examples.)
- b. Use the word *and*, not an ampersand (&), in a street address; for example, *Tenth and Market Streets*. However, do not use such “intersection” addresses if a normal address is available; for example, *304 Tenth Street*.
- For the spelling out of numbered street names, see ¶1329b.
- c. Do not abbreviate such words as *Street* and *Avenue* in inside addresses.
- For apartment, room, suite, and floor numbers with street addresses, see ¶¶1316b, 1317b, 1327.

- 1329** **a.** Use figures for house and building numbers. Do not include the abbreviation *No.* or the symbol # before such numbers. **EXCEPTION:** For clarity, use the word *One* instead of the figure *1* in a house or building number; for example, *One Park Avenue*.

NOTE: Some house numbers contain a fraction, a letter, or a hyphen.

234½ Linden Street 8740B Water Road 220-03 46th Street

- b.** Numbers used as street names are written as follows:

- (1) Spell out the numbers 1 through 10; for example, *177 Second Avenue*.
- (2) Use figures for numbers over 10; for example, *627 East 202d Street* or *144 65th Street*. (See ¶425b.)
- (3) Some grid-style addresses require a period in a numbered street name; for example, *26.2 Road*.

- 1330** **a.** When a compass point (for example, *East*, *West*, *Southeast*, *Northwest*) appears *before* a street name, do not abbreviate it except in a very long street address when space is tight.

330 West 42d Street 3210 Northwest Grand Avenue

- b.** When a compass point appears *after* a street name, follow the style most commonly used in your area. In the absence of a local style, follow these guidelines:

- (1) Abbreviate compound directions (*NE*, *NW*, *SE*, *SW*) that represent a section of the city. Do not use a period with these abbreviations (see ¶531a). Insert a comma before them.

817 Peachtree Street, NE 120 112th Street, NW

- (2) Spell out *North*, *South*, *East*, and *West* following a street name, and omit the comma. (In such cases these compass points are typically an integral part of the street name rather than a designation of a section of the city.)

10 Park Avenue South 2049 Century Park East

Box Number

- 1331** **a.** A post office box number may be used in place of the street address. The following forms are acceptable:

Post Office Box 1518 **OR:** P.O. Box 1518

Do not use the form *Box 1518* except with a rural route (RR) address or a highway contract (HC) address. (See ¶1316c.)

NOTE: A designation such as *Drawer L* should be changed to *Post Office Box L*.

- b.** It is no longer necessary to use a station name with a post office box number.

P.O. Box 76984

RATHER THAN: P.O. Box 76984, Sanford Station

Los Angeles, CA 90076-0984

Los Angeles, CA 90076-0984

- c.** When you are writing to an organization that provides both a street address and a post office box number in its letterhead, use only one address: the post office

¶1332

box number for ordinary mail and the street address for express mail. If you provide both addresses on an envelope, the United States Postal Service (USPS) will deliver the mail to the address that appears directly above the line showing the city, state, and ZIP Code.

- d.** If you are writing to someone who rents a mailbox from a private company, insert the *private mailbox number* (PMB) on the line below the person's name. Then on the next line, insert the street address of the private company where the mailbox is located. For example:

Ms. Robin B. Kantor
 PMB 215
 621 Bloomfield Avenue
 Verona, NJ 07044

City, State, and ZIP Code

- 1332 a.** On the line directly below the street address or box number, type the name of the city (followed by a comma and 1 space), the name of the state (followed by 1 space but no comma), and the ZIP Code. It is important to keep all of this information on the same line.

Denver, Colorado 80217 **OR:** Denver, CO 80217-9999

NOTE: You can find or confirm the ZIP Code for a specific address on the USPS Web site: <<http://www.usps.com>>.

- b.** The USPS encourages the use of a nine-digit ZIP Code (consisting of the basic five digits followed immediately by a hyphen and another four digits); hence the designation ZIP + 4 Code.

The use of the additional four digits is voluntary, but as an inducement the USPS offers discounts on postage fees. To qualify for a discount, mailers must submit a minimum of 500 *first-class* letters or postcards at one time, and the envelope addresses must be readable by electronic equipment known as optical character readers (OCRs). Moreover, the mailing list must be certified by USPS-approved software.

NOTE: Because of the number of criteria that must be satisfied, mailers who want to qualify for a discount should consult their local USPS business center for details. (See ¶¶1368–1369.)

- 1333** When writing the name of a city in an inside address:

- a.** Take special care in spelling city names. Do not go by sound alone.

Baldwin, LA	Baldwyn, MS	Hillsboro, OR	Hillsborough, NC
Center, PA	Centre, PA	Jessup, PA	Jesup, GA
Cortland, NY	Cortlandt, NY	Kenedy, TX	Kennedy, PA
Green, IN	Greene, IN	Lynnwood, WA	Lynwood, CA
Hamden, CT	Hampden, MA	Paterson, NJ	Patterson, NY

► See also ¶1203c, note

1335

NOTE: Some city names require hyphens.

Manchester-by-the-Sea, Massachusetts	Hastings-on-Hudson, New York
St. Mary-of-the-Woods, Indiana	Niagara-on-the-Lake, Ontario

- b.** Do not abbreviate the city name; for example, *L.A.* for *Los Angeles*.
- c.** Do not abbreviate the words *Fort*, *Mount*, *Point*, or *Port*. Write the name of the city in full; for example, *Fort Worth*, *Mount Vernon*, *Point Pleasant*, *Port Huron*. (See also ¶529a.)
- d.** Abbreviate the word *Saint* in the names of American cities; for example, *St. Louis*, *St. Paul*, *St. Petersburg*. (See also ¶529b.)

- 1334** **a.** In an address, spell out the name of the state or use a two-letter abbreviation of the state name. Either form is correct for use with a ZIP Code.

► *For a list of the two-letter abbreviations, see page 452 or the inside back cover.*

NOTE: The two-letter abbreviations (for example, *AL* for *Alabama*) were created by the USPS and should be used only in mailing addresses. Use the more traditional abbreviations of state names (for example, *Ala.* for *Alabama*) in other situations where abbreviations are appropriate. (See ¶527b for a list of the traditional abbreviations.)

Some authorities now advocate abandoning these traditional abbreviations and using the two-letter abbreviations wherever the abbreviation of state names is acceptable. (See also ¶1540a, note.)

- b.** When using two-letter state abbreviations, type them in all-caps, without space between the letters and without a period after each letter.
- c.** When giving an address in a sentence, insert a comma after the street address and after the city. Leave 1 space between the state and the ZIP Code. Insert a comma after the ZIP Code unless a stronger mark of punctuation is required at that point.

My new address will be 430 Westchester Way, Canton, Georgia 30115, as of April 1.

BUT: As of April 1, my new address will be 430 Westchester Way, Canton, Georgia 30115.

- 1335** Omit the name of the county or area (such as *Long Island*) in an address. However, the name of a community, subdivision, or real estate development may be included as long as it comes before the lines containing the mail delivery address.

---	---	--

- b.** In a Canadian address, the name of the province or territory may be spelled out or abbreviated. However, Canada Post has expressed a preference for the abbreviated form in order to keep the city, province, and postal code all on one line.

Alberta	AB	Nova Scotia	NS
British Columbia	BC	Nunavut	NU
Manitoba	MB	Ontario	ON
New Brunswick	NB	Prince Edward Island	PE
Newfoundland and Labrador	NL	Quebec	QC
Northwest Territories	NT	Saskatchewan	SK
		Yukon	YT

NOTE: In an inside address or an envelope address, insert a comma and 1 space between the city name and the two-letter abbreviation, followed by 2 spaces and the six-character postal code. (Note that a space is used in the postal code to separate the first three and the last three characters.)

21 St. Clair Avenue
Toronto, ON M4T 1L9
CANADA

When giving an address in a sentence, spell out the name of the province and leave only 1 space before the postal code. Then insert a comma, 1 space, and *Canada*.

Write to me at 21 St. Clair Avenue, Toronto, Ontario M4T 1L9, Canada.

- c.** If you are writing from another country to someone in the United States, type *UNITED STATES OF AMERICA* or *U.S.A.* as the last line of the address.

1333 Burr Ridge Parkway	OR: 1333 Burr Ridge Parkway
Burr Ridge, Illinois 60527	Burr Ridge, IL 60527
UNITED STATES OF AMERICA	U.S.A.

When giving an address like this in a sentence, insert a comma after the street address and after the city. Leave 1 space between the state and the ZIP Code, and insert a comma after the ZIP Code. Insert a comma after *UNITED STATES OF AMERICA* or *U.S.A.* unless a stronger mark of punctuation is required at that point.

You can reach me at 1333 Burr Ridge Parkway, Burr Ridge, IL 60527, U.S.A.

¶1337**Attention Line**

- 1337 a.** In the past, when a letter was addressed directly to an organization, the organization's name was typed as the first line of the inside address and an attention line was often typed on the second line below the inside address. Here is the format that was traditionally used:

Shelton & Warren Industries 6710 Squibb Road Mission, KS 66202-3223	Carrolton Labs 1970 Briarwood Court Atlanta, GA 30329
Attention: Mr. John Ellery	ATTN: SALES MANAGER

However, this type of attention line is not really needed and in fact is no longer frequently used. It is simpler—and just as effective—to type the person's name (or title) directly above the organization's name. When a letter is addressed this way, then in the absence of a personal or confidential notation, it will be presumed to deal with company business and may be handled by others if the person named in the address is not available.

There is a more compelling reason for abandoning the traditional type of attention line. If you want to copy the inside address on the envelope, nothing must come beneath the line containing the city, state, and ZIP Code.

- b.** If you plan to include an attention line in an inside address block that is suitable for use on the envelope, you should insert the attention line as the first line of the inside address—with or without the word *Attention*. (See also ¶¶1368n, 1369h.)

Mr. John Ellery	Attention: Sales Manager
Shelton & Warren Industries 6710 Squibb Road Mission, KS 66202-3223	Carrolton Labs 1970 Briarwood Court Atlanta, GA 30329

- c.** If you decide to retain the word *Attention* in the first line of the address, you will have to use one of the organizational salutations shown in ¶¶1339–1340. (See also ¶1341.)

NOTE: The USPS uses the term *attention line* to refer to *any* information—whether a person's name (*Ms. Hilary Edwards*), a person's title (*Marketing Director*), or a departmental name (*Research Department*)—that appears on the line above the organization's name (*The E. J. Monagle Publishing Company*). If you read somewhere that the USPS wants the first line of a business address to be an “attention line,” do not conclude that it is requiring the use of the word *Attention*. The USPS simply wants to have names or titles come above the name of the organization.

► *For the treatment of an attention line on an envelope, see ¶¶1368n, 1369h.*

Salutation

- 1338 a.** Leave 1 blank line below the inside address and then type the salutation, beginning at the left margin.
- b.** As a general rule, follow the salutation with a colon. Use a comma instead if you are writing a social-business letter (see ¶1372b), and use no punctuation at all if you are following the open punctuation style (see ¶1308b).

- c. Omit the salutation if you are using the simplified style, and replace it with a subject line. (See ¶1342.)
- d. Abbreviate only the titles *Mr.*, *Ms.*, *Mrs.*, and *Dr.* and their plural forms. If you have no way of determining whether the person addressed is a man or a woman, do not use a title in the salutation. (See ¶1321c.)
- e. Spell out all other titles, such as *Professor* and *Father*. (See Section 18 for titles used by officials, dignitaries, and military personnel.)
- f. Capitalize the first word as well as any nouns and titles in the salutation; for example, *Dear Ms. Brand, Dear Sir*.
- g. Be sure that the spelling of the surname in the salutation matches the spelling in the inside address. If the person you are writing to has a hyphenated last name (for example, *Mrs. Hazel Gray-Sparks*), the salutation should include the entire last name (*Dear Mrs. Gray-Sparks*).
- h. In salutations involving two people, use *and*, not *&*, between the names. In salutations involving three or more people, separate the names with commas and insert *and*, not *&*, between the last two names.

► *For the use of customized letters when writing to more than two people, see ¶1319c.*

- 1339** a. The following list of salutations deals with the most common situations. Note that the salutations identified as “more formal” are no longer frequently used.
- *For a more comprehensive list of salutations to accompany various forms of address, see Section 18.*

To One Person (Name, Gender, and Personal Title Preference Known)

Dear Mr. Smith:	Dear Ms. Simpson:
Dear Mrs. Gray:	Dear Miss Wells:

To One Person (Name Known, Gender Unknown)

Dear Marion Parker:	Dear R. V. Moore:
---------------------	-------------------

To One Person (Name Unknown, Gender Known)

Dear Madam:	OR: Madam: <i>(more formal)</i>
Dear Sir:	OR: Sir: <i>(more formal)</i>

To One Person (Name and Gender Unknown)

Dear Sir or Madam:	OR: Sir or Madam: <i>(more formal)</i>
Dear Madam or Sir:	OR: Madam or Sir: <i>(more formal)</i>

To One Woman (Personal Title Preference Unknown)

Dear Ms. Malloy:	OR: Dear Ruth Malloy: (see ¶1321b)
------------------	------------------------------------

To Two or More Men

Dear Mr. Gelb and Mr. Harris:	OR: Gentlemen:
OR: Dear Messrs. Gelb and Harris:	<i>(more formal)</i>

To Two or More Women

Dear Mrs. Allen, Ms. Ott, and Miss Day:	
Dear Mrs. Jordan and Mrs. Kent: (see ¶1618)	
OR: Dear Mesdames Jordan and Kent:	<i>(more formal)</i>

Continued on page 456

¶1340

Dear Ms. Scott and Ms. Gomez: (see ¶618)

OR: Dear Mses. (**OR:** Mss.) Scott and Gomez: (*more formal*)

Dear Miss Winger and Miss Rossi: (see ¶618)

OR: Dear Misses Winger and Rossi: (*more formal*)

To a Woman and a Man

Dear Ms. Kent and Mr. Winston:

Dear Mrs. Kay and Mr. Fox:

Dear Mr. Fong and Miss Landis:

Dear Mr. and Mrs. Green:

To a Married Couple (see ¶¶1322, 1802)**To Several Persons**

Dear Mr. Anderson, Mrs. Brodsky, and Dr. Dellums:

Dear Friends (Colleagues, Members, or some other appropriate collective term):

To an Organization Composed Entirely of Men

Gentlemen:

To an Organization Composed Entirely of Women

Ladies: **OR:** Mesdames: (*more formal*)

To an Organization Composed of Men and Women (see ¶1340)

- b.** When writing to someone you know well, use a first name or nickname in place of the more formal salutations shown in ¶1339a. However, once you start using an informal salutation, be sure that anyone who prepares your letters for you maintains that form of address. Otherwise, a person who is used to getting *Dear Mike* letters from you may one day receive a *Dear Mr. Romano* letter and wonder what could have caused the sudden chill in your warm relationship.

NOTE: Even if a personal relationship exists between you and the recipient of a letter, it would make sense to use a formal salutation under certain circumstances—for example, if a copy of the letter will be read by others (especially someone in upper management) or will become part of a file of legal documents.

- c.** When you are preparing a letter that may be sent or shown to a number of as yet undetermined individuals, use *Dear Sir or Madam* (rather than *To Whom It May Concern*). You may also use the simplified letter style and omit the salutation.

1340 For an organization composed of men and women, consider the following alternatives:

- a.** Use *Ladies and Gentlemen* or *Gentlemen and Ladies*. (Do not use *Gentlemen* alone.)
- b.** Address the letter to the head of the organization—by name and title if known, otherwise by title alone. Then the salutation would appear as shown in ¶1339a.

Mr. James V. Quillan

President

President

(**OR:** Chief Executive Officer)

United Services Corporation

United Services Corporation

100 Kendall Parkway

100 Kendall Parkway

Somerset, NJ 08873

Somerset, NJ 08873

Dear Mr. Quillan:

Dear Sir or Madam:

- c. Use the name of the organization in the salutation.

Dear United Services Corporation: **OR:** To the United Services Corporation:

NOTE: This approach is acceptable except in formal communications. (See the illustration on page 430 and in ¶1803a.)

- d. Use the simplified letter style and omit the salutation. (See page 432.)

1341

- a. If you have used an attention line beginning with the word *Attention* (see ¶1337), the letter is considered to be addressed to the organization rather than to the person named in the attention line. Therefore, use one of the organizational salutations shown in ¶¶1339 and 1340.
- b. If you drop the word *Attention* (as shown in ¶1337) and address the letter directly to an individual in the organization (either by name or by title), use one of the personal salutations shown in ¶1339.

The following guidelines (¶¶1342–1345) deal with the *body* of a letter. The body contains the text of the letter—in other words, the message (see ¶¶1344–1345). The body may also begin with a subject line (see ¶¶1342–1343), which briefly identifies the main idea in the message.

Subject Line

1342

In the *simplified letter style*:

- a. Use a subject line in place of the salutation.
- b. Leave 2 blank lines below the inside address, and start the subject line at the left margin on the next line. Type the subject line in all-caps.
- c. Do not use a term like *Subject* to introduce the subject line. (See the illustration on page 432.)
- d. Leave 2 blank lines after the subject line, and then begin the message.

► *For the capitalization of words in a subject line, see ¶¶360–361.*

1343

In *all other letter styles*:

- a. If a subject line is used, insert it between the salutation and the text of the letter, with 1 blank line above and below. (See the illustration on page 431.)

NOTE: A subject line is conventionally inserted below the salutation because it is considered part of the body of a letter. Placing it above the salutation would make the subject line part of the opening. In actual practice, some business writers cheerfully disregard this long-established convention and insert the subject line *above* the salutation, where they feel it achieves greater prominence.

¶1344

- b. Ordinarily, the subject line starts at the left margin, but it may be centered for special emphasis. In a letter with indented paragraphs, the subject line may also be indented (typically, 0.5 inch).
 - c. Type the subject line either in caps and lowercase or in all-caps.
- NOTE:** Some business writers use boldface to make the subject line stand out. However, using all-caps for the subject line should be sufficient to provide the necessary emphasis.
- d. The term *Subject* or *In re* or *Re* usually precedes the actual subject but may be omitted.

SUBJECT: MORAN LEASE *In re: Moran Lease*

- e. If the subject line is long, type it in two or more single-spaced lines of roughly equal length.

Subject: Introductory Offer to New Subscribers
and Renewal Offer to Present Subscribers

► *For additional illustrations of the treatment of long subject lines, see pages 522 and 624.*

- f. When replying to a letter that carries a “refer to” notation, you may put the desired reference number or filing code in a subject line or below the date line. (See ¶1315d.)

Subject: Policy 668485 **OR:** Refer to: Policy 668485

Message

- 1344** a. As a general rule, leave 1 blank line between the subject line and the text of the letter. If there is no subject line, leave 1 blank line between the salutation and the text. The exception to the rule comes up when you use the simplified letter style: in this case, leave 2 blank lines between the subject line (which replaces the salutation) and the text.

NOTE: You can use the *autotext* feature of your software to capture the keystrokes that represent frequently used names, phrases, sentences, or paragraphs.

- b. Try to organize the text of the letter in short paragraphs. Long paragraphs are harder to read.

NOTE: One-sentence paragraphs are acceptable, but if you overdo it, the body of your letter will have a choppy, disconnected appearance.

- c. Do not follow a rigid formula in writing your letters. Not all readers are alike, so organize your thoughts in a sequence that is likely to be most persuasive for the reader you have in mind. Carefully consider not only what to include but also what to leave out. Decide how formal or informal the letter should be, and adjust the tone and the language of your message accordingly.
- d. If you are writing in response to a letter or some other document, it is helpful to refer to that document by date in the first sentence of your letter.

Thank you for your letter of May 9 (**OR:** May 9, 2011).

NOTE: Whether you use the full date or the month and day alone to refer to the earlier document will depend on the nature of your letter. For a full discussion of this subject, see ¶409.

- e. Use single spacing for the message, and leave 1 blank line between paragraphs.

- f. Align each line of the message at the left margin. However, if you are using the modified-block letter style with indented paragraphs, indent the first line of each paragraph 0.5 inch. (See the illustration on page 430.)
- g. You can use your word processing software to *justify* the right margin—that is, have each full line of text end at the same point. If you choose this format (known as *full justification*), your software will automatically insert extra space between words to make each line the same length. (See page 432 for an illustration of a letter with a justified right margin.)

NOTE: While full justification (aligning the lines of text at both the left and the right margins) looks attractive, the insertion of extra space between words can sometimes produce unintended “rivers” of white space running vertically down through the text. Full justification can also produce significant variations in the space between sentences (as illustrated in ¶102f). More important, studies have demonstrated that text with a *ragged* (unjustified) right margin is easier to read. Moreover, some recipients of a fully justified letter tend to regard it as a form letter and not take it seriously.

- h. If you decide on a ragged right margin, try to avoid great variations in the length of adjacent lines. (See Section 9 for guidelines on dividing words in order to keep the lines of text roughly equal in length.)
- i. If a letter takes two or more pages, do not divide a short paragraph (with only two or three lines) at the bottom of a page. Always leave at least two lines of the paragraph at the foot of one page and carry over at least two lines to the top of the next page. (See ¶1366h.)

NOTE: Use the *widow/orphan control* feature of your word processing program to prevent the creation of *orphans* (printing the first line of a new paragraph as the last line on a page) and *widows* (printing the last line of a paragraph as the first line of a new page).

- 1345**
- a. **Quoted Material.** If a quotation will make four or more lines, type it as a single-spaced extract, indent it 0.5 inch from each side margin, and leave 1 blank line above and below the extract. (See the illustration on page 431.) You can change the settings for indentations, or you can use the *double indent* feature (if your software provides one), which will indent the extract equally from each side margin. If the quoted material represents the start of a paragraph in the original, indent the first word an additional 0.5 inch. (For different ways of handling a long quotation, see ¶265.)
 - b. **Tables.** When a table occurs in the body of a letter, center it between the left and right margins. Try to indent the table at least 0.5 inch from each side margin. If the table is very wide, reduce the space between columns to prevent the table from extending beyond the width of the text. As an alternative, reduce the size of the type. (See Section 16 for a discussion on how to plan and execute tables.)
 - c. **Items in a List.** Type the list with 1 blank line above and below the list as a whole. Either type the list on the full width of the letter, or indent the list 0.5 inch from each side margin. If each item in the list requires only one line, you may single-space the list or, for a more open look, leave a blank line after each item.

¶1345

If any item in the list requires more than one line, leave 1 blank line after each item. Align any turnovers with the first word in the line above.

NOTE: If a list of items has to be divided at the bottom of a page, try to divide *between* items (not within an item). Moreover, try to leave at least two items at the bottom of one page and carry over at least two items to the top of the next. Use the *widow/orphan control* feature or the *hard page break* feature.

1 inch When you are ready to distribute your analysis for the first round of comments, I **1 inch**
(min.) suggest you send it to the following people inside the company: **(min.)**

←1L#

Angela Lawless, director of information systems

Thomas Podgorski, manager of corporate planning

←1L#

In addition, you may want to get reactions from two trustworthy consultants:

←1L#

Dr. Harriet E. Fenster, professor of computer science at Michigan State University

←1L#

**0.5
inch** Wilson G. Witherspoon, president of Witherspoon Associates in Princeton, New Jersey

←0.5
inch

←1L#

I can give you mailing addresses for these consultants if you decide to get in touch with them.

► See ¶1424e, note, and the illustration on page 622.

d. Enumerated Items in a List. If the items each begin with a number or a letter, you may use the *numbered list* feature of your word processing program. If you are using Microsoft Word 2007, each item will be indented 0.25 inch from the left margin. Other software programs may start each item at the left margin. In either case, no space will be left between items.

When I review the situation as you described it in your letter of June 24, it seems to me that you have only two alternatives:

←1L#

1. Agree to pay the additional amount that Henning now demands.
2. Drop Henning and start the search all over again for a new firm.

←1L#

NOTE: If paragraphs in the document are blocked at the left margin, it is preferable to also block the enumerated items at the left margin. This is easy to accomplish with the *reduce indent* feature. (See the illustration below.)

When I review the situation as you described it in your letter of June 24, it seems to me that you have only two alternatives:

←1L#

1. Agree to pay the additional amount that Henning now demands.
2. Drop Henning and start the search all over again for a new firm.

←1L#

Note the treatment of turnover lines when you use the numbered list feature.*

When I review the situation as you described it in your letter of June 24, it seems to me that you have only two alternatives:

← 1L#

1. Agree to pay the additional amount that Henning now demands before he will start construction.
2. Drop Henning and start the search all over again to find a firm qualified to handle a project of this size and this complexity.

← 1L#

For a more open look, leave 1 blank line after each item, whether the list contains one or more turnover lines (as in the illustration below) or all the items consist of only one line (as in the illustration on page 622).

When I review the situation as you described it in your letter of June 24, it seems to me that you have only two alternatives:

← 1L#

1. Agree to pay the additional amount that Henning now demands before he will start construction.
2. Drop Henning and start the search all over again to find a firm qualified to handle a project of this size and this complexity.

← 1L#

If you want to format the numbered list yourself, you may type it on the full width of the letter or you may indent it 0.25 inch or 0.5 inch from the left margin. However, if you also plan to indent the text paragraphs 0.5 inch, use either one of the following arrangements:

When I review the situation as you described it in your letter of June 24, it seems to me that you have only two alternatives:

1. Agree to pay the additional amount that Henning now demands before he will start construction.
2. Drop Henning and start the search all over again to find a firm qualified to handle a project of this size and this complexity.

As painful as it may be, you may have to drop Henning and start the search all over again to have to deal with new demands and complexities. It's a long way through the job.

When I review the situation as you described it in your letter of June 24, it seems to me that you have only two alternatives:

1. Agree to pay the additional amount that Henning now demands before he will start construction.
2. Drop Henning and start the search all over again to find a firm qualified to handle a project of this size and this complexity.

As painful as it may be, you may have to drop Henning and start the search all over again to have to deal with new demands and complexities. It's a long way through the job.

Continued on page 462

* Turnover lines (also referred to as “runover lines”) are additional lines of copy that continue after the first line of a paragraph, a heading, or an entry in a list.

1345

NOTE: The numbered list feature aligns numbers and letters at the left. If your list contains 10 or more items, you can decide whether you want the numbers to align on the left or on the right. If you select “alignment left,” all the numbers will begin at the left margin. If you select “alignment right,” only the numbers higher than 9 will begin at the left margin.

LEFT ALIGNMENT:	8. 9. 10. 11. 12.	RIGHT ALIGNMENT:	8. 9. 10. 11. 12.
------------------------	-------------------------------	-------------------------	-------------------------------

The numbered list feature of some word processing programs (such as Microsoft Word) indents the first word that follows the number and the first word of any turnover lines 0.25 inch from the number (as shown in the illustrations at the bottom of page 461). The numbered list feature of other programs uses a default indent of 0.5 inch, but you can change this indent to 0.25 inch for a more attractive look. You can also adjust the indentations to suit your personal preference.

- e. **Bulleted Items in a List.** Instead of numbers or letters, you can use *bullets* before the items in a list. Your software provides a variety of styles from which you can choose. For example:

CIRCLES: TRIANGLES: ▷ ►
 SQUARES: OTHER ASCII CHARACTERS: > → *

If the items each begin with a bullet, you may use the *automatic bullet insert* feature of your word processing program. If you are using Microsoft Word 2007 (as in the first illustration below), each item will be indented 0.25 inch from the left margin and the text (plus any turnover lines) will be indented 0.5 inch from the left margin. If you are using some other word processing program, each item may begin at the left margin (as in the illustration on page 463) or may be indented 0.25 inch from the left margin. Ordinarily, no space will be left between items, but as the illustration on the next page demonstrates, you can create a more open look by inserting 1 blank line between items. If you prefer to indent the bullets 0.5 inch from the left margin, press the tab before activating the bullet feature.

When I review the situation as you described it in your letter of June 24, it seems to me that you have only two alternatives:

← 1L#

- Agree to pay the additional amount that Henning now demands before he will start construction.
- Drop Henning and start the search all over again to find a firm qualified to handle a project of this size and this complexity.

← 1L#

← 1L#
- Drop Henning and start the search all over again to find a firm qualified to handle a project of this size and this complexity.
← 1L#
← 1L#

NOTE: A list of bulleted items should contain a minimum of two items.

The following guidelines (¶¶1346–1365) deal with the *closing* of a letter. The closing typically includes a complimentary-closing phrase (¶1346), the writer's signature block (¶¶1348–1354), and reference initials (¶1355). The closing may also include a company signature line (¶1347), a file name notation (¶¶1356–1357), an enclosure notation (¶1358), a delivery notation (¶1359), a confirmation notation (¶1360), a copy notation (¶¶1361–1364), and a postscript (¶1365).

Complimentary Closing

- 1346** a. After the last line in the body of the letter, leave 1 blank line and then type the complimentary closing. In a modified-block-style letter, start the closing at the center. In a block-style letter, start the closing at the left margin. In a simplified letter, omit the closing. (See the illustrations on pages 428–432.)
- b. Capitalize only the first word of a complimentary closing.
- c. Ordinarily, insert a comma at the end of the closing except when open punctuation is used. (For another exception, see e.)
- d. The following complimentary closings are commonly used:

Sincerely, Sincerely yours, Cordially,

NOTE: More formal closings—such as *Very truly yours* and *Respectfully yours*—are infrequently used these days.

- e. An informal closing phrase may be inserted in place of one of the more conventional closings shown in d. If the wording is an adverbial phrase (one that tells *how* or *in what manner*—for example, *With all best wishes* or *With warmest regards*), follow the closing with a comma. If the wording is a complete sentence (for example, *See you at the convention*), follow the closing with a period. In each case the comma or the period may be replaced with stronger punctuation as appropriate—that is, a question mark, an exclamation point, or a dash.

NOTE: If you are using open punctuation, see ¶1308b.

- f. If both a complimentary closing and an informal closing phrase are used, type the complimentary closing in its regular position, and (1) type the informal phrase at the end of the last paragraph or (2) treat the informal phrase as the final paragraph with the appropriate terminal punctuation.

¶1347

- g.** Once a pattern of personal or informal closings is begun, it should not be discontinued without good reason. Otherwise, if a subsequent letter uses a more formal closing, the person who receives the letter may wonder what has happened to the established relationship. (See also ¶1339b.)

NOTE: Switching to a more formal closing would make sense if a copy of the letter will be read by others (especially someone in upper management) or will become part of a file of legal documents.

Company Signature

- 1347** A company signature may be used to emphasize the fact that a letter represents the views of the company as a whole (and not merely the individual who has written it). If a company signature is to be included, leave 1 blank line below the complimentary closing and then begin typing the company signature in all-caps, starting at the same point as the complimentary closing. (See the illustration on page 428.)

Sincerely yours,

← 1L#

HASKINS & COHEN INC.

NOTE: When a letter is written on letterhead stationery, the recipient of the letter may reasonably assume that the individual who signs the letter does so on behalf of the organization named in the letterhead. For that reason a company signature (like an attention line) is not really needed. Nevertheless, follow the style of the organization you work for.

Writer's Signature Block

- 1348 a.** Ordinarily, leave 3 blank lines below the complimentary closing (or the company signature if used) for the writer's handwritten name. Then on the following line type the writer's name in caps and lowercase. In the simplified letter style, leave 4 blank lines below the body of the letter for the writer's handwritten name. Then on the following line type the writer's name and title in all-caps. (See the examples in ¶1349 and the illustrations on pages 428–432.)

NOTE: If the letter is running short, you can leave up to 6 blank lines for the signature. If the letter is running long, you can reduce the signature space to 2 blank lines. (See also ¶1307.)

- b.** Ordinarily, start typing at the same point as the complimentary closing or the company signature. In the simplified letter style, start typing at the left margin.
- c.** Although some writers prefer to give only their title and department name in the signature block, a typed signature should also be included so that the unsigned copies will clearly show who sent the letter. If the writer prefers to omit his or her name from the signature block, then it should be spelled out in the reference initials. (See ¶1355d.)
- d.** Some managers have special stationery with their name and title imprinted along with other elements of the letterhead. When using this type of stationery, supply a typed signature but omit the title. (For an illustration, see page 431.)

- 1349** **a.** Arrange the writer's name, title, and department on two or more lines to achieve good visual balance. Align any turnovers at the left.

Janice Mahoney, Manager Data Processing Division	Ernest L. Welhoelter Chairman of the Board
Charles Saunders Assistant Manager Credit Department	Franklin Browning Vice President and General Manager

SIMPLIFIED STYLE: MARY WELLER, MANAGER, SALES DEPARTMENT

- b.** In signature blocks, capitalize the first letter of every word in the title and department except (1) prepositions under four letters (like *of*, *for*, and *in*), (2) conjunctions under four letters (like *and*), and (3) the articles *the*, *a*, and *an* when they appear within the title. (See also ¶1324c.)
- c.** If an organization's letterhead stationery or computerized template does not easily accommodate the appropriate phone numbers and an e-mail address for each employee, this information can be included at the end of the signature block. The following arrangements are acceptable:

Charles Saunders	OR: tel 630.555.5084	OR: t 630.555.5084
Assistant Manager	fax 630.555.6594	f 630.555.6594
Credit Department	e-mail: credit@benson.com	e credit@benson.com

If a personal e-mail address is available, use that instead of the one established for the department or the organization.

Charles Saunders	
Assistant Manager	
Credit Department	
phone: 630.555.5084	
fax: 630.555.6594	
e-mail: csaunders@benson.com	

NOTE: Telephone numbers may also be written with hyphens (630-555-5084) or with spaces (630 555 5083). For additional details, see ¶454.

- 1350** If a special title is to be used in a signature block, observe these guidelines:

- a.** A person who wants to be addressed as *Dr.* should use an appropriate academic degree after his or her name (not *Dr.* before it).

Jane Bishop, M.D.	Nancy Buckwalter, Ph.D.
Charles Burgos, D.D.S.	Morris Finley, D.D.
Lee Toniolo, D.O.	Henry Krawitz, D.H.L.

- c. A single woman who wants to indicate her preference for *Miss* should include this title in her handwritten or her typed signature (but not both).

Cordially,

(*Miss*) Margaret L. Galloway

Margaret L. Galloway

Cordially,

Margaret L. Galloway

Miss Margaret L. Galloway

- d. A married woman who retains her original name for career purposes or who does not change her surname at all may use either *Ms.* or *Miss*, as illustrated in b and c above.

- e. A married woman or a widow who prefers to be addressed as *Mrs.* has many alternatives to choose from. The following examples show the possible styles for a woman whose original name was Nancy O. Ross and whose husband's name is (or was) John A. Wells.

Sincerely,

(*Mrs.*) Nancy O. Wells

Nancy O. Wells

Sincerely,

Nancy O. Wells

Mrs. Nancy O. Wells

Sincerely,

(*Mrs.*) Nancy R. Wells

Nancy R. Wells

Sincerely,

Nancy R. Wells

Mrs. Nancy R. Wells

Sincerely,

(*Mrs.*) Nancy Ross Wells

Nancy Ross Wells

Sincerely,

Nancy Ross Wells

Mrs. Nancy Ross Wells

Sincerely,

(*Mrs.*) Nancy O. Ross-Wells

Nancy O. Ross-Wells

Sincerely,

Nancy O. Ross-Wells

Mrs. Nancy O. Ross-Wells

NOTE: Giving the husband's full name in the typed signature (as in the example below) is a style that has often been used in the past for social purposes; it is less frequently used these days because many married women are reluctant to use their husbands' names to identify themselves. In any case, this style should not be used in business, and it should not be used when a married woman becomes a widow unless she indicates that this is her preference.

Sincerely,

Nancy O. Wells

Mrs. John A. Wells

¶1353

- f.** A divorced woman who has resumed her original surname may use *Ms.* or *Miss* in any of the styles shown in ¶1352b–c. If she retains her ex-husband's surname, she may use *Ms.* or *Mrs.* in any of the styles shown in ¶1352b and e. **EXCEPTION:** The style that uses the husband's full name in the typed signature is not appropriate for a divorced woman.

- 1353** **a.** An administrative assistant or secretary who signs a letter at the boss's request customarily signs the boss's name and adds his or her own initials. However, if the boss prefers, the administrative assistant may sign the letter in his or her own name.

Sincerely yours,

Robert H. Benedict
DK

Robert H. Benedict
Production Manager

Sincerely yours,

Dorothy Kozinski

Ms. Dorothy Kozinski
Administrative Assistant
to Mr. Benedict

- b.** If the person who signs for another is not the administrative assistant, either of the following forms may be used:

Sincerely yours,

(miss) Alice R. Brentano

For Robert H. Benedict
Production Manager

Sincerely yours,

Robert H. Benedict
ARB

Robert H. Benedict
Production Manager

- 1354** When two people have to sign a letter, arrange the two signature blocks side by side or one beneath the other.

- a.** If they are placed side by side, start the first signature block at the left margin and the second block at center. If this arrangement is used, the complimentary closing should also begin at the left margin. (This arrangement is appropriate for all letter styles.)
- b.** If the signature blocks are positioned one beneath the other, leave 3 blank lines below the end of the first block and then start typing the second block, aligned at the left with the first block. In a modified-block-style letter, begin typing at center; however, in a block-style or simplified letter, begin typing at the left margin.
- c.** Sequence the signature blocks in alphabetical order or according to rank.

Reference Initials

- 1355** **a.** When the writer's name appears in the signature block and someone other than the writer has typed the letter, the simplest and least obtrusive way to format reference initials is to give the typist's initials alone in lowercase. (See the illustrations on pages 428, 431, and 432.)

NOTE: Do not include reference initials in a personal-business letter (see the illustration on page 430) or a social-business letter (see ¶¶1371–1372 and the illustration on page 486). Moreover, omit reference initials on letters you type

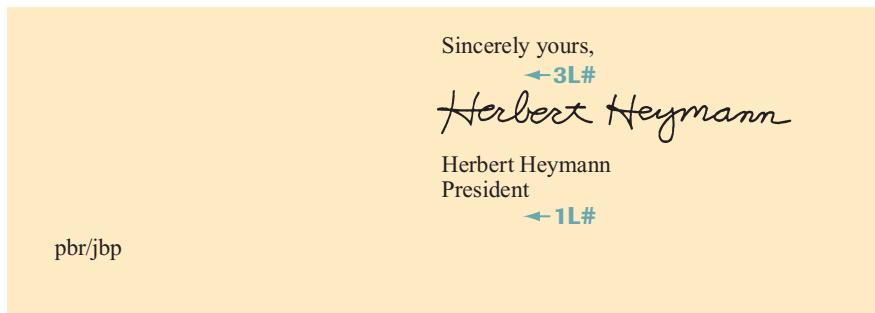

yourself unless you need to distinguish them from letters prepared for you by someone else.

- b.** Leave 1 blank line below the writer's name and title, and then type the initials of the typist at the left margin. If the writer wants his or her initials used, they should precede the initials of the typist.
- c.** Type the initials either in small letters or in all-caps. When giving two sets of initials, type them both the same way for speed and simplicity.

TYPIST ONLY: gdl **OR:** GDL
WRITER AND TYPIST: dmd/mhs **OR:** DMD/MHS **(BUT NOT:** DMD/mhs)

► For the use of autotext, see ¶1344a, note; for initials based on names like McFarland and O'Leary, see ¶516c.

- d.** If the writer's name is not given in the signature block, type the writer's initials and surname before the initials of the typist; for example, *BSDixon/rp*.
- e.** When the letter is written by someone other than the person who signs it, this fact may be indicated by showing the writer's and the typist's initials (not the signer's and the typist's).

- f.** If a person's name ends in *Jr.*, *Sr.*, or a roman numeral such as *III*, do not include this element in the reference initials unless it is needed to distinguish this person from someone else in the organization.

gldjr/dbb **OR:** GLDJR/DBB

File Name Notation

1356 When you create documents using word processing software, each document needs a unique file name so that it can be readily retrieved from storage. Some organizations have specific guidelines for creating file names so that anyone in the organization can retrieve a document. If you are free to create your own file names, the following guidelines may be of some help.

- a.** A file name has three components: a name, a *dot* (a period used as a separator), and a default extension that specifies the type of document that is being filed. This extension may or may not be visible, depending on the software you are using.

Continued on page 470

¶1356

- b.** In creating a file name, try to make it as meaningful as possible. You can use the letters *a* to *z*, the figures *0* to *9*, and certain symbols. If you are using Microsoft Word, you may create file names with as many as 255 characters and you may use spaces in these file names, but the following symbols may not be used: colons, question marks, quotation marks, asterisks (*), slashes and backslashes (/ \), angle brackets (< >), and pipes (|).

NOTE: If you are using different software, refer to your *help* file to determine what restrictions may govern the construction of file names.

- c.** If you are planning to file alphabetically, the first element in a file name may be the name of a person, an organization, or a subject. If you are dealing with a long name, you may abbreviate it in a way that suggests the full name. For example, a long name like *Yvonne Christopher* could be transformed into *chrstphr*—or better yet, *chrstphy* (to distinguish it from a file name created for *Henry Christopher*—*chrstphh*). An organizational name like *Bank of America Corporation* could be abbreviated as *bankamer*. A subject name like *Direct Marketing Plans for 2009* could be shortened to *dmplns09*. However, abbreviations are not necessary now that most software programs no longer severely limit the length of file names.
- d.** If you are planning to file numerically, the first element in a file name may be a date, a policy number, an order number, or something similar. If you are using dates, express months in a sequence that ranges from 01 to 12, days in a sequence that ranges from 01 to 31, and years in a sequence that ranges from 00 to 99. Express the date in year-month-day sequence; for example, the file name based on May 2, 2009, would be *090502*.

NOTE: If you file a lot of correspondence by date, you may want to include the recipient's surname following the date. For example, the file name for a letter sent to Alexander Grayson on June 4, 2009, might be *090604grayson* or *090604grysn*. The file name for a letter sent to the International Association of Business Communicators on the same date might be *090604iabc*.

- e.** If you are filing alphabetically and want to include a date as part of the file name, you may use the year-month-day format as described in *d* above. Then, for example, the file name for a letter sent to Thomas Poe on November 2, 2010, would be written as *poet101102*.

Here is an alternative format for expressing the date in year-month-day order:

- (1) To express the year, use the last two digits of the year (for example, *09* for *2009*).
- (2) To express the months from January to September, use the figures *1* to *9*. For October, November, and December, use the abbreviations *oct*, *nov*, and *dec* or simply the letters *o*, *n*, and *d*.
- (3) To express the day, use the figures *1* to *31*.

With this format, the file name for the letter sent to Thomas Poe on November 2, 2010, would be *poet10nov2* or *poet10n2*.

- f. In addition to a default extension, another extension may be used:
- (1) To show the initials of the writer.
 - (2) To indicate where a document falls in chronological order. (For example, *bonoj12* would signify that a given document is the twelfth sent to J. Bono.)
 - (3) To identify a document in different stages of revision. (For example, *d1* could signify the first draft, *d3* the third draft, and *df* the final version.)
 - (4) To indicate the initials of the recipient of the letter if the primary component of the file name is the date.

- 1357** a. It is not essential to provide a file name notation on your letters, but some organizations require it and some writers prefer to do so. On the other hand, some organizations specify that for security purposes the file name should appear only on the file copy.
b. If you want to insert a file name notation in a letter, type it on the line directly below the reference initials (see ¶1355). Some writers prefer to treat the file name notation as a reference notation and insert it after the phrase *When replying, refer to:*. (See ¶1315.)

Enclosure Notation

- 1358** a. If one or more items are to be included in the envelope with the letter, indicate that fact by typing the word *Enclosure* (or *Enclosures*) at the left margin, on the line directly below the reference initials or the file name notation, whichever comes last.

NOTE: Before sending the letter, make sure that the number of enclosures shown in the enclosure notation agrees with (1) the number cited in the body of the letter and (2) the number of items actually enclosed.

- b. The following styles are commonly used:

Enclosure	2 Enclosures	Enclosures:
Enc. (See ¶503.)	2 Enc.	1. Check for \$500
1 Enclosure	Enclosures 2	2. Invoice A37512
Check enclosed	Enc. 2	

- c. You may use the term *Attachment* or *Att.* when the material is actually attached to the cover letter rather than simply enclosed.
d. If material is to be sent separately instead of being enclosed with the letter, indicate this fact by typing *Separate cover* or *Under separate cover* on the line below the enclosure notation (if any) or on the line directly below the reference initials or the file name notation, whichever comes last. The following styles may be used:

Separate cover 1	Under separate cover:
	1. Annual report
	2. Product catalog
	3. Price list

Continued on page 472

¶1359

e. If you have several enclosures and want to identify each one by name, list them in the order in which you referred to them in the body of the letter.

f. When the letter and the enclosures are being assembled for mailing, clip the pages together in some way that can be easily undone.

NOTE: Do not staple these pages before sending them out. If the recipient wants to make copies, having to remove staples is a nuisance and may even cause the original pages to tear. If stapling is desired, let the recipient of the letter do it.

Delivery Notation

1359 a. If a letter is to be delivered in a special way (other than ordinary first-class mail), type an appropriate notation on the line below the reference initials, the file name notation, or the enclosure notation, whichever comes last. Among the notations that could be used are *By fax*, *By e-mail*, *By FedEx*, *By Express Mail*, *By certified mail*, *By registered mail*, *By special delivery*, and *By messenger*.

crj	HWM:FH	tpg/wwc
Enc. 2	By FedEx	Enclosures 4
By e-mail	cc: Mr. Fry	By fax

b. If you send a letter by fax and want to record the fax number on your file copy, simply expand the delivery notation as follows:

By fax (203.555.4687)

c. If you want to e-mail a normal letter, send the letter as an attachment to an e-mail message that serves as a cover note. (See ¶1385.) If you try to e-mail the letter itself, it is likely to arrive with its format significantly distorted.

Confirmation Notation

1360 a. When a letter is initially faxed or e-mailed and then sent through the mail as a confirmation copy, it is helpful to provide a confirmation notation on the letter being mailed. In that way the recipient will realize at once that the document now in hand is not a new letter but simply a hard-copy version of the fax or e-mail message previously received.

b. Leave 1 blank line below the date line (or any notation that follows the date), and then starting at the left margin, type the following notation:

← 1L#

Confirmation of [fax OR: e-mail] sent on [date on which the letter was transmitted].

Copy Notation

1361 a. A copy notation lets the addressee know that one or more persons will also be sent a copy of the letter. The initials *cc* are still the most commonly used device for introducing this notation. Although the abbreviation originally referred to *carbon copies*, *cc* also means *copies* (in the same way that *pp.* means *pages* and *ll.* means *lines*). The initials *cc* may also stand for *courtesy copies*.

Some writers object to using *cc*, now that the widespread use of photocopies or duplicate printouts has made the use of carbons obsolete. However, *cc* and its related form *bcc* (see ¶1362) continue to be widely used (regardless of how the copies are made), in much the same way that a *dial tone* continues to be heard on telephone instruments that use buttons rather than a rotary dial.

NOTE: The abbreviation *cc* is used in the heading of many memo templates and e-mail formats. (For illustrations see pages 488–497.)

- b.** Writers looking for an alternative to *cc* may use a single *c* or the phrase *Copies to* (or *Copy to*).
- c.** Start the copy notation on the line directly under any previous notation (such as reference initials or an enclosure notation). If there is no previous notation, leave 1 blank line below the writer's signature block and type the copy notation.
- d.** Type *cc* or *c* or *Copies to* at the left margin, and follow it immediately with a colon.

NOTE: When you type *cc* at the start of a new line, your word processing program may automatically change it to *Cc*. This change is caused by an automatic styling function that capitalizes the first letter of anything typed at the left margin when a blank line is directly above or when the previous text line ends with a hard return. This automatic function should be permanently disabled.

- e.** If you are sending a copy to only one person, insert 1 or 2 spaces between the colon and the person's name.

mfn

Enclosure

pda/gfy

cc: Ms. Wu

c: Mr. Case

Copy to: Mrs. L. Bergamot

- f.** If you are sending copies to several people, set a tab 1 or 2 spaces after the colon in order to start all the names at the same point. List the names in alphabetic order or according to rank. Type *cc* or *Copies to* only alongside the first name in the list.

cc: Ms. Aguirre

c: Mr. Devoe

Copies to: Mrs. Gold

Mr. Boulet

Ms. Eggleston

Mr. Hunsicker

Mrs. Corbin

Mrs. Franco

Ms. Ismail

- g.** When first names or initials are given along with last names, omit titles such as *Mr.*, *Miss*, *Mrs.*, and *Ms.* except in formal letters. Moreover, do not use these titles if nicknames are given with last names.

c: James Diaz

cc: J. Diaz

cc: Jim Diaz

Kenneth Eustis

K. Eustis

Ken Eustis

Margaret Foster

M. Foster

Peggy Foster

1362 If you do not want the addressee to know that one or more persons are also being sent a copy of the letter, use a *blind copy notation*.

- a.** Print the original letter plus any copies on which the regular copy notation is to appear.
- b.** Print the blind copies one at a time, with a blind copy notation showing the name of the designated recipient.

¶1363

- c. Under certain circumstances, you may wish to let all recipients of blind copies know who the others are.
- d. Leave 1 blank line below the last item in the letter (whether reference initials, an enclosure notation, or any other notation), and type the blind copy notation.
- e. The form of a blind copy notation should follow the form of the copy notation. If you have used *cc* or *c*, then use *bcc* or *bc* accordingly. If you have used *Copies to*, use *Blind copies to*.
- f. The file copy should show all the blind copy notations, even though the individual copies do not. Whether the file copy is stored in computer memory or in hard-copy form, you may need to use the file copy later on to make additional copies for distribution. In such cases make sure that no prior blind copy notation appears on these new copies unless you want it to.

1363 When a letter carries both an enclosure notation and a copy notation, it is assumed that the enclosures accompany only the original letter. If a copy of the enclosures is also to accompany some copies of the letter, this fact may be indicated as follows:

cc w/o enc:	D. P. Wellak	(will receive only the letter)
	N. A. Warren	(will receive only the letter)
cc w/enc:	J. Baldwin	(will receive the letter and the enclosures)
	G. Conger	(will receive the letter and the enclosures)

1364 a. A copy is not usually signed. However, a check mark is usually made on each copy next to the name of the person or department for whom that copy is intended. As an alternative, you may use a highlighting marker to identify the recipient of each copy.

c: M. Starr ✓	c: M. Starr ✓	c: M. Starr
W. Fried	W. Fried ✓	W. Fried
C. Bell	C. Bell	C. Bell ✓

NOTE: If the letter is sent by e-mail, you can use electronic highlighting to identify the recipient of each copy.

► *For an illustration of electronic highlighting, see ¶1319c.*

- b. When an unsigned copy is likely to strike the recipient as cold and impersonal, it is appropriate for the writer to add a brief handwritten note at the bottom of the copy and sign or initial it.
- c. If a letter is addressed to two people, the copy sent to each of them should be treated as an original and should be signed. A copy notation will be required only if additional copies are being sent to other people.
- d. If a letter is addressed to more than two people, the copy sent to each of them will require special treatment, as described in ¶1319.

Postscript

1365 a. A postscript can be effectively used to express an idea that has been deliberately withheld from the body of a letter; stating this idea at the very end gives it strong

¶1366

emphasis. A postscript may also be used to express an afterthought; however, if the afterthought contains something central to the meaning of the letter, the reader may conclude that the letter was badly organized.

b. When a postscript is used:

(1) Leave 1 blank line below the copy notation (or whatever notation was typed last) and start typing the postscript. If the paragraphs are indented, indent the first line of the postscript (see the illustration on page 430). Otherwise, begin it at the left margin.

(2) Type *PS:* or *PS.* and leave 1 or 2 spaces before the first word of the postscript. (You can omit the abbreviation if you prefer.)

NOTE: The abbreviation *P.S.* (with an internal period after the *P*) is no longer used because the word *postscript* is now spelled as one word.

(3) Use *PPS:* or *PPS.* (or no abbreviation at all) at the beginning of an additional postscript, and treat this postscript as a separate paragraph.

PS: Instead of dashing for the airport as soon as the meeting is over, why don't you have dinner and spend the night with us and then go back on Saturday morning?

PPS: Better yet, why don't you bring Joyce with you and plan to stay for the whole weekend?

Continuation Pages

1366 a. Use plain paper of the same quality as the letterhead (but never a letterhead) for all but the first page of a long letter.

b. Use the same left and right margins that you used on the first page.

NOTE: If the first page of the letter is typed on letterhead stationery with printed copy running down the left side of the page, the copy on that page will require special margin adjustments. On any continuation pages, revert to the side margins you normally use. (See also ¶1305d, note.)

c. The continuation-page heading consists of the name of the recipient, the page number, and the date. Type all three items on one line or stack them at the left margin.

Mrs. Laura R. Austin

¶1366

- d. If the letter is addressed to two people, it is usually simplest to type both names at the left margin preceding the page number and the date.

Mrs. Laura R. Austin
 Mr. Phillip N. Goya
 Page 2
 September 28, 2011

← 1 or 2L#

NOTE: If the names are short, type them on the same line with the page number and the date. Use only each person's title and surname, and join the names with *and*.

Mrs. Austin and Mr. Goya

2

September 28, 2011

← 1 or 2L#

- e. If the letter is addressed to more than two people, it is not feasible to list all their names in a continuation heading or include all the inside address blocks within the same letter (see ¶1319c). In that case, prepare a customized version of the letter for each recipient, and use only that recipient's name in the continuation line.
- f. If the letter is addressed to *Dear Sir or Madam* or if it lacks the name of a particular recipient, use a brief phrase in the heading that clearly links the continuation page to the first page of the letter.

Recommendation for Emily Hanson

2

September 28, 2011

← 1 or 2L#

- g. Leave 1 or 2 blank lines below the last line of the continuation-page heading and resume typing the letter. If you use the header feature of your word processing software to create a continuation-page heading, be sure there is at least 1 blank line between the header and the text of the letter.

Ms. Jenny Applegate

2

February 23, 2011

← 1 or 2L#

and comparison shopping on Web sites will help you research products and compare prices to find the best bargains.

NOTE: You can use your software's *header* feature to create a continuation heading. Consult a user's manual or the *help* feature for details.

- h. Do not divide a short paragraph (one that contains only two or three lines) at the bottom of a page. For a paragraph of four or more lines, always leave at least two lines of the paragraph at the bottom of the previous page. Carry over at least two lines to the continuation page. (See also ¶1344i.)
- i. Never use a continuation page just for the closing section of a business letter. (The complimentary closing should be preceded by at least two lines of text.)
- j. Leave a bottom margin of at least 1 inch. The last page may run short. (See ¶1306.)
- k. Do not divide the last word on a page.

1. When a letter consists of two or more pages, do not staple it before sending it out. If the recipient wants to make copies, having to remove staples is a nuisance and may even cause the original pages to tear. If the letter consists of too many pages to be folded, clip the pages together in some way that can be easily undone. As an alternative, insert the letter in a clear acetate report cover (with an optional plastic side grip that can easily be removed).

Envelopes

For useful guidance on sending business mail, go to <<http://www.usps.com>>, the Web site established by the United States Postal Service (USPS); there you will find online brochures titled “An Introduction to Mailing for Business and Organizations” and “Business Mail 101.” For guidelines on personal mail, get a copy of “A Customer’s Guide to Mailing.”

Selecting the Right Size

- 1367** a. The following chart indicates the envelope to be used, depending on the size of the stationery and the way in which the stationery is folded (see ¶1370).

Stationery	Fold	Envelope
Letter (8½" x 11")	In thirds In half, then in thirds	No. 10 (9½" x 4⅛") No. 6¾ (6½" x 3⅝")
Executive (7¼" x 10½")	In thirds In thirds	No. 9 (8⅞" x 3⅞") Monarch (7½" x 3⅞")
Half Letter (5½" x 8½")	In thirds	No. 6¾ (6½" x 3⅝")

NOTE: If you are using stationery and envelopes other than those shown above, consult the standards established by the USPS for envelope size and thickness in order to qualify for automated processing.

- b. If you use the *envelope* feature of your word processing program, you will be presented with a menu from which you can select the envelope size you want to use. Moreover, your program will automatically place the return address and the mailing address in positions appropriate for the envelope size you have selected.

NOTE: You can modify these default placement specifications to meet special requirements. You can also use a custom-size envelope (assuming your printer will support it) and establish appropriate placement specifications for that size.

- *For an illustration of an envelope prepared by Microsoft Word (using the envelope feature and all the default specifications), see page 479.*

Addressing Envelopes

1368 The Inside-Address Style

The traditional style for addressing envelopes—and the style most commonly seen on envelopes—uses caps and lowercase plus punctuation as appropriate. This style

Continued on page 478

¶1368

may be thought of as the inside-address style, because it follows all aspects of the format for inside addresses, as discussed in ¶¶1316–1336. The advantage of using this style is that it saves time and effort: your software program will copy the inside address as it appears in the letter and paste it on the envelope. You do not have to retype the address on the envelope. Moreover, the OCRs (optical character readers) used by the USPS are programmed to read this traditional style of address.

► *For the use of the all-cap style in addressing envelopes, see ¶1369.*

When using the inside-address style:

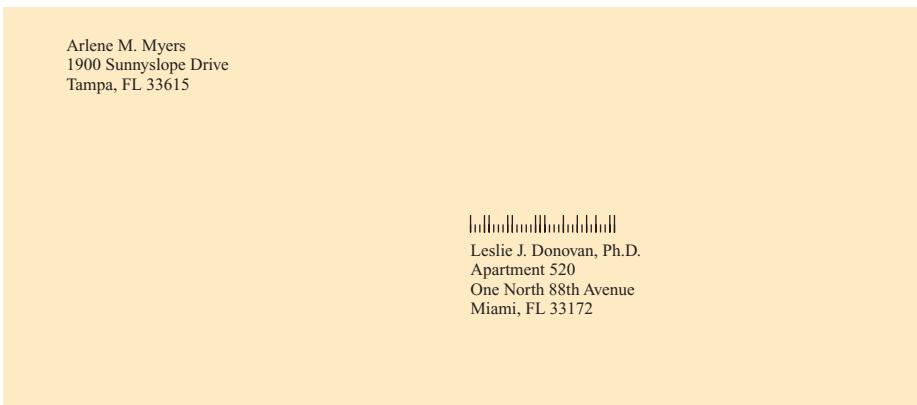

- a. Always use single spacing and block each line at the left.
- *See the illustrations on pages 479–480; for specific details on the handling of elements within the address block, see ¶¶1316–1336.*
- b. Capitalize the first letter of every word in an address except (1) prepositions under four letters (like *of* and *for*), (2) conjunctions under four letters (like *and*), and (3) the articles *the*, *a*, and *an* when they are used within a name or title. (Under certain circumstances even some of these short words are capitalized. See ¶¶1324c, 1326d.)
- c. Type the city, state, and ZIP Code on the last line. If space limitations make it impossible for the ZIP Code to fit on the same line, the ZIP Code may be typed on the line directly below, blocked at the left.
NOTE: You can find or confirm the ZIP Code for a specific address on the USPS Web site: <<http://www.usps.com>>.
- d. Leave 1 space between the state name and the ZIP Code. (The USPS recommends either 1 or 2 spaces.)
- e. The state name may be spelled out or given as a two-letter abbreviation. Either form is correct for use with a ZIP Code. (See ¶1334a–b.)
- f. The next-to-last line in the address block should contain a street address, a post office box number, a rural route address, or a highway contract address. (See ¶¶1316c, 1328–1331.)

- g. When using the envelope template of a word processing program to prepare an envelope, accept the default positions for the mailing address and the return address. Doing so will ensure that the mailing address falls within the OCR "read area" and that the return address does not.

NOTE: The OCR read area starts $2\frac{3}{4}$ inches above the bottom edge of the envelope, ends $\frac{5}{8}$ inch from the bottom edge, and extends horizontally to $\frac{1}{2}$ inch from the left and right edges. Do not allow any notations to fall alongside or below the OCR read area.

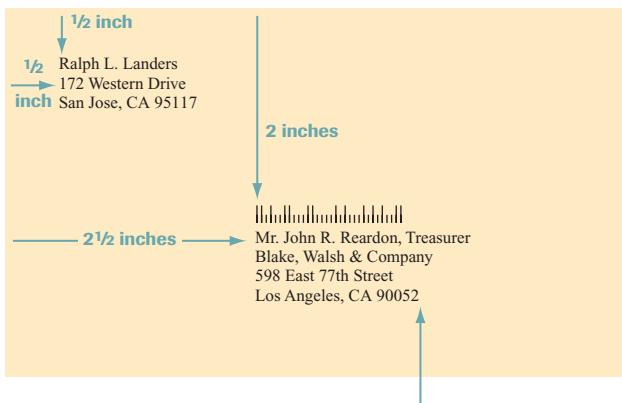

**No. 10 Envelope Created by Microsoft Word,
Using All the Default Specifications**

- h.** Your software may permit you to insert the USPS POSTNET bar code above or below the address block. (See ¶1369b.) Before you take advantage of this option, make sure that your complete database of mailing addresses has been certified by means of address-matching software approved by the USPS. For further information, contact your local Postal Service business center. (See also ¶1332b.)
- i.** When using a window envelope, adjust the placement of the inside address on the material to be inserted so that there will be a minimum clearance of $\frac{1}{8}$ inch (and preferably $\frac{1}{4}$ inch) between the edges of the window and all four sides of the address block, no matter how much the inserted material shifts around inside the envelope. (See also ¶1370d.)
- j.** To facilitate OCR processing, make sure that the lines in the address block are parallel to the bottom edge of the envelope. Moreover, there should be good contrast between the typed address and the color of the envelope; black type on a white background is preferred. The USPS also prefers that you do not use a script or italic font. The type should be clear and sharp, and adjacent characters should not touch or overlap.
- k.** When the envelope is already imprinted with an organization's return address, it is not possible to type the writer's name above the printed address. In such cases you may write the name in by hand above the printed address. As an alternative, leave 1 blank line below the return address and then type the writer's name.
- l.** If you have to create a return address, it should contain the following information, arranged on single-spaced lines, aligned at the left: (1) the name of the writer, (2) the name of the organization (if appropriate), (3) a street address or post office box number, and (4) the city, state, and ZIP Code. If you are using the envelope template of a word processing program, accept the default position for the return address.

¶1368

- m.** If a notation such as *Confidential*, *Personal*, *Please Forward*, or *Hold for Arrival* is to be used, leave 2 blank lines below the return address and then type the notation. Align the notation at the left with the return address. Begin each main word with a capital letter, and use boldface or underlining. For special emphasis type *Confidential* and *Personal* in bold caps (as in the second illustration below).

NOTE: Do not allow any notations or graphics to fall alongside or below the area established for the mailing address (see ¶1368j). Copy placed in these locations will interfere with OCR processing.

No. 6^{3/4} Envelope

For OCR processing, start the mailing address no higher than $2\frac{3}{4}$ inches from the bottom edge. Leave a minimum bottom margin of $\frac{5}{8}$ inch and minimum side margins of $\frac{1}{2}$ inch. (See ¶1368j.)

No. 10 Envelope With Confidential Notation

- n. If an attention line was used within the letter itself, it should appear on the envelope as well. The attention line should be typed as the first line of the address block (see ¶1337).
 - o. When a letter is to be sent in a special way by the U.S. Postal Service, do not type a mailing notation on the envelope (a customary practice in the past). The Postal Service will either affix a label or stamp the envelope to indicate the special handling that the sender has specified.
 - p. Make sure that the spelling of the name and address on the envelope agrees with the spelling shown in the inside address (and with the spelling shown on your records or the incoming document).
- NOTE:** The *envelope* feature of your software will copy the inside address as it appears in the letter and paste it on the envelope. Then you can be sure that the two address blocks will be identical.
- q. When preparing a self-addressed stamped envelope (often referred to as an SASE), you may think it is pointless to insert a return address in the upper left corner of the envelope. However, if you enter the name of the sender in the upper left corner, you will be able to tell—before opening the envelope—who has mailed your SASE back to you.

1369 The All-Cap Style

The all-cap style for addressing envelopes was devised by the U.S. Postal Service (USPS) primarily for the benefit of high-volume mailers who must contend with space limitations for the address blocks they generate by computer. The all-cap style typically appears on labels to be used in a mass mailing.

The USPS has issued many brochures urging everyone—individuals as well as organizations—to use the all-cap style, but it acknowledges that envelope addresses that use the inside-address format (see ¶1368) can be easily read by the USPS OCRs (optical character readers).

Keep in mind that the USPS now subjects *all* letter-size mail and postcards to OCR processing—even mail with handwritten addresses. Only those items that cannot be read by OCR are diverted to special encoding centers for manual processing.

NOTE: If your organization maintains its mailing lists in a database and uses this database to generate inside addresses in letters (as well as address blocks on envelopes), the all-cap (and no-punctuation) style designed for the envelope will look inappropriate inside the letter. Moreover, the heavy use of abbreviations in the all-cap style (see ¶1369a) often makes the address unintelligible to readers—another reason for not using this format for inside addresses. In such cases it makes sense to use the inside-address style described in ¶1368. You will then have a format that looks attractive as an inside address and that is also OCR-readable when used on an envelope.

¶1369

When using the all-cap style:

- a.** Keep in mind the maximum number of keystrokes you can get in any one line. If necessary, use abbreviations freely and omit all punctuation except the hyphen in the ZIP+4 Code.

NOTE: To keep the line length down to 28 keystrokes, the USPS has provided three special sets of abbreviations: one for state names; another for long names of cities, towns, and places; a third for names of streets and roads and general terms like *University* or *Institute*. By means of these abbreviations (see the ZIP Code directory), it is possible to limit the last line of any domestic address to 28 keystrokes.

Pass-a-Grille Beach, Florida 33741-9999 (39 keystrokes)

123456789012345678901234567890123456789

PAS-A-GRL BCH FL 33741-9999 (27 keystrokes)

Abbreviations such as those shown above serve to facilitate OCR processing, but they also serve in some cases to make the address incomprehensible to all except devoted students of USPS manuals. (Read the copy in the illustration on page 555.)

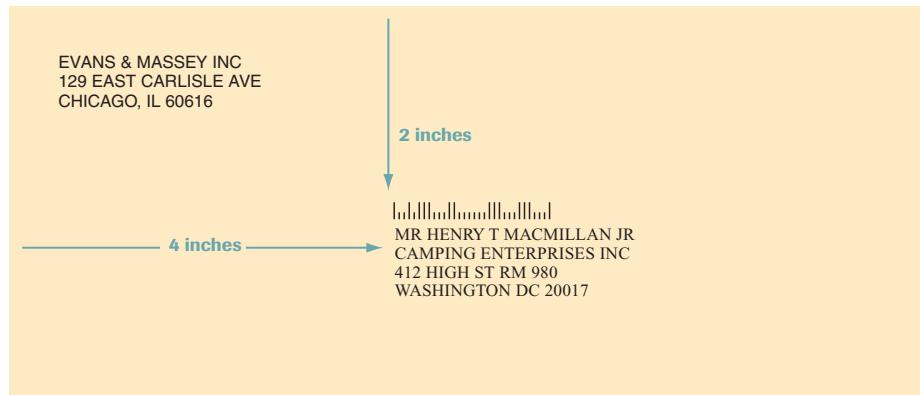

NOTE: These abbreviations appear on the USPS Web site: <<http://www.usps.com>>.

- b.** Type the lines in all-caps, single-spaced, blocked at the left, with no punctuation. Try to hold the address block to 5 lines. Your software may permit you to insert the USPS POSTNET bar code *above* or *below* the address block. (See the illustrations on pages 479–480.)

NOTE: Before you insert a bar code, make sure that your complete database of mailing addresses has been certified as correct by means of address-matching software approved by the USPS. For further information, contact your local Postal Service business center. (See also ¶1332b.)

- c.** Type the city, state, and ZIP Code on the last line. If space limitations make it impossible for the ZIP Code to fit on the same line, the ZIP Code may be typed on the line directly below, blocked at the left.

No. 10 Envelope Showing the All-Cap Address Style

- d. Leave 1 space between the state name and the ZIP Code. (The USPS recommends either 1 or 2 spaces.)
- e. Express the state name as a two-letter abbreviation.
- f. The next-to-last line in the address block should contain a street address, a post office box number, a rural route address, or a highway contract address. (See ¶¶1316c, 1328–1331.)
- g. If a room number, a suite number, an apartment number, or a floor number is part of the address, insert it immediately after the street address on the same line. (See the examples in ¶1369b and h.) When this information will not fit on the same line as the street address, place it on the line above but never on the line below. (See the examples in ¶¶1316b, 1317b.)

NOTE: Do not use the pound sign (#) if a term such as *Room*, *Suite*, *Apartment*, or *Floor* is used before the number. If you do use the pound sign, the USPS asks that 1 space be left between the symbol and the number that follows; for example:

616 OHIO AVENUE # 203

- h. If an attention line is to be included in the address, insert it on the line directly above the organizational name or (in the absence of an organizational name) on the line directly above the street address or post office box number (see ¶1337). If a serial number of some kind (for example, an account number or a file reference number) is required, insert it as the first line of the address block.

H 048369 1078 AT5
MRS M R TURKEVICH
BROCK & WILSON CORP
79 WALL ST STE 1212
NEW YORK NY 10005-4101

OR: H 048369 1078 AT5
ATTN MRS M R TURKEVICH
BROCK & WILSON CORP
79 WALL ST STE 1212
NEW YORK NY 10005-4101

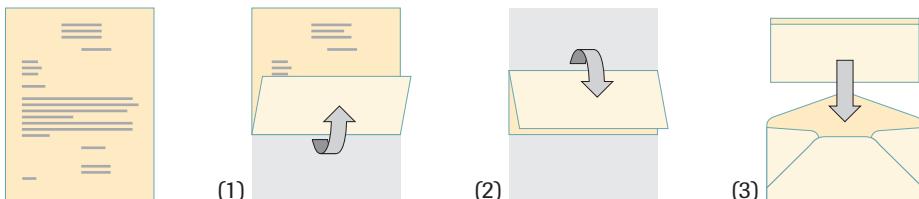

- i. To facilitate OCR processing, make sure that the mailing address starts no higher than $2\frac{3}{4}$ inches from the bottom edge, falls no lower than $\frac{5}{8}$ inch from the bottom edge, and comes no closer to either the left or the right edge than $\frac{1}{2}$ inch. Do not allow any notations or graphics to fall alongside or below the area established for the mailing address. Make sure that the lines in the address block are parallel to the bottom edge of the envelope. Moreover, there should be good contrast between the typed address and the color of the envelope; black type on a white background is preferred. The USPS also prefers that you do not use a script or italic font. The type should be clear and sharp. Adjacent characters should not touch or overlap.
- j. Make sure that the spelling and formatting of the name and address on the envelope agree with the spelling and formatting shown in the inside address (and with the spelling shown on your records or the incoming document).

► *For guidelines on the formatting of names and addresses in address blocks, see ¶¶1316–1336.*

¶1370**Folding and Inserting Letters**

1370 The following paragraphs provide guidelines for folding letters and inserting them into envelopes.

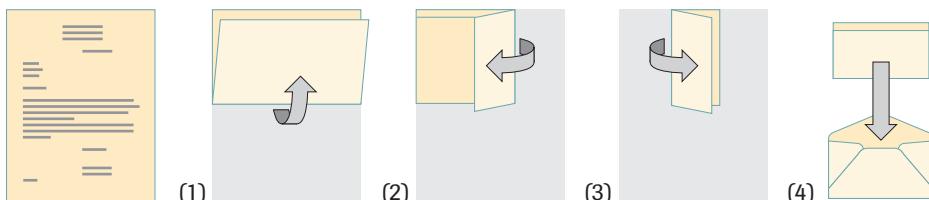

- a. To fold a letter in thirds:

- (1) Bring the bottom third of the letter up and make a crease.
- (2) Fold the top of the letter down to within $\frac{3}{8}$ inch of the crease you made in step 1. Then make the second crease.
- (3) The creased edge made in step 2 goes into the envelope first.

NOTE: Use this method for $8\frac{1}{2}'' \times 11''$ stationery with a No. 10 envelope; executive stationery with a No. 9 or a Monarch envelope; $5\frac{1}{2}'' \times 8\frac{1}{2}''$ stationery with a No. $6\frac{3}{4}$ envelope.

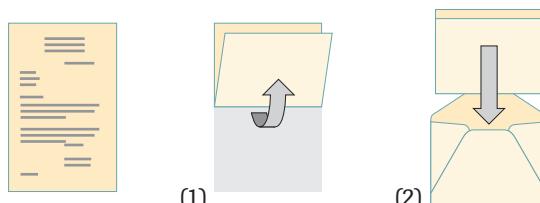

- b. To fold a letter in half and then in thirds:

- (1) Bring the bottom edge to within $\frac{3}{8}$ inch of the top edge and make a crease.
- (2) Fold from the right edge, making the fold a little less than one-third the width of the sheet before you crease it.
- (3) Fold from the left edge, bringing it to within $\frac{3}{8}$ inch of the crease you made in step 2 before you crease the sheet again.
- (4) Insert the left creased edge into the envelope first. This will leave the crease you made in step 2 near the flap of the envelope.

NOTE: Use this method for $8\frac{1}{2}'' \times 11''$ stationery with a No. $6\frac{3}{4}$ envelope.

- c. To fold a letter in half:

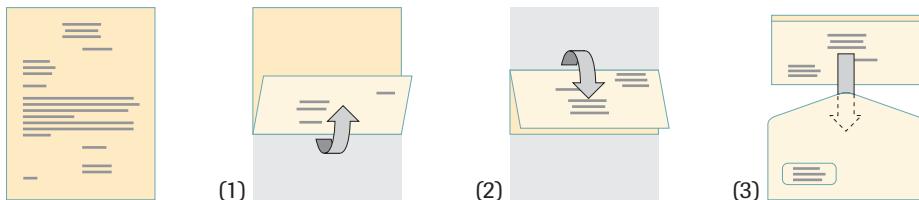

1372

(1) Bring the bottom edge to within $\frac{3}{8}$ inch of the top edge and make a crease.

(2) Insert the creased edge into the envelope first.

NOTE: Use this method for $5\frac{1}{2}'' \times 8\frac{1}{2}''$ stationery with a No. 5 $\frac{3}{8}$ envelope.

d. To fold a letter for insertion into a window envelope:

(1) Place the letter *face down* with the letterhead at the top, and fold the bottom third of the letter up.

(2) Fold the top third down so that the inside address shows.

(3) Insert the letter with the inside address toward the *front* of the envelope. The inside address should now be fully readable through the window of the envelope. Moreover, there should be at least $\frac{1}{8}$ inch (and preferably $\frac{1}{4}$ inch) between all four sides of the address and the edges of the window, no matter how much the letter shifts position in the envelope.

Social-Business Correspondence

1371 The term *social-business correspondence* applies to the following types of letters:

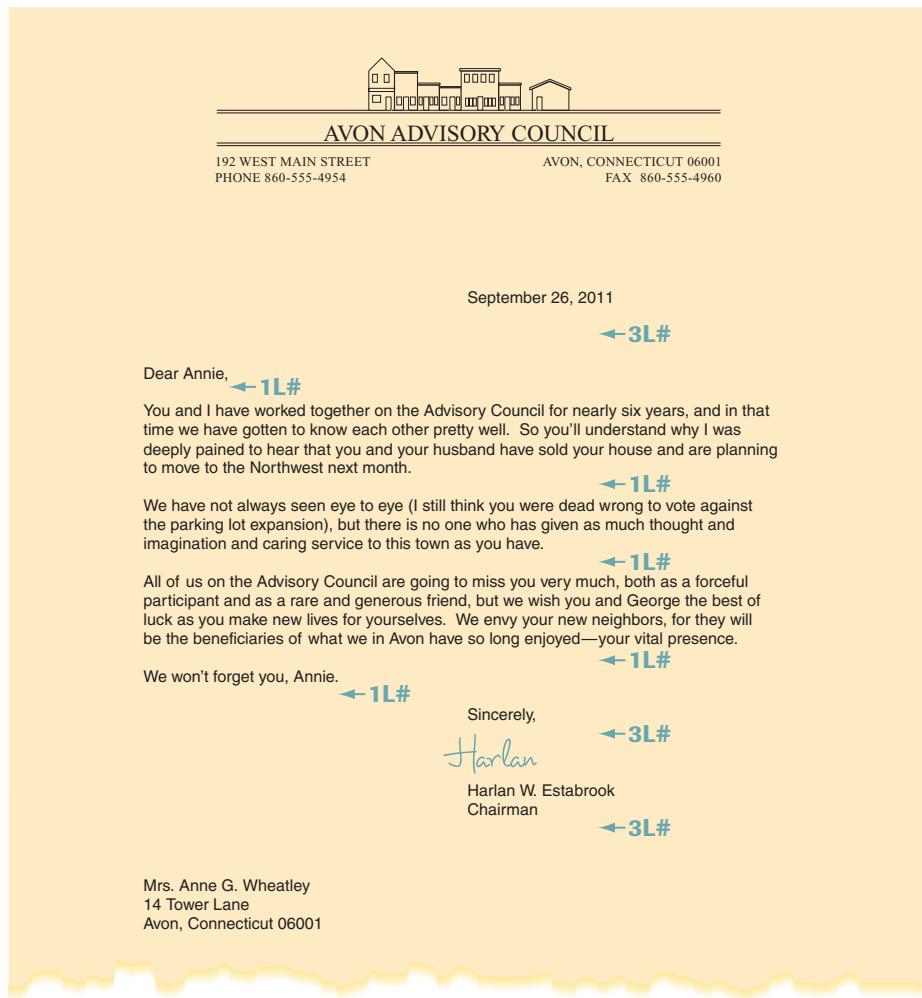

- a. Executive correspondence addressed to high-level executives, officials, and dignitaries. (Unlike ordinary business correspondence—which deals with sales, production, finance, advertising, and other routine commercial matters—these letters deal with such topics as corporate policy and issues of social responsibility, and they are written in a more formal style.)
- b. Letters expressing praise, concern, or condolence to someone within or outside the organization. The occasion that prompts the letter could be exceptional performance on the job or in the community, an employment anniversary, the death or serious illness of a family member, or an upcoming retirement. Such letters may be formal or informal, depending on the relationship between the writer and the person addressed.
- c. Letters to business associates within or outside the company on purely social matters.

1372 Social-business correspondence differs from ordinary business correspondence in several ways:

- a. Type the inside address at the bottom of the letter. Leave 3 blank lines below the writer's typed signature or title (whichever comes last), and type the inside address, aligning all the lines at the left margin.

Continued on page 486

¶1372

- b.** Use a comma rather than a colon after the salutation.
- c.** Reference initials and notations pertaining to file name, enclosures, delivery, and copies are typically omitted. (It would make good sense, however, to put such notations on the file copy in case this information is needed later on.)
- d.** If the letter requires a *Personal* or *Confidential* notation, place the notation only on the envelope, not on the letter itself. (For the appropriate placement of the notation on an envelope, see ¶1368m and the second illustration on page 480.)
- NOTE:** Include the *Personal* or *Confidential* notation on the file copy.
- e.** Social-business correspondence is also *more* formal or *less* formal than ordinary business correspondence. For example, correspondence to high-level officials and dignitaries is customarily more formal. In such cases use the word style for numbers (see ¶¶404–406) and one of the special salutations listed in Section 18.

However, in letters to business associates who are also close friends, the salutation and the complimentary closing may be very informal, and the writer's typed signature and title—and even the inside address—may be omitted. Moreover, when such letters are purely personal in nature, the writer may use plain stationery and omit the return address.

Memos

- 1373** **a.** The memo format was designed to simplify the exchange of information within an organization. The printed memo form is now a thing of the past, but the memo format continues to be widely used for certain types of documents transmitted by e-mail.
- b.** The memo format and the e-mail format look very much alike. The heading in each case calls for the same kind of information: the names of the recipients, the subject of the message, and the date of transmittal. Yet they each work best under different circumstances.

The *e-mail* format is typically used when a message deals with a topic of only temporary importance (for example, arranging dates for meetings or exchanging comments on routine matters). Such messages are usually deleted sooner or later.

The *memo* format is typically used when the message deals with topics likely to form part of a permanent record—for example, announcements of changes in policy, procedures, organization, or staffing. Minutes of meetings done in an informal style also make use of the memo format (see ¶1704 and the illustration on page 624).

- c.** Many organizations have designed their own memo format. If your organization has not done so, you can use a memo template provided by your word processing software. The illustration at the top of page 488 shows one of the templates provided by Microsoft Office Online.

- 1374** If you want to create your own memo template, consider the following guidelines. (The illustrations on pages 489–490 have been formatted to reflect these guidelines.)

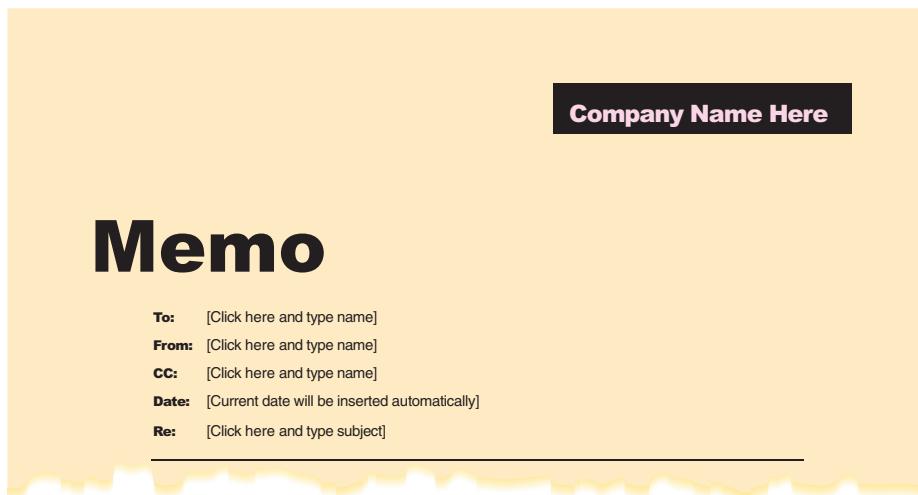

Please remember: There is no one correct format for a memo. Design the format to meet your needs and those of the organization you work for.

NOTE: Because memos are now typically distributed by e-mail, you may find it helpful to consider the guidelines for preparing e-mail messages. (See ¶¶1375–1385.)

- a.** For side margins, either choose the default settings or, for better appearance and legibility, choose even wider side margins (as shown in the table in ¶1305b).

¶1374

The Professional Memo Template (Using 10-point Arial),
Provided by Microsoft Office Online

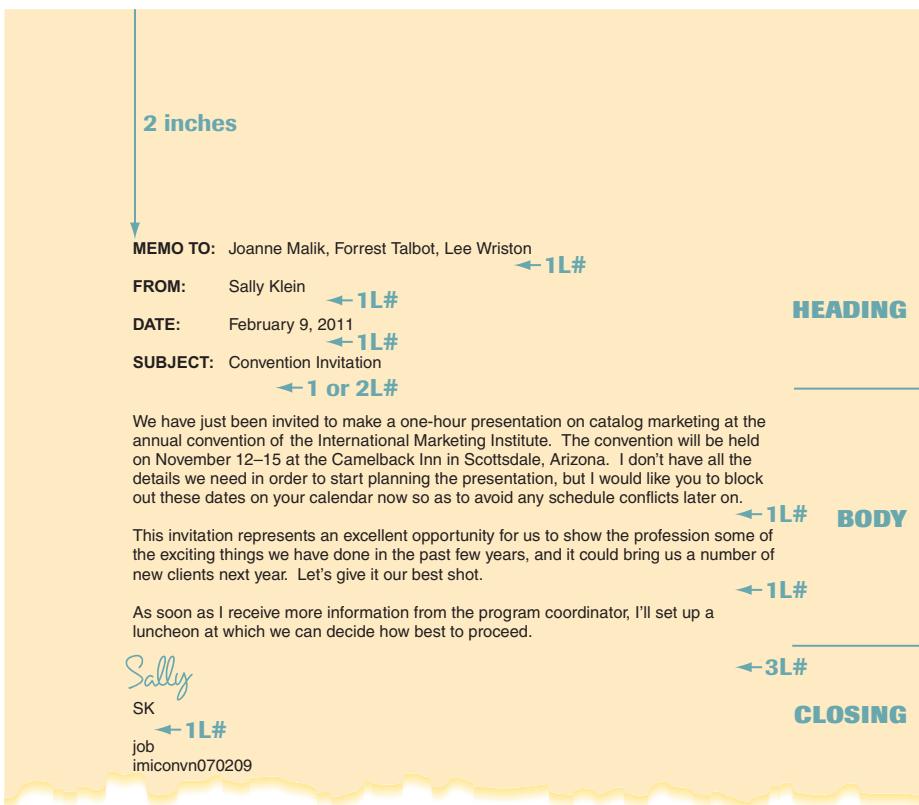

- b.** The standard top margin for all business documents is 2 inches. However, if you use a top margin of only 1 inch, you can fit more copy on the page and reduce the need for a continuation page. If you are planning to use letterhead stationery for a memo, make sure you leave at least a 0.5-inch space between the letterhead and the first element to be typed.
- c.** You can choose the heading you prefer: for example, *Memo* (as in the illustration above), *Interoffice Memorandum* (as in the illustration at the bottom of page 489), or simply *Memorandum* (as in the illustration on page 490). Type the heading in bold caps or bold caps and lowercase.
- d.** The heading of the memo should include the following guide words—*To*, *From*, *Date*, and *Subject*.

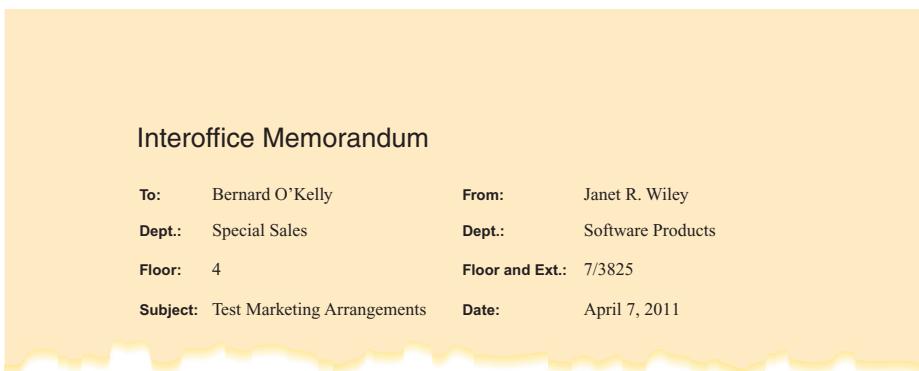

NOTE: If you decide not to use a heading such as *Interoffice Memorandum* or *Memorandum*, change *To* (the first guide word) to *Memo To* (as shown in the illustration at the top of page 489).

► *For an explanation of the spacing notations that appear on the illustrations of memos, see ¶1302d.*

- e.** You may also wish to add a number of other guide words. For example, below the guide word *To* you could insert *Copies To*. If you work in a large organization and are sending memos to people who do not know you, then below the guide word *From* you might want to insert such guide words as *Department*, *Floor*, *Phone No.*, and *Fax No.* Start typing the guide words at the left margin and use double spacing. Type the guide words in bold caps or in bold caps and lowercase (as in the illustrations on page 489).

NOTE: If you plan to use a large number of guide words (beyond *To*, *From*, *Date*, and *Subject*), you may want to arrange the guide words in two columns to prevent the heading from taking too much space. In that case, start the second column of guide words at center (as shown in the illustration below).

- f. Set a tab so that the entries following the guide words will all block at the left and will clear the longest guide word by a minimum of 2 spaces.

¶1374**MEMORANDUM**

TO: Bernard O'Kelly ← 1L#
COPIES TO: Steve Kubat, Pat Rosario
FROM: Janet R. Wiley *JRW*
DATE: April 7, 2011
SUBJECT: Test Marketing Arrangements ← 1 or 2L#

Dear Bernie:

Let me try to summarize the outcome of our excellent meeting last Friday, in which we discussed how your group might sell our product lines to the markets you serve.

1. Steve Kubat, chief product manager for my group, will provide you with product descriptions, catalog sheets, ad mats, and current price lists. If you need additional information, just call Steve (or me in his absence) and we'll be glad to help in any way that we can.

2. We will pay you an 18 percent commission on all orders you generate for our products. Please forward a copy of these orders to Steve, who will arrange to have the commission credited to your account.

3. We very much appreciate your offer to give us three hours at your weeklong sales meeting next month to present our products to your field staff. We'll be there.

4. We have agreed to give this new arrangement a six-month test to determine (a) how much additional sales revenue you and your people can produce with our products and (b) what effect, if any, this special marketing effort will have on your sales of other products. At the end of the test period, we will analyze the results and decide whether to continue the arrangement, modify it in some way, or abandon it altogether.

I don't think we'll be abandoning it, Bernie. In fact, I feel quite confident that this new arrangement is going to produce significant gains in sales and profits for both of us. I look forward to working with you to make it all happen.

imm
okellyb647

- g.** After the guide words *To* (or *Memo To*) and *From*, type the names of the addressee and the writer without personal titles (*Mr.*, *Miss*, *Mrs.*, *Ms.*). Indeed, when you are doing a memo to someone within your immediate unit, the use of initials or simply a first name may suffice. In short, the way you treat these names will depend on the relative formality or informality of the occasion.

John A. Mancuso **OR:** JAM **OR:** Jack

- h.** If you want to provide additional information (such as a department name or title, a phone number, a fax number, or an e-mail address), you can add the appropriate guide words to the heading of the memo or you can insert the relevant information after the person's name. For example:

Cynthia Chen, Accounting Manager **OR:** Cynthia Chen (Ext. 4782)

- i. If the memo is being addressed to two or three people, try to fit all the names on the same line.

MEMO TO: Hal Parker, Meryl Crawford, Mike Monagle

If there are too many names to fit on the same line, then list the names in one or more single-spaced columns alongside *To* or *Memo To*. Leave 1 blank line before the next guide word and fill-in entry.

MEMO TO: Louise Landes
Fred Mendoza
Jim Norton
Ruth O'Hare

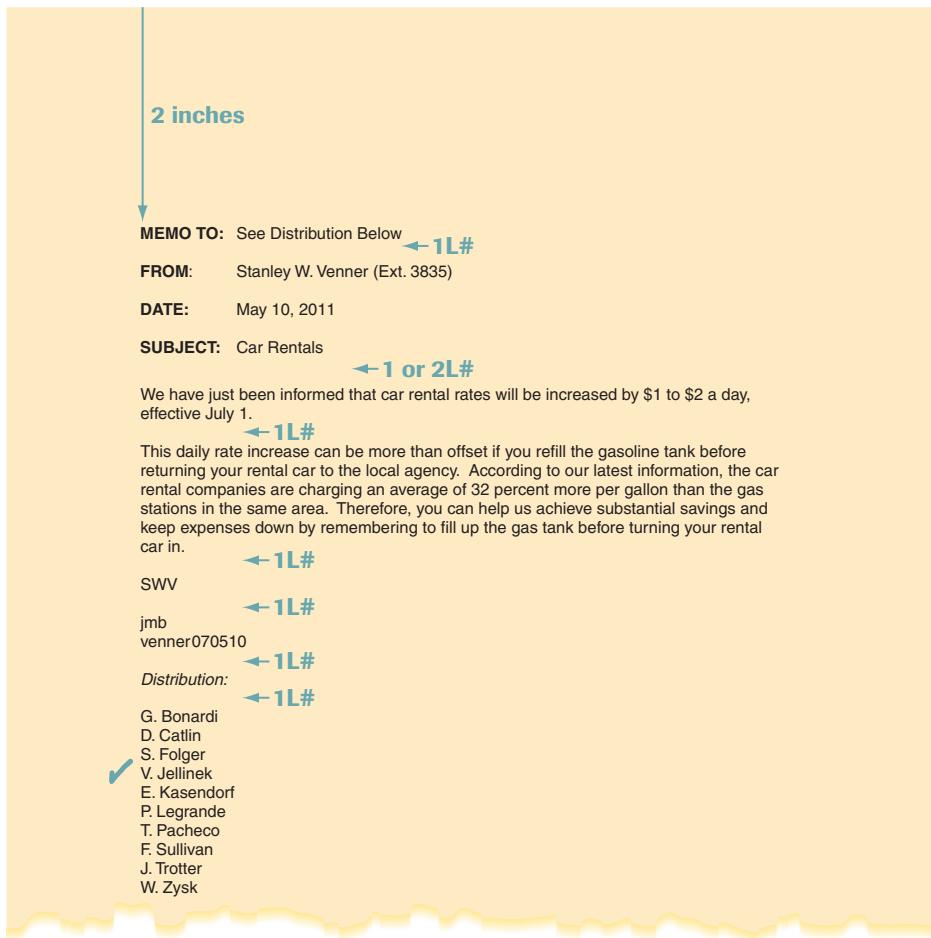

FROM: Neil Sundstrom

- j. If listing all the addressees in the heading of a memo looks unattractive or takes up too much space, then after the guide words *Memo To* or *To*, type *See Distribution Below* or something similar (see the illustration on page 492). Leave 1 blank line below the reference initials, the file name notation, or the enclosure notation (whichever comes last), and then type *Distribution*. Use caps and lowercase, followed by a colon, and italicize or underline the word for emphasis. (If you use italics, italicize the colon as well. If you underline, do not underline the colon.) Leave 1 blank line and then list the names of the individuals who are to receive a copy of the memo. Arrange the names either by rank or in alphabetic order, and type them blocked at the left margin. (If space is tight, arrange the names in two or more columns.)

NOTE: If you are distributing printed copies of the memo, simply place a check mark next to one of the listed names to indicate who is to receive that particular copy. As an alternative, use a highlighting marker to identify the recipient of each copy. If you are distributing the memo as an e-mail attachment, type the names of all the recipients in the e-mail heading; this will ensure that each person receives a copy. However, retain the distribution list in the memo itself so that these names will appear on a printed copy of the memo.

- k. If the fill-in after the guide word *Subject* is long, type it in two or more single-spaced lines of roughly equal length. Align all turnover lines with the start of the first line of the fill-in. (For illustrations, see pages 522–624.)
- l. Leave 1 or 2 blank lines below the last line in the heading, and begin typing the body of the memo. (The illustration on page 492 shows the use of only 1 blank line between the heading and the body of the memo. The illustrations at the top of pages 489 and 490 show the use of 2 blank lines.)

¶1374

NOTE: An interoffice memo ordinarily does not require a salutation, especially if the memo is an impersonal announcement being sent to a number of people or the staff at large. (See the illustration above.) However, when a memo is directed to one person (as in the illustration on page 490), use a salutation—such as *Dear Andy* or *Andy* alone—to keep the memo from seeming cold or impersonal. (If a salutation is to be used, leave 1 or 2 blank lines below the last line in the heading and begin typing the salutation. Then leave 1 blank line below the salutation and begin typing the body of the memo.)

- m.** Use single spacing and either block the paragraphs at the left margin or indent the first line of each paragraph 0.5 inch. Leave 1 blank line between paragraphs.

NOTE: If a list appears in the body of a memo (as in the illustration on page 490), it will require special treatment. For detailed guidelines, see ¶1345c–e.

- n.** Although memos do not require a signature line, some writers prefer to end their memos in this way. In that case, leave 1 blank line below the last line of the

message and type the writer's name or initials at the left margin (as shown in the illustration at the top of page 492). If the writer plans to insert a handwritten signature or initials above the typed signature, leave 3 blank lines below the last line of the message to allow room for the handwriting (as shown in the illustration at the top of page 489). If the writer simply inserts handwritten initials next to the typed name in the heading (as in the illustration on page 490), omit the signature line altogether.

- o. Leave 1 blank line after the end of the message or the writer's typed name or initials (whichever comes last), and then starting at the left margin, type the reference initials (see ¶1355). (See the illustrations at the top of pages 489, 490, and 492.)
- p. Type a file name notation (if needed) on the line below the reference initials. (See ¶¶1356–1357 and the illustrations on 489, 490, and 492.)
- q. Type an enclosure notation (if needed) on the line below the reference initials or the file name notation, whichever comes last. (See ¶1358.)
- r. Type a copy notation (if needed) on the line below the reference initials, the file name notation, or the enclosure notation, whichever comes last. Use the same style for the copy notation as in a letter. (See ¶¶1361–1364.) If the recipient of the memo is not intended to know that a copy of the memo is being sent to one or more other persons, use a blind copy notation. (See ¶1362.)
NOTE: As an alternative, place the copy notation in the heading. (See the illustration on page 490.) On the second line below *To* or *Memo To*, insert the guide words *Copies To* and then insert the appropriate names at the right, starting at the same point as the other fill-ins in the heading.
- s. If the memo is of a confidential nature, type the word *Confidential* in bold caps. Center the confidential notation on the second line below the last line of the memo heading.

← 1L#

CONFIDENTIAL

← 1 or 2L#

Begin typing the body of the memo on the second or third line below this notation. (See ¶1374.)

- t. If the memo continues beyond the first page, insert a continuation heading on a new sheet of paper. The continuation heading typically consists of the name of the recipient, the page number, and the date. (See the illustrations in ¶1366.) Some writers prefer to use the subject of the memo in place of the name of the recipient, especially when more than one memo is being sent to the same person on the same date. Moreover, when a memo is addressed to several persons, using the subject in the continuation heading eliminates the problem of trying to accommodate everyone's name in the heading. (See the illustration in ¶1366f.) Leave 1 or 2 blank lines between the continuation-page heading and the message. (See ¶1366 for additional details on continuing the message from one page to another.)

¶1375

E-Mail

The volume of e-mail messages continues to grow at an explosive rate—and for good reason. The use of e-mail eliminates the time lag involved in sending documents by regular mail (also known as *snail mail*), and it avoids the expense of sending documents by express mail. It also does away with the frustration that results from playing telephone tag (leaving messages but never connecting).

The following guidelines (¶¶1375–1389) suggest how to make the best use of what this technology has to offer.

The Nature of E-Mail

- 1375** a. The term *e-mail* refers to a way of transmitting messages electronically. In that sense it is an alternative to snail mail, express mail, and faxes. Whether we say we want “to send a report by *e-mail*” (using the term as a noun) or “to *e-mail* a report” (using the term as a verb), we are referring to e-mail as a mode of transmission.
- b. The term *e-mail* can also be used to describe messages that are formatted by means of a special template. Thus it is quite acceptable to say, “I received three *e-mails* from Tony LaBalme today.”

NOTE: As a way of preserving the distinction between these two meanings, the following discussion will use *e-mail* to refer to the mode of transmission and *e-mail message* to refer to a document formatted in a special way.

- c. Not everything transmitted by e-mail has to make use of an e-mail template. Letters typed on a letterhead template, messages typed on a memo template, as well as reports, contracts, itineraries, and many other types of documents are often sent by e-mail. However, special precautions are required in order to preserve the original formatting of these documents. (See ¶1385.)

► *For an illustration of the e-mail template provided by Outlook Express, see page 497.*

- 1376** a. Many people consider e-mail to be a *very informal* means of communication, and therefore they assume that e-mail messages do not have to comply with the normal standards of written English. This assumption is reflected all too often in hastily written messages that are badly organized and ridden with errors in spelling, grammar, usage, and style. If there were a motto for this style of e-mail composition, it would be “Anything Goes.”
- b. The “Anything Goes” approach may be acceptable in one’s personal e-mail messages, but business communications are business communications, no matter how they are sent—by e-mail, fax, or snail mail.

- c. E-mail messages can range from the extremely formal to the extremely informal as specific circumstances dictate. When making initial contact with someone outside your organization, it is appropriate to write more formally. Once you have established a friendly relationship with this person, your subsequent exchanges can become more informal. By the same token, your e-mail messages to higher-level managers will be more formal unless a relationship is established that permits a more casual approach. But even when circumstances warrant a less formal style, this does not mean that you can ignore the rules for grammar, usage, and style.
- d. In short, if you are writing as an individual on your own behalf, you can be as casual and as sloppy as you wish. But when you write e-mail messages on behalf of the organization you work for, you must observe all the standards that apply to other forms of business communications.
- e. Always remember that every e-mail message written on an organization's equipment belongs to that organization. If higher management decides that the contents of an e-mail message are improper, the writer can be disciplined or even fired. Also keep in mind that e-mail messages produced as evidence in civil lawsuits have led to judgments against organizations. An e-mail message has even been the basis for convicting the writer of the message of a crime. Be very careful not to put anything in a message that could have damaging consequences for you or your organization.
- f. Even though you intend an e-mail message to be read only by the recipients you have specifically named in the heading, you cannot be sure that others will not have access to your message. Therefore, never put anything in an e-mail message that will embarrass you if the message is read by anyone other than the designated recipients.

1377

E-mail messages sent on the Internet can be distributed through local and wide area networks, bulletin board systems, and online services. Procedures for sending and receiving e-mail messages will therefore differ, depending on the system you use. Even the construction of mailing addresses will vary as a result.

- a. An e-mail address consists of several elements. Here are a few examples:

toddwaltz@aol.com

info@amazon.com

marthalynch@bellsouth.com

subscriptions@wired.com

- (1) The address begins with a *user name* (the distinctive name used to sign on to an e-mail system). For example, a person named Rita J. Bella might use *ritajbella*, *rita.bella*, *rita_bella*, or *rbelia560*. An organization might use the name of a position, a department, or a function as a user name (for example, *info* or *customer service*).
- (2) The user name is followed by the symbol for *at*—@—which is sometimes referred to as a “strudel” because of its resemblance to a type of rolled pastry.

¶1378

(3) The final element of an e-mail address is called the domain name and consists of two parts: the name of the host computer, followed by a dot and a top-level domain (TLD), which indicates the type of organization that owns the host computer. If you use America Online, the final element will appear as *aol.com*; if you use BellSouth, the final element will appear as *bellsouth.net*. Many organizations have their own host computers; for example:

mcgraw-hill.com

cornell.edu

national.unitedway.org

senate.gov

NOTE: It is possible to create your own domain name—for example, one that is based on your personal name or the name of your business. You would then pay a company to host your domain on its server.

(4) The top-level domain is expressed in abbreviated form. For example, *.com* usually signifies a commercial enterprise, *.org* signifies a nonprofit organization, *.edu* signifies an educational institution, and *.gov* signifies a governmental institution. Here is a brief list of typical e-mail addresses:

info@wiredmag.com (*Wired* magazine)

doctors@newyork.msf.org (Doctors Without Borders)

webeditor@kellogg.northwestern.edu (Kellogg School of Management)

president@whitehouse.gov (the President of the United States)

► *For a full list of the top-level domains now in use, see ¶1508b.*

b. E-mail addresses may be typed in all-caps, in lowercase, or in some combination of the two. The use of lowercase is simplest. As a rule, you may lowercase an e-mail address that the user has chosen to capitalize. However, in rare cases a host computer may not recognize an e-mail address unless the user name is typed in the style established by the user. To be sure that a user will receive your e-mail, preserve the style he or she has given you. In any case you may lowercase the domain name without fear that your e-mail will go astray: domain names are never case-sensitive.

c. Never alter the spacing, the punctuation, or the symbols that appear in an e-mail address.

► *For guidelines on how to divide a long e-mail address at the end of a line, see ¶1510b.*

E-Mail Netiquette

1378 *Netiquette* is the name given to a code of behavior for people who send and receive e-mail messages. Upon first hearing, the term suggests the electronic equivalent of a set of fussy rules that tell you, for example, which fork to use with the salad course. But netiquette does not consist of a set of rigid rules. It encourages you to adopt a certain attitude of thoughtfulness—to be more considerate of the people you

write to, to protect the privacy of their e-mail addresses, to avoid burdening them with messages they do not need to see. And netiquette is more than a matter of good manners. It can help you create messages that are more likely to achieve the results you want.

As you consult the following guidelines for such topics as filling in the heading of an e-mail template, composing the message, and responding to messages, you will find netiquette considerations at every point.

Filling In the Heading

The e-mail template consists of nothing more than a heading that serves to organize some basic information about the recipients of the message and the nature of the message. Here is an illustration of the e-mail template provided by Outlook Express.

1379 The Recipients

When you are sending a message to only one person, simply enter that person's name in the *To* box. If the person's name is not included on your *Contacts* list (where it is linked to that person's e-mail address), you will have to enter the e-mail address rather than the person's name.

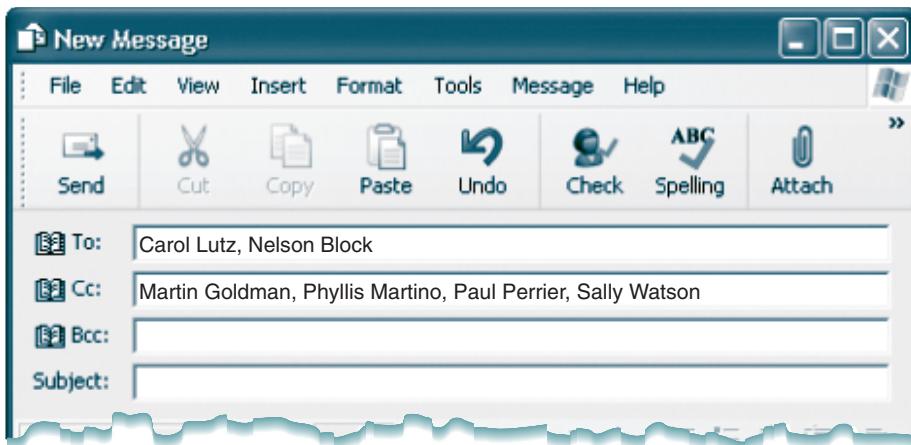

To: Adam Stamm **OR:** To: adamstamm@verizon.net

When you are writing to a number of people, a key netiquette issue is whether or not to permit all the recipients to see one another's e-mail addresses.

- a. If the message will be distributed to members of the same organization or association or if the designated recipients all know one another, exposing each person's e-mail address to the others poses no problem:

Continued on page 498

1379

- (1) In the *To* box, enter the names of those for whom the message is primarily intended. Separate the names with commas or semicolons.
- (2) In the *Cc* box, enter only the names of those who have a genuine need to see this message. Resist the impulse to copy everyone on your mailing list.
- (3) In the *Bcc* box, enter the names of those who are to receive a blind copy (one that the other recipients do not know about).

NOTE: As a general rule, it is bad policy to send blind copies to others in your organization. Doing so not only damages a desirable climate of direct and open communication among colleagues; it ultimately damages the reputation of anyone who is discovered to be sending *bcc*'s on a routine basis.

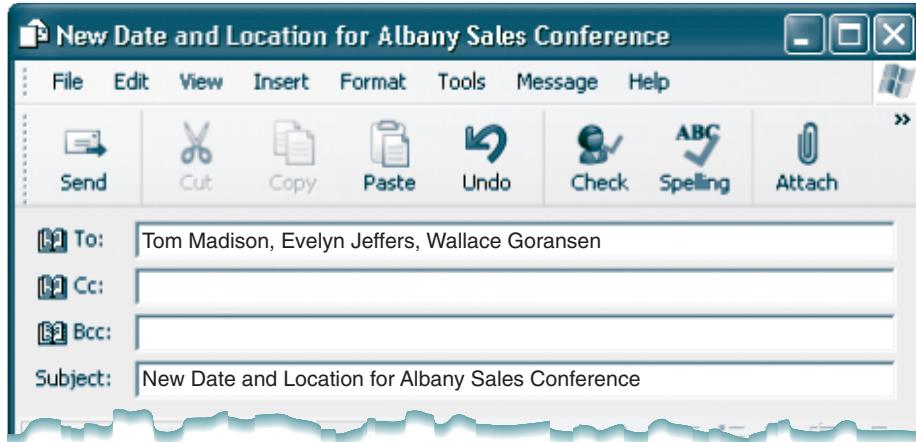

- b.** When your message is intended for people who do not know each other, your message, upon arrival, will display the e-mail address of every recipient. These recipients may not be pleased to see their privacy invaded in this way (however unintentionally). To avoid this problem, enter all the names in the *Bcc* box. In this way you protect their privacy. When each person receives your message, the *To* box will simply say "Undisclosed Recipient" or something similar.

- c. Under certain circumstances, you may want all the recipients to know one another's names without revealing their e-mail addresses. In this case, you would still enter all the recipients' names in the *Bcc* box, but at the end of the message, provide all the recipients' names in a distribution list, just as you would at the end of a memo. (For an illustration of a distribution list, see page 492.)
- NOTE:** Your user's manual may provide another technique for displaying all the recipients' names without revealing their e-mail addresses.
- d. Experienced users of e-mail know the risk of accidentally sending a message before it is ready to be sent. To avoid this possibility, follow their example: do not enter anything in the *To*, *Cc*, or *Bcc* box until you are satisfied with what you have written and have checked it for spelling, grammar, and other types of errors.
- e. As a general rule, keep the distribution of your e-mail messages to a minimum. Given the ease of transmitting messages to everyone on your mailing list, you could be sending copies to people who don't need to see them and thus be adding to their e-mail overload.

1380 The Subject Line

- a. In the *Subject* box, insert a concise title that accurately describes your message. The recipient of a great many messages scans the subject lines quickly to determine which messages require the fastest action. Therefore, use wording that will get you the attention you want.

NOTE: Some writers prefer to capitalize only the first word in the subject line plus any proper nouns; for example, *New date and location for Albany sales conference*.

- b. To attract special attention, insert a special symbol (such as !) alongside your subject line. However, use this symbol sparingly and only when sending something really urgent. Otherwise, your recipients may conclude that you have an exaggerated sense of what is urgent, and they may not give immediate consideration to subsequent messages that are truly urgent.

¶1381

NOTE: Some e-mail programs allow you to specify the priority status of your messages—from very high to very low. For example, Outlook Express provides high- and low-priority indicators.

Composing the Message

1381 The Salutation

- a. An e-mail message (like a memo) does not require a salutation, especially when (1) the message is being distributed to a number of people within your organization or (2) the message consists of an impersonal announcement about a change in policy or procedure.
- b. A salutation is desirable, however, when your message might otherwise strike the recipient as cold and impersonal.
- c. When you are writing to someone you know, the salutation can take a number of forms and it may be followed by a comma rather than a colon. For example:

Doug, Dear Doug, Good morning, Doug, Hello, Doug, Hi Doug,

Strictly speaking, there should be a comma after *Hi* in *Hi Doug*, but to insist on a comma in a salutation so brisk and breezy is to carry grammatical correctness to an extreme. (For a comment on grammatical correctness, see the introduction to Section 10 on page 296.)

NOTE: As an alternative to inserting a salutation on a line by itself, you can incorporate the person's name in the opening of the message.

You're right, Doug. I goofed.

- d. When you are writing to someone you don't know or someone with whom you still have a formal relationship, use a formal salutation and follow it with a colon. For example:

Dear Ms. Ballantine: **OR:** Dear Frances Ballantine:

- e. When you are writing to a group of colleagues or friends, informal salutations like the following are appropriate.

Hi all, Hi everyone, Hi everybody,

► *For a list of appropriate salutations, see ¶1339.*

1382 The Message

Before composing an e-mail message, keep in mind that your intended recipient may have been traveling for several days or may simply have been away from the computer all day. Upon turning on the computer, this person may be confronted with more than 100 e-mail messages that have piled up each day in the interim. Many recipients report increasing frustration over the time it takes to read each day's e-mail messages, especially if many of those messages represent *spam*, the electronic equivalent of junk mail. To avoid frustrating the recipients of your e-mail messages, consider the following netiquette factors as you write.

- a. Keep the message as short as possible.

NOTE: Some authorities recommend limiting the line length in your e-mail messages to 70 or 80 characters. Doing so may have no effect on how your message

appears when it is received—or it may, in fact, yield strange line breaks in the recipient's copy—since the recipient's e-mail program may very well reformat your message automatically.

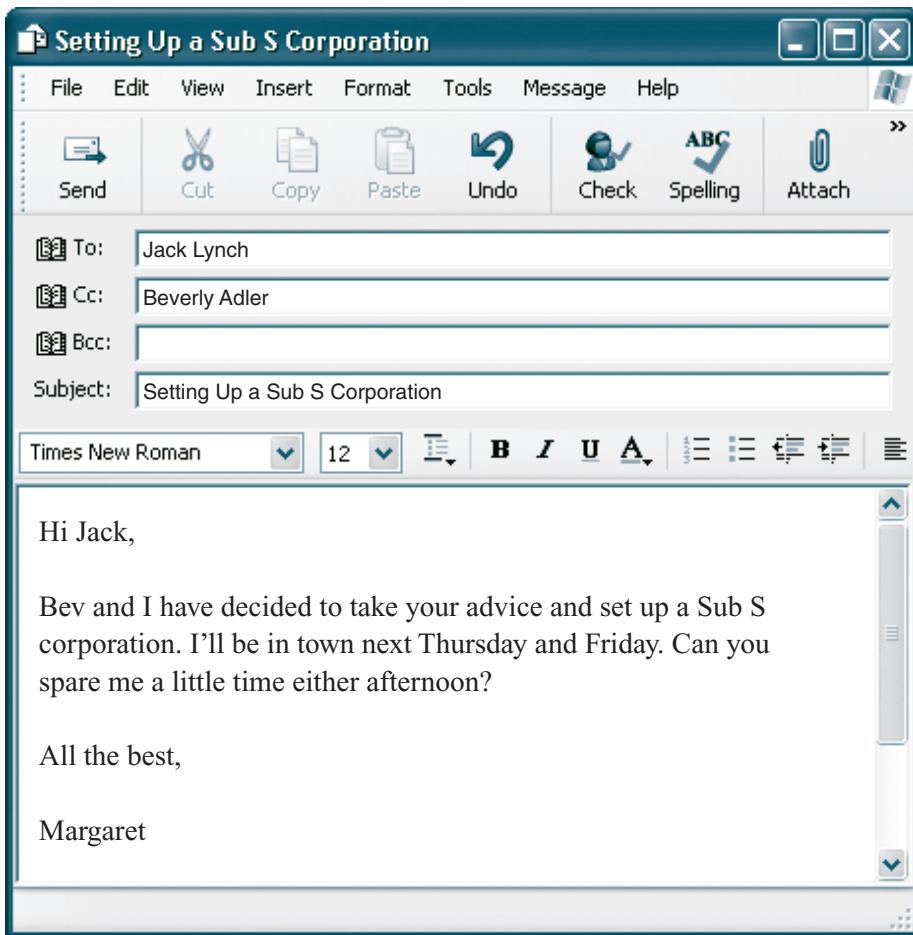

- b. Organize your sentences in short, single-spaced paragraphs to make your message easier to understand. Do not indent the opening line of each paragraph, but do leave 1 blank line between paragraphs.
- c. Try to keep the message focused on a single topic. If you have several topics to discuss, it is often better to create a separate e-mail message for each topic than to cram them all into one message. On the other hand, if you simply want to briefly discuss a couple of closely related topics (for example, a change in the time of a meeting and an addition of an item to the agenda), it is quite acceptable to include them in the same message, but it would be helpful to refer to both topics in the subject line.
- d. If it is necessary to cover several topics in the same message and the message becomes fairly long as a result, discuss the topics in separate paragraphs and use a side head or a run-in head for each topic. In that way the recipient can see at a glance what the total message covers. (For heading styles, see ¶¶1425c, 1426.)
- e. If you are asking a number of specific questions and each requires a separate response, put them in separate paragraphs. In this way the recipient can easily insert a comment directly after each question and thus be spared the need to write a long, connected message that has to restate each question in the process of providing an answer. (For a further discussion and an illustration of this technique, see ¶1386c.)
- f. You may have to provide some background information so that your recipient will understand your message. Resist the temptation to provide more than is necessary.
- g. Watch your tone as you compose the message. Before you send it, read the message from the recipient's point of view to make sure that the tone you have used is not likely to affect the recipient in ways you did not intend. If you are not confident about the tone of what you have written, wait a day and then reread the message with some detachment. You may find that it needs further work.
- h. Do not send a message composed in anger (an act known as *flaming*). Moreover, if you receive *flames* (angry messages), it is wiser to ignore them than to respond in kind.

NOTE: If you have composed a message in anger, let it sit in your *drafts* folder for a day and reread it in a calmer frame of mind. You may be glad you still have a chance to rewrite the message and tone it down.

- i. Do not use e-mail messages to make critical comments about your colleagues or the people you work for. Such comments have a way of leaking out and becoming common knowledge. When this happens, the writer is sure to be seriously embarrassed and may even be fired as a result.
- j. Never use e-mail messages to deliver negative assessments to the people who work under your supervision. These assessments are sensitive and highly confidential matters, and it is not appropriate to communicate them in an e-mail message.

¶1382

E-Mail Message Sent

- k.** Put nothing in an e-mail message that you do not want anyone other than the intended recipient to see. For example, do not provide confidential information that could wind up in the wrong hands—items such as your social security number, your credit card numbers, and your bank account numbers.

Remember: The privacy of the e-mail messages you send cannot be guaranteed. Indeed, e-mail messages should never be considered private. (See ¶1376e.)

- l.** Do not type your message in all-caps (a practice considered to be the equivalent of shouting) or all in lowercase. Either approach will make your message hard to read.
- m.** E-mail writers sometimes rely on special abbreviations to shorten their messages. For example:

CUL

see you later

IKWUM

I know what you mean

OTOH

on the other hand

LOL

I'm laughing out loud at

BTW

by the way

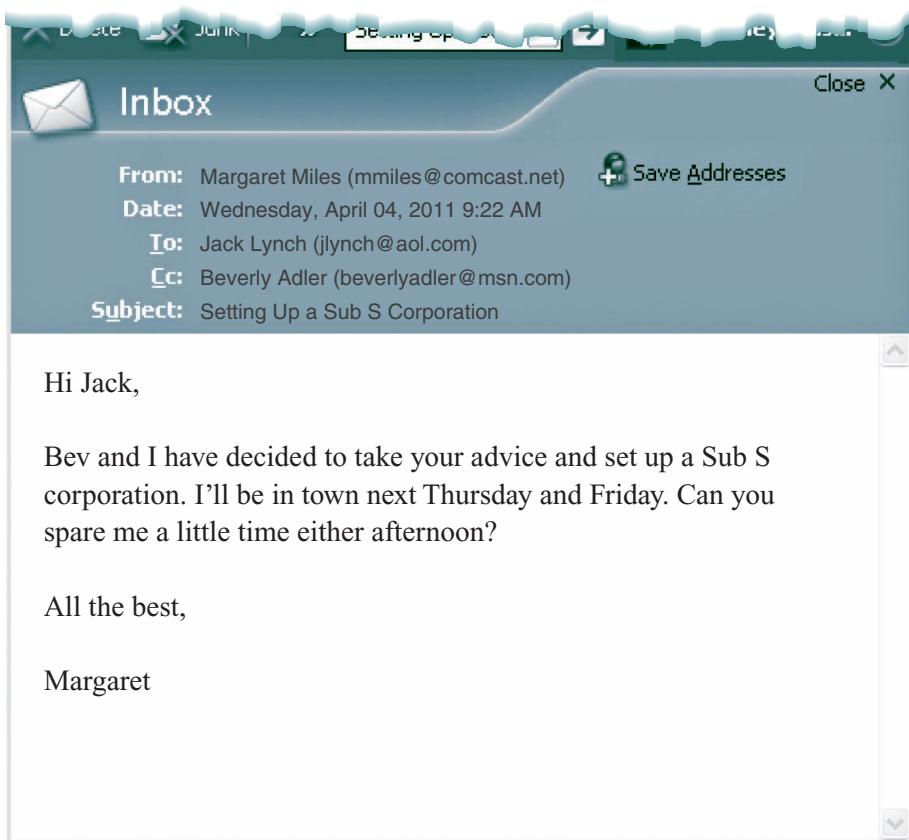

what I just read

IMHO	in my humble opinion	ROFL	I'm rolling on the floor
FWIW	for what it's worth	WDYT	laughing at what I just read
IYSWIM	if you see what I mean	HTH	what do you think
IIRC	if I remember correctly	TTYL	hope this helps
IDGI	I don't get it	S!MT!!OE!!!	talk to you later
AFAIK	as far as I know	ONNA	sets my teeth on edge
DQMOT	don't quote me on this	MIGA	oh no, not again
DEGT	don't even go there	NOYB	make it go away
BTDT	been there, done that		none of your business

NOTE: Use abbreviations like these only in informal e-mail messages, text messages, and instant messages. (See ¶1390.) They are never appropriate in business correspondence.

- Some e-mail users like to insert *smileys* [for example, :-)] in their messages to indicate their feelings about what they are writing. Smileys are acceptable in personal messages, but they are usually inappropriate in business messages.
- For a further discussion of this issue, go to <<http://www.gregg.com>> and see the entry for Smiley in Appendix D, the Glossary of Computer Terms.

E-Mail Message Received

¶1383

- o.** When a Web address is provided, it is customary these days to omit *http://*; some organizations even omit *www*. However, if you are including a Web address in the message itself, provide the complete URL if you want to be sure that anyone clicking this address will easily get to the Web site.

NOTE: If you are writing for readers who may not be fully knowledgeable about URLs, it is generally safer to provide the complete URL. Moreover, if the address uses a different protocol (such as *ftp://*), the entire URL must be included. (For a further discussion of protocols in URLs, see ¶1508.)

- p.** Edit and proofread each message carefully, and make the necessary corrections before sending the message. (For a suggestion on how to avoid accidentally sending the message before you intend to, see ¶1379d.)

NOTE: Because e-mail messages are usually composed on the computer, it is easy to make (and overlook) mistakes in grammar, usage, spelling, and style. (See ¶¶1202–1204.) Make use of spelling and grammar checkers, but do not assume that they will catch all the mistakes. You still bear that ultimate responsibility. (See ¶1205.)

1383 The Closing

- a.** If the message did not require a salutation, no closing is necessary.
- b.** If the salutation consisted simply of the recipient's first name (*Doug*), the closing can consist simply of the writer's first name (*Linda*).
- c.** If the salutation consisted of a phrase such as *Dear Doug*, *Hello, Doug*, or *Hi Doug*, an informal closing such as *All best regards* or simply *Best* is recommended but not required.
- d.** If you used a formal salutation (such as *Dear Ms. Ballantine* or *Dear Frances Ballantine*), use a formal closing such as *Sincerely*.
- e.** Leave 1 blank line after the end of the message, and type the closing at the left margin.

► For a list of salutations for use in different circumstances, see ¶1339.

1384 The Writer's Signature Block

- a.** On the second line below the closing, type the writer's full name or first name, depending on the formality of the situation. This is all that is required on e-mail messages intended for distribution within your own organization.

Martha Featherstone **OR:** Martha

- b.** In messages written on behalf of your organization and intended for recipients with whom you have an established relationship, you can provide just your first name. As a convenience to these recipients, you may also want to include your phone and fax numbers and your e-mail address.

Martha

tel: 707.555.4158

fax: 707.555.4258

marthaf@netsearch.com

¶1385

- c. In messages intended for all others, provide the following items on separate lines: your full name, your title, the name and mailing address of your organization, your phone and fax numbers, your e-mail address, and your organization's Web address. If you put all of this information in a *signature file* (also known as a *.sig file*), it will be automatically added to all of your e-mail messages.

NOTE: If you include a Web address in the signature block, be sure to provide the complete URL. Doing so will be a convenience for the recipients of your messages, since your organization's Web site will now be only one click away.

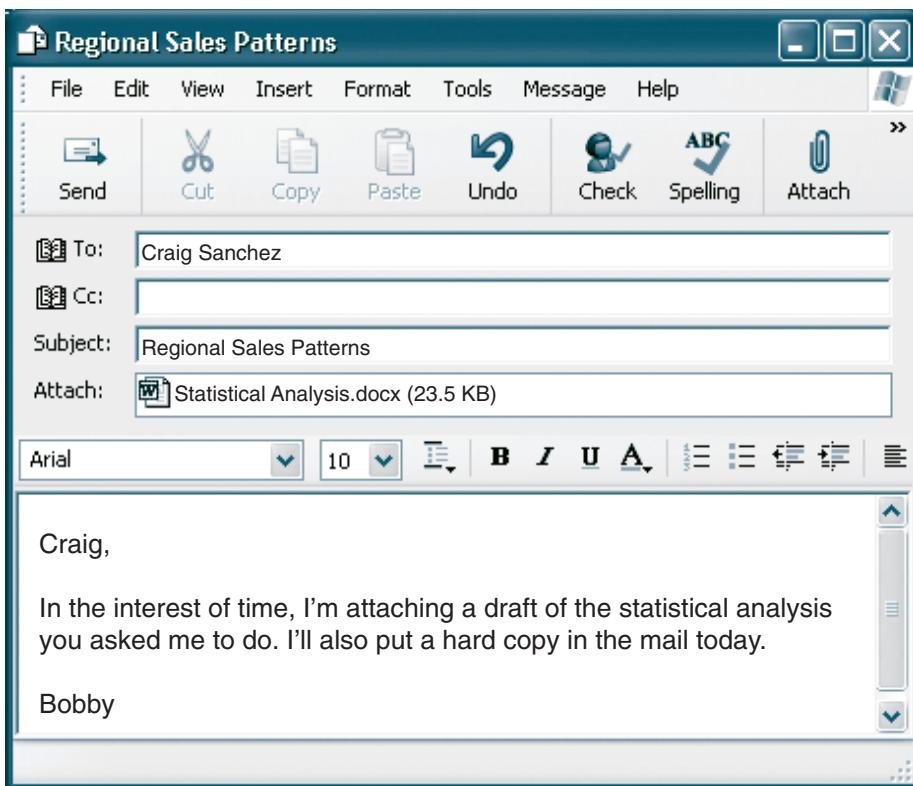

- d. Some organizations require their employees to include a brief statement that describes the organization's mission. Other organizations require the automatic use of a confidential notation at the end of every e-mail message; for example:

This e-mail may contain confidential material. If you were not an intended recipient, please notify the sender and delete all copies.
We may monitor e-mail to and from our network.

- e. When you write personal e-mails, how much contact information you provide will depend on the circumstances. If you are self-employed and want to inform others about the professional services you offer, provide the following items on separate lines: your full name, your mailing address, your phone and fax numbers, your e-mail address, and a brief statement describing the services you offer.
- f. To simplify matters in your business e-mail messages, put your complete contact information in a signature file (as described in ¶1384c). You can always remove any item that is not appropriate for a particular situation. You can also prepare a signature file for your personal e-mail messages, but leave out any items that you do not want to share on a routine basis with the recipients of these personal messages. Otherwise, you risk making yourself vulnerable to invasions of your privacy. In many cases, you may want to end your personal messages simply with your name.
- g. As a result of the Electronic Signatures in Global and National Commerce Act (E-SIGN) enacted in 2000, organizations and individuals may insert electronic signatures in their e-mail messages and attachments to enter into legally binding contracts without the need to exchange hard-copy documents signed by hand. For further information about E-SIGN, do an Internet search using "electronic signatures" as the keyword.

Sending Attachments

- 1385** a. One of the limitations of e-mail is that you cannot be sure how your message will appear on your recipient's computer. The font and the line length may be different from those on your computer, and any formatting you applied to your message may be lost or distorted in transmission. Whenever it is essential to preserve the format of your original message, send it as an attachment to a brief cover note. (It is this cover note that represents the actual e-mail message.) In this way you can safely transmit letters or material that contains tables or charts and other graphics.

1385

- b.** Before you send an e-mail message with an attachment, make sure that the recipient will open it. Some people refuse to open attachments out of fear of infection by computer viruses. Others find it difficult or even impossible to open attachments because of the incompatibility of e-mail software. If timing is critical and your recipient is unwilling or unable to deal with attachments, send the materials by fax.
- c.** Avoid sending overly large attachments, including those that contain complex graphics, unless you are sure that the recipient is able to download such attachments quickly and easily. If the recipient has an older computer or lacks high-speed access to the Internet, a large attachment can take a very long time to download. The downloading process may prevent the recipient from sending or receiving e-mail; it may cause the recipient's computer to crash.
- d.** It is often a toss-up whether to send documents as e-mail attachments or as faxes. In both cases, they are speedily transmitted and the format of the documents is preserved. However, if the fax machine is situated in a central location and not adjacent to the office of the recipient, delivery of the documents may be delayed. By contrast, documents sent by e-mail quickly arrive at the recipient's computer terminal. However, if there is a problem with opening these attachments, then the use of e-mail loses its advantage.

e. If you indicate in your message that you are including an attachment, be sure to attach the promised document. One of the most common mistakes that e-mailers make is to complete the message and click *send*, forgetting to add the attachment.

► *For guidelines on handling a confirmation copy of an e-mail message already transmitted, see ¶1360.*

Responding to Messages

1386 a. To respond to a message, click *reply*. The sender's name will automatically appear in the *To* box. The sender's subject line will appear in the *Subject* box preceded by *Re*.

NOTE: If the original message was sent to several people, you must decide whether your response should go only to the sender or to everyone else as well. When you consider how many e-mail messages you yourself receive every day, do not add to the burden of others with a copy of your response unless they really need to know what you've said.

b. It is customary to type the response in the space above the sender's message. However, it is quite acceptable for the response to follow the sender's message, especially when your response begins with a reference to something that came at the end of the sender's message. Consider using a different font or a different color (or both) if it is necessary to distinguish your response from the original message.

NOTE: If you are concerned that the recipient may not realize that you've placed your response below the original message, insert a brief note at the outset—for example, "Please see my response below."

c. When the original message contains a number of different matters that you are expected to respond to, you would ordinarily compose a unified response in which you cite each of these issues and address them in turn. However, if the occasion allows for an expedient and informal approach, simply type a brief acknowledgment in the space above the original message and then insert your answers directly after each question within the original message. Doing so will save you time and make it easy for the other person to spot your answers.

the date of the all-day seminar, unfortunately, will have to be changed. In rescheduling the seminar, it would help us to know which of the following Fridays works best for your group: September 22, September 29, October 6, or October 13? **The September dates won't work for us, but either of the October dates is fine.**

How many people from your organization will be attending? **12**

Would you like us to make hotel reservations for you, or would you prefer to make your own? **We'll make our own.**

1387

NOTE: Type your responses in a different font and in a different color to make them stand out. If you decide to insert a response within a paragraph rather than at the end, you may want to apply highlighting to your response to make sure it will stand out. As an alternative, after you have typed your insert, force the remaining copy in the original paragraph to a new line; that will ensure that your inserted response will not be overlooked.

- d.** When you click *Send*, your response plus the original message will normally be transmitted. In some cases, it is important to retain all of the original message in order to maintain a full record of the exchange. However, if it is not necessary to repeat all of the original message, delete everything that is not relevant to your response. As an alternative, paraphrase the original message as briefly as possible so as to limit the overall length of this expanded message.
- e.** In some cases, your response will generate a response from the writer and may indeed turn into a back-and-forth conversation of some length. Here again, preserve the entire sequence of messages only if it is important to retain a full record of the exchange. Otherwise, retain only what is essential from the past exchanges to give a context to your most recent response. Be sure that the original subject line is still relevant. If not, reword it to reflect the current topic under discussion.
- f.** Do not reply to spam or ask to be dropped from the spammer's mailing list. By doing so, you will let the spammer know that your e-mail address is valid; moreover, this action is likely to generate more spam from the same source. Simply delete the spam or arrange to have all future messages from this source automatically blocked.
- g.** If the person who sends you an e-mail message specifically asks for confirmation that you've received it, by all means provide that confirmation. However, resist the temptation to acknowledge receipt of every message sent to you.

1387

- a.** When you have been away from your computer for most of a day or for several days, you may well find a mind-numbing accumulation of messages awaiting you. The normal approach is to read and respond to them in the order in which they were received. However, this may not be the most efficient way to proceed.

Suppose you send a response to a message from Jessica Foley and then discover (as you proceed down the line) an earlier message from Jessica that has a bearing on the situation. Or you may find a message from a third party that affects what you wrote to Jessica. Such discoveries will require you to send Jessica a second message that amends your original response. To avoid this situation, always scan the subject lines of all the other messages to see whether any of them might have a bearing on the response you are about to write.

NOTE: If you click the heading of the *From* column, you can more easily spot all the related e-mails you have received from a particular person. If you click the heading of the *Subject* column, you may be able to see whether someone else has commented on this same matter and you can take that comment into account when composing your response.

- b.** When you are faced with a substantial backlog of messages, try the following technique: First scan all your messages and delete everything that represents spam; this will greatly reduce the number of messages you have to deal with.
- NOTE:** If you rely on spam filters to block inappropriate messages, check from time to time to make sure that they are not accidentally blocking any e-mail messages that you would not want to be treated as spam.
- c.** Next determine which of the remaining messages have the highest priority and respond to those first. To establish those priorities, scan the subject lines of these messages and the names of those who sent them. Certain messages (like those from your boss or the head of your organization) usually require immediate attention, even when the substance of their messages is relatively unimportant.
- d.** Then respond to the mail most recently received and proceed to work backward from there. This strategy allows you to demonstrate how good you are at responding promptly to those who wrote to you earlier today or yesterday. Those who wrote to you before then already know they are not going to get a prompt response.

Forwarding Messages

- 1388** **a.** Before you forward a message you have received, ask yourself whether the person who wrote it would like other people to read it. The message may contain confidential statements that were intended only for your eyes. If you are not completely sure that it is safe to proceed, do not forward the message—or at least don't do so without first consulting the writer.
- b.** The situation is different when you receive a message that has already been widely distributed a number of times and you are part of the next generation of recipients. It is too late to consider whether the original source of the message wanted it to be forwarded. Now you must ask yourself whether this message is one that people on your mailing lists would welcome. The answer in many cases may be no. Already inundated each day with messages of a pressing nature plus an excessive amount of spam, some of your intended recipients may not be in the mood for trivial, time-wasting messages.
- c.** If you feel sure that your intended recipients will welcome a particular message, consider how much of the message to forward. Select only that part of the message that seems worth passing on, leaving out irrelevant parts of the original message as well as the lists of recipients from earlier distributions.
- d.** Jokes, consumer alerts, and other items of broad interest may have been forwarded a number of times before reaching you. If the item in question was initially presented as an attachment to an e-mail message and then repeatedly forwarded in that form, you will have to click through a series of attachments before you get to the original attachment. Keep this in mind when you want to forward some material that came to you as an attachment. Insert that material in a new e-mail message before forwarding it. In this way you will spare your recipients the frustration you may have had to endure.

Remember: It is rude and inconsiderate to require your recipients to click through a series of attachments to get to the actual material you want them to read.

Continued on page 510

1389

- e. Messages that have been forwarded several times typically display the names and e-mail addresses of people who never intended to have their addresses publicized in this way. Be sure to delete all of this material before you forward the original message to others.
 - f. If you are planning to forward a message to people who do not know one another, keep their names and e-mail addresses confidential by sending each of them a *bcc*. The heading of the copy they each receive may show “Undisclosed Recipient,” or it may show the name of the person sending the *bcc*.
- NOTE:** If your intended recipients are part of a close-knit group, do enter their names in the *To* box in the heading. They will then know who else received this message from you, and they will not be tempted to forward the message to members of the same group.
- g. Do not forward photographs and materials of a similar nature that typically take a long time to be downloaded. During that time, the recipient’s computer may be prevented from sending or receiving other messages.
 - h. If you forward an e-mail message that came with an attachment, the attachment will also be forwarded. If you reply to an e-mail message that came with an attachment, the recipient will not receive a copy of the attachment. If you want the recipient of your reply to see the attachment, you will have to copy the attachment from the original message and reattach it to your reply.

Saving Messages

1389 To avoid a needless accumulation of messages, empty your inbox frequently and delete anything that has no lasting value. Transfer all the messages worth saving to folders you have set up in your e-mail program. You may also save e-mail messages in your word processing program or in your My Documents folder. To save an e-mail message in a location other than your e-mail program, you must use the *save as* feature from the File menu.

Text Messages

1390 To many people, any reference to *text messages* conjures up an image of teenagers sending one another utterly trivial messages encoded in an indecipherable series of abbreviations. With an image like that in mind, one can reasonably ask whether text messaging has a role to play in a business office environment. Because text messaging is so frequently used for making personal social arrangements, some business managers suspect that those employees who send and receive these messages may not be performing their jobs. Yet if properly used in a business office, text messages can serve a very useful function.

Text messaging (often referred to simply as *texting*) is an electronic version of a telephone call that permits people to carry on a back-and-forth conversation by mobile phone without actually speaking to one another. A similar type of electronic

communication is referred to as *instant messaging* (sometimes simply as IM); these messages are transmitted over a computer network.

In a business office these types of electronic communication are particularly useful for dealing with spur-of-the-moment matters of some urgency—for example, trying to set up a meeting on short notice or notifying others of a last-minute change in the location and time of a meeting previously scheduled. Or you could be collaborating on a project and need some quick feedback on a confusing detail so that you can continue to press ahead without delay. Exchanges like these typically deal with ephemeral matters that do not ordinarily need to be retained as part of a permanent record (although they could be if you feel it is necessary). If messages of greater significance need to be exchanged electronically, e-mail is the preferred mode of communication.

The use of texting and IM should take place only between people who have made it clear to one another that they are quite comfortable with this way of communicating. They should also establish ahead of time the kinds of abbreviations they easily recognize—for example, BTW (by the way), TTYL (talk to you later), or IMHO (in my humble opinion). (For examples of similar abbreviations, see ¶1382m.) However, many people might have trouble deciphering the following message:

PMFJIB I need to say DBEYR. WYSITWIRL, IYKWIMAITYD *

Because speed is usually a primary concern in texting and IM, it is hard to insist that text messages observe all the rules of style. Thus it is not surprising that many senders of text messages type them all in caps or all in lowercase without punctuation, even though these stylistic features are readily available to the sender. Obviously, typing a message all in uppercase or lowercase makes the message more difficult to read, and omitting punctuation can create confusion or ambiguity that could otherwise be easily avoided. However, when sender and recipient are comfortable with these arrangements, then texting and IM can be useful means of exchanging messages when there is some element of urgency at stake. Do keep in mind that text messages will interrupt and distract the recipient from whatever he or she happens to be doing at the time. If you make a practice of bombarding a particular recipient with messages of no great urgency, you may find that you are no longer getting the speedy response you had hoped to elicit.

*Pardon me for jumping in but I need to say, don't believe everything you read. What you see is totally worthless in real life, if you know what I mean and I think you do.

Reports

Reports serve all kinds of purposes. Some simply communicate information—such as monthly sales figures or survey results—without any attempt to analyze or interpret the data. Others offer extensive analyses and make detailed recommendations for further action. As a result, reports come in all sizes and shapes. Some are done informally as memos or letters (depending on whether they are to be distributed inside or outside the organization). Some consist simply of fill-ins on printed or computer-generated forms. Many, however, are done in a more formal style. As you might expect, there is a wide variation to be found in what is considered acceptable—from one authority to another and from one organization to another. Regardless of which guidelines you follow, be prepared to modify them to fit a specific situation.

Establishing a Format

1401 You can use one of the templates provided by your software or create one of your own.

- a. Word processing software typically provides several report templates that you can choose from. A sample template provided by Microsoft Word 2007 is partially illustrated below.

The image shows a Microsoft Word document window with a yellow header bar. The main title is 'Type the document title' in large, bold, dark gray font. Below it is a subtitle placeholder '[TYPE THE SUBTITLE]' in smaller, orange font. The body of the document contains three sections of text:

- MEDIAN HEADING 1|ONE**: Describes how galleries coordinate with document look.
- Heading 2|two**: Describes how galleries coordinate with document look through Quick Styles.
- Heading 3|three**: Describes how galleries coordinate with document look through Page Layout tab settings.

A callout box highlights the second section with the text: "The quote is bold and distinctive. The galleries include items that are designed to coordinate with the overall look of your document."

At the bottom of the page, there is a decorative yellow wavy border at the bottom.

1401

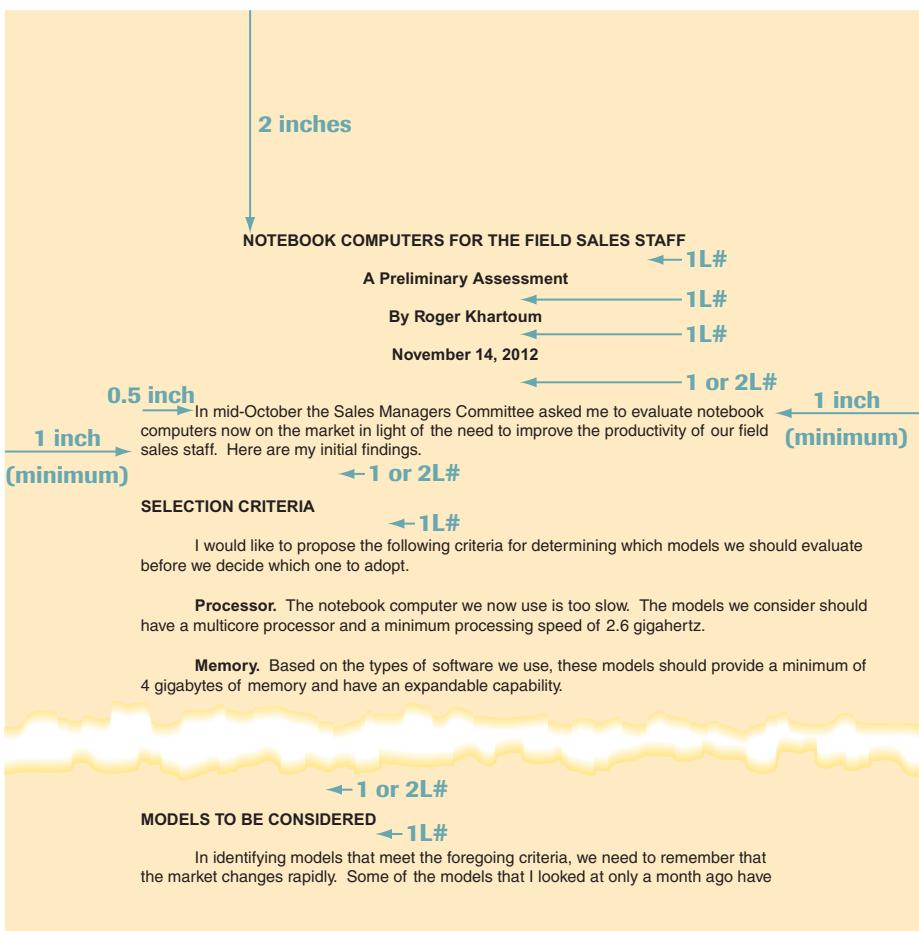

- b.** Section 14 provides guidelines for creating templates for formal and informal reports. The illustration on page 515 shows how the first page of an informal report would appear if executed according to these guidelines.
- c.** The illustrations in Section 14 use the following system of notations to indicate how many blank lines to leave between the different elements of a report. The instruction to leave 1 blank line, for example, means “Begin typing the new element 2 lines down from the previous element.”

← 1L#	Leave 1 blank line.*
← 2L#	Leave 2 blank lines.
← 1 or 2L#	Leave 1 or 2 blank lines.†
← 3L#	Leave 3 blank lines.
← 4L#	Leave 4 blank lines.
← 5L#	Leave 5 blank lines.

*How you create 1 blank line between lines of type will depend on your word processing program. Microsoft Word 2007, for example, leaves 1 blank line when you press *enter* once; Microsoft Word 2003 leaves 1 blank line when you press *enter* twice.

†To conserve space or create a more condensed appearance, leave only 1 blank line. Leave 2 blank lines to create a more open appearance and enhance the readability of your document. The illustrations in Section 14 reflect the more open, more readable effect you may achieve by leaving 2 blank lines between elements in those situations where you have a choice between leaving either 1 or 2.

- d.** If you are preparing a report at the request of someone else, always try to get some guidelines from that person on such matters as format, length, amount of detail desired, and distribution. Check the files for copies of similar reports done in the past. If guidelines or models are not provided or if you are preparing the report on your own initiative, consider the following factors in choosing a format.
 - (1) For whom are you writing the report?** If intended for your boss or a colleague on staff, the report could be done simply as a memo. If intended for top management or the board of directors, the report will often require a more formal approach. By the same token, an academic term paper will require a simpler format than a thesis for an advanced degree.
 - (2) What outcome do you hope to achieve?** If you are merely providing information without attempting to win someone over to your point of view, the simplest and clearest presentation of the information will suffice. If you are trying to persuade the reader to adopt your viewpoint and accept your recommendations, you may need to make a detailed argument and devise a more complex

► For additional guidelines on spacing above heads, see ¶1426.

structure for your report. For example, you may need to develop a number of chapters, grouped by part. If you need to demonstrate that your argument is supported by much detailed research, you may have to quote from published sources and provide an elaborate set of data in the form of tables and charts. If you know that your intended reader already supports your argument or simply wants your judgment on a certain matter, a shorter and simpler document will usually suffice.

¶1402

Parts of a Formal Report

1402 A *formal report* typically has three parts: front matter, body, and back matter. Each of these parts, in turn, typically contains some (if not all) of the following elements in the sequence indicated.

a. Front Matter

TITLE PAGE

In a business report: gives the full title, the subtitle (if any), the writer's name, title, and department, and the date of submission; may also indicate for whom the report was written. *In an academic report:* gives the name of the writer, the instructor, and the course, along with the date of submission. (See ¶1412.)

LETTER OR MEMO OF TRANSMITTAL

May be done as a letter (for distribution outside the company) or as a memo (for inside distribution); may be clipped to the front of the report (or the front of the binder in which the report is inserted); may be inserted in the report itself as the page preceding the title page. (See ¶1413.)

TABLE OF CONTENTS

A list of all chapters (by number and title), along with the opening page number of each chapter. If chapters are grouped by part, the titles of the parts also appear in the table of contents. Sometimes main headings within the chapters are also given under each chapter title. (See ¶¶1414–1415.)

LISTS OF TABLES AND ILLUSTRATIONS

Separate lists of tables and illustrations, included if they are numerous and likely to be frequently referred to by the reader. (See ¶¶1416–1417.)

FOREWORD

Written by someone other than the author of the report. May explain who commissioned the report, the reasons for doing so, and the qualifications of the writer to prepare the report. May also offer an evaluation of the report, and may ask those who receive copies of the report to give their assessment or take some other action after they have read the report. (See ¶1418.)

PREFACE

Written by the author of the report. Indicates for whom the report is written, the objectives and the scope of the report, and the methods used to assemble the material in the report. Acknowledgments of help received on the report are usually included here (placed at the end), but to give this material special emphasis, you can treat the acknowledgments as a separate element of the front matter, immediately following the preface. (See ¶1418.)

SUMMARY

Preferably limited to one page (two pages at most); designed to save the reader's time by presenting conclusions and recommendations right at the outset of the report. If a preface is not provided, the summary also includes some of the material that would have gone there. (See ¶1419.)

b. Body

INTRODUCTION

Sets forth (in greater detail than the preface) the objectives, the scope, and the methods, along with any other relevant background information. In a report with several chapters, the introduction may precede the first chapter of the text or it may be labeled as Chapter 1. (See ¶1421.)

MAIN DISCUSSION	Sets forth all the pertinent data, evidence, analyses, and interpretations needed to fulfill the purpose of the report. May consist of one long chapter that opens with an introduction and closes with conclusions and recommendations. May consist of several chapters; these may be grouped into <i>parts</i> , with a part-title page inserted to introduce each sequence of chapters. May use different levels of headings throughout the text to indicate what the discussion covers and how it is organized. (See ¶¶1422–1426.)
CONCLUSION	Summarizes the key points and presents the recommendations that the writer hopes the reader will be persuaded to accept. In a report with several chapters, this material represents the final chapter or the final part.
c. Back Matter	
APPENDIXES	A collection of tables, charts, or other data too specific or too lengthy to be included in the body of the report but provided here as supporting detail for the interested reader. (See ¶1429.)
ENDNOTES	A collection—all in one place at the end of the report—of what would otherwise appear as footnotes at the bottom of various pages in the report. (See ¶¶1501–1502, 1505–1506.)
BIBLIOGRAPHY	A list of all sources (1) that were consulted in the preparation of the report and (2) from which material was derived or directly quoted. (See ¶¶1545–1549.)
GLOSSARY	A list of terms (with definitions) that may not be readily understood when encountered in the body of the report. (See ¶1431.) May be treated as an appendix.

Parts of an Informal Report

- 1403** a. An *informal* report has no front matter. The information that would go on a separate title page appears at the top of the first page and is immediately followed by the body of the report. (See ¶¶1409–1411 for format guidelines.)
- b. An informal report typically contains no back matter except possibly a list of *endnotes* (in place of separate footnotes throughout the body of the report) and a *bibliography*. (See ¶¶1505–1506 for an illustration of endnotes and page 581 for an illustration of a bibliography.) Tables that cannot be easily incorporated in the body of the informal report may also be placed in an appendix in the back matter.

Margins

1404 Side Margins

- a. **Unbound Reports.** If a report is to remain unbound, use default side margins. However, you can reduce 1.25-inch default side margins to 1 inch if you are trying to limit the overall length of a report. By the same token, if length is not a problem, you can increase 1-inch default side margins to 1.25 inches to give the report a more open look.
- b. **Bound Reports.** Use a 1.5-inch left margin. (The extra space at the left will provide space for the binding.) Ordinarily, accept the default right margin. However, reduce a 1.25-inch right margin to 1 inch if length is a problem, and increase a 1-inch right margin to 1.25 inches to achieve a more open look.

¶1405

1405 Top and Bottom Margins of Opening Pages

The following guidelines apply to (a) the first page of each chapter, (b) the first page of each distinct element in the front matter and back matter, and (c) the first page of an informal report that consists of only one chapter (without any separate title page or other front matter).

- a. On these opening pages, space down to create a top margin of about 2 inches. (See the illustration on page 515.) On the title page and on part-title pages, where the copy as a whole will be centered on the page, do not space down; simply begin typing on the first available line.
- b. Use the *page numbering* feature of your word processing program, and select a format that automatically ends an opening page with a page number centered at the bottom.
- c. Ordinarily, nothing is typed in the space that represents the top margin. However, in informal academic reports, certain information is often typed in the upper right corner. (See the illustration on page 524.)

► *For the numbering of opening pages, see ¶1420.*

1406 Top and Bottom Margins of Other Pages

- a. Use the default top and bottom margins of 1 inch.
- b. For pages in the *body* and *back matter* of a report, use the *page numbering* feature of your word processing program to position the page number in the upper right corner of the page. If you want to provide additional information along with the page number (for example, the title of the report or a chapter within the report), use the *header* feature of your word processing software.
- c. For pages in the *front matter* of a report, use the page numbering feature of your word processing software to center the page number at the bottom of the report. If you want to provide additional information along with the page number, use the *footer* feature of your software.

Handling Page Breaks on a Computer

1407 Your word processing software can help you avoid most page-ending problems, as outlined in *a–e* below. There are, however, page-ending situations in which you must use your own judgment, as outlined in *f–g* below and in *h–j* on the next page.

- a. Your software ensures that the bottom margin will always be 1 inch (or whatever margin you have selected). A *soft page break* is inserted when the bottom margin is reached, but because that break is “soft,” you can easily adjust it if you do not like the page break created by the software.

NOTE: The *preview* feature permits you to see an entire page on the screen prior to printing so that you can tell whether adjustments will be necessary.

- b. A *hard page break* permits you to end a page wherever you want and to ensure that any copy that follows will appear at the top of the next page.

- c. The *keep lines together* and the *keep with next* features ensure that a designated block of copy (such as a table, an enumerated list, or selected lines of text) will not be divided at the bottom of a page but will, if necessary, be carried over intact to the top of the next page.
- d. To prevent *widows* (a situation in which the last line of a paragraph appears as the first line of a page), the *widow/orphan control* feature ensures that at least two lines of that paragraph are carried over to the top of the next page.
NOTE: As an illustration of a good page break, consider ¶1410e, a four-line paragraph that begins at the bottom of page 522 and ends at the top of page 523.
- e. To prevent *orphans* (a situation in which the first line of a paragraph appears as the last line of a page), the *widow/orphan control* feature ensures that at least two lines of that paragraph will appear at the bottom of a page or that the paragraph will begin at the top of the next page.
- f. Do not type a *centered heading* or a *side heading* near the bottom of a page unless you can fit at least the first two lines of copy after the heading. Use the *keep with next* feature. (For illustrations, see ¶1426a–c.)

NOTE: A *run-in heading* (in the first line of a paragraph) can fall near the bottom of a page if one additional line of the paragraph will also fit there. (For illustrations, see ¶1426b–c.)

► *For a discussion of centered, side, and run-in headings, see ¶¶1425c, 1426.*

- g. Do not divide a quoted extract (see ¶1424d) unless you can leave at least two lines at the bottom of one page and carry over at least two lines to the top of the next. Use the *widow/orphan control* feature.
- h. If a list of items (see ¶1424e–g) has to be divided at the bottom of a page, try to divide *between* items (not within an item). Moreover, try to leave at least two items at the bottom of one page and carry over at least two items to the top of the next. Use the *widow/orphan control* feature or the *hard page break* feature.

NOTE: If you need to divide *within* an item, leave at least two lines at the bottom of one page and carry over at least two lines to the next.

- i. If it is not possible to start typing a table at the desired point of reference and have it all fit on the same page, then insert a parenthetical note at the appropriate point in the text (referring the reader to the next page) and continue with the text to the bottom of the page. Then at the top of the next page, type the complete table and resume typing the text. (See Section 16 for guidelines on the typing of tables.) If you encounter a number of problems locating tables within the body of a particular report, you may want to consider placing all the tables in a separate appendix at the end of the report. (See ¶1402c.)

¶1408

NOTE: If a table is so long that it will not fit on one page even when typed single-spaced, then look for a sensible division point in the body of the table and end the first page there. Your software will automatically carry the remaining lines in the table to the top of the next page. If you select “repeat header rows” for the table title and the column heads, they will be automatically inserted at the top of the next page. (See also ¶1638.)

- j. If a footnote cannot all fit on the page where the text reference occurs, continue it at the bottom of the following page. If you are using the widow/orphan control feature and the *footnote* feature, either the footnote will be automatically divided or the text containing the footnote reference and the footnote itself will be carried over to the next page. (See ¶1504d.)

Shortening a Long Report

1408 You may want to reduce the number of pages in a long report without cutting the copy, particularly if you need to distribute the report either in printed or in photocopied form. (If you plan to distribute the report electronically, you may feel no need to limit the page count.) What follows is a set of devices for reducing the number of pages in a report. These devices will reduce both the readability and the attractiveness of the report, so use them only if absolutely necessary. Take special care in shortening a long report if you expect the report to be read on a computer screen: employing any of the devices suggested below may make your report especially difficult to read on a computer.

- a. You can reduce the font size, or you can choose a different font that yields more characters to an inch. If absolutely necessary, you can also reduce the amount of space between words and letters.
- b. Reduce the standard top margin for all opening pages from 2 inches to 1.5 inches. (See ¶1405a.)
- c. Reduce the top margin for all other pages from 1 inch to 0.5 inch. (See ¶1406.)

NOTE: If you are using the *header* feature or the *page numbering* feature at the top and if the header or page number is placed in the margin area, you will not be able to reduce the top margin.

- d. As an alternative to c, maintain the standard top margin and reduce the bottom margin from 1 inch to 0.5 inch. (See ¶1406.)

NOTE: If you are using the *footer* feature or the page numbering feature at the bottom and if the footer or page number is placed in the margin area, you will not be able to reduce the bottom margin.

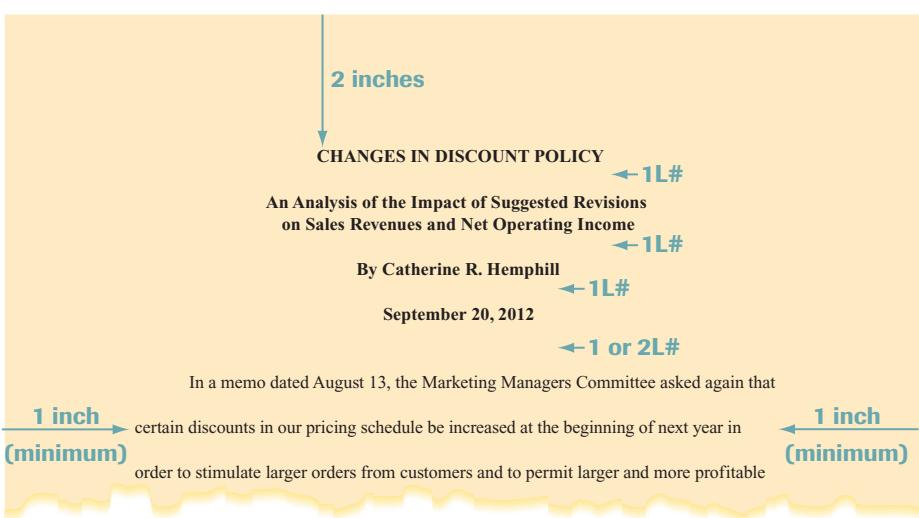

- e. Single-space the report and leave 1 blank line between paragraphs. (See ¶1424a.)
- f. If the report has only one level of heading, use run-in heads rather than side heads. (See ¶¶1425–1426.)
- g. Wherever the guidelines allow for 2 blank lines between elements, reduce this space to 1 blank line. Wherever 1 blank line is called for, reduce this space to half a line (if your software offers this option).

Informal Business Reports

These guidelines apply to business reports that consist of only one chapter and have no separate title page or other front matter.

1409 If the first page is typed on a *blank sheet of paper* (as in the illustration below):

- a. Leave a top margin of approximately 2 inches.
- b. When you type the title, the subtitle, the writer's name, and the date, use single spacing but leave 1 blank line between these elements. (See the treatment of the heading in the illustration on page 515 and the one below.)
- c. On the first line below the top margin, type the report title centered in bold caps. If a subtitle is used, type it centered in bold caps and lowercase on the second line below the main title. (If the title or subtitle is long, divide it into sensible phrases and arrange them on two or more single-spaced lines.)
- d. Type *By* and the writer's name centered in bold caps and lowercase on the second line below the title or subtitle.

- e. Type the date centered on the second line below the writer's name. Use the date on which the report will be submitted (not the date on which it is being typed).

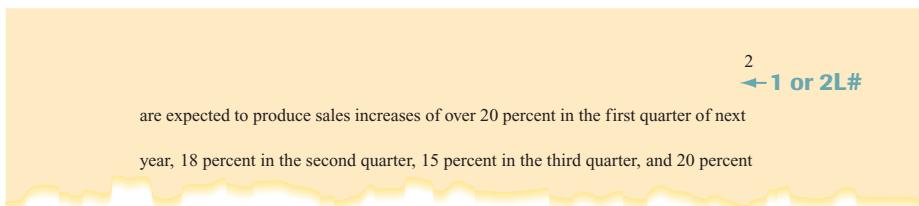

NOTE: Additional details that appear on a title page (such as the writer's title and affiliation or the name and affiliation of the person or group for whom the report has been prepared) are omitted when the title starts on the same page as the body. If these elements need to be provided, you will have to prepare a separate title page. (See ¶1412.)

- f. On the second or third line below the date, start the body of the report. (See ¶¶1424–1426.) At this point decide how you want to space the body of the report. You can continue with the use of single spacing (as in the model illustration on page 515), or you can switch to double or 1.5-line spacing (as in the illustration in d above).

Continued on page 522

¶1410

- g.** If the report requires more than one page, use the *page numbering* feature to automatically insert the page number at the top right margin. Leave 1 or 2 blank lines below the page number, and resume the text on the following line.

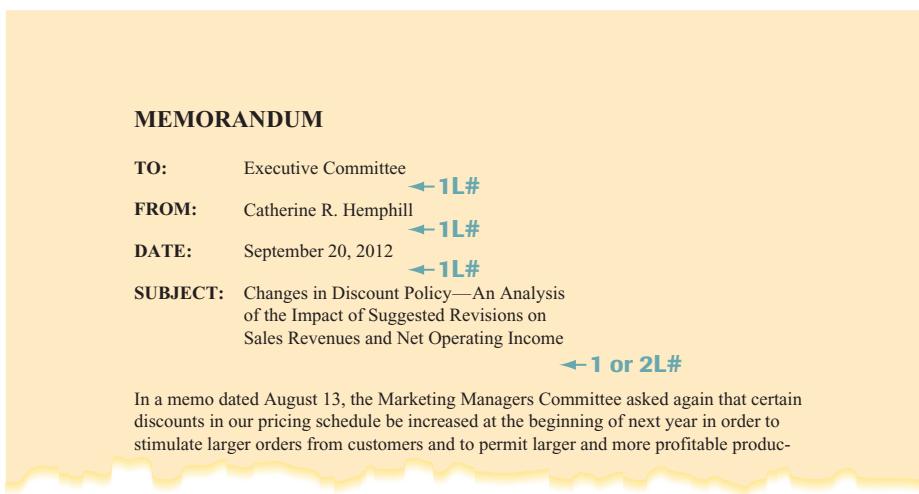

NOTE: On the first page of an informal business report, do not type a page number. However, count this page as page 1.

- h.** If the report requires one or more elements of back matter—for example, endnotes or a bibliography—follow the style established for a formal report. (See ¶¶1501–1502, 1505–1506, 1545–1549.)

1410

- If the first page of a report is prepared in *memo form*:

- a.** Give the report title (and subtitle, if any) as the *subject* of the memo. Supply all the other elements called for in the heading of the memo in the usual way. (See ¶¶1373–1374.)

- b.** Then begin typing the body of the report on the second or third line below the last fill-in line in the heading. (See ¶¶1424–1426.)
- c.** If the report requires more than one page, type each continuation page on a blank sheet of paper. Use the *header* feature to insert the same kind of continuation

heading called for in any long memo (see ¶1374t). Leave 1 or 2 blank lines and resume the text on the following line.

Executive Committee

2

September 20, 2012

←1 or 2L#

OR:

Executive Committee

Page 2

September 20, 2012

←1 or 2L#

NOTE: When a report is addressed to a number of people, each whom is listed separately in the heading on the first page, there will be too many names to fit in a continuation heading. However, it is not essential that these names appear in the heading. The purpose of a continuation heading is simply to make it easy to reassemble the individual pages of a report if they should become separated. With that purpose in mind, use the subject of the cover memo as the first element in the continuation heading for the report. If the subject is long (as in the illustration in ¶1410a), a few key words will serve the purpose.

► For additional details on continuing the memo from one page to another, see ¶1366.

Informal Academic Reports

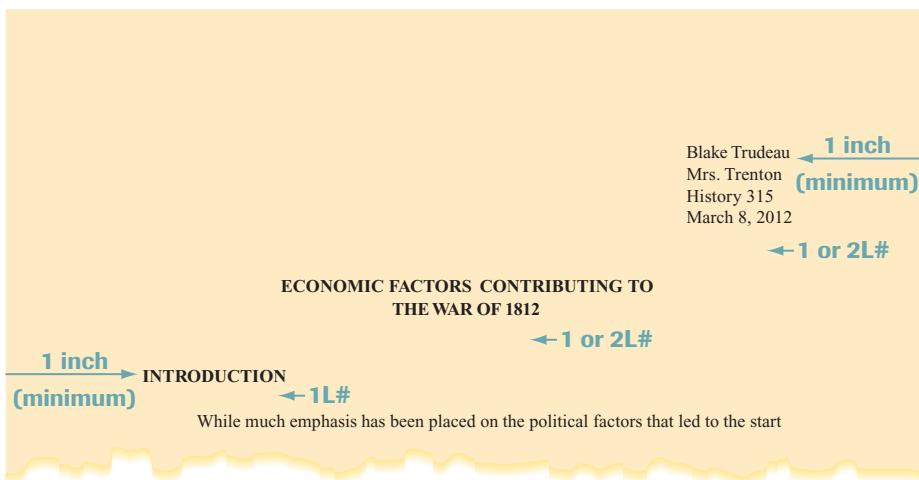

1411 An academic report that consists of only one chapter and has no separate title page or other front matter is typed exactly like an informal business report (see ¶¶1409–1410) except for the opening of the first page. (See the top of page 524.)

- a. Leave a default top margin of 1 inch. Then type the following information on four separate lines, single-spaced, in the upper right corner of the first page: the writer's name, the instructor's name, the course title, and the date. Align these four lines at the left, with the longest line ending at the right margin.
- b. On the second or third line below the date, type the title just as in an informal business report. If a subtitle is used, type it on the second line below the title. (See ¶1409c.)
- c. Start typing the body of the report on the second or third line below the preceding copy (the title or subtitle). At this point switch to double spacing. (See ¶¶1424–1426.)

NOTE: Many academic reports have to follow the format established by The Modern Language Association. You can find guidelines in *The MLA Style Manual*.

Continued on page 524

¶1412

The Front Matter of Formal Reports

The following guidelines deal with the preparation of a title page, a letter or memo of transmittal, a table of contents, a list of tables, a list of illustrations, a preface or foreword, and a summary. For a formal report, only a separate title page is essential; all the other elements are optional.

1412 Title Page

There is no one correct arrangement for the elements on a title page. Two acceptable formats are described in *a* and *b* below.

- a. Three-Block Arrangement.** Group the material into three blocks of type, and leave equal space (1 to 2 inches) above and below the middle block. Then center the material as a whole horizontally and vertically on the page. (See the illustrations on page 525.)
- b. Two-Block Arrangement.** Group the material into two blocks of type, and leave 1 to 2 inches between blocks. Center the material as a whole horizontally and vertically on the page. (See the illustration on page 525.)

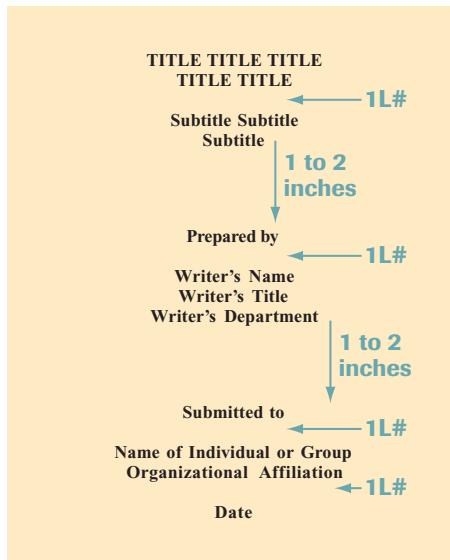

NOTE: The two-block arrangement works well when the title page does not try to show the name of the person or group to whom the report is being submitted.

- c. Margins.** Regardless of the arrangement you use, the side margins should be at least equal to those used for the body of the report (see ¶1404). The top and bottom margins should be a minimum of 1 inch, but make sure that they are at least equal to (and preferably slightly larger than) the space inserted between the blocks of text on the title page.

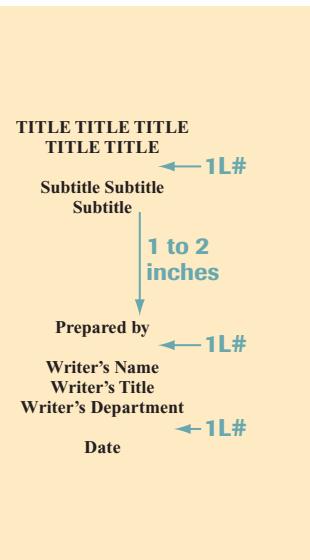

NOTE: When you set up the text for a title page, insert a 2-inch space between the blocks of text at the outset. Then center the material as a whole horizontally

and vertically, and consider whether adjustments are necessary to achieve an attractively balanced page. At this point you can reduce the space between blocks if necessary to ensure that it does not exceed the space used for the top and bottom margins. You can also adjust line breaks in the text as necessary to preserve attractive side margins.

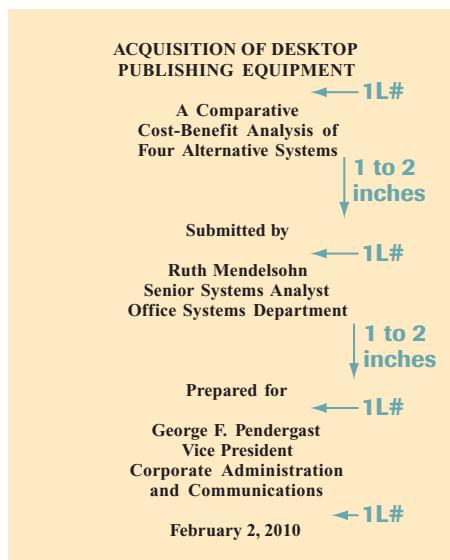

Three-Block Arrangement

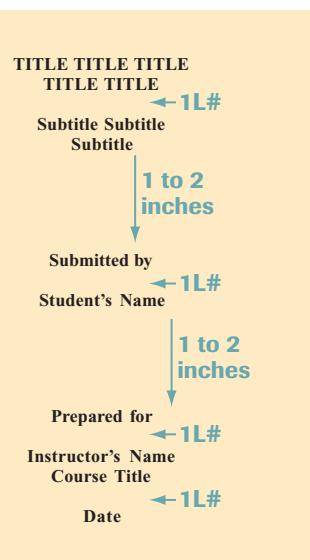

Two-Block Arrangement

Business Report

Academic Report

¶1412

- d. Title.** Type the title in bold caps. If the title is long, type it on two or more lines, single-spaced; try to divide the title into meaningful phrases. (See the illustration of a business report on the previous page at the left.)
- e. Subtitle.** Type the subtitle, if any, in bold caps and lowercase. If the subtitle requires more than one line, type it single-spaced. Leave 1 blank line between the main title and the subtitle. (See the illustrations on the previous page.)
- f. Writer's Identification.** Leave 1 to 2 inches before typing the writer's identification block. The writer's name may be preceded by the word *By* on the same line or by a phrase such as *Prepared by* or *Submitted by* typed 2 lines above. If appropriate, the writer's name may be followed by a title on the next line and by an organizational affiliation on the following line.

- g. Reader's Identification.** It is customary (but not necessary) to identify the individual or group for whom the report has been prepared. Leave 1 to 2 inches before typing *Submitted to* or *Prepared for* or a similar phrase. Then leave 1 blank line and type the name of the individual or the group. On succeeding lines, supply a title, an organizational affiliation, or both.

- h. Date.** Supply the date (month, day, and year) on which the report is being submitted. Type the date on the second line below the reader's identification block. If you do not include a reader's identification block, type the date on the second line below the writer's identification block. (See the illustrations on the previous page.)
- i. Graphic Elements.** You can use special display type and add an organizational logo or some other graphic element to enhance the appearance of a title page.

1413 Letter or Memo of Transmittal

A formal report is usually accompanied by a letter or memo of transmittal.

- a. If you are sending the report to people outside the organization, use the letter format. (See the illustration below.)

NOTE: The cover letter is usually clipped to the front of the report. If the report is in a binder, clip the letter to the front of the binder or insert it in the binder preceding the title page.

- b. If the report will go only to people within your organization, use the memo format and clip the memo to the front of the report. (See the illustration on page 528.)

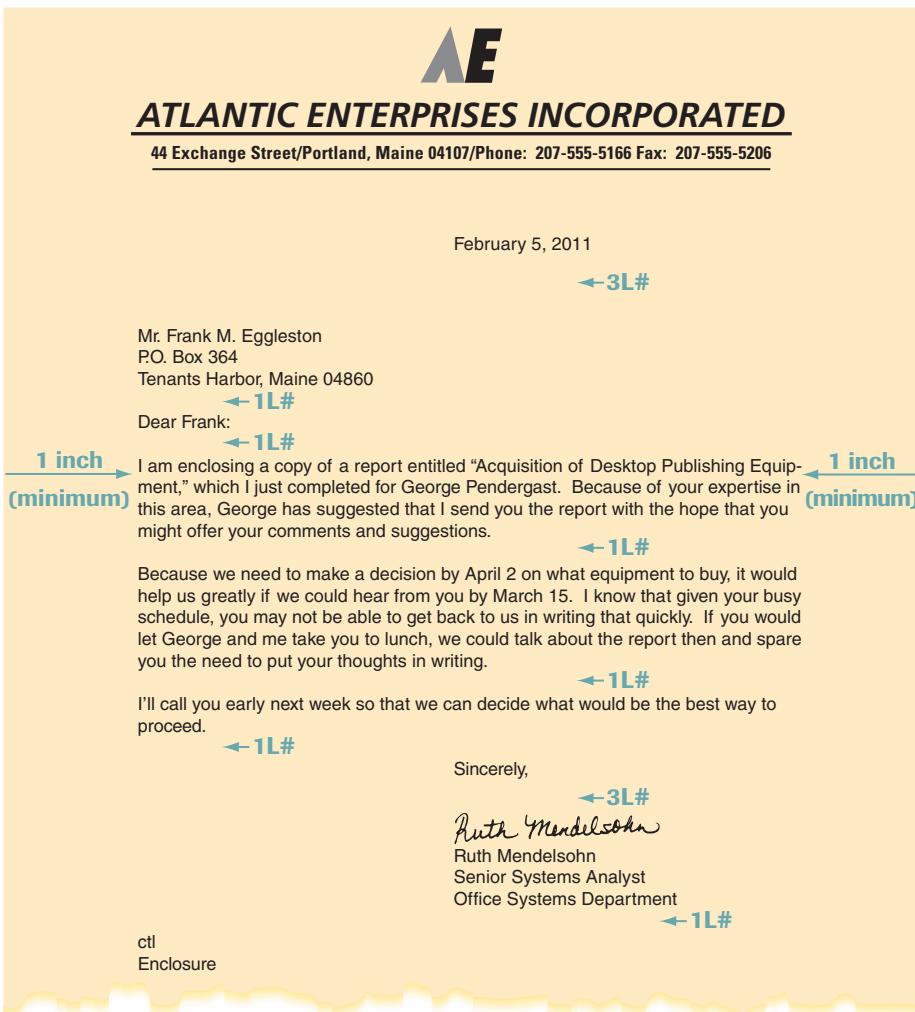

Table of Contents

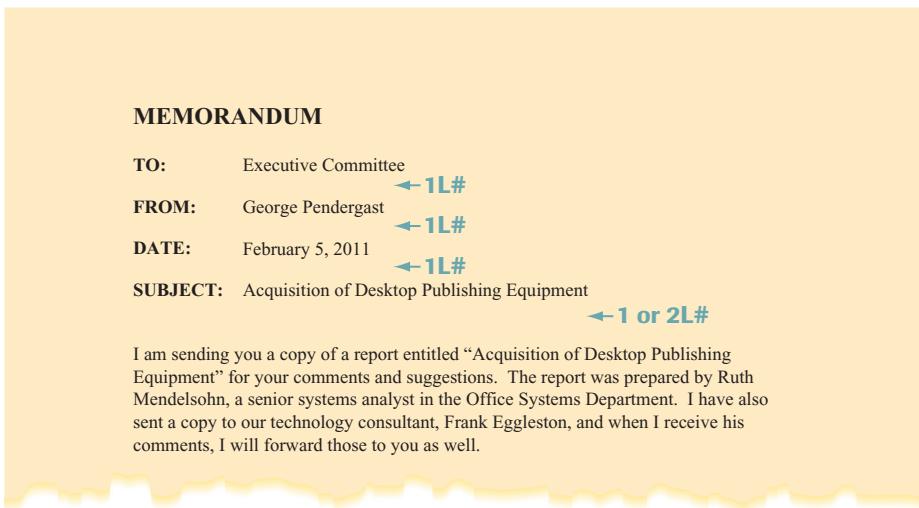

1414 If your word processing software has the appropriate feature, you can create a table of contents by scrolling through the text and coding (according to level of subordination) every part title, chapter title, main heading, and subheading that you wish to appear in the table of contents. If you subsequently add, delete, or change any titles or headings in the report, you can readily update your table of contents to reflect these changes.

¶1414

c. If you are e-mailing the report only to people within your own organization, use the memo format for the cover note. If you are e-mailing the report to people outside your organization, format the cover note as an e-mail message. If the report has a special format that needs to be preserved, send it as an attachment to the cover note. Otherwise, incorporate the report in the body of the transmittal document.

NOTE: For a discussion of the pros and cons of sending reports and other documents as an attachment to an e-mailed cover note, see ¶1385.

d. Whether the transmittal document is formatted as a letter, a memo, or an e-mail message, it typically covers the following points: (1) a brief description of what is being transmitted; (2) a brief reference to the circumstances that prompted the report; (3) if necessary, a brief indication of why the report is being sent to the addressee; and (4) a statement about what action the addressee is expected to take. (See the illustration on page 527.)

1415 If you prefer to create your own format, the following guidelines may be helpful.

- a. Type the table of contents on a new page. (See the illustration on page 530.)

NOTE: To achieve a more open look, the illustration uses 2 blank lines above each major element within the table of contents. However, some writers prefer to use only 1 blank line above these elements.

- b. Approximately 2 inches from the top of the page, center the heading *CONTENTS* (or *TABLE OF CONTENTS*) in bold caps.
- c. On the second or third line below the heading, begin typing the table of contents double-spaced. Use the same side and bottom margins as for the text pages in the body of the report. (See ¶¶1404–1406.)
- d. In typing the body of the table of contents, list every separate element that follows the table of contents in sequence—whether in the front matter, the body of the report, or the back matter. In the illustration on page 530, note the following aspects of the format:

(1) Type individual entries pertaining to *front matter* and *back matter* at the left margin, with the title in caps and lowercase or in all-caps. Page numbers (roman for front matter and arabic for back matter) align on the right at the right margin. Leaders (rows of dotted lines) help guide the eye to the column of page numbers. Set a right leader tab for the page numbers. After you type each entry at the left margin, pressing the leader tab will automatically insert the leaders before you type the page number. The *leader* feature provides only solid leaders and establishes the space before and after each row of leaders. Accept the results that your software provides.

NOTE: Leave 1 or 2 blank lines *after* the front matter entries and 1 or 2 blank lines *before* the back matter entries.

- (2) Center individual entries pertaining to *part titles* in all-caps. The part numbers that precede the titles may be in arabic or roman numerals or (for formality) may be spelled out. Leave 1 or 2 blank lines before each part title and 1 blank line after.
- (3) Individual entries pertaining to *chapters* begin with a chapter number (roman or arabic), followed by a period, 1 or 2 spaces, and then the chapter title typed in caps and lowercase or in all-caps. Align the chapter numbers at the right. If you are using roman numerals, set a decimal tab, with the longest number positioned as close to the left margin as possible. Press the *tab* key to insert a row of leaders before you type each page number.
- (4) If any chapter title should require more than one line, type the turnover line single-spaced, aligned with the first letter of the chapter title in the line above.

List of Tables or Illustrations

1416 If your word processing software has the appropriate feature, you can create separate lists of tables and illustrations by scrolling through the text and coding the titles of the tables and illustrations that you want to appear in the front matter. If you subsequently add or delete tables or illustrations, you will find it easy to update these lists. (The process is similar to using software to generate a table of contents. See ¶1414.)

1417 If you prefer to create your own format for these lists of tables and illustrations, the following guidelines and the illustration below may be helpful.

- Type each list on a new page.
- Type the heading—*TABLES* (or *LIST OF TABLES*) or *ILLUSTRATIONS* (or *LIST OF ILLUSTRATIONS*)—in bold caps.
- On the second or third line below the heading, type the first entry in the list. Use the same format as for chapter titles in a table of contents. (See ¶1415.) The

1-1.	Annual Sales, 2003–2008	6
1-2.	Projected Annual Sales, 2009–2013	10
1-3.	Estimated Market Share, 2009–2013	13
2-1.	Marketing Costs as a Percentage of Sales	16

¶1418

tables or the illustrations may be numbered consecutively throughout the report or consecutively within each chapter. The latter technique uses the chapter number as a prefix in the numbering scheme. (See the illustration at the bottom of page 531.)

- d.** If your word processing software has the appropriate features, you can automatically number tables and illustrations throughout the report.

1418 Preface or Foreword

- a.** If a preface (written by the author) or a foreword (written by someone else) is to be provided, then on a new page type the appropriate title in bold caps and center the heading approximately 2 inches from the top of the page. Note that the correct spelling is *FOREWORD* (**not:** *FORWARD*).

NOTE: If both a preface and a foreword are to appear in the front matter, the foreword should precede the preface.

- b.** On the second or third line below the heading, begin typing the text. Use the same side and bottom margins as for the text pages in the body of the report (see ¶¶1404–1406). Also follow the same guidelines for spacing, indentations, and headings as in the body of the report (see ¶¶1424–1426).

- c.** The preface should cover the following points: (1) for whom the report is written, (2) what prompted the writing of the report, (3) what the report aims to accomplish, (4) what the report covers and what it does not try to deal with, (5) how the data and the conclusions were arrived at, and (6) acknowledgments of those individuals and organizations who helped the writer of the report.

NOTE: The acknowledgments may be treated as a separate element in the front matter, following the foreword and the preface (if both are given) and using the same format.

- d.** The foreword typically deals with these topics: (1) who commissioned the report, (2) the reasons for doing so, (3) the writer's qualifications for undertaking the assignment, (4) an assessment of the job that the writer has done, and (5) a call for some follow-up action on the part of those who receive copies of the report.

1419 Summary

- a.** If a summary (frequently called an *executive summary*) is to be provided, follow the format guidelines provided for a preface or a foreword in ¶1418a–b.
- b.** Since this element is intended to be a time-saver, keep it short—ideally one page, at most two pages. The summary may be handled as a series of ordinary text paragraphs or as a series of paragraphs typed as items in a list with text, numbers, or bullets (see ¶1424e–g).

1420 Numbering Front Matter Pages

- a.** On all pages of front matter except the title page, use the *page numbering* feature or the *footer* feature to position the page number at the bottom of the page.
- b.** Type the page number in lowercase roman numerals (*ii*, *iii*, *iv*, and so on).
- c.** Consider the title page as *page i*, even though no number is typed on that page.

NOTE: You can direct the page numbering feature to (1) suppress the page number on the first page of the front matter and (2) insert a sequence of lowercase roman numerals at the bottom of all the other pages in the front matter.

The Body of Formal Reports

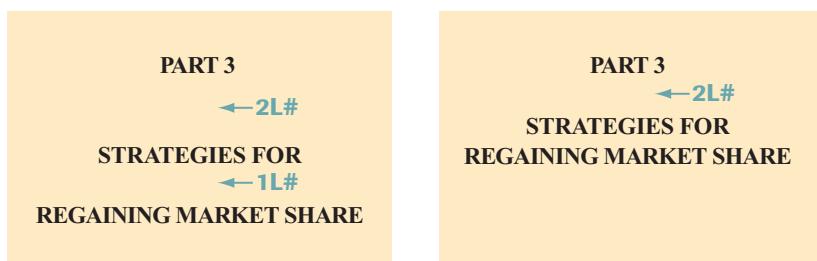

1421 Introduction

- a. If the body of a report contains several chapters and begins with a formal introduction, treat the introduction either as Chapter 1 or as a distinct element preceding Chapter 1.
 - (1) If you decide to treat it as Chapter 1, then consider *INTRODUCTION* to be the title of this chapter. You can then treat it as you would any other title on a chapter-opening page. (See ¶1423.)
 - (2) If you decide to have the introduction precede Chapter 1, then on a new page type *INTRODUCTION* in bold caps and center the heading approximately 2 inches from the top of the page. On the second or third line below, begin typing the text.
 - (3) In either case treat the first page of the introduction as page 1 of the report. (See ¶1427.)
- For guidelines on margins, see ¶¶1404–1406; for guidelines on spacing, indentations, and headings, see ¶¶1424–1426.
- b. If a report contains only one chapter and begins with an introductory section, treat the title *INTRODUCTION* as a first-level head (see ¶¶1425–1426) and type it on the second or third line below the block of copy (title, etc.) at the top of the page.

1422 Part-Title Pages

- a. If the report contains several chapters organized in parts, insert a separate part-title page directly in front of the chapter that begins each part. Either of the formats shown below is acceptable.

NOTE: If the body of the report begins with a formal introduction (see ¶1421a), then the part-title page for Part 1 should *follow* the introduction. (**REASON:** The introduction embraces the whole work and not simply Part 1.)

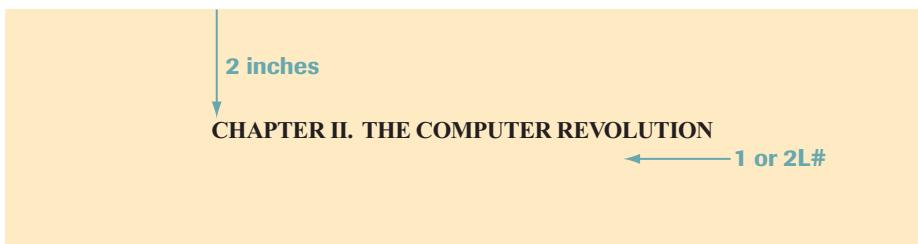

¶1423

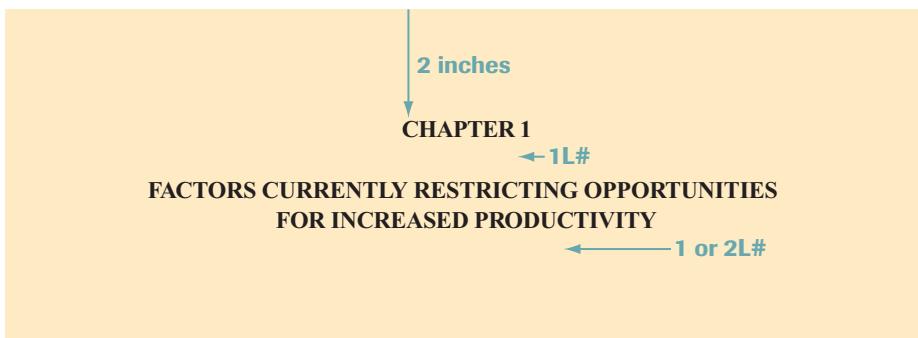

- b.** Type the word *PART* and the part number on one line. Underneath type the part title on one or more lines as appropriate. Use bold caps for emphasis, and arrange the copy for maximum display effect. Center the copy as a whole horizontally and vertically or, for a more attractive display, position the copy so that there is twice as much space below as there is above.

1423 Chapter-Opening Pages

- a.** On a new page, approximately 2 inches from the top, center the chapter number and title in bold caps.

- b.** If the title is long, divide it into sensible phrases and arrange them on two or more single-spaced lines. Put the chapter number above the title on a line by itself, and leave 1 blank line before starting the chapter title.

- c.** Begin typing the first line of copy (whether text matter or a heading) on the second or third line below the title.

1424 Text Spacing and Indentations

- a. Text.** To enhance readability, use double or 1.5-line spacing for all text matter, especially if the report is long. However, you may use single spacing when the report is short (see the illustration on page 515) or when the costs of paper, photocopying, file space, and mailing are important considerations. (See ¶1408 for a number of ways to shorten a long report.)

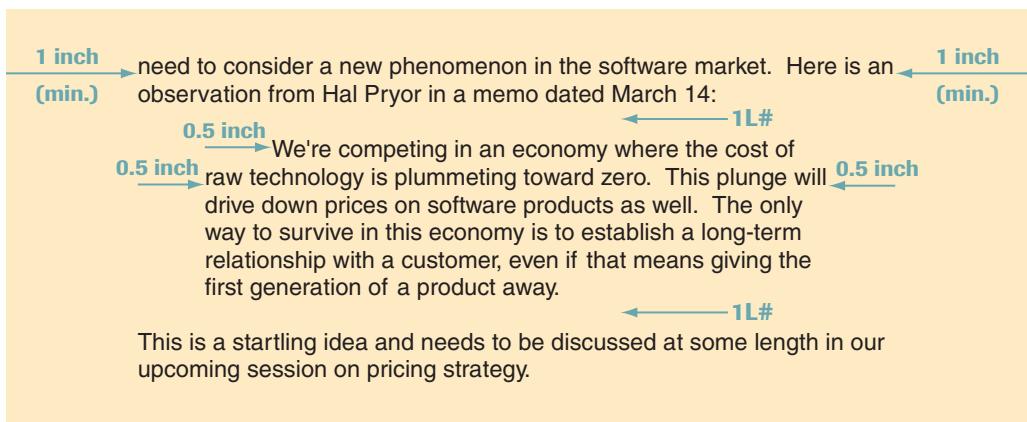

► For guidelines on dividing words and word groups at the ends of lines and between one page and the next, see ¶¶901–921; for guidelines on the use of footnotes, endnotes, or textnotes, see Section 15; for guidance on whether or not to justify the right margin, see ¶1344g–h.

b. Drafts. Always double-space drafts that are to be submitted for editing or evaluation.

c. Paragraphs. Indent the first line of text paragraphs 0.5 inch. Leave 1 blank line between paragraphs.

► For guidelines on dividing short paragraphs at the bottom of a page, see ¶1407d–e.

d. Quoted Material. If a quotation will make four or more lines, treat it as a single-spaced extract, indent it 0.5 inch from each side margin, and leave 1 blank line above and below the extract. With word processing software, you can change the indent settings or you can use the *double indent* feature (if one is available), which will indent the extract equally from each side margin. If the quoted matter represents the start of a paragraph in the original, indent the first word an additional 0.5 inch.

► For another illustration, see page 431.

e. Items in a List. Type the list single-spaced with 1 blank line above and below the list as a whole. Either type the list on the full width of the text (as shown in the second illustration on page 537), or indent the list equally from each side margin (as described in d above and shown in the two illustrations on page 536 and the first illustration on page 537). If any item in the list requires more than one line, leave a blank line after each item in the list. If an item requires more than one line, align any turnover with the first word in the line above.

¶1424

1 inch (min.) The market analysis conducted by Witherspoon Associates has yielded some surprising results. For example, over 50 percent of our sales are made in low-growth markets. On that basis we need to ask:

← 1L# → 1 inch (min.)

0.5 inch Will this heavy investment in low-growth markets permit us to meet our long-range profit goals?

← 0.5 inch → 1L#

How can we most effectively increase our sales in high-growth markets?

← 1L# → 1L#

To what extent will domestic and international competition stymie our attempt to penetrate high-growth markets?

← 1L# → 1L#

NOTE: To enhance readability, double-space a list of one-line items.

► *For an example, see the illustration on page 622.*

f. Enumerated Items in a List. If each of the items begins with a number or a letter, you may use the *numbered list* feature of your word processing program. Each item will begin at the left margin, and turnovers will be indented to align with the first word in the line above. However, when the first line of each text paragraph is indented 0.5 inch (as is typically done in reports), an enumerated list that falls within the text looks best when indented 0.5 inch from each margin. (See the illustration below and the one at the top of page 537.)

When you use the numbered list feature, the list will be typed single-spaced (as in the following illustration).

0.5 inch In evaluating various companies as candidates for acquisition, we must address three basic questions:

← 1 inch (min.) → 1L#

0.5 inch 1. What should be our criteria for identifying desirable candidates for acquisition?

← 0.5 inch → 1L#

2. How much should we be prepared to pay?

3. To what extent will each acquisition affect our overall financial performance?

← 1L# → 1L#

Naturally, broad questions like these lead to a great number of other questions. We lack the internal resources to deal with the addi-

For a more open look, insert 1 blank line after each item in the list (as in the illustration at the top of page 537).

0.5 inch In evaluating various companies as candidates for acquisition, we must address three basic questions:

← 1L# →

0.5 inch

1. What should be our criteria for identifying desirable candidates for acquisition?
2. How much should we be prepared to pay?
3. To what extent will each acquisition affect our overall financial performance?

← 1L# →

Naturally, broad questions like these lead to a great number of other questions. We lack the internal resources to deal with the addi-

► See ¶1345d, on the formatting of enumerated items in a list.

g. Bulleted Items in a List. If the items each begin with a bullet, you may use the *automatic bullet insert* feature of your word processing program. Depending on the program you are using, each item will begin at the left margin (as in the illustration below) or will be indented 0.25 inch from the left margin. Turnovers will be automatically indented, and no space will be left between items. If you prefer to indent the bullets 0.5 inch from the left margin, press the tab before activating the bullet feature. Here are a few examples of the bullet styles that are available.

0.5 inch In evaluating various companies as candidates for acquisition, we must address three basic questions:

← 1L# →

- What should be our criteria for identifying desirable candidates for acquisition?
- How much should we be prepared to pay?
- To what extent will each acquisition affect our overall financial performance?

← 1L# →

Naturally, broad questions like these lead to a great number of other questions. We lack the internal resources to deal with the addi-

h. Tables. Tables may be typed with single, double, or 1.5-line spacing. However, establish one style of spacing for all tables within a given report.

► See Section 16 for a full discussion of how to plan and create tables and for numerous illustrations.

¶1425

Text Headings

1425 Headings (or heads) are the key technique for letting readers see at a glance the scope of the writer's discussion and the way in which it is organized. Therefore, make sure that the heads used throughout the report properly reflect the coverage and the structure of the material. It is also essential that you type the heads in a way that clearly indicates different levels of importance or subordination.

Here are several techniques for achieving these objectives:

a. Try to limit yourself to three levels of text heads (not counting the chapter title). If you use more than three levels of text heads, it will be difficult for the reader to grasp the typographical distinction between one level and another. Moreover, the use of more than three levels of text heads suggests that you may be trying to cram too much into one chapter. Consider a different organization of the material to solve this problem.

NOTE: In order to clearly distinguish one level of text heading from another and the headings from the text, carefully choose fonts and font sizes, and make appropriate use of boldface, italics, and other devices.

b. Before preparing the final version of the report, make an outline of the heading structure as it then stands and analyze it for:

- (1) *Comprehensiveness.* When the heads are viewed as a whole, do they cover all aspects of the discussion, or are some topics not properly represented?
- (2) *Balance.* Is one part of a chapter loaded with heads while a comparable part has only one or two?
- (3) *Parallel structure.* Are the heads all worded in a similar way, or are some complete sentences and others simply phrases? (See ¶1081.)

On the basis of this analysis, revise the heads as necessary.

NOTE: Using the *multilevel list* feature or the *outline* feature of a word processing program will greatly simplify the process of reviewing and improving the wording of the heads. It will help you generate a complete list of the heads as they currently appear in the report. Any changes in wording that you make on this list will automatically be reflected in the headings within the text.

c. Headings come in three styles:

- (1) A *centered head* is one centered on a line by itself. Type it in bold caps. If the head is too long to fit on one line, center the turnover on the following line.

► *For spacing above and below heads, see ¶1426.*

- (2) A *side head* starts flush with the left margin, on a line by itself. Type side heads in bold caps or in bold caps and lowercase.

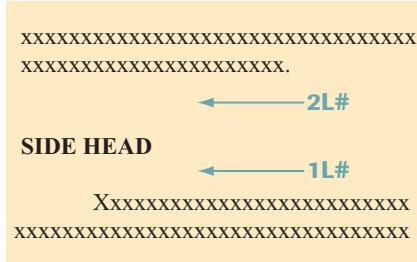

- (3) A *run-in head* (also called a *paragraph heading*) is one that begins a paragraph and is immediately followed by text matter on the same line. Indent a run-in head 0.5 inch from the left margin. Type it in bold caps and lowercase. The run-in head should be followed by a period (unless some other mark of punctuation, such as a question mark, is required). The text then begins 1 or 2 spaces after the punctuation. (See the illustrations in ¶1426b–c.)

► *For capitalization in headings, see ¶¶360–361, 363.*

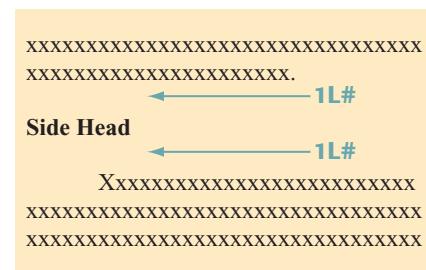

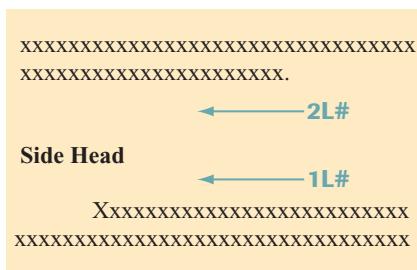

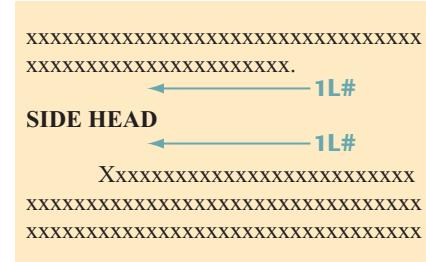

1426 The illustrations below and on page 540 provide spacing guidelines for headings. You have two options. You can leave only 1 blank line above centered and side headings (as shown in the models in the right column). For a more open look, you can leave 2 blank lines above centered and side headings (as shown in the models in the left column).

- a. In a report that calls for only *one* level of heading, choose a side heading and type it in one of the styles shown below.

Open Style

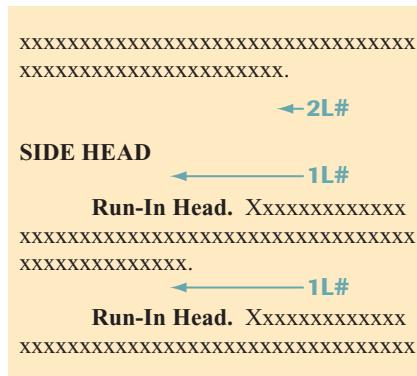

Condensed Style

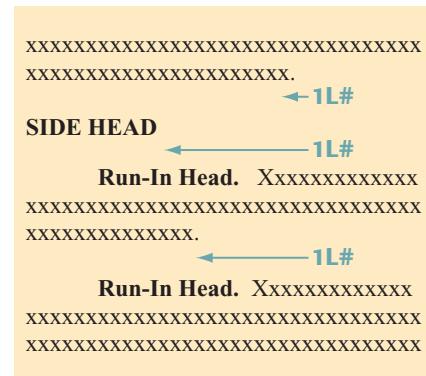

- b. In a report that calls for *two* levels of headings, choose one of the styles shown below.

1427 Numbering Text Pages

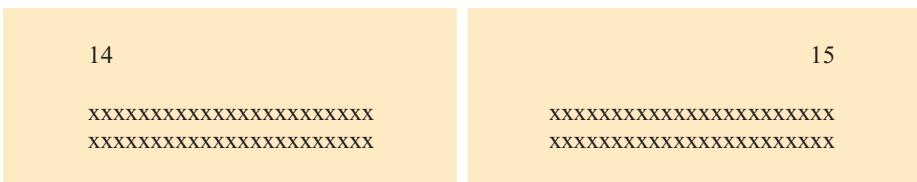

- a. When you use the *page numbering* feature of your word processing software, the appropriate page number will be properly positioned on each page in the correct sequence. If you later add or delete copy in a way that changes the overall length of the report, the page numbering will be automatically adjusted.

NOTE: The page numbering feature will insert space *below* a page number at the top of a page or *above* a page number at the bottom, depending on how you set it.

- b. When the first page contains the title of the report and the body starts on the same page, count this as page 1 but do not type the number on the page.

NOTE: With the page numbering feature you can easily suppress a page number and still have the page counted in the overall numerical sequence.

- c. When the report begins with a formal title page and one or more additional pages of front matter, give these pages a separate numbering sequence, using lower-case *roman* numerals. (See ¶1420.)
- d. In a formal report, consider the first page *following* the front matter as page 1 in the *arabic* numbering sequence.
- e. If part-title pages are included in the report (see ¶1422), consider them in the numbering sequence for the body of the report but do not type a number on these pages. (Thus if the first page following the front matter is the part-title page for Part 1, it will count as page 1 but no number will appear.)
- f. On the first page of each new element in the body or back matter of the report, use the page numbering feature to center the page number at the bottom of the page.
- g. On all other pages in the body or back matter of the report, use the page numbering feature to position the page number in the upper right corner of the page.
- h. If the final version of a report is to be printed on both sides of the paper (as in a book), the odd-numbered pages will appear on the front side of each sheet and the even-numbered pages on the back. If the report is bound, then on a spread of two facing pages, the even-numbered pages will appear on the left and the odd-numbered pages on the right. In such cases it is more convenient for the reader if the page numbers at the top or bottom of the page appear at the outside corners, as in the following illustration.

NOTE: You can direct the page numbering feature of a word processing program to alternate the placement of these page numbers in the outside corners, depending on whether the page has an odd or even number.

- i. In a long report with several chapters written by different authors under a tight deadline, it may be necessary to prepare the final version of the chapters out of order. In such cases, you may use a separate sequence of page numbers for each chapter, with the chapter number serving as a prefix. Thus, for example, the pages in Chapter 1 would be numbered 1-1, 1-2, 1-3, . . . ; those in Chapter 2 would be numbered 2-1, 2-2, 2-3, . . . ; and so on.

NOTE: If the authors submit their material electronically, it is easy to renumber the entire report at the last minute, using one continuous sequence of numbers throughout.

¶1428

The Back Matter of Formal Reports

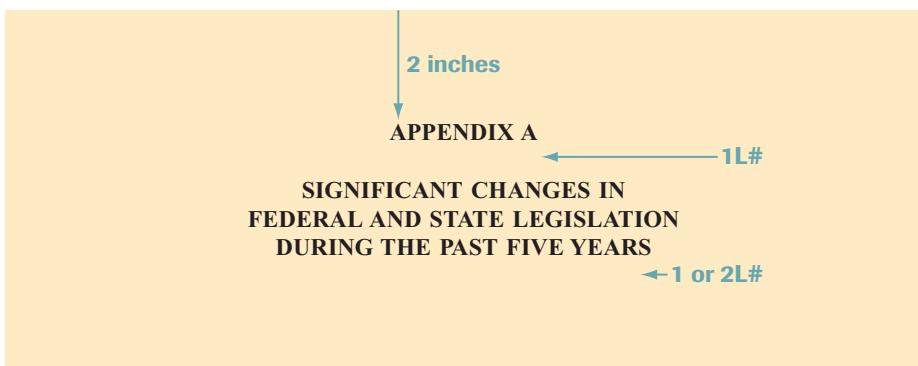

1428 Following the last page of the body of the report are those elements of back matter that may be needed: appendixes, endnotes, bibliography, and glossary. Begin each of these elements on a new page. Use the same margins as for other pages in the report (see ¶¶1404–1406), and treat the numbering of these pages as discussed in ¶1427f-i.

1429 Appendices

- a. If you plan to include more than one appendix, number or letter each one in sequence. (For an example of the treatment of two appendixes, see the illustration of the table of contents on page 530.)
- b. On a new page, about 2 inches from the top, center *APPENDIX* (plus a number or letter if appropriate) and the appendix title in bold caps.

NOTE: If the title is long, type it on two or more centered lines, single-spaced. Leave 1 blank line before starting the appendix title.

- c. Leave 1 or 2 blank lines before typing the body of the appendix. Since this material may be a table, a chart, a list, or regular text, choose the format that displays this copy to best effect.

1430 Endnotes and Bibliography

For detailed guidelines on endnotes and the bibliography, see ¶¶1501–1502, 1505–1506, 1545–1549.

1431 Glossary

If you plan to provide a glossary, then on a new page, approximately 2 inches from the top, center *GLOSSARY* or a heading such as *KEY TERMS* in bold caps. Leave 1 or 2 blank lines before beginning the text.

There are a number of ways to set up a glossary: in two columns, in one column with hanging indentations, and in paragraphs.

- a. **Two Columns.** In the left column type the terms in alphabetic order, using bold-face, italics, or underlining. In the right column put the corresponding definitions alongside. Begin the right column at least 2 spaces to the right of the longest term in the left column. Single-space each definition, and align turnover lines flush with the left margin of this column. Leave 1 blank line between entries.

Elliptical expression A condensed expression from which key words are omitted.

← 1L#

Essential elements Words, phrases, or clauses that are necessary to the completeness of the structure or the meaning of a sentence.

- b. **Hanging Indentation.** Begin each term at the left margin, using boldface, italics, or underlining. Follow with a colon, a dash, or some other device and then the definition. Type the definition single-spaced and indent turnover lines 0.5 inch so that the term in the first line will stand out. Leave 1 blank line between entries.

elliptical expression: a condensed expression from which key words are
→ omitted.

0.5 inch ← 1L#

essential elements: words, phrases, or clauses that are necessary to the completeness of the structure or the meaning of a sentence.

- c. **Paragraph Style.** Indent each term 0.5 inch from the left margin, using bold-face, italics, or underlining. Follow with a colon, a dash, or some other device and then the definition. Type the definition single-spaced, with turnover lines flush with the left margin. Leave 1 blank line between entries.

0.5 inch → **Elliptical expression**—a condensed expression from which key words are omitted.

← 1L#

Essential elements—words, phrases, or clauses that are necessary to the completeness of the structure or the meaning of a sentence.

NOTE: Regardless of the format selected, the terms may be typed with initial caps or all in lowercase (except for proper nouns and proper adjectives). The definitions

¶1432

may also be styled either way; however, if they are written in sentence form, it is best to use initial caps for both the term and the definition. The use of periods at the end of definitions is optional unless, of course, the definitions are written as complete sentences. (See the illustration in ¶1341a for an example of the use of initial caps for both the term and the definition.)

Manuscripts

The preparation of manuscripts is subject to virtually the same considerations that apply to the preparation of reports (¶¶1401–1431). However, a manuscript differs from a report in one fundamental way: it is written with the idea of publication in mind—whether as a self-contained book, as an article in a magazine or some other printed periodical, or as an item to be included in a bulletin or newsletter. As a result, manuscripts require some special considerations concerning format.

NOTE: Most publishers now require authors to submit their manuscripts electronically as well as in the form of hard copy. Whenever possible, try to determine a publisher's manuscript submission requirements and preferences in advance.

Preparing Manuscript for an Article

1432 If you have been invited to write an article for a specific publication, ask the editor for concrete guidelines on matters of format—line length, spacing, paragraph indentation, heading style, preferences in capitalization and punctuation, overall length of article, and so on. You may also want to ask for guidance on content.

1433 If you are writing an article only with the hope that it may be accepted by a certain publication, you will enhance your chances of favorable consideration by imitating all aspects of the publication's format and style. If the publisher has prepared a set of guidelines for writers, request a copy.

a. In particular, try to type your manuscript on a line length that equals an average line of copy in the finished publication. A manuscript prepared in this way will make it easy for the editor to determine how much space your article will fill in the publication. To determine the appropriate line length, type 10 to 20 lines—on a line-for-line basis—from a representative article. Observe at what point most lines end, and set your margins accordingly.

b. Even if the publication puts two or more columns on a page, type only one column on a manuscript page. The wider margins will provide space for editing.

c. Type your manuscript double-spaced to allow room for editing.

d. Be sure to keep the overall length of your manuscript within the range of the materials typically used by the intended publication. There is little point in submitting a 2000-line manuscript to a publication that carries articles of no more than 500 lines.

NOTE: Your software very likely has a feature that will provide the following information you can share with your editor: the number of characters in your

manuscript, the number of words, the number of lines, the number of paragraphs, and the number of pages.

- e. In trying to simulate the character count of a printed line on your computer, use only 1 space after periods, question marks, exclamation points, and colons. If the publication's format calls for indented paragraphs, adjust your normal indentation (typically 0.5 inch) to match the one used by the publication.

Preparing Manuscript for a Book

The following guidelines will be of use if you are writing a book or assisting someone who is, without specific instructions from a publisher.

1434 If the manuscript will consist essentially of regular text matter (with perhaps a few tables and illustrations), then in establishing a format for your manuscript, you can follow the standard guidelines for a formal report with respect to spacing, headings, page numbering, and other aspects involved in typing the front matter, the body, and the back matter. Use 1.5-inch side margins to provide extra space for editing.

NOTE: A book manuscript should not be bound.

1435 If you think your manuscript, when set in type, will require a special format—for example, a larger-than-usual page size to accommodate extremely wide tables, to permit notes and small illustrations to run alongside the text, or to allow for a two-column arrangement for the printed text—then the easiest way to establish a format for your manuscript page is to select a published work that has the kind of format and font size you have in mind. Then, on your computer, type a full page of representative printed text—on a line-for-line basis, if possible—to determine the manuscript equivalent of a printed page. (If a printed line is too long to fit on one typed line and still leave side margins of 1.5 inches, choose some other format that you can readily execute.) The important thing is to determine how many pages of manuscript equal a page of printed text. Then, as you develop the manuscript, you can exercise some real control over the length of your material.

Precautions for All Manuscripts

1436 When sending material to a publisher, always retain a duplicate copy in case the material goes astray in the mail or the publisher calls to discuss the manuscript.

NOTE: When you prepare your manuscript on a computer, be sure to save an electronic copy of your material. If you are subsequently asked to make changes in the manuscript, you can readily do so and then print a corrected manuscript.

1437 As soon as it is written, your unpublished manuscript is automatically protected by the copyright law without your putting a copyright notice on it or registering it with the U.S. Copyright Office. If you are concerned that someone may copy your material without giving you appropriate credit or compensation, you may place a copyright notice on the first page (*Copyright © [current year] by [your name]*) to call attention to your ownership of the material. Since the copyright law protects only the written expression of your ideas and not the ideas themselves, you should obtain the help of a lawyer if you have an original publishing idea that you are afraid may be misappropriated.

Footnotes, Endnotes, and Textnotes

Functions of Notes

1501 a. In a report or manuscript, *notes* serve two functions: (1) they provide *comments* on the main text, conveying subordinate ideas that the writer feels might be distracting if incorporated within the main text; and (2) they serve as *source references*, identifying the origin of a statement quoted or cited in the text.

Comment

¹The actual date on which Governor Galloway made this statement is uncertain, but there is no doubt that the statement is his.

Source Reference

¹William J. O'Neil, *How to Make Money in Stocks: A Winning System in Good Times and Bad*, 4th ed., McGraw-Hill, New York, 2009, p. 89.

b. Notes at the foot of a page are called *footnotes*. (See ¶¶1503–1504.)

an incredible range of bloopers to be found in classified ads. One anthology contains these gems: “Dog for sale: eats anything and is fond of children.” “Illiterate? Write today for free help.” “Auto Repair Service. . . . Try us once, you’ll never go anywhere again.”¹

¹Richard Lederer, *Anguished English*, Wyrick, Charleston, S.C., 1987, p. 38.

► For a discussion of whether to type the note number as a superscript (as shown above) or on the line, see ¶1536b; for a discussion of default formats provided by word processing software, see ¶1503.

Continued on page 548

¶1501

- c. When notes appear all together at the end of a complete report or manuscript (or sometimes at the end of each chapter), they are called *endnotes*. (See ¶¶1505–1506.)

NOTES

1. Richard Lederer, *Anguished English*, Wyvern, Charleston, S.C., 1987, p. 38.
2. Ibid., pp. 39-40.

► For a discussion of default formats provided by word processing software, see ¶1505.

- d. When source references appear parenthetically within the main text, they are called *textnotes*. (See ¶1507.)

but the proper use of punctuation can sometimes have serious financial consequences.
Consider the following predicament.

We came upon a writer at his work Quite casually he mentioned that he was getting fifty cents a word. A moment or two later his face became contorted with signs of an internal distress. With his hand poised above the machine, he seemed to be fighting something out with himself. . . . “Listen,” he said, grimly, “do you hyphenate ‘willy-nilly’?” We nodded, and saw him wince as he inserted the little mark, at the cost of half a dollar. (E. B. White, “The Cost of Hyphens,” *Writings From The New Yorker: 1927–1976*, HarperCollins, New York, 1991, p. 17.)

- e. Footnotes or endnotes are ordinarily keyed by number to a word, phrase, or sentence in the text. Textnotes (which appear parenthetically at the desired point of reference right in the text itself) do not have to be keyed this way.
- f. Endnotes have grown in popularity because they leave the text pages looking less cluttered and less complicated. They do present one drawback, however: the reader does not know in each instance whether the endnote will contain a comment of substance (which is typically worth reading) or simply a source reference (which is usually of interest only in special cases).
- g. Textnotes have grown in popularity for the same reason: lack of clutter. While it is possible to provide in a textnote all the information that a source reference typically contains, writers more often use a textnote to provide an abbreviated reference in the text, with the understanding that the reader who wants complete information can consult a bibliography at the back of the report or manuscript. (See ¶1507 for examples of these abbreviated references.)

- h.** To take advantage of the benefits and avoid the drawbacks of these three types of notes, some writers use a hybrid system: they treat *comments* as footnotes and *source references* as endnotes or textnotes. In this way comments of substance are conveniently positioned at the bottom of the page, whereas all or most of the information about sources is tucked out of sight but accessible when needed. (See ¶1502g.)

Text References to Footnotes or Endnotes

- 1502 a.** To indicate the presence of a comment or a source reference at the bottom of the page or in a special section at the end of the report or manuscript, insert a *superscript* (a raised figure) following the appropriate word, phrase, or sentence in the text.

NOTE: The *footnote* or *endnote* feature of your word processing software will insert superscripts in the text wherever you wish. (See *b* below for examples.)

- b.** There should not be any space between the superscript and the preceding word. If a punctuation mark follows the word, place the superscript immediately after the punctuation mark. (There is one exception: the superscript should precede, not follow, a dash.)

A research study published last month by a leading relocation consulting firm² provides the basis for the recommendations offered in Chapter 5.

The alternative approaches discussed in this report have been taken largely from an article entitled "Getting a Handle on Health Care Costs."¹

An article entitled "Getting a Handle on Health Care Costs"¹—written by an eminent authority in the field—was the source of the alternative approaches discussed in this report.

- c.** While the superscript should come as close as possible to the appropriate word or phrase, it is often better to place the superscript at the end of the sentence (if this will cause no misunderstanding) so as to avoid distracting the reader in the midst of the sentence.

ACCEPTABLE: Her latest article, "Automating the Small Legal Office,"¹ was published about three months ago. I urge you to read it.

PREFERABLE: Her latest article, "Automating the Small Legal Office," was published about three months ago.¹ I urge you to read it.

NOTE: Leave 1 or 2 spaces after a superscript that follows the punctuation at the end of a sentence. (See ¶102.)

- d.** When a paragraph calls for two or more footnotes or endnotes, try to combine all the necessary information within one note if this can be done without any risk of confusing the reader. This approach will reduce the sense of irritation that a large number of footnotes or endnotes tend to produce.

¶1503

NOTE: When this approach is used, the superscript is typically placed after the last word in the sentence or paragraph, depending on how the text references are dispersed.

AVOID: The following analysis draws heavily on recent studies undertaken by Andrew Bowen,¹ Frances Kaplan,² and Minetta Coleman.³

¹Andrew Bowen, . . .

²Frances Kaplan, . . .

³Minetta Coleman, . . .

PREFERABLE: The following analysis draws heavily on recent studies undertaken by Andrew Bowen, Frances Kaplan, and Minetta Coleman.¹

¹Andrew Bowen, . . . ; Frances Kaplan, . . . ; and Minetta Coleman,

e. The numbering of footnotes or endnotes may run consecutively throughout or begin again with each new chapter.

f. Footnotes and endnotes are sometimes keyed by symbol rather than by number. This often occurs in tables with figures and in technical material with many formulas, where a raised figure—though intended to refer to a footnote or endnote—could be mistaken for part of the table text or the formula. When the use of symbols is appropriate, choose one of the following sequences:

* † ‡ § ¶ OR: a b c d e

These tests confirmed that there was a reduction over time of the flexural strength of the marble unit from 1400 to 1200 lb/in².†

(**NOT:** These tests confirmed that there was a reduction over time of the flexural strength of the marble unit from 1400 to 1200 lb/in².²)

g. If you wish to treat *comments* as footnotes and *source references* as endnotes (as suggested in ¶1501h), use *symbols* for the notes containing comments (at the bottom of the page) and use *figures* for the notes containing source references (at the end of the report or manuscript).

Footnotes

1503 a. When you create footnotes using the *footnote* feature of a word processing program, the software will automatically position your footnotes at the bottom of the page where the footnote reference appears in the text. The software will also

(1) insert a horizontal line to separate the footnotes from the text above, (2) continue a footnote on the following page if it is too long to fit as a whole on the page where it started, and (3) automatically number your footnotes. If subsequent additions or deletions in the text cause the text reference to shift to another page, the related footnote will automatically shift as well. If a footnote is subsequently inserted or deleted, all the remaining footnotes (and their related text references) will be automatically renumbered from that point on.

b. The first illustration on page 551 shows you how your footnotes will look if you use the footnote feature of Microsoft Word and accept all the defaults. Note the

following details: (1) no extra space is inserted between the horizontal rule and the first footnote; (2) no extra space is inserted between footnotes; (3) the first line of each footnote begins at the left margin; (4) an ordinal abbreviation such as *th* (in the phrase *11th ed.*) appears as a superscript (*11th ed.*); and (5) the footnote automatically appears in a font size smaller than that of the main text.

into the new century.¹ According to one source:

The Internet isn't really one network—it's a network of networks, all freely exchanging information. The networks range from the big corporate networks to tiny ones (such as the one in John's back bedroom, made from a couple of old PCs bought at an electronics parts store) and everything in between.²

¹ For a comprehensive analysis of these technological developments in the eighties and nineties, see Chap. 2, pp. 29–38.

² John R. Levine et al., *The Internet for Dummies*, 11th ed., Wiley, Hoboken, N.J. 2007, p. 10.

- c. In the standard format most commonly used, a horizontal rule 2 inches long appears 1 line below the text (as in the illustration below). Note the other distinctive aspects of the standard format: (1) a blank line is inserted between the horizontal rule and the first footnote; (2) a blank line is inserted between each footnote; (3) the first line of each footnote is indented 0.5 inch; (4) ordinal abbreviations are placed on the line (for example, *2d ed.*, *3d ed.*, *4th ed.*); and (5) the font size is the same as that of the main text.

¹ For a comprehensive analysis of these technological developments in the eighties and nineties, see Chap. 2, pp. 29–38.

² John R. Levine et al., *The Internet for Dummies*, 11th ed., Wiley, Hoboken, N.J. 2007, p. 10.

NOTE: Whether you are writing business or academic reports or developing manuscript for a particular publisher, you will be expected in most cases to follow a prescribed style for footnotes (unless, of course, you are required to use endnotes).

Continued on page 552

¶1504

or textnotes instead). In situations where no format is prescribed but professional editorial standards have to be met, follow the standard format illustrated above.

► *For guidelines on how to construct footnotes, see ¶¶1513–1544.*

1504 When dealing with footnotes, consider the following guidelines.

- a. If the text runs short on a page (say, the last page of a chapter), any footnotes related to that text should still be positioned at the *foot* of the page.
- b. Ordinarily, single-space each footnote, but in material that is to be edited, use double spacing to allow room for the editing.
- c. Type the footnote number as a superscript or on the line. (See ¶1536b for details on spacing and punctuation.)
- d. Ideally, the *complete* footnote should appear on the same page as the superscript figure or symbol that refers to it. Occasionally, however, a footnote may be so long that it will not all fit on the page, even if it begins immediately following the line of text in which the superscript figure or symbol occurs. In such a case the *footnote* feature of your word processing software will automatically break the footnote and complete it at the bottom of the next page; it will also automatically insert a horizontal rule on the continuation page to separate the main text from the footnote. (Microsoft Word 2007 extends that horizontal rule all the way across the page.) The illustrations below show how a footnote that continues from one page to another should appear in the standard format.

Start of a Long Footnote

and computers should not be used to write thank-you notes.²

²Judith Martin (in *Miss Manners' Basic Training: Communications*, Crown, New York, 1998, p. 37) clearly supports this position: "Thank-you letters should be written by hand. Miss Manners . . . grants exemptions

Continuation of a Long Footnote

on which there still is a considerable difference of opinion.³

only to people with specific physical disabilities that prevent them from writing. Those who claim illegible handwriting should be home practicing their penmanship instead of bragging about it."

³Baldridge, p. 593.

NOTE: If you have a number of long notes that may not easily fit on the page where they are first referred to, you have an excellent reason for abandoning the footnote format and using endnotes instead. (See ¶¶1505–1506.)

- For the treatment of footnotes that pertain to a table, see ¶¶1634–1636.

Endnotes

- 1505**
- a. The *endnote* feature of a word processing program will automatically position all endnotes at the end of the document. If you add or delete endnotes, all the remaining endnotes (and their related text references) will be automatically renumbered from that point on.
 - b. The endnote feature will also automatically format the endnotes for you. Here is how your endnotes will look if you accept all the defaults of the endnote feature of Microsoft Word 2007. Note that the endnote section begins on the same page as the conclusion of the main text, separated by a short horizontal rule starting at the left margin but with no heading (such as *NOTES*) to introduce this section. Note also that each entry begins at the left margin with superscripts in small roman numerals and with no extra space between entries.

Jim Collins, a leading American business consultant and the author of *Good to Great*, has expressed some unconventional views on the attempt by business managers to strike a balance between work and their personal lives.ⁱ

The imperative is to manage our time, not our work. . . . As I look at the most effective people we've studied, a "stop-doing" list or not-to-do-list is more important than a to-do list, because the to-do list is infinite. For every big, annual priority you put on the to-do list, you need a corresponding item on the stop-doing list.ⁱⁱ

ⁱ Jena McGregor, "Good to Great Expectations," *BusinessWeek*, August 25–September 1, 2008, p. 132.

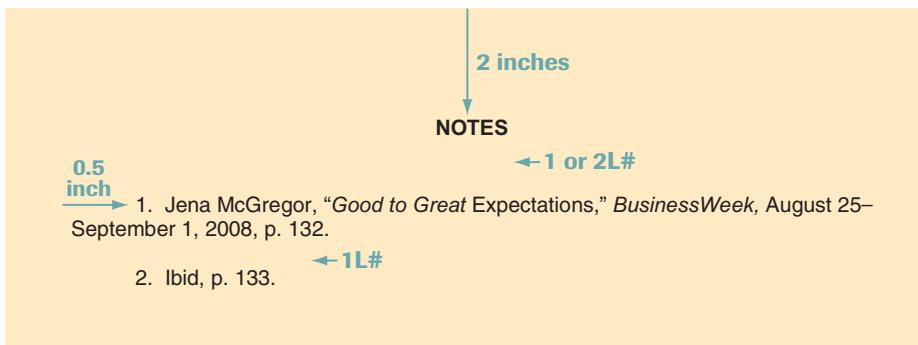

ⁱⁱ Ibid, p. 133.

- 1506** If you prefer to create your own format for endnotes, consider the following guidelines. (The illustration on page 554 reflects these guidelines.)

- a. For better readability, use arabic rather than roman numerals in the text and the endnotes. The numbers in the endnotes sometimes appear as superscripts, but the on-the-line style is more commonly used.

¶1506

- b.** Indent the first line of each endnote 0.5 inch. The turnovers should start at the left margin.
- c.** On a new page type the heading *NOTES*, centered in bold caps, approximately 2 inches from the top of the page.
NOTE: If the document consists of only one chapter, the endnotes may begin on the same page where the main text ends. In that case leave about 3 blank lines before the heading and 1 or 2 blank lines after it.
- d.** Ordinarily, single-space each endnote, but in material that is to be edited, use double spacing to allow room for the editing. In either case leave 1 blank line between endnotes.

- e.** Use the same margins as for other pages in the body of the report or manuscript (see ¶¶1404–1406), and treat the numbering of these pages as described in ¶1427f–g.

► *For guidelines on how to construct source reference endnotes, see ¶¶1513–1544.*

- f.** If the numbering of endnotes starts again with each new chapter or with each new page, insert an appropriate heading—*Chapter 1*, *Chapter 2*, etc., or *Page 1*, *Page 2*, etc.—above each sequence of endnotes in this section. Type the heading at the left margin in caps and lowercase (using boldface, italics, or underlining), and leave 2 blank lines above and 1 blank line below.

NOTE: If the numbering of endnotes is consecutive throughout, no headings are needed.

- g.** Insert this special section of endnotes in the back matter following any appendices. If no appendix is given, the endnotes begin the back matter. (See also ¶1428.)

NOTE: When the individual chapters of a report or a manuscript are prepared by different writers, it may be advantageous to have the endnotes that each author prepares inserted at the end of the respective chapter instead of redoing all the

endnotes as one continuous section in the back matter. If this approach is used, expand the heading *NOTES* in each case to read *NOTES TO CHAPTER 1*, *NOTES TO CHAPTER 2*, and so on. The disadvantage of this approach is that the reader will have a bit more difficulty locating the notes for each chapter than is true when all the endnotes are presented in one section at the very end.

Textnotes

- 1507** a. In a report or manuscript with only a few source references and no bibliography at the end, the complete source data may be inserted within the text in the form of parenthetical textnotes. (See the illustration below.)

► *For guidelines on how to construct source reference textnotes, see §§1513–1544.*

recommended by the U.S. Postal Service. As for the abbreviations devised to hold down the length of place names in addresses, here is what one authority had to say:

And all you people with beautiful words in your addresses: Cut 'em down. There's a bright golden haze on the MDWS; a fairy dancing in your GDNS; and a safe HBR past the happy LNDG at the XING, where no hope SPGS. Environmentalists are now GRN, as in how GRN was my VLY. . . . Is the language not lessened when words like *meadow*, *gardens*, *harbor*, *landing*, *crossing*, *green*, *valley*—even *islands* (*ISS*)—are disemvoweled? (William Safire, *In Love With Norma Loquendi*, Random House, New York, 1994, p. 166.)

NOTE: If some of the data called for in a source reference is already provided in the main text, there is no need to repeat it in the textnote.

recommended by the U.S. Postal Service. As for the abbreviations devised to hold down the length of place names in addresses, here is what William Safire had to say:

And all you people with beautiful words in your addresses: Cut 'em down. There's a bright golden haze on the MDWS; a fairy dancing in your GDNS; and a safe HBR past the happy LNDG at the XING, where no hope SPGS. Environmentalists are now GRN, as in how GRN was my VLY. . . . Is the language not lessened when words like *meadow*, *gardens*, *harbor*, *landing*, *crossing*, *green*, *valley*—even *islands* (*ISS*)—are disemvoweled? (*In Love With Norma Loquendi*, Random House, New York, 1994, p. 166.)

¶1507

- b.** In a report or manuscript that contains a number of source references *and* a complete bibliography, textnotes may be used as follows:
- (1) At the appropriate point in the main text, supply the author's last name and the appropriate page number in parentheses. The reader who wants more complete information can consult the full entry in the bibliography.
According to a fine book on time management (Bittel, p. 27), your ability to manage time depends in part on the way you experience the passage of time.
NOTE: Some authorities omit *p.* and *pp.* as well as the comma between the name and the page number. For example:
... book on time management (Bittel 27) ...
 - (2) If the author's name already appears in the main text, give only the page number in parentheses.
Lester R. Bittel, in his fine book *Right on Time!* (p. 27), says that ...
 - (3) If the bibliography lists more than one publication by the same author, then in the textnote use an abbreviated title or the year of publication to indicate which publication is being referred to.
According to a fine book on time management (Bittel, *Time*, p. 27), ...
OR: ... a fine book on time management (Bittel, 1991, p. 27), ...
 - (4) If the bibliography lists publications by two or more authors with the same surname, use each author's first name or initial along with the surname. For example:
According to a fine book on time management (L. Bittel, p. 27), ...
 - (5) If the entries in the bibliography are numbered in sequence (see ¶1547c), then the textnote can simply list the appropriate "entry number" along with the page reference. Italicize or underline the entry number to distinguish it from the page number, especially if the abbreviation *p.* or *pp.* is omitted. For example:
According to a fine book ... (18, p. 27), ... **OR:** (18, p. 27), ...

Notes Based on Online Sources

Business and academic writers increasingly rely on the Internet rather than on printed materials as the source of information to be quoted, paraphrased, or summarized in the reports and manuscripts they prepare. Hence the critical need for guidelines on how to construct *online citations*—that is, footnotes, endnotes, and bibliographic entries that are based on online sources.

One feature that distinguishes a citation based on an online source from one based on printed material is the inclusion of an *online address*—an element that takes the place of information about the name and location of the publisher. There are two major types of online addresses: a URL (discussed in ¶1508) and an e-mail address (discussed in ¶1509).

A citation of an online source may also include a *posting date* and an *access date*. The former, essentially a publication date, indicates when the material was posted online; the latter, when the material was retrieved for use.

- For a guideline on posting dates and access dates, see ¶1511b.
- For instructions on how to cite specific types of online sources, see these paragraphs:

Online book: see ¶1513c.

Online newspaper: see ¶1522.

Online magazine: see ¶1523a.

Online newsletter, bulletin, pamphlet, or monograph: see ¶1525.

Online dissertation: see ¶1526.

Independent Internet document: see ¶1534.

Message posted to Internet forum, newsgroup, or electronic mailing list: see ¶1535.

Dealing With URLs

1508 Every unit of information on the Internet has its own unique address—a uniform resource locator, commonly referred to as a URL and pronounced as individual letters (*you-are-el*) or as a word (*earl*). (See ¶501b.) A URL represents not only the storage location of a particular document on the Internet but also the means by which a document can be retrieved. If a URL is not accurately presented in an online citation, it will be impossible to locate the material being cited.

A URL consists of at least two parts: (a) the *protocol* (the name of the system to be used in linking one computer with another on the Internet) and (b) the *host name* (the name of the host computer where the desired material is stored). Here, for example, is the URL for Yahoo!, a large directory of Web pages.

Protocol Host Name

http://www.yahoo.com

a. **Protocol.** There are a number of protocols that you can use to locate material stored on another computer on the Internet.

- **HTTP (Hypertext Transfer Protocol).** The most widely used of all the protocols, HTTP permits you to surf the World Wide Web—that part of the Internet that provides access not only to text material but also to photographs, drawings, animations, and video and sound clips.
- **FTP (File Transfer Protocol).** FTP permits you to transfer text material from an *ftp server* (the host computer where the desired material is stored) to your own computer.
- **Usenet.** Usenet is a network consisting of thousands of newsgroups (discussion groups each focused on a particular topic of interest). A message posted to a particular newsgroup can be read and commented on by any interested member of that newsgroup, and those comments may prompt additional rounds of comments. The original message (known as an *article*) and the subsequent series of comments create what is known as a *thread*. Users doing research on Usenet have the option of citing only the article, one or more of the comments, or the entire thread.

1508

- **Gopher.** Gopher permits you to access text plus graphical and audio materials, but it first provides you with a series of menus that become progressively more specific until you locate the information you are looking for.
- **Telnet.** Telnet permits you to log on to another computer on the Internet and retrieve the desired information located there.

When these protocols appear as the first part of a URL, they are represented as follows:

HTTP: http://	Telnet: telnet://	Gopher: gopher://
FTP: ftp://	Usenet: news://	

Note the use of a colon and two forward slashes (://) to set off the protocol from the rest of the URL. For example:

HTTP: http://www.mhhe.com/grm	Telnet: telnet://telnet.ncf.carleton.ca	Gopher: gopher://
FTP: ftp://ftp.cdc.gov/pub/Publications/womens_atlas		

- b. Host Name.** The second part of a URL—the host name—consists of several elements separated by *dots* (never referred to as *periods*). Here are some representative host names as they appear in Web-based URLs:

Protocol	Host Name
eBay:	http://www.ebay.com
Gateway:	http://www.gateway.com
Intel:	http://www.intel.com
PBS Online:	http://www.pbs.org
NASA:	http://www.nasa.gov
EarthLink	http://www.earthlink.net

In the host names shown above, the first element—*www*—refers to the World Wide Web. The second and third elements—for example, *.ebay.com* (referred to as *dot-ebay-dot-com*)—represent the domain name. The second element often reflects some form of the organization's name. The third element is usually a three-letter unit preceded by a dot; it is called a *top-level domain* (TLD), and it indicates the type of organization that owns the host computer. Here is a list of the seven original TLDs:

.com	commercial organization	.mil	military site
.edu	educational institution	.net	network organization
.gov	government body or agency	.org	nonprofit or noncommercial organization
.int	international organization		

The following seven TLDs were established in 2000:

.biz	provider of business services
.info	provider of information services
.pro	provider of professional services
.aero	airline organization or group
.coop	business cooperative
.museum	museum
.name	personal Web site

Computers outside the United States usually have host names ending in a two-letter country code. For example:

.ca	Canada	.fr	France	.jp	Japan
.cl	Chile	.gr	Greece	.ru	Russia
.cn	China	.ie	Ireland	.sa	Saudi Arabia
.de	Germany	.it	Italy	.uk	United Kingdom

The following URL for the government of Tasmania reveals that the host computer is located in Australia:

<http://www.tas.gov.au>

- c. **File Name.** A URL may also provide a file name as the final element. For example, the following URL directs a Web browser to retrieve a file named *iway.html* from a host computer named *www.cc.web.com* using the hypertext transfer protocol.

Protocol Host Name File Name

<http://www.cc.web.com/iway.html>

NOTE: A *swung dash* (~)—also referred to as a *tilde*—is sometimes used to introduce a file name. For example:

<http://www.netaxs.com/~harrington>

- d. **Path.** A URL may also include one or more elements between the host name and the file name. These elements indicate the electronic path to be taken (after the host computer is reached) in order to locate the desired file. For example:

Protocol Host Name Path File Name

http://www.yahoo.com/Computers/World_Wide_Web/HTML_Editors/

- e. URLs are usually typed all in lowercase letters, but when capital letters appear, follow the style of the particular URL exactly as shown (as in the example in d above). Also note that spaces between words in any part of a URL have to be signified by means of an underline (as in the example above) or some other mark of punctuation such as a hyphen (as in the example below).

<http://www.cis.ohio-state.edu/hypertext/faq/usenet/FAQ-List.html>

- f. When Web-based URLs are given in documents and publications aimed at computer professionals, the protocol *http://* is often omitted; the fact that the host name begins with *www* makes it clear to knowledgeable readers which protocol is to be used. When constructing your own online citations, consider how much your readers know. As a general rule, it is safer to insert the protocol at the start of a URL, even if it was omitted in your source.

Dealing With E-Mail Addresses

- 1509** An e-mail address consists of several elements. Consider the following examples:

mschneider@attbi.com lcomerford@earthlink.net

The first part (*mschneider* or *lcomerford*) is the user's name, and it is followed by an *at* sign (@). The second part (*attbi* or *earthlink*) is the name of the host computer. The

Continued on page 560

¶1510

third part (*.com* or *.net*) is the *top-level domain* (TLD), and it is always preceded by a dot. TLDs indicate the type of organization that owns the host computer or the geographical location in which the host computer is located. (For a list of the most commonly used TLDs, see ¶1508b.)

► For a detailed discussion of e-mail, see ¶¶1375–1389.

Dividing Online Addresses

- 1510** a. **URLs.** Always try to fit a URL on one line. If it becomes necessary to divide a URL at the end of a line, observe the following guidelines.
- (1) Never insert a hyphen within an online address to signify an end-of-line break.
 - (2) You may break after the double slash (//) that marks the end of a protocol (but not within the protocol itself).

Acceptable Line Ending

http://

(NOT: http:)

Next Line

www.nowonder.com

(NOT: //www.nowonder.com)

- (3) You may break *before* (but never after) a dot (.), a single slash (/), a hyphen (-), an underline (_), or any other mark of punctuation.

Acceptable Line Ending

http://www

(NOT: http://www.)

http://www.mcgraw

(NOT: http://www.mcgraw-)

http://www.senate.gov

(NOT: http://www.senate.gov/)

Next Line

.pbs.org

(NOT: pbs.org)

-hill.com/

(NOT: hill.com/)

/~hagel

(NOT: ~hagel)

NOTE: Some authorities now allow a URL to be broken *after* a single slash.

- b. **E-Mail Addresses.** Always try to fit an e-mail address on one line. If it becomes necessary to divide it at the end of a line, observe the following guidelines.

- (1) Never insert a hyphen within an e-mail address to signify an end-of-line break.
- (2) You may break before the *at* symbol (@) or before a dot.

Acceptable Line Ending

wryter6290

(NOT: wryter6290@)

pbenner@lincoln

(NOT: pbenner@lincoln.)

Next Line

@aol.com

(NOT: aol.com)

.midcoast.com

(NOT: midcoast.com)

Making Use of Online Sources

- 1511** Making use of online sources can pose special problems. After you have quoted or made reference to certain online materials in your report or your manuscript, the person who originally posted the material may later decide to change it or transfer

it to a new location (with a new URL or e-mail address) or remove it from the Internet altogether. If any of these things should happen, readers who try to confirm the accuracy of your citations may very well draw unfair conclusions about your competence as a researcher and as a writer. To protect yourself against these potential problems, take the following precautions.

- a. Every online document that you plan to cite should be saved in the form of hard copy and as part of your backup files. If the document is very long, save at least enough of the document to establish the full context from which the cited material was taken. In that way you can always demonstrate—if the need arises—that you have not taken the material out of context or distorted its intended meaning.

NOTE: Since much online material originally appeared in print (a much more stable medium), refer whenever possible to the printed source rather than the online source.

- b. In your citations of online material, include not only the date on which the material was posted on the Internet but also the date on which you accessed the material. Then if the material is subsequently changed or removed, you will still be able to prove the accuracy of your citation if you have retained a hard copy of the cited material. As an extra precaution, recheck your online citations just before you submit your work; in that way you can make any last-minute adjustments that are necessary.
- c. When URLs or e-mail addresses appear in footnotes, endnotes, bibliographies, or even the main text, enclose each address in angle brackets (<>). The use of angle brackets makes it clear where a URL begins and ends. Otherwise, a reader might mistakenly consider the sentence punctuation that follows the URL to be an integral part of the URL. Moreover, when a long URL is divided at the end of a line, a reader might become confused if there is no closing angle bracket to clearly signal where the URL ends. If you are writing for knowledgeable readers who are accustomed to dealing with URLs, angle brackets are unnecessary and may be omitted. But for the general reader, it is safer to continue to use them.

NOTE: When you type a URL or an e-mail address using angle brackets, your software may immediately convert that address to a *hyperlink*, turning the address blue, dropping the angle brackets, and adding an underline. If the document is to be e-mailed or is to be posted on a Web site, the hyperlink format is a great convenience to your readers: with only one click, they will be instantly transferred to the appropriate site. However, if the URL or the e-mail address is to appear in a hard-copy document, the hyperlink format could cause several problems. The loss of the angle brackets could reopen the possibility of confusing a mark of sentence punctuation as part of the electronic address. Moreover, when the complete address is underlined, this obscures any single underline that may have been used to signify a space between elements in the address (for example, *roy_w_poe*). In circumstances where the hyperlink format creates a

¶1512

problem rather than a convenience, change the color from blue back to black, reinsert the angle brackets, and remove the full-length underline. (Any essential underlining between words will remain in place.) Your software user's manual may provide a simpler way to achieve this result.

- d.** Always present a URL exactly as it is given. Never alter the capitalization, the internal spacing, or the symbols used. If you fail to provide an accurate Web address, it may be impossible for a reader to locate the site that you have indicated. (See ¶1508e–f.)
- e.** As a rule, you should also present an e-mail address exactly as given. (See ¶1377b.)

NOTE: Neither a URL nor an e-mail address should ever contain a blank space. If you want to preserve the appearance of a blank space in your own address, insert an underline or a dot so that an unobtrusive mark will occupy that space.

Grace_Hoffenberg@gmail.com **OR:** Grace.Hoffenberg@gmail.com

Avoiding Plagiarism

1512 **a.** Whether you are preparing a business report, writing a paper for an academic course, or creating a manuscript for publication, take special care to avoid committing the act of *plagiarism*, that is, passing off the words and ideas of others as your own without giving proper credit to your source. Plagiarism is universally considered a serious offense and can lead to the loss of one's job or expulsion from an academic institution. Under any circumstances, being found guilty of plagiarism does serious damage to one's reputation, and it can permanently affect one's future credibility.

- b.** Although some writers deliberately set out to plagiarize the work of others, many writers unwittingly blunder into plagiarism simply because they are unaware of the various guidelines that indicate when it is necessary to provide proper credit for the words and ideas they have taken from others. For example, it is generally acceptable to paraphrase someone else's words as long as you provide an appropriate citation of your source. However, if you follow the source too closely in your paraphrase or you include exact words from the original source without (1) using quotation marks or (2) displaying the words as an extract, you may have committed plagiarism, even though that was not your intention.

A number of writers mistakenly assume that the guidelines on plagiarism apply only to material found in printed works. But it is equally important to provide an appropriate citation for written and graphical material you have taken from a Web site. Moreover, the guidelines apply just as much to ideas that are not your own and are not considered common knowledge—the ideas of others that you have acquired from speeches at a conference, TV and radio programs, e-mail messages, and even interviews and conversations.

- c.** If you are uncertain about these guidelines, do an Internet search using *plagiarism* as the keyword and you will find a number of excellent Web sites offering detailed analyses and comparative examples that distinguish responsible research from accidental plagiarism.

Consult, for example, the following Web sites:

- <http://www.princeton.edu/pr/pub/integrity/pages/plagiarism.html>
- <http://www.dartmouth.edu/~writing/sources/sources-citation.html>
- http://www.writing.northwestern.edu/avoiding_plagiarism.html
- <http://owl.english.purdue.edu/owl/resource/589/01/>
- <http://www.indiana.edu/~wts/pamphlets/plagiarism.shtml>

Constructing Source Reference Notes

The following guidelines provide a number of patterns for constructing source reference notes—whether in the form of footnotes, endnotes, or the type of textnote discussed in ¶1507. These patterns focus on the source materials most commonly referred to—for example, books, professional journals, magazines, and newspapers. For each type of source material discussed in the following paragraphs, patterns are provided for items that may appear only in printed form or only in electronic form or, in an increasing number of cases, in both forms.

It is impossible for the following discussion to cover every contingency that you may encounter when constructing these notes, so you may need to modify a particular pattern to fit a particular situation. In doing so, remember that the key goal of source reference notes is to make it easy for your readers to locate any of the sources that you cite. Therefore, in special situations, providing more information than a particular pattern calls for could serve the best interests of your readers. Naturally, your freedom to make such changes may be quite limited if you have been instructed to adhere to a particular citation style.

There is, of course, no universal agreement among authorities on how these notes should be constructed. Rather, there are several schools of thought on the subject, and within each school there are variations between one reference manual and another.

Of all the well-established conventions and variations, the style best suited for business use—and the one presented here—is a style that employs the simplest punctuation and the most straightforward presentation of the necessary data without any sacrifice in clarity or completeness. However, certain professional organizations—for example, the American Psychological Association (the APA)—have each established a distinctive style, the use of which sometimes shows up in other fields. Moreover, slightly different patterns are often used in academic materials, such as those featured in *The MLA [Modern Language Association] Style Manual* and *The Chicago Manual of Style*. If you are one of the many full-time business workers who are simultaneously taking one or more academic courses or are one of the many full-time academic students who are concurrently holding down part- or full-time office jobs, you may need to familiarize yourself with more than one style. Note that along with the basic pattern for citing book titles (see ¶1513), you will find an “academic” variation that you may need to use from time to time. However, unless you are specifically directed to follow a particular style, the following all-purpose patterns—based on well-established conventions—should meet your needs in virtually every type of situation you encounter.

¶1513

For information about specific elements within these patterns, see these paragraphs:

- ➡ *Note number: see ¶1536.* *Place of publication: see ¶1540.*
- Names of authors: see ¶1537.* *Date of publication: see ¶1541.*
- Title of the work: see ¶1538.* *Page numbers: see ¶1542.*
- Publisher's name: see ¶1539.* *Subsequent references: see ¶¶1543–1544.*

Patterns of Source Reference Notes

1513 Book Title: Basic Pattern

a. Business Style

¹Author, *book title*, publisher, place of publication, year of publication, page number [if reference is being made to a specific page].

¹Tom Wheeler, *Mr. Lincoln's T-Mails: How Abraham Lincoln Used the Telegraph to Win the Civil War*, Collins Business, New York, 2008, p.1.

OR:

1. Tom Wheeler, *Mr. Lincoln's T-Mails: How Abraham Lincoln Used the Telegraph to Win the Civil War*, Collins Business, New York, 2008, p.1.

NOTE: If any of these elements have already been identified in the text (for example, the author's name and the book title), they need not be repeated in the note. Moreover, if reference is made to the book as a whole rather than to a particular page, omit the page number. In the following illustration, observe that the quoted material requires more than three lines. For that reason, it is indented 0.5 inch from each side margin. (See ¶1424d.)

The introduction of the telegraph was as revolutionary in its own time as the introduction of e-mail has been in ours. Here is how Tom Wheeler describes the situation in *Mr. Lincoln's T-Mails: How Abraham Lincoln Used the Telegraph to Win the Civil War*.

Abraham Lincoln was fully engaged, making inquiries and receiving reports from the battlefield. The tool that allowed the president to become so engaged was the telegraph. . . .

Like his countrymen and his government, Abraham Lincoln had to learn how to use the telegraph. Lincoln's challenge, of course, was that his learning curve occurred amidst a military conflict to determine the fate of the national union.¹

¹Collins Business, New York, 2008, p. 1.

b. Academic Style

¹Author, *book title* (place of publication: publisher, year of publication), page number [if reference is being made to a specific page].

¹Tom Wheeler, *Mr. Lincoln's T-Mails: How Abraham Lincoln Used the Telegraph to Win the Civil War* (New York: Collins Business, 2008), p.1.

NOTE: The key distinction between the business style and the academic style lies in a slightly different sequence of elements and a slightly different form of punctuation:

BUSINESS STYLE: . . . publisher, place of publication, year of publication . . .

ACADEMIC STYLE: . . . (place of publication: publisher, year of publication) . . .

The following patterns for books (in ¶¶1514–1521) show only the business style. However, you can readily convert them to the academic style by simply changing the treatment of publisher, place of publication, and year of publication.

► *For the academic style for entries in bibliographies, see ¶1549c.*

c. Citing Online Books

- (1) If a printed book has been made available online and you have consulted the online version, you need to add only two elements at the end of the basic pattern for books: the URL and the date on which you accessed this source.

¹Author, *book title*, publisher, place of publication, year of publication, page number [if needed], <URL>, **accessed on** date.

¹William Still, *The Underground Railroad*, Porter & Coates, Philadelphia, 1872, <<http://invictus.quinnipiac.edu/ugrrmain.html>>, accessed on May 28, 2010.

- (2) If a book has never been published in a printed form and is available only online, use this pattern:

¹Author, *book title*, page number [if needed], date of posting,* <URL>, **accessed on** date.

¹David Gettman, *The Twinkle Theory*, n.d., <<http://www.onlineoriginals.com/freetitles/twinkle.prc>>, accessed on August 10, 2010.

1514 Book Title: With Edition Number

¹Author, *book title*, edition number [if not the first edition], publisher, place, year, page number.

¹Andrew Goodman, *Winning Results With Google AdWords*, 2d ed., McGraw-Hill Osborne, San Francisco, 2009, p. 305.

²James M. Kouzes and Barry Z. Posner, *The Leadership Challenge*, 4th ed., Jossey-Bass, San Francisco, 2008, p. 87. (For the use of *and* rather than & between authors' names, see ¶1537a, note.)

NOTE: Use an edition number only when the book is not in the first edition. If included, the edition number follows the main title and any related elements, such as the subtitle or the volume number and title. (For an example, see ¶1516.) The following forms are commonly used: *2d ed.*, *3d ed.*, *4th ed.*, and *rev. ed.* (for "revised edition").

³Peter F. Drucker, *The Effective Executive: The Definitive Guide to Getting the Right Things Done*, rev. ed., Collins, New York, 2006, p. 402.

⁴Warren Buffett et al., *The Essays of Warren Buffett*, rev. ed., Lawrence A. Cunningham, New York, 2001. (For the use of *et al.* with an author's name, see ¶1537c.)

*If the date of posting cannot be determined, insert the abbreviation *n.d.* (no date).

¶1515

1515 Book Title: With Subtitle

¹Author, *book title: subtitle*, edition number [if not the first edition], publisher, place, year, page number.

¹Louis V. Gerstner Jr., *Who Says Elephants Can't Dance?: Inside IBM's Turnaround*, Harper-Business, New York, 2002, p. 303.

²Phil Harkins and Phil Swift, *In Search of Leadership: How Great Leaders Answer the Question "Why Lead?"* McGraw-Hill, New York, 2009, p. 192. (Omit the comma before the name of the publisher if the subtitle ends with a question mark and a close quotation mark.)

³Joe Vitale and Jillian Coleman Wheeler, *Your Internet Cash Machine: The Insiders' Guide to Making Big Money, Fast!* Wiley, Hoboken, N.J., 2008, p. 57. (Omit the comma before the name of the publisher if the subtitle ends with an exclamation point.)

⁴Nelson W. Aldrich Jr. (ed.), *George, Being George: George Plimpton's Life as Told, Admired, Deplored, and Envied by 200 Friends, Relatives, Lovers, Acquaintances, Rivals—and a Few Unappreciative Observers*, Random House, New York, 2008, p. 423.

NOTE: It is not necessary to supply the subtitle of a book unless it is significant in identifying the book or in explaining its basic nature. If a subtitle is to be shown, separate it from the main title with a colon (unless the title page shows some other mark such as a dash). Italicize the main title and the subtitle. Capitalize the first word of the subtitle, even if it is a short preposition like *for*, a short conjunction like *or*, or an article like *the* or *a*. (See ¶1361.)

⁵G. Victor Hallman and Jerry S. Rosenbloom, *Private Wealth Management: The Complete Reference for the Personal Financial Planner*, McGraw-Hill, New York, 2009, p. 438.

⁶Marianne Spraggins, *Getting Ahead: A Survival Guide for Black Women in Business*, Wiley, Hoboken, N.J., 2009, p. 175.

⁷Nanette Gartrell, *My Answer Is No . . . If That's Okay With You: How Women Can Say No and (Still) Feel Good About It*, Free Press, New York, 2009, p. 62.

1516 Book Title: With Volume Number and Volume Title

¹Author, *book title*, volume number, *volume title*, edition number [if not the first edition], publisher, place, year, page number.

¹E. Lipson, *The Economic History of England*, Vol. 1, *The Middle Ages*, 12th ed., Adam & Charles Black, London, 1959, pp. 511–594.

NOTE: As a rule, do not show the volume title in a note unless it is significant in identifying the book. When the volume title is included, both the volume number and the volume title follow the book title (and subtitle, if any) but precede the edition number. The volume number is usually preceded by the abbreviation *Vol.* or by the word *Book* or *Part* (depending on the actual designation). The volume number may be arabic or roman, depending on the style used in the actual book. Some writers prefer to use one style of volume number throughout the notes. (See also ¶1517.)

1517 Book Title: With Volume Number Alone

¹Author, *book title*, edition number [if not the first edition], publisher, place, year, volume number, page number.

¹Ruth Barnes Moynihan et al. (eds.), *Second to None: A Documentary History of American Women*, Univ. of Nebraska Press, Lincoln, 1994, Vol. II, p. 374.

► For the use of *et al.*, see ¶1537c; for the use of *eds.*, see ¶1537e.

NOTE: When the volume number is shown without the volume title, it follows the date of publication. When the volume number and page number occur one after the other, they may be styled as follows:

Style for Roman Volume Number	Style for Arabic Volume Number
--------------------------------------	---------------------------------------

Vol. III, p. 197 **OR:** III, 197

Vol. 5, pp. 681–684 **OR:** 5:681–684

¹Ruth Barnes Moynihan et al. (eds.), *Second to None: A Documentary History of American Women*, Univ. of Nebraska Press, Lincoln, 1994, II, 374.

Do not use the forms with figures alone if there is a chance your reader will not understand them.

1518 Book Title: With Chapter Reference

¹Author, *book title*, publisher, place, year, chapter number, “chapter title” [if significant], page number.

¹Will Durant and Ariel Durant, *The Age of Napoleon*, Simon & Schuster, New York, 1975, Chap. XII, “Napoleon and the Arts,” pp. 278–285.

NOTE: When a note refers primarily to the title of a book, a chapter number and a chapter title are not usually included. If they are considered significant, however, these details can be inserted just before the page numbers. The word *chapter* is usually abbreviated as *Chap.*, the chapter number is arabic or roman (depending on the original), and the chapter title is enclosed in quotation marks. Some writers prefer to use one style of chapter number throughout the notes.

1519 Selection From Collected Works of One Author

¹Author, “title of selection,” *book title*, publisher, place, year, page number.

¹Charles Darling, “The Musings of Eeyore on the Death of Christopher Robin Milne,” *The Saints of Diminished Capacity*, iUniverse, New York, 2007, pp. 30–31.

1520 Selection in Anthology

¹Author of selection, “title of selection,” in editor of anthology (**ed.**), *book title*, publisher, place, year, page number.

¹Richard K. Wagner, “Smart People Doing Dumb Things: The Case of Managerial Incompetence,” in Robert J. Sternberg (ed.), *Why Smart People Can Be So Stupid*, Yale Univ. Press, New Haven, 2002, pp. 42–63.

²E. B. White, “The Ring of Time,” in Phillip Lopate (ed.), *The Art of the Personal Essay: An Anthology From the Classical Era to the Present*, Anchor, New York, 1997, pp. 538–544.

³Lindsay Van Gelder, “The Great Person-Hole Cover Debate: A Modest Proposal for Anyone Who Thinks the Word ‘He’ Is Just Plain Easier,” in *75 Readings: An Anthology*, 8th ed., McGraw-Hill, New York, 2000, pp. 347–349.

1521 Article in Reference Work

¹Author [if known], “article title,” *name of reference work*, edition number [if not the first edition], publisher [usually omitted], place [usually omitted], year, volume number [may be omitted], page number [may be omitted].

¹Gene Robinson, “Honeybee Genome,” *McGraw-Hill Encyclopedia of Science and Technology*, 10th ed., 2007.

²“Computers,” *The New Encyclopaedia Britannica*, 15th ed., 2002, Vol. 16, pp. 638–652.

³“Digital Technology,” *Guinness World Records 2003*, Bantam, New York, 2003, pp. 249–252.

Continued on page 568

¶1522

NOTE: It is not necessary to give the name of the publisher or the place of publication unless there is some possibility of confusion or the reference is not well known.

⁴*Merriam-Webster's Collegiate Dictionary*, 11th ed., 2009, pp. 23a–30a.

⁵*The American Heritage Dictionary of the English Language*, 4th ed., 2006, pp. xxvi–xxx.

Moreover, if you are making reference to an article or an entry that appears in alphabetic order in the main portion of the work, even the page number may be omitted. If the reference work carries the name of an editor rather than an author, the editor's name is also usually omitted.

⁶"Data Processing," *The Columbia Encyclopedia*, 6th ed., 2007.

1522 Article in Newspaper

¹Author [if known], "article title," *name of newspaper*, date, section number, page number, column number.

¹Robert B. Schonberger, "Ask the Rabbi: What the Sages of Old Would Have Said About the Bailout," *The Wall Street Journal*, December 5, 2008, Sec. W, p.11, col. 1.

OR: . . . December 5, 2008, p. W11, col. 1.

If you have consulted the online version of the newspaper rather than the printed version, use this pattern:

¹Author [if provided], "article title," *name of newspaper*, date, <URL> **accessed on** date.

²Fred A. Bernstein, "A Bird's-Eye View of Tomorrow," *The New York Times*, November 28, 2008, <<http://www.nytimes.com/2008/11/30/realestate/30habi.html?scp=1&sq=A%20Bird%27s%20Eye%20View%20of%20Tomorrow&st=cse>>, accessed on November 30, 2010.

1523 Article in Magazine or Journal**a. Article in Magazine**

¹Author [if known], "article title," *name of magazine*, date, page number.

¹"Protect Yourself Online," *Consumer Reports*, September 2008, pp. 23–25.

²Cliff Edwards, "Security That Won't Slow Down Your PC," *BusinessWeek*, August 18, 2008, p. 60.

³Jerome Groopman, "Superbugs," *The New Yorker*, August 11–18, 2008, pp. 46–55.

Omit the comma between the article title and the name of the periodical if the article title ends with a question mark or an exclamation point.

⁴Nicholas Carr, "Is Google Making Us Stupid?" *The Atlantic*, July–August 2008, pp. 56–63.

⁵Paul Raffaele, "Forget Jaws, Now It's . . . Brains!" *Smithsonian*, June 2008, p. 14.

If you have consulted the online version of the printed magazine or if the magazine exists only in an online format, use this pattern:

¹Author [if known], "article title," *name of magazine*, date, <URL>, **accessed on** date.

⁶Andrew L. Shapiro, "Make Green R&D a Competitive Advantage," *BusinessWeek Online*, August 12, 2008, <http://www.businessweek.com/managing/content/aug2008/ca20080812_067761>, accessed on May 29, 2009.

⁷Derek Thompson, "How Does the Government Know How Much I'm Driving?" *Slate*, <<http://www.slate.com/id/2065896/view/2057067/>>, accessed on August 18, 2010.

NOTE: If any of the elements of the citation have already been identified in the text, they need not be repeated in the note.

Here is how Calvin Trillin defines *turducken*:

It is a Cajun specialty that is made “by taking the bones out of a chicken and a duck and a turkey, stuffing the chicken with stuffing, stuffing the stuffed chicken into a similarly stuffed duck, and stuffing all that, along with a third kind of stuffing, into the turkey.” He goes on to say, “The result cannot be criticized for lacking complexity, and it presents a challenge to the holiday carver almost precisely as daunting as meat loaf.”¹

¹*The New Yorker*, January 28, 2002, p. 47.

b. Article in Professional Journal

¹Author [if known], “article title,” *title of journal* [frequently abbreviated], series number [if given], volume number [if given], issue number [if given], date, page number.

¹David G. Victor and Sarah Eskreis-Winkler, “In the Tank,” *Foreign Affairs*, Vol. 87, No. 4, July–August 2008, pp. 56–59.

²Heather Ewing, “Democracy in Three Dimensions?” *The American Scholar*, Vol. 77, No. 3, Summer 2008, p. 143. (For the omission of a comma after a question mark, see ¶1523a.)

³Cristine Russell, “Climate Change: Now What?” *Columbia Journalism Review*, July–August 2008, pp. 45–49.

⁴“The Global Economy: Rebalancing Act,” *The Economist*, August 14, 2008, p. 14.

NOTE: Titles of journals are often abbreviated in notes whenever these abbreviations are likely to be familiar to the intended readership or are clearly identified in a bibliography at the end.

¹David G. Victor and Sarah Eskreis-Winkler, “In the Tank,” *FA*, Vol. 87, No. 4, July–August 2008, pp. 56–59.

1524 Quotation From a CD-ROM

¹Author [if known], “article title” [if appropriate], *title of work (CD-ROM)*, publisher [may be omitted], place of publication [may be omitted], year of publication, reference to location of quotation [if available].

¹*The Shorter Oxford English Dictionary* (CD-ROM Version 2.0), Oxford Univ. Press, New York, 2003.

²*Instant Immersion 18 Languages* (CD-ROM), TOPICS Entertainment, Renton, Wash., 2003.

NOTE: When citing material taken from a CD-ROM, try to provide some specific guidance on how to access the quoted passage on the disc. For example, if the material is organized in numbered paragraphs or pages, give the appropriate paragraph or page number. If the quoted passage is taken from a work organized like an encyclopedia or a dictionary (that is, in the form of brief articles or entries arranged in alphabetic sequence), provide the article title or key word used to identify the article or entry. Without such assistance, a person can usually input a key phrase (or character string) from the quoted material and use the *search* feature of a word processing program to locate the complete passage.

¶1525**1525 Newsletter, Bulletin, Pamphlet, or Monograph**

¹Author [if known], “article title” [if appropriate], *title of publication*, series title and series number [if appropriate], volume number and issue number [if appropriate], sponsoring organization, place [may be omitted], date, page number.

¹Marilyn Schwartz, “Research in the Digital Age,” *Copyediting*, August–September 2008, pp. 1, 8–9.

²Donald F. Boesch, “Global Warming and Coastal Dead Zones,” *National Wetlands Newsletter*, Vol. 30, No. 4, July–August 2008, pp. 39–44.

³Diane Moore, “Work Is Like a Box of Chocolates,” *The Office Professional*, Vol. 28, No. 3, March 2008, p. 2.

If you have consulted the online version of one of these works, add the URL to the basic pattern.

⁴Marilyn Schwartz, “Research in the Digital Age,” *Copyediting*, August–September 2008, pp. 1, 8–9, <<http://www04.mcmurtry.com/product/CE/doc/CEAugSep08.pdf>>.

NOTE: Because the data used to identify newsletters, bulletins, pamphlets, and monographs varies widely, adapt the pattern shown above as necessary to fit each particular situation. For example, the name of the sponsoring organization may be omitted if it is incorporated in the title of the publication.

1526 Unpublished Dissertation or Thesis

¹Author, “title of thesis,” **doctoral dissertation OR: master’s thesis** [identifying phrase to be inserted], name of academic institution, place, date, page number.

¹Carolyn Bonifield, “Effects of Anger and Regret on Postpurchase Behaviors,” doctoral dissertation, University of Iowa, Iowa City, 2002, p. 43.

If you have consulted the online version of one of these publications, add the URL to the basic pattern.

²Carolyn Bonifield, “Effects of Anger and Regret on Postpurchase Behaviors,” doctoral dissertation, University of Iowa, Iowa City, 2002, p. 43, <http://wwwlib.umi.com/cr/uiowa/dlnow?pub_no=3050780>.

1527 Quotation From a Secondary Source

¹Author, *book title*, publisher, place, date, page number, **quoted by OR: cited by** author, *book title*, publisher, place, date, page number.

¹Robert J. Dolan and Hermann Simon, *Power Pricing*, Free Press, New York, 1997, cited by Jack Trout with Steve Rivkin, *The Power of Simplicity*, McGraw-Hill, New York, 1999, p. 76.

NOTE: While it is always preferable to take the wording of a quotation from the original source, it is sometimes necessary to draw the wording from a secondary source. In such cases construct the note in two parts: in the first part, give as much information as possible about the *original* source (derived, of course, from the reference note in the secondary source); in the second part, give the necessary information about the *secondary* source (which is at hand). Bridge the two parts of the note with a phrase such as *quoted by* or *cited by*. The pattern shown above assumes that the quotation originally appeared in a book and that the secondary source for the quoted material was also a book. Naturally, if the original source or the secondary source is

a work other than a book, use the pattern appropriate for that work, as shown in the illustration below.

Writing is hard work. A clear sentence is no accident. Very few sentences come out right the first time, or even the third time. Remember this in moments of despair. If you find that writing is hard, it's because it *is* hard.¹

¹William Zinsser, *On Writing Well*, 6th ed., Harper, New York, 1998, quoted by Bryan A. Garner, “Calling for a Truce in the Descriptivist-Prescriptive Wars,” *English Today* 66, Vol. 17, No. 2, April 2001, pp. 6–7.

1528 Personal Interview or Conversation

When quoting or paraphrasing words or ideas derived from a face-to-face encounter or a telephone conversation, use one of the following patterns:

¹Name of person interviewed (title or affiliation if appropriate), **personal interview**, date.

²Name of person interviewed (title or affiliation if appropriate), **telephone conversation**, date.

¹Harold Pulsifer (professor of management, MIT), personal interview, May 26, 2010.

²Amy Gorsky (information technology consultant), telephone conversation, June 6, 2011.

If you are relying on information acquired through an interview conducted by someone else, use one of the following patterns:

³Name of person interviewed (title or affiliation if appropriate), **interviewed by** name of interviewer, date of interview.

⁴Name of person interviewed (title or affiliation if appropriate), **conversation with** name of interviewer, date of conversation.

³Harold I. Pulsifer (professor of management, MIT), interviewed by Janet Dodd Bellafiore, May 26, 2010.

⁴Amy Gorsky (information technology consultant), conversation with Franklin Guerin, June 6, 2011.

NOTE: If the person being interviewed is well known to your readers, you do not need to identify that person by title or organizational affiliation. Moreover, you can eliminate other elements from the citation by incorporating that information in the text itself.

1529 Television or Radio Interview

¹Name of person interviewed, **interviewed by** name of interviewer, “program title” or *series title*, name of TV channel or radio station, date of broadcast.

¹Nan Mooney, interviewed by Ray Suarez, *The News Hour With Jim Lehrer*, WPBS, August 15, 2008.

¶1530**1530 Speech**

¹Name of speaker (title or affiliation if appropriate), “title of speech” [if known], **speech given at** type of meeting [conference, convention, symposium], place, date.

¹Eileen B. Zicchino (JPMorgan), “Surviving—and Thriving—During a Merger,” speech given at International Association of Business Communicators conference, New York City, June 25, 2008.

NOTE: If the sponsoring organization is well known to your readers by an abbreviation, adjust your citation accordingly.

²Eileen B. Zicchino (JPMorgan), “Surviving—and Thriving—During a Merger,” speech given at IABC conference, New York City, June 25, 2008.

1531 Paper Read at Meeting

¹Name of speaker, “title of paper,” **paper presented at** type of meeting [conference, convention, symposium], place, date.

¹Anthony LaBranche, “Academic Freedom and Professional Responsibilities,” paper presented at Modern Language Association (**OR: MLA**) convention, Philadelphia, December 29, 2009.

1532 Report

¹Name of author, “title of report,” author’s company or sponsoring organization, place, date, page number.

¹Ruth Mendelsohn, “Acquisition of Desktop Publishing Equipment,” Atlantic Enterprises Incorporated, Portland, Me., February 5, 2011, pp. 27–31.

1533 Letter, Memo, or E-Mail Message**a. Letter or Memo**

¹Name of author, “subject line” [if appropriate], type of document [letter or memo], date.

¹Wilson G. Demos, letter, October 24, 2011.

²Christine Freebody, “Rethinking Our Corporate Strategy,” memo, December 12, 2011.

NOTE: If the document you are citing was addressed to someone else, expand the basic pattern as follows:

²Name of author, “subject line” [if appropriate], type of document [letter or memo], **addressed to** name of recipient, date.

³Wilson G. Demos, letter, addressed to Kyle Kurtz, October 24, 2011.

b. E-Mail Message

¹Name of author, “subject line,” **e-mail message**, date.

¹Ann Valdez, “Taking the Spin Out of Corporate Communications,” e-mail message, July 8, 2011.

NOTE: An e-mail address may follow the author’s name in parentheses if the address ends with the name of an organization.

²Ann Valdez (avaldez@prcom.com), “Taking the Spin Out of Corporate Communications,” e-mail message, July 8, 2011.

Do not provide a personal e-mail address without the owner’s consent and then only if there is a compelling reason to do so.

1534 Independent Internet Document

To cite material in an independent Internet document—that is, one that does not appear within another online source (for example, an electronic journal or newspaper)—use the following pattern:

¹Name of author [if known], “title of document,” date of posting [if known], <URL>, accessed on date.

A form of the word “sockdolager” (meaning anything big or otherwise outstanding) figured in the assassination of Abraham Lincoln. As an actor, John Wilkes Booth knew that the biggest laugh line in the play *Our American Cousin* would be, “Well, I guess I know enough to turn you inside out, you sockdologizing old man-trap!” So Booth waited until that line, and then as the audience roared, he fired his gun and fled.¹

¹“Presidential Trivia,” <<http://www.umkc.edu/imc/prestriv.htm>>, accessed on May 31, 2011.

1535 Message Posted to Internet Forum, Newsgroup, or Electronic Mailing List

¹Author’s name <e-mail address [if appropriate]>, “subject line,” date of posting, <message URL or e-mail address [if appropriate]>, accessed on date.

¹Federal Citizen Information Center <<http://www.pueblo.gsa.gov/>>, “Do Fuel-Saving Gadgets Take You for a Ride?” June 2008, <<http://www.pueblo.gsa.gov/scamsdesc.htm>>, accessed on January 8, 2010.

²Whitney Quesenberry, “Federal Plain Language Guidelines,” August 12, 2008, <plainlanguage@yahoogroups.com>, accessed on February 5, 2009. (When the writer’s personal e-mail address is provided, do not include this address without the writer’s permission.)

Elements of Source Reference Notes

1536 Note Number

- a. Make sure that the number at the start of a footnote or an endnote corresponds to the appropriate reference number in the text.
- b. Indent the note number 0.5 inch and type it (1) as a superscript (raised figure) without any space following it or (2) on the line (like an ordinary number), followed by a period and 1 or 2 spaces. The on-the-line style is more commonly used in endnotes. (See ¶¶1505–1506.)

¹Beth Kobliner, *Get a Financial Life: Personal Finance in Your Twenties and Thirties*, Fireside, New York, 2009, p. 79.

OR:

1. Beth Kobliner, *Get a Financial Life: Personal Finance in Your Twenties and Thirties*, Fireside, New York, 2009, p. 79.

► For guidelines on numbering notes, see ¶1502e; for the use of symbols in place of figures, see ¶1502f–g.

¶1537**1537 Names of Authors**

- a. Type an author's name (first name first) exactly as it appears on the title page of a book or in the heading of an article.

¹Jonathan Zittrain, *The Future of the Internet—and How to Stop It*, Yale Univ. Press, New Haven, 2008, p. 77.

²James H. Gilmore and B. Joseph Pinell, *Authenticity: What Consumers Really Want*, Harvard Business School Press, Cambridge, Mass., 2007, p. 253.

³Arthur Levitt with Paula Dwyer, *Take On the Street: What Wall Street and Corporate America Don't Want You to Know, What You Can Do to Fight Back*, Pantheon, New York, 2002, pp. 59–60.

⁴Edwin H. Sinclair, Jr., *Publish & Perish: How Not to Write Your First Book*, Magic Lantern Press, Marina del Rey, Calif., 2008, p. 81. [Note the author's preference to set off Jr. with commas. See ¶156.]

⁵William Strunk Jr. and E. B. White, *The Elements of Style*, 4th ed., Longman, New York, 2000, pp. 32–33. (Note the first author's preference not to set off Jr. with commas. See ¶156.)

NOTE: Do not use an ampersand (&) in place of *and* to link the authors' names.

- b. When two authors have the same surname, repeat the surname for each author.

⁶David R. Hooper and David Hooper, *Quit Your Job (and Never Go Back): How to Create, Start, and Market an Online Business for Under \$500 in 30 Days or Less*, Kathode Ray Enterprises, Nashville, 2008, p. 77.

- c. When there are three or more authors, list only the first author's name followed by *et al.* (meaning "and others"). Do not italicize or underline *et al.*

⁷Jimmy Vee et al., *Gravitational Marketing: The Science of Attracting Customers*, Wiley, Hoboken, N.J., 2008, p. 243.

NOTE: The names of all the authors may be given, but once this style is used in a source reference note, it should be used consistently within the same document.

⁸Victoria Colligan, Beth Schoenfeldt, and Amy Swift, *Ladies Who Launch: Embracing Entrepreneurship & Creativity as a Lifestyle*, St. Martin's Press, New York, 2007, p. 169.

- d. When an organization (rather than an individual) is the author of the material, show the organization's name in the author's position.

⁹American Heart Association, *Low-Fat, Low-Cholesterol Cookbook*, 4th ed., Clarkson Potter, New York, 2008, p. 39.

However, if the organization is both the author and the publisher, show the organization's name only once—as the publisher.

¹⁰*Cancer Caregiving A-Z*, American Cancer Society, Oklahoma City, 2008, p. 27.

- e. When a work carries an editor's name rather than an author's name, list the editor's name in the author's position, followed by the abbreviation *ed.* in parentheses. If the names of two or more editors are listed, use the abbreviation *eds.* in parentheses. If the names of three or more editors are listed, list the name of the first editor followed by "et al. (eds.)."

¹²Richard M. McGahey and Jennifer S. Vey (eds.), *Retrofitting for Growth: Building a 21st Century Economy in America's Older Industrial Areas*, Brookings, Washington, D.C., 2008, p. 43.

¹³E. D. Hirsch, Jr., et al. (eds.), *The New Dictionary of Cultural Literacy: What Every American Needs to Know*, rev. ed., Houghton Mifflin, Boston, 2002. (See ¶1537c, note.)

NOTE: If a reference work (such as an encyclopedia, a dictionary, or a directory) carries the name of an editor rather than an author, the editor's name is usually omitted. (See ¶1521, note.)

¹⁴*The Concise Oxford Dictionary of Politics*, Oxford Univ. Press, New York, 2009, p. 89.

RATHER THAN:

¹⁵Iain McLean and Alistair McMillan (eds.), *The Concise Oxford Dictionary of Politics*, Oxford Univ. Press, New York, 2009, p. 89.

- f.** If the author's name is incorporated in the title of the book, begin with the title.

¹⁶*George Soros on Globalization*, Public Affairs, New York, 2005, p. 54.

- g.** If the author of a work is unknown, begin the note with the title of the work. Do not use *Anonymous* in place of the author's name.

1538 Title of the Work

- a.** In giving the title of the work, follow the title page of a book or the main heading of an article for wording, spelling, and punctuation. However, adjust the capitalization as necessary so that all titles cited in the notes conform to a standard style. For example, a book entitled *Assertiveness*, with a subtitle (*the right to be you*) shown entirely in lowercase on the title page for graphic effect, would appear in a note as follows: Claire Walmsley, *Assertiveness: The Right to Be You*.

► For the capitalization of titles, see ¶¶360–363.

- b.** If a title and a subtitle are shown on separate lines in the original work without any intervening punctuation, use a colon to separate them in the source reference note.

¹Sami Zubaida, *Islam, the People and the State: Political Ideas and Movements in the Middle East*, rev. ed., I. B. Tauris, London, 2009, p. 76.

- c.** As a general rule, use italics or underlining for titles of *complete* published works, and use quotation marks for titles that refer to *parts* of complete published works.

► For the use of italics or underlining with titles, see ¶289; for the use of quotation marks with titles, see ¶¶242–243.

1539 Publisher's Name

- a.** List the publisher's name as it appears on the title page (for example, *John Wiley & Sons, Inc.*) or in a shortened form that is clearly recognizable (*Wiley*); use one form consistently throughout. If a division of the publishing company is also listed on the title page, it is not necessary to include this information in the footnote. Publishers, however, often do so in references to their own materials.

Continued on page 576

¶1540

- b.** The following list of examples shows acceptable patterns for abbreviating publishers' names. If in doubt, do not abbreviate.

Full Name	Acceptable Short Form
Alfred A. Knopf	Knopf
John Wiley & Sons, Inc.	Wiley
Random House Inc.	Random House
The Brookings Institution Press	Brookings
Houghton Mifflin Company	Houghton Mifflin
Pearson Education Company	Pearson
HarperCollins Publishers	HarperCollins
The McGraw-Hill Companies, Inc.	McGraw-Hill
Simon & Schuster	—
Merriam-Webster, Incorporated	Merriam
Little, Brown and Company	Little, Brown
Farrar, Straus and Giroux	—
Yale University Press	Yale Univ. Press
University of California Press	Univ. of California Press

NOTE: The patterns of abbreviation typically depend on how the publishers are referred to in speech. Since one never hears Random House referred to as *Random*, the name is not abbreviated. By the same token, one hears Little, Brown and Company referred to as *Little, Brown*, never simply as *Little*.

- c.** Omit the publisher's name from references to newspapers and other periodicals. The publisher's name is also usually omitted from references to dictionaries and similar works unless confusion might result or the work is not well known. (For examples, see ¶1521.)

1540 Place of Publication

- a.** As a rule, list only the city of publication (for example, *New York, Boston, Washington, Toronto*). If the city may not be well known to your intended audience (for example, readers from abroad) or the city is likely to be confused with another city of the same name, add the state or the country (for example, *Cambridge, Mass.; Cambridge, England*). If the title page lists several cities in which the publisher has offices, use only the first city named.

¹Christine Mowat, *A Plain Language Handbook for Legal Writers*, Carswell Thomson, Scarborough, Ontario, 1999.

NOTE: When the city name is followed by a state name, the state name is customarily abbreviated, using the traditional abbreviations shown in ¶527b. However, some authorities now endorse the use of the two-letter postal abbreviations in footnotes and endnotes. (See page 452 or the inside back cover.)

- b.** Omit the place of publication from references to periodicals and well-known reference works.
- c.** Incorporate the city name in the name of a newspaper that might otherwise be unrecognized. For example, *The Star-Ledger* (published in Newark, New Jersey) should be referred to in a note as *The (Newark, N.J.) Star-Ledger*.

1541 Date of Publication

- a. For books, show the year of publication. (Use the most recent year shown in the copyright notice.)
- b. For monthly periodicals, show both the month and the year. (See ¶1523 for examples.)
- c. For weekly or daily newspapers and other periodicals, show the month, day, and year. (See ¶¶1522–1523 for examples.)
- d. For seasonal publications, show the season and the year.

¹William Deresiewicz, “The Disadvantages of an Elite Education,” *The American Scholar*, Vol. 77, No. 3, Summer 2008, p. 87. (Note that the season is capitalized and there is no comma between the season and the year.)

1542 Page Numbers

- a. Page references in notes occur in the following forms:

p. 3 p. v

pp. 3–4 pp. v–vi

pp. 301 f. (meaning “page 301 and the following page”)

pp. 301 ff. (meaning “page 301 and the following pages”)

NOTE: Whenever possible, avoid using the indefinite abbreviations *f.* and *ff.*, and supply a specific range of page numbers instead.

- b. In a range of page numbers the second number is sometimes abbreviated; for example, *pp.* 981–983 may be expressed as *pp.* 981–83. (See ¶460.)
- c. There is a trend toward dropping *p.* and *pp.* when there is no risk of mistaking the numbers for anything but page numbers.

► *For the use of an en dash or a hyphen in a range of page numbers, see ¶459a.*

Subsequent References

- 1543**
- a. When a note refers to a work that was fully identified in the note
- immediately preceding*
- , it may be shortened by the use of the abbreviation
- ibid.*
- (meaning “in the same place”).
- Ibid.*
- replaces all those elements that would otherwise be carried over intact from the previous note. Do not italicize or underline
- ibid.*
- , and do not capitalize
- ibid.*
- except at the start of a citation.

¹Bill Walsh, *The Elephants of Style: A Trunkload of Tips on the Big Issues and Gray Areas of Contemporary American English*, McGraw-Hill, New York, 2004, pp. 93–97.

²*Ibid.*, p. 110. (*Ibid.* represents all the elements in the previous note except the page number.)

³*Ibid.* (Here *ibid.* represents everything in the preceding note, including the page number.)

- b. If you plan to use *ibid.* in a *footnote*, make sure that the footnote “immediately preceding” is no more than a few pages back. Otherwise, the interested reader will have to riffle back through the pages in order to find the “immediately preceding” footnote. To spare your reader this inconvenience, use the forms suggested in ¶1544.

Continued on page 578

¶1544

- c.** Do not use *ibid.* in a *textnote* unless the one “immediately preceding” is on the same page and easy to spot; otherwise, your reader will have to search through lines and lines of text to find it. To spare your reader, construct these “subsequent reference” textnotes along the same lines as “first reference” textnotes. (See ¶1507b.)

NOTE: With *endnotes*, the use of *ibid.* will cause no inconvenience, since it refers to the note directly above.

- 1544 a.** When a note refers to a work fully identified in an earlier note but *not the one immediately preceding*, it may be shortened as follows:

¹Author's surname, page number.

⁸Walsh, p. 65. (Referring to the work fully identified in an earlier note; see the first example in ¶1543a.)

NOTE: When short forms are used for subsequent references, it is desirable to provide a complete bibliography as well, so that the interested reader can quickly find the complete reference for each work in an alphabetic listing.

- b.** When previous reference has been made to different authors with the same surname, the use of a surname alone in a subsequent reference would be confusing. Therefore, the basic pattern in ¶1544a must be modified in the following way:

¹Author's initial(s) plus surname, page number.

OR: ¹Author's full name, page number.

¹J. Stewart Johnson, *American Modern, 1925–1940: Design for a New Age*, Abrams, New York, 2000, p. 83.

²J. Richard Johnson, *Schematic Diagrams: The Basics of Interpretation and Use*, Delmar, Clifton Park, N.Y., 1994, p. 144.

³J. S. Johnson, p. 91.

⁴J. R. Johnson, p. 153.

- c.** If previous reference has been made to different works by the same author, any subsequent reference should contain the title of the specific work now being referred to. This title may be shortened to a key word or phrase; the word or phrase should be sufficiently clear, however, so that the full title can be readily identified in the bibliography or in an earlier note.

¹Author's surname, *book title* [shortened if feasible], page number.

⁵Peter F. Drucker, *Management Cases*, rev. ed., Collins Business, New York, 2008, p.166.

⁶Peter F. Drucker, *The Essential Drucker: The Best of Sixty Years of Peter Drucker's Essential Writings on Management*, Collins Business, New York, 2008, p. 257.

⁷Drucker, *Management*, p. 173.

⁸Drucker, *Essential*, p. 268.

If you are referring to an article in a periodical, use the periodical title rather than the article title.

²Author's surname, *periodical title* [shortened if feasible], page number.

⁹Robert D. Kaplan, “Lifting the Bamboo Curtain,” *The Atlantic*, September 2008, p. 84.

¹⁰Caitlin Flanagan, . . .

¹¹Kaplan, *Atlantic*, p. 92. (Referring to the work identified in note 9 above.)

- d. A more formal style in subsequent references uses the abbreviations *loc. cit.* (“in the place cited”) and *op. cit.* (“in the work cited”).

¹³Karin Abarbanel, *Birthing the Elephant: A Woman's Go-for-It! Guide to Overcoming the Big Challenges of Launching a Business*, Ten Speed Press, Berkeley, 2008, p. 112.

¹⁴Holmes, op. cit., p. 213. (Referring to a different page in *There's a Business in Every Woman*.)

¹⁵Abarbanel, loc. cit. (Referring to the same page in *Birthing the Elephant*.)

¹⁶Ibid. (Referring to exactly the same page as shown in note 15. *Ibid.* may be used only to refer to the note immediately preceding. See ¶1543.)

NOTE: Do not italicize or underline *loc. cit.*, *op. cit.*, or *ibid.*

Bibliographies

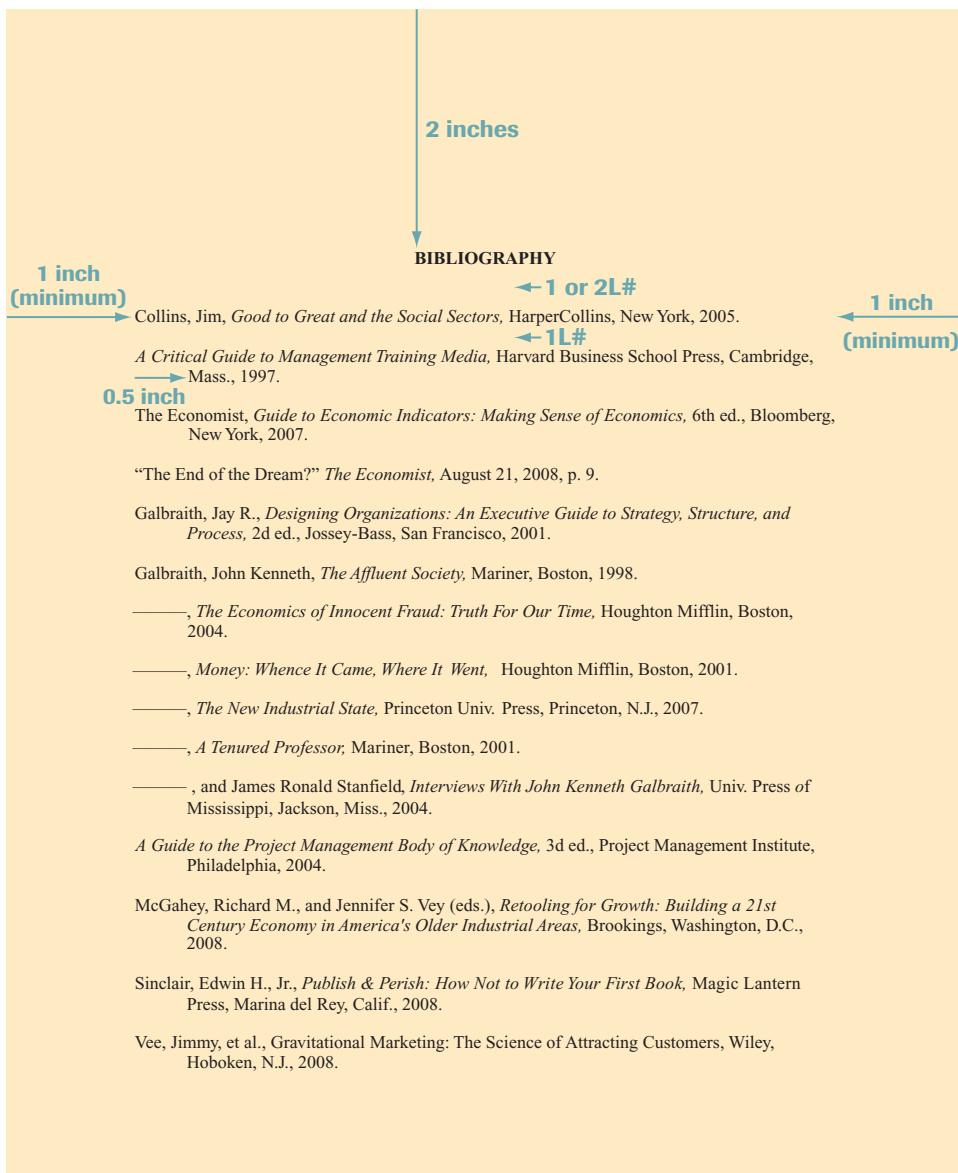

A bibliography at the end of a report or a manuscript typically lists all the works *consulted* in the preparation of the material as well as all the works that were actually *cited* in the notes. The format of a bibliography is also used for any list of titles, such as a list of recommended readings or a list of new publications.

1545 Word processing programs do not typically provide a template for bibliographies. Some special word processing applications, however, will format not only footnotes and endnotes but bibliographies as well. These programs ask you to create a database (also referred to as a *reference library*) in which you enter the necessary data for each title you plan to cite. Then you select (1) one of the standard formats built into the software or (2) a format that you have modified or created. In effect, once you have developed the reference library, you can extract the data in the form of footnotes, endnotes, or entries in a bibliography.

NOTE: ¶¶1546–1549 provide guidelines for formatting a bibliography.

1546 Consider the following guidelines for formatting a bibliography. (See the illustration on page 580.)

- On a new page type *BIBLIOGRAPHY* (or some other appropriate title) in bold caps. Center this title approximately 2 inches from the top of the page, and begin the text on the second or third line below.
- Use the same margins as for other pages in the body of the report or manuscript (see ¶¶1404–1406), and treat the numbering of these pages as indicated in ¶1427f–g.
- Begin each entry at the left margin. Ordinarily, single-space the entries, but in material that is to be edited, use double spacing to allow room for editing.
- Indent turnover lines 0.5 inch so that the first word in each entry will stand out.
- Leave 1 blank line between entries (whether they are single- or double-spaced).

¶1547**1547**

- List the entries alphabetically by author's last name.
- Entries lacking an author are alphabetized by title. Disregard the word *The* or *A* at the beginning of a title in determining alphabetic sequence. For example, in the illustration above, note that the third entry is alphabetized on the basis of *Economist* (not *The*); the twelfth entry is alphabetized on the basis of *Guide* (not *A*).

NOTE: When a publication lacks an author and the title begins with a figure, a title such as *100 Years of Harley Davidson* would be alphabetized as if it began “One Hundred Years,” and it would come before *One Hundred Years of World Military Aircraft*.

- c. There is no need to number the alphabetized entries in a bibliography unless you plan to use the style of textnotes described in ¶1507b(5). In that case begin each entry of the bibliography with a number typed at the left margin, followed by a period and 1 or 2 spaces. Then type the rest of the entry in the customary way, but indent any turnover so that it begins under the first word in the line above. (In the parenthetical textnotes, you can then make reference to different works by their bibliographic “entry number” instead of by author.)
1. Goldsmith, Marshall, *Mojo: How to Get It, How to Keep It, and How to Get it Back When You Need It!* Hyperion, New York, 2009.
 2. *A Guide to the Project Management Body of Knowledge*, 3d ed., Project Management Institute, Philadelphia, 2004.
 3. McAfee, Andrew, and Erik Brynjolfsson, “Investing in the IT That Makes a Competitive Difference,” *Harvard Business Review*, Vol. 86, No. 7/8, July–August 2008, pp. 69–74.

NOTE: If you use the *numbered list* feature of your word processing program, the turnover lines will automatically be indented. The list will also be typed single-spaced. For a more open look, insert 1 blank line between entries (as shown in the illustration on page 580). The numbered list feature also aligns single- and double-digit numbers on the left. However, you can make an adjustment so that the numbers align at the right (as in the examples in ¶1547c). For additional details and illustrations, see ¶1345d.

1548

When a bibliography contains more than one work by the same author, replace the author’s name with a long dash (using a three-em dash or six hyphens) in all the entries after the first. List the works alphabetically by title. For example, in the illustration on page 580, the works that John Kenneth Galbraith wrote by himself have been alphabetized on the basis of the key words *Affluent*, *Economics*, *Money*, *New*, and *Tenured*. The work he produced with a coauthor (*Interviews With John Kenneth Galbraith*) should not be considered as part of this sequence when the titles are being alphabetized.

NOTE: As an alternative, multiple entries pertaining to the same author may be listed in chronological sequence according to the date of each publication.

- For guidelines on the typing of three-em dashes, see ¶216d; for guidelines on the marking of three-em dashes in manuscript, see ¶217d.

¶1549

1549 Entries in bibliographies contain the same elements and follow the same style as source reference notes except for two key differences.

- Begin each entry with the name of the author listed in inverted order (last name first). When an entry includes two or more authors' names, invert only the first author's name. When an organization is listed as the author, do not invert the name.

American Heart Association. *Low-Fat, Low-Cholesterol Cookbook*, 4th ed., Clarkson Potter, New York, 2008.

Hirsch, E. D., Jr. *The Knowledge Deficit: Closing the Shocking Education Gap for American Children*. Houghton Mifflin, Boston, 2007.

Kouzes, James M., and Barry Z. Posner. *The Leadership Challenge*, 4th ed., Jossey-Bass, San Francisco, 2008.

► *For additional examples, see the illustration on page 580.*

- Include page numbers in bibliographic entries only when the material being cited is part of a larger work. Use the form *pp. 215–232*.

Eisenstat, Russell A., et al., "The Uncompromising Leader," *Harvard Business Review*, Vol. 86, No. 7/8, July–August 2008, pp. 25–29.

► *For the use of an en dash in a range of page numbers, see ¶459a.*

- In academic material, bibliographic entries typically follow a slightly different style. In the examples below, note that a period follows each of the three main parts of the entry (author's name, the title, and the publishing information). Also note that the parentheses that normally enclose the publishing information in an academic-style footnote or endnote are omitted in the bibliographic entry. (See ¶1513b.)

SECTION 16

Tables

- Using the Software Table Feature (¶¶1601–1608)
- Locating Tables Within the Text (¶¶1609–1611)
- Locating Tables on Separate Pages (¶¶1612–1615)
- Centering Tables (¶1616)
- Table Identification (¶¶1617–1620)
- Column Heads (¶¶1621–1624)
 - Braced Column Heads (¶1623)
 - Crossheads (¶1624)
- Table Text (¶¶1625–1633)
 - Spacing (¶1625)
 - Items Consisting of Words (¶1626)
 - Items Consisting of Figures (¶1627)
 - Items Consisting of Figures and Words (¶1628)
 - Amounts of Money (¶1629)
 - Percentages (¶1630)
 - Special Treatment of Figures in Tables (¶1631)
 - Leaders (¶1632)
 - Accounting for Omitted Items (¶1633)
- Table Notes (¶¶1634–1636)
- Dealing With Long Tables (¶¶1637–1639)
- Dealing With Wide Tables (¶¶1640–1641)
- Turning the Table Sideways (¶1641)
- Converting Tables Into Charts and Graphs (¶1642)

You can fit a good deal of material into a compact space when you present it in the form of a table—with items arranged in *rows* (to be read horizontally) and in *columns* (to be read vertically). However, in designing a table, you should aim for more than compactness. Your reader should be able to locate specific information faster—and detect significant patterns or trends in the data more quickly—than would be possible if the same information were presented in the regular text.

The following paragraphs provide detailed guidelines for creating a table. Modify these guidelines as necessary to achieve results that are easy to understand and attractive to look at.

Using the Software Table Feature

Before the introduction of word processing software, the execution of tables required a great deal of advance planning and careful typing. Now, thanks to the *table* feature of your word processing software, you can prepare tables with little or no advance planning and you can make corrections and adjustments with relative ease.

The table feature, however, does impose some limitations on the results you can achieve unless you are willing to invest additional time and effort. As a result, you may not always find it feasible or even possible to achieve the appearance of professionally typeset tables. Here, for example, is how a table might appear in a textbook or a magazine:

Table 10-4 U.S. PETROLEUM TRADE IN BARRELS PER YEAR (000 Omitted)		
Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

Source: U.S. Department of Energy,
Monthly Energy Review, July 2009.

Note that within each column the head and the text are centered between vertical rules. Note also the use of extra space surrounding various elements of the table to give it an open look and make it easy to read.

Paragraphs 1601–1608 show you (1) the results you will achieve if you prepare this table using the table feature in Microsoft Word 2007, accepting all the default specifications, and (2) the steps you need to take in order to achieve the look of a professionally typeset table.

IMPORTANT NOTE: When you use the table feature to execute a table, how far you go in modifying the default specifications will depend on a number of factors. If the table is intended for your eyes alone (or those of your immediate associates) *and* speed rather than appearance is critical, you may not want to go very far (if at all) in modifying those default specifications.

¶1602

However, if the table will appear in a document to be presented to higher management or to people outside the organization, you will have to invest the extra time and effort needed to create a more professional-looking table.

1601 The default format provided by the Microsoft Word *table* feature encloses the complete table (including any heading at the top and any notes at the bottom) in a grid of horizontal and vertical lines.

- a. At the outset specify the number of columns the table should have (in this particular case, three). It is not necessary to specify the number of rows in advance since the act of tabbing at the end of a row will automatically add another row.

NOTE: If you are using an autoformat style (see ¶1608), you may need to specify the number of rows as well.

- b. In the absence of other instructions, the table grid will have the same width as the regular text. You may find it simplest to accept this dimension at the outset and adjust the width of the table later on. (See ¶1603.)

1602 a. Begin by entering the column heads and the column text. Leave one blank row at the top for the heading and one blank row at the bottom for any notes. If you accept all the default specifications, the column heads and the text in each column will align at left.

Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

1603

- b.** It is appropriate to use left alignment when the column text consists entirely of words or of figures representing years (as in the first column below). However, when the column text consists of figures that have to be added or compared in some way (as in the second and third columns below), the figures should align at the right.
- c.** To save a step, select right alignment (or right justification) for the second and third columns before you enter any data in the grid. Moreover, to enhance the appearance of the table, select boldface for the column heads. If these modifications are made in advance, the first version of the table will look like this:

Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

- 1603 a.** The table, as it now stands, has excessively wide columns. To remedy the situation, use the *autofit* feature to adjust the width of the columns to fit the column text.

Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

Note that now the text in each column is not perfectly centered between the vertical rules. Moreover, the use of the autofit feature has created a fairly tight appearance. You can widen a column and simultaneously equalize the margins by changing the column cell margins in the *table properties* feature.

NOTE: If you try to widen a column simply by inserting extra space, all that extra space will appear on only one side of the column text (and not be evenly distributed).

on both sides). Thus in a column with left-justified text, all the extra space will appear on the right; in a column with right-justified text, all the extra space will appear on the left. To avoid this result, use the technique described in ¶1603a to visually center the column text.

Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

- b.** When a table that initially has the same width as the text is reduced in width (as in the illustrations in ¶1603a), the table as a whole will remain aligned at the left margin. You can leave the table in that position or move it to align at the right margin, but the conventional practice is to center the table horizontally on the page. If the table occupies a page by itself, it is customary to center the table vertically on the page.

1604 Before you can enter the table heading at the top or any table notes at the bottom, you need to merge or join the cells in the lines reserved for these purposes.

Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

- 1605** **a.** The heading of a table may consist simply of a table title. Or the title may be preceded by a table number and followed by a subtitle—all on the same line or on separate lines. (See ¶1620 for the various ways in which these elements may be positioned.) Whether the heading consists of only one line or several lines, enter the complete heading in one cell at the top of the grid.
- b.** If the table is accompanied by one or more footnotes, enter these elements in one cell at the bottom of the grid.

Continued on page 588

¶1606

- c. As the following illustration demonstrates, when you enter these elements in the grid, they are automatically aligned at the left.

Table 10-4 Annual U.S. Petroleum Trade in Barrels (000 Omitted)		
Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805

Monthly Energy Review, July 2009.

- 1606** A computer offers you a variety of ways to improve the appearance of any table. Consider making some or all of these adjustments:

- a. Use boldface for all of the elements in the table heading, or use a different font or a larger font size than that of the column text. (See ¶1620a, note.)
- b. Select the centering option for the column heads and all the elements in the table heading.
- c. Insert extra space between the elements in the table heading and above and below the heading as a whole.
NOTE: If the table title or subtitle will not fit all on one line, break it into sensible phrases and single-space the turnover. (See ¶1620 for illustrations of the ways in which the elements in the table heading may be arranged.)
- d. Insert extra space above and below the column heads.
- e. Insert extra space between the notes at the bottom of the table and above and below the notes as a whole.
- f. If the footnotes each require no more than one full line, begin each note at the left margin of the table text. However, if any one of the notes turns over to a second line, indent the first line of each note. Ordinarily, the indentation should be 0.5 inch, but if a table is relatively narrow (as in the illustration below), reduce the indentation to 0.25 inch for better appearance. In any case, adjust the measure of the footnote so that the turnover aligns at the left margin of the table text and does not extend beyond the right margin of the table text.
- g. Add shading to portions of the table as desired to give special emphasis to certain elements and make the table more attractive as a whole. Keep in mind, however, that shading can cause problems when tables are copied, printed, or faxed.

NOTE: If all of these modifications are made, the table will then look like this:

Table 10-4 U.S. PETROLEUM TRADE IN BARRELS PER YEAR (000 Omitted)		
Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

Source: U.S. Department of Energy,
Monthly Energy Review, July 2009.

- 1607** a. If you want to achieve a more open look, you can remove the grid and increase the space between rows, as in the illustration below.

Table 10-4 U.S. PETROLEUM TRADE IN BARRELS PER YEAR (000 Omitted)		
Year	Imports	Exports
1950	310,250	119,355
1960	644,290	73,932
1970	1,247,935	94,535
1980	2,528,694	199,104
1990	2,926,570	312,805
2000	4,193,944	380,640
2002	4,208,450	359,160
2004	4,811,070	383,568
2006	5,003,055	480,705
2008	4,711,152	670,146

Continued on page 590

1608

NOTE: Even if you ultimately intend to remove the grid from the table, be sure to enter all the elements in the table heading and the table notes within the grid at the outset. In that way, if you later decide to transfer the table to another location in the document, you can be sure that the table will be moved as a whole. If the table heading and the source note are not inserted in the grid, only the body of the table will be moved.

- b. As an alternative, you can simply eliminate all the vertical rules in the grid.

Table 10-4 U.S. PETROLEUM TRADE IN BARRELS PER YEAR (000 Omitted)

¶1609**Locating Tables Within the Text**

- 1609** a. Tables should be easy to refer to. Therefore, try to locate each table on the page where the subject of the table is introduced in the text. In this way the reader will have ready access to the table while reading the text commentary that may precede and follow.
- b. Ideally, every table should fall immediately after the point in the text where it is first mentioned. However, if placing the table within a paragraph is likely to disrupt the reader's grasp of the material, then locate the table at the end of the paragraph or at the top or bottom of the page. (See also ¶1611d.)

- 1610** a. Avoid breaking a table at the bottom of a page. If starting a table at the ideal point means that it will not all fit in the space remaining on the page, then place the complete table at the top of the next page. (At the point in the text where the table is first mentioned, insert an appropriate cross-reference. See ¶1615.)

NOTE: Many word processing programs have a feature called *keep with next* or *keep text together* that prevents tables from breaking across pages. (See ¶1639b.)

- b. If you have to fit a number of relatively short tables (half a page or less) in a given document, single-space the table text to maximize your chances of locating each table in the ideal place. (See ¶1625.)

NOTE: Microsoft Word's *table* feature single-spaces the table text by default.

► *For other techniques to limit the length of a table to one page, see ¶1637; for guidelines on dealing with a table too long to fit on one page, see ¶¶1638–1639.*

- 1611** If a table is to appear on a page that also carries regular text:

- a. Center the table horizontally within the established margins. (See ¶1603b.)
- b. Try to indent the table at least 0.5 inch from each side margin. In any case, try to keep the width of the table from exceeding the width of the text.

► *For guidelines on dealing with wide tables, see ¶¶1640–1641.*

- c. Use blank lines to set off a table from the text above and below it as follows:

- (1) Leave only 1 blank line above and below the table if horizontal rules or shading sets the table off from the text.

with prefixes indicating multiples or fractions of a unit. There are seven base units in the SI metric system:

←1L#

Quantity	Unit	Symbol
Length	meter	m
Mass	kilogram	kg
Time	second	s
Electric current	ampere	A
Thermodynamic temperature	kelvin	K
Amount of substance	mole	mol
Luminous intensity	candela	cd

←1L#

In addition, there are two supplementary units, the radian and the steradian.

- (2) Leave 1 blank line above and below an open table (one without horizontal rules) that has neither column heads nor a table title.

Our analysis of the latest reports indicates that sales are up by at least 10 percent in all regions:

←1L#

Eastern Region	16.2%
North Central Region	11.0%
Southern Region	18.4%
Western Region	13.9%

←1L#

The primary reason for this upsurge, according to the managers in these regions, is the rebuilding of inventories, which had been allowed to

- (3) Leave 2 blank lines above and below an open table that uses column heads as its first element.

When designing buildings for New England sites, keep in mind the typical outdoor winter temperatures. For example:

←1L#

City	Temp. (°F)
Boston, Mass.	0
Concord, N.H.	-15
Hartford, Conn.	0
Portland, Maine	-5

←2L#

It is worth noting that Concord (an inland city) is colder than Portland (a coastal city), even though it is farther south. Moreover, Boston is no colder than

NOTE: If you have inserted a blank line above a column head or a title within the grid, you will automatically achieve the appearance of 2 blank lines above the table when you remove the grid.

Continued on page 594

¶1612

- (4) Leave 2 blank lines above and below an open table that begins with a table title. (See the note on page 593.)

and as shown in Table 12-5, the public debt tripled in the twenty-year period between 1960 and 1980—from \$284 billion to \$908 billion.

←2L#

Table 12-5
PUBLIC DEBT OF THE UNITED STATES
1900–2007

(In Billions of Dollars)

1900	1.2
1920	24.2
1940	43.0
1960	284.1
1980	907.7
1990	3233.3
2000	5674.2
2007	9007.7

←2L#

However, between 1980 and 2000, the public debt grew by more than six times—from \$908 billion to nearly \$5.7 trillion. Projections for

d. If space is tight, place the table at the top or bottom of the page. In that way you can eliminate one set of blank lines and improve your chances of fitting the table on the desired page.

e. When using the *table* feature of a word processing program, simply insert the table copy at the desired location in the regular text. If you discover that the table will not all fit on the same page, you can move the table as a whole to the top or bottom of the page (as noted in d above), make other adjustments (as noted in ¶¶1637–1639), or place the table on a page by itself (see ¶¶1612–1615).

NOTE: If you use the *keep with next* feature or the *keep text together* feature (see ¶1610a, note), the table will not be divided at the bottom of a page; instead the table as a whole will be moved to the top of the next page. (See ¶1639b.)

f. Be sure you can fit at least two full lines of regular text above or below the table. If the results look unattractive, devote the full page to the table and resume the text on the following page. (See ¶¶1612–1615.)

Locating Tables on Separate Pages

1612 When a table occupies more than two-thirds of a page, it can often be difficult to fit on the same page with regular text. In such cases insert the table on a separate page and place it immediately after the text page on which the table is first referred to.

NOTE: Insert a hard page break before and after the table to ensure that the table will appear on a page by itself. (See ¶1639b.)

1613 If a given document contains a number of tables, most of which will each require a separate page, then all the tables (short as well as long) may be executed as an appendix or as an attachment.

NOTE: This arrangement—which permits the reader to keep the full set of tables alongside the regular text (except in the case of bound reports)—can be very convenient, especially if some tables are repeatedly cited throughout the regular text. (This arrangement also eliminates the problem of trying to fit tables within the text.)

- 1614** When a table is to appear on a page by itself, center the table horizontally and vertically within the established margins of the page.

NOTE: If no margins have been established, leave a minimum margin of 1 inch on all four sides of the table.

- 1615** When a table is not located on the page on which it is referred to, provide a cross-reference in parentheses to the appropriate page.

(See Table 4 on page 18.) **OR:** (See Table 2-2 on page 31.)

NOTE: These parenthetical cross-references may be treated as a separate sentence (as shown above) or as part of another sentence (see ¶220).

► *For the advisability of numbering tables to simplify cross-references, see ¶1618.*

Centering Tables

- 1616** a. The *table* feature of a word processing program extends the table to the full width of the regular text. If you decide to reduce the overall width of the table, first create the table. Then use the *autofit* feature to adjust the width of the columns (see ¶1603), and choose *center alignment* to position the table horizontally.
b. If a table appears on a page by itself, center the table vertically as well. (Use the *center page* feature of your word processing software.)

Table Identification

- 1617** Ordinarily identify every table with a title. However, titles are not necessary if the significance of the material in each table is clear without some descriptive label. (See ¶1620a.)

- 1618** Also identify tables by *number* unless they are quite short, not very numerous, and typically referred to only on the page on which they fall. The use of table numbers simplifies cross-references, an important consideration if you expect that a number of tables will not fit on the page where they are first mentioned or if you know that certain tables will be referred to repeatedly throughout the regular text.

NOTE: Tables may be numbered consecutively throughout a given document or consecutively within each chapter and each appendix. With the latter technique, the chapter number (or the appendix number or letter) is used as a prefix in the numbering scheme. For example, Table 3-2 would be the second table in Chapter 3, and Table A-5 would be the fifth table in Appendix A.

- 1619** The table title may be followed by a *subtitle*, which provides additional information about the significance of the table, the period of time it covers, or the manner in

¶1620

which the information is organized or presented. Since a subtitle should be held to one line if possible (two at the most), treat a lengthy comment on any of these points as a note to the table rather than as a subtitle. (See ¶¶1634–1636.)

1620 Type the elements of table identification as follows:

- a. **Table Title.** Center the table title, using either all-caps or caps and lowercase. You may want to type the title in boldface or type it in a different font or a larger font size than that of the column text.

NOTE: Boldface may not be desirable, or necessary to make the title easy to read, if the title is particularly long. See, for example, the illustration on page 616.

► *For guidelines on spacing above the table title, see ¶¶1611c and 1614.*

- b. **Table Number.** Type the word *Table* in caps and lowercase, followed by the appropriate number. To give the table number special emphasis, center it on the second line above the table title and use boldface. To hold down the length of the table, type the table number on the same line as the table title; in this case insert a period after the table number and leave 1 or 2 spaces before typing the table title. (See the illustrations below.)

NOTE: Within a given document treat all table numbers the same way.

Table 2

TITLE OF THE TABLE

OR:

Table 1-5

TITLE OF THE TABLE

OR:

Table 2. TITLE OF THE TABLE

Table 1-5. TITLE OF THE TABLE

- c. **Table Subtitle.** Center the subtitle on the second line below the title, using bold caps and lowercase. The subtitle is usually enclosed in parentheses when it simply comments on the listing of data in some special order (for example, *In Descending Order by Sales Revenue*) or on the omission of zeros from figures given in the table (for example, *In Millions* or *000 Omitted*).

► *For examples of subtitles enclosed in parentheses, see the tables illustrated on these pages: 584, 594, 598, 601, and 608.*

NOTE: If either the title or the subtitle requires more than one line, break it into sensible phrases; then single-space and center any turnover lines. If possible, try to hold the title and the subtitle to two lines each.

Table 5
TITLE OF THE TABLE WITH ONE TURNOVER LINE
Table Subtitle

Table 3-4. TITLE OF THE TABLE WITH ONE TURNOVER LINE
Table Subtitle With One Turnover Line

- For guidelines on how to enter the elements of the table heading in the grid provided by the table feature, see ¶¶1604–1605, 1606a–d.

Column Heads

- 1621** a. Unless a table is very simple and the significance of the material is clear without heads, provide a heading for each column. (A heading may be omitted over the first column, also known as the *stub*. See, for example, the table on page 608.)
- b. Whenever possible, use singular forms in the column heads. Thus, for example, over a column listing a number of cities, use the heading *City* rather than *Cities*. (See the illustration in the middle of page 593.)
- c. In order to hold down the length of column heads, use abbreviations and symbols as necessary. For example:

Acct. No.	Account number
% of Total	Percent of total
FY2010	Fiscal Year 2010 (also used to indicate that a company's <i>fiscal</i> /year does not coincide with the <i>calendar</i> year)
OR: FY10	
1Q/2011 OR: 1Q2011	First Quarter of 2011 (also used with 2Q, 3Q, and 4Q to signify the other three quarters of the year)
1Q/11 OR: 1Q11	
Sales (\$)	Sales results expressed as a dollar amount (in other words, sales revenues)
Sales (U)	Sales results expressed in terms of the number of units sold
Sales YTD (\$)	Cumulative sales revenues so far this year (that is, <u>year to date</u>)
% O/(U)	Percentage by which this year's results are <u>over</u> (or <u>under</u>) last year's results
Last Year	
2010A	Actual results in 2010
2011B	Budgeted results in 2011
2011E	Estimated results in 2011
2012F	Forecast results in 2012

If your reader may not understand some of the abbreviations and symbols you use, explain the unfamiliar ones in a footnote to the table. For example:

Note: A = actual; E = estimated; F = forecast.

NOTE: As an alternative to the use of abbreviations, select a smaller font size for the column heads.

- d. Column heads should be single-spaced and may be broken into as many as five lines.

Continued on page 598

¶1622

- e. Capitalize the first letter of each word in a column head except articles (*a*, *an*, *the*), conjunctions under four letters (such as *and* and *or*), and prepositions under four letters (such as *of* and *in*).

► See ¶¶360–361, 363 for detailed guidance on capitalizing words in column headings.

- f. Type all column heads in boldface.

- g. If the column heads in a table do not all take the same number of lines, align the column heads at the bottom.

NOTE: When you use the *table* feature of a word processing program, choose the *bottom alignment* option to automatically align column heads that do not take the same number of lines.

- h. Leave 1 blank line above and below the tallest column head.

Table 14-4

DISTRIBUTION OF PERSONAL INCOME: 1960 TO 2006

(In Billions of Dollars)

Year	Personal Income	Personal Taxes	Disposable Personal Income	Personal Savings
1960	411.7	48.7	362.9	23.3
1970	836.1	109.0	727.1	61.0
1980	2285.7	312.4	1973.3	161.8
1990	4791.6	624.8	4166.8	208.7
2000	8429.7	1235.7	7194.0	168.5
2006	10983.4	1354.3	9629.1	38.8

- 1622** a. When you use the *table* feature of a word processing program, the default alignment for all column heads is at the left. (See the illustration in ¶1602a.)
- b. If you change the alignment of the column text from left to right (for example, with a column of figures), align the column head at the right as well. (See the illustration in ¶1602c.)
- c. When a very narrow column head falls above a very wide column of text, the table will look more attractive if the column head is centered over the column text. It is easy to use center alignment in the table feature of word processing programs; therefore, as a general rule, plan to center all column heads.

- e.** All column heads should be either blocked or centered. Do not mix styles within a table.

1623 Braced Column Heads

- a.** Some complex tables contain *braced* column heads (heads that “embrace” two or more columns). They are also called *straddle* heads because they straddle two or more columns. (See the illustration on page 600.)
- b.** There are two ways to create a table with braced headings. You can create the table body—5 columns in the illustration on page 600—and merge the cells that will be used for the braced headings. Or you can create a 3-column table, type the braced headings in the appropriate cells, and then split the cells below the braced headings to complete the table.
- c.** To achieve the best appearance, center each braced column head over the appropriate columns; center the other column heads and the related column text between the vertical rules in each case.

Continued on page 600

¶1624

Table 12				
CABLE DIVISION SALES AND NET OPERATING INCOME				
From 2005 to 2012				
Year	Sales		Net Operating Income	
	Thousands of Dollars	Percent of Increase	Thousands of Dollars	Percent of Increase
2005A	1429	---	252	---
2012F	3000	130.8	480	122.2

Note: A = actual; E = estimated; F = forecast.

1624 Crosheads

- a. Crosheads are used to separate the data in the body of a table into different categories. (See the illustration on page 601.)
- b. The first croshead falls immediately below the column heads across the top of the table; the other crosheads occur within the body of the table at appropriate intervals.
- c. Type each croshead in caps and lowercase, centered on the full width of the table. Using the *table* feature of a word processing program, you can automatically center each croshead after you merge the cells in that row.
- d. Each croshead should be preceded and followed by a horizontal rule running the full width of the table. Leave 1 blank line between the rule and the croshead.

Table Text**1625 Spacing**

- a. Use single spacing for the table text if the overall length of the document is a concern or you want to maximize your chances of locating each table on the page where it is first mentioned.

NOTE: Within the same document try to treat all tables alike.

- b. Use double spacing (or something more than single spacing) to make your tables more readable. However, you can make single-spaced tables more readable by retaining the horizontal rules between rows and by the use of shading. (See ¶1608 for illustrations of single-spaced tables that have been enhanced for better readability.) And even a slight increase in space between rows can make single-spaced tables more readable. (See the illustration in ¶1607a.)

1626 Items Consisting of Words

If the table text consists of items expressed entirely in words:

- a. Capitalize only the first word of each item in the table text plus any proper nouns and proper adjectives.

NOTE: In special cases, where it may be important to show whether terms are capitalized or lowercased, the first word in each item need not be consistently capitalized. (See, for example, the second and third columns of the table at the top of page 593.)

¶1626

- b.** Use abbreviations and symbols as necessary to hold down the length of individual items. (See ¶1621c for examples.)
- c.** Align each item at the left margin of the column. If any item requires more than one line, set a tab to indent the turnover line 0.25 inch. However, if a column contains both main entries and subentries, begin the main entry at the left margin of the column text, set tabs to indent the first line of subentries 0.25 inch, and indent all turnover lines 0.5 inch.

Photographs, prints, and illustrations Scientific or tech- nical drawings Commercial prints Reproductions of works of art	Total weekly broadcast hours General programs Instructional programs
---	--

NOTE: You can avoid the need to indent turnovers (but not subentries) if you use horizontal rules or extra space to separate the entries. The *table* feature will automatically align turnovers at the left, and the horizontal rules or extra space will help to make each entry visually distinct.

Photographs, prints, and illustrations	Total weekly broadcast hours
Scientific or tech- nical drawings	General programs
Commercial prints	Instructional programs
Reproductions of works of art	

- d.** If an item in one column requires more than one line and all the other items in the same row require only one line, it is customary to align all the items in that row at the bottom.

Chemical and allied products	151	201
Petroleum refining and related products	69	73
Paper and allied products	391	364

← **Aligned at
the bottom**

However, as an alternative, you may prefer to vertically center all the items in the same row within their respective cells.

Chemical and allied products	151	201
Petroleum refining and related products	69	73
Paper and allied products	391	364

Tables

16

- e. If two or more items in a row each require more than one line, all entries in that row may be aligned at the top.

Employee Benefit Report	Prepared quarterly	Data based on administra- tive records
-------------------------	-----------------------	--

- f. Do not use a period as terminal punctuation at the end of any item except in a column where all entries are in sentence form.

1627 Items Consisting of Figures

- a. If a column of table text consists of items expressed entirely in figures:

- (1) Align columns of whole numbers at the right.
- (2) Align columns of decimal amounts on the decimal point.
- (3) In a column that contains both whole numbers and decimals, add a decimal point and zeros to the whole numbers to maintain a consistent appearance.
- (4) Omit commas in four-digit whole numbers unless they appear in the same column with larger numbers containing commas. (Some writers prefer to retain the comma in four-digit numbers under all circumstances.) In any case, never insert commas in the decimal part of a number. (See also ¶461.)

325	465.2137
1	1250.0004
152,657	1.0000
1,489	37.9898

- (5) Align the figures in a column by using right alignment or a decimal tab.

NOTE: If you want your software program to perform some calculations in the process of executing a table, you will need to select and follow one of the number formats offered by the software.

- *For the way to handle a total line in a column of figures, see ¶1629d.*

1628

- b.** If a column of table text consists entirely of “clock” times (as in a program or schedule):

- (1) Align the figures in “on the hour” expressions at the right.

11 a.m.
12 noon
1 p.m.
8 p.m.
12 midnight

- (2) Align the figures in “hour and minute” expressions on the colon. (Add two zeros to exact times to maintain a uniform appearance.)

8:15 a.m.
10:30 a.m.
12:00 noon
1:45 p.m.
12:00 midnight

- (3) When the items in a column each consist of a starting and an ending time, either align all the items at the left or align them on the en dash within the items.

8:30–9:30	OR:	8:30–9:30
10:30–11:30		10:30–11:30
12:30–1:30		12:30–1:30
2:30–3:30		2:30–3:30
4:45–6:00		4:45–6:00

NOTE: When you use the *table* feature and you want to align clock times at the right or on the colon or the en dash, the hours 1 to 9 must be made equal in width with the hours 10 to 12. Since each figure occupies 2 spaces, type 2 spaces before the single-digit hours to make them the same width as the double-digit hours.

- For an illustration of clock times in a conference program, see page 623; for an illustration of clock times in an itinerary, see page 628.

- c.** In the “24-hour” system of expressing clock time (in which midnight is 0000 and 11:59 p.m. is 2359), the alignment of clock times poses no problem since all times are expressed in four digits (with no colons and no need to refer to *a.m.* or *p.m.*).

0830–0930
1030–1130
1230–1330
1430–1530
1645–1800

1628 Items Consisting of Figures and Words

If a column consists of both figures and words (as in the second column in the table on page 605), align the items at the left. Note, however, that a column consisting only of words aligns at the left (as in the first column in the table on page 605) and a column consisting only of whole numbers aligns at the right (as in the third column in the same table).

Type of Food	Average Serving	Calorie Count
Bacon	2 strips	97
Beef, roast	4 oz	300
Broccoli	1 cup	44
Tomato, raw	Medium size	30

1629 Amounts of Money

- a. In a column containing dollar amounts, insert a dollar sign only before the first amount at the head of the column and before the total amount.

\$ 45.50	\$ 165	\$ 423.75
2406.05	3,450	584.45
783.25	98,932	1228.00
<hr/> \$3234.80	<hr/> \$102,547	<hr/> \$2236.20

- b. The dollar signs at the head and foot of the column should align in the first space to the left of the longest amount in the column. If the item at the head of the column is shorter than the one at the foot, aligning the dollar signs can be troublesome. Choose one of the following approaches to deal with the problem:

- (1) Avoid the problem altogether by incorporating the dollar sign in the column head—for example (*\$000,000 Omitted*). Then there is no need for dollar signs alongside the figures below.
 - (2) Insert the first dollar sign by hand. (This approach is not acceptable in documents that have to meet professional standards.)
 - (3) Type the dollar sign in the space before the first number. After the column is finished, insert spaces between the first dollar sign and the first digit to align the dollar signs (2 spaces for each digit, 1 space for each comma).
- c. Do not insert commas to set off thousands in four-digit numbers unless they appear in the same column with larger numbers. (See the examples in ¶1627a and ¶1629a.) Moreover, if all the amounts in a column are whole dollar amounts, omit the decimal point and zeros (as in the second example in ¶1629a). However, if any amount in a column includes cents, use a decimal point and zeros with all whole dollar amounts in the same column (as in the third example in ¶1629a).

NOTE: If you want your software program to perform some calculations in the process of executing a table, you will need to select and follow one of the number formats presented by the software.

- d. If the table text ends with a *total* line, a horizontal rule should separate the body of the table from the total line.
- (1) If the table displays the full default grid or only horizontal rules that set off key sections of the table, the necessary separation will be automatically

1630

provided. To give the total amount greater emphasis in a single-spaced table (as in the illustration below), adjust the spacing so that there is 1 blank line above and below the total line.

2011 SALES REVENUES			
Region	2011B	2011A	Percent of Difference
Eastern	\$ 300,000	\$ 345,108	15.0
Midwestern	450,000	467,380	3.9
Southern	260,000	291,849	12.2
Western	240,000	241,005	0.4
Totals	\$1,250,000	\$1,345,342	7.6

- (2) If the table has been executed in an *open* style (without horizontal and vertical rules), you must insert a horizontal rule that is as wide as the longest entry in the column (including the dollar sign at the left). Before typing the last amount before the total, choose the *underline appearance* option. You may have to insert spaces before the last amount above the total so that the horizontal line will be as wide as the longest entry (2 spaces for the dollar sign and each digit, 1 space for each comma).

\$1115.59	\$ 529,310	\$21,348.75
803.61	1,114,310	
1027.64	<u>1,227,620</u>	2,294.35
<u>528.66</u>		
\$3475.50	\$2,871,240	<u>688.50</u>

\$24,331.60

NOTE: In a single-spaced table, type the total amount on the line directly below the underline (as in the first example above). To give the total amount greater emphasis, type it on the second line below the underline (as in the second example above). In a double-spaced table, type the amount on the second line below the underline (as in the third example above).

- e. If a total line is needed, type the word *Total* or *Totals* in the first column, depending on the number of totals to be shown in this row. Use an initial cap only or (for emphasis) all-caps. Start the word at the left margin of the column or indent it 0.5 inch.

1630 Percentages

- a. If all the figures in a column represent percentages, type a percent sign (%) directly after each figure unless the column heading clearly indicates that these are percentages.

- b. Percentages involving decimals should align on the decimal point. If necessary, add zeros after the decimal part of the number so that each figure will align at the right. If any percentage is less than 1 percent, add one zero to the left of the decimal point.

Increase	Percent of Increase	Increase (%)
55.48%	11.63	24
0.80%	4.00	37
2.09%	24.60	120
13.00%	0.40	8
66.67%	9.25	69
81.90%	0.08	103
0.25%	12.50	41

1631 Special Treatment of Figures in Tables

- a. Columns of long figures can be reduced in width by omitting the digits representing thousands, millions, or billions and indicating this omission in parentheses. For example:

NOTE: The word forms on the left are easier to grasp.

- b. If the parenthetical comment applies to all columns of figures in the table, insert it as a subtitle to the table. However, if the comment applies only to one column of figures, insert the parenthetical comment in the column head.

NOTE: Sometimes because of space limitations a comment such as *(000 Omitted)* is reduced to *(000)*. The latter form is permissible if you are sure your reader will understand it.

- c. If the parenthetical comment applies to columns of dollar amounts, this fact can also be noted within parentheses, and the dollar sign can then be omitted from the columns of figures.

($\$$ 000 Omitted) OR: (In Thousands of Dollars) OR: ($\$$ 000)

- d. When omitting thousands, millions, or billions from a wide column of figures, you may use rounding or a shortened decimal (or both) to reflect the portion of the number that is being omitted.

Complete Version		Shortened Versions	
Sales Revenues	Sales Revenues (\$000 Omitted)	Sales Revenues (In Millions)	Revenues (\$000,000)
\$ 5,878,044	5,878	\$ 5.9	6
29,023,994	29,024	29.0	29
<u>14,229,683</u>	<u>14,230</u>	<u>14.2</u>	<u>14</u>
\$49,131,721	49,132	\$49.1	49

Continued on page 608

¶1632

- e. A negative figure in a column may be designated by enclosing the figure in parentheses or by inserting a minus sign (represented by a hyphen or preferably by an en dash) directly to the left of the negative figure.

\$1642.38	28.2%	Sales in 2006	\$264,238
<u>-82.41</u>	-14.5%	Sales in 2005	<u>262,305</u>
\$1559.97	6.1%	Gain/(loss)	\$ (1,933)

NOTE: When you use the *table* feature, you may not be able to easily achieve the alignment shown above for a negative figure in parentheses.

1632 Leaders

- a. If the items in the first column vary greatly in length, you can use leaders (rows of periods) to lead the eye across to the adjacent item in the next column. Every line of leaders should have at least three periods.

Table 3. NATIONAL INCOME BY SELECTED INDUSTRIES (In Billions of Dollars)			
	2000	2003	2006
Agriculture, forestry, fishing and hunting	70.1	80.7	87.0
Construction	144.3	148.8	193.7
Finance, insurance, real estate, rental, leasing	1529.3	1690.7	2127.6
Manufacturing	1228.5	1112.3	1421.6
Professional and business services ...	1146.6	1253.4	1630.3

- b. To insert a row of leaders within a column, set a right leader tab as close to the right edge of the column as possible. After typing the text, use a hard tab to insert the leaders; then tab to the next column.

NOTE: In view of the extra steps involved in inserting leaders, you may find it more practical to retain the grid provided by the *table* feature. The horizontal rules that separate rows in the body of the table are sufficient to lead the eye across each row from one column to the next.

- c. The *leader* feature in Microsoft Word offers the choice of solid periods, solid hyphens, or solid underscores. Other programs may allow you to specify the character to be used and the space to be left between characters.

1633 Accounting for Omitted Items

When there is no entry to be typed in a given row, you can simply leave a blank at that point. However, if doing so may raise a question in the mind of your reader, consider these alternatives:

- Type the abbreviation *NA* (meaning “not available” or “not applicable”) centered on the column width. (See the example on the right in ¶1633b.)
- Type a row of periods or hyphens. Use as few as three (centered on the column width), or type the row to the full width of the column. (See the examples on the left and in the center below.)

23,804	23,804	23,804
16,345	16,345	16,345
.....	----	NA
38,442	38,442	38,442

► See page 600 for another illustration.

NOTE: If any one of the columns in a table contains omitted items, you will not be able to use a formula to perform calculations.

Table Notes

1634 a. If a table requires any explanatory notes or an identification of the source from which the table text was derived, place such material at the foot of the table. (Do not treat it as part of a sequence of notes related to the main text.)

b. A horizontal rule should separate the body of the table from the table notes.

(1) If the table displays the full default grid or only the horizontal rules that set off key sections of the table, the separation will be automatically provided.

BusinessWeek 50*	563.1	3.8%

p. 143.

*January 11, 2010 = 1000.

†April 5, 2010 = 1000.

- c. To give the table notes greater emphasis in a single-spaced table, insert 1 blank line above and below each note (as in the illustration above and on page 609).
- d. If all the notes occupy no more than one full line each, begin each note at the left margin of the table text (as in the first illustration in ¶1634b). However, if any one of the notes turns over onto a second line, indent the first line of all the notes. Ordinarily, use the standard indentation of 0.5 inch, but reduce the indentation to 0.25 inch for a more attractive look (as in the illustration above). Also adjust the length of the notes so that the turnovers align with the left edge of the first column and do not extend beyond the right edge of the last column.

1635 If the table has been derived from another source, indicate this fact as follows:

- a. Type the word *Source* with an initial cap or in all-caps, followed by a colon, 1 or 2 spaces, and the identifying data. (See ¶¶1508–1544 for models to follow in presenting the identifying data.)
- b. A source note should precede any other table note. (See the illustrations in ¶1634b.)

1636 a. If you use abbreviations or symbols that the reader may not understand, explain them in a note at the bottom of the table. This explanation should follow the source note (if any) and precede any other table note. If more than one abbreviation or symbol needs decoding, the explanation can be handled as a series of separate notes (each preceded by a superscript symbol or letter), or it may be done all in one note. (For an illustration, see 601.)

- b. Except for source notes (like the one illustrated in ¶1634b) and a single note explaining symbols and abbreviations, every table note should begin with a superscript symbol or letter that keys the note to the appropriate word or figure in the table text (or title or subtitle) above. Type the corresponding symbol or letter immediately after the appropriate word or figure above, without any intervening space. (See d, note, below.)

- c. Use the following sequence of symbols: * † ‡ § ¶ (See also ¶1502f.)
- d. Use superscript lowercase letters (a, b, c, etc.) in place of symbols when there are more than five footnotes for a given table.

NOTE: Avoid the use of superscript *figures* to identify table notes. They could be confusing if used in conjunction with figures in the table text. Moreover, if superscript figures are already used for notes pertaining to the main text, it is wise to use symbols or letters so as to distinguish notes that pertain to a specific table.

- e. In assigning symbols or letters in sequence, go in order by row (horizontally), not by column (vertically).

Dealing With Long Tables

1637 To keep a table from extending beyond the page on which it starts, consider these techniques:

- a. Put the table number (if any) on the same line as the table title rather than on the second line above. (See also ¶1620b.)
- b. Use single spacing for the table text. (See also ¶1625.)
- c. Shorten the wording of the table title, subtitle, column heads, and items in the table text to reduce turnover lines. Use abbreviations and symbols toward this end. (See also ¶1621c.) If necessary, provide a brief explanation in the table notes of any abbreviations and symbols that your reader may not immediately understand. (See also ¶1636.)
- d. When the table text entails a long item that is out of proportion to all other items (or is to be entered in several places in the table text), try to convert the item into a table note, keyed by a symbol or letter appropriately placed in the table above.
- e. If a table is narrow and long, you can save space by reformatting the table as shown below. Note that the table text is divided into two parts placed side by side and divided by a double or a thick vertical rule. The column heads are repeated over each part.

Table A-20

DOW JONES INDUSTRIAL AVERAGE: 1998–2007

Year	High	Low	Year	High	Low
1998	9374.27	7539.07	2003	10453.90	7524.06
1999	11497.12	9120.67	2004	10854.54	9749.99
2000	11722.98	9796.03	2005	10940.50	10012.36
2001	11337.92	8235.81	2006	12510.57	10667.39
2002	10635.25	7286.27	2007	14164.53	12050.41

- f. Select a smaller size of the font you are using for the other tables.

¶1638

1638 If a table requires more than one page, follow this procedure:

- a. At the bottom of the page where the table breaks, type a continuation line in parentheses—for example, *(Continued on page 14)*—unless it is quite obvious that the table continues on the next page. Merge the cells in the last row at the bottom of the page; then, using right alignment, type the continuation line.

Table 14		
TWENTIETH-CENTURY INVENTIONS		
Invention	Date	Nation
Airship, rigid dirigible	1900	Germany
Washer, electric	1901	United States
Pen, ballpoint	1938	Hungary
Teflon	1938	United States
Airplane jet engine	1939	Germany
(Continued on page 14)		

- b. At the top of the next page, before continuing with the table text, insert the table number, title, and column heads by marking those rows as header rows. If your software will permit it, insert *Continued* in parentheses after the table number (if one is provided) or after the table title.

Table 14 (Continued)		
TWENTIETH-CENTURY INVENTIONS		
Invention	Date	Nation
CAT scan	1973	England
Microcomputer	1973	France
Disc player, compact	1979	Japan, Netherlands
Heart, artificial	1982	United States

If your software will not permit you to make insertions in the header rows, merge the cells in the first row beneath the column heads; then insert a continuation line in parentheses—for example, *(Continued from page 14)*—and align it at the left margin of the table text. (See the illustration at the top of the next page.)

Table 14		
TWENTIETH-CENTURY INVENTIONS		
Invention	Date	Nation
(Continued from page 14)		
CAT scan	1973	England
Microcomputer	1973	France
Disc player, compact	1979	Japan, Netherlands
Heart, artificial	1982	United States

c. Ordinarily, all table notes should appear only on the page on which the table ends. However, if certain notes will help the reader interpret the data in the table (for example, notes explaining certain abbreviations or symbols), repeat these notes on each page on which the table appears. (A source note would appear only on the page where the table ends.)

- 1639** a. Do not start a table at the bottom of one page and continue it on the top of the next page if the entire table will fit on one page (either by itself or with regular text). In such a case start the table at the top of the next page and insert a cross-reference in the text. (See ¶1615.)
- b. Many word processing programs have a feature called *keep with next* or *keep text together*, which prevents a page break from occurring within a block of text. If you use this feature to keep a table from breaking at the bottom of a page, the table as a whole will appear at the top of the next page. However, the space previously occupied by the first part of the table will remain empty; the text that follows the table will not come forward to fill up this vacant space. If you want to avoid this result, do not use *keep with next*. Use the following approach instead:
- (1) Let the table break naturally and continue typing the rest of the document.
 - (2) When the document is completed in all other respects, select and cut the table; the text following the table will flow forward. Insert a hard page break at the bottom of the page from which the table was removed, and paste the whole table at the top of the following page.

Dealing With Wide Tables

1640 To keep a wide table from extending beyond the margins established for the page, consider the following techniques:

- a. Reduce the width of the columns by using the autofit feature.

Continued on page 614

¶1641

- b. Use abbreviations and symbols to hold down the length of lines in the column heads and the column text.
- c. If only a few entries are disproportionately wide or are repeated in the table and make it difficult to fit the table in the space available, consider converting these items to table footnotes. (See also ¶1637d.)
- d. Select a smaller font size in order to make the table fit within the space available.

1641 Turning the Table Sideways

- a. Whenever possible, the page orientation of a table should be the same as that of the regular text. However, when other alternatives do not work or cannot be used, turn the table so that it prints in *landscape* orientation (across the 11-inch dimension) on a page by itself. In such a case, the left margin of the table will fall toward the bottom of the page and the right margin toward the top.

NOTE: *Landscape printing* refers to printing the text on the 11-inch dimension of a standard page. *Portrait printing* refers to the customary practice of printing the text on the 8½-inch dimension of a standard page.

- b. In planning the layout of a turned table, be sure that the overall dimensions of the table will fit within the established margins for the regular pages in the given document. If no margins have been established, leave a minimum of 1 inch on all sides of the turned table.

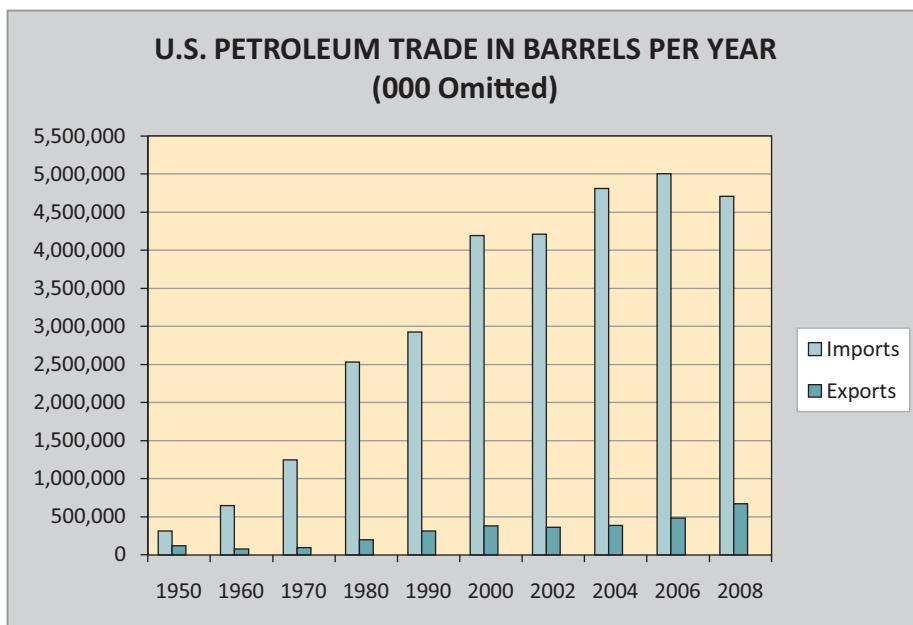

NOTE: If a turned table is to be part of a *bound* report, leave a minimum top margin of 1.5 inches. This top margin will represent the left margin when the turned table is bound into the report. (See also ¶1404b.)

Converting Tables Into Charts and Graphs

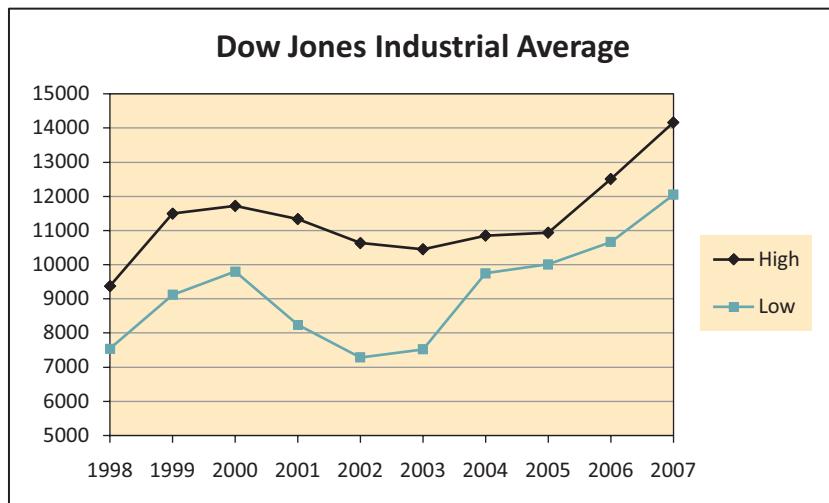

1642 Data presented in a table is easier to grasp and work with than data presented in running text. By the same token, a chart or a graph can often present data more effectively than a table, especially when you are trying to emphasize patterns of growth or want to contrast different levels of performance or achievement.

Most word processing programs provide a *chart* or *graph* feature that offers you a variety of formats to choose from. To create a chart or graph, first select the format you want; then insert the appropriate data in a *datasheet* (which looks like a spreadsheet). With some programs you can simply import the data from an existing table or some other source without having to reenter it in the datasheet. The following illustrations will show you some of the results you can achieve.

- a. The following bar chart reflects the data presented in the table on page 584.

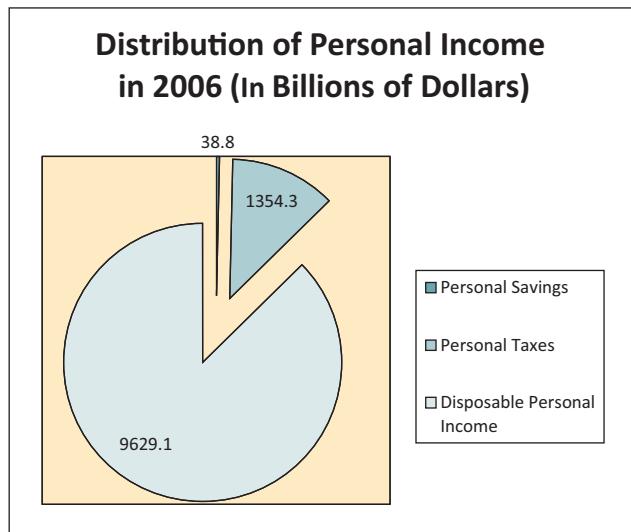

- b. The following graph reflects the data presented in the first table on page 611.

Continued on page 616

¶1642

- c. The following pie chart reflects the data presented in the table on page 598.

Acceptance Letters (¶1717)

Outlines (¶¶1718–1723)

Guidelines for Designing Forms (¶¶1724–1725)

¶1701

Section 17 provides models for a number of common business documents. The models reflect formats widely used, but they are not to be regarded as rigid patterns that must be followed without deviation. Feel free to modify these formats to fit the needs of the situation at hand. As always, good sense and good taste (rather than an artificial notion of “absolute correctness”) should prevail.

IMPORTANT NOTE: Your word processing software may provide templates for many of the documents discussed in Section 17. If you decide to use a template provided by your software, you may find it helpful to examine the corresponding model in this section to see whether there are certain features or details that are worth adding to the basic template.

General Format Considerations

Paragraphs 1701–1702 provide guidelines for establishing margins and the treatment of headings. These format considerations apply to all the specific types of documents discussed later in Section 17.

Margins

1701 **a. Top Margin.** If you are using plain $8\frac{1}{2}'' \times 11''$ stationery for the first page of a business document, use a top margin of about 2 inches. However, accept the default top margin of 1 inch in order to fit more copy on the page and avoid the need for a second page. If you are using letterhead stationery for the first page, leave at least 0.5 inch between the letterhead and the first element to be typed. If the document requires more than one page, use plain paper for the continuation pages and leave a top margin of 1 inch.

NOTE: The plain paper should match the quality of the paper used for the letterhead.

b. Side Margins. If you are using $8\frac{1}{2}'' \times 11''$ stationery, the default side margins (1 inch or 1.25 inches, depending on the program) should be adequate in most cases. However, you may increase the side margins if you want to achieve a more open look or a more balanced arrangement of copy on the page. (See, for example, the illustration on page 622.)

NOTE: The table in ¶1305b offers guidelines on adjusting side margins.

c. Bottom Margin. Leave a bottom margin of at least 1 inch.

Headings

1702 **a.** The main heading typically consists of the title of the document or the name of the organization. It ordinarily appears centered on the first line in all-caps. Additional details (such as a date or a location) appear in caps and lowercase on separate lines, with 1 blank line between them.

NOTE: If any item in the heading requires more than one line, type the turnover line single-spaced, centered on the line above.

b. Use boldface for at least the first item in the heading. The remaining items in the heading may also be done in boldface (see the illustration on page 623) or in regular type (see the illustration on page 622).

c. Leave 1 blank line—or, for a more open look, 2 blank lines—between the last line of the heading and the body of the document. (The illustrations on

pages 621–624, 626, and 628, indicate that you may choose to leave either 1 or 2 blank lines. The illustration on page 621 exemplifies the use of 1 blank line; the illustrations on pages 622–624, 626, and 628 exemplify the use of 2 blank lines.)

- d. If a document requires more than one page, insert a continuation heading like the one used on the second page of a letter. Use the *header* feature to create and automatically position the continuation heading. (See ¶1366 for further details.)

NOTE: The second page of a résumé typically uses a slightly different continuation heading. (See pages 635, 637, and 639 for examples.)

Executive Documents

The following paragraphs (¶¶1703–1707) present commonly used formats for agendas, minutes, itineraries, fax cover sheets, and news releases.

Agendas

- 1703** An *agenda* is a list of items to be considered or acted upon. The format of an agenda varies with the circumstances. The agenda for an informal staff meeting may be done as a simple numbered list of topics in a memo addressed to the attendees. (See the illustration on page 621.) The agenda for a formal meeting (for example, of a corporate board of directors) will typically call for a more structured list of topics. (See the illustration on page 622.) The agenda for a formal program (for example, for a conference or a seminar) will be structured around a timetable, with specific time slots allotted to formal presentations by speakers and topical discussions in small groups. (See the illustration on page 623.)

There is no “correct” way to set up an agenda. The illustrations on pages 621–623 are intended only to suggest various ways in which an agenda can be formatted. The format you decide to use should be tailored to fit the needs of the meeting or program being planned.

Minutes

- 1704** *Minutes* provide a record of what was discussed and decided upon at a meeting. The minutes of small committee meetings within an organization are usually done in an informal style, in much the same way that the agendas for such meetings are prepared. (Compare the informal agenda on page 621 with the informal minutes on page 624.) When the participants at a meeting come from a number of different organizations (as they would, for example, at meetings of professional associations and societies), the minutes tend to be somewhat more formal. And when the minutes may have to serve some legal use, they are typically done in a highly formal style. According to the Society of Corporate Secretaries and Governance Professionals, government regulation and stockholder lawsuits make it important that the minutes of a meeting of a corporation’s board of directors be complete and accurate, since they may have to serve as legal evidence of what the corporation’s directors did or intended to do. The *short form* of corporate minutes (illustrated on page 626) simply describes the decisions that were made, along with some brief indication of the key

¶1705

facts on which those decisions were based. By contrast, the *long form* describes in some detail the arguments for and against the decisions finally arrived at.

Itineraries

1705 An *itinerary* should clearly set forth the travel arrangements and the appointment schedule of the person making the trip. If the itinerary is intended only for the use of the person traveling, it should be possible to eliminate certain items and abbreviate details that the person is quite familiar with. However, if the itinerary will be distributed to others (who may need to contact the person who is traveling), present the information as fully and as clearly as possible. (For example, see the illustration on page 628.)

Fax Cover Sheets

1706 Most messages sent by fax (facsimile) equipment are accompanied by a *fax cover sheet* that indicates (1) the name and the fax number of the person receiving the fax, (2) the name and fax number of the person sending the fax, (3) the number of pages being sent, and (4) the name and the telephone number of the person to be called in case the transmission is not satisfactorily completed. There are different ways to prepare a fax cover sheet. Your word processing software may provide a fax template that you can use as is or modify to suit your preferences. If you are designing a fax cover sheet as a form to be filled in by hand, you will need to add fill-in lines. (See the illustration on page 629.)

NOTE: The ready availability of small stick-on labels that accommodate all the essential information in a compact form is appealing to many people, who are pleased to save time and money as a result of not having to create or transmit a separate fax cover sheet. Therefore, do not feel compelled to use a fax cover sheet if a commercially prepared stick-on label will serve your purpose.

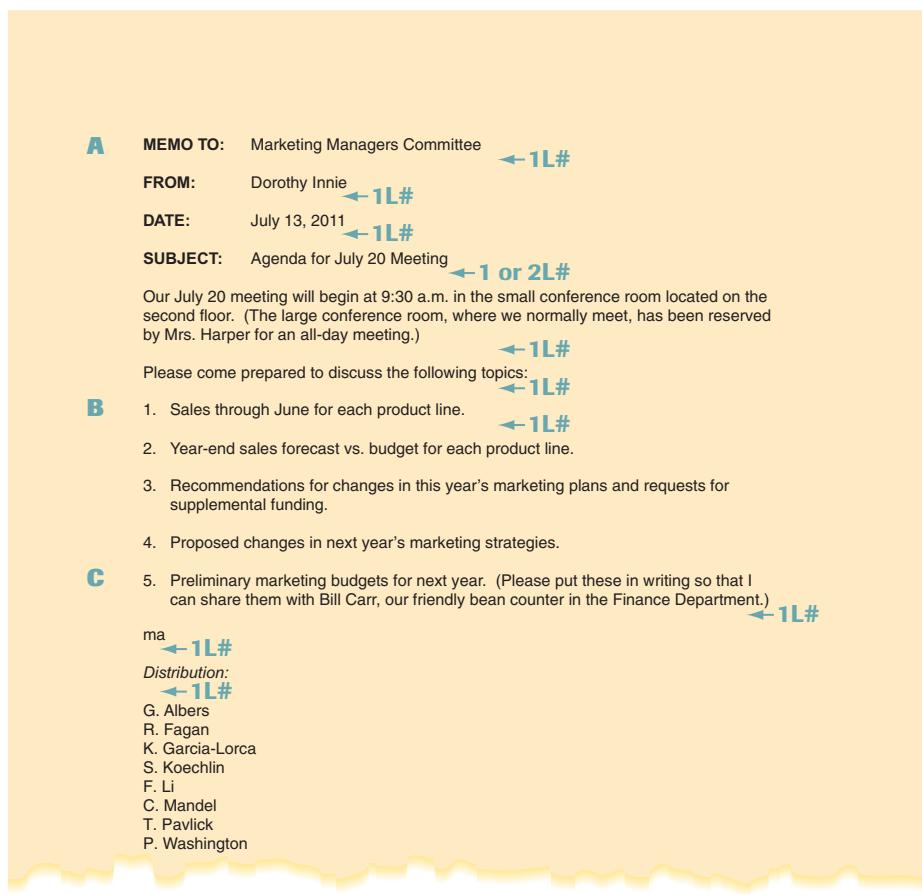

News Releases

1707 A *news release* (also referred to as a *press release*) is an announcement made by an organization about news that it considers important—for example, the acquisition of (or the merger with) another organization, the hiring or the promotion of key executives, the physical expansion or relocation of the organization, the achievement of better-than-expected financial goals, and the celebration of organizational anniversaries and other key events.

A news release is distributed to members of the media (representing newspapers, magazines, TV and radio stations, and Web sites) and to others who help shape public opinion (such as financial analysts and advertising agencies). This distribution is undertaken with the hope that these various people will bring this news to the attention of the audiences they serve. Because the recipients of news releases are typically inundated with these documents on a daily basis, it is important that your news release present its message in a manner that will make it seem truly newsworthy.

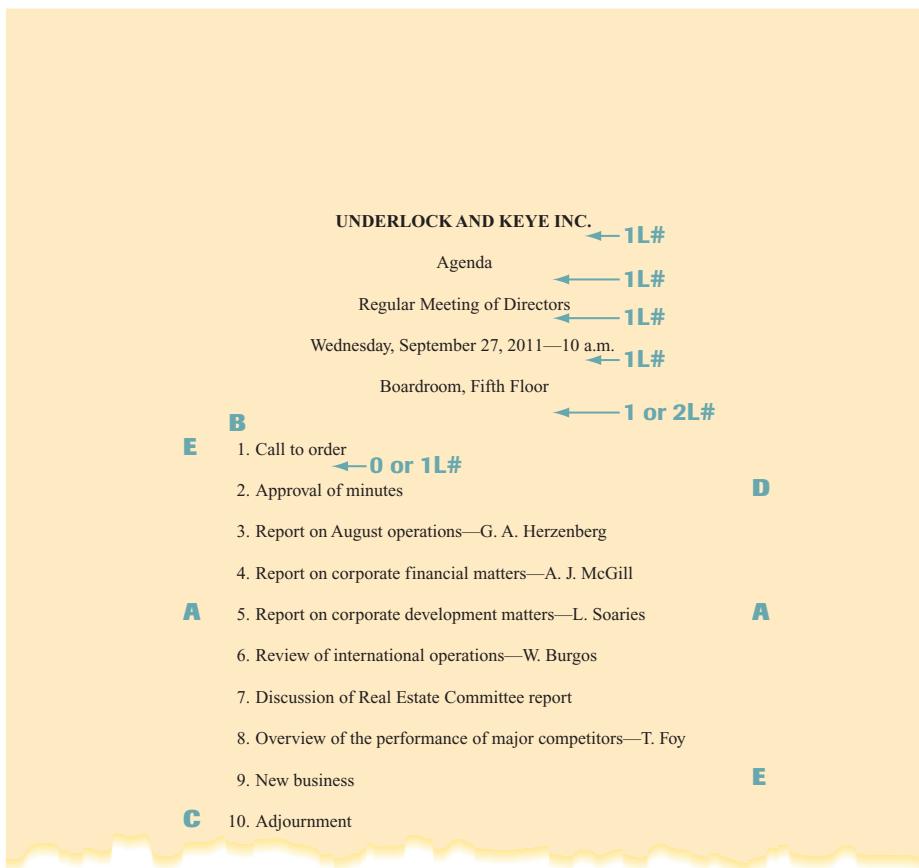

Your word processing software may provide one or more templates that you can use as is, or you may prefer to create your own template along the lines of the model illustrated on page 630.

Agenda—Informal (Memo) Style

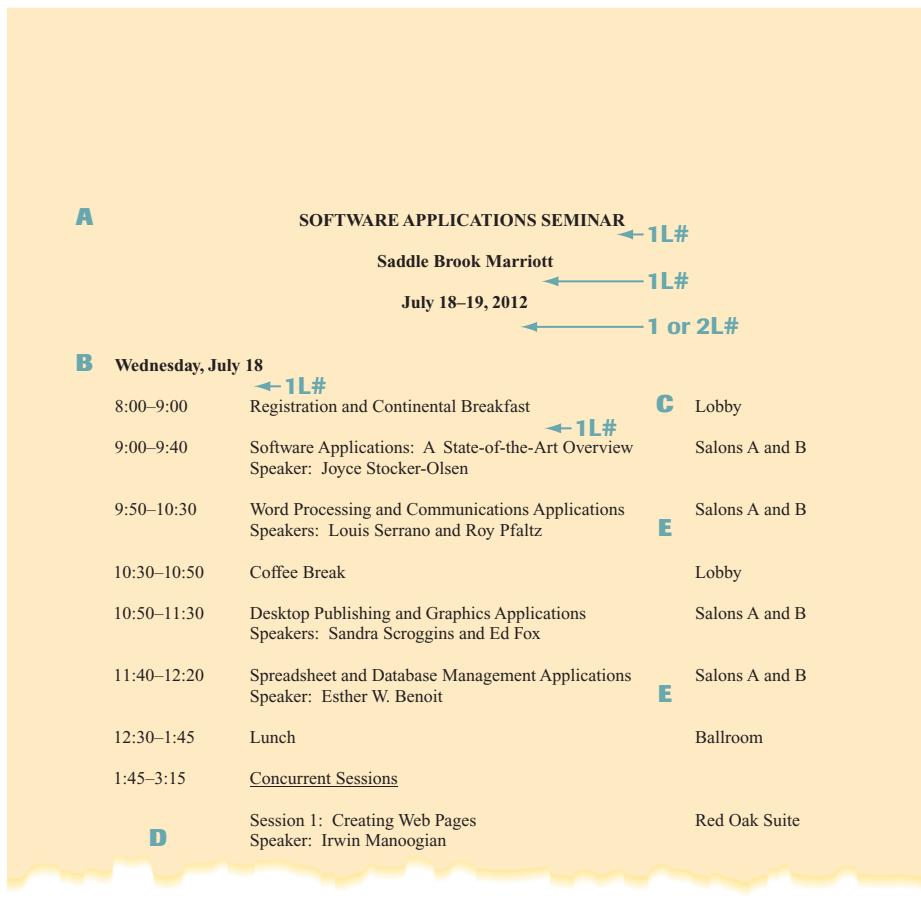

► For an explanation of the spacing notations used in the illustrations in Section 17 (for example, 1L#), see ¶1302d.

- A Memo Format.** For the format of a memo done on plain paper (as shown here) or on letter-head stationery, see ¶1374. For the format of a continuation heading (when the memo requires more than one page), see ¶1410c.
- B Numbered List.** If you use the *numbered list* feature of your word processing program, each item may begin at the left margin or be indented, turnovers will be indented to align with the first word in the line above, and no space will be left between items. (See ¶1345d for an illustration of a single-spaced list created by the numbered list feature.) To make the list easier to read, insert 1 blank line after each item in the list, as in the illustration above. (For further details, see ¶1345d.)
- C End Punctuation.** The enumerated items in an agenda typically require no end punctuation. However, if any item involves the use of a complete sentence (as in the fifth item in this illustration), place a period at the end of every item. For details on the use or omission of periods with items in a list, see ¶107.

Agenda—Formal Style

- A Margins.** The agenda that appears above lists a number of very short items. If the agenda were typed using default side margins, it would have an unbalanced look, with a relatively small left margin and a very large right margin. Therefore, this agenda has been centered horizontally to achieve a balanced appearance.
- B Numbered List.** If you use the *numbered list* feature of your word processing program, each item may begin at the left margin or be indented; no space will be left between items. Ordinarily, when the items in a list contain no turnovers, single spacing is quite acceptable. However, in a document like an agenda, where each item will be the subject of discussion, the use of 1 blank line between items makes the list easier to read and work with. (For an illustration of a single-spaced list created by the numbered list feature, see ¶1345d.)
- C** When a numbered list contains 10 or more items, the numbered list feature of your word processing program will align the numbers at the left. (See the illustration in ¶1345d, note.) However, you can choose to align the numbers at the right (as in the illustration above).
- D End Punctuation.** Note that no periods are needed at the end of the items in this illustration. (See also ¶107.)
- E Formal Items.** In a formal agenda it is customary to include such items as *Call to order*, *Approval of minutes*, *New business*, and *Adjournment* (or similar types of expressions).

Agenda—Program for a Conference or Seminar

- A** **Headings.** Include the location and date(s) of the conference or seminar in the main heading unless the program is part of a larger document that features this information prominently in some other way.
- B** If the program is scheduled to last more than one day, insert an appropriate side heading above each day's listing of events.
- C** **Columnar Format.** To create this three-column format, use the *table* feature.
- D** For the alignment of "clock" times in a column, see ¶1627b.
- E** **Speaker Identification.** The speakers listed on the program may be further identified by title, organization, and place of residence. Use commas to separate these elements of identification and, if you wish, use parentheses to enclose these elements as a whole. For example:

Roy Pfaltz, software consultant,
Newton, Massachusetts

Esther W. Benoit (vice president,
Programmatic Associates,
Los Altos, California)

Minutes—Informal (Memo) Style

A **MEMO TO:** Marketing Managers Committee ← 1L#
FROM: Paula Washington ← 1L#
DATE: July 21, 2011 ← 1L#
B **SUBJECT:** Minutes of the Marketing Managers Committee Meeting of July 20, 2011 ← 1 or 2L#
C **Present:** Dorothy Innie (presiding), Georgia Albers, Ruth Fagan, Katherine Garcia-Lorca, Sid Koechlin, Charles Mandel, Tim Pavlick ← 1L#
 Absent: Fay Li ← 1L#
 Guest: Bill Carr ← 1 or 2L#
E
D 1. **Sales through June for each product line.** Each product line is behind budget for the first six months of the year. Bill Carr of the Finance Department reported that the company as a whole is running 11.2 percent behind budget and 6.3 percent behind last year's sales for the first six months. ← 1L#
F 2. **Year-end sales forecast vs. budget for each product line.** Ruth Fagan and Sid Koechlin each reported that on the basis of recent reports from the field, sales will
G The next meeting of the Marketing Managers Committee will be held on August 24 in the large conference room (as usual). ← 1L#

 D. Innie
 G. Albers
 R. Fagan
 K. Garcia-Lorca
 S. Koechlin
 F. Li
 C. Mandel
 T. Pavlick

- A **Memo Format.** For the format of a memo on plain paper (as shown on page 624) or on letterhead stationery, see ¶1374. For the format of a continuation heading (when the memo requires more than one page), see ¶1410c.
- B **Subject Line.** For better appearance, the entry following *Subject* has been broken into two lines of roughly equal length. (See ¶1343e.)
- C **Attendance Data.** This block of copy indicates who was present at the meeting (the person who presided is listed first), who was absent, and who attended as a guest.
- D **Content Considerations.** List each topic in the order in which it was discussed at the meeting. (Compare these minutes with the agenda shown on page 621.)
- E Treat each topic as a boldface run-in head, followed by a period and the comments that relate to that topic (as illustrated on page 624). As an alternative, treat each topic as a boldface side head, with no period following. The related comments will then appear as a separate paragraph starting on the second line below. For example:
 1. **Sales through June for each product line**
Each product line is behind budget for the first six months
of the year. Bill Carr of the Finance Department ...
- F When the items in a numbered list consist of paragraphs with two or more lines, leave a blank line between items for better readability and a more open look. (See ¶1345d.)
- G Give the date and location of the next meeting in a concluding paragraph, starting at the left margin.

Minutes—Formal Style

UNDERLOCK AND KEYE INC. ←1L#

Minutes ←1L#

Regular Meeting of Directors ←1L#

September 27, 2011 ←1 or 2L#

B

A regular meeting of the Board of Directors of Underlock and Keye Inc. was called to order at 4 Riverfront Plaza, Louisville, Kentucky, at 10 a.m. pursuant to the notice sent to all directors in accordance with the bylaws. ←1L#

D

The following directors were present, constituting all the directors: Jared G. Allison II, Kenneth L. Calderone, Deborah Dean Daniels, Gary Guyot, Henry Koyama, Anton Mika, Helen Roberts, Walter F. Tarshis, Samuel A. Tuleja, and D. J. Wikowski.

E

Also present by invitation were William Burgos, Thomas Foy, Gregory A. Herzenberg, Angela J. McGill, and Lester Soaries.

J
Jared G. Allison II, Chairman, presided and David K. Rust, Assistant Secretary, recorded the proceedings of the meeting.

F

The minutes of the last meeting were approved.

J
Mr. Allison introduced Gregory A. Herzenberg, Executive Vice President of Operations, who reported on August operations.

F

I
Henry Koyama reviewed the recommendations of the Real Estate Committee on the matter of building a new facility or renovating the existing facility to accommodate the Corporation's information processing needs over the next ten years.

Minutes

2

September 27, 2011

B

After further discussion, upon motion duly made and seconded, the following resolutions were unanimously adopted: ←1L#

C

RESOLVED, that the Corporation is hereby authorized to undertake construction and rehabilitation activities with respect to renovating the

G

I
The next meeting of the Board will be held on November 28 at 10 a.m.

H

I
There being no further business before the meeting, it was, on motion duly made and seconded, adjourned at 1:05 p.m.

←3L#

Assistant Secretary

- A **Headings.** Use all-caps for the name of the company on the first line. Use caps and lower-case for the other lines. For the date line, use the date on which the meeting was held (not the date on which the minutes were prepared). Use boldface for the name of the company and, if desired, for all the elements in the heading.
- B **Format Considerations.** Use default side margins. Indent the first line of each paragraph 0.5 inch.
- C Treat resolutions as extracts, indented as a block 0.5 inch from each side margin. Type *RESOLVED* in all-caps, followed by a comma and *that* (as illustrated). As an alternative, type *RESOLVED* followed by a colon and *That*.
- D **Content Considerations.** Use the opening paragraph to indicate the name of the company, the time and the place where the meeting was “called to order” (the first item on the agenda shown on page 622), and whether it was a regular or special meeting.
- E Use the next paragraphs to indicate which directors were present (in this illustration, all were), which were absent, which company officers and invited guests were present, who presided, and who recorded the proceedings and prepared the minutes.
- F The body of the minutes should note in each paragraph what business was transacted and what actions were taken.
- G Use the next-to-last paragraph to indicate the date and time of the next meeting.
- H Use the final paragraph to indicate the time of adjournment.
- I **Capitalization Style.** Minutes done in a formal style use a formal style of capitalization. Note that short forms such as *Corporation* and *Board* are capitalized.
- J Also note that in formal minutes such titles as *Chairman*, *Assistant Secretary*, and *Executive Vice President of Operations* are capitalized when used after a person’s name. (See ¶313d.)

Itinerary

		ITINERARY	← 1L#
		For Wallace F. Galloway	← 1L#

		← 1 or 2L#	
A	Wednesday, April 4		
	9:00 a.m.–4:00 p.m.	Board meeting in headquarters building, 49th floor Sam Hurley will drive you to the airport.	
	5:25 p.m.	Depart Newark, Continental Flight 1809	
	6:40 p.m.	E Arrive Washington, Reagan Airport	E

- A Headings.** If the itinerary is to cover more than one day, insert an appropriate side heading above each day's scheduled list of activities.
- B Columnar Format.** To create this two-column format, use the *table* feature.
- C** For the alignment of “clock” times in a column, see ¶1627b.
- D Spacing.** Leave 1 blank line between entries. Single-space any turnovers.
- E Content Considerations.** Provide the names of airports only when there is more than one airport serving the city (in this case, Washington, D.C.).
- F** Try to provide the first names (rather than simply titles or initials) for all the individuals whom the traveler is scheduled to meet.
- G** Provide phone numbers for all transportation services, hotels, and restaurants in case the plans have to be rescheduled or canceled.

Fax Cover Sheet

A fax cover sheet template with a yellow header and footer and a white middle section for filling in information. The top right corner has the company name 'BURNHAM & FRYE INC.' and address '225 High Ridge Road Stamford, CT 06905'. The middle section contains fields for Date (B), To, Fax number, From (A), Fax number (A), Number of pages (including this cover sheet), and Message (B). The bottom section asks for a contact person if transmission is missing or unclear, with fields for Name (B) and Phone number.

FAX.....

BURNHAM & FRYE INC.
225 High Ridge Road
Stamford, CT 06905

Date: **B** _____

To: _____

Fax number: _____

From: **A** _____

Fax number: **A** _____

Number of pages (including this cover sheet): _____

Message: **B** _____

If any part of this fax transmission is missing or not clearly received, please call:

Name: **B** _____

Phone number: _____

- A Format Considerations.** If you are using software to create a template for a fax cover sheet that only you will use, insert any information that will not change (such as your name and fax number) as a part of the template. However, if you are creating a form to be used by a number of people, provide blank fill-in lines for this variable information.
 - B Fill-In Lines.** If the entries on the fax cover sheet are likely to be typed in, use consistent spacing between fill-in lines and try to arrange the fill-in lines so that all entries can start at a common point.
- Confidentiality Statement.** If you are faxing something that is confidential (and this may often be an unwise thing to do), add an appropriate message to the cover sheet.

CONFIDENTIAL

The contents of this fax transmission are confidential. If this transmission has been directed to the wrong office, please destroy the contents of this fax immediately and notify [sender's name] at [phone number].

To further ensure the confidentiality of the transmission, call the appropriate person in the receiving office and (1) confirm the fax number to be used and (2) confirm that the person will be standing right by the receiving equipment while the fax is being transmitted.

FOR IMMEDIATE RELEASE C

← 1 or 2L#

D BURNHAM & FRYE ACQUIRES BRITISH TECHNOLOGY COMPANY ← 1L#
Purchase Strengthens Burnham & Frye's Lifetime Learning Initiatives ← 1 or 2L#

E STAMFORD, CONNECTICUT, MAY 31, 2010—Burnham & Frye today completed its acquisition of Halsted Multimedia Solutions Ltd. of Maidenhead, Berkshire, England. Halsted's multimedia management and employee training courses and its state-of-the-art technology will expand Burnham & Frye's capabilities in delivering interactive training programs for professionals over the Internet, corporate intranets, and other multimedia platforms.

Halsted's product line includes 18 multimedia programs in CD-ROM format on topics ranging from customer service to teamwork and marketing. All offer a rich mix of video, audio, graphics, and text, and they also feature interactive exercises and easy navigation. ← 1L#

F # # #

- A** **Heading.** The heading should indicate the name and address of the organization sponsoring the news release.
- B** It should also show the name, phone numbers, and e-mail address of the person to contact in case more information is needed.
- C** The heading should also indicate when the information contained in the news release may be distributed to the public. In many cases the phrase *For immediate release* is sufficient. If the information is to be kept confidential until a specific time and date, the heading should carry a notation like this:
For Release 9 a.m. EST, May 7, 2010
- D** **Headline.** The text of the news release should begin with a descriptive title and, if desired, a subtitle.

- E Content Considerations.** The first paragraph should begin with a bold run-in head that indicates the city and state of origin and the date on which this material is to be released. This run-in head is usually followed by a dash or a colon (typical newspaper practice) rather than a period.
- F** At the end of the text, leave 1 blank line and type one of the following notations, centered: three spaced pound signs (# # #) or the phrase –30–. These notations, derived from long-standing newspaper practice, signify “the end.”
- G Newspaper Style.** In preparing news releases, some business writers try to make their copy more attractive to newspaper editors by following the rules of newspaper style rather than the style ordinarily used by their own organization. Thus, to spare a newspaper editor from having to remove a comma before *and* in a series, a business writer might decide not to use this comma in phrases such as “over the Internet, corporate intranets, and other multimedia platforms.” (For a brief discussion of the use of commas in a series, see ¶162a.)

Résumés

Preparing a Résumé

1708 When you prepare a résumé, keep the following things in mind:

- a. The purpose of a résumé is not to get you a job but to get you a *job interview*.
- b. The purpose of a résumé is not to tell a prospective employer about *your* long-term goals and aspirations but to indicate *what you can do for the employer* with the experience you have acquired and the skills you have developed.
- c. Do not describe your past jobs in terms of duties and responsibilities. Emphasize things you have achieved, capabilities you have acquired, decision-making skills you have put to good use, activities you have initiated, and sales and profits that have increased (and expenses that have decreased) because of your efforts.
- d. Describe your achievements and skills in a way that indicates they are readily applicable to other types of jobs and other fields.
- e. Do not overstate your achievements by claiming to have accomplished certain things single-handedly when it will be clear to the prospective employer that your achievement had to be part of a team effort. In the attempt to come across as a self-starter, don't jeopardize your reputation for honesty.
- f. While you want your résumé to stand out from all the others that are submitted at the same time, think of how an employer will view your résumé. If you're applying for a job in advertising, design, or some other creative field, an original format or even an off-the-wall approach may spark the interest you crave. But if you're after a job in management, finance, or marketing—where an image of maturity and dependability is important—you'll gain more ground by emphasizing how you can help the employer rather than by taking a far-out approach.
- g. Weigh the advantages of preparing a custom-tailored résumé for each situation (in which you organize and focus your strengths in light of a specific employer's needs) over the savings in time and money that come from preparing a single résumé designed to fit a variety of job opportunities and a range of employers' needs. When you use a computer, preparing custom-tailored résumés is easy.

¶1709

- h. Keep the résumé as short as possible (no more than two pages). Some employers may ask for a one-page résumé. (See pages 640–641.)
- i. Choose a format that yields a clean, uncluttered look. (See pages 634–635.)
- j. Do not mention how much you earned in previous jobs or how much you expect to earn in the future.
- k. Do not refer to your age, your marital status, your height and weight, your hobbies, or other personal details unless they enhance your suitability for the job.
- l. Do not supply reasons for having left previous jobs or for gaps in your employment history. However, do prepare yourself for dealing with these issues if they come up in the interview.
- m. Do not give references on the résumé. It is not even necessary to state that references are available upon request. Be prepared, however, to supply names, addresses, and phone numbers at the interview.
- n. Use good-quality paper (of at least 20-pound weight and preferably 24), and consider having your résumé executed and reproduced professionally if you cannot create a crisp-looking document with the equipment you have at your disposal.
- o. Be sure to write résumé with two acute accents, especially if you are applying for a job that calls for good language skills and careful attention to detail. Otherwise, a prospective employer might conclude that (1) your spelling is not first-rate or (2) you are sloppy about small details or (3) you simply can't be bothered to take the extra step required in situations like this. (See also ¶718a.)
- p. Be sure to proofread your résumé carefully before distributing it. If possible, ask someone with good proofreading skills to take a fresh look at your résumé on the chance that you may have overlooked some simple errors that would damage the impression you hope to make. Do not make the mistake of the person whose résumé actually contained this sentence: "I am a perfectionist and rarely if ever forget details."
- q. As you shape your résumé to create a positive image of yourself, keep in mind that many employers these days are running online background checks on people they are thinking of hiring. Therefore, be sure to remove any comments or photographs that you may have previously placed on a Web site like Facebook or MySpace if those items are likely to reflect badly on the image you are trying to project in your résumé. What may have seemed clever or amusing at the time might now suggest to a prospective employer that you lack maturity or good judgment.

Choosing a Standard Format

1709 There is a wide range of formats you can choose from. Indeed, in a number of books dealing exclusively with the topic of résumés, you will find as many as a hundred models showing all kinds of variations in layout and approach. In addition, some word processing programs provide at least one résumé template and suggestions concerning the contents of each section of the document.

IMPORTANT NOTE: If the employer you have in mind does not provide specific format guidelines, you will find many helpful sites on the Internet. One in particular is called JobStar Central <<http://jobstar.org/tools/resume/index.php>>. This Web site provides a number of sample résumés as well as a list of printed materials and other Web sites

that offer valuable advice on how to format a résumé that is right for you. Another valuable Web site is called Monster <<http://www.monster.com>>. This site is one of many that will not only help you create a résumé; it will let you post your résumé on the Internet, do a job search, and manage your career.

When you are ready to start looking for a job, you will find an abundance of job postings online. You may find the following Web sites helpful:

- Yahoo! HotJobs <<http://hotjobs.yahoo.com>>
- JobCentral <<http://www.jobcentral.com>>
- CareerBuilder <<http://www.careerbuilder.com>>
- USAJOBS <<http://www.usajobs.gov>>

NOTE: JobCentral is the creation of the DirectEmployers Association.

The illustrations on pages 634–639 show three different ways to format a standard résumé for Alison L. Bumbry, who majored in marketing in college, has had a number of secretarial and administrative positions in the marketing field, and is now attempting to move up to a managerial job in the same field.

The first two models illustrate the *chronological* approach, in which a person's employment history is sequenced by date, starting with the most recent job and working backward. This is the approach most widely used.

In the first model (on pages 634–635) note that the dates for each job are highlighted in the left column; the corresponding job title, the name and location of the employer, and comments about the job are grouped together at the right. Also note that all the information about job *experience* typically comes before the information about *education*. If you are just out of school and have little job experience to cite, put the educational information first. (See the illustration on page 640.)

The second model (on pages 636–637) also lists the jobs in reverse chronological order, but it highlights the job titles (rather than the dates) in the left column. This approach is especially effective when your employment history shows steady upward progress in a chosen field and you are applying for the next logical position in your career path.

The third model (on pages 639–640) illustrates the *functional* approach, which groups a person's achievements and skills in functional areas such as management, administration, marketing, and writing. The functional approach is the hardest to implement, but it does have the advantage of grouping your key strengths in meaningful categories (rather than leaving it to the employer to ferret out these patterns of strength from your chronological job descriptions). This approach is especially helpful (1) when you are trying to change to another field (since it emphasizes generic types of abilities that can be applied in various settings) and (2) when you are trying to play down gaps or frequent job changes in your employment history.

The fourth model (on pages 640–641) illustrates a one-page résumé for a person recently out of school (or soon to complete a college or high school program). This model is essentially an adaptation of the chronological approach, but because this person does not have a great deal of job experience to list, this résumé deals with the person's educational background first and goes into greater detail about the courses taken than would otherwise be appropriate.

► *For a model of a scannable résumé, see pages 644–645.*

Résumé—Chronological Style (Emphasizing Dates)

A ALISON L. BUMBRY

AB Apartment 145
395 West Center College Street
Yellow Springs, Ohio 45387

Phone: 937-555-7944
Fax: 937-555-8341
E-mail: albumbry@aol.com

B OBJECTIVE:

A marketing management position in which marketing and administrative experience plus strong writing and computer skills can be used to maximize sales and profitability of one or more product lines.

C EXPERIENCE:

July 2007–Present

ADMINISTRATIVE COORDINATOR FOR DIRECTOR OF MARKETING, Zimmer & Boyle Inc., Dayton, Ohio

D

E

Created and managed a database to control budgeted expenses for advertising and promotion.

F

Participated in designing and implementing market research studies to determine potential size of market for new product lines. Coordinated focus group sessions to determine customer attitudes toward our product lines and those of competitors. Initiated desktop publishing program to create space ads, catalogs, and mailing pieces. Saved the company over \$50,000 in the first year of operation.

G

February 2005–
June 2007

ADMINISTRATIVE ASSISTANT TO SALES MANAGER
Zimmer & Boyle Inc., Dayton, Ohio

Analyzed field sales reports and wrote summaries highlighting problems requiring immediate action and those suggesting need for changes in product design, order fulfillment procedures, and customer service. Resolved customer complaints by taking direct action whenever possible or by routing the complaint to the appropriate person. Followed up to ensure complaint was properly handled. Supervised a secretary who handled all correspondence and clerical tasks.

May 2003–
January 2005

SECRETARY TO MARKETING MANAGER
Crouch and Cowar Incorporated, Toledo, Ohio

Developed detailed marketing plans, working from rough outlines provided by marketing manager. Created and managed a segmented database of names of customers and qualified prospects for direct marketing campaigns. Wrote copy for mail campaigns and catalogs. Established media contacts to obtain free publicity for new products and special offers.

- A Heading.** The heading should give all the key data an employer needs to get in touch with you. One possible arrangement is to present the data in two blocks: one aligned at the left margin, the other at the right.
- B Objective.** Use your “objective” statement to indicate the type of job you’re looking for, the strengths you can bring to the job, and what you think you can accomplish for the employer’s benefit.
- C Experience.** In this format the dates for each job are featured in the left column.
- D** At the right, each job history begins with the job title (in all-caps), followed by the employer’s name and location (in caps and lowercase) on the following line.
- E** The specific achievements in each job history are presented in a series of bulleted entries.
- F** Note that many entries begin with vigorous verbs (such as *created, initiated, resolved, and supervised*) to create the image of a dynamic, take-charge kind of person.

ALISON L. BUMBRY

Page 2

September 2001–
April 2003 ASSISTANT TO DIRECTOR OF PUBLIC RELATIONS
The Toledo Museum of Art, Toledo, Ohio

Wrote news releases for new exhibits and special events.
Wrote, designed, and laid out fund-raising brochures.
Established and maintained effective media contacts with regional newspapers and TV and radio stations.

H EDUCATION: B.S. in marketing, 2001; minor in English
Arizona State University, Tempe, Arizona

Wrote feature articles for *The Arizona Sundial* during sophomore and junior years.
Created (with two partners) an on-campus birthday celebration service. Managed the service during junior and senior years.
Tested various direct marketing techniques to solicit orders from parents of students.

I CONTINUING EDUCATION: Courses in copywriting, telemarketing techniques, niche marketing, and computer graphics, Wright State University, Dayton, Ohio, 2007–2009.

J COMPUTER SKILLS: Microsoft Office Suite 2007 Professional, Microsoft Office Suite 2003, Corel WordPerfect Office Suite X4 Professional, CorelDRAW Graphics Suite X4, Adobe Creative Suite 4 Design Standard, Adobe PageMaker 7.0, Peachtree by Sage First Accounting 2009, Microsoft Money Plus Premium, Microsoft Vista.

K COMMUNITY SERVICE: Wrote, designed, and laid out annual fund-raising brochures (since 2007) for the Dayton Homeless Shelter Coalition, using desktop publishing and computer graphics software.

- G** Note also that to maintain credibility, the writer uses such terms as *participated in* and *created (with two partners)* to acknowledge the contribution of others whenever appropriate.
- H Education.** Provide information on college and any postgraduate degrees in that order. Provide information about your high school education only if that is the highest level so far attained. If you are currently enrolled in a degree program, note this fact along with an estimated date of completion. For example: *Pursuing a two-year program in business administration at Glendale Community College; will receive an A.A. degree in June 2010.*
- I Continuing Education.** Note any job-related courses you have taken. If you are changing careers or fields, note any other continuing education activity that shows you are a person committed to learning new things.
- J Special Skills.** Note any special skills that could be job-related; for example, mastery of software programs, experience with certain equipment or machinery, mastery of spoken or written foreign languages.
- K Community Service.** Note any activity that is job-related or that shows concern about the needs of others.
- Optional Sections.** Also provide job-related information under such labels as these: *Professional Affiliations* (memberships), *Professional Activities* (speeches and published articles and books), *Military Service*, and *Special Interests*.

Fax: 937-555-8341
E-mail: alumbry@aol.com

OBJECTIVE:

A marketing management position in which marketing and administrative experience plus strong writing and computer skills can be used to maximize sales and profitability of one or more product lines.

B

A ACHIEVEMENTS:

MARKETING EXPERIENCE

B

C

Participated in designing and implementing market research studies to determine potential size of market for new product line.
Coordinated focus group sessions to determine customer attitudes toward our product lines and those of competitors.
Analyzed field sales reports and wrote summaries highlighting problems requiring immediate action and those suggesting need for changes in product design, order fulfillment procedures, and customer service.
Developed detailed marketing plans, working from rough outlines provided by marketing manager.

B

ADMINISTRATIVE EXPERIENCE

C

Controlled budgeted expenses for advertising and promotion.
Resolved customer complaints by taking direct action whenever possible or by routing the complaint to an appropriate person. Followed up to ensure complaint was properly handled.
Established and maintained effective media contacts with regional newspapers and TV and radio stations to obtain free publicity for new products and special offers.
Supervised a secretary who handled all correspondence and clerical tasks.

B

WRITING SKILLS

C

Wrote copy for mail campaigns and catalogs.
Wrote summaries of field sales reports to underscore need for immediate action.
Wrote copy for fund-raising brochures for art museum.

B

- A** **Sideheads.** In this illustration the customary sidehead *EXPERIENCE* in the left column has been replaced by *ACHIEVEMENTS* because the term *experience* has been used in two of the sideheads in the right column.
- B** Note how the wording of the “objective” statement (*in which marketing and administrative experience plus strong writing and computer skills*) provides the springboard for the functional sideheads in the right column (*MARKETING EXPERIENCE*, *ADMINISTRATIVE EXPERIENCE*, *WRITING SKILLS*, and *COMPUTER SKILLS*).
- C** Note how the entries under the sideheads in the right column have been reordered (and in some cases reworded) so as to emphasize the applicant’s strengths in each functional area, independent of the job setting in which these strengths were developed.

ALISON L. BUMBRY

COMMUNITY SERVICE:

Wrote, designed, and laid out annual fund-raising brochures (since 2007) for the Dayton Homeless Shelter Coalition, using desktop publishing and computer graphics software.

- D Employment History.** Although this section would not appear in a purely “functional” résumé, an employment history provides prospective employers with a brief chronological listing of previous job titles, the name and location of previous employers, and employment dates. Including this section in a functional résumé often serves to mollify employers who are more comfortable with résumés done completely in the chronological style.

Résumé—One-Page Style

RALPH A. PINKHAM
148 Biscay Road
Damariscotta, Maine 04543
207-555-3266

OBJECTIVE: To gain experience as a bank teller as a first step toward a career in banking.

A EDUCATION: *A.A. in business management, 2011*
University of Maine, Augusta, Maine

Courses in accounting, business communication, business management, finance, and office technology.

E

B Academic scholarships, 2009–2011. Member of the intramural wrestling team, 2009–2010. Tutor in a university-sponsored community literacy program, 2010–2011.

E

C EXPERIENCE: *Sales associate, Reny's, Damariscotta, Maine, June 2011–Present*

E

Handled cash and credit card transactions, using electronic cash register. Helped customers with product selections and suggested tie-in purchases. Resolved customer problems. Assisted in taking inventory and restocking shelves. Suggested special promotions and helped design merchandise displays.

Cashier, Pinkham's Plantation, Damariscotta, Maine, May 2006–August 2009

E

Worked part-time in family-owned business. Handled cash and credit card transactions. Advised customers on planting and care of purchased items. Set up special seasonal displays and recommended special pricing arrangements to boost sales.

E

D SKILLS: Strong number sense and quick mastery of electronic cash register and calculators. Proven ability to handle large amounts of money accurately. Outgoing personality with the ability to grasp and respond to customers' needs and concerns. Excellent communication skills in writing, over the phone, and face to face. Mastery of Microsoft Office and Lotus Notes software. Facility in the use of e-mail and accessing information on the Web.

- A List your educational achievements in reverse order, starting with your most recent experience. If you have graduated from a college-level program, you do not need to cite your high school experience unless mentioning certain courses that you took or certain activities that you engaged in will enhance your qualifications. In that case, you could make the following kind of entry:

Lincoln Academy, Newcastle, Maine, graduated in May 2009

Then list any significant high school courses and activities in a paragraph underneath.

- B Any special activities or honors connected with your education can be listed here, or they can be displayed at the end of the résumé in a special section labeled *Activities*. Creating a special Activities section makes sense if you also want to cite other significant items beyond those related to your education.
- C In describing the tasks you performed in your limited job experience, give special emphasis to those activities that have direct relevance to the job you are now applying for. Ralph Pinkham's references to handling cash are directly related to the job of bank teller. Mentioning that he helped customers "with product selections and suggested tie-in purchases" or that he "suggested special promotions" and "special pricing arrangements to boost sales" indicates that he is the kind of person who takes the initiative in finding ways to do his job more effectively.
- D The section labeled *Skills* gives you a real opportunity to demonstrate that despite your lack of previous experience in performing the job you are applying for, you already possess many of the desirable characteristics of an experienced employee. Ralph Pinkham's previous job experience, though relatively limited, has given him (1) the ability to handle a lot of cash competently, (2) the human relations skills needed to deal with customers, and (3) the ability to quickly master whatever equipment he is required to use on the job. Even a seemingly unrelated job like baby-sitting can be described in such a way as to demonstrate that one has acquired a variety of coping skills that carry over into the areas of management and human relations.
- E In order to hold this résumé to one page, it is better to describe your educational activities, your job experience, and your skills in paragraph style rather than as bulleted items in a list.

NOTE: This illustration of a one-page résumé is specifically designed for someone who is recently out of school and does not have much work experience. However, individuals with a great deal of work experience can also make effective use of a one-page format. In that case, the section dealing with educational achievements should *follow* the sections dealing with work experience and skills.

¶1710**Formatting a Scannable Résumé**

1710 Scannable résumés represent a significant innovation in the job-seeking process. They serve to match the best-qualified applicants with job openings that currently exist or that may soon be opening. Scannable résumés permit organizations to sift through large numbers of résumés by computer in order to identify a smaller (and much more manageable) number of suitable candidates for a particular job. In effect, the computer does the first round of screening. Then human beings enter the process of evaluating qualified individuals for a specific opening.

A *scannable résumé* is a hard-copy document designed to be scanned by an optical character reader (OCR) into a computerized database, where a computer will initially screen individual résumés for keywords that also show up in the description posted for a particular job opening. The more links between the keywords in a scannable résumé and those in the job description, the more likely that résumé (and the individual who wrote it) will be selected for further evaluation by real people.

- a. In planning a scannable résumé, carefully read the ads and the postings for the kind of job you want. Try to incorporate in your résumé as many keywords from those job descriptions as you honestly can. Also make heavy use of industry jargon, acronyms, and abbreviations, as well as current industry buzzwords, even if they do not actually appear in the ads and the postings, since they are likely to be the kinds of keywords that the computer has been programmed to focus on. To increase the total number of keywords in your résumé, use synonyms whenever possible to avoid repeating the same keywords.
- b. It is important that a scannable résumé pose no difficulties for the OCRs currently in use. The very techniques and devices that serve to draw the attention of a human reader may in many cases interfere with the ability of certain OCRs to accurately transfer the contents of the résumé into the computerized database. Paragraphs 1711–1713 offer a number of guidelines to help you avoid such problems when you are formatting a scannable résumé.

1711 a. Do not use boldface, italics, underlining, script, bullets, logos, shading, horizontal or vertical lines, or any other graphic devices. If desired, asterisks may be used to introduce individual items in a list.
b. Do not arrange material in columns. Try to begin everything at the left margin, and do not justify the right margin (see ¶1344g).
c. To achieve the sharpest possible image for the sake of accurate scanning, use a laser printer, black ink, and good-quality paper (of 20- or 24-pound weight).
d. Do not fold or crease the résumé. If possible, insert the résumé in a plastic sleeve to keep it clean and wrinkle-free.
e. Try to limit the résumé to one page. If more than one page is required, use a paper clip (not a staple) to keep the pages together. Moreover, use a continuation heading (as illustrated on page 645).

1712 As you can tell from ¶1711 and from the illustrations on pages 644–645, the appearance of a scannable résumé tends to be quite bland—intentionally so because it has been designed with the needs of the OCR and not those of a human reader in mind. For that reason, consider submitting your résumé in two ways: (a) in a scannable format for the initial round of screening and (b) in a more visually attractive format (as illustrated on pages 634–641) for the benefit of the human readers who will subsequently evaluate you in light of the openings they have available.

The illustrations on pages 644–645 show how a functional-style résumé for Alison Bumbry (see pages 638–639) might be reworked as a scannable résumé.

1713 In organizing the sections of a scannable résumé, keep these guidelines in mind:

- a. Begin with a centered heading block that provides all the key data a prospective employer needs to get in touch with you.

NOTE: If you are concerned about the possibility of identity theft, you may want to provide only your name and your personal e-mail address in the heading of a résumé you plan to post online. In any case, never provide your social security number or your date of birth.

- b. Divide the rest of your résumé into sections identified by side headings like these: *Objective, Skills, Employment History, Education, Continuing Education*. Also consider optional headings such as *Community Service*. (See the illustrations and annotations on pages 644–645 for additional details.)

- c. Under the heading *Objective*, aim for a statement that matches as closely as possible the job description for the position you want. If a job description is not currently available for a specific opening, draw on your knowledge of the industry to describe your objective in language that uses attention-getting keywords.

- d. You may list all your significant skills under the single heading *Skills*, or you may create a number of headings that group your skills appropriately—for example, *Marketing Skills, Administrative Skills, Writing Skills*, and *Computer Skills* (as is done in the illustration on page 644). No matter how you decide to label this section, the material you provide here should also be filled with attention-getting keywords. Indeed, some authorities recommend labeling this section of the résumé *Keyword Profile* or *Keyword Summary*, and some recommend placing this section at the end of the résumé instead of at the beginning.

NOTE: In the illustration on page 644, the material that appears under the various Skills headings has been derived from the functional-style résumé for Alison Bumbry on pages 638–639.

- e. For the sections headed *Employment History, Education, Continuing Education*, and optional sections such as *Community Service*, see the illustration and the annotations on page 645 for details on how to format materials under these headings.

Scannable Résumé

A ALISON L. BUMBRY
Apartment 145
395 West Center College Street
Yellow Springs, Ohio 45387
Phone: 937-555-7944
Fax: 937-555-8341
E-mail: albumbry@aol.com

B OBJECTIVE
A position in marketing management in which marketing experience and administrative expertise plus writing skills and computer skills can be used to promote sales growth and exceed profit goals for one or more product lines.

B MARKETING SKILLS
C Design and implementation of market research studies. Assessment of potential market size for new product lines. Coordination of focus group sessions. Assessment of customer attitudes toward product lines. Analysis of field sales reports. Pinpointing of problems for immediate action. Pinpointing of need for changes in product design, order fulfillment procedures, and customer service. Development of detailed marketing plans based on input from marketing manager.

B ADMINISTRATIVE SKILLS
C Control of advertising and promotion expense budgets. Resolution of customer complaints. Contacts with newspapers, TV stations, and radio stations for free publicity. Supervision of secretary.

B WRITING SKILLS
C Preparation of copy for mail campaigns, catalogs, and fund-raising brochures. Summaries of field sales reports.

B COMPUTER SKILLS
C Start-up of in-house desktop publishing program, with first-year savings of \$50,000. Design and layout of space ads, catalogs, mailing pieces, and fund-raising brochures. Creation and management of database for control of advertising and promotion expense budgets. Creation and management of segmented database of customers and qualified

- A** **Heading.** On separate single-spaced lines centered in a block, provide your name, address, and phone number, plus a fax number and an e-mail address if these are available. Use all-caps only for your name. Do not use boldface, italics, or any graphic device to highlight the information in this heading block.
- B** **Side Headings.** Identify each section of a scannable résumé with an all-cap side heading. Leave 1 blank line above and below each heading. Do not use boldface, italics, or any graphic device to highlight these sideheads.
- C** **Skills.** Note how the copy in these sections (drawn from the functional-style résumé on pages 638–639) shifts the wording away from action verbs to keyword nouns. Also note that the copy under each side heading is organized as one paragraph consisting of phrases, each ending with a period. This arrangement, which takes less space, is not as readable as listing these items on separate lines, but remember that a scannable résumé is designed to be read by an OCR and not by a human pair of eyes.

H ALISON L. BUMBRY

Page 2

B EMPLOYMENT HISTORY

- D** * Administrative coordinator for director of marketing, Zimmer and Boyle Inc., Dayton, Ohio, July 2007–Present.
* Administrative assistant to sales manager, Zimmer and Boyle Inc., Dayton, Ohio, February 2005–June 2007.
* Secretary to marketing manager, Crouch and Cowar Incorporated, Toledo, Ohio, May 2003–January 2005.
* Assistant to director of public relations, the Toledo Museum of Art, Toledo, Ohio, September 2001–April 2003.

B EDUCATION

- E** B.S. in marketing, 2001, minor in English, Arizona State University, Tempe, Arizona.

Writer of feature articles for *The Arizona Sundial* during sophomore and junior years. Cofounder and manager of on-campus birthday service. Testing of various direct marketing techniques to solicit orders.

B CONTINUING EDUCATION

- F** Courses in copywriting, telemarketing techniques, niche marketing, and computer graphics, Wright State University, Dayton, Ohio, 2007–2009.

B COMMUNITY SERVICE

- G** Writing, design, and layout of annual fund-raising brochures for the Dayton Homeless Shelter Coalition.

D Employment History. Note that the jobs are listed in reverse chronological order, starting with the most recent job. You may use an asterisk to introduce each job listing (as in the illustration above), but do not use bullets or any other graphic device for this purpose. Because the duties of each job have already been summarized in the Skills sections in the illustration on page 644, there is no reason to repeat them here.

E Education. List your educational experience in reverse order, starting with the most recent college or graduate program for which you have received (or expect to receive) a degree. List your secondary education only if you cannot cite enrollment in or completion of a college degree program.

F Continuing Education. Under this heading cite courses you have taken or are now taking but not as part of a formal degree program.

G Optional Sections. Use such headings as *Community Service*, *Professional Affiliations*, *Professional Activities* (including honors and awards), *Military Service*, and *Special Interests* to cover any activities that involve job-related skills or that show your involvement in addressing the needs of others.

H Continuation Heading. Provide a heading that gives your name and the page number.

I Elimination of Graphic Elements. Because some OCRs cannot properly scan ampersands, note that the ampersand in *Zimmer & Boyle* has been replaced by *and*. Moreover, because some OCRs cannot cope with italics or underlining, the title of the university newspaper—*The Arizona Sundial*—appears without any special display.

¶1714

Other Employment Documents

As part of the job-seeking process you will need to write three types of letters: letters of application, follow-up letters after an interview, and (hopefully) a letter of acceptance. Specific guidelines are provided in ¶¶1715–1717, but a few general guidelines (¶1714) apply to all employment communications.

General Guidelines

- 1714**
- a. Keep your letters short—less than one full page if possible.
 - b. Resist the temptation to copy sample letters word for word. Draw on these samples for ideas, but create your own letters—letters that communicate the distinctive flavor of your personality.
 - c. Edit and proofread your letters carefully. Simple typographical errors (not to mention more serious errors in grammar, style, and usage) will create a negative impression that damages your job-seeking campaign.
 - d. Always try to address your letters to a specific person, using that person's full name and title. If necessary, call the organization to obtain this information.

NOTE: The model letters on pages 648–650 are all written by Alison Bumbry, the fictitious person whose job qualifications are set forth in the résumés shown on pages 634–639 and 644–645. In these letters, Ms. Bumbry is trying to move up to a marketing management position.

Application Letters

1715 Letters you write to apply for a job will vary to some extent, depending on whether you are (a) following up on an ad, (b) taking the initiative to find out whether any openings exist for a person with your skills and experience, or (c) following up on the suggestion of a mutual friend or acquaintance to explore job opportunities with a specific person within an organization. Yet all application letters have the same three objectives: to indicate what you have to offer the organization, to transmit your résumé, and to obtain an interview. Consider the following guidelines and the illustration on page 648 when you write an application letter.

- a. Before you draft your letter, try to get as much information as you can about the organization you have in mind. For example, what products or services does it offer? What special strategy or philosophy governs the way the organization operates? Such information can help you focus your letter more effectively and will let the recipient of the letter know that you have taken the initiative to learn something about the organization.

NOTE: If you are responding to a blind ad (one that provides no organizational name and only a box number address), you will not be able to undertake this research. However, the ad will spell out the qualifications desired, something not usually available when you are simply exploring the possibility of job openings.

- b. Begin your letter by indicating whether you are responding to an ad, following up on the suggestion of a mutual friend or acquaintance, or simply exploring what job opportunities currently exist.

- c. Indicate what you have to offer the organization. If you are responding to an ad that states the qualifications desired, clearly indicate how your skills and experience relate to each of the qualifications listed. If you are simply exploring job openings, do not focus on specific tasks that you have performed in the past. Instead, highlight the things you have accomplished as a result of the way you applied your skills and experience. This approach will make it easier for someone to gauge how well you might fit the job available, even if you have not performed those exact tasks in the past.

NOTE: The recipient of your letter will probably be receiving many other application letters at the same time. It is important, therefore, that your letter and your résumé make you stand out from the others. In your letter you should aim to achieve—in much shorter form—the same things you are trying to achieve in your résumé. (See ¶1708a–d for further details on this point.)

- d. The primary short-term objective of this letter is to arrange for an interview. Rather than wait for the recipient of your letter to call you, indicate that you will call on a specific date to determine whether an interview can take place. In stating when you will call, allow enough time for your material to be delivered and looked at. Keep in mind that the recipient may be inundated with other matters or may be traveling and thus may not look at your letter and résumé as quickly as you would like.

NOTE: Keep a record of when you promised to call so that you follow through on time. Calling a day or two later could suggest that you are not a very good manager of your time.

Follow-Up Letters

1716 After an interview, follow up immediately with a letter that covers the following points. (Also see the illustration on page 649.)

- a. Thank the interviewer for (1) taking the time to see you, (2) giving you better insight into the available job and the organization you would be working for, and (3) considering your qualifications in light of the available job.
- b. Reinforce the positive impression you tried to make during the interview, and briefly restate why you think you would be an asset to the organization.
- c. Offer additional information about your qualifications if they were not fully discussed during the interview. If you promised during the interview to supply additional information, do so now.
- d. Address questions that arose during the interview that you were not fully prepared to answer at the time. If you know (or simply sense) that the interviewer had some doubts about your qualifications, use this opportunity to overcome such doubts if you can.

NOTE: If the interviewer made it clear at the time that you were not right for the current job opening, send a follow-up letter nonetheless. Offer thanks for having been considered for this job, and express hope that you will be considered for other jobs that may open up in the future. On the other hand, if *you* decide the job is not right for you, send a follow-up letter in which you thank the interviewer and ask not to be a candidate.

Application Letter

A ALISON L. BUMBRY

AB Apartment 145
395 West Center College Street
Yellow Springs, Ohio 45387

Phone: 937-555-7944
Fax: 937-555-8341
E-mail: albumbry@aol.com

March 3, 2011

Mr. Oliver Digby
Director of Human Resources
Hunt and Ketcham Inc.
1228 Euclid Avenue
Cleveland, Ohio 44115

Dear Mr. Digby:

- B** You advertised for a marketing manager in the March 2 *Plain Dealer*. I have used many Hunt and Ketcham texts in my computer courses, so I know that your company publishes books of consistently high quality. As the following comparison shows, my experience and background come close to satisfying all of the requirements stated in your ad.

C Your Requirements

College degree

My Qualifications
B.S. in marketing plus continuing education courses in marketing and computer software applications

Knowledge of technical publishing market

Over six years' experience in sales and marketing divisions of two educational publishing companies

Field sales experience

Extensive contact with field sales reps and customers, resolving a wide range of sales support and customer service problems

The enclosed résumé will provide additional information about my marketing experience.

- D** I would appreciate the chance to meet with you and discuss the ways in which I can help Hunt and Ketcham achieve its marketing objectives and its profit goals. I will call your office on March 14 to determine whether there is a convenient time for you to see me.

Sincerely,

- A Letterhead.** The attractive letterhead design that Alison Bumbry has executed on her computer will help make her application letter stand out. It is the same letterhead she used on the first page of her résumé.
- B First Paragraph.** Alison uses her opening paragraph to indicate how she found out about the job, what she knows about the organization, and how her qualifications stack up against the job requirements stated in the ad.
- C Displayed List of Qualifications.** Alison does her best to play down her lack of specific knowledge about the technical publishing market and her lack of field sales experience. In this situation a résumé formatted in the functional style (see pages 638–639) will best highlight her strengths in the areas of marketing, administration, writing, and computers.
- D Final Paragraph.** Alison takes the initiative in saying she will call to see whether an interview can be arranged. At the same time, she stresses her willingness to focus the interview on how she can help the organization achieve *its* goals and objectives.

Follow-Up Letter

ALISON L. BUMBRY

March 25, 2011

Mr. Oliver Digby
Director of Human Resources
Hunt and Ketcham Inc.
1228 Euclid Avenue
Cleveland, Ohio 44115

Dear Mr. Digby:

- A** Thank you for taking the time last Friday to explain why my lack of field sales experience in the technical publishing market prevents me from being considered for the marketing manager's position at Hunt and Ketcham.
- B** Thank you, moreover, for arranging an interview that same day with your director of sales. Ms. Cantrell gave me a very detailed picture of a field rep's responsibilities. She also stated that in light of all my prior experience in educational publishing, I ought to make the transition to technical publishing very easily. I was encouraged to learn that after a year or two of experience in the field, I would be a strong candidate for any marketing manager's position that might open at that time.
- C** Ms. Cantrell has promised to let me know within the next four weeks whether she is in a position to offer me a field rep's job. If she does, I very much look forward to seeing you again. In any event, thank you for all the help you have given me.

Sincerely,

Alison L. Bumbry

Alison L. Bumbry

- A First Paragraph.** Alison thanks the interviewer for clarifying the demands of the job and pointing out where her qualifications fell short.
- B Second Paragraph.** Alison thanks the interviewer for steering her to another opportunity in the organization and for setting up an interview that same day. (Alison should also send a follow-up letter to the second person who interviewed her.) Note that she reaffirms her hope for a marketing management job in a year or two.
- C Third Paragraph.** Alison ends on a warm note, thanking the first interviewer for all his help.

Acceptance Letter

ALISON L. BUMBRY

April 29, 2011

Ms. Jennifer Cantrell
Director of Sales
Hunt and Ketcham Inc.
1228 Euclid Avenue
Cleveland, Ohio 44115

Dear Jennifer:

- A** I am very pleased to accept the job of field sales representative, with the state of Ohio as my territory. What especially appeals to me is that this job not only represents an excellent opportunity in itself; it provides a springboard for higher-level marketing jobs with Hunt and Ketcham.
- B** The materials that Oliver Digby sent me answered all my questions about compensation arrangements and company policies. All the necessary paperwork has now been completed and returned. As I understand it, you want me to start work on June 6, spending the month in Cleveland for orientation and training. I assume that someone in your department will provide me with information about my accommodations during the month of June.
- C** I am genuinely excited about the prospect of working with you and for you. From our conversations I can tell how supportive you are of the people who report to you. When I think of how much I will learn under your supervision, I realize just how lucky I am to be joining Hunt and Ketcham.
- D** If there is anything you think I should be reading or doing in the next month, please let me know. I would welcome the chance to get a head start on the job before I actually report for work on June 6.

Sincerely,

Alison L. Bumbry

Alison L. Bumbry

- A First Paragraph.** Alison accepts the job with pleasure, both for its immediate opportunities and for its long-term prospects.
- B Second Paragraph.** Alison uses this paragraph to deal with the technical details involved in starting a new job.
- C Third Paragraph.** Alison expresses her pleasure (perhaps a bit too effusively) at the prospect of working for the person who has offered her the job.
- D Final Paragraph.** Alison shows initiative in offering to undertake advance preparation for the job before she officially starts work.

Acceptance Letters

1717 Of all employment communications, this is the most pleasant letter to write. Use this occasion to:

- a. Formally accept the job.
- b. Confirm the key details of your working arrangements (including starting date) that have been previously discussed. If any of these details are not clear, ask the person who hired you to spell them out.
- c. Express your pleasure in coming to work for the organization and, more specifically, in working for the person who has offered you the job.

Outlines

1718 An outline can be used to *plan* the content and organization of a document. The outline identifies (a) the topics that are to be discussed and (b) the sequence in which they are to be introduced. In some cases, an outline may consist of a simple list of points to be covered. In other cases an outline may contain several levels of subtopics under each main topic (as in the illustration on page 653).

1719 After you have finished drafting a document, you can use an outline to *review* the document in terms of content and organization. An outline of this kind typically lists the key words or phrases used as headings throughout the document to identify topics and subtopics as they are each introduced. When you use an outline for reviewing purposes, you can more easily answer questions like these:

- Have all topics been included?
- Have all topics been fully developed?
- Does the heading structure—that is, the sequence of heads—provide a balanced representation of all aspects of the discussion, or are some parts of the text loaded with heads while other parts have very few?
- Are the heads all worded in a similar way, or are some complete sentences and others simply phrases?

1720 The *outline* feature of your word processing software will permit you to create an outline by scrolling through the text and coding (according to level of subordination) every heading in the text. If you later decide to revise the heading structure in the document, you can use the outline feature to generate a new outline to confirm that the document is now better organized.

1721 If you want to devise your own format for an outline, consider these guidelines and the illustration on page 653.

- a. **Margins.** Use default side and bottom margins. Space down from the default top margin of 1 inch to create a top margin of about 2 inches; leave a top margin of only 1 inch if doing so will prevent the outline from taking a second page. A one-page outline may also be centered vertically on the page.

¶1722

- b. Heading.** Type the title in all-caps, and use caps and lowercase for the other lines. Use boldface for the complete heading or, if you prefer, for the title alone. Leave 1 blank line between lines in the heading, and leave 2 blank lines below the last line of the heading.
- c. Enumerations.** The numbers or letters that identify the items at different levels in an outline should all be followed by a period and 1 or 2 spaces. For the first four levels, align the numbers or letters on the periods.
- d. Capitalization.** Use all-caps for first-level items (those preceded by roman numerals). Use caps and lowercase for items at all lower levels.
- e. Indentations.** When using roman numerals to identify first-level items, start the widest numeral (III or VIII, for example) at the left margin. Align all the other roman numerals on the period. Align the second level of items (those beginning with A and B) on the first word after the roman I. Align the third level of items (those beginning with 1 and 2) on the first word after A in the second level. However, if the third level of items has more than nine entries, align the number 10 on the first word after A in the second level; then align all the single-digit numbers on the period following 10.
- f. Spacing Between Items.** Leave 2 blank lines above and 1 blank line below each first-level item. For all other levels, use single spacing with no blank lines between items.

1722

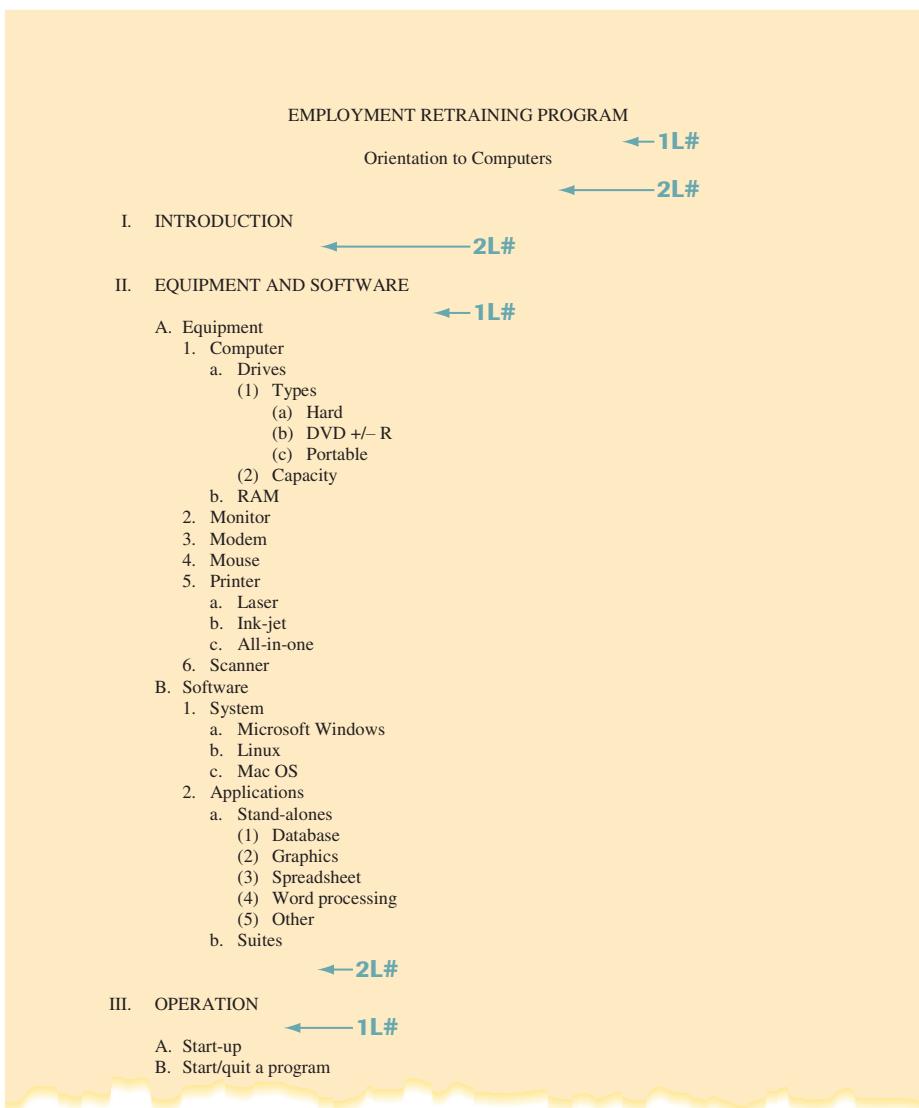

The use of numbers and letters with the items in an outline indicates the relative importance of these items to one another. The illustration on page 653 shows six levels of heads, but many outlines do not require that many and a few may require more.

- a.** In the illustration on page 653, the first level of items is identified by roman numerals, the second by capital letters, the third by arabic numerals, the fourth by lowercase letters, the fifth by arabic numerals in parentheses, and the sixth by lowercase letters in parentheses.
- b.** At least two items are needed for each level used in an outline. If your outline shows a roman I at the first level, it must also show a roman II; if you use a capital A at the second level, you must also use a capital B; and so on.

1723

The *outline* feature of your word processing software may also be used to create a table of contents and a list of tables or illustrations. (See ¶¶1414–1417.)

Standard Outline Format

¶1724

Guidelines for Designing Forms

1724 When you are designing a form with fill-in lines:

- a. Lay out the fill-in lines so that most entries—and preferably all entries—can start at the same point. Reducing the number of tab stops required makes the task of filling out the form a great deal easier. See, for example, the design of the fax cover sheet on page 629, which permits all but one entry to begin at the same point.
- b. Make the fill-in lines long enough to accommodate handwritten as well as typed entries.
- c. Use double spacing between all the fill-in lines. In that way no adjustment in line spacing will be required when the fill-in entries are inserted.

1725 When you are designing a multicolumn form, look for ways to reduce the number of tab stops required to fill in the form. For example, arrange the top of the form so that any entries to be inserted in the heading can start at the same point as the entries in one of the columns below.

SECTION 18

Forms of Address

Individuals (¶1801)

- Man With Personal Title (¶1801a)
- Woman—Personal Title Preference Known (¶1801b)
- Woman—Personal Title Preference Unknown (¶1801c)
- Individual—Name Known, Gender Unknown (¶1801d)
- Individual—Name Unknown, Gender Known (¶1801e)
- Individual—Name and Gender Unknown (¶1801f)
- Two Men (¶1801g)
- Two Women (¶1801h)
- Woman and Man—No Personal Relationship (¶1801i)

Couples (¶1802)

- Married Couple With Same Surname—No Special Titles (¶1802a)
- Married Couple With Same Surname—Husband Has Special Title (¶1802b)
- Married Couple With Same Surname—Wife Has Special Title (¶1802c)
- Married Couple With Same Surname—Both Have Special Titles (¶1802d)
- Married Couple With Different Surnames (¶1802e)
- Married Couple With Hyphenated Surname (¶1802f)
- Unmarried Couple Living Together (¶1802g)

Organizations (¶1803)

- Organization of Women and Men (¶1803a)
- Organization of Women (¶1803b)
- Organization of Men (¶1803c)

Professionals (¶1804)

- Lawyers (¶1804a)
- Physicians and Others With Doctor's Degrees (¶1804b)

Education Officials (¶1805)

- President of College or University (¶1805a)
- Dean of College or University (¶1805b)
- Professor (¶1805c)
- Superintendent of Schools (¶1805d)
- Member of Board of Education (¶1805e)
- Principal (¶1805f)
- Teacher (¶1805g)

Government Officials (¶1806)

- President of the United States (¶1806a)
- Vice President of the United States (¶1806b)
- Cabinet Member (¶1806c)

- United States Senator (¶1806d)
- United States Representative (¶1806e)
- Chief Justice of the United States (¶1806f)
- Associate Justice of the U.S. Supreme Court (¶1806g)
- Judge of Federal, State, or Local Court (¶1806h)
- Governor (¶1806i)
- State Senator (¶1806j)
- State Representative or Assembly Member (¶1806k)
- Mayor (¶1806l)
- Council Member or Commissioner (¶1806m)
- Diplomats (¶1807)
 - Secretary-General of the United Nations (¶1807a)
 - Ambassador to the United States (¶1807b)
 - Minister to the United States (¶1807c)
 - American Ambassador (¶1807d)
- Members of the Armed Services (¶1808)
 - Army, Air Force, or Marine Corps Officer (¶1808a)
 - Navy or Coast Guard Officer (¶1808b)
 - Enlisted Person (¶1808c)
- Roman Catholic Dignitaries (¶1809)
 - Pope (¶1809a)
 - Cardinal (¶1809b)
 - Archbishop or Bishop (¶1809c)
 - Monsignor (¶1809d)
 - Priest (¶1809e)
 - Mother Superior (¶1809f)
 - Sister (¶1809g)
 - Brother (¶1809h)
- Protestant Dignitaries (¶1810)
 - Episcopal Bishop (¶1810a)
 - Episcopal Dean (¶1810b)
 - Methodist Bishop (¶1810c)
 - Minister With Doctor's Degree (¶1810d)
 - Minister Without Doctor's Degree (¶1810e)
- Jewish Dignitaries (¶1811)
 - Rabbi With Doctor's Degree (¶1811a)
 - Rabbi Without Doctor's Degree (¶1811b)
- Muslim Dignitaries (¶1812)
 - Leader of Prayer in a Mosque (¶1812a)
 - Dignitary With Doctor's Degree (¶1812b)
 - Other Muslim Dignitaries (¶1812c)

The following forms are correct for addressing letters to individuals, couples, organizations, professional people, education officials, government officials, diplomats, military personnel, and religious dignitaries. Some writers now omit personal titles with the names of individuals and married couples. For examples, see ¶¶1322g, 1352a.

- For a detailed discussion of how to construct inside addresses, see ¶¶1316–1336; for further information on salutations, see ¶¶1338–1341; for details on how to handle addresses on envelopes, see ¶¶1368–1369.

1801 Individuals

a. Man With Personal Title

Mr. [Full name]

Address

Dear Mr. [Surname]:

b. Woman—Personal Title Preference Known

Ms. OR: Mrs. OR: Miss [Full name]

Address

Dear Ms. OR: Mrs. OR: Miss [Surname]:

Address
Dear Mr. [Surname] and Ms. **OR:** Mrs. **OR:** Miss [Surname]:

NOTE: When addressing a widow, choose the form for the inside address and the salutation that the widow uses in her signature line. (See ¶1352e for examples of the various styles that a widow has to choose from.)

1802 Couples

a. Married Couple With Same Surname—No Special Titles

Mr. and Mrs. [Husband's full name]
Address
Dear Mr. and Mrs. [Husband's surname]:
OR: [Wife's given name] and [Husband's given name] [Husband's surname] (see ¶1322g)
Address
Dear [Wife's given name] and [Husband's given name] [Husband's surname]

- OR:** [Husband's given name] and [Wife's given name] [Husband's surname]
Address
Dear [Husband's given name] and [Wife's given name] [Husband's surname]

b. Married Couple With Same Surname—Husband Has Special Title

Dr. and Mrs. [Husband's full name]
Address
Dear Dr. and Mrs. [Husband's surname]:

c. Married Couple With Same Surname—Wife Has Special Title

Senator [Wife's full name]
Mr. [Husband's full name]
Address
Dear Senator and Mr. [Husband's surname]:

d. Married Couple With Same Surname—Both Have Special Titles

Dr. [Wife's full name]
Dr. [Husband's full name]
Address
Dear Drs. [Husband's surname]:
OR: Captain [Husband's full name]
Professor [Wife's full name]
Address
Dear Captain and Professor [Husband's surname]:

e. Married Couple With Different Surnames

Ms. **OR:** Miss [Wife's full name]
Mr. [Husband's full name]
Address
Dear Ms. **OR:** Miss [Wife's surname] and Mr. [Husband's surname]:

- OR:** Mr. [Husband's full name]
Ms. **OR:** Miss [Wife's full name]
Address

Dear Mr. [Husband's surname] and Ms. **OR:** Miss [Wife's surname]:

NOTE: If either spouse has a special title (like those shown in ¶1802b-d), use that special title here as well.

► For forms of address for teenagers and younger children, see ¶1321d–e.

f. Married Couple With Hyphenated Surname

Mr. and Mrs. [Husband's given name and middle initial, plus wife's original surname followed by hyphen and husband's surname]
Address

Dear Mr. and Mrs. [Wife's original surname followed by hyphen and husband's surname]:

g. Unmarried Couple Living Together

Ms. OR: Miss [Full name]

Mr. [Full name]

Address

Dear Ms. OR: Miss [Surname] and Mr. [Surname]:

OR: Mr. [Full name]

Ms. OR: Miss [Full name]

Address

Dear Mr. [Surname] and Ms. OR: Miss [Surname]:

Secretary-General of the United Nations
United Nations Plaza
New York, NY 10017
Excellency:
Dear Mr. **OR:** Madam Secretary-General:
Dear Mr. **OR:** Madam [Surname]:

b. Ambassador to the United States

His **OR:** Her Excellency [Full name]
Ambassador of [Country]
Address
Excellency:
Dear Mr. **OR:** Madam Ambassador:

c. Minister to the United States

The Honorable [Full name]
Minister of [Department]
Address
Sir: **OR:** Madam:
Dear Mr. **OR:** Madam Minister:

d. American Ambassador

The Honorable [Full name]
American Ambassador
(**OR:** The Ambassador of the United States of America)
Foreign address of U.S. Embassy
Sir: **OR:** Madam:
Dear Mr. **OR:** Madam Ambassador:

1809

1808 Members of the Armed Services

The addresses of both officers and enlisted personnel in the armed services should include title or rank and full name followed by a comma and the initials USA, USN, USAF, USMC, or USCG. Below are some examples with appropriate salutations.

a. Army, Air Force, or Marine Corps Officer

Lieutenant General [Full name],
USA **OR:** USAF **OR:** USMC
Address

Dear General [Surname]:*

b. Navy or Coast Guard Officer

Rear Admiral [Full name], USN
OR: USCG
Address

Dear Admiral [Surname]:*

c. Enlisted Person

Sergeant [Full name], USA
Address

OR: Seaman [Full name], USN
Address

Dear Sergeant **OR:** Seaman [Surname]:

1809 Roman Catholic Dignitaries

a. Pope

His Holiness the Pope

OR: His Holiness Pope [Given name]
Vatican City
00187 Rome
ITALY

Your Holiness:
Most Holy Father:

*Use the salutation *Dear General [Surname]* whether the officer is a full general or only a lieutenant general, a major general, or a brigadier general. Similarly, use *Dear Colonel [Surname]* for either a full colonel or a lieutenant colonel and *Dear Lieutenant [Surname]* for a first or a second lieutenant. Use *Dear Admiral [Surname]* for a full admiral, a vice admiral, or a rear admiral.

b. Cardinal

His Eminence [Given name]
Cardinal [Surname]
Archbishop of [Place]
Address

Your Eminence:
Dear Cardinal [Surname]:

c. Archbishop or Bishop

Most Reverend [Full name]
Archbishop **OR:** Bishop of [Place]
Address

Your Excellency:

APPENDIX A.	Glossary of Grammatical Terms	666
APPENDIX B.	Pronunciation Problems	677

APPENDIX A

Glossary of Grammatical Terms

Active verb. See *Voice, active*.

Adjective. A word that answers the question *what kind* (*excellent* results), *how many* (*four* laptops), or *which one* (*the latest*) data. An adjective may be a single word (*a wealthy* man), a phrase (*a man of great wealth*), or a clause (*a man who possesses great wealth*). An adjective modifies the meaning of a noun (*loose* cannon) or a pronoun (*unlucky* me, *I was wrong*).

Adjective, predicate. See *Complement*.

Adverb. A word that answers the question *when*, *where*, *why*, *in what manner*, or *to what extent*. An adverb may be a single word (*speak clearly*), a phrase (*speak in a clear voice*), or a clause (*speak as clearly as you can*). An adverb modifies the meaning of a verb, an adjective, or another adverb. (See also *Clause, adverbial*.)

We closed the deal *quickly*. (Modifies the verb *closed*.)

Caroline seemed *genuinely* pleased. (Modifies the adjective *pleased*.)

My presentation went *surprisingly* well. (Modifies the adverb *well*.)

Adverbial conjunctive (or connective). An adverb that connects the main clauses of a compound sentence; for example, *however*, *therefore*, *nevertheless*, *hence*, *moreover*, *otherwise*, *consequently*. Also referred to as a *conjunctive adverb* or a *transitional expression*. (See also ¶¶138a, 178.)

Antecedent. A noun or a noun phrase to which a pronoun refers.

She is the *person who* wrote the letter. (*Person* is the antecedent of *who*.)

Owning a home has *its* advantages. (*Owning a home* is the antecedent of *its*.)

Appositive. A noun or a noun phrase that identifies another noun or pronoun that immediately precedes it. (See ¶¶148–150.)

Mr. Mancuso, *our chief financial officer*, would like to meet you.

My brother *Kyle* and his wife *Martha* are planning to move to Colorado.

Article. Considered an adjective. The *definite* article is *the*; the *indefinite* articles are *a* and *an*. (For a usage note on *a-an*, see pages 358–359.)

Auxiliary verb. See *Verb, helping*.

Case. The form of a noun or of a pronoun that indicates its relation to other words in the sentence. There are three cases: nominative, possessive, and objective. *Nouns* have the same form in the nominative and objective cases but a special ending for the possessive. (See ¶¶627–653.) The forms for *pronouns* are:

Nominative	Possessive	Objective
I	my, mine	me
you	your, yours	you
he, she, it	his, hers, its	him, her, it
we	our, ours	us
they	their, theirs	them
who	whose	whom

Nominative case. Used for the subject or the complement of a verb.

She publishes a newsletter. (Subject.)

The person who called you was *I*. (Complement.)

Possessive case. Used to show ownership and other relationships. (See ¶¶627–653, especially the examples in ¶627.)

My statistical analysis is in this report. The suggestions in the appendix are also *mine*.

Objective case. Used for (1) the object of a verb, (2) the object of a preposition, (3) the subject of an infinitive, (4) the object of an infinitive, and (5) the complement of the infinitive *to be*.

Can you help *us* this weekend? (Object of the verb *help*.)

Brenda has not written to *me*. (Object of the preposition *to*.)

I encouraged *her* to enter the biathlon. (Subject of the infinitive *to enter*.)

William promised to call *me* but he didn't. (Object of the infinitive *to call*.)

They believed *me* to be *her*. (Complement of the infinitive *to be*.)

Clause. A group of related words containing a subject and a predicate. An *independent clause* (also known as a *main clause* or *principal clause*) expresses a complete thought and can stand alone as a sentence. A *dependent clause* (also known as a *subordinate clause*) does not express a complete thought and cannot stand alone as a sentence.

I will go [*independent clause*] if *I* am invited [*dependent clause*].

Adjective clause. A dependent clause that modifies a noun or a pronoun in the main clause. Adjective clauses are joined to the main clause by relative pronouns (*which*, *that*, *who*, *whose*, *whom*).

Their bill, *which includes servicing*, seems reasonable. (Modifies *bill*.)

Adverbial clause. A dependent clause that functions as an adverb in its relation to the main clause. Adverbial clauses indicate time, place, manner, cause, purpose, condition, result, reason, or contrast.

These orders can be filled *as soon as stock is received*. (Time.)

I was advised to live *where the climate is dry*. (Place.)

She worked *as though her life depended on it*. (Manner.)

Please write me at once *if you have any suggestions*. (Condition.)

Because our plant is closed in August, we cannot fill your order now. (Reason.)

Coordinate clauses. Clauses of the same rank—*independent* or *dependent*.

Carl will oversee the day-to-day operations, and *Sheila will be responsible for the finances*. (Coordinate independent clauses.)

When you have read the user's manual and *you have mastered all the basic operations*, try to deal with these special applications. (Coordinate dependent clauses.)

Elliptical clause. A clause from which key words have been omitted. (See ¶¶101b–c, 111, 119a, 130b, and 1082d.)

Now, for the next topic.

Really?

If possible, arrive at one.

Essential (restrictive) clause. A dependent clause that cannot be omitted without changing the meaning of the main (independent) clause. Essential clauses are *not* set off by commas.

The magazine *that came yesterday* contains an evaluation of new software.

A

Nonessential (nonrestrictive) clause. A dependent clause that adds descriptive information but could be omitted without changing the meaning of the main (independent) clause. Such clauses are separated or set off from the main clause by commas.

She has had a lot of success with her latest book, *which deals with corporate finance*.

Her latest book, *which deals with corporate financial analysis*, has sold quite well.

Noun clause. A dependent clause that functions as a noun in the main clause.

Whether the proposal will be accepted remains to be seen. (Noun clause as subject.)

They thought *that the plan was a failure*. (Noun clause as object.)

Then he said, *"Who gave you that information?"* (Noun clause as object.)

Comparison. The form of an adjective or adverb that indicates degrees in quality, quantity, or manner. The degrees are positive, comparative, and superlative. (See ¶1071.)

Positive. The simple form; for example, *new, efficient* (adjectives); *soon, quietly* (adverbs).

Comparative. Indicates a higher or lower degree of quality or manner than is expressed by the positive degree. The comparative is used when two things are compared and is regularly formed by adding *er* to the positive degree (*newer, sooner*). In longer words the comparative is formed by adding *more* or *less* to the positive (*more efficient, less efficient; more quietly, less quietly*).

Superlative. Denotes the highest or lowest degree of quality or manner. The superlative is used when more than two things are compared and is regularly formed by adding *est* to the positive degree (*newest, soonest*). In longer words the superlative is formed by adding *most* or *least* to the positive (*most efficient, least efficient; most quietly, least quietly*).

Complement. A word or phrase that completes the sense of the verb. It may be an object, a predicate noun, a predicate pronoun, or a predicate adjective.

Object. Follows a transitive verb. (See *Verb*.)

I have already drafted the *contract*.

Predicate noun or pronoun. Follows a linking verb (such as *is, are, was, were, will be, has been, could be*). It explains the subject and is identical with it. (Also called a *predicate complement, subject complement*, and *predicate nominative*.)

Miss Kwong is our new *accountant*. (*Accountant* refers to *Miss Kwong*.)

The person responsible for the decision was *I*. (*The pronoun I* refers to *person*.)

Predicate adjective. Completes the sense of a linking verb. (Also called a *predicate complement*.)

These charges are *excessive*. (*The adjective excessive* refers to *charges*.)

NOTE: In this manual, the term *complement* is used to refer only to a predicate noun, pronoun, or adjective following a linking verb. The term *object* is used to denote the complement of a transitive verb.

Compound adjective. A phrase or clause that qualifies, limits, or restricts the meaning of a word. Also referred to as a *compound modifier*. (See also ¶¶813–832.)

Conjunction. A word or phrase that connects words, phrases, or clauses.

Coordinating conjunction. Connects words, phrases, or clauses of equal rank. The coordinating conjunctions are *and, but, or, and nor*.

Correlative conjunction. Consists of two elements that are used in pairs; for example, *both . . . and, not only . . . but (also), either . . . or, neither . . . nor*.

Subordinating conjunction. Used to join a dependent clause to a main (independent) clause; for example, *when, where, after, before, if*. (See ¶132.)

Conjunctive adverb. See *Adverbial conjunctive*.

Connective. A word that joins words, phrases, or clauses. The chief types of connectives are conjunctions, adverbial conjunctives, prepositions, and relative pronouns.

Consonants. The letters *b, c, d, f, g, h, j, k, l, m, n, p, q, r, s, t, v, w, x, y, z*. The letters *w* and *y* sometimes serve as vowels (as in *saw* and *rhyme*). (See also *Vowels*.)

Contraction. A shortened form of a word or phrase in which an apostrophe indicates the omitted letters or words; for example, *don't* for *do not*. (See ¶505b–e.)

Dangling modifier. A modifier that is attached either to no word in a sentence or to the wrong word. (See *Modifier* and ¶¶1082–1087.)

Direct address. A construction in which a speaker or a writer addresses another person directly; for example, “What do you think, Sylvia?”

Elliptical expressions. Condensed expressions from which key words have been omitted; for example, *if necessary* (for *if it is necessary*). (See ¶¶101b–c, 111, 119a; see also *Clause*; *Sentence*.)

Essential elements. Words, phrases, or clauses needed to complete the structure or meaning of a sentence. (See also *Clause*; *Phrase*.)

Gender. The characteristic of nouns and pronouns that indicates whether the thing named is *masculine* (*man, boy, he*), *feminine* (*woman, girl, she*), or *neuter* (*book, concept, it*). Nouns that refer to either males or females have *common gender* (*person, child*).

Gerund. A verb form ending in *ing* and used as a *noun*.

Selling requires special skills. (Subject.)

I enjoy *selling*. (Direct object of *enjoy*.)

She is experienced in *selling*. (Object of preposition *in*.)

Dangling gerund. A prepositional-gerund phrase that is attached either to no word in a sentence or to the wrong word. (See ¶1082c.)

Imperative. See *Mood*.

Indicative. See *Mood*.

Infinitive. The form of the verb usually introduced by *to* (see ¶¶1044–1046). An infinitive may be used as a noun, an adjective, or an adverb. (See *Phrase*.)

NOUN: *To find affordable housing these days* is not easy. (Subject.)

She is trying *to do a hatchet job on my proposal*. (Object.)

ADJECTIVE: I still have two more contracts *to draft*. (Modifies *contracts*.)

ADVERB: He resigned *to take another position*. (Modifies *resigned*.)

Interjection. A word that shows emotion; usually without grammatical connection to other parts of a sentence.

Wow! What a weekend! *Oh,* so that's what he meant.

Modifier. A word, phrase, or clause that qualifies, limits, or restricts the meaning of a word. (See *Adjective*; *Adverb*; *Compound adjective*; *Dangling modifier*; *Squinting modifier*.)

Mood (mode). The form of the verb that shows the manner of the action. There are three moods: indicative, imperative, and subjunctive.

Indicative. States a fact or asks a question.

Our lease has expired. When does our lease expire?

Imperative. Expresses a command or makes a request.

Call me next week. Please send me your latest catalog.

Subjunctive. Used in dependent clauses following main (independent) clauses expressing necessity, demand, or wishing (see ¶¶1038–1039); also used in *if*, *as if*, and *as though* clauses that state conditions which are improbable, doubtful, or contrary to fact (see ¶¶1040–1043).

I demand that we *be* heard. It is imperative that he *be* notified.

We urge that she *be* elected. If he *were* appointed, I would quit.

I wish I *were* going. If she *had* known, she would have written.

Nominative case. See *Case, nominative*.

Nonessential elements. Words, phrases, or clauses that are not needed to complete the structure or meaning of a sentence. (See also *Clause; Phrase*.)

Noun. The name of a person, place, object, idea, quality, or activity.

Abstract noun. The name of a quality or a general idea; for example, *courage, freedom*.

Collective noun. A noun that represents a group of persons, animals, or things; for example, *audience, company, flock*. (See ¶1019.)

Common noun. The name of a class of persons, places, or things; for example, *child, house*. (See ¶¶307–310.)

Predicate noun. See *Complement*.

Proper noun. The official name of a particular person, place, or thing; for example, *Ellen, San Diego, Wednesday*. Proper nouns are capitalized. (See ¶¶303–306.)

Number. The characteristic of a noun, pronoun, or verb that indicates whether one person or thing (singular) or more than one (plural) is meant.

NOUN: beeper, beepers

PRONOUN: she, they

VERB: (she) works, (they) work

Object. The person or thing that receives the action of a transitive verb. An object may be a word, a phrase, or a clause. (See *Case, objective*.)

I need a new laptop *computer*. (Word.)

She prefers *to work with hard copy*. (Infinitive phrase.)

We did not realize *that your deadline was so tight*. (Clause.)

Direct object. The person or thing that is directly affected by the action of the verb. (The object in each of the three sentences above is a *direct object*.)

Indirect object. The person or thing indirectly affected by the action of the verb. The indirect object can be made the object of the preposition *to* or *for*.

Molly gave (to) *me* a hard time about my sales performance this quarter.

Ordinal number. The form of a number that indicates order or succession; for example, *first, second, twelfth* or *1st, 2d, 12th*. (See ¶¶424–426.)

Parenthetical elements. Words, phrases, or clauses that are not necessary to complete the structure or the meaning of a sentence.

Gina Sala, *my wife's older sister*, is my accountant.

Participle. A word that may stand alone as an adjective or may be combined with helping (auxiliary) verbs to form different tenses (see ¶¶1033–1034). There are three forms: present, past, and perfect.

Present participle. Ends in *ing*; for example, *making, advertising*.

Past participle. Regularly ends in *ed* (as in *asked* or *filed*) but may be irregularly formed (as in *lost, seen*, and *written*). (See ¶1030a–b.)

Perfect participle. Consists of *having* plus the past participle; for example, *having asked, having lost*. When a participle functions as an *adjective*, it modifies a noun or a pronoun.

The *coming* year poses some new challenges. (Modifies *year*.)

Having retired last year, I now do volunteer work. (Modifies *I*.)

Because a participle has many of the characteristics of a verb, it may take an object and be modified by an adverb. The participle and its object and modifiers make up a *participial phrase*.

Seizing the opportunity, Orzo offered to buy the business. (*Opportunity* is the object of *seizing*.)

Moving aggressively, we can control the market. (*Aggressively* modifies *moving*.)

Dangling participle. A participial phrase attached either to no word in a sentence or to the wrong word. (See *Phrase* and ¶1082a.)

Parts of speech. The eight classes into which words are grouped according to their uses in a sentence: verb, noun, pronoun, adjective, adverb, conjunction, preposition, and interjection.

Time flies like an arrow. (In this case, *time* is a noun, *flies* is a verb, and *like* is a preposition.)

Fruit flies like a banana. (In this case, *flies* is part of a compound noun, *fruit flies*; *like* is a verb.)

Passive verb. See *Voice, passive*.

Person. The characteristic of a word that indicates whether a person is speaking (*first person*), is spoken to (*second person*), or is spoken about (*third person*). Only personal pronouns and verbs change their forms to show person. All nouns are considered third person.

	Singular	Plural
FIRST PERSON:	<i>I</i> like this book.	<i>We</i> like this book.
SECOND PERSON:	<i>You</i> like this book.	<i>You</i> like this book.
THIRD PERSON:	<i>She</i> likes this book.	<i>They</i> like this book.

Phrase. A group of two or more words without a subject and a predicate; used as a noun, an adjective, or an adverb. (See *Predicate*.)

Noun phrase. A phrase that functions as a noun (such as a gerund phrase, an infinitive phrase, or a prepositional phrase).

I like running my own business. (Gerund phrase as object.)

To provide the best possible service is our goal. (Infinitive phrase as subject.)

Before 9 a.m. is the best time to call me. (Prepositional phrase as subject.)

Adjective phrase. A phrase that functions as an adjective (such as an infinitive phrase, a participial phrase, or a prepositional phrase).

The time *to act* is now! (Infinitive phrase indicating what kind of time.)

Adverbial phrase. A phrase that functions as an adverb (such as an infinitive phrase or a prepositional phrase).

Let's plan to meet *after lunch*. (Prepositional phrase indicating when to meet.)

Gerund phrase. A gerund plus its object and modifiers; used as a noun.

Delaying payments to your suppliers will prove costly. (Gerund phrase as subject.)

Infinitive phrase. An infinitive plus its object and modifiers; may be used as a noun, an adjective, or an adverb. An infinitive phrase that is attached either to no word in a sentence or to the wrong word is called a *dangling infinitive*. (See ¶1082b.)

To get TF's okay on this purchase order took some doing. (As a noun; serves as subject of the verb *took*.)

The decision *to close the Morrisville plant* was not made easily. (As an adjective; tells what kind of decision.)

Janice resigned *to open her own business*. (As an adverb; tells why Janice resigned.)

NOTE: An infinitive phrase, unlike other phrases, may sometimes have a subject. This subject precedes the infinitive and is in the objective case.

I want *her to review this draft for accuracy*. (*Her* is the subject of *to review*.)

Participial phrase. A participle and its object and modifiers; used as an adjective.

The committee *considering your proposal* should come to a decision this week.

I prefer the cover sample *printed in blue and yellow*.

Prepositional phrase. A preposition and its object and modifiers; may be used as a noun, an adjective, or an adverb.

From Boston to Tulsa is about 1550 miles. (As a noun; serves as subject of *is*.)

Profits *in the automobile industry* are up sharply this quarter. (As an adjective; indicates which type of profits.)

You handled Dr. Waterman's objections *with great skill*. (As an adverb; indicates the manner in which the objections were handled.)

Prepositional-gerund phrase. A phrase that begins with a preposition and has a gerund as the object. (See *Gerund* and ¶1082c.)

By rechecking these figures before you release them, you deal with any questions raised by higher management. (*By* is the preposition; *rechecking*, a gerund, is the object of *by*.)

Essential (restrictive) phrase. A phrase that limits, defines, or identifies; cannot be omitted without changing the meaning of the sentence.

The study *analyzing our competitors' promotion activities* will be finished within the next two weeks.

Nonessential (nonrestrictive) phrase. A phrase that can be omitted without changing the meaning of the sentence.

The Stanforth-Palmer Company, *one of the country's largest financial services organizations*, is expanding into satellite communications.

Verb phrase. The individual words that make up the verb in a sentence. Sometimes a verb phrase includes an adverb. A verb phrase can function only as a verb.

You should work together with Nora on the report. (The verb phrase consists of the verb form *should work* plus the adverb *together*.)

Positive degree. See *Comparison, positive*.

Possessive case. See *Case, possessive*.

Predicate. That part of a sentence which tells what the subject does or what is done to the subject or what state of being the subject is in. (See also *Verb*.)

Complete predicate. Consists of a verb and its complement along with any modifiers.

Barbara has handled the job well.

Simple predicate. The verb alone, without regard for any complement or modifiers that may accompany it.

Barbara has handled the job well.

Compound predicate. Two or more predicates joined by conjunctions.

Barbara has handled the job well and deserves a good deal of praise.

Predicate adjective. See *Complement*.

Predicate nominative. See *Complement*.

Prefix. A letter, syllable, or word added to the beginning of a word to change its meaning; for example, *afloat*, *reupholster*, *undernourished*. (See §§833–846.)

Preposition. A connective (such as *from*, *to*, *in*, *on*, *of*, *at*, *by*, *for*, *with*) that shows the relationship between a noun or pronoun and some other word in the sentence. The noun or pronoun following a preposition is in the objective case. (See §§1077–1080.)

Martin's work was reviewed by Hedley and me.

Principal parts. The forms of a verb from which all other forms are derived: the *present*, the *past*, the *past participle*, and the *present participle*. (See §§1030–1035.)

Pronoun. A word used in place of a noun. (See §§1049–1064.)

PERSONAL:	<i>I, you, he, she, it, we, they, etc.</i>
RELATIVE:	<i>who, whose, whom, which, that, and compounds such as whoever</i>
INTERROGATIVE:	<i>who, which, what, etc.</i>
COMPOUND PERSONAL:	<i>myself, yourself, himself, herself, ourselves, themselves, etc.</i>
DEMONSTRATIVE:	<i>this, that, these, those</i>
INDEFINITE:	<i>each, either, any, anyone, someone, everyone, few, all, etc.</i>

► For a chart showing the nominative, possessive, and objective cases for personal, relative, and interrogative pronouns, see page 331.

Punctuation. Marks used to indicate relationships between words, phrases, and clauses.

Terminal (end) punctuation. The period, the question mark, and the exclamation point—the three marks that may indicate the end of a sentence.

NOTE: When a sentence breaks off abruptly, a dash may be used to mark the end of the sentence (see §§207–208). When a sentence trails off without really ending, ellipsis marks (three spaced periods) are used to mark the end of the sentence (see §291a).

Internal punctuation. Commas, semicolons, colons, dashes, parentheses, quotation marks, apostrophes, ellipsis marks, asterisks, slashes, and brackets are the most common marks of internal punctuation.

Question.

Direct question. A question in its original form, as spoken or written.

He then asked me, "What is your opinion?"

Indirect question. A restatement of a question without the use of the exact words of the speaker.

He then asked me what my opinion was.

Independent question. A question that represents a complete sentence but is incorporated in a larger sentence.

The main question is, Who will translate this idea into a clear plan of action?

A**Quotation.**

Direct quotation. A quotation of words exactly as spoken or written.

I myself heard Ed say, “I will arrive in Santa Fe on Tuesday.”

Indirect quotation. A restatement of a quotation without the use of the exact words of the speaker.

I myself heard Ed say that he would arrive in Santa Fe on Tuesday.

Sentence. A group of words representing a complete thought and containing a subject and a predicate (a verb along with any complements and modifiers).

Simple sentence. A sentence consisting of one independent clause.

I have no recollection of the meeting.

Compound sentence. A sentence consisting of two or more independent clauses.

Our Boston office will be closed, and our Dallas office will be relocated.

Complex sentence. A sentence consisting of one independent clause (also called the *main clause*) and one or more dependent clauses.

We will make an exception to the policy if circumstances warrant.

Compound-complex sentence. A sentence consisting of two independent clauses and one or more dependent clauses.

I tried to handle the monthly report alone, but when I began to analyze the data, I realized that I needed your help.

Elliptical sentence. A word or phrase that forms a complete sentence because the subject and the verb are understood, though one or both may be unstated. (See ¶¶101b–c, 111, 119a.)

Been there. Done that. Enough on that subject. Why not?

Declarative sentence. A sentence that makes a statement.

Our company is continually testing cutting-edge technologies.

Interrogative sentence. A sentence that asks a question.

When will the conference begin?

Exclamatory sentence. A sentence that expresses strong feeling.

Don’t even think of smoking here!

Imperative sentence. A sentence that expresses a command or a request. (The subject *you* is understood if it is not expressed.)

Send a check at once. Please let us hear from you.

Sentence fragment. A phrase or clause that is incorrectly treated as a sentence. (See ¶101c.)

Squinting modifier. A modifier placed in such a way that it can be interpreted as modifying either what precedes or what follows. (See ¶1087.)

Statement. A sentence that asserts a fact. (See also *Sentence*.)

Subject. A word, phrase, or clause that names the person, place, or thing about which something is said. (See *Case, nominative*.)

The law firm with the best reputation in town is Barringer and Doyle.

Whoever applies for the job from within the department will get special consideration.

Compound subject. Two or more subjects joined by a conjunction.

My wife and my three sons are off on a white-water rafting trip.

Subjunctive. See *Mood*.

Suffix. A letter, syllable, or word added to the end of a word to modify its meaning; for example, *trendy*, *friendly*, *countless*, *receivership*, *lonesome*. (See ¶833a.)

Superlative degree. See *Comparison, superlative*.

Syllable. One or more letters that represent one sound. (See ¶¶901–904.)

Tense. The property of a verb that expresses *time*. (See ¶¶1031–1035.) The three *primary* tenses correspond to the three time divisions:

PRESENT:	they <i>think</i>
PAST:	they <i>thought</i>
FUTURE:	they <i>will think</i>

There are three *perfect* tenses, corresponding to the primary tenses:

PRESENT PERFECT:	they <i>have thought</i>
PAST PERFECT:	they <i>had thought</i>
FUTURE PERFECT:	they <i>will have thought</i>

There are six *progressive* tenses, corresponding to each of the primary and perfect tenses:

PRESENT PROGRESSIVE:	they <i>are thinking</i>
PAST PROGRESSIVE:	they <i>were thinking</i>
FUTURE PROGRESSIVE:	they <i>will be thinking</i>
PRESENT PERFECT PROGRESSIVE:	they <i>have been thinking</i>
PAST PERFECT PROGRESSIVE:	they <i>had been thinking</i>
FUTURE PERFECT PROGRESSIVE:	they <i>will have been thinking</i>

There are two *emphatic* tenses:

PRESENT EMPHATIC:	they <i>do think</i>
PAST EMPHATIC:	they <i>did think</i>

► For an illustration of how these tenses are formed, see pages 316–317.

Transitional expressions. Expressions that link independent clauses or sentences; for example, *as a result, therefore, on the other hand, nevertheless*. (See also ¶138a; *Adverbial conjunctive*.)

A

Verb. A word or phrase used to express action or state of being. (See also *Mood*.)

Enniston *has boosted* its sales goals for the year. (Action.)

My son-in-law *was* originally a lawyer, but he *has now become* a computer-game designer. (State of being.)

Helping (auxiliary) verb. A verb that helps in the formation of another verb. (See ¶¶1030c, 1033–1034.) The chief helping verbs are *be, can, could, do, have, may, might, must, ought, shall, should, will, would*.

Transitive verb. A verb that requires an object to complete its meaning.

Fusilli *has rejected* all offers to purchase his business.

Intransitive verb. A verb that does not require an object to complete its meaning.

As market growth *occurs* and customer interest *builds*, our sales expectations *are rising* and top management's excitement *has increased*.

Linking verb. A verb that connects a subject with a predicate adjective, noun, or pronoun. The various forms of *to be* are the most commonly used linking verbs. *Become, look, seem, appear, and grow* are also used as linking verbs. (See *Complement* and ¶1067.)

Laura *seemed* willing to compromise, but Frank *became* obstinate in his demands.

Was he afraid that any concession might make him *appear* a fool?

Principal parts of verbs. See *Principal parts*.

Verbal. A word that is derived from a verb but functions in some other way. (See *Gerund; Infinitive; Participle*.)

Voice. The property of a verb that indicates whether the subject acts or is acted upon.

Active voice. A verb is in the active voice when its subject is the doer of the act. (See ¶1037.)

About a dozen people *reviewed* the report in draft form.

Passive voice. A verb is in the passive voice when its subject is acted upon. (See ¶¶1036–1037.)

The report *was reviewed* in draft form by about a dozen people.

Vowels. The letters *a, e, i, o*, and *u*. The letters *w* and *y* sometimes act like vowels (as in *awl* or in *cry*). (See also *Consonants*.)

APPENDIX B

Pronunciation Problems

The following list of terms and letter groups represents common pronunciation problems that plague even highly educated people. A good part of the difficulty arises from the fact that the way a word is pronounced may have little relationship to the way it is spelled. (See, for example, the entry for *Natchitoches*.) Or the accent may fall on a syllable where you would not expect it to. (See the entry for *Willamette*.) Further complicating the problem is the existence of regional variations in pronunciation. (See the entries for *Louisville* and *New Orleans*.)

There is no national standard for pronunciation in the United States. Perhaps the nearest thing we have is the pronunciation used by the anchors of the evening news programs on the major TV networks. Thus it is not surprising that many dictionary entries show more than one way to pronounce a given word. In such cases, the first pronunciation shown is considered the preferred pronunciation, that is, the one most commonly heard or the one least likely to cause raised eyebrows. The entries in this appendix ordinarily show only the preferred pronunciation. A few entries will show two pronunciations when they appear to be equally in use.

The judgments reflected in the following entries may strike some readers as wrongheaded or totally at odds with local standards of pronunciation. If you feel confident about pronouncing a word differently from the way it is shown here, go right ahead and say it your way. When you feel less than confident, however, the following guidelines may be of some help.

A priori. Pronounce the *a* as in *hah* or in *hay*. Say *ah-pree-AW-ree* or *ay-pree-AW-ree*.

Abdomen. Put the accent on the first syllable. Say *AB-duh-mun* (**NOT:** *ab-DOE-mun*).

Accelerate. Pronounce the first two letters as *ack* (**NOT:** *as*). Say *ack-SELL-uh-rate*.

Accessory. Say *ack-SESS-uh-ree* (**NOT:** *ass-SESS-uh-ree*).

Acclimate. Say *ACK-lih-mate*.

Accurate. Say *ACK-yuhr-it* (**NOT:** *ACK-er-it*).

Across. Say *uh-KRAWSS* (**NOT:** *uh-KRAWST*).

Acumen. Say *uh-KYOO-men*.

Ad hoc. Say *ADD-HOCK*.

Adieu. Say *uh-DYOO* (**NOT:** *uh-DOO*).

Aegis. Say *EEE-jis*.

Affluent, affluence. Put the accent on the first syllable, not the second. Say *AF-floo-ent* and *AF-floo-enss* (**NOT:** *af-FLOO-ent* and *af-FLOO-enss*).

aid. Most words ending in *aid* rhyme with *played*—for example, *afraid*, *laid maid*, *paid*, and *raided*. However, two words do not fit this pattern: *plaid* rhymes with *mad*, and *said* rhymes with *red*.

Albeit. Pronounce this word as three syllables. Say *awl-BEE-it*.

Alleged. Say *uh-LEJD* (**NOT:** *uh-LEJ-ed*).

Alumnus, alumna. The male singular form *alumnus* is pronounced *uh-LUM-nus*. The female singular form *alumna* is pronounced *uh-LUM-nuh*. The male plural form *alumni* is pronounced *uh-LUM-neye*. The female plural form *alumnae* is pronounced *uh-LUM-nee*.

Amenable. Say *uh-MEE-nuh-bul*.

Amicable. Say *AM-ick-uh-bul* (**NOT:** *uh-MICK-uh-bul*).

Amphitheater. Say *AM-pfuh-THEA-tur*.

Analogy, analogous. The noun *analogy* is pronounced *uh-NAL-luh-jee*. The adjective *analogous* is pronounced *uh-NAL-luh-gus*.

Angina. Medical professionals typically pronounce this word as *ANN-jinn-uh*. Others typically say *an-JYE-nuh*.

Apartheid. Say *uh-PAR-tite*.

Appalachian. Say *ap-puh-LAY-chee-en*. Pronounce the first syllable *ap* as in *apple*.

Applicable. Pronounce the first *a* in *applicable* as in *apple*. Say *A-plih-kuh-bul* (**NOT:** *uh-PLIH-kuh-bul*).

Apricot. Pronounce the *a* as in *apt* (**NOT:** as in *ape*). Say *A-prih-kot*.

arch. When *arch* is used as a suffix (meaning “leader”), *arch* is pronounced *ARK* in words such as *matriarch*, *monarch*, *oligarch*, and *patriarch*. When *arch* is used as a prefix (meaning “ancient” or “old”), *arch* is also pronounced *ARK* in words such as *architecture*, *archive*, *archaic*, *archaeology*, and *archipelago*. However, when the prefix *arch* stands for “chief” or “principle,” *arch* is pronounced as in *starch* in words such as *archbishop*, *archdiocese*, and *archdeacon*. There is one exception to this final guideline: although *archangel* refers to a “chief angel,” it is illogically pronounced *ARK-ain-juhl* (**NOT:** *ARCH-ain-juhl*).

Arctic, Antarctic. Do not overlook the *c* in these words. Say *ARK-tick* and *ant-ARK-tick* (**NOT:** *AR-tick* and *ant-AR-tick*).

Arkansas, Kansas. There’s no sound of *Kansas* in *Arkansas*. *Kansas* is pronounced *KAN-zus*. *Arkansas* is pronounced *ARR-kin-saw*. However, when talking about the residents of these two states—Kansans and Arkansans—say *KAN-zuhnz* and *arr-KAN-zuhnz*.

Assuage. Say *uh-SWAYJ*.

Asterisk. Pronounce the last syllable exactly as it is spelled—*risk* (**NOT:** *rick* or *rix*).

Athlete. This is a two-syllable word. Say *ATH-leet* (**NOT:** *ATH-uh-leet*).

augh. The letters *augh* are usually pronounced as *AW*: *aught*, *caught*, *daughter*, *distraught*, *fraught*, *haughty*, *naughty*, *onslaught*, *slaughter*, *taught*. There is one notable exception: *augh* is pronounced as *AFF* in *laughter*. Note the difference in the pronunciation of *manslaughter* (*MAN-slaw-ter*) and *man's laughter* (*MANZ-LAFF-ter*).

Aunt. Whether you say *ANT* (as in *can't*) or *ONT* (as in *font*) will depend on where you grew up. Either pronunciation is acceptable.

Awry. Say *uh-RYE* (**NOT:** *AW-ree*).

Bass. Rhyme this word with *class* when it refers to fish. Rhyme it with *case* in all its other meanings.

Beau, beautiful. *Beau* is pronounced *BOH* (to rhyme with *grow*). *Beautiful* is pronounced *BYOO-ti-ful*.

Because. Say *bih-KAWZ* (**NOT:** *bee-KUHZ* or *bee-KAWSS*).

Beijing. Say *bay-JEENG* (**NOT:** *bay-ZHEENG*).

Beirut. Say *bay-ROOT* (**NOT:** *by-ROOT*).

Beloit. This city in Wisconsin is pronounced *buh-LOYT*.

Berlin. The city in Germany is pronounced *buhr-LINN*. The cities in New Hampshire and Wisconsin are pronounced *BUHR-linn*.

Binghamton. See *-ham*.

Birmingham. See *-ham*.

Boatswain. This word is not pronounced the way it is spelled. Say *BOW-zun*.

Boise. Residents of Idaho say *BOY-see*. Others usually say *BOY-zee*.

Bon mot. Say *bohn-MOH*.

Bona fide, bona fides. The singular form is pronounced *BOH-nuh-FIDE*. The plural form may be pronounced *BOH-nuh-FIDES*, but it is more commonly pronounced *BOH-nuh-FIE-deez*.

Boutique. Say *boo-TEEK* (**NOT:** *boh-TEEK*).

Bow. Rhyme *bow* with *how* when it refers to the front part of a ship or the act of bending or yielding. Rhyme *bow* with *hoe* in all its other meanings.

Bowdoin. This college in Maine is pronounced *BOE-dun*.

Breech, breeches. The singular form, *breach*, is pronounced exactly as it is spelled—*BREECH*. The plural form, *breeches* (referring to a pair of pants), is pronounced *BRIH-chiz*.

Buffet. When referring to a sideboard or table covered with food, say *buh-FAY* (**NOT:** *boo-FAY*). When using the word in all its other meanings, say *BUH-feht*.

Bungee. When referring to a bungee cord or bungee jumping, say *BUHN-jee*.

Buoy, buoyant. When *buoy* stands alone, pronounce it as two syllables: say *BOO-ee*. However, when *buoy* appears in *buoyant*, say *BOY-ent*.

Butte. This city in Montana is pronounced like *beaut* in *beautiful*.

Cabal. Say *kuh-BAHL*.

Cachet. Say *cash-SHAY*.

Cairo. The city in Egypt is pronounced *KYE-roe*. The city in Illinois is pronounced *KAY-roe*.

Calais. In France this city is pronounced *kal-LAY*. In Maine it is pronounced *KAL-lus*. The *cal* in Calais rhymes with *pal*.

Caribbean. There is no clear preference for *kuh-RIB-bee-yan* over *kar-rib-BEE-yan*, so take your pick.

Carmel. In California this city is pronounced *car-MEL*. In Indiana it's pronounced *CAR-mel*.

Caste. Rhyme *caste* with *past* (**NOT:** with *paste*).

Caveat. Say *cah-vee-AHT*.

Cay, Cayman. The word *cay* is pronounced *KEY* and has the same meaning as *key* (an island or reef). However, *cay* is pronounced *KAY* when referring to the Cayman Islands.

Celtic. When referring to the people or their language, say *KELL-tick*. When referring to a Boston basketball player, say *SELL-tick*.

Chaise longue. This French term for a *long* reclining chair is pronounced *shayz LAWNG* (**NOT:** *shayz LOWN*).

Chamois. This French term for a type of leather or fabric has a distinctly un-French pronunciation in the United States. Say *SHAM-mee* (**NOT:** *sham-WAH*).

Chaos. Say *KAY-ahss* (**NOT:** *CHAY-ahss*).

Chassis. This word has the same spelling in the singular and the plural but not the same pronunciation. Say *CHASS-see* for the singular and *CHASS-seez* for the plural.

Cheyenne. This city in Wyoming is pronounced *shy-ENN*.

Chic. Say *SHEEK* (**NOT:** *CHICK*).

Chimera. Say *kye-MEER-uh*.

Clandestine. Say *clan-DES-tin*.

Clapboard. This term for a type of house siding is pronounced *KLAB-bird* and not as the spelling might suggest.

Clique. Say *KLEEK* (**NOT:** *KLICK*).

Coeur d'Alene. This city in Idaho is pronounced *CORE-duh-LANE*.

Comparable. Pronounce this word as three syllables. Say *COM-pruh-bul* (**NOT:** *com-PAIR-uh-bul*).

Comptroller. Pronounce *comp* as *con*. Say *con-TROH-ler*.

Conch. Say *KONK* (**NOT:** *KONCH*).

Connecticut. Ignore the *c* in the second syllable (*nect*). Say *kuh-NET-ih-kut*.

Consummate. When used as a verb, *consummate* is pronounced *KON-suh-MAYT*. When used as an adjective, this word is pronounced *KON-suh-muht*.

Copenhagen. Say *KOE-pen-HAY-gun* (**NOT:** *KOE-pen-HOG-gun*).

Corps. When this word is singular (as in *the Marine Corps*), both the *p* and the *s* are silent. Say *KAWR*. When this word is plural, say *KAWRZ*.

Coup de grâce. This French phrase (which means “a deathblow” or “a decisive act”) is pronounced *koo-duh-GRAHS*.

Coup d'état. This French phrase (which refers to the violent overthrow of a government) is pronounced *koo-day-TAH*.

Coupon. Say *KOO-pon* (**NOT:** *KYOO-pon*).

Coxswain. This word is not pronounced the way it is spelled. Say *COCK-sun*.

Crescendo. Say *cruh-SHEN-doh*.

Croat. Pronounce this word as two syllables. Say *KROH-aht*.

Croatian. Treat this word as three syllables, and pronounce the first *a* as in *day*. Say *kroh-AY-shun*.

Cuisine. Say *kuh-ZEEN*.

Culinary. Say *KUH-lih-ner-ree* (**NOT:** *KYOO-lih-ner-ree*).

Cupola. The final letter in this word is *a* (**NOT:** *o*). Say *KYOO-puh-luh* (**NOT:** *KYOO-puh-loe*).

Curaçao. This island in the Caribbean is pronounced *kyoo-rah-SOE*.

Curriculum vitae. This Latin expression (referring to a brief account of one’s qualifications for a job) is pronounced *kuh-RIH-kyew-lum VEE-tie*. The abbreviation *C.V.* is pronounced as an initialism: *CEE-VEE*.

Dais. People sit or stand on the *DAY-iss* (**NOT:** the *DYE-iss*).

Data. Pronounce the *da* in *data* as in *day* (**NOT:** as in *dash*). Say *DAY-tuh*.

Debut. Say *day-BYOO*.

Décor. Say *day-KAWR*.

Defendant. Say *dif-FEN-dunt* (**NOT:** *dih-FEN-DANT*).

Déjà vu. Say *day-zhah-VOO* (**NOT:** *day-zhah-VYOO*).

Des Moines. This city in Iowa is pronounced *dih-MOIN*. (The *s* is silent in both parts of the name.)

Des Plaines. This city in Illinois is pronounced *dess-PLAINZ*. (Here the *s* is sounded in both parts of the name, but it is sounded differently in each case.)

Detroit. Say *dih-TROYT* (**NOT:** *DEE-troyt*).

Dishevel. The *dis* in *dishevel* is not pronounced like the *dis* in *dishearten* or *dishonor*. Say *dih-SHEV-uhl*.

Dissociate. Say *dis-SOH-see-ate* (**NOT:** *dis-uh-SOH-see-ate*).

Divisive. Say *dih-VIE-siv* (**NOT:** *dih-VIH-siv*).

Doctoral. Say *DOCK-tuh-rul* (**NOT:** *dock-TAW-rul*).

Dour. Say *DEWR* (**NOT:** *DOWR*).

B

Draw, drawer. Do not add an *r* sound at the end of *draw*. By the same token, do not omit the *r* sound at the end of *drawer*.

Dubuque. This city in Iowa is pronounced *duh-BYOOK*.

Duquesne. This city and university in Pennsylvania are both pronounced *doo-KANE*.

Durham. See *-ham*.

eak. Words ending in *eak* typically rhyme with *meek*—for example, *beak, bleak, creak, freak, leak, peak, speak, squeak, streak, teak, tweak, weak*, and *wreak*. Only two words—*break* and *steak*—rhyme with *make*.

eard. In *beard* this group of letters rhymes with *weird*; say *BEERD*. In *heard* this group of letters rhymes with *bird*; say *HERD*.

Early. Only *pearly* rhymes with *early*. Other words ending in *early*—*clearly, dearly, nearly, and yearly*—rhyme with *merely*.

Eau Claire. This city in Wisconsin is pronounced *oh-CLAIR*.

Edinburgh. This city in Scotland is pronounced *EH-din-BURR-uh* (**NOT:** *EH-din-BURG*).

Egregious. Say *eh-GREE-jis*.

Either, neither. These two words are more commonly pronounced *EE-thur* and *NEE-thur*, but *EYE-thur* and *NYE-thur* are also acceptable.

El Cajon. This city in California is pronounced *ell-kuh-HONE*.

Electoral. Say *eh-LEK-tuh-rul* (**NOT:** *ee-lek-TOR-ul*).

Envelope. Say *EN-vuh-lope* (**NOT:** *AHN-vuh-lope*).

Environment. Don't overlook the second *n* in this word. Say *en-VIE-urn-ment* (**NOT:** *en-VIE-ur-ment*).

Err. Pronounce *err* as in *berry*.

Espresso. There is no *x* in *espresso*. Say *ess-PRESS-oh* (**NOT:** *ex-PRESS-oh*).

Et cetera. There is also no *x* in this phrase. Say *ett-SETter-uh* (**NOT:** *ex-SETter-uh*).

Ethos. Say *EE-thahs*.

Expertise. Say *ek-sper-TEEZ*.

Exquisite. Put the accent on the second syllable. Say *ex-SKWIZ-zit*.

Extraordinary. Say *ex-STRAW-dih-ner-ree* (**NOT:** *EX-truh-AWR-dih-ner-ree*).

Fait accompli. Say *FAY-tuh-kahm-PLLEE*.

February. Do not ignore the first *r* in *February*. Say *FEB-roo-err-ree* (**NOT:** *FEB-yoo-err-ree*).

Figure. Say *FIG-yer* (**NOT:** *FIG-ger*).

Filet, fillet. *Filet* (referring to a boneless piece of meat or fish, as in *filet mignon*) is pronounced *fih-LAY*. *Fillet* (referring to a narrow strip of material) is pronounced *FIH-luht*, but it may also be pronounced *fih-LAY* if used as a synonym for *filet*.

Forbade. The *bade* in *forbade* (the past tense of *forbid*) should rhyme with *glad* (**NOT:** *glade*). Say *fur-BAD*.

Formidable. Put the accent on the first syllable. Say *FOR-muh-duh-bul* (**NOT:** *for-MID-duh-bul*).

Forte. When *forte* means “strong point” (as in *Tact is not his forte*), pronounce it as one syllable—*FORT*. When *forte* means “loud” (as in a musical direction), pronounce it as two syllables—*FOR-tay*.

Framingham. See *-ham*.

Fraternize. Note that the second syllable is spelled *ter* (**NOT:** *tra*). Say *FRAT-ter-nize* (**NOT:** *FRAT-tra-nize*).

Gala. Say *GAY-luh* (**NOT:** *GAL-luh*).

Gauge. The *gau* in *gauge* is pronounced *gay* (**NOT:** *gaw* as in *gauze*). Say *GAYJ*.

Genuine. Say *JEN-yuh-win* (**NOT:** *JEN-yoo-wine*).

Gloucester. This city in Massachusetts is pronounced *GLOSS-ter*.

Gorham. See *-ham*.

Government. Don’t overlook the *n* in *vern*. Say *GUH-vern-ment* (**NOT:** *GUH-ver-ment* or *GUH-vuh-mint*).

Greenwich. This name, whether it refers to the town in Connecticut or the borough in England or the village in Manhattan, is pronounced *GREN-nitch*. However, East Greenwich, a town in Rhode Island, is pronounced *eest-GREEN-witch*.

Grenada. This island in the Caribbean is pronounced *gruh-NAY-duh*. Do not confuse Grenada with Granada, which is the name of a city and province in Spain. Granada is spelled differently and pronounced differently (*gruh-NAH-duh*).

Grievous. Do not make this a three-syllable word. Say *GREE-vus* (**NOT:** *GREE-vee-yus*).

Grimace. Say *GRIM-miss*.

Groton. This name, whether it refers to the town in Connecticut or the private school in Massachusetts, is pronounced *GROTT-uhn*.

Grovel. Say *GRAH-vuhl* (**NOT:** *GRUH-vuhl*).

Gunwale. This word is not pronounced the way it is spelled. Say *GUN-nel*.

-ham. The suffix *-ham* is usually pronounced *um* in short place names such as *Chatham*, *Dedham*, *Durham*, *Gorham*, *Hingham*, *Mendham*, and *Wareham*. In longer place names, such as *Birmingham* and *Framingham*, *ham* is fully sounded. When *ham* appears within a long place name, such as *Binghamton*, it is typically pronounced *um*.

Harass, harassment. Some authorities say that putting the accent on the second syllable—*huh-RASS*, *huh-RASS-ment*—is more common among U.S. speakers; others say that the practice of putting the accent on the first syllable is equally common—*HA-russ*, *HA-russ-ment* (where the *ha* is pronounced as in *hat*). In short, either set of pronunciations is acceptable.

Hasten. Ignore the *t*. Say *HAY-sen*.

Have. Depending on where this word appears in a sentence, it sometimes ends with a *v* sound and sometimes with an *f* sound. For example, “We *HAV* a serious challenge that we *HAFF* to deal with.”

Haverhill. This town in Massachusetts is pronounced *HAY-vuh-ruhl*.

Hawaii. Say *huh-WYE-yee* (**NOT:** *huh-VYE-yee*).

Hegemony. Say *hih-JEH-muh-nee*.

Height. Although there is an *h* at the end of *width*, there is no *h* at the end of *height*, so pronounce this word *HITE* (to rhyme with *kite*) and not as *highth*.

Heinous. Say *HAY-nus*.

Helena. The capital of Montana is pronounced with the accent on the first syllable—*HEH-leh-nuh*.

Herb. The *h* is silent. Say *ERB*.

Heterogeneous. Say *heh-tuh-ruh-JEE-nyuhs*.

Hiatus. Say *high-ATE-us*.

Hilo. This city in Hawaii is pronounced *HEE-low*.

Hingham. See *-ham*.

Hiroshima. Both *HEER-uh-SHEE-muh* and *hih-ROE-shih-muh* are commonly used by U.S. speakers.

Holocaust. Say *HAH-luh-KAWST* (**NOT:** *HOH-luh-KAWST* or *HAW-luh-KAWST*).

Hors d'oeuvre. This French term (meaning “appetizer”) is pronounced *awr-DUHRV*. The plural form *hors d'oeuvres* is pronounced *awr-DUHRVZ*.

Hospitable. Say *hah-SPIT-uh-buhl*.

Houghton Mifflin. The first part of this publisher’s name is pronounced *HOE-tun*.

Houston. The city in Texas is pronounced *HYOO-stun*. However, the street in New York City is pronounced *HOW-stun*.

Hypocrite, hypocrisy, hypothesis. Although all three words begin with the same four letters, those letters are pronounced differently. Say *HIP-uh-CRIT*, *hih-PAH-crih-see*, and *high-PAH-thu-sis*.

Ian. The Gaelic form of the name *John* is pronounced *EE-yan*.

ieve. The letters *ieve* sound like *eeve* in words such as *achieve*, *believe*, *grieve*, *relieve*, *reprieve*, and *retrieve*. Only one word—*sieve*—is pronounced differently; it should rhyme with *give*.

Ignominy. Say *IG-nuh-min-ee*.

Illinois. The *s* is silent. Say *ill-lih-NOY* (**NOT:** *ill-lih-NOYZ*).

Illustrative. Say *il-LUH-struh-tiv* (**NOT:** *il-luh-STRAY-tiv*).

Implacable. Say *im-PLACK-uh-bul* (**NOT:** *im-PLAYK-uh-bul*).

Imprimatur. Say *im-pruh-MAH-tuhr*.

Inchoate. Say *in-KOH-ut*.

Incognito. Say *in-kog-NEE-toe* (**NOT:** *in-KOG-nih-toe*).

Incomparable. Say *in-COM-pruh-bul* (**NOT:** *in-com-PAIR-a-bul*).

Indefatigable. Put the accent on *fat*. Say *in-dih-FAT-ig-uh-bul*.

Indict, indictment. The spelling of these words is misleading. Say *in-DITE*, *in-DITE-ment* (**NOT:** *in-DIKT*, *in-DIKT-ment*).

Indigenous. Say *in-DIH-jih-nus*.

Inexplicable. Say *in-ex-PLICK-uh-bul*.

Infamous. Put the accent on the first syllable. Say *IN-fuh-mus*.

Integral. Do not misplace the *r* when pronouncing this word. Say *IN-tih-grul* (**NOT:** *IN-ter-gul* or *IN-trih-gul*). Be sure to accent the first syllable—*IN-tih-grul* (**NOT:** *in-TEH-grul*).

Interested, interesting. Say *IN-truh-stid* (**RATHER THAN:** *IN-ter-ess-tid*) and *IN-truh-sting* (**RATHER THAN:** *in-tuh-RES-ting*).

International. Be sure to pronounce the first *t* in *international*. Say *in-ter-NASH-nul* (**NOT:** *in-ner-NASH-nul*).

Interpretation. Don't overlook the second *r*. Say *in-ter-prih-TAY-shun* (**NOT:** *in-ter-pih-TAY-tion*).

Introduce. Be sure to pronounce the *t*. Say *in-truh-DOOSS* (**NOT:** *in-ner-DOOSS*).

Irrelevant. Say *ir-REL-leh-vant* (**NOT:** *ir-REV-veh-lent*).

Irreparable. Pronounce this five-syllable word as four syllables. Say *ir-REP-ruh-bul* (**NOT:** *ir-reh-PAIR-uh-bul*).

Irrevocable. Say *ir-REV-vuh-kuh-bul* (**NOT:** *ir-reh-VOE-kuh-bul*).

Itinerary. Say *eye-TIN-nuh-rer-ree* (**NOT:** *eye-TIN-ner-ree*).

ive. When this group of letters appears as a suffix (as in *captive*, *constructive*, and *effective*), it is pronounced like the *ive* in *give* or *olive*. However, this group of letters is pronounced like the *ive* in *five* in such words as *alive*, *connive*, *dive*, *deprive*, *drive*, *jive*, *survive*, *thrive*, *long-lived*, and *short-lived*. In words like *receive* and *naive*, this group of letters has the sound of *eeve*: *re-CEEVE*, *nye-EEVE*. And a word like *waive* is pronounced to rhyme with *wave*. (See *Live*.)

Jewelry. Say *JOO-well-ree* (**NOT:** *JOO-luh-ree*).

Jodhpur, jodhpurs. The city in India, Jodhpur, is pronounced *JAHD-purr*. The plural form, *jodhpurs* (referring to riding breeches), is pronounced *JAHD-purz*. (Note that the word is spelled *hp*, not *ph*. Those who fail to recognize the correct spelling may be tempted to pronounce the word incorrectly as *JAHD-furz*.)

Junta. Pronounce the letter *j* like *h* and the letter *u* like *oo* in *wood*. Say *HOON-tuh*.

Kansas. See *Arkansas*.

Karaoke. Say *kar-ee-OH-kee*.

Khakis. Pronounce the *a* as in *bad*; say *KAH-kees*. This word, which refers to a light-colored cloth, is sometimes defined as “what you need to start the car in Boston.”

Kilometer. Most U.S. speakers say *kuh-LOM-muh-ter*, even though *KILL-luh-MEE-ter* logically follows the way in which *centimeter* and *millimeter* are accented. Either pronunciation is acceptable.

La Jolla. This community in southern California is pronounced *luh-HOY-yuh*.

Laboratory. Do not pronounce the first *o*. Say *LAB-ruh-taw-ree*.

Lafayette. The city in California is pronounced *la-fee-ETT*. The county in Arkansas is pronounced *luh-FAY-ett*.

Lagniappe. This French word (used in places like Louisiana to signify a small gift or something extra that is given to a customer who makes a purchase) is pronounced *lan-YAP*.

Lambaste. Say *lam-BAYST* (**NOT:** *lam-BAST*).

Laredo. This city in Texas is pronounced *luh-RAY-doe*.

Largesse. Say *lar-JESS* or *lar-ZHESS*.

Leavenworth. The first part of this Kansas city name rhymes with *heaven*.

Length. Be sure to pronounce the *g*. Say *LENGTH* (**NOT:** *LENTH*).

Liaison. Say *LEE-uh-zahn* (**NOT:** *LAY-uh-zahn* or *lee-YAY-zahn*).

Library. Do not overlook the first *r*. Say *LIE-brer-ree* (**NOT:** *LIE-ber-ree*).

Lilac. Say *LIE-lock* (**NOT:** *LIE-lack*).

Lima. The city in Peru is pronounced *LEE-muh*. The city in Ohio is pronounced *LIE-muh* (as in *lima bean*).

Literature. This word may be pronounced as four syllables (*LIT-er-uh-chur*) or three (*LIT-rih-chur*).

Live. As a verb (as in “I live in Ohio”), *live* is pronounced to rhyme with *give*. As an adjective (as in “live ammunition”) or an adverb (as in “to broadcast live”), *live* is pronounced to rhyme with *dive*.

Loath, loathe. *Loath* means “reluctant”; pronounce it to rhyme with *oath*. *Loathe* means “to detest”; pronounce it to rhyme with *clothe*.

Long-lived. Pronounce the *i* in *lived* like the long *i* in *life*, not like the short *i* in *liver*. (See ¶823a.)

Los Angeles. Pronounce the *g* in *Angeles* as a *j* and the *es* as *us*. Say *lawss-ANN-juh-lus* (**NOT:** *lawss-ANG-guh-leez*).

Louisiana. Residents of the state say *loo-zee-YAN-nuh*. Others usually say *loo-wee-zee-YAN-nuh*.

Louisville. Residents of Kentucky say *LOO-vul*. Others usually say *LOO-wee-vill*.

Lowering. When this word is intended to mean “reducing the height, the value, or the amount of something,” pronounce it *LOH-er-ing*. When this word is intended to mean “dark, threatening, or gloomy,” pronounce it to rhyme with *cowering*.

Mackinac. The spelling for this island in Michigan does not reveal the correct pronunciation. Say *MACK-in-naw* (**NOT:** *MACK-in-nack*).

Marseilles. The city in France is pronounced *mar-SAY*. The city in Illinois is pronounced *mar-SAILS*.

Mauve. Say *MOHV* (**NOT:** *MAVV*).

Mayoral. Say *MAY-uh-rul* (**NOT:** *may-AW-rul*).

Memento. Note that this word begins with *me* (**NOT:** *mo*). Say *meh-MEN-toe* (**NOT:** *moe-MEN-toe*).

Memoir. Say *MEM-wahr*. Some people like to pronounce this word as *MEE-mwar*, but an anonymous wit has suggested that this unorthodox pronunciation should be used only when one is referring to an account that is exceptionally self-centered.

Mendham. See *-ham*.

Metairie. This suburb of New Orleans is pronounced *MET-uh-ree* (**NOT:** *meh-TAIR-ree*).

Minuscule. Say *MIH-nus-kyool* (**NOT:** *MINE-nus-kyool*).

Minute. When referring to a small period of time, say *MIN-nit*. When referring to something extremely small, say *my-NOOT*.

Minutiae. *Minutiae* (the plural form of *minutia*) should be pronounced *muh-NOO-shee-eye*. The singular form, *minutia*, is pronounced *muh-NOO-shee-uh*.

Mischievous. Do not insert an extra syllable when pronouncing this word. Say *MISS-chiv-vus* (**NOT:** *miss-CHEE-vee-yus*).

Misled. Do not be misled by the spelling of this word. Say *miss-LED* (**NOT:** *MYZ-zuhld*).

Missouri. Outsiders and a majority of the state residents say *mih-ZOOR-ee*, but other residents say *mih-ZOOR-uh*. The *ou* in *Missouri* is pronounced like the *oo* in *good*.

Mobile. The city in Alabama is pronounced *moe-BEEL*. The adjective (meaning “movable”) is pronounced *MOE-bul*. The common noun referring to a type of sculpture that moves is pronounced *MOE-beel*.

Modem. Say *MOE-dum*.

Moot, mute. Pronounce *moot* to rhyme with *loot*. Pronounce *mute* to rhyme with *cute*; say *MYOOT*.

Moscow. The city in Russia is pronounced *MAHSS-kow*. The city in Idaho is pronounced *MAHSS-koe*.

Mount Desert. This island in Maine is pronounced *mount-deh-ZERT* (**NOT:** *mount-DEZ-zert*).

Mustache. Despite the *ache* in *mustache*, there is no pain connected with this word. Say *MUS-tash* or *mu-STASH*.

Myopic. Say *my-OPP-ik* (**NOT:** *my-OPE-ik*).

Nacogdoches. This city in Texas is pronounced *nack-kuh-DOE-chez*.

Naiveté. Pronounce this word as three syllables. Say *nah-eev-TAY* or *nye-eev-TAY*. At one time this word was commonly written with a diaeresis (two dots) over the *i*—*naïveté*. The diaeresis was intended to make it clear that the *i* is to be pronounced as a separate syllable (and not like the *ai* in *maintain*).

Natchitoches. You might think this city in Louisiana was pronounced much like *Nacogdoches* above, but you’d be wrong. Ignore the spelling and say *NACK-kuh-tish*.

Neither. See *Either*.

Nevada. When residents of Nevada pronounce this name, they typically sound the first *a* like the *a* in *man*: *neh-VAA-duh*. Outsiders typically pronounce this name as *neh-VAH-duh*. And residents of Nevada County in Arkansas pronounce this name *nuh-VAY-duh*.

New Orleans. Residents of Louisiana typically say *noo-WAH-linz*; some even say *noo-wah-LEENZ*. Outsiders typically say *noo-ARR-linz*.

Newark. The city in New Jersey is pronounced *NOO-erk*. The city in Delaware is pronounced *NOO-ARK*.

Newfoundland. Residents of this Canadian province say *noo-finned-LAND*. Outsiders say *NOO-finned-lund*. No one should say *noo-FOUND-land*.

Niche. Say *NITCH* (**NOT:** *NEESH*).

Nihilism. Say *NYE-il-liz-um* (**NOT:** *NEE-il-liz-um*).

Nuclear. Say *NOO-klee-ur* (**NOT:** *NOO-kyoo-lur*).

oad. The words *load*, *road*, *toad*, and *goad* rhyme with *owed*, but *broad* rhymes with *sawed*.

Often. Ignore the *t*. Say *AWF-fen* (**NOT:** *AWF-ten*).

og. *Og* is pronounced *ahg* in virtually every word ending in *og*—for example, *log, fog, hog, frog, jog, clog, smog, catalog*, and *eggnog*. The only exception is *dog*, which is pronounced *DAWG*.

oll. Most words ending in *oll* rhyme with *whole*—for example, *boll, droll, knoll, poll, roll, scroll, toll*, and *troll*. In a few words—*doll, loll*, and *moll*—the letters *oll* are pronounced as in *follow*.

ood. Words such as *wood, hood, stood*, and *good* rhyme with *could*. Words such as *brood, food, mood*, and *snood* rhyme with *clued*. *Blood* rhymes with *mud*.

Oregon. Many residents of this state pronounce the name as two syllables—*AWR-gun*. Others (including most outsiders) say *AWR-ruh-gun*. There seems to be substantial agreement that the *or* in Oregon should not be pronounced *ahr* and that *gon* should not be pronounced as in *Gone With the Wind*.

ough. This group of letters stands for many different sounds.

With the sound of AW: *bought, brought, cough, fought, nought, ought, sought, thought, trough* (*TRAWF* or *TRAWTH*), *wrought*.

With the sound of OH: *although, borough, dough, furlough, thorough* (*THUR-roh*), *though*.

With the sound of OO: *through*. (See the entry for *slough*.)

With the sound of OW: *bough, plough, drought, sough*. (See the entry for *slough*.)

With the sound of UFF: *enough, rough, tough*. (See the entry for *slough*.)

With the sound of UH: *Poughkeepsie* (*puh-KIPP-see*).

With the sound of UP: *hiccough*.

our. The words *flour, hour, scour, sour*, and *devour* rhyme with *flower*. The words *four, pour, your*, and *pompadour* rhyme with *for*. The words *tour, dour, contour*, and *amour* rhyme with *lure*. Only the word *glamour* does not fit these patterns; say *GLAM-mer*.

ove. The letters *ove* have the sound of *uv* in such words as *above, dove, glove, love, and shove*. These letters are pronounced *ohv* in such words as *clove, cove, drove, grove, hove, rove, stove, strove*, and *wove*. In a few words, the letters *ove* have the sound of *oo-ve*—*improve, move, and prove*.

ow. Many words ending in *ow* rhyme with *go*—for example, *blow, crow, flow, glow, grow, low, show, snow, throw, and tow*. Other words rhyme with *now*—for example, *brow, chow, cow, how, powwow, and vow*. Two words are pronounced both ways, depending on what they mean; see the entries for *Bow* and *Row*.

Pamphlet. Say *PAM-flet*.

Paradigm, paradigmatic. The opening syllables *para* are pronounced as in *parachute*. The *g* is silent in the noun *paradigm*; say *PAR-uh-dime*. The *g* is pronounced in the adjective *paradigmatic*; say *par-uh-dig-MAT-ick*.

Parliament. Ignore the *i*. Say *PARR-luh-ment*.

Particular. Say *par-TICK-you-ler* (**NOT:** *par-TICK-uh-ler*).

Pastoral. Say *PASS-tur-ul* (**NOT:** *pass-TOR-ul*).

Patent. When using this word to mean “obvious” (as in *a patent lie*), say *PAYT-unt*. In all other uses pronounce the first syllable of *patent* to rhyme with *hat*.

Patronize. Pronounce the *pa* as in *pay* (**NOT:** as in *pat*). Say *PAY-truh-nyze*.

Peabody. This town in Massachusetts is pronounced *PEA-buh-dee* (**NOT:** *PEA-bah-dee*).

Pecan. Say *pih-KAN* (**NOT:** *pih-KAHN*). However, pronounce the phrase *pecan pie* as *PEA-kan PIE*.

Pedagogue. Pronounce the *go* as in *got* (**NOT:** as in *goat*). Say *PEH-duh-gahg*.

Pedagogy. Unlike the *go* in *pedagogue* (pronounced as in *got*), the *go* in *pedagogy* is pronounced as in *goat*. Moreover, the *gy* is pronounced *jee*. Say *PEH-duh-goe-jee*.

Permit. When using this word as a verb, say *per-MIT*. (For example, *I can't per-MIT that to happen*.) When using this word as a noun, say *PER-mit*. (For example, *My teenage son just got his PER-mit*.)

Perspiration. Say *PER-spuh-ray-shun* (**NOT:** *PRESS-per-ray-shun*).

Phoenix. Pronounce this city in Arizona *FEE-nicks*.

Pianist. *Pee-ANN-ist* is the preferred pronunciation, but *PEE-uh-nist* is also acceptable.

Picture. Say *PIHK-chur* (**NOT:** *PIT-chur*).

Pierre. This two-syllable French name (pronounced *pee-YAIR*) is pronounced as only one syllable—*PEER*—when it refers to the capital of South Dakota.

Poignant. Do not pronounce the *g*. Say *POY-nyent* (**NOT:** *POYG-nant*).

Poinsettia. Ignore the second *i*. Say *poyn-SETtuh*.

Posthumous. The *po* in *posthumous* is pronounced as in *pot* (**NOT:** as in *post*). Say *POSS-chum-mus*.

Potpourri. This French word (meaning “mixture” or “medley”) is pronounced *poe-puh-REE*.

Poughkeepsie. This city in the state of New York is pronounced *puh-KIPP-see*.

Precedent. Put the accent on the first syllable. Say *PRESS-uh-dent* (**NOT:** *pruh-SEE-dent*).

Preferable. Say *PREF-ruh-bul* (**NOT:** *pruh-FER-ruh-bul*).

Prerogative. Note that the first syllable is spelled *pre* (**NOT:** *per*). Say *prih-ROGG-uh-tiv* (**NOT:** *per-ROGG-uh-tiv*).

Preventive. Do not insert an extra syllable in this word. Say *prih-VEN-tiv* (**NOT:** *prih-VEN-tuh-tiv*).

Prima facie. This Latin expression, which is used to indicate that something is clearly true on first appearance (as in *prima facie evidence*), is pronounced *PRY-muh FAY-shee*.

Primer. When referring to a very basic book, say *PRIM-mer*. For all other meanings of the word, say *PRYE-mer*.

Prix fixe. This French expression, which refers to a fixed price for a complete meal in a restaurant, is pronounced *PREE-FEEKS*.

Probably. Pronounce this word as three syllables. Say *PRAH-buh-blee* (**NOT:** *PRAH-blee*).

Pronunciation. There is no *ounce* sound in the noun *pronunciation*, as there is in the verb *pronounce*. Say *pruh-nun-see-YAY-shun* (**NOT:** *pruh-noun-see-YAY-shun*).

Pseudo. The *p* is silent. Say *SOO-doe*.

Puerto Rico. *PWAIR-toe-REE-koe* is preferred, but *POR-toe-REE-koe* is also acceptable.

Pulitzer. The name of the prize is pronounced *PULL-uht-suhr* (**NOT:** *PYOOl-uht-suhr*).

Puyallup. This city in Washington is pronounced *pyoo-AL-up* (**NOT:** *poo-YAL-up*).

Quasi. Say *KWAY-zye*.

Quay. Say *KEE* (**NOT:** *KAY* or *KWAY*).

Quincy. The city in Illinois is pronounced *KWIN-see*. The city in Massachusetts is pronounced *KWIN-zee*.

Re. The Latin preposition *re* (whether used alone or in the phrase *in re*) is usually pronounced *RAY*, but many lawyers say *REE*.

Reading. As an ordinary common noun, *reading* is pronounced *REE-ding*. However, as a proper noun referring to the city in Pennsylvania or the town in Massachusetts, *Reading* is pronounced *RED-ding*.

Realtor. This word is commonly mispronounced *REE-luh-ter*, as if the word were spelled *Relator*. Either pronounce the word correctly—*REE-uhl-ter*—or say *real estate agent* and avoid the problem altogether.

Recognize. Do not overlook the *g*. Say *REH-kug-nyze* (**NOT:** *REH-kuh-nyze*).

Recur. Say *ree-KURR* (**NOT:** *ree-uh-KURR*).

Rendezvous. Say *RAHN-day-voo*.

Reprisal. Say *rih-PRY-zul*.

Reprise. When this noun refers to a musical repetition, say *rih-PREEZ*.

Reputable. Accent the first syllable. Say *REH-pyuh-tuh-bul*.

Respite. Say *RESS-pit* (**NOT:** *re-SPITE*).

Ribald. Say *RIH-buhld*.

Row. This word rhymes with *how* when it means “uproar.” *Row* rhymes with *hoe* in all its other meanings.

Sacrilege, sacrilegious. Pronounce the *sa* as in *sack*. Say *SA-kruh-lihj*, *sa-kruh-LIH-juhs*.

Sagacious. Say *suh-GAY-shus* (**NOT:** *suh-GASH-us*).

Salisbury. When referring to the city in Maryland or North Carolina, say *SAWLZ-ber-ree*.

San Jacinto. The “proper” pronunciation of this town in California is *san-huh-SIN-toe*. Nevertheless, the pronunciation most commonly heard today is *san-juh-SIN-tuh*.

San Joaquin. When referring to the river or the county in California, say *san-wah-KEEN*.

San Jose. When referring to the city in California, say *san-uh-ZAY* or *san-hoe-ZAY*.

San Juan. The capital of Puerto Rico is pronounced *san-WAHN*.

San Rafael. This city in California is pronounced *san-ruh-FELL*.

Sandwich. Don’t overlook the *d*. Say *SAND-witch* (**NOT:** *SAN-witch* or *SAM-witch*).

Schedule. U.S. speakers say *SKED-jyool*; Canadian and British speakers say *SHED-jyool*.

Schism. Say *SIH-zum* (**NOT:** *SKIH-zum*).

Sean. The Irish form of the name *John* is pronounced *SHAWN*.

Sherbet. Say *SHER-bit* (**NOT:** *SHER-bert*).

Short-lived. Pronounce the *i* in *lived* like the long *i* in *life*, not like the short *i* in *liver*. (See ¶823a.)

Sieve. Say *SIV* (**NOT:** *SEEV*).

Similar. Say *SIH-mill-er* (**NOT:** *SIM-yoo-ler* or *sih-MILL-er*).

Sioux City, Sioux Falls. Pronounce *Sioux* as *SOO*.

Slough. As a noun meaning “swamp,” *slough* rhymes with *cow* or *few*. As a verb meaning “cast off,” *slough* rhymes with *stuff*.

Soften. Ignore the *t*. Say *SOF-fen*.

Solder, soldier. Pronounce *solder* as *SOD-der* and *soldier* as *SOUL-jer*.

Something. Although there is no *p* in the spelling of this word, there is the hint of a *p* sound in the way the word is pronounced: *SUMP-thing*.

Soupçon. This French term (which means “a little bit”) is pronounced *soop-SAHN*.

Spokane. This city in Washington is pronounced *spoe-KAN* (**NOT:** *spoe-KAIN*).

Spontaneity. Say *spon-tuh-NAY-uh-tee* (**NOT:** *spon-tuh-NEE-uh-tee*).

St. Augustine. When referring to the city in Florida, pronounce *Augustine* as *AW-guh-steen*. When referring to the saint himself, say *uh-GUS-tin*.

St. Louis. When referring to the city in Missouri, pronounce *Louis* as *LOO-wiss* (**NOT:** *LOO-wee*).

Status. The *sta* in *status* may be pronounced as in *stay* or in *stack*. In the expression *status quo*, *sta* is more commonly pronounced as in *stack*. Say *STA-tuhs KWOE*.

Strength. Do not overlook the *g* in this word. Say *STRENGTH* (**NOT:** *STRENTH*).

Suave. Say *SWAHV* (**NOT:** *SWAYV*).

Subpoena. Say *suh-PEE-nuh*.

Substantial, substantive. The accent does not fall on the same syllable in these two related words. Say *sub-STAN-shul* and *SUB-stin-tiv*.

Subtle, subtlety. Say *SUT-uhl* and *SUT-uhl-tee*.

Succinct. Say *suk-SINCT* (**NOT:** *sus-SINCT*).

Suit, suite. *Suit* is pronounced *SOOT* (to rhyme with *loot*). *Suite* is pronounced *SWEET*.

Superfluous. Put the stress on the second syllable. Say *soo-PER-floo-us* (**NOT:** *SOO-per-FLOO-us*).

Tempe. This city in Arizona is pronounced *tem-PEE* (**NOT:** *TEM-pee*).

Temperament, temperature. Ignore the second *e* in these words. Say *TEM-pruh-ment* and *TEM-pruh-choor*.

Terre Haute. This city in Indiana is pronounced *ter-ruh-HOAT*. (*Haute* rhymes with *boat*.)

Tête-à-tête. Pronounce this French phrase *TET-uh-TET* (**NOT:** *TATE-uh-TATE*).

The. Say *THUH* before words beginning with a consonant (*young*) or the sound of a consonant (*union*). Say *THEE* before words beginning with a vowel (*effort*) or the sound of a vowel (*FBI*).

B

Tucson. This city in Arizona is pronounced *TOO-sahn*.

Ultimatum. Say *ul-tih-MAY-tum* (**NOT:** *ul-tih-MAH-tum*).

Uranus. The planet Uranus is pronounced *YUR-uh-nus* (**NOT:** *yuh-RAY-nus*).

URL. This abbreviation for *uniform resource locator* has two acceptable pronunciations. If you think of it as an initialism, pronounce it letter by letter: *YOU-ARE-EL*. If you think of it as an acronym, pronounce it as a word: *EARL*.

Valparaiso. When referring to the city in Chile, say *val-puh-RYE-zoe*. When referring to the city in Indiana, say *val-puh-RAY-zoe*.

Vanilla. Say *vuuh-NIL-luh* (**NOT:** *vuh-NEL-luh*).

Vase. Say *VAYZ* (**NOT:** *VAHZ*).

Vegan, vegetarian. Although a vegan is a vegetarian, the *g* is pronounced differently in these words. Say *VEE-gun* and *veh-juh-TAIR-ree-yan*.

Versailles. When referring to the palace in France, say *ver-SIGH*. When referring to the town in Ohio, say *ver-SAILS*.

Veterinarian. Say *veh-tuh-ruh-NAIR-ree-yun* (**NOT:** *veh-tih-NAIR-ree-yan*).

Vice versa. Say *VY-suh VER-suh* (**NOT:** *VYS VER-suh*).

Vichysoisse. Say *vih-shee-SWAHZ* (**NOT:** *vih-shee-SWAH*).

Waco. This city in Texas is pronounced *WAYkoe* (**NOT:** *WACK-koe*).

Wareham. See *-ham*.

Warmth. Although there is no *p* in the spelling of this word, there is the hint of a *p* sound in the way the word is pronounced: *WARMPTH*.

Warwick. This city in Rhode Island is pronounced *WAR-rick*.

Waukegan. This city in Illinois is pronounced *waw-KEE-gun*.

Waukesha. This city in Wisconsin is pronounced *WAW-kuh-SHAW*.

Width. Don't overlook the *d*. Say *WIDTH* (**NOT:** *WITH*).

Wilkes-Barre. This city in Pennsylvania is pronounced *WILKS-bar-ruh* (**NOT:** *WILKS-bar-ree*). Pronounce the *a* in *Barre* as in *bat*.

Willamette. This river in Oregon is pronounced *will-LAM-met* (**NOT:** *WILL-luh-met*).

Wizened. Say *WIH-zind* (**NOT:** *WYE-zind*).

Worcester, Worcestershire. The *Wor* in these words is pronounced *woo* as in *wood*. When referring to the city in Massachusetts, say *WOO-ster*. When referring to the sauce or the city in England, say *WOO-stuh-shirr*.

Ypsilanti. This city in Michigan is pronounced *ip-sil-LAN-tee*.

Zealous. Say *ZELL-us*.

APPENDIX C

Rules for Alphabetic Filing

There are three types of alphabetic filing: (1) letter by letter (in which spaces between words are disregarded), (2) word by word, and (3) unit by unit (in which every word, abbreviation, and initial is considered a separate unit). ARMA International (formerly the Association of Records Managers and Administrators) recommends the use of the unit-by-unit method.

The basic principles of the unit-by-unit method (see pages 2–3) and the more specific rules that follow are consistent with the ARMA standards.* However, many acceptable alternative rules and variations are currently in use. The important thing to remember is that the goal of any set of filing standards and rules is to establish a consistent method of sorting and storing materials so that you and others you work with can retrieve these materials quickly and easily. Therefore, it makes sense to modify or change the following rules as necessary to accommodate the specific needs of your office or organization. Make sure, however, that everyone with access to your files knows what the modifications are so that a consistent set of standards can be maintained.

► *For guidelines on how to create a computerized file name, see ¶1356.*

IMPORTANT NOTE: Before names can be placed in alphabetic order, they must be *indexed*; that is, each name must be broken down into units, and the units must be arranged in a certain sequence. Once indexing is completed, the names can be compared unit by unit and alphabetic order can then be established.

Each of the following rules is accompanied by a chart that shows names in two ways: the first column (headed *Name*) shows the full name in a *standard* format, that is, as it would appear in an inside address of a letter; the remaining group of columns (headed *Unit 1*, *Unit 2*, and so on) shows the name in an *indexed* format, arranged unit by unit in a sequence appropriate for alphabetizing. Note that the “inside address” format presents the names in caps and lowercase, with punctuation as necessary. The indexed format presents the names in all-caps because for purposes of alphabetizing, the differences between capital and lowercase letters should be ignored. Moreover, the indexed format ignores punctuation; it even ignores a space or a hyphen between parts of a name.

If you want to use a computer (1) to print names in alphabetic order and (2) to insert names in inside addresses as well as ordinary text, you may have to create two name fields—one using the standard format, the other using the indexed format—as shown in the following charts.

*Establishing Alphabetic, Numeric, and Subject Filing Systems, ARMA International, Lenexa, Kansas, 2005.

Basic Principles

Alphabetizing Unit by Unit

- a. Alphabetize names by comparing the first units letter by letter.

Name	Unit 1	Unit 2	Unit 3
AlphaNumerics	<u>ALPHANUMERICS</u>		
Butterfield	<u>BUTTERFIELD</u>		
Eagleton	<u>EAGLETON</u>		
Eaton	<u>EATON</u>		
Eberhardt	<u>EBERHARDT</u>		
Eberhart	<u>EBERHART</u>		
ERGOnomics	<u>ERGONOMICS</u>		
Office Space Designers	<u>OFFICE</u>	SPACE	DESIGNERS
Offices Incorporated	<u>OFFICES</u>	INCORPORATED	
Official Stationers	<u>OFFICIAL</u>	STATIONERS	

- b. Consider second units only when the first units are identical.

Name	Unit 1	Unit 2
Foley Associates	<u>FOLEY</u>	<u>ASSOCIATES</u>
Foley Enterprises	<u>FOLEY</u>	<u>ENTERPRISES</u>
Foley Industries	<u>FOLEY</u>	<u>INDUSTRIES</u>
Foley Mills	<u>FOLEY</u>	<u>MILLS</u>

- c. Consider additional units only when the first two units are identical.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Fox Hill Company	<u>FOX</u>	<u>HILL</u>	<u>COMPANY</u>	
Fox Hill Farm	<u>FOX</u>	<u>HILL</u>	<u>FARM</u>	
Fox Hill Farm Supplies	<u>FOX</u>	<u>HILL</u>	<u>FARM</u>	<u>SUPPLIES</u>
Fox Hill Incorporated	<u>FOX</u>	<u>HILL</u>	<u>INCORPORATED</u>	

NOTE: If two names are identical, they may be distinguished on the basis of geographic location. (See Rule 11.)*

Nothing Comes Before Something

- a. A single letter comes before a name that begins with the same letter.

Name	Unit 1
O	<u>O</u>
Oasis	<u>OASIS</u>
Oberon	<u>OBERON</u>

*Rules 1–13 appear on pages 3–19.

- b.** A name consisting of one word comes before a name that consists of the same word plus one or more other words.

Name	Unit 1	Unit 2	Unit 3
Operations	<u>OPERATIONS</u>		
Operations Management	<u>OPERATIONS</u>	<u>MANAGEMENT</u>	
Consultants			<u>CONSULTANTS</u>
Operations Technologies	<u>OPERATIONS</u>	<u>TECHNOLOGIES</u>	

- c.** A name consisting of two or more words comes before a name that consists of the same two or more words plus another word, and so on.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Oak Creek	<u>OAK</u>	<u>CREEK</u>		
Oak Creek Home Furnishings	<u>OAK</u>	<u>CREEK</u>	<u>HOME</u>	<u>FURNISHINGS</u>
Oak Creek Homes	<u>OAK</u>	<u>CREEK</u>	<u>HOMES</u>	

Deciding Which Name to Use

ARMA International advocates filing “under the most commonly used name or title.” This helpful principle provides the basis for choosing which name you should use for a person or an organization when alternatives exist. Select the form most likely to be used and then provide cross-references for the alternatives. In that way anyone who is searching for material under an alternative name will be referred to the primary name being used for filing purposes. (See Rule 4c, Rule 6e, Rule 7a, note, and Rule 8b, note, for specific instances in which this principle can be applied.)

Personal Names

Rule 1: Names of Persons

- a.** Treat each part of the name of a person as a separate unit, and consider the units in this order: last name, first name or initial, and any subsequent names or initials. Ignore any punctuation following or within an abbreviation.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Jacobs	<u>JACOBS</u>			
L. Jacobs	<u>JACOBS</u>	<u>L</u>		
L. Mitchell Jacobs	<u>JACOBS</u>	<u>L</u>	<u>MITCHELL</u>	
Stephen Jacobson	<u>JACOBSON</u>	<u>STEPHEN</u>		
Stephen Brent Jacobson	<u>JACOBSON</u>	<u>STEPHEN</u>	<u>BRENT</u>	
Steven O'K. Jacobson	<u>JACOBSON</u>	<u>STEVEN</u>	<u>OK</u>	
B. Jacoby	<u>JACOBY</u>	<u>B</u>		
B. T. Jacoby	<u>JACOBY</u>	<u>B</u>	<u>T</u>	
Bruce Jacoby	<u>JACOBY</u>	<u>BRUCE</u>		

- b.** When you are dealing with a foreign personal name and cannot distinguish the last name from the first name, consider each part of the name in the order in which it is written. Naturally, whenever you can make the distinction, consider the last name first.

Name	Unit 1	Unit 2	Unit 3
Kwong Kow Ng	<u>KWONG</u>	<u>KOW</u>	<u>NG</u>
Ng Kwong Cheung	<u>NG</u>	<u>KWONG</u>	<u>CHEUNG</u>
Philip K. Ng	<u>NG</u>	<u>PHILIP</u>	<u>K</u>

- c.** In a name like *Maria López y Quintana*, the last name consists of three separate words. For purposes of alphabetizing, treat these separate words as a single unit (for example, *LOPEZYQUINTANA*).

NOTE: If you are using a computer, insert a hard (or nonbreaking) space between the parts of a name such as *López y Quintana*. Then the last name will be sorted as though it were typed without spaces, but it will appear *with spaces* in an alphabetized list of names.

► *For the treatment of hyphenated personal names, see Rule 3.*

Rule 2: Personal Names With Prefixes

- a.** Consider a prefix as part of the name, not as a separate unit. Ignore variations in spacing, punctuation, and capitalization in names that contain prefixes (for example, *d'*, *D'*, *Da*, *de*, *De*, *Del*, *De la*, *Des*, *Di*, *Du*, *El*, *Fitz*, *L'*, *La*, *Las*, *Le*, *Les*, *Lo*, *Los*, *M'*, *Mac*, *Mc*, *Saint*, *San*, *Santa*, *Santo*, *St.*, *Ste.*, *Ten*, *Ter*, *Van*, *Van de*, *Van der*, *Von*, and *Von Der*).

Name	Unit 1	Unit 2	Unit 3
A. Serafino Delacruz	<u>DELACRUZ</u>	<u>A</u>	<u>SERAFINO</u>
Anna C. deLaCruz	<u>DELACRUZ</u>	<u>ANNA</u>	<u>C</u>
Michael B. DeLacruz	<u>DELACRUZ</u>	<u>MICHAEL</u>	<u>B</u>
Victor P. De La Cruz	<u>DELACRUZ</u>	<u>VICTOR</u>	<u>P</u>
LaVerne F. Delano	<u>DELANO</u>	<u>LAVERNE</u>	<u>F</u>
Angela G. D'Elia	<u>DELIA</u>	<u>ANGELA</u>	<u>G</u>
Pierre Des Trempes	<u>DESTREMPE</u>	<u>PIERRE</u>	
Brian K. De Voto	<u>DEVOTO</u>	<u>BRIAN</u>	<u>K</u>
P. Henri Leclair	<u>LECLAIR</u>	<u>P</u>	<u>HENRI</u>
Paulette G. Le Clair	<u>LECLAIR</u>	<u>PAULETTE</u>	<u>G</u>
Perry T. LeClair	<u>LECLAIR</u>	<u>PERRY</u>	<u>T</u>
Doris B. VanNess	<u>VANNES</u>	<u>DORIS</u>	<u>B</u>
Jan P. Van Ness	<u>VANNES</u>	<u>JAN</u>	<u>P</u>
Marian L. Vanness	<u>VANNES</u>	<u>MARIAN</u>	<u>L</u>

NOTE: If you are using a computer, insert a hard (or nonbreaking) space between the parts of a name such as *De La Cruz* (shown above) or *Mac Kay* (shown at the top of page 5). Then the last name will be sorted as though it were typed without spaces, but it will appear *with spaces* in an alphabetized list of names.

- b.** Consider the prefixes *M'*, *Mac*, and *Mc* exactly as they are spelled, but ignore the apostrophe in *M'*. Consider a name such as *O'Keefe* as one word, and ignore the apostrophe.

Name	Unit 1	Unit 2	Unit 3
Marilyn R. Mack	<u>MACK</u>	MARILYN	R
Irene J. MacKay	<u>MACKAY</u>	IRENE	J
Roy F. Mackay	<u>MACKAY</u>	ROY	F
Walter G. Mac Kay	<u>MACKAY</u>	WALTER	G
F. Timothy Madison	<u>MADISON</u>	F	TIMOTHY
Agnes U. M'Cauley	<u>MCAULEY</u>	AGNES	U
Patrick J. McKay	<u>MCKAY</u>	PATRICK	J
Andrew W. O'Hare	<u>OHARE</u>	ANDREW	W
Alice R. O'Hearn	<u>OHEARN</u>	ALICE	R
Malachy Q. O'Neal	<u>ONEAL</u>	MALACHY	Q
Kate F. O'Neil	<u>ONEIL</u>	KATE	F
Francis X. O'Neill	<u>ONEILL</u>	FRANCIS	X

- c.** Treat the prefixes *Saint*, *San*, *Santa*, *Santo*, *St.*, and *Ste.* exactly as they are spelled.

Name	Unit 1	Unit 2	Unit 3
George V. Sahady	<u>SAHADY</u>	GEORGE	V
Kyle N. Saint Clair	<u>SAINTCLAIR</u>	KYLE	N
Jeffrey T. Sakowitz	<u>SAKOWITZ</u>	JEFFREY	T
Annette San Marco	<u>SANMARCO</u>	ANNETTE	
Felix Santacroce	<u>SANTACROCE</u>	FELIX	
Peter St. Clair	<u>STCLAIR</u>	PETER	
O. M. Ste. Marie	<u>STEMARIE</u>	O	M

NOTE: If you are using a computer, insert a hard (or nonbreaking) space between the parts of a name such as *Saint Clair* or *San Marco*. Then the last name will be sorted as though it were typed without a space, but it will appear *with a space* in the alphabetized list of names.

Rule 3: Hyphenated Personal Names

Consider the hyphenated elements of a name as a single unit. Ignore the hyphen.

Name	Unit 1	Unit 2	Unit 3
S. T. Laverty-Powell	<u>LAVERTYPOWELL</u>	S	T
Victor Puentes-Ruiz	<u>PUENTESRUIZ</u>	VICTOR	
Jean V. Vigneau	<u>VIGNEAU</u>	JEAN	V
Jean-Marie Vigneau	<u>VIGNEAU</u>	JEANMARIE	
Jean-Pierre Vigneau	<u>VIGNEAU</u>	JEANPIERRE	

Rule 4: Abbreviated Personal Names, Nicknames, and Pseudonyms

- a. Treat an abbreviated part of a name (such as *Wm.* for *William*) or a nickname (such as *Al* or *Kate*) exactly as it is written if that is how the person is known. Ignore any punctuation used with the abbreviation.

Name	Unit 1	Unit 2	Unit 3
Chas. E. Kassily	<u>KASSILY</u>	CHAS	E
Benjy Larson	<u>LARSON</u>	BENJY	
Bubbles Leaden	<u>LEADEN</u>	BUBBLES	
Moose Maguire	<u>MAGUIRE</u>	MOOSE	
Peggy Sue Marker	<u>MARKER</u>	PEGGY	SUE
Tommy Rae Marker	<u>MARKER</u>	TOMMY	RAE
B. J. Purcell	<u>PURCELL</u>	B	J
J. R. Purcell	<u>PURCELL</u>	J	R

- b. If a person is known by a nickname alone (without a surname) or by a pseudonym, consider each word in the nickname or pseudonym as a separate unit. If the name begins with *The*, treat *The* as the last unit.

Name	Unit 1	Unit 2	Unit 3
Barbra	<u>BARBRA</u>		
Big Al	<u>BIG</u>	AL	
Cher	<u>CHER</u>		
D. J. Clue	<u>CLUE</u>	D	J
The Fat Lady	<u>FAT</u>	LADY	THE
Handy Joe Bob	<u>HANDY</u>	JOE	BOB
Harry the Horse	<u>HARRY</u>	THE	HORSE
Heavy D	<u>HEAVY</u>	D	
Mad Man Marko	<u>MAD</u>	MAN	MARKO
Madonna	<u>MADONNA</u>		
Mr. Bill (see Rule 5b)	<u>MR</u>	BILL	
Sting	<u>STING</u>		

- c. When you have to decide whether to file material under a person's formal name or under a nickname, pseudonym, or some abbreviated form, choose the form that you and others you work with are most likely to think of when you want to find that person's name. (See also "Deciding Which Name to Use," page 3.)

NOTE: You should also enter the person's alternative name in the appropriate alphabetic sequence and make a cross-reference to the primary name you have selected. For example, suppose that *Big Al* (the primary name you have selected) is formally named *Albert J. Degas*. In the appropriate alphabetic sequence you would provide this entry: *Degas, Albert J.: see Big Al*.

Rule 5: Personal Names With Titles and Suffixes

- a. A title (such as *Dr.*, *Major*, *Mayor*, *Miss*, *Mr.*, *Mrs.*, or *Ms.*) may be used as the *last* filing unit in order to distinguish two or more names that are otherwise identical. Treat any abbreviated titles as written, but ignore any punctuation.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Dr. Leslie G. Mabry	MABRY	LESLIE	G	DR
Miss Leslie G. Mabry	MABRY	LESLIE	G	MISS
Mr. Leslie G. Mabry	MABRY	LESLIE	G	MR
Mrs. Leslie G. Mabry	MABRY	LESLIE	G	MRS
Ms. Leslie G. Mabry	MABRY	LESLIE	G	MS
Major Felix Novotny	NOVOTNY	FELIX	MAJOR	
Mayor Felix Novotny	NOVOTNY	FELIX	MAYOR	
Senator Felix Novotny	NOVOTNY	FELIX	SENATOR	
Sergeant Felix Novotny	NOVOTNY	FELIX	SERGEANT	
Bishop David Oliver	OLIVER	DAVID	BISHOP	
Brother David Oliver	OLIVER	DAVID	BROTHER	

- b. When a title is used with only one part of a person's name, treat the title as the *first* unit. (See "Deciding Which Name to Use," page 3.)

Name	Unit 1	Unit 2
Dr. Ruth	DR	RUTH
Grandma Moses	GRANDMA	MOSES
King Hussein	KING	HUSSEIN
Miss Manners	MISS	MANNERS
Mother Teresa	MOTHER	TERESA
Mr. Rogers	MR	ROGERS
Queen Elizabeth	QUEEN	ELIZABETH
Saint Elizabeth	SAINT*	ELIZABETH

*Note that *Saint* as a title is considered a separate unit, whereas *Saint* as a prefix in a personal name is considered only part of a unit. (See Rule 2c for examples of *Saint* as a prefix.)

- c. Ordinarily, alphabetize a married woman's name on the basis of her own first name. However, consider the title *Mrs.* (as abbreviated) if a woman uses her husband's name and you do not know her first name.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Mr. Fred Naylor	NAYLOR	FRED		
Mrs. Marie Naylor	NAYLOR	MARIE		
Mrs. June Y. Nearing	NEARING	JUNE	Y	
Mr. Peter J. Nearing	NEARING	PETER	J	
Mr. Harry L. Norton	NORTON	HARRY	L	MR
Mrs. Harry L. Norton (whose own first name is unknown)	NORTON	HARRY	L	MRS

- d.** Consider a seniority term (such as *Jr.*, *Sr.*, *2d*, *3d*, *II*, or *III*), a professional or academic degree (such as *CPA*, *M.D.*, or *Ph.D.*), or any other designation following a person's name in order to distinguish names that are otherwise identical. Numeric designations precede alphabetic designations. Moreover, arabic numerals precede roman numerals, and each set of numbers is sequenced in numeric order. When dealing with ordinal numbers such as *3d* or *4th*, ignore the endings.

Name	Unit 1	Unit 2	Unit 3	Unit 4
James R. Foster 2d	FOSTER	JAMES	R	2
James R. Foster 3d	FOSTER	JAMES	R	3
James R. Foster III	FOSTER	JAMES	R	III
James R. Foster IV	FOSTER	JAMES	R	IV
James R. Foster, CPA	FOSTER	JAMES	R	CPA
James R. Foster, D.D.	FOSTER	JAMES	R	DD
James R. Foster Jr.	FOSTER	JAMES	R	JR
James R. Foster, M.B.A.	FOSTER	JAMES	R	MBA
James R. Foster, M.D.	FOSTER	JAMES	R	MD
James R. Foster, Mr.	FOSTER	JAMES	R	MR
James R. Foster, Ph.D.	FOSTER	JAMES	R	PHD
James R. Foster, S.J.	FOSTER	JAMES	R	SJ
James R. Foster, Sr.	FOSTER	JAMES	R	SR

NOTE: If you are using a computer, all names in which the first significant unit consists of arabic numerals will be sequenced in numeric order and will precede all names with a comparable unit composed of letters of the alphabet (as shown in the chart above).

There is a problem, however, with roman numerals. Since roman numerals are written with letters of the alphabet, your software will consider them as letters (and not as numerals) and position them accordingly in an alphabetic sequence of names. Thus, if your software were sequencing the names shown in the preceding chart, the name ending with *D.D.* (for *Doctor of Divinity*) would be inserted before the name ending with *III*. To avoid this outcome, you will have to override the software and move the name ending with *D.D.* to the correct position (after *CPA*, as shown in the chart above).

Organizational Names

Rule 6: Names of Organizations

- a.** Treat each word in the name of an organization as a separate unit, and consider the units in the same order as they are written on the letterhead or some other authoritative document.

Name	Unit 1	Unit 2	Unit 3
American Data Control	AMERICAN	DATA	CONTROL
American Datacom	AMERICAN	DATACOM	
Computer Enterprises	COMPUTER	ENTERPRISES	
Computer Systems	COMPUTER	SYSTEMS	
I Deal Cards	I	DEAL	CARDS
Ideal Printers	IDEAL	PRINTERS	

- b. When alphabetizing, ignore all punctuation—for example, periods, commas, hyphens, apostrophes, and slashes. When words are joined by a hyphen or a slash, treat the phrase as a single unit.

Name	Unit 1	Unit 2	Unit 3
Baskins Advertising Agency	BASKINS	ADVERTISING	AGENCY
Baskins' Artworks	BASKINS	ARTWORKS	
Baskin's Basket Shop	BASKINS	BASKET	SHOP
Baskin-Shaw Films	BASKINSHAW	FILMS	
Baskin/Shaw Foods	BASKINSHAW	FOODS	
Curtis Imports	CURTIS	IMPORTS	
Curtis's China Gallery	CURTISS	CHINA	GALLERY
Curtiss Couriers	CURTISS	COURIERS	
Curtis's Marina	CURTISS	MARINA	
In-Service Trainers	INSERVICE	TRAINERS	
Oleander's Displays!	OLEANDERS	DISPLAYS	
O'Leary's Camera Shop	OLEARYS	CAMERA	SHOP
On-Time Deliveries	ONTIME	DELIVERIES	
The Upper Cut	UPPER	CUT	THE
What's New?	WHATS	NEW	

- c. Treat prepositions (such as *of* and *in*), conjunctions (such as *and* and *or*), and articles (*the*, *a*, and *an*) as separate units. When *the* is the first word in a name, treat it as the last unit. When *a* or *an* is the first word in a name, treat it as the first unit.

Name	Unit 1	Unit 2	Unit 3	Unit 4
A Touch of Glass	A	TOUCH	OF	GLASS
In Touch With Life	IN	TOUCH	WITH	LIFE
In-Plant Catering	INPLANT	CATERING		
Lunch on the Go	LUNCH	ON	THE	GO
Over the Rainbow Gifts	OVER	THE	RAINBOW	GIFTS
The Pen and Pencil	PEN	AND	PENCIL	THE
Photos in a Flash	PHOTOS	IN	A	FLASH
Up on a Roof	UP	ON	A	ROOF

- d.** When a compound expression is written as one word or hyphenated, treat it as a single unit. If the compound expression is written with spaces, treat each element as a separate unit.

Name	Unit 1	Unit 2	Unit 3
Aero Space Systems	AERO	SPACE	SYSTEMS
Aerospace Research	AEROSPACE	RESEARCH	
Aero-Space Unlimited	AEROSPACE	UNLIMITED	
Foy Brothers Associates	FOY	BROTHERS	ASSOCIATES
Foy North-South Properties	FOY	NORTHSOUTH	PROPERTIES
Foy-Brothers Financial Planners	FOYBROTHERS	FINANCIAL	PLANNERS
Pay Fone Systems	PAY	FONE	SYSTEMS
Paychex Incorporated	PAYCHEX	INCORPORATED	
Pay-O-Matic Company	PAYOMATIC	COMPANY	
South East Condos	SOUTH	EAST	CONDOS
Southeast Chemicals	SOUTHEAST	CHEMICALS	
South-East Medical Labs	SOUTHEAST	MEDICAL	LABS
Southeastern Medical Supplies	SOUTHEASTERN	MEDICAL	SUPPLIES

- e.** Although the words in an organizational name should normally be considered in the same order in which they are written, there are occasions when it makes good sense to allow exceptions to this rule. (See also “Deciding Which Name to Use,” page 3.) Suppose the name in question is *Hotel Plaza*. Strictly speaking, *Hotel* should be the first unit. However, if you and others are more likely to look for stored material in the P section of the files, choose *Plaza* as the first unit and *Hotel* as the second. On the other hand, suppose the name in question is *Motel 6*. Most people would look for material in the M section. Thus it would be best to treat this name exactly as written.

The formal name of a South Bend academic institution is the *University of Notre Dame*. Yet most people would not look for the name in the U section (as the formal rule suggests) but would turn instead to the Ns. However, for the *University of the South*, most people would turn to the U section rather than the S section.

CAUTION: When introducing exceptions to the basic rule for organizational names, be sure that these exceptions are supported by cross-references for the sake of those who may search the files for an alternative name. (See Rule 4c, note, for an example of a cross-reference.)

Rule 7: Personal Names Within Organizational Names

- a.** When an organizational name includes a person’s name, consider the parts of the personal name in the order in which they are written. Ignore any punctuation.

NOTE: A more traditional rule that is still widely followed requires that a person’s name within an organizational name be considered in the same way as a person’s

name that stands alone—namely, last name first. (See Rule 1.) Regardless of which approach you are following, there are specific situations in which it would be wise to make exceptions, depending on the way you (and others with access to your files) are likely to look up the name.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Frank Balcom Construction Company	FRANK	BALCOM	CONSTRUCTION	COMPANY
Frank Balcom, Jr., Paving	FRANK	BALCOM	JR	PAVING
M. Clausen Optical Supplies	M	CLAUSEN	OPTICAL	SUPPLIES
M. G. Clausen Autos	M	G	CLAUSEN	AUTOS
Mark Clausen Interiors	MARK	CLAUSEN	INTERIORS	
Mark G. Clausen Homes	MARK	G	CLAUSEN	HOMES
Mark G. Clausen Hotel	MARK	G	CLAUSEN	HOTEL
Mark G. Clausen Roofing	MARK	G	CLAUSEN	ROOFING

For example, even if you follow the ARMA standard for personal names in organizational names (first name first), you might want to make an exception for the *John F. Kennedy Presidential Library*, since most people would look for the file under the Ks rather than the Js. Similarly, the file for the *Bernard J. Baruch College* might be more easily found if sequenced according to the surname, *Baruch*, rather than the first name, *Bernard*.

On the other hand, those who follow the last-name-first approach might be wiser to locate the *Sarah Lawrence College* file in the S section rather than the L, to file materials on the *John Hancock Mutual Life Insurance Company* in the J section rather than the H, to store the *Fred Astaire Dance Studios* file under F rather than A, and to put the *Mary Kay Cosmetics* file under M rather than K.

The key here is to consider the way in which the name is most likely to be looked up (see “Deciding Which Name to Use,” page 3). Then provide cross-references between the alternative form and the primary form that has been selected. (See Rule 4c, note, for an example of a cross-reference.)

- b.** If a prefix is used in a personal name that is part of an organizational name, do not treat the prefix as a separate unit. (See Rule 2.)

Name	Unit 1	Unit 2	Unit 3	Unit 4
A. de La Cruz Securities Company	A	DELACRUZ	SECURITIES	COMPANY
A. D'Elia Boat Sales	A	DELIA	BOAT	SALES
Peter Saint Clair Boatels	PETER	SAINTCLAIR	BOATELS	
Peter St. Clair Insurance Agency	PETER	STCLAIR	INSURANCE	AGENCY
R. San Marco Environmental Controls	R	SANMARCO	ENVIRONMENTAL	CONTROLS

- c. If a hyphenated personal name is part of an organizational name, treat the hyphenated elements as a single unit. (See Rule 3.)

Name	Unit 1	Unit 2	Unit 3	Unit 4
Mary Tom Packaging Consultants	MARY	TOM	PACKAGING	CONSULTANTS
Mary Tom-Katz Production Company	MARY	TOMKATZ	PRODUCTION	COMPANY

- d. Consider a title in an organization's name as a separate unit in the order in which it occurs. Treat abbreviated titles as they are written and ignore punctuation.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Capt. Jack Seafood	CAPT	JACK	SEAFOOD	
Captain Ahab Tours	CAPTAIN	AHAB	TOURS	
Dr. Popper Vision Services	DR	POPPER	VISION	SERVICES
Ma Blake Food Shops	MA	BLAKE	FOOD	SHOPS
Miss Celeste Sports- wear	MISS	CELESTE	SPORTSWEAR	
Mother Goose Nurseries	MOTHER	GOOSE	NURSERIES	
Mr. George Limousines	MR	GEORGE	LIMOUSINES	
Mrs. Ellis Bakeries	MRS	ELLIS	BAKERIES	
Princess Diana Gowns	PRINCESS	DIANA	GOWNS	
Saint Ann Thrift Shop	SAINT*	ANN	THRIFT	SHOP

*When *Saint* is used as a title rather than as a prefix in a personal name, treat it as a separate unit. (See Rule 5b.)

Rule 8: Abbreviations, Acronyms, Symbols, and Letters in Organizational Names

- a. Treat an abbreviation as a single unit. Consider it exactly as it is written, and ignore any punctuation.

Name	Unit 1	Unit 2	Unit 3	Unit 4
AFL-CIO	AFLCIO			
ILGWU	ILGWU			
NAACP	NAACP			
Smyly Grain Corp.	SMYLY	GRAIN	CORP	
Smyly Industries Inc.	SMYLY	INDUSTRIES	INC	
Smyth Data Systems Co.	SMYTH	DATA	SYSTEMS	CO
Smyth Datafax Ltd.	SMYTH	DATAFAX	LTD	
U. S. Data Sources*	U	S	DATA	SOURCES
U S Datalink	U	S	DATALINK	
U. S. Grant Foundation	U	S	GRANT	FOUNDATION
U.S. Data Files	US	DATA	FILES	
US Data Tracers	US	DATA	TRACERS	

*For the treatment of an abbreviation consisting of spaced letters (such as *U. S.*), see Rule 8d.

- b.** Treat acronyms and the call letters of radio and TV stations as single units.

Name	Unit 1	Unit 2	Unit 3
ASCAP	ASCAP		
CARE	CARE		
EPCOT	EPCOT		
MADD	MADD		
NASDAQ	NASDAQ		
NOW	NOW		
OPEC	OPEC		
OSHA	OSHA		
UNESCO	UNESCO		
VISTA	VISTA		
WBBM Radio Station	WBBM	RADIO	STATION

NOTE: When organizations are better known by their abbreviated names (*AFL-CIO* and *NAACP*) or acronyms (*NOW* and *UNESCO*) than by their formal names, use these short forms for filing purposes and provide cross-references as necessary. (See also ¶¶520, 522. For an example of a cross-reference, see Rule 4c, note.)

- c.** When the symbol & occurs in a name, consider it as if it were spelled out (that is, as *and*). If the symbol is freestanding (that is, with space on either side), treat it as a separate filing unit.

Name	Unit 1	Unit 2	Unit 3	Unit 4
A & L Fabrics	A	AND	L	FABRICS
A&B Publications	AANDB	PUBLICATIONS		
Allen & Korn	ALLEN	AND	KORN	
AT&T	ATANDT			

- d.** Treat single letters as separate units. If two or more letters in a sequence are written solid or are connected by a hyphen or a slash, treat the sequence as a single unit.

Name	Unit 1	Unit 2	Unit 3	Unit 4
A & D Terminals	A	AND	D	TERMINALS
A D S Graphics	A	D	S	GRAPHICS
AAA	AAA			
A&D Printers Inc.	AANDD	PRINTERS	INC	
ADS Reports	ADS	REPORTS		
A/V Resources	AV	RESOURCES		
A-Z Rental Corp.	AZ	RENTAL	CORP	
Triple A Realty Trust	TRIPLE	A	REALTY	TRUST
W Z Leasing Co.	W	Z	LEASING	CO
W. Y. Yee (person's name)	YEE	W	Y	

Rule 9: Geographic Names Within Organizational Names

- a. Treat each part of a geographic name as a separate unit. However, treat hyphenated parts of a geographic name as a single unit.

Name	Unit 1	Unit 2	Unit 3	Unit 4
Big Sur Tours	<u>BIG</u>	SUR	TOURS	
Lake of the Woods				
Camping Store*	<u>LAKE</u>	OF	THE	WOODS
New Jersey Shore Rentals	<u>NEW</u>	JERSEY	SHORE	RENTALS
Puerto Rico Sugar Traders	<u>PUERTO</u>	RICO	SUGAR	TRADERS
United States Telecom	<u>UNITED</u>	STATES	TELECOM	
West New York Bedding	<u>WEST</u>	NEW	YORK	BEDDING
Wilkes-Barre Mills	<u>WILKESBARRE</u>	MILLS		

*The words *Camping* and *Store* represent the fifth and sixth filing units in this name.

- b. When a geographic name begins with a prefix followed by a space or hyphen, treat the prefix and the following word as a single unit. (See Rule 2 for lists of prefixes.)

Name	Unit 1	Unit 2	Unit 3
El Cajon Editorial Services	<u>ELCAJON</u>	EDITORIAL	SERVICES
La Crosse Graphics	<u>LACROSSE</u>	GRAPHICS	
Las Vegas Lenders	<u>LASVEGAS</u>	LENDERS	
Le Mans Auto Repairs	<u>LEMANS</u>	AUTO	REPAIRS
Los Angeles Film Distributors	<u>LOSANGELES</u>	FILM	DISTRIBUTORS
San Francisco Cable Systems	<u>SANFRANCISCO</u>	CABLE	SYSTEMS
Santa Fe Hotel Supplies	<u>SANTAFE</u>	HOTEL	SUPPLIES
Ste.-Julie Inn	<u>STEJULIE</u>	INN	
St. Louis Water Filters	<u>STLOUIS</u>	WATER	FILTERS

NOTE: A name like *De Kalb* or *Des Moines* is considered a single unit, whereas a name like *Fond du Lac* should be treated as three units (since the prefix *du* does not come at the beginning of the geographic name).

Rule 10: Numbers in Organizational Names

- a. Arabic numerals (1, 3, 5) and roman numerals (IV, XIX) are considered separate units. Treat ordinal numbers such as *1st*, *3d*, and *5th* as if they were written 1, 3, and 5.
- b. Units that contain arabic numerals precede units expressed as roman numerals and those consisting of letters of the alphabet (as shown in the chart at the top of page 15). Arrange the units containing arabic numerals in numeric order.

NOTE: For sequencing purposes most software programs will consider arabic numerals from the left. Given the arabic units in the chart below, a computer will place *1218* before *21* and *210*. To avoid this outcome, add zeros to the left of *21* and *210* to make them the same length as *1218*: *0021*, *0210*, *1218*. Then the software will sequence these units in the correct order.

Name	Unit 1	Unit 2	Unit 3	Unit 4
21st Century Travel	<u>21</u>	CENTURY	TRAVEL	
210th St. Assn.	<u>210</u>	ST	ASSN	
1218 Corp.	<u>1218</u>	CORP		
III Brothers Outlets	<u>III</u>	BROTHERS	OUTLETS	
The VII Hills Lodge	<u>VII</u>	HILLS	LODGE	THE
The IX Muses Bookshop	<u>IX</u>	MUSES	BOOKSHOP	THE
AAA Leasing Company	<u>AAA</u>	LEASING	COMPANY	
ILGWU Local 134	<u>ILGWU</u>	LOCAL	134	
ILGWU Local 145	<u>ILGWU</u>	LOCAL	145	
Seventh Heaven Vacations	<u>SEVENTH</u>	HEAVEN	VACATIONS	
Sixth Street Fashions	<u>SIXTH</u>	STREET	FASHIONS	

- c. Units that contain roman numerals follow those with arabic numerals but precede those consisting of letters of the alphabet (as shown above). Arrange units containing roman numerals in numeric order.

NOTE: For sequencing purposes, most software programs will consider roman numerals as letters of the alphabet and position them accordingly. If your software were sequencing the names shown above, the name beginning with *III* would fall between *AAA* and *ILGWU*. The name beginning with *VII* would come after *Sixth*. The name beginning with *IX* would fall between *ILGWU* and *Seventh*. To avoid having the roman numerals scattered in this way, you will have to override the program and move these names to the positions shown in the chart above.

- d. Units containing numbers expressed in words are sequenced (along with other units containing words or letters) in alphabetic order.
- e. When a number is written with a hyphen (*Seventy-Six*), ignore the hyphen and treat the number as a single unit (*SEVENTYSIX*).

Name	Unit 1	Unit 2	Unit 3	Unit 4
The Turtle Back Inn	<u>TURTLE</u>	BACK	INN	THE
Twelve Eighteen Realty Co.	<u>TWELVE</u>	EIGHTEEN	REALTY	CO
Twenty-Eight Benbow Street Studios	<u>TWENTYEIGHT</u>	BENBOW	STREET	STUDIOS
Twenty-Five Hundred Club	<u>TWENTYFIVE</u>	HUNDRED	CLUB	
The Warren 200 Colony	<u>WARREN</u>	<u>200</u>	COLONY	THE
The Warren House	<u>WARREN</u>	HOUSE	THE	
Warren Sixty-Fourth Street Salon	<u>WARREN</u>	<u>SIXTYFOURTH</u>	STREET	SALON

- f.** When a phrase consists of a number (in figures or words) linked by a hyphen or a slash to a letter or word (for example, *1-A*, *A-1*, *1-Hour*, *4/Way*, *One-Stop*), ignore the punctuation and treat the phrase as a single unit.
 - g.** When the phrase consists of a figure linked to another figure by means of a hyphen or a slash (for example, *80-20* or *50/50*), consider only the number that precedes the punctuation.
- NOTE:** Most software programs will consider the complete number as well as any punctuation.
- h.** When a phrase consists of a figure plus a letter or word (for example, *3M*) without any intervening space or punctuation, treat the phrase as a single unit.

Name	Unit 1	Unit 2	Unit 3	Unit 4
1-A Physical Trainers	<u>1A</u>	PHYSICAL	TRAINERS	
3 Pro Corp.	<u>3</u>	PRO	CORP	
3M	<u>3M</u>			
4X Investment Group	<u>4X</u>	INVESTMENT	GROUP	
5-10 Household Wares	<u>5</u>	HOUSEHOLD	WARES	
5 Star Video Arcade	<u>5</u>	STAR	VIDEO	ARCADE
5-Corners Pasta Dishes	<u>5CORNERS</u>	PASTA	DISHES	
7-Eleven Food Store	<u>7ELEVEN</u>	FOOD	STORE	
20/20 Eye Care	<u>20</u>	EYE	CARE	
The 30-45 Singles Club	<u>30</u>	SINGLES	CLUB	THE
A-1 Autos Inc.	<u>A1</u>	AUTOS	INC	
Adam's 10-Minute Pizza Service	<u>ADAMS</u>	10MINUTE	PIZZA	SERVICE
Adams' One-Hour Photos	<u>ADAMS</u>	ONEHOUR	PHOTOS	
Adam's One-Stop Shop	<u>ADAMS</u>	ONESTOP	SHOP	
The Fifty-Fifty Co-op	<u>FIFTYFIFTY</u>	COOP	THE	

- i.** When a symbol appears with a number, treat the two elements as a single unit only if there is no space between the symbol and the number. Consider the symbol as if it were spelled out; for example, *&* (*and*), *c* (*cent* or *cents*), *\$* (*dollar* or *dollars*), *#* (*number* or *pounds*), *%* (*percent*), and *+* (*plus*).

Name	Unit 1	Unit 2	Unit 3	Unit 4
The \$50 Outerwear Shop	<u>50DOLLAR*</u>	OUTERWEAR	SHOP	THE
50% Off Clothing Outlet	<u>50PERCENT</u>	OFF	CLOTHING	OUTLET
The 50+ Retirement Community	<u>50PLUS</u>	RETIREMENT	COMMUNITY	THE
The #1 Pizza Parlor	<u>NUMBER1</u>	PIZZA	PARLOR	THE
The Original 5&10	<u>ORIGINAL</u>	5AND10	THE	
Plaza 5 & 10	<u>PLAZA</u>	5	AND	10

*When a \$ sign precedes a number, consider the number and then *DOLLAR* (or *DOLLARS*) in that order.

NOTE: Most software programs will consider these symbols on the basis of where they occur in the sequence of character sets. If you convert the symbol to a spelled-out form as shown in the chart on the bottom of page 16, it will be sequenced in the correct alphabetic order.

Rule 11: Alphabetizing by Addresses

When two organizational names are otherwise identical, alphabetize them according to address.

- a. First alphabetize by city.
- b. If the city names are the same, consider the state. (For example, *Charleston, South Carolina*, comes before *Charleston, West Virginia*.)

Name	Unit 1	Unit 2	Unit 3	Unit 4
McDonald's Durango, Colorado	<u>MCDONALDS</u>	DURANGO	COLORADO	
McDonald's Springfield, Missouri	<u>MCDONALDS</u>	SPRINGFIELD	MISSOURI	
McDonald's Springfield, South Dakota	<u>MCDONALDS</u>	SPRINGFIELD	SOUTH	DAKOTA
McDonald's Torrington, Connecticut	<u>MCDONALDS</u>	TORRINGTON	CONNECTICUT	

- c. If both the city and the state are identical, alphabetize according to the street name.
- d. If the street name is a number, treat it exactly as written. Numbered street names expressed *in figures* precede street names (numbered or otherwise) expressed *in words*. Numbered street names expressed *in figures* are sequenced in numeric order. Numbered street names *in words* are sequenced (along with other street names in words) in alphabetic order.

Name	Unit 1	Unit 2	Unit 3	Unit 4
McDonald's 17th Street Tallahassee, Florida	<u>MCDONALDS</u>	TALLAHASSEE	17	STREET
McDonald's 41st Street Tallahassee, Florida	<u>MCDONALDS</u>	TALLAHASSEE	41	STREET
McDonald's Appleyard Drive Tallahassee, Florida	<u>MCDONALDS</u>	TALLAHASSEE	APPLEYARD	DRIVE
McDonald's Third Avenue Tallahassee, Florida	<u>MCDONALDS</u>	TALLAHASSEE	THIRD	AVENUE

- e. If the street names are also the same, alphabetize by direction if the direction is part of the address (for example, *north*, *south*, *northeast*, *southwest*).

Name	Unit 1	Unit 2	Unit 3	Unit 4	Unit 5
McDonald's N. 16th Street Tallahassee, Florida	MCDONALDS	TALLAHASSEE	N	16	STREET
McDonald's S. 16th Street Tallahassee, Florida	MCDONALDS	TALLAHASSEE	S	16	STREET
McDonald's Swan Avenue East Tallahassee, Florida	MCDONALDS	TALLAHASSEE	SWAN	AVENUE	EAST
McDonald's Swan Avenue West Tallahassee, Florida	MCDONALDS	TALLAHASSEE	SWAN	AVENUE	WEST

- f. If all the foregoing units are identical, consider the house or building numbers and sequence them in numeric order.

Name	Unit 1	Unit 2	Unit 3	Unit 4	Unit 5
McDonald's 110 Park Avenue Tallahassee, Florida	MCDONALDS	TALLAHASSEE	PARK	AVENUE	110
McDonald's 638 Park Avenue Tallahassee, Florida	MCDONALDS	TALLAHASSEE	PARK	AVENUE	638
McDonald's 23 Tier Street Tallahassee, Florida	MCDONALDS	TALLAHASSEE	TIER	STREET	23
McDonald's 870 Tier Street Tallahassee, Florida	MCDONALDS	TALLAHASSEE	TIER	STREET	870

Government Names

Rule 12: Federal Government Names

- a. For any organization that is part of the federal government, consider *United States Government* as the first three units.
- b. If necessary, consider the name of the department, transposing *Department of* to the end. (For example, treat *Department of Labor* as three separate units: *LABOR DEPARTMENT OF*.)
- c. Next consider the name of the office or bureau within the department. Transpose opening phrases such as *Office of* and *Bureau of* to the end. (For example, treat *Bureau of Labor Statistics* as four separate units: *LABOR STATISTICS BUREAU OF*.)

NOTE: It is permissible to omit the names of departments (as is done in the following examples) and move directly from *United States Government* to the name of the office or bureau.

Name	Unit 4*	Unit 5	Unit 6	Unit 7
Office of Consumer Affairs	<u>CONSUMER</u>	AFFAIRS	OFFICE	OF
Federal Bureau of Investigation	<u>FEDERAL</u>	BUREAU	OF	INVESTIGATION
Food and Drug Administration	<u>FOOD</u>	AND	DRUG	ADMINISTRATION
General Accounting Office	<u>GENERAL</u>	ACCOUNTING	OFFICE	
National Labor Relations Board	<u>NATIONAL</u>	LABOR	RELATIONS	BOARD
National Park Service	<u>NATIONAL</u>	PARK	SERVICE	

*The first three units are *United States Government*.

Rule 13: State and Local Government Names

- For any organization (except an educational institution) that is part of a state, county, city, or town government, first consider the distinctive place name (for example, *Idaho* or *Sandpoint*).
- Then consider the name of the department, bureau, or other subdivision, transposing elements (if necessary) as was done with federal departments and bureaus in Rule 12.

NOTE: Do not add *state*, *city*, or a similar term after the distinctive place name unless it is necessary to distinguish such names as *New York State*, *New York County*, and *New York City*. Moreover, do not add *of*, *of the*, or a similar expression unless it is part of the official name.

Name	Unit 1	Unit 2	Unit 3	Unit 4	Unit 5
Illinois State Board of Education	<u>ILLINOIS</u>	STATE	EDUCATION	BOARD	OF
Iowa Division of Labor	<u>IOWA</u>	LABOR	DIVISION	OF	
Water Commission, City of Yuma	<u>YUMA</u>	CITY	OF	WATER	COMMISSION
Registry of Deeds, Yuma County	<u>YUMA</u>	COUNTY	DEEDS	REGISTRY	OF

APPENDIX D

Glossary of Computer Terms

As computer technology continues to change, a new vocabulary continues to evolve. The following glossary provides brief definitions of the key terms and concepts that are part of this vocabulary.

The sources I consulted to update this glossary for the eleventh edition of *The Gregg Reference Manual* include *Webster's New World Computer Dictionary*, 10th ed., Wiley, New York, 2003, and *Microsoft Computer Dictionary*, 5th ed., Redmond, Wash., 2002.

William A. Sabin

NOTE: When boldface type is used to highlight a word or phrase within a definition, it signifies that the highlighted word or phrase is defined elsewhere in this glossary.

► See ¶544 for a list of common computer abbreviations.

Access. To call up information out of **storage**.

Random access. A technique that permits stored information to be directly retrieved, regardless of its location on the storage medium.

Sequential access. A technique for retrieving stored information that requires a sequential search through one item after another on the storage medium.

Access time. The amount of time it takes for requested information to be delivered from **disks** and **memory**.

Active matrix display. A type of **monitor** typically used on **laptop** or portable **computers**; provides a brighter, more readable display than older **LCD** equipment.

Adapter. A **circuit board** that plugs into a **computer** and gives it additional capabilities. (See also *Circuit board*.)

AI. See *Artificial intelligence*.

Algorithm. A step-by-step procedure designed to solve a problem or achieve an objective.

Alpha testing. First-stage testing of **computer** products, typically done in house by the developer. (See also *Beta testing; Gamma testing*.)

Alphanumeric. Consisting of letters, numbers, and symbols.

Antivirus software. A **program** designed to look for and destroy **viruses** that may infect the **memory** of a **computer** or **files** stored on a **computer**.

Applet. A small **application**, that is, a **program** designed to perform a simple task. An applet is usually embedded within a larger program or **downloaded** from the **Internet** when needed.

Application (or app). A **program** designed to perform **information processing** tasks for a specific purpose or activity (for example, **desktop publishing** and **database management**). (See also *Applet; Killer app*.)

Archive. A file compressed for more efficient use of storage space. The compression of files may be accomplished by means of such **programs** as StuffIt.

Artificial intelligence (AI). Computer systems that attempt to imitate human processes for analyzing and solving problems.

Ascending sort. Sorting records from A to Z or 0 to 9. (See also *Descending sort*.)

ASCII (pronounced as-kee). An acronym derived from American Standard Code for Information Interchange. ASCII is a standard 7-bit code that represents 128 **characters**. The use of this standard code permits **computers** made by different manufacturers to communicate with one another.

B, b. B is the abbreviation of **byte**; **b** is the abbreviation of **bit**.

Background printing. The ability of a **computer** to print a **document** while other work is being done on the **keyboard** and the **display screen** at the same time.

Backup. Storage of duplicate **files** on **disks**, **diskettes**, or some other form of magnetic medium (such as tapes) as a safety measure in case the original medium is damaged or lost. (One word as a noun or an adjective: *backup* procedures; two words as a verb: *back up* your hard disk.)

Bacn. An **e-mail** message that might be considered **spam** except for the fact that the recipient has elected to receive it. Bacn (pronounced *bacon*) has been described as “e-mail you want but not right now.” Newsletters, alerts, and automated reminders are considered examples of bacn.

Bandwidth. The volume of information that a network can handle (usually expressed in bits per second). The greater the bandwidth, the more quickly **data** can be **downloaded** from the **Internet** or moved from a **network** to a user’s **computer**. The term *bandwidth* is now also used to refer to a person’s attention span (as in “Burt is a low-bandwidth kind of guy”) or a person’s ability to handle an assignment (as in “Sally lacks the bandwidth to do this job”). The question “How’s your bandwidth?” means “Are you busy?”

Basic Input/Output System (BIOS). A set of **programs** stored in read-only **memory** (ROM) on IBM or IBM-compatible **computers**. These programs control the **disk drives**, the **keyboard**, and the **display screen**, and they handle start-up operations.

BBS. See *Bulletin board system*.

Beta testing. Second-stage testing of **computer** products, typically done by potential customers and outside experts to identify problems that need to be fixed before the product can be released for sale. (See also *Alpha testing; Gamma Testing*.)

Binary code. The language used by **computers** in which **data** and instructions are represented by a series of 1s and 0s.

Binary numbering system. A numbering system in which all numbers are represented by various combinations of the digits 0 and 1.

BIOS. See *Basic Input/Output System*.

Bit (b). An acronym derived from binary digit. The smallest unit of information that can be recognized by a **computer**. Bits are combined to represent **characters**. (See also *Byte*.)

Bitmap. A method of storing a graphic image as a set of **bits** in a computer’s **memory**. To display the image on the screen, the **computer** converts the bits into **pixels**.

Bits per second (bps). A measurement that describes the speed of **data** transmission between two pieces of equipment. (See also *Transfer rate*.)

BlackBerry. A wireless **palmtop computer** that is especially helpful to business travelers. It permits users to send and receive e-mail and view other documents that they have on file. (See also *Wi-Fi*.)

Blawg. See *Blog*.

Boatware. A **program** that uses an excessive amount of **disk** space and **memory**.

Block. A segment of **text** that is selected so that it can be moved to another location or processed in some other way. (See also *Block delete*; *Block move*; *Cut and paste*.)

Block delete. A **command** to delete (or erase) a segment of **text**.

Block move. A **command** to reproduce a segment of **text** in another place and at the same time erase it from its original position. (See also *Cut and paste*.)

Block protect. A **command** to prevent a **page break** from occurring within a block of **text** (for example, a table). (See also *Orphan protection*; *Widow protection*.)

Blog. A *blog* (short for *Web log*) is an online diary in which an individual records and publishes his or her thoughts on one or more subjects. A blog devoted to legal matters is known as a *blawg*.

Blogger. Someone who creates and maintains an online diary.

Blogosphere. The complete set of **blogs** on the Internet.

Book. A *book* is a **blog** that has been turned into a book or an online book that is published on a blog.

Bluetooth. A **protocol** that permits a wireless exchange of information between **computers**, cell phones, and other electronic devices within a radius of about 30 feet.

Board. See *Circuit board*.

Boilerplate. Standard wording (for example, sentences or paragraphs in form letters or clauses in legal documents) that is held in **storage**. When needed, it can be used as is, with minor modification, or in combination with new material to produce tailor-made **documents**.

Bookmark list. See *Favorites*.

Boot (short for bootstrap). To start a **computer** and load the **operating system** to prepare the computer to **execute** an **application**.

Bozo filter. A **program** that screens out unwanted **e-mail** or other messages from individuals or organizations you no longer want to hear from.

bps. See *Bits per second*.

Bricks-and-clicks. Refers to a traditional business with a Web site. (See also *Clicks-to-bricks*.)

Bricks-and-mortar. Refers to a traditional business that sells merchandise only in stores. (See also *Clicks-and-mortar*.)

Brochureware. A product that is being actively marketed, even though the product is not yet (and may never be) ready for sale. (See also *Vaporware*.)

Browser. See *Web browser*.

B2B. Business-to-business (online transactions).

B2C. Business-to-consumer (online transactions).

B2G. Business-to-government (online transactions).

Buffer. A holding area in **memory** that stores information temporarily. Also called *cache*.

Bug. A **software** defect that causes a **program** to malfunction or cease to operate. Some writers now use *bug* to refer to **hardware** problems as well. (See also *Debugging; Glitch*.)

Bulletin board system (BBS). An **online** information system, usually set up by an individual (called a *system operator*, or **SYSOP**) on a nonprofit basis for the enjoyment of other individuals with similar interests. (See also *Internet*.)

Bundled software. **Software** that is sold along with a **computer** system; several software **programs** that are packaged together (also called *software suites*).

Burn. To record information on a disc such as a **CD-R**, a **CD-RW**, a **DVD-R**, or a **DVD-RW**.

Bus. A pathway along which electronic signals travel between the components of a **computer** system.

Button bar. See *Toolbar*.

Byte (B). An acronym for binary term. The sequence of **bits** that represents a **character**. Each byte has 8 bits.

Cache. See *Buffer*.

Cancelbot (from cancel robot). A **program** that detects **spamming** in **newsgroups** and automatically issues a cancel **command**. (See also *Ham*.)

Card. See *Circuit board; Adapter*.

Carpal tunnel syndrome. A wrist or hand injury caused by using a **keyboard** for long periods of time. A type of repetitive strain injury (**RSI**). (See also *Mouse elbow*.)

Cathode-ray tube (CRT). See *Display screen*.

CD-R. Compact disc-recordable.

CD-ROM (pronounced cee-dee-rom). An acronym derived from compact disc-read-only memory. A form of optical **storage**. One compact **disc** can hold up to 250,000 text pages; it can also be used to store **graphics**, sound, and video. (See also *DVD-ROM*.)

CD-RW. Compact disc-rewritable.

Cell. A box or rectangle within a table or **spreadsheet** where a **column** and a **row** intersect; an area in which information can be entered in the form of **text** or figures.

Central processing unit (CPU). The brains of an **information processing** system; the processing component that controls the interpretation and execution of instructions. (See also *Motherboard*.)

Character. A single letter, figure, punctuation mark, or symbol produced by a **keystroke** on a **computer**. Each character is represented by a **byte**.

Character set. The complete set of **characters**—alphabetic, numeric, and symbolic—displayable on a **computer**. (see also *ASCII*.)

Character string. A specified sequence of typed **characters**, usually representing a word or phrase. A character string is often used to locate a particular word or phrase wherever it appears in a **document** so that it can be automatically replaced with another word or phrase. If a person's name has been consistently misspelled or a date appears incorrectly in several places, the error can be easily corrected. (See also *Search and replace*.)

Characters per inch (cpi). The number of **characters** in a **fixed-pitch font** that will fit within 1 inch.

Characters per second (cps). The number of **characters** printed in 1 second; a measurement frequently used to describe the speed of a **printer**.

Chat. A method of communication in which people type text messages to each other, thereby holding a conversation over a **network** such as the **Internet**. (See also *Newsgroup*.)

Check box. A small box that appears onscreen alongside each option displayed in a **dialog box**. When an option is selected, an **X** or a check mark appears inside the box.

Chip. An **integrated circuit** used in **computers**.

Chip jewelry. An obsolete **computer**.

Circuit board. A board or card that carries the necessary electronic components for a particular **computer** function (for example, **memory**). The circuit boards that come with the original equipment perform the standard functions identified with that type of equipment. Additional circuit boards expand the kinds of functions that the equipment can perform. Also called a *board*, a *card*, or an *expansion board*.

Clear. A **command** to erase information.

Click. To quickly press and release a **mouse** button *once* while the **cursor** (mouse pointer) is positioned over a specific item on the screen. (See also *Double-click*.)

Clicks-and-mortar. Refers to a business that sells merchandise online as well as in stores. (See also *Bricks-and-mortar*.)

Clicks-to-bricks. Refers to an **Internet** company that opens stores. (See also *Bricks-and-clicks*.)

Client/server computing. A **network of computers** that consists of a file server (a computer that runs a **database management system**) and individual clients (computers that request and process **data** obtained from the file server).

Clipboard. A holding area in **memory** where information that has been copied or **cut** (**text**, **graphics**, sound, or video) can be stored until the information is inserted elsewhere. (See also *Copy*; *Cut*; *Cut and paste*.)

Column. A vertical block of **cells** in a table or **spreadsheet**. (See also *Row*.)

Command. An instruction that causes a **program** or **computer** to perform a function. A command may be given by means of a special **keystroke** (or series of keystrokes), or the command may be chosen from a **menu**.

Commercial online service. See *Internet service provider*.

Compatibility. The ability of one type of **computer**, device, data file, or **program** to share information or to communicate with another. (See also *ASCII*.)

Computer. An electronic device that is capable of (1) accepting, storing, and logically manipulating **data** or **text** that is **input** and (2) processing and producing **output** (results or decisions) on the basis of stored

programs of instructions. Some computers are also capable of processing **graphics**, video, and voice input. Most computers include a **keyboard** for **text entry**, a **central processing unit**, one or more **disk drives**, a **display screen**, and a **printer**—components referred to as **hardware**.

Control menu. An onscreen Windows element that appears in a box in the upper left corner of a **window**. The control menu allows the user the option of adjusting the size of the window, closing or reopening the window, or switching to another window.

Cookie. A small text **file** that a Web **server** stores on a user's hard drive when the user visits certain **Web sites**. A cookie contains all the information that a user has to submit on a first visit to a particular Web site in order to gain access. When a user revisits that Web site, the cookie makes it unnecessary for the user to enter the same information all over again. The positive aspect of cookies is that they make it possible for users to take advantage of the convenient "shopping cart" feature of many Web sites. Unfortunately, cookies also make it possible for marketing organizations to monitor users' browsing patterns; users then find themselves the targets of custom-tailored marketing campaigns.

Copy. To reproduce information elsewhere. The original information remains in place. (See also *Cut*.)

cpi. See *Characters per inch*.

cps. See *Characters per second*.

CPU. See *Central processing unit*.

Cracker. The preferred term (rather than **hacker**) used to refer to a **computer** criminal who penetrates a computer to steal information or damage the program in some way.

Crash. A malfunction in **hardware** or **software** that keeps a **computer** from functioning. (See also *Bug*; *Glitch*.)

CRT. Cathode-ray tube. (See also *Display screen*.)

Cursor. A special **character** (usually a blinking underline, dot, or vertical line) that indicates where the next typed character will appear on the **display screen**. Also known as the **mouse** pointer (arrow) or **I-beam pointer**. Microsoft Word refers to the cursor as the *insertion point*. (See also *Prompt*.)

Cursor positioning. The movement of the **cursor** on the **display screen**. Most **computers** have four keys to control up, down, left, and right movement. Many computers also permit the use of a **mouse** to position the cursor.

Cut. To remove **text** from its original location and place it on a **clipboard**. (See also *Copy*; *Paste*.)

Cut and paste. To move a **block** of **text** from one place to another.

Cyberspace. A realistic simulation of a three-dimensional world created by a **computer** system; also referred to as *virtual reality*. Now commonly used to refer to the world of the **Internet** as a whole.

Cybersquatting. Registering a potentially valuable Internet address in the hope of selling it at a profit later on to an organization for which this address would be ideal.

Cybrarian. The electronic equivalent of a librarian. A person who makes a career of **online** research and **data** retrieval.

Data. Information consisting of letters, numbers, symbols, sound, or images—in a form that can be processed by a **computer**.

Data compression. A procedure for reducing the volume of **data** so as to shorten the time needed to transfer the data or to reduce the amount of space needed to store the data.

Database. A stored collection of information.

Database management system (DBMS). The **software** needed to establish and maintain a **database** and manage the stored information.

DDE. See *Dynamic data exchange*.

Dead-tree edition. The paper version of a publication available **online**.

Debugging. Locating and eliminating defects in a **program**. (See also *Bug*.)

Decimal tab. A type of tab that aligns **columns** of figures on the decimal point.

Default settings. The preestablished settings (for margins, **font**, type size, tab stops, and so on) that a **program** will follow unless the user changes them.

Delete. A **command** to erase information in **storage**.

Denial of service (DoS) attack. A malicious act intended to shut down a **Web site** or a **network** by flooding it with too much information. Users who attempt to visit the site will be denied access.

Descending sort. Sorting records from Z to A or 9 to 0. (See also *Ascending sort*.)

Desktop. The electronic work area on a **display screen**.

Desktop computer. A **microcomputer** that is bigger than a **laptop**.

Desktop publishing (DTP). A system that processes the **text** and **graphics** and, by means of page layout **software** and a **laser printer**, produces high-quality pages suitable for printing or in-house reproduction.

Dialog box. A message box on the **screen** that supplies information to—or requests information from—the user.

Dictionary. A **program** used to check the spelling of each word entered in the **computer**.

Digerati. A term referring to the elite group of intellectuals in the computer world (in the same way that *literati* refers to the elite group of intellectuals in the literary world).

Directory. A list of the **files** stored on a **disk**.

Disc. A nonmagnetic **storage** medium that is used in conjunction with optical technology. (See also *CD-ROM*.)

Disk. A random-access, magnetically coated **storage** medium used to **store** and **retrieve** information. (See also *Diskette; Hard disk*.)

Disk drive. The component of a **computer** into which a **disk** is inserted so that it can be read or written on.

Disk operating system. See *DOS*.

Diskette. A small, nonrigid **disk** with limited **storage** capacity. Also known as a *floppy disk*.

Display screen. A device similar to a television screen and used on a **computer** to display **text** and **graphics**. Also called a *video display terminal (VDT)* or a *monitor*.

Distributed processing system. A form of a **local area network** in which each user has a fully functional **computer** but all users can share **data** and **application software**. The data and software are distributed among the linked computers and not stored in one central computer.

DNS. Domain name system.

Document. Any printed business communication—for example, a letter, memo, report, table, or form. (See also *File*.)

Documentation. The manuals or guides distributed with hardware or software.

Domain. Typically, a three-letter element in a Web address or an **e-mail** address. The domain—commonly referred to as the *zone*—indicates the type of organization that owns the **computer** being identified in the address. For example, *.com* signifies a commercial organization; *.edu* signifies an educational institution. (See ¶1508b for a list of the most common domains.)

DOS (pronounced dahs or doss). An acronym derived from disk operating system. The term refers to a **program** that allows the **computer** to manage the **storage** of information on **disks** and controls other aspects of a computer's operation.

DoS (pronounced dee-oh-ess). See *Denial of service attack*. (Note the differences in spelling and pronunciation between DOS and DoS.)

Dot. The period symbol used in **e-mail** and Web addresses. Always referred to as a *dot* (never as a period). Thus the **domain name** *aol.com* would be pronounced *ay-oh-ell-dot-com*. **Internet** surfers who spend a lot of time in the *.com* domain are sometimes referred to as *dot communists*.

Dot-com. An organization that sells its products or services on a **Web site** (with a URL ending in *.com*). A dot-com that fails to stay in business is referred to as a *dot-bomb*.

Dot matrix printer. A **printer** that uses pins to produce **characters** made up of small dots. This kind of printer is generally used by organizations that want to produce form letters or mailing labels economically.

Double-click. To quickly press and release a **mouse** button *twice* while the **cursor** (mouse pointer) is positioned over a specific item on the **screen**. (See also *Click*.) The expression “Double-click on that” means “That’s really quite good.”

Download. To transfer information to the user’s **computer** from another computer.

Drag-and-drop editing. A **software** feature that allows the user to (1) highlight **text** to be moved and (2) use a **mouse** to drag the text to a new location.

DRAM. Dynamic random access memory.

Drop-down menu. See *Menu*.

DSL. Digital subscriber line. DSL is a high-**bandwidth** method of connecting to the **Internet** by means of telephone lines.

DTP. See *Desktop publishing*.

Duplexing. A procedure that permits two **computers** to transmit **data** to each other simultaneously.

DVD. Digital video disc or digital versatile disc.

DVD-E. Digital video disc-erasable.

DVD-R. Digital video disc-recordable.

DVD-RAM. Digital video disc-random-access memory.

DVD-ROM. Digital video disc-read-only memory.

DVD-RW. Digital video disc-read/write.

Dynamic data exchange (DDE). A technology that permits the user to transfer or **paste data** from one **application** (for example, a **spreadsheet**) to another (for example, a report). Because of the dynamic link created by this technology, any change in the data in the original application will be automatically reflected in the data copied in the second application. (See also *Object linking and embedding*.)

Easter egg. An unexpected image or message that pops up on the **display screen** when the user innocently enters a secret combination of **keystrokes**. Programmers playfully code Easter eggs into **software** and **operating systems** as a way of surprising and amusing users engaged in more serious tasks.

E-book. A small reading device that displays **downloaded** digital text.

Editing. The process of changing information by inserting, deleting, replacing, rearranging, and reformatting. Also known as *changing* or *customizing*.

Ellipsis marks. Three spaced dots (. . .) that appear as part of a **menu** option. Ellipsis marks indicate that a **dialog box** will appear if that option is selected.

E-mail (short for electronic mail). The term *e-mail* refers to the transfer of messages or **documents** between users connected by an electronic **network**. The term is also used to refer to the message that is being transmitted in this way. The original form—*E-mail*—is rarely seen except at the beginning of a sentence, and industry professionals now commonly write the word without a hyphen—*email*. One wit has suggested replacing the term *e-mail* with *e-pistle*.

Emoticon. See *Smiley*.

Encryption. Coding confidential **data** so that only a user with the right **password** can read the data.

Enter. To **input data** into **memory**. (See also *Type*.) Also the name of a key on a **computer keyboard**.

Escape key. A key that permits the user to leave one segment of a **program** and move to another.

Ethernet. A type of **computer network**.

Ethernet card. A **circuit board** that allows a **computer** to be connected to a **network** by cable.

Execute. To perform an action specified by the user or the **program**.

Expansion board. See *Circuit board*.

Expert system. See *Artificial intelligence*.

Export. To save information from one **computer** or **program** to another.

Extranet. A technology that permits users of one organization's **intranet** to enter portions of another organization's intranet in order to conduct business transactions or collaborate on joint projects.

E-zine. A magazine published in an electronic format. Also called *Webzine*.

Face time. Time spent dealing with someone face to face (as opposed to time spent communicating electronically). Sometimes referred to as *facemail*. (See also *f2f*.)

FAQ. Frequently asked question. Pronounced as a word (to rhyme with *pack*) or as separate letters.

Favorites. A customized list of a user's favorite **Web sites** that permits the user to access a particular Web site with a single **command**. Also referred to as a *bookmark list* or a *hot list*.

Fax (n.). A shortened form of the word *facsimile*. A copy of a **document** transmitted electronically from one machine to another.

Fax (v.). To transmit a copy of a **document** electronically.

Fax modem. A device built into or attached to a **computer** that serves as a facsimile machine and a **modem**.

Field. A group of related **characters** treated as a unit (such as a name); also, the area reserved for the entry of a specified piece of information.

File. A collection of information stored electronically and treated as a unit by a **computer**. Every file must have its own distinctive name. (See also *File name*.)

File name. The name assigned to a **file** stored on a **disk**.

File transfer protocol (FTP). A set of guidelines or standards that establish the **format** in which **files** can be transmitted from one **computer** to another.

Firewall. A security system usually consisting of **hardware** and **software** that prevents unauthorized persons from accessing certain parts of a **program**, **database**, or **network**.

Fixed-pitch font. A **typeface** such as Courier in which each **character** has exactly the same **width** (like this). Also referred to as a *monospace font*.

Flame (n.). An inflammatory **e-mail** message; one deliberately designed to insult and provoke the recipient. (See also *Rave*.)

Flame (v.). To send an inflammatory message.

Flat-panel display. A type of **desktop computer** monitor that consists of an **LCD** in a thin case. A flat-panel display has a much smaller **footprint** than the traditional **CRT**.

Floppy disk. See *Diskette*.

Folder. A **storage** area on a **disk** used to organize **files**.

Font. A **typeface** of a certain size and style. Includes all letters of the alphabet, figures, symbols, and punctuation marks. (See also *Monospace font*; *Proportional font*; ¶1305d for samples.)

Footer. Repetitive information that appears at the bottom (the foot) of every page of a **document**. A page number is a common footer. (See also *Header*.)

Footnote feature. The ability of a **program** to automatically position footnotes on the same page as the text they refer to. If the text is moved to another page, any related footnotes will also be transferred to that page.

Footprint. The amount of space a **computer** occupies on a flat surface.

Forelash. Negative reactions to a technology not yet in existence but excessively promoted in advance.

Format. The physical specifications that affect the appearance and arrangement of a **document**—for example, margins, spacing, and **font**.

Forms mode. The ability of a **program** to store the **format** of a blank **document** or form so that it can later be viewed on the **display screen** and completed by the user. Once a fill-in has been entered, the **cursor** automatically advances to the beginning of the next area to be filled in. (See also *Style sheet*; *Template*.)

Forum. See *Newsgroup*.

Freenet. A local **network** that offers free (or low-cost) **access** to **host computers** located in libraries and to other public-interest groups in the community. A freenet may also offer limited access to the **Internet**.

Freeware. Copyrighted **software** that is available for use without charge. (See also *Shareware*.)

f2f. Communicating face to face.

FTP. See *File transfer protocol*.

Function keys. Keys on a **keyboard** (for example, F1) that give special **commands** to the **computer**—for example, to set margins or tabs.

G or GB. See *Gigabyte*.

Gamma testing. Third-stage testing of **computer** products, typically done just before the products are released for sale. (See also *Alpha testing; Beta testing*.)

Gateway. A machine that links two **networks** using different **protocols**.

Gigabyte. A measurement of the **storage** capacity of a device. One gigabyte represents 1024 **megabytes**. This term may be abbreviated as *G* or *GB*; however, *GB* is the clearer abbreviation since *G* also stands for the metric prefix *giga* (meaning 1 billion). A gigabyte is often referred to as a “gig.”

Gigahertz (GHz). A measurement used to identify the speed of the **central processing unit**. One gigahertz is equal to 1 billion cycles per second.

GIGO. Garbage in, garbage out. In other words, your **computer output** is only as good as your computer **input**.

Glitch. A **hardware** problem that causes a **computer** to malfunction or **crash**. (See *Bug*.)

Global. Describing any function that can be performed on an entire **document** without requiring individual **commands** for each use. For example, a global **search-and-replace** command will instruct the **computer** to locate a particular word or phrase and replace it with a different word or phrase wherever the original form occurs in the document.

Gopher. A **protocol** used for locating and transferring information on the **Internet**. The use of Gopher has diminished as the Web’s **hypertext transfer protocol (HTTP)** has become the dominant protocol.

Graphical user interface (GUI). A visual computer environment that permits the user to **click** on **icons** or select options from a **menu**.

Graphics. Pictures or images presented or stored using a **computer**.

Grok. To research and comprehend something in great detail and great depth.

Groupware. Software that lets **network** users collaborate on a variety of **documents**.

GUI (pronounced goo-ee). See *Graphical user interface*.

Hack. To work on an electronic project.

Hacker. A dedicated **computer** programmer. The term *hacker* is sometimes used erroneously to refer to a computer criminal who penetrates and tampers with computer **programs** or systems. The preferred term for a computer criminal is **cracker**.

Ham. A legitimate **e-mail** message that is blocked because it contains one or more **keywords** associated with **spam** messages.

Handheld computer. A portable computer smaller than a **notebook computer**. Also called a **palmtop computer**.

Hard copy. Text or **graphics** printed on paper; also called a **printout**. (See also *Soft copy*.)

Hard disk. A rigid type of magnetic medium that can store large amounts of information.

Hard hyphen. A hyphen that is a permanent **character** in a word. A word that contains a hard hyphen will not be divided at this point if the word comes at the end of a line. (See also *Soft hyphen*.)

Hard page break. A page-ending code or **command** inserted by the user that cannot be changed by the **program**. A hard page break is often used (1) to prevent a table from being divided between two pages and (2) to signify that a particular section of a **document** has ended and the following **text** should start on a new page.

Hard return. A **command** used to end a paragraph, end a short line of **text**, or insert a blank line in the text. (See also *Soft return*.)

Hard space. A space inserted between words in a phrase that should remain together (for example, the word *page* and the number, month and day, number and unit of measure). The hard space ensures that the phrase will not be broken at the end of a line.

Hardware. The physical components of a **computer**: the **central processing unit**, the **display screen**, the **keyboard**, the **disk drive**, the **modem**, the **mouse**, and the **printer**. (See also *Software*.)

Hardwired. Describes something physically built into a system using hardware, instead of being accomplished by programming.

Header. Repetitive information that appears at the top (the head) of every page of a **document**. A page number is a common header. (See also *Footer*.)

Hit. A single request for information made by a client **computer** from a Web **server**. The popularity of a given **Web site** is often measured by the number of hits it receives. However, this number can be extremely misleading, since a particular Web page may contain a number of elements, each one of which will be counted as a hit when a visitor opens that page. Thus the number of hits recorded for a particular Web page can be significantly greater than the actual number of visitors to that page.

Home. The upper left corner of the **display screen**; the starting position of a page or **document**.

Home page. The main page for a **Web site** established by an organization or an individual; it usually serves as the entrance for a series of related pages.

Host computer. A **computer** that provides information or a service to other computers on the **Internet**. Every host computer has its own unique host name.

Hot key. A **keyboard** shortcut that allows quick access to a **command** or **menu** option.

Hot list. See *Favorites*.

HTML. See *Hypertext markup language*.

HTTP. See *Hypertext transfer protocol*.

Hyperlink. An element in a **hypertext document** that is highlighted by means of underlining or the use of a different color. When a user clicks the highlighted element, the user is connected with another element in the same document or another document.

Hypermedia. An extension of **hypertext** that integrates audio, video, and **graphics** with **text**.

Hypertext. A technology that links **text** in one part of a **document** with related text in another part of the document or in other documents. A user can quickly find the related text by clicking on the appropriate **keyword**, key phrase, **icon**, or button.

Hypertext markup language (HTML). The formatting language used to establish the appearance of a Web page.

Hypertext transfer protocol (HTTP). The **protocol** used on the **World Wide Web** that permits Web clients (**Web browsers**) to communicate with Web **servers**. This protocol allows programmers to embed **hyperlinks** in Web documents, using **hypertext markup language**.

Hyphenation. The ability of a **program** to automatically hyphenate and divide words that do not fit at the end of a line. If the **text** is later revised so that the divided word no longer begins at the right margin, the hyphen is automatically removed and the word prints solid. (See also *Soft hyphen*.)

I-beam pointer. A **mouse-** or **keyboard-** controlled **cursor** that looks like a capital I.

Icon. A symbol (such as a picture of a trash can or a file folder) that represents a certain function. When the user **clicks** on the icon, the appropriate function is **executed**. (See also *Graphical user interface*.)

ICQ (from I seek you). An instant messaging service.

IM. See *Instant messaging*.

Import. To **retrieve** any **text** or other information created by one **program** (for example, images created by a **graphics** program) and transfer it to another program (for example, a **spreadsheet** program).

Indexing. The ability of a **program** to accumulate a list of words or phrases that appear in a **document** (along with their corresponding page numbers) and to print or display the list in alphabetic order.

Information processing. The coordination of people, equipment, and procedures to handle information, including the **storage**, **retrieval**, distribution, and communication of information. The term *information processing* embraces the entire field of processing words, figures, **graphics**, video, and voice **input** by electronic means.

Information Superhighway (or I-way). The **Internet**. Also referred to as the *Infobahn* (based on the German term for its network of highways, the *Autobahn*).

Ink-jet printer. A nonimpact **printer** that forms **characters** by spraying tiny, electrically charged ink droplets on paper.

Input (n.). Information entered into the **computer** for processing.

Input (v.). To **enter** information into the **computer**. (See also *Type; Key*.)

Input device. A **hardware** component (such as a **mouse**, a **keyboard**, or a microphone) that lets the user **input** information.

Insert. To add information to **a file**.

Insertion point. See *Cursor*.

Instant messaging (IM). A **chat** program that lets people communicate over the **Internet** in real time.

Integrated circuit. Multiple electronic components combined on a tiny silicon **chip**. (See also *Microprocessor*.)

Integrated software. Software that combines in one **program** a number of functions normally performed by separate programs.

Interface. The electrical connection that links two pieces of equipment so that they can communicate with each other. Also, the **software** that controls the interaction between the **hardware** and the user.

Internesia. Forgetting where one obtained a piece of information on the **Internet**.

Internet (or Net). A system that links existing **computer networks** into a worldwide network. The Internet may be accessed by means of commercial online services (such as America Online) and **Internet service providers**.

Internet community. A group of individuals with common interests who frequently exchange ideas on the Internet.

Internet protocol (IP) address. A unique set of numbers that identifies a **computer** over a **network**.

Internet service provider (ISP). An organization that provides access to the **Internet** for a fee. Companies like America Online are more properly referred to as *commercial online services* because they offer many other services in addition to Internet access—for example, news, travel services, and financial and shopping information.

Internet telephony. Another name for **Voice over Internet Protocol (VoIP)**.

Intranet. A private **network** established by an organization for the exclusive use of its employees. **Firewalls** prevent outsiders from gaining access to an organization's intranet. (See also *Extranet*.)

I/O. An abbreviation for *input/output*.

IP address. See *Internet Protocol address*.

ISP. See *Internet service provider*.

Java. A programming **language** designed for **programs** or **applets** used over the **Internet**.

JPEG. Joint Photographic Experts Group. A format for storing complex **graphics** in compressed form. The file extension *.jpeg* or *.jpg* indicates that a particular file uses this format.

Justification. Aligning lines of **text** at the left margin, the right margin, both margins, or the center. Text aligned at both margins is considered *fully justified*. Text aligned only at the left margin is said to have a *ragged right margin*. (See also ¶1344g-h.)

K or KB. See *Kilobyte*.

Kern. To make fine adjustments in the space between any two **characters**.

Key. To **enter characters** into the **memory** of a **computer**. (*Key* is being replaced by the word *type*. See also *Type*.)

Keyboard. The device used to **enter** information into a **computer**.

Keystroke. The depression of one key on a **keyboard**.

Keyword. A word or phrase that briefly identifies a **document**. Keywords serve as the basis for a variety of computer operations—for example, conducting an **online** search.

Killer app (short for application). Software that is considered “so great it will blow you away.”

Kilobyte. A measurement of the **storage** capacity of a device. One kilobyte represents 1024 **bytes**. *Kilobyte* may be abbreviated *K* or *KB*; however, *KB* is the clearer abbreviation since *K* also stands for the metric prefix *kilo* (meaning 1000).

Kluge (pronounced klooj). An expedient (but often inelegant) way to solve a problem when time is of the essence.

LAN. See *Network, local area*.

Landscape orientation. The positioning of a page so that information is printed across the long dimension of the paper. (See also *Portrait orientation*.)

Language. The **characters** and procedures used to write **programs** that a **computer** is designed to understand.

Laptop computer. A portable **computer**. Also known as a *notebook computer*.

Laser printer. A nonimpact **printer** that produces sharper **text** and **graphics** than any other type of printer. (See also *Dot matrix printer; Ink-jet printer*.)

LCD. See *Liquid crystal display*.

L33t. The term *l33t* (pronounced *leet*) is an **alphanumeric** expression derived from “elite.” This term is used to describe a person’s prowess in accessing restricted **Web sites**. (See also *W00t*.)

Line or paragraph numbering. The ability of a **program** to automatically number each line or paragraph sequentially in a **document**. The line or paragraph numbers can be deleted before the preparation of the final **printout**.

Line spacing. The ability of a **program** to automatically change vertical line spacing (for example, from double to single to double again).

Linux. A type of **open source software**. When combined with other components, Linux serves as an increasingly popular **operating system** that competes with Microsoft Windows.

Liquid crystal display (LCD). A type of **monitor** typically used on **laptop computers** or portable **computers**. (See also *Active matrix display; Flat-panel display*.)

Listserv. Any **software** that manages a **mailing list**. The most widely used programs are LISTSERV (as distinct from the generic terms *listserv* and *listserve*), Listproc, and Majordomo.

Load. To transfer information or **program** instructions into a **computer’s memory**.

Local area network (LAN). See *Network, local area*.

Log off or log out (v.). To exit or leave a **computer** system. (See ¶803f.)

Logoff or logout (n.). The process of exiting a **computer** system.

Log on or log in (v.). To **access** a **computer** system. (See ¶¶802, 803e.) *Log onto* and *log into* are not correct.

Logon or login (n.). The process of accessing a **computer** system.

M or MB. See *Megabyte*.

Macro. A time-saving feature (like telephone speed dialing) that allows the user to store in **memory** a set of **keystrokes** or **commands** that will accomplish a certain task.

Macro virus. A type of **virus** that attaches itself to **documents** or **word processing templates**.

Mail merge. The process of taking information from a **database** and inserting it into a form letter or other **document** in order to customize the document for an individual recipient. For example, mail merge can be used to create the inside address and the salutation for a form letter. (See also *Forms mode*.)

Mailbomb. A deluge of **e-mail** messages from one or more sources, deliberately intended to overload the recipient's **computer** and make it **crash**. A mailbomb is typically sent to punish someone guilty of **spamming** or some other serious breach of **netiquette**.

Mailing list. An **e-mail** discussion group devoted to one or more specific topics.

Mainframe. A large **computer** system.

Malware. **Software** that disrupts normal **computer** functions or sends a user's personal **data** without the user's authorization.

Maximize. A **command** used in a **graphical user interface (GUI)** that enlarges a **window** so that it fills a desktop.

Megabyte. A measurement of the **storage** capacity of a device. One megabyte represents more than 1 million **bytes**. *Megabyte* may be abbreviated *M* or *MB*; however, *MB* is clearer since *M* also stands for the metric prefix *mega* (meaning 1 million). A megabyte is often referred to as a "meg."

Megahertz (MHz). A measurement used to identify the speed of the **central processing unit**. One megahertz is equal to 1 million cycles per second.

Memory. The part of a **computer** that stores information. (See also *Storage*.)

Random-access memory (RAM). The temporary memory that allows information to be stored randomly and accessed quickly and directly (without the need to go through intervening **data**).

Read-only memory (ROM). The permanent memory of a **computer**; a set of instructions that has been built into the computer by the manufacturer and cannot be accessed or changed by the user.

Menu. A list of choices shown on the **display screen**. For example, a **format** menu would include such options as the type style and the type size to be selected. A menu is often referred to as a *pull-down menu*, a *drop-down menu*, or a *pop-up menu* because it appears **onscreen** after the user **clicks** the **menu bar** or some other item on the screen.

Menu bar. The bar across the top of the **screen** or **window** that displays the names of available **menus**.

Merge. A **command** to create one **file** by combining information that is stored in two different locations. For example, a **computer** can merge the **text** in a form letter with a mailing list to produce a batch of letters with a different name, address, and salutation on each letter. (See also *Mail merge*.)

Microcomputer. A small and relatively inexpensive **computer**, commonly consisting of a **display screen**, a **keyboard**, a **central processing unit**, one or more **disk drives**, and a **printer**, with limited **storage** based upon a **microprocessor**. (See also *Desktop computer*; *Laptop computer*.)

Microprocessor. An **integrated circuit** on a silicon **chip** that serves as the **central processing unit** of a **computer**.

Middleware. A type of **software** that connects different **applications** that were not originally designed to work together.

Minimize. A **command** used in a **graphical user interface (GUI)** that reduces a **window** to an **icon** or a **label**, usually at the bottom of a **desktop**.

MIPS. An acronym derived from millions of instructions per second. Used to measure the speed of a processor.

Modem. An acronym derived from modulator/demodulator. A device that (1) converts digital signals into tones for transmission over telephone lines and (2) converts the tones back into digital signals at the receiving end.

Monitor. The **display screen** of a **computer**.

Monospace font. See *Fixed-pitch font*.

Morph (from *metamorphosis*). To change one image into another by means of digital technology.

Motherboard. The **computer's** main **circuit board**, which contains the **central processing unit**, the **memory**, and expansion slots for additional circuit boards called *adapters* or *cards*. (See also *Adapter*.)

Mouse. A hand-operated electronic device used to move a **cursor** or pointer on the **display screen**. Mostly used with **microcomputers**. Referred to in Spanish as *el ratón*. (See also *Word of mouse*.)

Mouse arrest. To be placed under mouse arrest is to be denied further access to an **Internet service provider** or a **commercial online service** as a result of violating the terms of service.

Mouse elbow. A repetitive strain injury (similar to tennis elbow) that is caused by repeatedly using a **mouse**. (See also *Carpal tunnel syndrome*.)

Mouse potato. A person who sits glued to a **computer screen** (in the same way that a couch potato sits glued to a TV screen).

Mousetrapping. Blocking someone's exit from a **Web site**.

MS-DOS (pronounced *em-ess-dahs* or *-doss*). Derived from Microsoft disk operating system. An operating system used on the first IBM and IBM-compatible **microcomputers**.

Multimedia. The use of several types of media (such as **text**, **graphics**, animation, sound, and video) in a **document** or an **application**.

Multitasking. The ability of a **computer** to **execute** more than one **program** at a time. The derivative term “multislacking” means playing games at the computer instead of working.

Net. See *Internet*.

Netiquette. A set of guidelines for formatting and composing **e-mail** messages. (See also ¶¶1375–1389.)

Netizen. A “citizen” of the Net; an active participant in the **Internet community**. Netizens in general are sometimes referred to as *netkind*.

Network. A system of interconnected **computers**. (See also *Notwork*; *Sneakernet*.)

Local area networks (LANs) use cable to connect a number of computers within the same location or in close proximity.

Wide area networks (WANs) use telephone lines or other **telecommunications** devices to link computers in widely separated locations.

Internet is a system that links existing networks into a worldwide network.

Newbie. A newcomer to a **bulletin board system** or some other **network** facility.

Newsgroup. An electronic discussion group maintained over the **Internet** or tied into a **bulletin board system**. Each newsgroup is typically organized around a specific interest or matter of concern. Also called a *forum*.

Newsreader. A **program** that permits users to read and respond to messages posted on **Usenet**.

Notebook computer. A portable **computer**. Also known as a *laptop computer*.

Notwork. A **network** that does not live up to its advance billing. Also called a *nyetwork*.

Number crunching. Processing large amounts of numerical **data**.

Object linking and embedding (OLE). A process that permits the user to take material (referred to as an *object*) from one source and **insert** (*embed*) it in another **document**. If the user subsequently makes changes in the original material, those changes will be automatically transferred to the second document as a result of the OLE linking process. (See also *Dynamic data exchange*.)

OCR. See *Optical character reader*.

Offline. Refers to the state in which a **computer** is temporarily or permanently unable to communicate with another computer (even though it is turned on and capable of performing other functions). The term *offline* is also used humorously to refer to “real life.” The expression “Let’s take that offline” means “Let’s discuss that in private.”

Offscreen. Refers to any **computer** function that does not produce a display on the **screen**.

OLE (pronounced oh-lay). See *Object linking and embedding*.

Online. Refers to the state in which a **computer** is turned on and ready to communicate with other computers.

Onscreen. Refers to anything displayed on the **screen** of a **computer**.

Open. To transfer a file from a **disk** into the **memory** of a **computer**.

Open source software. **Software** that makes the underlying source code available to all users at no charge. Users may make changes and improvements as long as they do not try to sell the software commercially. **Linux** is the best example of open source software currently available.

Operating system (OS). **Software** that manages the internal functions and controls the operations of a **computer**.

Optical character reader (OCR). A device that can scan **text** from **hard copy** and **enter** it automatically into a **computer** for **storage** or **editing**. Also called an *optical scanner*.

Option button. An **onscreen** element that allows a user to select one option from a group of items. An empty circle precedes each option not selected. A dot appears in a circle to signify that the user has selected that option. Also referred to as a *radio button*.

Orphan protection. The ability of a **program** to prevent the first line of a paragraph from printing as the last line on a page. When the first line of a paragraph does appear as the last line on a page, it is referred to as an *orphan*. (See also *Widow protection*.)

OS. See *Operating system*.

Outlining. The ability of a **program** to automatically number and letter items typed in an indented **format**.

Output. The results of a **computer** operation.

Output device. A **hardware** component (such as a **monitor**, a **printer**, or a sound speaker) that delivers the results of **computer** operations to the user.

Overwriting. Recording and storing information in a specific location on a **storage** medium that destroys whatever had been stored there previously.

Page break. A **command** that tells the **printer** where to end one page and begin the next. (See also *Hard page break; Soft page break*.)

Page numbering. The ability of a **program** to automatically print page numbers on the pages that make up an entire **document**. If the document is revised and the total number of pages changes, the page numbering is automatically adjusted.

Pagination. The ability of a **program** to take information and automatically divide it into pages with a specified number of lines per page. If the information is changed because of the addition, deletion, or rearrangement of copy, the material will be automatically repaged to maintain the proper page length. (See also *Soft page break*.)

Palmtop computer. A portable computer smaller than a **notebook** (or **laptop**) **computer** that fits on the palm of your hand. Also called a **handheld computer**.

Papernet. Ordinary mail service. (See also *Voicenet*.)

Password. A user's secret identification code, required to **access** stored material. A procedure intended to prevent information from being accessed by unauthorized persons.

Paste. A **command** that transfers information from a **clipboard** and inserts it in another location. (See also *Cut and paste*.)

Patch. A small **program** that improves an existing piece of **software** or corrects an error in it.

PC. See *Personal computer*.

PDA. See *Personal digital assistant*.

PDF. See *Portable Document Format*.

Peripheral. A device that extends the capabilities of a **computer** (for example, a **printer**).

Personal computer (PC). A **microcomputer** for personal and office use.

Personal digital assistant (PDA). A palm-sized, handheld **computer**.

Personal information manager (PIM). A **database management system** that permits a user to **store** and **retrieve** a wide range of personal information (for example, names, addresses, phone numbers, appointments, and lists of people to call and things to do).

Phishing. A type of computer fraud that tries to trick users into revealing their passwords and other confidential information.

Pica. A measurement used for a **font**; equal to 1/6 inch or 12 **points**.

PIM. See *Personal information manager*.

Piracy. The illegal copying of **software** or other creative works.

Pitch. The number of monospace **characters** (each with exactly the same width) that will fit in a 1-inch line of **text**. (See also *Fixed-pitch font*.)

Pixel. An acronym derived from picture element. The smallest element (a dot) on a **display screen**. Pixels are used to construct images on the screen.

Platform. A term used to define the type of **microprocessor** and **operating system** on which a **computer** is based.

Plug-and-play. The ability to plug in a **peripheral** and have it work without difficulty. The term *plug-and-play* is now sometimes used to refer to a new employee who can immediately do the job without any preliminary training. Because of the problems some users have experienced with items so labeled, they refer instead to *plug-and-pray*.

POD. Publishing **on demand**. A process that allows for the printing of individual copies as orders come in (as distinguished from the traditional method of printing a number of copies on the basis of estimated sales for the foreseeable future).

Podcasting. Posting audio **files** online so that they can be **downloaded** to a portable audio player such as an MP3 player.

Point. A measurement that indicates the size of a **font**; 72 points equals 1 inch and 12 points equals 1 **pica**.

Pointer. An **onscreen** device that indicates the current position of the **mouse**.

Pop-up menu. See *Menu*.

Port. A socket on a **computer** into which an external device (such as a **printer** cable) can be plugged.

Portable Document Format (PDF). A **format** that makes it possible—with the help of Adobe Acrobat—to view documents that employ different **fonts**, various types of **graphics**, and complex layouts.

Portrait orientation. Positioning paper so that information is printed across the short dimension of the paper. (See also *Landscape orientation*.)

Posting. A message entered into a **network** (such as a **newsgroup**) or on a **Web site**.

Print preview. A **software** feature that reduces the pages of a **document** so that a full page (or two facing pages) can be seen on the screen before being printed. This feature permits the user to spot and correct problems in **format** and **page breaks**.

Printers. Output devices of various types that produce copy on paper. (See also *Dot matrix printer*; *Inkjet printer*; *Laser printer*.)

Printout. The paper copy of information produced on a **printer**.

Program. An established sequence of instructions that tells a **computer** what to do. The term *program* means the same as **software**.

Programming language. The rules, conventions, and specific **commands** used to write a **computer program**. Most programs must be converted into machine **language** or **binary code** so that the instructions can be performed on a specific **computer platform**.

Prompt. An **onscreen** symbol (for example, a **cursor**) that indicates where to **type** a **command**; a message that indicates what action is to be taken.

Proportional font. A **typeface** in which the width of each **character** varies (as in this sentence), so that the letter I takes much less space than the letter M. (See also *Font*.)

Protocol. A set of standards that permits **computers** to exchange information and communicate with each other.

P2P. Peer-to-peer (network).

Publishing on demand. See *POD*.

Pull-down menu. See *Menu*.

Push technology. A process that allows a user to obtain automatic delivery of specified information from the **Internet** to the user's **computer**—for example, stock market quotes, weather forecasts, and sports scores.

Radio button. See *Option button*.

RAM. See *Memory, random-access*.

Rave. To annoy someone by persistently talking about something. The act of raving is different from **flaming** in that flaming is deliberately provocative and even insulting, whereas raving is simply annoying because it goes on so long.

Read. To transfer information from an external **storage** medium into internal storage. (See also *Storage, external and internal*.)

Record (n.) A collection of all the information pertaining to a particular subject.

Redlining. A **word processing** feature that allows writers and editors to display (by means of a shaded panel or some other method) the additions and deletions they have made in a **document**. Redlining in drafts of reports, contracts, and manuscripts makes it easy for others to see the changes that have been made. All redlining is removed from the final version of the document.

Response time. The time a **computer** takes to **execute** a **command**.

Retrieve. To call up information from **memory** or **storage** so that it can be processed in some way.

ROM. See *Memory, read-only*.

Row. A horizontal block of **cells** in a table or **spreadsheet**. (See also *Column*.)

RSI. Repetitive strain injury; sometimes referred to as *chiplash*. (See also *Carpal tunnel syndrome; Mouse elbow*.)

Ruler. A bar (displayed on the **screen**) that shows the width of the page, the margin settings, the paragraph indentations, and the tab stops.

Save. To store a **program** or **data** on a **storage** device such as a **disk**.

Scanner. An **input** device that can copy a printed page into a **computer's memory**, thus doing away with the need to **type** the copy. A scanner can also convert artwork and photographs into a digital format and store these in memory.

Screen. See *Display screen*.

Screen dump. A **printout** of what is displayed on the **screen**.

Screen saver. A **program** that changes the **screen** display while the user is away from the **computer**. Originally intended to prevent images from becoming etched on a **monitor's** screen when that was still a problem. Now used primarily for esthetic purposes.

Scroll. To move information horizontally or vertically on a **display screen** so that one can see parts of a **document** that is too wide or too deep to fit entirely on one screen.

Scroll bar. An **onscreen** element that allows a user to **scroll** by using a **mouse**.

SCSI (pronounced scuz-zy). See *Small computer system interface*.

Search and replace. A **command** that directs the **program** to locate a **character string** or information (**text**, numbers, or symbols) wherever it occurs in a **document** and replace this material with new information. (See also *Global*.)

Search engine. A free **program** that helps Web users locate **data** by means of a **keyword** or concept. Among the most popular search engines are Google, Yahoo!, Excite, WebCrawler, and AltaVista.

Server. A **computer** that delivers **data** to other computers (**clients**) linked on the same **network**.

Shareware. **Software** that usually may be **downloaded** and used initially without charge; the author may subsequently ask for some payment. (Compare with *Freeware*.)

Shouting. The use of all caps in **e-mail**. This practice is considered a violation of **netiquette** and is actively discouraged.

Shovelware. Mediocre material used to fill up space on a **CD-ROM** or a **Web site**.

Sig block. The signature block that automatically appears at the end of every outgoing **e-mail** message. Also referred to as a *.sig file*.

Small computer system interface (SCSI). A type of **hardware** and **software interface** for connecting **peripherals** such as a **disk drive** or a **CD-ROM**.

Smiley. In **e-mail** messages, a facial expression constructed sideways (for the “lateral-minded”) with standard **characters**. Also referred to as an *emoticon* (*emotional icon*). For example:

:)	I'm smiling.	>:-)	I'm angry.	:	J	I'm being tongue-in-cheek.
:D	I'm laughing.	:@	I'm screaming.	:	+	I'm exhausted—my tongue
:-(I'm sad.	:&	I'm tongue-tied.			is hanging out.
:<	I'm very sad.	:x	My lips are sealed.	%)		I've been staring at the
:'(I'm crying.	#)	I'm feeling no pain.			screen too long.
;)	I'm winking.	:O	I'm shocked.	8-	I	What next?

Japanese smileys do not require you to turn your head sideways. For example:

^L^	I'm happy.	(>_<)	I'm angry.	(^_^)/	I'm waving hello.
^o^	I'm laughing out loud.	(@_@)	I'm stunned.	(:_)/	I'm waving good-bye.
\(^_^\)/	I'm joyful.	(!_!)	I'm shocked.	(=_=)	I'm sleepy.

Although smileys tend to be quite amusing, many people find them excessively cute. In any case, do not insert smileys in business correspondence except in informal messages, when you are sure the recipient will welcome them.

Snail mail. A term employed by **e-mail** users to refer to regular mail service.

Sneakernet. The procedure for transferring **files** from one **computer** to another when the computers are not connected by an electronic **network**. (Users remove **diskettes** or other **storage** devices from one computer and carry them on foot to another.)

Soft copy. Information shown on the **display screen**. (See also *Hard copy*.)

Soft hyphen. A hyphen that divides a word at the end of a line; considered soft (nonpermanent) because the hyphen will automatically be deleted if the word moves to another position as a result of a change in the **text**. (See also *Hard hyphen; Hyphenation*.)

Soft page break. A line inserted by the **program** to show where a page will end. If copy is added or deleted, the original **page break** will be replaced with a new soft page break at the appropriate place. (By contrast, a **hard page break** will remain fixed, no matter what changes are made in the copy.) (See also *Pagination*.)

Soft return. A **software** feature that automatically breaks **text** between words at the right margin. The line ending is considered soft (nonpermanent) because the line ending will change if the user adds or deletes **text**. (See also *Hard return; Word wrap*.)

Software. The instructions that a **computer** needs to perform various functions. The term *software* means the same as **program**. (See also *Hardware*.)

Sort. To arrange **fields, records**, or **files** in a predetermined sequence.

Spam (n.). The electronic equivalent of junk mail; also called *unsolicited commercial e-mail* (UCE). (See also *Ham*.)

Spam (v.). To send an **e-mail** message to a great number of recipients without regard for their need to know. A user who spams sometimes receives a **mailbomb** in return as a form of retaliation.

Spider. An automated **program** that searches the **Internet** for new **Web sites** and indexes their **URLs** and content descriptions in a **database** for examination by a **search engine** for matches.

Spim. Spam that is delivered by **instant messaging** (IM Spim).

Spit. Spam that is delivered by **Internet telephony** (IT).

Split screen. The ability of some **programs** to display information in two or more different areas on the screen at the same time.

Spreadsheet. A **program** that provides a worksheet with **rows** and **columns** to be used for calculations and the preparation of reports.

Spyware. **Software** that enables a user to track someone's **computer** activities without that person's consent.

Storage. The **memory** of a **computer**.

External storage. A magnetic medium such as a **disk**, **diskette**, or tape used to store information; can be removed from the **computer**.

Internal storage. An integral component of a **computer**; cannot be removed.

Store. To place information in **memory** for later use.

Streaming. The process of sending and temporarily storing large amounts of audio or video information in small pieces and playing them back on the **computer** so that there is a continuous flow.

Style sheet. A collection of the user's formatting decisions regarding **font**, type size, margins, **justification**, paragraph indentations, and the like.

Surfing the Net. Browsing through various **Web sites** on the **Internet** in search of interesting things.

Surge protector. A device that protects **computer hardware** from being damaged by sudden increases in voltage.

SYSOP (pronounced siss-op). An acronym derived from system operator. A person who operates a **bulletin board system**.

Tab grid. A series of preset indentations (usually a half inch apart). If the tabs are reset by the user, the grid will change to show the new location of the tabs.

Tablet. A computer that accepts handwritten notes entered on the **display screen** by means of an electronic pen. The notes are then converted into text.

TCP/IP. See *Transmission Control Protocol/Internet Protocol*.

Telecommunications. The process of sending and receiving information by means of telephones, satellites, and other devices.

Telecommuter. An employee who works away from the office (usually at home) and uses a **computer** (1) to **access** needed information on the organization's **intranet** and the **Internet** and (2) to communicate with other employees, suppliers, and customers or clients.

Teleconferencing. Conducting a conference by using **computers**, video, and **telecommunications** to share sound and images with others at remote sites.

Telnet. A **protocol** that allows a **computer** to connect with a **host computer** on the **Internet**. The use of Telnet has diminished as the Web's **hypertext transfer protocol (HTTP)** has become the dominant protocol.

Template. A preestablished **format** for a **document**, stored in a **computer**. The template determines the margins, the type style and size to be used for the **text**, placement instructions for various elements (such as the date line), and design specifications for certain items (such as a letterhead). A user can simply call up the appropriate template, **insert** text where needed, and then print a final document. The user can modify the original template or create a new template to satisfy personal preferences.

Terminal. Any device that can transmit or receive electronic information.

Text. Broadly speaking, the material displayed on a **screen** or printed on paper. Within a given **document**, the term refers to the body of the document as distinct from **headers**, **footers**, and other elements.

Text entry. The initial act of typing that places **text** in **storage**. (See also *Type*.)

Thread. A series of posted messages that represents an ongoing discussion of a specific topic in a **bulletin board system**, a **newsgroup**, or a **Web site**.

Toolbar. An onscreen element that offers instant **access** to commonly used **commands**. The commands are represented by **icons** on a row of buttons at the top of the **screen**. Also called a *button bar*.

Touchpad. The device on a **laptop computer** that takes the place of a **mouse**.

Touchscreen technology. The technology that permits a user to perform a function simply by touching the **screen** in an appropriate spot.

Trackball. An input device in which the user rolls a ball (usually with a thumb) to move the **pointer**.

Transfer rate. The rate at which **data** is transmitted between two **computers** or other electronic equipment.

Transmission Control Protocol/Internet Protocol (TCP/IP). A collection of over 100 **protocols** that are used to connect **computers** and **networks**.

Treeware. Anything printed on paper.

Trojan horse. A type of **computer virus** that is hidden within an innocent-looking program.

Type. To enter **characters** into the **memory** of a **computer**. For a number of years the verb *type* began to be replaced by the verb *key* as a way of emphasizing the difference between a **computer** and a typewriter. However, the simpler verb *type* has made a comeback in computer terminology and is now the word commonly seen in users' manuals and on **display screens**.

Typeface. See *Font*.

Typeover. See *Overwriting*.

Uniform resource locator (URL). The specific **Internet** address for a resource such as an individual or an organization. (See also *World Wide Web*.)

Uninterruptible power supply (UPS). A battery-powered backup system that provides enough electricity to a **computer** during a power outage (or, in most cases, a brownout or power surge) so that the user can save **files** before shutting down the computer.

Universal Serial Bus (USB). A common standard for connecting multiple **peripherals** to a **computer** as needed.

Upload. To transfer information from a **client computer** to a **host computer**.

UPS. See *Uninterruptible power supply*.

URL (pronounced you-are-el or erl). See *Uniform resource locator*.

USB. See *Universal Serial Bus*.

Usenet (from Users' Network). A **bulletin board system** or **Internet** site that hosts thousands of **newsgroups**.

User-friendly. Describes **hardware** or **software** that is easy to use. A related phrase, *user-obsequious*, describes hardware or software that is so simplistic in design that it is virtually unusable.

Userid (pronounced user-eye-dee). The name a person must use, along with a **password**, to gain **access** to restricted areas on a **network**.

Vaporware. **Software** that is being widely advertised, even though it is still in the developmental stage and has serious problems that may doom its eventual release. The premature marketing of software is designed to deter prospective customers from buying competitive products already available for sale. (See also *Brochureware*.)

Video display terminal (VDT). See *Display screen*.

Virtual reality. See *Cyberspace*.

Virus. A piece of **computer** code designed as a prank or malicious act to spread from one computer to another by attaching itself to other **programs**. Some viruses simply cause a humorous message to appear on the screen. Some cause minor **glitches**, but others cause serious damage to a computer's **memory** or **disks**. Some viruses flood an organization's Web site, interrupting or entirely preventing access to the organization's customers. (See also *Antivirus software; Denial of service attack*.)

Voice over Internet Protocol (VoIP). The transmission of voice communications by means of the **Internet Protocol**. VoIP is an inexpensive alternative to long-distance telephone calls.

Voicenet. Ordinary telephone service.

VoIP. See *Voice over Internet Protocol*.

WAIS (pronounced ways). See *Wide-Area Information Server*.

WAN. See *Network, wide area*.

Web. See *World Wide Web*.

Web browser. Software that permits a user—with a click of a **mouse**—to locate, display, and download **text**, **video**, **audio**, and **graphics** stored in a **host computer** on the Web. The most common Web browsers now in use are Internet Explorer and Mozilla Firefox.

Web site. One or more related pages created by an individual or an organization and posted on the **World Wide Web**. (See also *Home page*.)

Webcam. A video camera that sends live images over the **Internet** to a **Web site**.

Webcaster. An **application** that can be custom-tailored to satisfy an individual user's need for constantly updated information in specific areas. A Webcaster, when appropriately programmed, will automatically deliver the needed information to the user's **computer**. (See also *Push technology*.)

Webmaster. The person who maintains a specific **Web site** and is responsible for what appears there.

Webzine. See *E-zine*.

Wide-Area Information Server (WAIS). An **Internet** search system that will locate **documents** that contain **keywords** specified by the user.

Wide area network (WAN). See *Network, wide area*.

Widow protection. The ability of a **program** to avoid printing the last line of a paragraph as the first line on a page. When the last line of a paragraph does appear as the first line on a page, it is referred to as a **widow**. (See also *Orphan protection*.)

Wi-Fi. Wireless fidelity. A process that permits high-speed wireless transmission of **data**.

Wiki. A procedure that permits a **Web site** to be continually edited or added to by those who visit the site.

Window. A frame that permits users to view messages they have received or **documents** they are working on.

Windowing. The ability of a **program** to split its **display screen** into two or more segments so that the user can view several different **documents** or perform several different functions simultaneously. (See also *Split screen*.)

Windows. A Microsoft **operating system** used on the vast majority of **PCs**.

Wizard. An interactive feature within an **application** that helps a user through each step of a task, such as creating a customized **document** or adding **hardware**. The term *wizard* is also used to refer to the person in an organization who can quickly find and fix everyone else's **computer** problems.

Woot. The term *w00t* is an **alphanumeric** acronym that stands for “we owned the other team.” This term is typically employed by Internet users to express happiness or joy. (See also *L33t*.)

Word of mouse. Gossip spread by **e-mail**.

Word processing. The electronic process of creating, formatting, **editing**, proofreading, and printing **documents**. (See also *Information processing*.)

Word wrap. A **software** feature that detects when a word will extend beyond the right margin and automatically transfers it to the beginning of the next line.

Workstation. A **desktop computer** that runs **applications** and serves as an access point in a local area **network**. (See also *Network*.)

World Wide Web. The component of the **Internet** that combines audio, video, and **graphics** with **text**. Also called the *Web* or *WWW*. (*WWW* is sometimes pronounced *triple-dub*, to avoid pronouncing each W separately.)

Worm. A type of **computer virus** that runs a **program** to destroy **data** on a user's **hard drive**. Worms spread by sending copies of themselves to everyone on the user's list of e-mail addresses.

WWW. See *World Wide Web*.

WYSIWYG (pronounced wiz-z-y-wig). An acronym derived from what you see is what you get. A **com-**
puter design standard that lets the user see on the screen how a page will look when it is printed.

Zombie. A **computer** that has been hijacked by a **cracker** without the owner's knowledge and used to perform malicious tasks on the Internet.

Zone. See *Domain*.

This index contains many entries for individual words and expressions. If you are looking for a specific word that is not listed, refer to ¶719, which provides a 15-page guide to words that are frequently confused because they sound alike or look alike; for example, *cite–sight–site* or *stationary–stationery*. You may also want to scan the table of contents for Section 11, which provides guidelines for the proper use of terms like *already–all ready* or *Capital–capitol–Capitol*. The material included in the two appendixes available only on the GRM Web site—Appendix C, “Rules for Alphabetic Filing,” and Appendix D, “Glossary of Computer Terms”—is not indexed here. However Appendixes C and D may be searched electronically at <www.gregg.com>.

NOTE: The boldface numbers in this index refer to paragraph numbers; the lightface numbers refer to page numbers.
